2. Activation by [**ticket insertion**][**vehicle detector**][**credit card in/out**][**license plate recognition**][**automatic vehicle identification**][**proximity**][**scanned electronic or hardcopy media**][**access card**].

3. Activation results in the following:

    a. Valid Prepayment: Signal is automatically sent to raise barrier gate.
    b. Payment Prompt: Parking fee is calculated and displayed for payment.

4. Compute multiple parking fees based on recorded entry times.
5. Compute multiple taxes by percentage and fixed amount.
6. Programmable lost ticket function.
7. Display fee.
8. Accept payment by cash and [**credit card**][**debit card**][**scanned media**][**smart card**][**prepaid value card**][**and**][**merchant ticket**].
9. Accept discounted coupons.
10. Compute change.
11. Print receipts on demand.
12. Print validation on ticket.
13. Print audit trail.
14. Programmable for up to [**six**] fee structures.
15. Test mode to verify accuracy of fee structure program.
16. Programmable time.
17. Programmable facility code.
18. Programmable grace period.
19. Programmable display.
20. Programmable timer for closing barrier gate.
21. Programmable merchant validations.
22. Built-in service diagnostics.
23. Print cash audit, revenue, operational, and statistical reports on demand.
24. Duress alarm output for emergencies.
25. Cancel transaction function.

D. Cabinets: Fabricated from cold-rolled steel sheet with seams welded and ground smooth, approximately 36 inches wide by 18 inches deep by 60 inches tall (914 mm wide by 457 mm deep by 1524 mm tall). Provide single, gasketed access door with flush-mounted locks. Furnish [two] keys for each lock[all locks keyed alike]. Fabricate cabinet with internal reinforcing and four mounting holes accessible only from inside cabinet.

    1. Finish cabinet, interior and exterior, with manufacturer's standard [**white**][**yellow**] baked-enamel or powder-coat finish.

2.9 FEE COMPUTERS

A. Fee Computers: Provide modular[**PC-based**] system. Register permanent record of each transaction in computer's memory.

    1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

        a. [**Amano Cincinnati, Inc**]
        b. [**ASPS Access Security & Parking Systems Inc.**]
        c. [**Canadian Parking Equipment Ltd./American Parking Equipment Inc.**]
        d. [**Engineered Parking Systems, Inc**]
        e. [**Falcon Eye Global Security, LLC**]
        f. [**Parking Systems, Inc.**]

g. [**Zeag; HUB Parking Technology; FAAC Group**]

B. Physical Characteristics:

1. Touchscreen display.
2. Battery backup for clock and RAM memory.
3. Communication port.
4. [**Cash drawer**][**Two cash drawers**].
5. Standard ticket reader.
6. Magnetic stripe ticket reader.
7. Barcode ticket reader.
8. Credit card reader[**with smart card reader**].
9. Access card reader.
10. Proximity access reader.
11. Automatic Vehicle Identification reader.
12. License plate recognition.
13. [**Keyed**][**Keyless-membrane**] keypad.
14. Detachable printer.

C. Operational Characteristics:

1. Compute multiple parking fees based on entry times on ticket from ticket dispenser.
2. Compute multiple taxes by percentage and fixed amount.
3. Programmable lost ticket function.
4. Display fee on remote fee display device.
5. Credit card in/out.
6. Accept payment by cash and [**credit card**][**debit card**][**smart card**][**prepaid value card**][**and**][**merchant ticket**].
7. Accept discounted coupons.
8. Control independent cash drawer.
9. Compute change.
10. Print receipts.
11. Print validation on ticket.
12. Print audit trail.
13. Reload value cards.
14. Interface to automatic barrier gate.
15. Programmable with up to [**six**] fee structures.
16. Programmable time.
17. Programmable keys.
18. Programmable for special events validations.
19. Programmable for automatic activation for limited date and time validations.
20. Programmable merchant validations.
21. Programmable valet parking.
22. Programmable hotel guest parking.
23. Three levels of security including cashier, supervisor, and master.
24. Recall last transaction.
25. Test mode to verify accuracy of fee structure program.
26. Built-in service diagnostics.
27. View cash audit, revenue, operational, and statistical reports on screen or print on demand.
28. Duress alarm output for emergencies.

D. Cash Drawer: Fabricated with a removable tray and drawer, with five compartments for paper currency and five compartments for coins.

E. Remote Fee Display: Single-faced signs designed for use with fee computer, consisting of **1-inch- (25-mm-)** tall, digital displays or LCDs contained in welded steel bodies with baked-enamel or powder-coat

finish.

1. Messages: Amount due, "Thank You," "Closed," and time in A.M./P.M. format.
2. Mounting: [**Front of cashier's booth**][**42-inch- (1067-mm-) high pedestal**].

2.10 MISCELLANEOUS PARKING CONTROL EQUIPMENT

A. "Lot Full" Signs : Single-faced signs consisting of illumination source contained in welded steel bodies with extended hood and baked-enamel finish. Sign copy shall be [**4 (102)**] **inches (mm)** tall.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ASPS Access Security & Parking Systems Inc.**]
    b. [**CAME Americas Automation LLC**]
    c. [**Engineered Parking Systems, Inc**]

2. Type: [**Flashing**][**Nonflashing**].
3. Operation: [**Manual by push button**][**Automatic by barrier gate controller**].
4. Illumination: [**Traffic signal lamps and colored**][**LED bulb and clear**] acrylic sign face.
5. Mounting: [**Top of barrier gate cabinet**][**42-inch- (1067-mm-) high pedestal**].

2.11 PARKING FACILITY MANAGEMENT SOFTWARE

A. Parking Facility Management Software: Manufacturer's standard software that is compatible with security-access control system and that provides automatic facility monitoring, supervision, and remote control of parking control equipment from one or more locations.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Amano Cincinnati, Inc**]
    b. [**ASPS Access Security & Parking Systems Inc.**]
    c. [**Canadian Parking Equipment Ltd./American Parking Equipment Inc.**]
    d. [**WPS Parking Systems; Dynniq Group**]

B. Operation:

1. Collect data for revenue and activity reporting.
2. Collect data for access and space control.
3. Notification services.
4. On-line prepaid parking.
5. Event management.
6. Validation solutions.
7. License plate recognition systems.
8. Pay-by-phone.
9. Loyalty programs.
10. Track tickets.
11. Programmable parking control equipment.

2.12 ACCESS CONTROL UNITS

A. Access Control Units: Provide access control unit that activates barrier gates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Amano Cincinnati, Inc**]
b. [**ASPS Access Security & Parking Systems Inc.**]
c. [**Canadian Parking Equipment Ltd./American Parking Equipment Inc.**]
d. [**DoorKing, Inc**]
e. [**Engineered Parking Systems, Inc**]
f. [**Falcon Eye Global Security, LLC**]
g. [**Nortek Security & Control, LLC**]
h. [**Parking Systems, Inc.**]

B. Unit Housing: Fabricate from [**welded cold-rolled steel or aluminum sheet**][**plastic**] with weatherproof front access panel equipped with flush-mounted lock and [**two**] keys. Provide face-lighted unit fully visible at night.

1. Steel Finish: Manufacturer's standard baked-enamel or powder-coat finish system.

C. Card Reader Controlled Unit: Functions only when authorized card is presented.

1. System: [**Magnetically coded, single-code system activated by coded card**][**Programmable, multiple-code capability permitting validation or voiding of individual cards**].

a. Permit four different access time periods.

2. Reader Type: [Swipe][Proximity].

a. Swipe reader for [**magnetic-stripe**][**barcode**][**Wiegand**] cards.
b. Insertion reader for [**magnetic-stripe**][**barcode**][**Wiegand**] cards.
c. Proximity reader for proximity cards.

3. Operation: [**Standalone**][**Online communication to remote parking control system computer**][**Online communication to remote security-access control system computer**].
4. Characteristics: [**Timed antipassback**][**Limited-time usage**][**Capable of monitoring and auditing barrier gate activity**][**Digital display or LCD**][**Programmable by PDA (personal digital assistant) by infrared interface**].
5. Mounting: [**With pedestal**][**Wall**][**In enclosed cabinet**][**As indicated on Drawings**].

D. Digital Keypad Controlled Unit: Functions only when authorized code is entered on [**keyed**][**keyless-membrane**] keypad.

1. System: [**Multiple-code capability**][**Programmable, multiple-code capability**].

a. Multiple-code capability of no fewer than [**five**][**100**][**500**] possible individual codes.
b. Programmable, multiple-code capability permitting validation or voiding of no fewer than [100][2500][10,000] possible individual codes, consisting of [one to six] digits[and permitting four different access time periods].

2. Operation: [**Standalone**][**Online communication to remote parking control system computer**][**Online communication to remote security-access control system computer**].

3. Characteristics: [**Timed antipassback**][**Limited-time usage**][**Capable of monitoring and auditing barrier gate activity**].
4. Mounting: [**With pedestal**][**Wall**][**As indicated on Drawings**].

E. Radio-Controlled System: Digital access control system consisting of code-compatible universal coaxial receiver[one per barrier gate][where indicated on Drawings], remote antenna with coaxial cable and mounting brackets, and [one permanently mounted][four portable] transmitter(s) per receiver designed to operate barrier gates. Provide programmable transmitter with multiple-code capability permitting validation or voiding of no fewer than [1000][10,000] codes per channel configured for the following functions:

1. Transmitters: [**Single-button**][**Triple-button**] operated.

a. Single-button operated with [**open**][**open and close**] functions.
b. Triple-button operated with open, close, and stop functions.

1) Provide transmitters featuring [**two**][**three**][**four**] independent channel settings controlling separate receivers for operating more than one barrier gate from each transmitter.

2.13 ANCHORAGES

A. Anchor Bolts: [**Galvanized**][**Stainless steel**].

1. Hot-dip galvanized according to ASTM A153/A153M and ASTM F2329/F2329M.
2. Stainless steel, [**Type 304**][**Type 316**][**Type 304 or 316 as indicated**].

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances, including equipment bases; accurate placement, pattern, and orientation of anchor bolts; critical dimensions; and other conditions affecting performance of the Work.

B. Examine roughing-in for electrical and communication systems to verify actual locations of connections before parking control equipment installation.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Excavation for Traffic Controllers: Saw cut existing pavement for recessed traffic controllers and hand-excavate recesses to dimensions and depths and at locations as required by traffic controller manufacturer's written instructions and as indicated on Drawings.

3.3 INSTALLATION, GENERAL

A. Install parking control equipment as required for complete and integrated installation.

1. Rough-in electrical connections.

3.4 INSTALLATION OF AUTOMATIC BARRIER GATES

A. Anchor cabinets to concrete bases with anchor bolts or expansion anchors, and mount barrier gate arms.

1. Install barrier gates according to UL 325.

3.5 INSTALLATION OF VEHICLE DETECTORS

A. [**Cut grooves in pavement and bury**][**Bury**] and seal wire loop at locations indicated on Drawings according to manufacturer's written instructions. Connect to parking control equipment operated by detector.

3.6 INSTALLATION OF TRAFFIC CONTROLLERS

A. Anchor controllers to [**recessed concrete bases**][**driveway surfaces**] with anchor bolts or expansion anchors.

3.7 INSTALLATION OF ENTRY TERMINALS

A. Attach cabinets to concrete bases with anchor bolts or expansion anchors.

1. Connect equipment to remote computer.
2. Load ticket dispenser with supply of tickets.

3.8 INSTALLATION OF EXIT TERMINALS

A. Attach cabinets to concrete bases with anchor bolts or expansion anchors.

1. Connect equipment to remote computer.
2. Load ticket dispenser with supply of tickets.

3.9 INSTALLATION OF PAY STATIONS

A. Attach cabinets to concrete bases with anchor bolts or expansion anchors.

1. Connect equipment to remote computer.
2. Load ticket dispenser with supply of tickets.

3.10 INSTALLATION OF FEE COMPUTERS

A. Install computers at locations indicated, including connecting to peripheral equipment[**and remote computers**].

3.11 INSTALLATION OF CARD READER PEDESTALS

A. [**Pad**][**In-ground**] mount with mounting bolts.

3.12 INSTALLATION OF ELECTRICAL

A. Connect wiring according to Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Ground equipment according to Section 260526 "Grounding and Bonding for Electrical Systems."

3.13 FIELD QUALITY CONTROL

A. Testing Agency: [**the Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform the following tests and inspections[**with the assistance of a factory-authorized service representative**]:

1. Perform each visual and mechanical inspection and electrical test stated in NETA ATS. Certify compliance with test parameters.
2. Operational Test: After electrical circuitry has been energized, start units to confirm proper motor rotation and unit operation.
3. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

D. Parking control equipment will be considered defective if it does not pass tests and inspections.

E. Prepare test and inspection reports.

3.14 ADJUSTING

A. Adjust parking control equipment to function smoothly, and lubricate as recommended by manufacturer.

B. Confirm that locks engage accurately and securely without forcing or binding.

C. After completing installation of exposed, factory-finished parking control equipment, inspect exposed finishes and repair damaged finishes.

3.15 PROTECTION

A. Remove barrier gate arms during the construction period to prevent damage, and install them immediately before Substantial Completion.

3.16 MAINTENANCE SERVICE

A. Maintenance Service Description: Beginning at Substantial Completion, maintenance service shall

include [**three**][**six**][**nine**][**12**] months' full maintenance by [**skilled employees of parking control equipment Installer**][**manufacturer's authorized service representative**]. Include monthly preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper parking control equipment operation. Parts and supplies shall be manufacturer's authorized replacement parts and supplies.

3.17 SOFTWARE SERVICE AGREEMENT

A. Technical Support: Beginning at Substantial Completion, service agreement shall include software support for [**two**] years.

B. Upgrade Service: At Substantial Completion, update software to latest version. Install and program software upgrades that become available within [**two**] years from date of Substantial Completion. Upgrading software shall include operating system and new or revised licenses for using software.

1. Upgrade Notice: At least [**30**] days to allow the Owner to schedule and access the system and to upgrade computer equipment if necessary.

3.18 DEMONSTRATION

A. [**Engage a factory-authorized service representative to train**][**Train**] the Owner's maintenance personnel to adjust, operate, and maintain parking control equipment.

SECTION 11 13 13 00 - LOADING DOCK BUMPERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes loading dock bumpers.

B. Related Requirements:

1. Section 111319 "Stationary Loading Dock Equipment" for loading dock bumpers that are integral with dock levelers.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of loading dock bumper.

B. Shop Drawings: For dock bumpers. Include plans, elevations, sections, and attachment details.

PART 2 - PRODUCTS

2.1 LOADING DOCK BUMPERS

A. Dock Bumpers: Surface-mounted bumpers; of type, size, and construction indicated; designed to absorb kinetic energy and minimize damage to loading dock structure.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Floor Products Company, Inc**]
b. [**Beacon Industries, Inc**]
c. [**Chalfant Sewing Fabricators, Inc**]
d. [**Durable Corporation**]
e. [**Hugger Dock Equipment Company; Columbus Foam Products, Inc.**]
f. [**Kelley; Entrematic; ASSA ABLOY**]
g. [**Pioneer Dock Equipment**]
h. [**Rite-Hite Holding Corporation**]
i. [**Rotary Products Inc**]
j. [**Serco; Entrematic; ASSA ABLOY**]
k. [**Super Seal Mfg. Ltd**]
l. [**Vestil Manufacturing Company**]

2. Source Limitations: Obtain from single source from single manufacturer.

B. Laminated-Tread Loading Dock Bumper : Fabricated from multiple, uniformly thick plies cut from fabric-reinforced rubber tires. Laminate plies under pressure on not less than two **3/4-inch- (19-mm-)** diameter, steel supporting rods that are welded at one end to **1/4-inch- (6-mm-)** thick, structural-steel

end angle and secured with a nut and angle at the other end. Fabricate angles with predrilled anchor holes and sized to provide not less than **1 inch (25 mm)** of tread plies extending beyond the face of closure angles.

1. Thickness: [**4-1/2 inches (114 mm)**][**6 inches (152 mm)**][**As indicated on Drawings**].
2. Horizontal Style: [**6 inches (152 mm)**][**10 inches (250 mm)**][**12 inches (305 mm)**] high by [**length indicated on Drawings**].
3. Vertical Style: **8 inches (203 mm)** wide by [**20 inches (508 mm) high**][**24 inches (610 mm) high**][**36 inches (914 mm) high**][**height indicated on Drawings**].

C. Molded-Rubber Loading Dock Bumpers : Fabricated from molded-rubber compound reinforced with nylon, rayon, or polyester cord; with Shore A durometer hardness of 80, plus or minus 5, when tested according to ASTM D2240; of size and configuration indicated. Fabricate units with not less than two predrilled anchor holes.

1. Configuration: [**T shape**][**Inverted-L shape**][**Square**][**Rectangular**][**As indicated on Drawings**].
2. Thickness: [**2 inches (50 mm)**][**3 inches (76 mm)**][**4 inches (102 mm)**][**6 inches (152 mm)**][**As indicated on Drawings**].

D. Extruded-Rubber Loading Dock Bumpers : Fabricated from ASTM D2000, extruded synthetic rubber with Shore A durometer hardness of 75, plus or minus 5, when tested according to ASTM D2240; of size and configuration indicated. Furnish units with predrilled anchor holes and concealed, flat, steel mounting bar.

1. Configuration: [**Flat or ribbed, with 2-inch (50-mm) nominal thickness and 9-inch (229-mm) height**][**4-1/2-inch- (114-mm-) wide base and 4-inch (102-mm) depth with half-oval shape that compresses and returns to original shape**][**As indicated on Drawings**].

E. Steel-Face, Laminated-Tread Loading Dock Bumpers : Fabricated from multiple, uniformly thick plies cut from fabric-reinforced rubber tires and with **3/8-inch (9.5-mm)** steel faceplate of same size as rubber surface. Laminate plies under pressure on not less than two **3/4-inch- (19-mm-)** diameter, steel supporting rods that are welded at one end to **1/4-inch- (6-mm-)** thick, structural-steel end angle and secured with a nut and angle at the other end. Fabricate angles with predrilled anchor holes and sized to provide not less than **1 inch (25 mm)** of tread plies extending beyond the face of closure angles. Weld faceplate to two steel support brackets, which shall extend back to and engage **3/4-inch- (19-mm-)** diameter support rods in elongated holes, allowing steel face to float on impact.

1. Thickness: [**4-1/2 inches (114 mm)**][**6 inches (152 mm)**][**As indicated on Drawings**].
2. Horizontal Style: [**6 inches (152 mm)**][**10 inches (250 mm)**][**12 inches (305 mm)**] high by [**length indicated on Drawings**].
3. Vertical Style: **8 inches (203 mm)** wide by [**20 inches (508 mm) high**][**24 inches (610 mm) high**][**36 inches (914 mm) high**][**height indicated on Drawings**].

F. Anchorage Devices: Galvanized-steel anchor bolts, nuts, washers, bolts, sleeves, cast-in-place plates, and other anchorage devices as required to fasten bumpers securely in place and to suit installation type indicated. Hot-dip galvanized according to ASTM A153/A153M or ASTM F2329/F2329M.

G. Materials: ASTM A36/A36M for steel plates, shapes, and bars. Hot-dip galvanize according to ASTM A123/A123M.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION, GENERAL

A. Loading Dock Bumpers: Attach loading dock bumpers to face of loading dock in a manner that complies with requirements indicated for spacing, arrangement, and position relative to top of platform and anchorage.

1. Welded Attachment: Plug-weld anchor holes in contact with steel inserts and fillet weld at other locations.
2. Bolted Attachment: Attach dock bumpers to preset anchor bolts embedded in concrete or to cast-in-place inserts or threaded studs welded to embedded-steel plates or angles. If preset anchor bolts, cast-in-place inserts, or threaded studs welded to embedded-steel plates or angles are not provided, attach dock bumpers by drilling and anchoring with expansion anchors and bolts.
3. Screw Attachment: Attach dock bumpers to wood construction with lag bolts as indicated.

3.3 ADJUSTING

A. After completing installation of exposed, factory-finished dock bumpers, inspect exposed finishes and repair damaged finishes.

END OF SECTION 11 13 13 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 11 13 16 00 - LOADING DOCK SEALS AND SHELTERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Foam-pad loading dock seals.
2. Inflatable loading dock seals.
3. Frame-type loading dock shelters.
4. Inflatable loading dock shelters.
5. Transparent-strip door curtains.

1.2 COORDINATION

A. Coordinate sizes and configurations of dock seals with finish grade slopes, walls, dock configuration, doors, dock bumpers, and other adjacent construction.

B. Coordinate sizes, configurations, and mounting of transparent-strip door curtains with walls, doors, dock levelers, and other adjacent construction.

C. Electrical System Roughing-in: Coordinate layout and installation of motor/blower and activation switch with connections to power supplies[**and interlock to other dock equipment**].

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
2. Include electrical characteristics of inflatable blower motor.

B. Shop Drawings:

1. Include plans, elevations, sections, and attachment details.
2. Detail assemblies and indicate dimensions, weights, required clearances, method of field assembly, components, and location and size of anchors and field connection.
3. Include diagrams for power, signal, and control wiring of inflatable blower motor.

C. Samples: For each exposed product and for each color and texture specified.

D. Samples for Initial Selection: For each type of fabric indicated.

E. Samples for Verification: For each type of fabric indicated.

1.4 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For inflatable units to include in operation and maintenance manuals.

1.5 FIELD CONDITIONS

A. Field Measurements: Verify actual dimensions of dock openings and contiguous construction by field measurements before fabrication.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

2.2 FOAM-PAD LOADING DOCK SEALS

A. Foam-Pad Dock Seals: Dock seals consisting of fabric-covered foam pads designed to compress **4 to 5 inches (102 to 127 mm)** under pressure of truck body to form an airtight seal at jambs and head of loading dock openings; of type, size, and construction indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Beacon Industries, Inc**]
b. [**Blue Giant Equipment Corporation**]
c. [**Chalfant Sewing Fabricators, Inc**]
d. [**Fairborn U.S.A., Inc.**]
e. [**Kelley; Entrematic; ASSA ABLOY**]
f. [**McGuire; Systems, LLC**]
g. [**Nordock Inc.**]
h. [**NOVA Technology International, L.L.C.**]
i. [**Pentalift Equipment Corporation**]
j. [**Pioneer Dock Equipment**]
k. [**Rite-Hite Holding Corporation**]
l. [**Rotary Products Inc**]
m. [**Serco; Entrematic; ASSA ABLOY**]
n. [**Super Seal Mfg. Ltd**]
o. [**Vestil Manufacturing Company**]

2. Source Limitations: Obtain from single source from single manufacturer.

B. Stationary Head Pad: [8 inches (203 mm)][12 inches (305 mm)][18 inches (457 mm)][24 inches (610 mm)] high and same depth as jamb pads[beveled]; sized for opening width.

C. Adjustable Head Pad: [**18 inches (457 mm)**][**24 inches (610 mm)**][**30 inches (762 mm)**] high and same depth as jamb pads; sized for opening width; with manufacturer's standard hardware and tension spring or counterweight mechanism for adjusting pad height.

D. Jamb Pads: [**Square**][**Beveled; tapered to reduce opening width**][**V-shaped**].

1. Nominal Size: [**8 inches (203 mm) wide**][**12 inches (305 mm) wide**][**As indicated on**

Drawings] and sized for opening height.

E. Construction: Consisting of single- or double-ply, coated, fabric-covered, urethane-foam core with supporting frame. Fabricate jamb and head pads of same depth and sized for opening width.

1. Wood Support Frame: Factory-painted[pressure-treated] wood; with steel mounting hardware.
2. Steel Support Frame: Steel channel frame of manufacturer's standard weight, shape, and finish; with steel mounting hardware.

    a. Steel Finish: Hot-dip galvanize components to comply with the following:

        1) ASTM A123/A123M for iron and steel support framing.
        2) ASTM A153/A153M or ASTM F2329 for iron and steel hardware and anchors.

3. Tapered Side Panels: Taper side panels to angle required to accommodate sloped loading dock approach grades, and make sealing edge of dock seal parallel to back edge of truck. Taper for [**declined approach**][**inclined approach**][**approach as indicated on Drawings**].
4. Guide Strips: **4-inch- (102-mm-)** wide, coated, nylon guide strips on jamb pads.
5. Pleated Protectors: On face of jamb pads of overlapping layers of coated fabric attached to base fabric; [**4-inch (102-mm)**][**8-inch (203-mm)**][**16-inch (406-mm)**] wear exposure.
6. Reinforcing: Manufacturer's standard reinforcing over cover fabric on [**upper corners**][**inside face of jamb pads**][**inside and full face of jamb pads and upper corners**] of dock seal.

F. Materials:

1. Vinyl-Coated Nylon Cover Fabric: Minimum total weight of [**22 oz./sq. yd. (746 g/sq. m)**][**40 oz./sq. yd. (1356 g/sq. m)**].

    a. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

        1) High-Visibility Layer: Manufacturer's standard yellow or orange layer.

2. Neoprene-Coated Nylon Cover Fabric: Minimum total weight of [**16 oz./sq. yd. (543 g/sq. m)**][**40 oz./sq. yd. (1356 g/sq. m)**][**45 oz./sq. yd. (1526 g/sq. m)**].

    a. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

        1) High-Visibility Layer: Manufacturer's standard yellow or orange layer.

3. Hypalon-Coated Nylon Cover Fabric: Minimum total weight of [**16 oz./sq. yd. (543 g/sq. m)**][**40 oz./sq. yd. (1356 g/sq. m)**].

    a. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

        1) High-Visibility Layer: Manufacturer's standard yellow or orange layer.

4. Cover Fabric: Manufacturer's proprietary cover fabric complying with the following minimum requirements:

a. Tearing strength of not less than [**300 by 300 (1334 by 1334)**] **lbf (N)** when tested according to ASTM D2261.
b. Abrasion resistance of not less than [**6000**] cycles when tested according to FED-STD-191A-5306.
c. Tensile strength of not less than [**1200 by 1200 (5338 by 5338)**] **lbf (N)** when tested according to FED-STD-191A-5100.1.
d. Cold resistance to **minus 40 deg F (minus 40 deg C)** when tested according to FED-STD-191A-5874.
e. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

1) High-Visibility Layer: Manufacturer's standard yellow or orange layer.

5. Pleated Protectors: Same fabric as cover.
6. Wood: DOC PS 20 dimension lumber, select structural grade, kiln dried.
7. Pressure-Treated Wood: DOC PS 20 dimension lumber, select structural grade, kiln dried, and pressure treated with waterborne preservatives to comply with AWPA U1; Use Category UC3.

a. Preservative Chemicals: Acceptable to authorities having jurisdiction and containing no arsenic or chromium.

2.3 INFLATABLE LOADING DOCK SEALS

A. Inflatable Dock Seals: Inflatable dock seals consisting of one-piece jamb[sill,] and header seals designed to inflate by motor/blower and compress against truck bodies to form airtight seals at loading dock openings; of type, size, and construction indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Kelley; Entrematic; ASSA ABLOY**]
b. [**Pentalift Equipment Corporation**]
c. [**Serco; Entrematic; ASSA ABLOY**]
d. [**Super Seal Mfg. Ltd**]

2. Source Limitations: Obtain from single source from single manufacturer.

B. Head Members: [**One**][**Two**].

C. Jamb Members: [**One**][**Two**].

D. Construction: Fabricate header seal full width over jamb seals. Mount seals on pressure-treated wood frame with hot-dip galvanized-steel mounting hardware. Inflate seals by use of 1/2-hp motor/blower mounted above header seal in galvanized-steel hood with separate manual on/off activation switch with indicator light. [**Provide electrical interlock.**]Provide bottom of header and jamb seals with grommets to allow for release of moisture and excess air.

E. Materials:

1. Neoprene-Coated Nylon Fabric: Minimum total weight of **14 oz./sq. yd. (475 g/sq. m)**.

a. Color: [**Black**][**Gray**][**Blue**][**Brown**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Fabric: Manufacturer's proprietary fabric complying with the following minimum requirements:

a. Tearing strength of not less than [**110 by 85 (489 by 378)**] **lbf (N)** when tested according to ASTM D2261.
b. Abrasion resistance of not less than [**490**] cycles when tested according to FED-STD-191A-5306.
c. Tensile strength of not less than [**500 by 440 (2224 by 1957)**] **lbf (N)** when tested according to FED-STD-191A-5100.1.
d. Cold resistance to **minus 40 deg F (minus 40 deg C)** when tested according to FED-STD-191A-5874.
e. Color: [**Black**][**Gray**][**Blue**][**Brown**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

F. Steel Finish: Hot-dip galvanize components to comply with the following:

1. ASTM A123/A123M for iron and steel support framing.
2. ASTM A153/A153M or ASTM F2329 for iron and steel hardware and anchors.

2.4 FRAME-TYPE LOADING DOCK SHELTERS

A. Frame-Type Dock Shelters: Dock shelters designed to form a seal with sides and top of truck body while leaving entire width and height of truck's rear opening unobstructed; of type, size, and construction indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Beacon Industries, Inc**]
b. [**Blue Giant Equipment Corporation**]
c. [**Chalfant Sewing Fabricators, Inc**]
d. [**Fairborn U.S.A., Inc.**]
e. [**Kelley; Entrematic; ASSA ABLOY**]
f. [**McGuire; Systems, LLC**]
g. [**Nordock Inc.**]
h. [**NOVA Technology International, L.L.C.**]
i. [**Pentalift Equipment Corporation**]
j. [**Pioneer Dock Equipment**]
k. [**Rite-Hite Holding Corporation**]
l. [**Rotary Products Inc**]
m. [**Serco; Entrematic; ASSA ABLOY**]
n. [**Super Seal Mfg. Ltd**]
o. [**Vestil Manufacturing Company**]

2. Source Limitations: Obtain from single source from single manufacturer.

B. Rigid-Frame Type: Fabricated from [**fabric-covered**][**fiberglass**] side and top panels attached to fixed supporting framework. Provide head and side curtains with built-in flexible stays, wind straps between head curtain and side frame, pleated protectors, reinforcing, and guide strips. Slope head frame from

center for drainage. Provide replaceable, fabric-covered, tapered, foam-bottom pads and protective steel bumpers of size and type required for application shown.

C. Flexible-Frame Type: Fabricated from fabric-covered side and top panels attached to retractable supporting framework with independent spring-tension extension arms. Provide head and side curtains with built-in flexible stays, pleated protectors, reinforcing, and guide strips. Provide replaceable, fabric-covered, tapered, foam-bottom pads of size and type required for application shown.

D. Head-Pad Height: [**12 inches (305 mm)**][**18 inches (457 mm)**][**24 inches (610 mm)**][**30 inches (762 mm)**].

E. Construction: Fabricate framework, pads, bumpers, fabric for curtains and panels, and other components to sizes and shapes indicated or required to fit door-opening sizes shown, and allow for not less than **18 inches (457 mm)** of truck-body penetration when truck is docked.

1. Wood Framework: Factory painted; mechanically fastened together using nails and lag bolts or metal connectors to form a rigid assembly.
2. Steel Framework: Zinc-plated steel tubing of size and thickness standard with manufacturer, with joints welded.

    a. Steel Finish: Hot-dip galvanize components to comply with the following:

        1) ASTM A123/A123M for iron and steel support framing.
        2) ASTM A153/A153M or ASTM F2329 for iron and steel hardware and anchors.

3. Top and Side Panels:

    a. White, translucent fiberglass, **0.045 inch (1.1 mm)** thick, weighing **6 oz./sq. ft. (1831 g/sq. m)**.
    b. White, translucent vinyl, weighing **14 oz./sq. ft. (4272 g/sq. m)**.

4. Tapered Side Panels: Taper side panels to angle required to accommodate sloped loading dock approach grades, and make sealing edge of dock shelter parallel to back edge of truck. Taper for [**declined**][**inclined**] approach.
5. Guide Strips: **4-inch- (102-mm-)** wide, coated, nylon guide strips on side curtains.
6. Pleated Protectors: On head curtain of overlapping layers of coated fabric attached to base fabric.
7. Reinforcing: Manufacturer's standard reinforcing over cover fabric on side curtains [**and top cover**]of dock shelter.

F. Fabric:

1. Vinyl-Coated Nylon Cover Fabric: Minimum total weight of [**22 oz./sq. yd. (746 g/sq. m)**][**40 oz./sq. yd. (1356 g/sq. m)**].

    a. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Polyurethane-Coated Nylon Cover Fabric: Minimum total weight of **25 oz./sq. yd. (848 g/sq. m)**.

    a. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

3. Neoprene-Coated Nylon Cover Fabric: Minimum total weight of [**16 oz./sq. yd. (543 g/sq. m)**][**40**

oz./sq. yd. (1356 g/sq. m)][45 oz./sq. yd. (1526 g/sq. m)].

a. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

4. Hypalon-Coated Nylon Cover Fabric: Minimum total weight of [**16 oz./sq. yd. (543 g/sq. m)**][**40 oz./sq. yd. (1356 g/sq. m)**].

a. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

5. Cover Fabric: Manufacturer's proprietary cover fabric complying with the following minimum requirements:

a. Tearing strength of not less than [**300 by 300 (1334 by 1334)**] **lbf (N)** when tested according to ASTM D2261.
b. Abrasion resistance of not less than [**6000**] cycles when tested according to FED-STD-191A-5306.
c. Tensile strength of not less than [**1200 by 1200 (5338 by 5338)**] **lbf (N)** when tested according to FED-STD-191A-5100.1.
d. Cold resistance to **minus 40 deg F (minus 40 deg C)** when tested according to FED-STD-191A-5874.
e. Color: [**Black**][**Green**][**Blue**][**Brown**][**Tan**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

6. Pleated Protectors: Same fabric as cover.

G. Accessories:

1. Buffer flaps.
2. Bottom filler curtain.
3. Bottom seal pads.

2.5 INFLATABLE LOADING DOCK SHELTERS

A. Inflatable Dock Shelters: Inflatable dock shelters designed to inflate by blower and compress against truck bodies to form airtight seals at loading dock openings; of type, size, and construction indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**air Locke Dock Seal**]
b. [**Kelley; Entrematic; ASSA ABLOY**]
c. [**Nordock Inc.**]
d. [**Pentalift Equipment Corporation**]
e. [**Rite-Hite Holding Corporation**]
f. [**Serco; Entrematic; ASSA ABLOY**]
g. [**Super Seal Mfg. Ltd**]

2. Source Limitations: Obtain from single source from single manufacturer.

B. Rigid Canopy: Consisting of rigid canopy, fabric-covered header curtain, and one-piece inflatable header and jamb seals. Fabricate canopy from white, translucent plastic attached to rigid support framework.

C. Rigid Canopy and Sides: Consisting of rigid canopy and sides, fabric-covered header curtain, and one-piece, inflatable header and jamb seals. Fabricate canopy and sides from white, translucent plastic attached to rigid support framework.

D. Construction: Fabricate header seal full width over jamb seals. Mount seals on pressure-treated wood frame with hot-dip galvanized-steel mounting hardware. Provide header curtain with built-in flexible stays and two guide strips. Slope canopy frame from center for drainage. Provide two protective steel bumpers of size and type required for application shown. Inflate seals by use of a 1/2-hp motor/blower, mounted under canopy frame with separate manual on/off activation switch with indicator light.[**Provide electrical interlock.**] Provide bottom of header and jamb seals with grommets to allow for release of moisture and excess air.

1. Shape and Size: Fabricate framework, fabric for curtains, and other components to sizes and shapes indicated or required to fit door-opening sizes shown, and allow for not less than **12 inches (305 mm)** of truck-body penetration when truck is docked.
2. Wood Framework: Fasten members together mechanically, using nails and lag bolts or metal connectors to form a rigid assembly.
3. Steel Framework: Zinc-plated steel tubing of size and thickness standard with manufacturer, with joints welded.

    a. Steel Finish: Hot-dip galvanize components to comply with the following:

        1) ASTM A123/A123M for iron and steel support framing.
        2) ASTM A153/A153M or ASTM F2329 for iron and steel hardware and anchors.

4. Guide Strips: **4-inch- (102-mm-)** wide, coated, nylon guide strips on header curtain.

E. Materials:

1. Fabric:

    a. [**Polyurethane**][**Vinyl**]; minimum total weight of **14 oz./sq. yd. (475 g/sq. m)**.

        1) Color: [**Black**][**Green**][**Blue**][**Brown**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

    b. Manufacturer's proprietary fabric complying with the following minimum requirements:

        1) Tearing strength of not less than [**110 by 85 (489 by 378)**] **lbf (N)** when tested according to ASTM D2261.
        2) Abrasion resistance of not less than [**490**] cycles when tested according to FED-STD-191A-5306.
        3) Tensile strength of not less than [**500 by 440 (2224 by 1957)**] **lbf (N)** when tested according to FED-STD-191A-5100.1.
        4) Cold resistance to **minus 40 deg F (minus 40 deg C)** when tested according to FED-STD-191A-5874.
        5) Color: [**Black**][**Green**][**Blue**][**Brown**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.6 TRANSPARENT-STRIP DOOR CURTAINS

A. Transparent-Strip Door Curtains: Door curtains consisting of overlapping strips suspended from top of opening to form a sealed door curtain. Provide strips of length required to suit opening height and with sufficient unit number to close opening width with overlap indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Floor Products Company, Inc**]
b. [**Chalfant Sewing Fabricators, Inc**]
c. [**Chase Doors; a Senneca Company**]
d. [**Rotary Products Inc**]
e. [**Super Seal Mfg. Ltd**]
f. [**Verilon Vinyl**]
g. [**Vestil Manufacturing Company**]

2. Source Limitations: Obtain from single source from single manufacturer.

B. Strip Material: Curved, clear, transparent, extruded PVC. Fabricate strips for manufacturer's standard method of attachment to overhead mounting system indicated.

1. Standard Grade: Designed to withstand temperature range of **0 to plus 150 deg F (minus 18 to plus 66 deg C)**.
2. Low-Temperature Grade: USDA accepted; designed to withstand temperature range of **minus 30 to plus 150 deg F (minus 34 to plus 66 deg C)**.
3. Strip Dimensions: [**6 inches (152 mm) and 0.060 inch (1.5 mm)**][**8 inches (203 mm) and 0.080 inch (2 mm)**][**12 inches (305 mm) and 0.120 inch (3 mm)**][**16 inches (406 mm) and 0.160 inch (4 mm)**] width and thickness, respectively.
4. Overlap: [**None**][**One-third**][**One-half**][**Two-thirds**][**Three-quarters**][**Full**].

C. Header Mounting: Consisting of an angle bolted or welded to opening lintel; equip angle with permanently attached mounting pins and a steel-angle or -plate retaining strip attached to angle with wing nuts.

D. Steel-Plate Wall Surface Mounting: Consisting of a steel plate bolted to side of lintel; equip plate with permanently attached, threaded, mounting pins and steel-angle or -plate retaining strip attached to plate with wing nuts.

E. Steel-Pipe Wall Surface Mounting: Consisting of steel pipe attached to side of lintel by manufacturer's standard, winged-U-type suspension brackets.

F. Wall Surface Mounting: Consisting of a rigid, vinyl, wall-mounting unit bolted to side of lintel above opening; equip unit with a similarly formed, rigid, vinyl retainer attached to unit with wing nuts.

G. Wall Offset Mounting: Consisting of an angle bolted to face of wall projecting out on each side of door opening to allow hanging strips to clear overhead door hood. Equip angle with permanently attached mounting pins and a steel angle or plate retaining strip attached to angle with wing nuts. Return hanging strips to face of wall at jambs to fully enclose space interior to overhead door.

H. Steel Finish: Hot-dip galvanize components to comply with the following:

1. ASTM A123/A123M for iron and steel support mounting.
2. ASTM A153/A153M or ASTM F2329 for iron and steel hardware and anchors.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Examine roughing-in for electrical systems for inflatable units to verify actual locations of connections before installation.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION, GENERAL

A. Coordinate electrical connections with Division 26 Sections.

3.3 INSTALLATION OF FOAM PAD LOADING DOCK SEALS

A. Attach dock-seal support frames securely to building structure in proper relation to openings, dock bumpers, and dock levelers to ensure compression of dock seals when trucks are positioned against dock bumpers.

3.4 INSTALLATION OF LOADING DOCK SHELTERS

A. Attach dock shelters securely to building structure in proper relation to openings, dock bumpers, and dock levelers to ensure an effective seal of dock-shelter curtains with sides and top of truck body when trucks are positioned against dock bumpers.

3.5 INSTALLATION OF INFLATABLE LOADING DOCK SEALS

A. Attach dock-seal support frames securely to building structure in proper relation to openings, dock bumpers, and dock levelers to ensure compression of dock seals when trucks are positioned against dock bumpers.

3.6 INSTALLATION OF FRAME-TYPE LOADING DOCK SHELTERS

A. Attach dock shelters securely to building structure in proper relation to openings, dock bumpers, and dock levelers to ensure an effective seal of dock-shelter curtains with sides and top of truck body when trucks are positioned against dock bumpers.

3.7 INSTALLATION OF INFLATABLE LOADING DOCK SHELTERS

A. Attach dock shelters securely to building structure in proper relation to openings, dock bumpers, and dock levelers to ensure an effective seal of dock-shelter curtains with sides and top of truck body when trucks are positioned against dock bumpers.

3.8 INSTALLATION OF TRANSPARENT-STRIP DOOR CURTAINS

A. Attach door-curtain mounting system to lintel with screw anchors or toggle bolts. Mount curtain strips to overlap.

3.9 ADJUSTING

A. After completing installation, inspect exposed factory finishes and repair damaged finishes.

END OF SECTION 11 13 16 00

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
11 13 16 13	11 13 16 00	Loading Dock Seals and Shelters
11 13 16 23	11 13 16 00	Loading Dock Seals and Shelters

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 11 13 19 00 - STATIONARY LOADING DOCK EQUIPMENT

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Recessed loading dock levelers.
2. Edge-of-dock loading dock levelers.
3. Top-of-dock loading dock levelers.
4. Vertical-storing loading dock levelers.
5. Truck levelers.
6. Stationary loading dock lifts (scissor lifts).
7. Truck restraints.
8. Light communication systems.

B. Related Requirements:

1. Section 055000 "Metal Fabrications" for [**curb angles at edges of recessed pits**][**and**][**loading dock platform edge channels**].
2. Section 083323 "Overhead Coiling Doors" for coiling overhead doors electrically interlocked to dock levelers.
3. Section 083613 "Sectional Doors" for sectional overhead doors electrically interlocked to dock levelers.
4. Section 111313 "Loading Dock Bumpers" for loading dock bumpers that are not integral with loading dock levelers.
5. Section 111316 "Loading Dock Seals and Shelters" for loading dock seals and shelters.
6. Section 111323 "Portable Dock Equipment" for portable loading dock lifts.

1.2 DEFINITIONS

A. Operating Range: Maximum amount of travel above and below the loading dock level.

B. Working Range: Recommended amount of travel above and below the loading dock level for which loading and unloading operations can take place.

1.3 COORDINATION

A. Coordinate size and location of loading dock equipment indicated to be attached to or recessed into concrete or masonry, and furnish anchoring devices with templates, diagrams, and instructions for their installation

B. Coordinate installation of cast-in-place items. Furnish setting drawings and templates.

C. Electrical System Roughing-in: Coordinate layout and installation of loading dock equipment with connections to power supplies[**and interlocked equipment**].

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1. Inspect and discuss electrical roughing-in, equipment bases, and other preparatory work specified elsewhere.
2. Review sequence of operation for each type of loading dock equipment.
3. Review coordination of interlocked equipment specified in this Section and elsewhere.
4. Review required testing, inspecting, and certifying procedures.

1.5 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for stationary loading dock equipment.
2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.

B. Shop Drawings: For stationary loading dock equipment.

1. Include plans, elevations, sections, and attachment details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of anchors and each field connection.
3. Include diagrams for power, signal, and control wiring.

1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer.

B. Welding certificates.

C. Product Test Reports: For each dock leveler, for tests performed by manufacturer and witnessed by a qualified testing agency.

1. Indicate compliance of dock levelers with requirements in MH 30.1 for determining rated capacity based on comprehensive testing within last two years of current products.
2. Submittal Form: According to MH 30.1.

D. Sample Warranty: For manufacturer's special warranty.

1.7 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For stationary loading dock equipment to include in operation and maintenance manuals.

1.8 QUALITY ASSURANCE

A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.

1. Maintenance Proximity: Not more than [**one**][**two**] hours' normal travel time from Installer's place of business to Project site.

B. Welding Qualifications: Qualify procedures and personnel according to the following:

1. AWS D1.1/D1.1M, "Structural Welding Code - Steel."
2. AWS D1.3/D1.3M, "Structural Welding Code - Sheet Steel."

1.9 FIELD CONDITIONS

A. Field Measurements: Verify actual dimensions of construction contiguous with stationary loading dock equipment, including [**recessed pit dimensions**][**slopes of driveways**][**and**][**heights of loading docks**], by field measurements before fabrication.

1.10 WARRANTY

A. Manufacturer's Special Warranty: Manufacturer agrees to repair or replace dock levelers that fail in materials or workmanship within specified warranty period.

1. Failures include, but are not limited to, the following:

a. Structural failures including cracked or broken structural support members, load-bearing welds, and front and rear hinges.
b. Faulty operation of operators, control system, or hardware.
c. Deck plate failures including cracked plate or permanent deformation in excess of **1/4 inch (6 mm)** between deck supports.
d. Hydraulic system failures including failure of hydraulic seals and cylinders.

2. Warranty Period for Structural Assembly: [**10**] years from date of Substantial Completion.
3. Warranty Period for Hydraulic System: [**Four**][**Five**] years from date of Substantial Completion.
4. Warranty shall be for unlimited usage of leveler for the specified rated capacity over the term of the warranty.

PART 2 - PRODUCTS

2.1 RECESSED LOADING DOCK LEVELERS

A. Recessed Loading Dock Levelers: Recessed, hinged-lip-type dock levelers designed for permanent installation in concrete pits preformed in the edge of loading platform; of type, function, operation, capacity, size, and construction indicated; and complete with controls, safety devices, and accessories required.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Beacon Industries, Inc**]
b. [**Blue Giant Equipment Corporation**]
c. [**Chalfant Sewing Fabricators, Inc**]
d. [**DLM; Systems, LLC**]

e. [**Kelley; Entrematic; ASSA ABLOY**]
f. [**McGuire; Systems, LLC**]
g. [**Nordock Inc.**]
h. [**NOVA Technology International, L.L.C.**]
i. [**Pentalift Equipment Corporation**]
j. [**Pioneer Dock Equipment**]
k. [**Poweramp; System, LLC**]
l. [**Rite-Hite Holding Corporation**]
m. [**Rotary Products Inc**]
n. [**Serco; Entrematic; ASSA ABLOY**]
o. [**Vestil Manufacturing Company**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Standard: Comply with MH 30.1[except for structural testing to establish rated capacity].

D. Rated Capacity: Capable of supporting total gross load of [**20,000 (9072)**][**25,000 (11 340)**][**30,000 (13 608)**][**45,000 (20 412)**] **lb (kg)** without permanent deflection or distortion.

E. Platform: Not less than [**3/16- (5-)**][**1/4- (6-)**][**3/8- (9.5-)**] **inch- (mm-)** thick, nonskid steel plate.

1. Platform Width: [**72 inches (1829 mm)**][**78 inches (1981 mm)**][**84 inches (2134 mm)**][**As indicated on Drawings**]
2. Platform Length: [**72 inches (1829 mm)**][**96 inches (2438 mm)**][**120 inches (3048 mm)**][**As indicated on Drawings**].
3. Frame: [**Manufacturer's standard**][**Clean-pit type, designed to support leveler at sides of pit, with no supports at front of pit floor**].
4. Toe Guards: Equip open sides of dock leveler over range indicated with steel toe guards.

    a. Toe-Guard Range: Entire upper [**operating**][**working**] range.

F. Hinged Lip: Not less than [**1/2- (13-)**][**5/8- (16-)**][**3/4- (19-)**][**1- (25-)**] **inch- (mm-)** thick, nonskid steel plate.

1. Hinge: Full-width, piano-type hinge with heavy-wall hinge tube[**and grease fittings**], with gussets on lip and ramp for support.
2. Safety Barrier Lip: Designed to protect material-handling equipment from an accidental fall from loading platform edge of the dock leveler when the leveler is not in use.

G. Function: Dock levelers shall compensate for differences in height between truck bed and loading platform.

1. Vertical Travel: Operating range above platform level of sufficient height to enable lip to extend and clear truck bed before contact with the following minimum working range:

    a. Above Adjoining Platform: [**12 inches (305 mm)**][**18 inches (457 mm)**][**As indicated on Drawings**].
    b. Below Adjoining Platform: [**12 inches (305 mm)**][**14 inches (356 mm)**][**As indicated on Drawings**].

2. Automatic Vertical Compensation: Floating travel of ramp with lip extended and resting on truck bed shall compensate automatically for upward or downward movement of truck bed during loading and unloading.
3. Automatic Lateral Compensation: Tilting of ramp with lip extended and resting on truck bed shall

compensate automatically for canted truck beds of up to **4 inches (102 mm)** over width of ramp.

4. Lip Operation: Manufacturer's standard mechanism, which automatically extends and supports hinged lip on ramp edge with lip resting on truck bed over dock leveler's working range, allows lip to yield under impact of incoming truck and automatically retracts lip when truck departs.

    a. Length of Lip Extension: Not less than **12 inches (305 mm)** from face of dock bumpers and not less than) [**16 inches (406 mm)**][**18 inches (457 mm)**][**20 inches (508 mm)**][**dimension indicated on Drawings**] measured from ramp edge.

5. Automatic Ramp Return: Automatic return of unloaded ramp, from raised or lowered positions to stored position, level with platform, as truck departs.
6. Interlock: Leveler does not operate while [**overhead door is in closed position**][**leveler night lock is engaged**][**truck restraint is not engaged**][**inflatable dock seal is not inflated**][**and**][**inflatable dock shelter is not inflated**].

H. Mechanical Operating System: Manual control; counterbalance and spring operation. Spring-operated raising and walk-down lowering of unloaded ramp. Equip leveler with an upward-biased-spring counterbalancing mechanism controlled by a hold-down device. Ramp raises to top limit of operating range by operating recessed control handle in ramp to disengage hold-down device. Ramp lowers below platform level with lip retracted by operating auxiliary, recessed control handle to release support legs.

1. Free-Fall Protection: Manufacturer's standard protection system to limit free fall of loaded ramps with front edge supported by truck bed.

I. Hydraulic Operating System: Electric control from a remote-control station; fully hydraulic operation. Electric-powered hydraulic raising and hydraulic lowering of ramp. Equip leveler with a packaged unit including a unitized, totally enclosed, nonventilated electric motor, pump, manifold reservoir, and valve assembly of proper size, type, and operation for capacity of leveler indicated. Include means for lowering ramp below platform level with lip retracted behind dock bumpers. Provide a hydraulic velocity fuse connected to main hydraulic cylinder to limit loaded ramp's free fall to not more than **3 inches (76 mm)**.

1. Remote-Control Station: [**Weatherproof single**][**Single**]-button station of the constant-pressure type, enclosed in NEMA ICS 6, [**Type 4**][**Type 12**] box. Ramp raises by depressing and holding button; ramp lowers at a controlled rate by releasing button.
2. Remote-Control Station with Emergency Stop: [**Weatherproof multibutton**][**Multibutton**] control station with an UP button of the constant-pressure type and an emergency STOP button of the momentary-contact type, enclosed in NEMA ICS 6, [**Type 4**][**Type 12**] box. Ramp raises by depressing and holding UP button; ramp lowers at a controlled rate by releasing UP button. Ramp movement stops, regardless of position of ramp or lip, by depressing STOP button. Normal operation resumes by engaging a manual reset button or by pulling out STOP button.

    a. Dual-Panel Control Station: Remote-control station for operating side-by-side dock levelers.
    b. Master Panel: Control panel with integral fused disconnecting means for operating dock leveler, dock door, and truck restraints.

3. Independent Lip Operation: Electric-powered hydraulic raising and hydraulic lowering of lip, controlled independent of raising and lowering of ramp.

J. Electric Operating System: Electric control from a remote-control station; motorized operation. Electric activation for raising of ramp and automatic extending of lip. Equip leveler with a packaged unit including a unitized electric motor and shaft assembly of proper size, type, and operation for capacity of leveler indicated. Include means for lowering ramp below platform level with lip retracted behind dock bumpers.

1. Remote-Control Station: [**Weatherproof single**][**Single**]-button station of the constant-pressure type, enclosed in NEMA ICS 6, [**Type 4**][**Type 12**] box. Ramp raises by depressing and holding button; ramp lowers at a controlled rate by releasing button.
2. Remote-Control Station with Emergency Stop: [**Weatherproof multibutton**][**Multibutton**] control station with an UP button of the constant-pressure type and an emergency STOP button of the momentary-contact type, enclosed in NEMA ICS 6, [**Type 4**][**Type 12**] box. Ramp raises by depressing and holding UP button; ramp lowers at a controlled rate by releasing UP button. Ramp movement stops, regardless of position of ramp or lip, by depressing STOP button. Normal operation resumes by engaging a manual reset button or by pulling out STOP button.

K. Air-Bag Operating System: Electric control from a remote-control station; pneumatic operation. High-volume, low-pressure lifting of ramp. Equip leveler with a packaged unit including a PVC-coated, reinforced polyester lifting bag and two-stage, single-speed electric fan of proper size, type, and operation for capacity of leveler indicated. Include dock-leveler supports controlled by release chain for lowering ramp below platform level without extending lip.

1. Remote-Control Station: [**Weatherproof single**][**Single**]-button station of the constant-pressure type, enclosed in NEMA ICS 6, [**Type 4**] box. Ramp raises by depressing and holding button; ramp lowers at a controlled rate by releasing button.

L. Construction: Fabricate dock-leveler frame, platform supports, and lip supports from structural- or formed-steel shapes. Weld platform and hinged lip to supports. Fabricate entire assembly to withstand deformation during both operating and stored phases of service. Chamfer lip edge to minimize obstructing wheels of material-handling vehicles.

1. Cross-Traffic Support: Manufacturer's standard method of supporting ramp at platform level in stored position with lip retracted. Provide a means to release supports to allow ramp to descend below platform level.
2. Maintenance Strut: Integral strut to positively support ramp in up position during maintenance of dock leveler.

M. Integral Molded-Rubber Dock Bumpers: Fabricated from [**4- (102-)**][**6- (152-)**] **inch- (mm-)** thick, heavy molded-rubber compound reinforced with nylon, rayon, or polyester cord; with Shore A durometer hardness of 80, plus or minus 5, when tested according to ASTM D2240. Provide two dock bumpers for each recessed dock leveler, attached to face of loading dock with expansion bolts.

N. Integral Laminated-Tread Dock Bumpers: Fabricated from [**4-1/2- (114-)**][**6- (152-)**] **inch- (mm-)** thick, multiple, uniformly thick plies cut from fabric-reinforced rubber tires. Laminate plies under pressure on not less than two **3/4-inch- (19-mm-)** diameter, steel supporting rods that are welded at one end to **1/4-inch- (6-mm-)** thick, structural-steel end angle and secured with a nut and angle at the other end. Fabricate angles with predrilled anchor holes and sized to provide not less than **1 inch (25 mm)** of tread plies extending beyond the face of closure angles.

O. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.
4. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

P. Dock-Leveler Finish: [**Manufacturer's standard prime-paint or baked-on factory finish**][**Hot-dip galvanized**][**Spray zinc metallized**].

1. Toe Guards: Baked-on factory finish.

Q. Accessories:

1. Curb Angles: **3-by-3-by-1/4-inch (76-by-76-by-6-mm)** galvanized-steel curb angles for edge of recessed leveler pit, with **1/2-inch- (13-mm-)** diameter by **6-inch- (152-mm-)** long concrete anchors welded to angle at **6 inches (152 mm)** o.c.
2. Self-Forming Pan: Manufacturer's standard prefabricated, self-forming[**spray zinc metallized**] steel form system for poured-in-place construction of concrete pit.
3. Night Locks: Manufacturer's standard means to prevent extending lip and lowering ramp when overhead doors are locked.
4. Side and rear weatherseals.
5. Foam insulation under dock-leveler platform.
6. [**Abrasive skid-resistant**][**Smooth**] surface.

2.2 EDGE-OF-DOCK LOADING DOCK LEVELERS

A. Edge-of-Dock Loading Levelers: Surface-mounted, hinged-lip-type, edge-of-dock levelers designed for permanent installation on face of loading dock platform; of type, function, operation, capacity, size, and construction indicated; and complete with controls, safety devices, and accessories required.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Beacon Industries, Inc**]
b. [**Blue Giant Equipment Corporation**]
c. [**Bluff Manufacturing, Inc**]
d. [**Chalfant Sewing Fabricators, Inc**]
e. [**DLM; Systems, LLC**]
f. [**Kelley; Entrematic; ASSA ABLOY**]
g. [**McGuire; Systems, LLC**]
h. [**Nordock Inc.**]
i. [**NOVA Technology International, L.L.C.**]
j. [**Pentalift Equipment Corporation**]
k. [**Pioneer Dock Equipment**]
l. [**Poweramp; System, LLC**]
m. [**Rite-Hite Holding Corporation**]
n. [**Rotary Products Inc**]
o. [**Serco; Entrematic; ASSA ABLOY**]
p. [**Vestil Manufacturing Company**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Standard: Comply with MH 30.1[except for structural testing to establish rated capacity].

D. Rated Capacity: Capable of supporting total gross load of [**20,000 (9072)**][**25,000 (11 340)**][**30,000 (13 608)**] **lb (kg)** without permanent deflection or distortion.

E. Platform Ramp Width: [**66 inches (1676 mm)**][**72 inches (1829 mm)**][**78 inches (1981 mm)**][**84 inches (2134 mm)**][**As indicated on Drawings**].

F. Hinged Lip: Not less than [**3/8- (9.5-)**][**7/16- (11-)**][**1/2- (13-)**] **inch- (mm-)** thick, nonskid steel tread plate.

1. Hinge: Full-width, piano-type hinge with heavy-wall hinge tube[**and grease fittings**], with gussets on lip and ramp for support.

G. Function: Dock levelers shall compensate for differences in height between truck bed and loading platform.

1. Vertical Travel: Operating range above platform level of sufficient height to enable lip to extend and clear truck bed before contact with the following minimum working range:

a. Above Adjoining Platform: [**5 inches (127 mm)**][**6 inches (152 mm)**][**As indicated on Drawings**].
b. Below Adjoining Platform: [**5 inches (127 mm)**][**As indicated on Drawings**].

2. Automatic Vertical Compensation: Floating travel of ramp with lip extended and resting on truck bed shall compensate automatically for upward or downward movement of truck bed during loading and unloading.
3. Automatic Lateral Compensation: Tilting of ramp with lip extended and resting on truck bed shall compensate automatically for canted truck beds of up to **3 inches (76 mm)** over width of ramp.
4. Lip Operation: Manufacturer's standard mechanism, which automatically extends and supports hinged lip on ramp edge with lip resting on truck bed over dock leveler's working range, allows lip to yield under impact of incoming truck and automatically retracts lip when truck departs.

a. Length of Lip Extension: Not less than **12 inches (305 mm)** from face of dock bumpers and not less than [**15 inches (381 mm)**][**17 inches (432 mm)**][**dimension indicated on Drawings**] measured from ramp edge.

5. Automatic Ramp Return: Automatic return of unloaded ramp, from raised or lowered positions to stored position, level with platform, as truck departs. Leveler shall be capable of retracting to stored position while truck is at loading dock.

H. Mechanical Operating System: Manual control; counterbalance and spring operation. Spring-operated raising and walk-down lowering of unloaded ramp. Equip leveler with a torsion-spring counterbalancing mechanism controlled by a hold-down device.

1. Lever Handle: Self-storing lever handle for raising unloaded ramp with minimal lifting force by pulling lever back to extend lip and pushing lever forward to lower ramp and lip.
2. Removable Lifting Handle: For raising unloaded ramp by lifting action.

I. Hydraulic Operating System: Electric control from a remote-control station; fully hydraulic operation. Electric-powered hydraulic raising and hydraulic lowering of ramp. Equip leveler with a packaged unit including a unitized, totally enclosed, nonventilated electric motor, pump, manifold reservoir, and valve assembly of proper size, type, and operation for capacity of leveler indicated. Provide a hydraulic velocity fuse connected to main hydraulic cylinder to limit loaded ramp's free fall to not more than **3 inches (76 mm)**.

1. Remote-Control Station: [**Weatherproof single**][**Single**]-button station of the constant-pressure type, enclosed in NEMA ICS 6, [**Type 4**][**Type 12**] box. Ramp and lip raise to vertical position and extend to truck bed by depressing and holding button.

J. Construction: Fabricate dock-leveler frame, platform supports, and lip supports from structural- and formed-steel shapes. Weld platform and hinged lip to supports. Fabricate entire assembly to withstand deformation during both operating and stored phases of service. Chamfer lip edge to minimize obstructing wheels of material-handling vehicles.

1. Cross-Traffic Support: Manufacturer's standard method of supporting ramp at platform level in

stored position with lip retracted. Provide a means to release supports to allow ramp to descend below platform level.

2. Maintenance Strut: Integral strut to positively support ramp in up position during maintenance of dock leveler.

K. Integral Molded-Rubber Dock Bumpers: Fabricated from [**4- (102-)**][**6- (152-)**] **inch- (mm-)** thick, heavy molded-rubber compound reinforced with nylon, rayon, or polyester cord; with Shore A durometer hardness of 80, plus or minus 5, when tested according to ASTM D2240. Provide two dock bumpers for each recessed dock leveler, attached to face of loading dock with expansion bolts.

L. Integral Laminated-Tread Dock Bumper: Fabricated from [**4-1/2- (114-)**][**6- (152-)**] **inch- (mm-)** thick, multiple, uniformly thick plies cut from fabric-reinforced rubber tires. Laminate plies under pressure on not less than two **3/4-inch- (19-mm-)** diameter, steel supporting rods that are welded at one end to **1/4-inch- (6-mm-)** thick, structural-steel end angle and secured with a nut and angle at the other end. Fabricate angles with predrilled anchor holes and sized to provide not less than **1 inch (25 mm)** of tread plies extending beyond the face of closure angles.

M. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.
4. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

N. Dock-Leveler Finish: [**Manufacturer's standard prime-paint or baked-on factory finish**][**Hot-dip galvanized**][**Spray zinc metallized**].

O. Accessories:

1. Self-forming pan.
2. Cast-in-place design.
3. Run-off guards.
4. Ramp approach plate.
5. [**Interlock to truck restraint**][**Key switch**].

2.3 TOP-OF-DOCK LOADING DOCK LEVELERS

A. Top-of-Dock Loading Dock Levelers: Surface-mounted, hinged-lip-type, top-of-dock levelers designed for permanent installation on top edge of loading dock platform without concrete pit; of type, function, operation, capacity, size, and construction indicated; and complete with controls, safety devices, and accessories required.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Beacon Industries, Inc**]
b. [**DLM; Systems, LLC**]
c. [**Pioneer Dock Equipment**]
d. [**Rotary Products Inc**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a

qualified testing agency, and marked for intended location and application.

C. Standard: Comply with MH 30.1[except for structural testing to establish rated capacity].

D. Rated Capacity: Capable of supporting total gross load of [**20,000 (9072)**][**25,000 (11 340)**] **lb (kg)** without permanent deflection or distortion.

E. Platform Width: [**72 inches (1829 mm)**][**As indicated on Drawings**].

F. Hinged Lip: Not less than [**3/8- (9.5-)**][**7/16- (11-)**] **inch- (mm-)** thick, nonskid steel plate.

1. Hinge: Full-width, piano-type hinge with heavy-wall hinge tube[**and grease fittings**], with gussets on lip and ramp for support.

G. Function: Dock levelers shall compensate for differences in height between truck bed and loading platform.

1. Vertical Travel: Operating range above platform level of sufficient height to enable lip to extend and clear truck bed before contact with a minimum working range of [**10 (254)**] **inches (mm)** above and [**4 (102)**] **inches (mm)** below adjoining platform level.
2. Automatic Vertical Compensation: Floating travel of ramp with lip extended and resting on truck bed shall compensate automatically for upward or downward movement of truck bed during loading and unloading.
3. Lip Operation: Manufacturer's standard mechanism, which automatically extends and supports hinged lip on ramp edge with lip resting on truck bed over dock leveler's working range, allows lip to yield under impact of incoming truck and automatically retracts lip when truck departs.

    a. Length of Lip Extension: Not less than **12 inches (305 mm)** from face of dock bumpers and not less than [**15 inches (381 mm)**][**dimension indicated on Drawings**] measured from ramp edge.

4. Automatic Ramp Return: Automatic return of unloaded ramp, from raised or lowered positions to stored position, level with platform, as truck departs. Leveler shall be capable of retracting to stored position while truck is at loading dock.

H. Mechanical Operating System: Manual control; counterbalance and spring operation. Spring-operated raising and walk-down lowering of unloaded ramp. Equip leveler with a torsion-spring counterbalancing mechanism controlled by a hold-down device.

1. Removable Lifting Hook: For raising unloaded ramp by lifting action and pushing forward to lower ramp and lip.

I. Hydraulic Operating System: Electric control from a remote-control station, fully hydraulic operation. Electric-powered hydraulic raising and hydraulic lowering of ramp. Equip leveler with a packaged unit including a unitized, totally enclosed, nonventilated electric motor, pump, manifold reservoir, and valve assembly of proper size, type, and operation for capacity of leveler indicated.

1. Remote-Control Station: [**Weatherproof single**][**Single**]-button station of the constant-pressure type, enclosed in NEMA ICS 6, [**Type 12**] box. Ramp and lip raise to vertical position and extend to truck bed by depressing and holding button.

J. Construction: Fabricate dock-leveler frame, platform supports, and lip supports from structural- and formed-steel shapes. Weld platform and hinged lip to supports. Fabricate entire assembly to withstand deformation during both operating and stored phases of service. Chamfer lip edge to minimize obstructing wheels of material-handling vehicles.

K. Integral Molded-Rubber Dock Bumpers: Fabricated from [4- (102-)][6- (152-)] inch- (mm-) thick, heavy molded-rubber compound reinforced with nylon, rayon, or polyester cord; with Shore A durometer hardness of 80, plus or minus 5, when tested according to ASTM D2240. Provide two dock bumpers for each recessed dock leveler, attached to face of loading dock with expansion bolts.

L. Integral Laminated-Tread Dock Bumpers: Fabricated from [4-1/2- (114-)][6- (152-)] inch- (mm-) thick, multiple, uniformly thick plies cut from fabric-reinforced rubber tires. Laminate plies under pressure on not less than two 3/4-inch- (19-mm-) diameter, steel supporting rods that are welded at one end to 1/4-inch- (6-mm-) thick, structural-steel end angle and secured with a nut and angle at the other end. Fabricate angles with predrilled anchor holes and sized to provide not less than 1 inch (25 mm) of tread plies extending beyond the face of closure angles.

M. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade 55 (380).
3. Steel Tubing: ASTM A500/A500M, cold formed.
4. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

N. Dock-Leveler Finish: [**Manufacturer's standard prime-paint or baked-on factory finish**][**Hot-dip galvanized**][**Spray zinc metallized**].

2.4 VERTICAL-STORING LOADING DOCK LEVELERS

A. Vertical-Storing Loading Dock Levelers: Recessed, hinged-lip-type, vertical-storing dock levelers designed for permanent installation in shallow concrete pits preformed in the edge of loading platform; of type, function, operation, capacity, size, and construction indicated; and complete with controls, safety devices, and accessories required.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Blue Giant Equipment Corporation**]
b. [**Kelley; Entrematic; ASSA ABLOY**]
c. [**McGuire; Systems, LLC**]
d. [**Pentalift Equipment Corporation**]
e. [**Poweramp; System, LLC**]
f. [**Rite-Hite Holding Corporation**]
g. [**Serco; Entrematic; ASSA ABLOY**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Standard: Comply with MH 30.1[except for structural testing to establish rated capacity].

D. Rated Capacity: Capable of supporting total gross load of [40,000 (18 144)][45,000 (20 412)][50,000 (22 680)] lb (kg) without permanent deflection or distortion.

E. Platform: Not less than [3/16- (5-)][1/4- (6-)] inch- (mm-) thick, nonskid steel plate.

1. Platform Width: [72 inches (1829 mm)][84 inches (2134 mm)][**As indicated on Drawings**].

2. Platform Length: [**60 inches (1524 mm)**][**72 inches (1829 mm)**][**96 inches (2438 mm)**][**As indicated on Drawings**].

F. Hinged Lip: Not less than [**1/2- (13-)**][**5/8- (16-)**] **inch- (mm-)** thick, nonskid steel plate.

1. Hinge: Full-width, piano-type hinge with heavy-wall hinge tube[**and grease fittings**], with gussets on lip and ramp for support.

G. Function: Dock levelers shall compensate for differences in height between truck bed and loading platform.

1. Vertical Travel: Operating range above platform level of sufficient height to enable lip to extend and clear truck bed before contact with the following minimum working range:

a. Above Adjoining Platform: [**6 inches (152 mm)**][**10 inches (254 mm)**][**12 inches (305 mm)**][**As indicated on Drawings**].
b. Below Adjoining Platform: [**6 inches (152 mm)**][**As indicated on Drawings**].

2. Automatic Vertical Compensation: Floating travel of ramp with lip extended and resting on truck bed shall compensate automatically for upward or downward movement of truck bed during loading and unloading.
3. Automatic Lateral Compensation: Tilting of ramp with lip extended and resting on truck bed shall compensate automatically for canted truck beds of up to **4 inches (102 mm)** over width of ramp.
4. Lip Operation: Manufacturer's standard mechanism that automatically extends and supports hinged lip on ramp edge with lip resting on truck bed over dock leveler's working range, allows lip to yield under impact of incoming truck, and automatically retracts lip when truck departs.

a. Length of Lip Extension: Not less than **12 inches (305 mm) from face of dock bumpers and not less than)**[**16 inches (406 mm)**][**18 inches (457 mm)**][**20 inches (508 mm)**][**dimension indicated on Drawings**] measured from ramp edge.

H. Hydraulic Operating System: Electric control from a remote-control station; fully hydraulic operation. Electric-powered hydraulic raising and hydraulic lowering of ramp. Equip leveler with a packaged unit including a unitized, totally enclosed, nonventilated electric motor, pump, manifold reservoir, and valve assembly of proper size, type, and operation for capacity of leveler indicated. Provide a hydraulic velocity fuse connected to main hydraulic cylinder to limit loaded ramp's free fall to not more than **3 inches (76 mm)**. Provide mechanical lock that prevents leveler from lowering without hydraulic pressure.

1. Remote-Control Station: [**Weatherproof single**][**Single**]-button station of the constant-pressure type, enclosed in NEMA ICS 6, [**Type 12**] box. Ramp lowers at a controlled rate.
2. Remote-Control Station with Emergency Stop: [**Weatherproof multibutton**][**Multibutton**] control station with an UP button of the constant-pressure type and an emergency STOP button of the momentary-contact type, enclosed in NEMA ICS 6, [**Type 12**] box. Ramp raises by depressing and holding UP button; ramp lowers at a controlled rate by releasing UP button. Ramp movement stops, regardless of position of ramp or lip, by depressing STOP button. Normal operation resumes by engaging a manual reset button or by pulling out STOP button.

a. Master Panel: Control panel with integral fused disconnecting means for operating dock leveler, dock door, and truck restraints.

3. Independent Lip Operation: Electric-powered hydraulic raising and lowering of lip, controlled independent of raising and lowering of ramp.

I. Construction: Fabricate dock-leveler frame, platform supports,[**run-off guards,**] and lip supports from

structural- or formed-steel shapes. Weld platform and hinged lip to supports. Fabricate entire assembly to withstand deformation during both operating and stored phases of service. Chamfer lip edge to minimize obstructing wheels of material-handling vehicles.

J. Integral Molded-Rubber Dock Bumpers: Fabricated from [**4- (102-)**][**6- (152-)**] **inch- (mm-)** thick, heavy molded-rubber compound reinforced with nylon, rayon, or polyester cord; with Shore A durometer hardness of 80, plus or minus 5, when tested according to ASTM D2240. Provide two dock bumpers for each recessed dock leveler, attached to face of loading dock with expansion bolts.

K. Integral Laminated-Tread Dock Bumpers: Fabricated from [**4-1/2- (114-)**][**6- (152-)**] **inch- (mm-)** thick, multiple, uniformly thick plies cut from fabric-reinforced rubber tires. Laminate plies under pressure on not less than two **3/4-inch- (19-mm-)** diameter, steel supporting rods that are welded at one end to **1/4-inch- (6-mm-)** thick, structural-steel end angle and secured with a nut and angle at the other end. Fabricate angles with predrilled anchor holes and sized to provide not less than **1 inch (25 mm)** of tread plies extending beyond the face of closure angles.

L. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.
4. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

M. Dock-Leveler Finish: [**Manufacturer's standard prime-paint or baked-on factory finish**][**Hot-dip galvanized**][**Spray zinc metallized**].

N. Accessories:

1. Interlock: Leveler does not operate while [**overhead door is in closed position**][**and**][**truck restraint is not engaged**].
2. Curb Angles: **3-by-3-by-1/4-inch (76-by-76-by-6-mm)** galvanized-steel curb angles for edge of recessed leveler pit, with **1/2-inch- (13-mm-)** diameter by **6-inch- (152-mm-)** long concrete anchors welded to angle at **6 inches (152 mm)** o.c.

2.5 TRUCK LEVELERS

A. Truck Levelers: Two-cylinder, hydraulic ramp designed to raise and lower end of truck at loading dock. Equip leveler with a packaged unit including a unitized electric motor, pump, manifold reservoir, and valve assembly of proper size, type, and operation for capacity indicated. Provide manufacturer's standard means for limiting loaded ramp's free fall.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Advance Lifts, Inc**]
b. [**Autoquip Corporation**]
c. [**Beacon Industries, Inc**]
d. [**Kelley; Entrematic; ASSA ABLOY**]
e. [**Pentalift Equipment Corporation**]
f. [**Poweramp; System, LLC**]
g. [**Rite-Hite Holding Corporation**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Rated Capacity: Capable of supporting total gross load of [**50,000 (22 680)**][**55,000 (24 948)**][**60,000 (27 216)**][**65,000 (29 484)**] **lb (kg)** without permanent deflection or distortion.

D. Travel Speed: Leveler raises and lowers at **3 fpm (0.015 m/s)**, measured at traveling end.

E. Surface-Mounted Units: Designed for mounting on surface of concrete driveway.

F. Shallow-Pit-Mounted Units: Designed for mounting in sloping shallow pit; capable of **18 inches (457 mm)** of vertical travel above and below level of driveway.

G. Full-Pit-Mounted Units: Designed for installation in a fully recessed pit, with top of platform in stored position flush with driveway.

1. Provide removable plate for access to pit for service.

H. Hydraulic Operating System: Electric control from a remote-control station; fully hydraulic operation. Self-contained, electric-powered hydraulic raising and hydraulic lowering of lift.

1. Remote-Control Station: Weatherproof, multibutton control station of the constant-pressure type with UP and DOWN push buttons. Controller shall consist of magnetic motor starter with three-pole adjustable overloads and 24-V control transformer with 4-A, fused secondary prewired to terminal strips and enclosed in NEMA ICS 6, [**Type 12**] box.

a. Upper-Travel-Limit Switch: Equip unit with manufacturer's standard, adjustable, upper-travel-limit switch.

I. Construction: Fabricate truck leveler from structural- and formed-steel shapes; fabricate platform from nonskid steel plate. Construct platform with notch at loading dock end to provide clearance for truck restraint.

1. Cylinders: Equip truck leveler with not less than two heavy-duty, high-pressure, hydraulic, ram-type cylinders. Rams shall be manufacturer's standard, either direct-displacement plunger or rod-and-piston type with positive internal stops. Cylinder rods shall be chrome plated and polished.

J. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.
4. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

K. Truck-Leveler Finish: [**Manufacturer's standard prime-paint or baked-on factory finish**][**Hot-dip galvanized**].

2.6 STATIONARY LOADING DOCK LIFTS

A. Stationary Loading Dock Lifts: Stationary, scissors-type, single-leg, hydraulic dock lift of capacity, size, and construction indicated; complete with controls, safety devices, and accessories required.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Advance Lifts, Inc**]
    b. [**Autoquip Corporation**]
    c. [**Beacon Industries, Inc**]
    d. [**Blue Giant Equipment Corporation**]
    e. [**Kelley; Entrematic; ASSA ABLOY**]
    f. [**Pentalift Equipment Corporation**]
    g. [**Presto Lifts Inc.**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Standard: MH 29.1.

D. Rated Capacity: Lifting capacity of not less than [**8000 lb (3629)**][**load indicated on Drawings**] with axle loads of [**6500 lb (2948 kg) at ends and 5000 lb (2268 kg) at sides**][**magnitudes indicated on Drawings**].

E. Platform: [**Nonskid, safety-tread**][**Smooth-surface**] heavy[**hot-dip galvanized-**] steel deck plate.

1. Platform Size: [**72 inches (1829 mm) long by 72 inches (1829 mm) wide**][**96 inches (2438 mm) long by 72 inches (1829 mm) wide**][**120 inches (3048 mm) long by 72 inches (1829 mm) wide**][**As indicated on Drawings**].
2. Platform Guarding: [**Bevel toe guards**][**Toe sensor**][**Indicator bar**][**Skirts**][**Enclosure**] to comply with requirements in MH 29.1.
3. [**Removable**][**Fixed**] Guard Rails: Provide [**steel**][**hot-dip galvanized-steel**][**aluminum**] guard rails on two sides of platform with a single, removable chain across each end. Provide guard rails not less than **39 inches (991 mm)** high with midrail and **4-inch- (102-mm-)** high, kick plate at bottom.[**Mount rail sockets flush with platform surface.**]

F. Bridge: [**Nonskid, safety-tread steel**][**Nonskid, safety-tread, hot-dip galvanized-steel**][**High-tensile aluminum**] plate.

1. Hinged Bridge: Hinged, throw-over bridge bolted to full-length, heavy-duty, piano-type hinge welded to toe guard at end of platform. Provide bridge complete with heavy-duty lifting chains. Chamfer edge of bridge to minimize obstructing wheels of material-handling vehicles.
2. Size: [**18 inches (457 mm) long by 60 inches (1524 mm) wide**][**18 inches (457 mm) long by 72 inches (1829 mm) wide**][**As indicated on Drawings**].
3. Locations: [**Ends**][**Sides**][**As indicated on Drawings**].

G. Function: Dock lifts shall compensate for differences in height between truck bed and loading platform.

1. Vertical Travel and Travel Speed: As indicated on Drawings.
2. Vertical Travel: Maximum of [**60 (1524)**] **inches (mm)** from a lowered height of [**12 (305)**] **inches (mm)** for a total raised height of [**72 (1829)**]**inches (mm)**.
3. Travel Speed: Nominal raising speed of [**8 (0.04)**][**10 (0.05)**][**12 (0.06)**]**fpm (m/s)**.
4. Hinged Throw-over Bridge Operation: [**Manual**][**Spring assist**][**Manual-assist bridge winch**][**Automatic powered**].

H. Hydraulic Operating System: Self-contained, electric, hydraulic power unit for raising and lowering lift; of size, type, and operation needed for capacity of lift indicated; controlled from a remotely located push-button station.

1. Power Unit: Consisting of continuous-duty motor, high-pressure gear pump, valve manifold, oil-line filters, and oil reservoir.

    a. Equip manifold with relief valve, check valve, pressure-compensated flow-control valve, and solenoid valve and with provisions for lowering lift manually if power fails.
    b. Equip reservoir, valve manifold, and pressure line with oil-line filters.

2. Cylinders: Equip lift with not less than two heavy-duty, high-pressure, hydraulic, ram-type cylinders. Rams shall be manufacturer's standard, either direct-displacement-plunger or rod-and-piston type with positive internal stops. Cylinder rods shall be chrome plated and polished.

    a. Rate of Descent Protection: Pressure-compensated flow control or hydraulic velocity fuse to limit down speed for each cylinder.

3. Remote-Control Station: Multibutton control station of the constant-pressure type with UP and DOWN push buttons. Controller shall consist of magnetic motor starter with three-pole adjustable overloads and 24-V control transformer with 4-A, fused secondary prewired to terminal strips and enclosed in NEMA ICS 6, [**Type 12**] box.

    a. Upper-Travel-Limit Switch: Equip unit with manufacturer's standard, adjustable, upper-travel-limit switch.

I. Construction: Fabricate lift from structural-steel shapes rigidly welded and reinforced for maximum strength, safety, and stability. Design assembly to withstand deformation during both operating and stored phases of service. Provide mounting brackets and removable lifting eyes for ease of installation.

1. Scissors Mechanism: Fabricate leg members from heavy,[**hot-dip galvanized-**] steel-formed tube or plate members to provide maximum strength and rigidity.
2. Scissors Configuration: [**Single leg**][**Multiple width**][**Multiple length**].
3. Bearings: Pivot points with permanently lubricated antifriction bushings or sealed ball-bearings for minimum maintenance.
4. Maintenance Leg: Removable, safety maintenance leg or hinged, safety maintenance bars.
5. Mounting: [**Surface**][**Pit**].

J. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.

K. Dock Lift Finish: Manufacturer's standard baked-on factory finish unless otherwise indicated.

2.7 TRUCK RESTRAINTS

A. Truck Restraints: Manufacturer's standard device designed to engage truck's rear-impact guard and hold truck at loading dock. Restraint shall consist of an iron or steel restraining arm that raises until contacting rear-impact guard. Arm shall move vertically, automatically adjusting to varying height of truck due to loading and unloading operations.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Beacon Industries, Inc**]
b. [**Blue Giant Equipment Corporation**]
c. [**Chalfant Sewing Fabricators, Inc**]
d. [**DLM; Systems, LLC**]
e. [**Kelley; Entrematic; ASSA ABLOY**]
f. [**McGuire; Systems, LLC**]
g. [**Nordock Inc.**]
h. [**NOVA Technology International, L.L.C.**]
i. [**Pentalift Equipment Corporation**]
j. [**Pioneer Dock Equipment**]
k. [**Poweramp; System, LLC**]
l. [**Rite-Hite Holding Corporation**]
m. [**Rotary Products Inc**]
n. [**Serco; Entrematic; ASSA ABLOY**]
o. [**Vestil Manufacturing Company**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Standard: Comply with MH 30.3.

D. Rated Capacity: Capable of supporting total gross load of [**30,000 (13 608)**][**32,000 (14 515)**] **lb (kg)** without permanent deflection or distortion.

E. Operating Range: Capable of restraining rear-impact guards within a range from:

1. Vertical Range: Minimum of [**7 inches (178 mm)**][**8 inches (203 mm)**][**9 inches (229 mm)**][**11 inches (279 mm)**][**dimension indicated on Drawings**] to maximum of [**28 inches (711 mm)**][**30 inches (762 mm)**][**34 inches (864 mm)**][**dimension indicated on Drawings**] above driveway.
2. Horizontal Range: Zero to [**10 inches (254 mm)**][**12 inches (305 mm)**][**15 inches (381 mm)**][**dimension indicated on Drawings**] in front of dock bumpers.

F. Power Operating System: Manufacturer's standard electromechanical or hydraulic unit.

1. Remote-Control Station: Single-button station of the constant-pressure type, enclosed in NEMA ICS 6, [**Type 12**] box. Restraint is engaged by depressing and holding button; restraint is released by releasing button.
2. Interlock: Leveler does not operate while truck restraint is not engaged.

G. Mechanical Operating System: Restraint operates by use of a lifting rod or hook to raise engagement device.

H. Rear-Impact-Guard Sensor: Detects presence of rear-impact guard[**and automatically returns to stored position if rear-impact guard is not engaged**].

I. Caution Signs: Exterior, surface mounted; designed to inform both dock attendant and truck driver; with sign copy as follows. Provide one sign at each truck-restraint location.

1. Sign Copy in Forward and Reverse Text: [**Manufacturer's standard text permitting truck movement with green light**].
2. Interior Sign Copy: [**Manufacturer's standard text permitting truck movement with green light**].

J. Light Communication System: Red and green illuminated signal-light sets, with lens approximately **4 inches (102 mm)** in diameter, designed to indicate status to both dock attendant and truck driver. Equip system with steel control panel located at interior of dock that [**includes illuminated lights**

indicating][**indicates**] status of exterior signal lights. Provide signal-light set and control panel at each location indicated for light communication system. Enclose exterior signal-light sets in steel or plastic housing with sunshade.

1. Manual Operation: System is activated by push button or switch located on [**interior**][**truck-restraint**] control panel.
2. Automatic Operation:

    a. System is activated automatically by [**limit switch**][**photoelectric sensor**][**magnetic switch**] mounted on overhead door track. Provide on-off switch located on [**light communication system**][**truck-restraint**] control panel.
    b. System is activated automatically when device engages rear-impact guard. Provide on-off switch located on truck-restraint control panel.

3. Mounting: [**Wall**][**Driveway**][**Pit**][**Pedestal**].

    a. Pedestal: **4 by 4 inches (102 by 102 mm) post with base plate and face plate for mounting light communication system,)60 inches (1524 mm) high.)**

        1) Finish: [**Manufacturer's standard baked-on factory finish in yellow or orange**][**Hot-dip galvanized**].

K. Alarm: [**Audible**][**and**][**visual**] system indicating that rear-impact guard is not engaged, with manual reset.

L. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.
4. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

M. Truck-Restraint Finish: [**Manufacturer's standard electrodeposited zinc coating**][**Hot-dip galvanized**].

N. Accessories: [**Interlock to dock leveler**][**Key switch**].

2.8 LIGHT COMMUNICATION SYSTEMS

A. Light Communication Systems: Communication system consisting of signal-light sets, caution signs, alarms, and controls for each location indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Beacon Industries, Inc**]
    b. [**Kelley; Entrematic; ASSA ABLOY**]
    c. [**Nordock Inc.**]
    d. [**Rite-Hite Holding Corporation**]
    e. [**Serco; Entrematic; ASSA ABLOY**]

f. [**Vestil Manufacturing Company**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Caution Signs: Surface mounted; designed to inform both dock attendant and truck driver; with sign copy as follows:

1. Exterior Sign Copy in Forward and Reverse Text: [**Manufacturer's standard text permitting truck movement with green light**].
2. Interior Sign Copy: [**Manufacturer's standard text permitting truck movement with green light**].
3. Mounting: [**Wall**][**Pedestal**]

D. Signal-Light Sets: Red and green illuminated signal-light sets, with lens approximately **4 inches (102 mm)** in diameter, designed to indicate status to both dock attendant and truck driver. Equip system with steel control panel that [**includes illuminated lights indicating**][**indicates**] status of exterior signal lights; locate control panel at interior of dock. Provide signal-light set and control panel at each location indicated for light communication system. Enclose signal lights in steel or plastic housing, with exterior signal-light sets equipped with sunshade.

1. Manual Operation: Lights are activated by push button or switch located on [**interior signal-light enclosure**][**control panel**].
2. Automatic Operation: Lights are activated automatically by [**limit switch**][**photoelectric sensor**][**magnetic switch**] mounted on overhead door track. Provide on-off switch located on control panel.
3. Mounting: [**Wall**][**Pedestal**]

E. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.
4. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.

2.9 FINISH REQUIREMENTS

A. Finish loading dock equipment after assembly and testing.

B. Hot-Dip Galvanizing: Comply with the following:

1. ASTM A123/A123M for iron and steel loading dock equipment.
2. ASTM A153/A153M or ASTM F2329/F2329M for iron and steel hardware for loading dock equipment.

C. Spray Zinc Metallizing: ASTM B833.

D. Electrodeposited Zinc Coatings: ASTM B633.

E. Steel Prime Paint Finish: Clean, pretreat, and apply manufacturer's standard primer.

F. Baked-on Factory Finish: Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat.

1. Color: [**Manufacturer's standard**][**Match Architect's sample**], as directed by the Owner.
2. Toe Guards: Paint to comply with ANSI Z535.1.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Examine roughing-in for electrical systems for loading dock equipment to verify actual locations of connections before equipment installation.

C. Examine walls and floors of pits for suitable conditions where recessed loading dock equipment is to be installed. Pits shall be plumb and square and properly sloped for drainage from back to front of loading dock.

D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Set curb angles in concrete edges of dock-leveler recessed pits with tops flush with loading platform. Fit exposed connections together to form hairline joints.

B. Set curb angles in concrete edges of truck-leveler recessed pits with tops flush with driveway. Fit exposed connections together to form hairline joints.

C. Place self-forming pan system for [**recessed dock**][**edge-of-dock**] levelers in proper relation to loading platform before pouring concrete.

D. Clean recessed pits of debris.

3.3 INSTALLATION, GENERAL

A. Install loading dock equipment as required for a complete installation.

1. Rough-in electrical connections.

3.4 INSTALLATION OF RECESSED LOADING DOCK LEVELERS

A. Attach dock levelers securely to loading dock platform, flush with adjacent loading dock surfaces and square to recessed pit.

3.5 INSTALLATION OF EDGE-OF-DOCK LOADING DOCK LEVELERS

A. Attach dock levelers to loading dock platform in a manner that complies with requirements indicated for arrangement and position relative to top of platform.

1. Weld anchor holes in contact with continuous embedded loading dock edge channel. Weld or bolt bumper blocks to face of loading dock.

3.6 INSTALLATION OF TOP-OF-DOCK LOADING DOCK LEVELERS

A. Attach dock levelers to loading dock platform in a manner that complies with requirements indicated for arrangement and position relative to top of platform.

1. Weld anchor holes in contact with continuous embedded loading dock edge channel. Weld or bolt bumper blocks to face of loading dock.

3.7 INSTALLATION OF TRUCK LEVELERS

A. Attach truck levelers securely to driveway construction with expansion anchors and bolts.

3.8 INSTALLATION OF STATIONARY LOADING DOCK LIFTS

A. Attach dock lifts securely to [**loading platform**][**floor of recessed pit**][**surface of driveway**].

3.9 INSTALLATION OF TRUCK RESTRAINTS

A. Attach truck restraints in a manner that complies with requirements for arrangement and height required for device to engage vehicle rear-impact guard.[**Interconnect control panel and signals with dock leveler.**]

1. Wall-Mounted Units: [**Weld**][**Anchor**]

a. Weld truck restraints to steel [**curb angle**][**edge channel**][**mounting plate**] embedded in loading dock edge.
b. Anchor truck restraints to face of loading dock with expansion anchors and bolts.

2. Driveway-Mounted Units: Anchor truck restraints to driveway with expansion anchors and bolts.
3. Pit-Mounted Units: Anchor truck restraints to concrete pit with expansion anchors and bolts.

3.10 ADJUSTING

A. Adjust loading dock equipment to function smoothly and safely, and lubricate as recommended by manufacturer.

B. Test dock levelers for vertical travel and adjust to maintain operating range indicated.

C. After completing installation of exposed, factory-finished loading dock equipment, inspect exposed finishes and repair damaged finishes.

3.11 MAINTENANCE SERVICE

A. Beginning at Substantial Completion, maintenance service shall include [**12**] months' full maintenance by skilled employees of loading dock equipment Installer. Include [**monthly**][**quarterly**] preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and

adjusting as required for proper loading dock equipment operation at rated speed and capacity. Parts and supplies shall be manufacturer's authorized replacement parts and supplies.

3.12 DEMONSTRATION

A. [**Engage a factory-authorized service representative to train**][**Train**] the Owner's maintenance personnel to adjust, operate, and maintain loading dock equipment.

END OF SECTION 11 13 19 00

Task	Specification	Specification Description
11 13 19 13	11 13 19 00	Stationary Loading Dock Equipment
11 13 19 23	11 13 19 00	Stationary Loading Dock Equipment

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 11 13 23 00 - PORTABLE DOCK EQUIPMENT

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes portable loading dock lifts (scissors lifts).

B. Related Requirements:

1. Section 111319 "Stationary Loading Dock Equipment" for stationary dock lifts (scissor lifts).

1.2 DEFINITIONS

A. Operating Range: Maximum amount of travel above and below the loading dock level.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1. Inspect and discuss electrical roughing-in, equipment bases, and other preparatory work specified elsewhere.
2. Review sequence of operation for each type of portable dock equipment.
3. Review coordination of interlocked equipment specified in this Section and elsewhere.
4. Review required testing, inspecting, and certifying procedures.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
2. Include rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.

B. Shop Drawings: For portable dock equipment.

1. Include plans, elevations, sections, and attachment details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location of each field connection.
3. Include diagrams for power, signal, and control wiring.

1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer.

1.6 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For portable dock equipment, to include in operation and maintenance manuals.

1.7 QUALITY ASSURANCE

A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.

PART 2 - PRODUCTS

2.1 PORTABLE LOADING DOCK LIFTS (SCISSOR LIFTS)

A. Dock Lifts: Portable, scissors-type, single-leg, hydraulic dock lift of capacity, size, and construction indicated; complete with controls, safety devices, and accessories required.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Advance Lifts, Inc**]
b. [**Autoquip Corporation**]
c. [**Beacon Industries, Inc**]
d. [**Blue Giant Equipment Corporation**]
e. [**Kelley; Entrematic; ASSA ABLOY**]
f. [**Pentalift Equipment Corporation**]
g. [**Presto Lifts Inc.**]

B. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

C. Standard: MH 29.1.

D. Rated Capacity: Lifting capacity of not less than [**8000 lb (3629 kg)**][**load indicated on Drawings**] and with axle loads of [**6500 lb (2948 kg) at ends and 5000 lb (2268 kg) at sides**][**magnitudes indicated on Drawings**].

E. Platform: [**Nonskid, safety-tread**][**Smooth-surface**] heavy[**hot-dip galvanized-**] steel deck plate.

1. Platform Size: [**72 inches (1829 mm) wide by 72 inches (1829 mm) long**][**72 inches (1829 mm) wideby 96 inches (2438 mm) long**][**72 inches (1829 mm) wideby 120 inches (3048 mm) long**][**As indicated on Drawings**].
2. Platform Guarding: [**Bevel toe guards**][**Toe sensor**][**Indicator bar**][**Skirts**][**Enclosure**] to comply with requirements in MH 29.1.
3. [**Removable**][**Fixed**] Guard Rails: Provide [**steel**][**hot-dip galvanized-steel**][**aluminum**] guard rails on two sides of platform with a single, removable chain across each end. Provide guard rails not less than **39 inches (991 mm)** high with midrail and **4-inch- (102-mm-)** high, kick plate at bottom.[**Mount rail sockets flush with platform surface.**]

F. Bridge: [**Nonskid, safety-tread steel**][**Nonskid, safety-tread hot-dip galvanized-steel**][**High-tensile**

aluminum] plate.

1. Hinged Bridge: Hinged, throw-over bridge bolted to full-length, heavy-duty, piano-type hinge welded to toe guard at end of platform. Provide bridge complete with heavy-duty lifting chains. Chamfer edge of bridge to minimize obstructing wheels of material-handling vehicles.
2. Size: [**18 inches (457 mm) long by 60 inches (1524 mm) wide**][**18 inches (457 mm) long by 72 inches (1829 mm) wide**][**As indicated on Drawings**].
3. Locations: [**Ends**][**Sides**][**As indicated on Drawings**].

G. Function: Dock lifts shall compensate for differences in height between truck bed and loading platform.

1. Vertical Travel and Travel Speed: As indicated on Drawings.
2. Vertical Travel: Maximum of [**60 (1524)**] **inches (mm)** from a lowered height of [**12 (305)**] **inches (mm)** for a total raised height of [**72 (1829)**]**inches (mm)**.
3. Travel Speed: Nominal raising speed of [**8 (0.04)**][**10 (0.05)**][**12 (0.06)**]**fpm (m/s)**.
4. Hinged Throw-over Bridge Operation: [**Manual**][**Spring assist**][**Manual-assist bridge winch**][**Automatic powered**].

H. Hydraulic Operating System: Self-contained, electric, hydraulic power unit for raising and lowering lift; of size, type, and operation needed for capacity of lift indicated; controlled from a remotely located push-button station.

1. Power Unit: Consisting of continuous-duty motor, high-pressure gear pump, valve manifold, oil-line filters, and oil reservoir.

    a. Equip manifold with relief valve, check valve, pressure-compensated flow-control valve, and solenoid valve and with provisions for lowering lift manually if power fails.
    b. Equip reservoir, valve manifold, and pressure line with oil-line filters.

2. Cylinders: Equip lift with not less than two heavy-duty, high-pressure, hydraulic, ram-type cylinders. Rams shall be manufacturer's standard, either direct-displacement plunger or rod-and-piston type with positive internal stops. Cylinder rods shall be chrome plated and polished.

    a. Rate of Descent Protection: Pressure-compensated flow control or hydraulic velocity fuse to limit down speed for each cylinder.

3. Remote-Control Station: Multibutton control station of the constant-pressure type with UP and DOWN push buttons. Controller shall consist of magnetic motor starter with three-pole adjustable overloads and 24-V control transformer with 4-A, fused secondary prewired to terminal strips and enclosed in NEMA ICS 6, [**Type 12**] box.

    a. Upper-Travel-Limit Switch: Equip unit with manufacturer's standard, adjustable, upper-travel-limit switch.

I. Construction: Fabricate lift from structural-steel shapes rigidly welded and reinforced for maximum strength, safety, and stability. Design assembly to withstand deformation during both operating and stored phases of service. Provide mounting brackets and removable lifting eyes for ease of installation.

1. Scissors Mechanism: Fabricate leg members from heavy,[**hot-dip galvanized**] steel-formed tube or plate members to provide maximum strength and rigidity.
2. Scissors Configuration: [**Single leg**][**Multiple width**][**Multiple length**].
3. Bearings: Pivot points with permanently lubricated antifriction bushings or sealed ball-bearings for minimum maintenance.
4. Maintenance Leg: Removable, safety maintenance leg or hinged, safety maintenance bars.

J. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from steel plate complying with ASTM A572/A572M, Grade **55 (380)**.
3. Steel Tubing: ASTM A500/A500M, cold formed.

2.2 FINISH REQUIREMENTS

A. Baked-on Factory Finish: Provide unless otherwise indicated. Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat in manufacturer's standard color.

1. Toe Guards: Paint to comply with ANSI Z535.1.

B. Hot-Dip Galvanizing: Comply with the following:

1. ASTM A123/A123M for iron and steel portable dock equipment.
2. ASTM A153/A153M or ASTM F2329/F2329M for iron and steel hardware for portable dock equipment.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Examine roughing-in for electrical systems for portable dock equipment to verify actual locations of connections before equipment installation.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION, GENERAL

A. Install portable dock equipment as required for a complete installation.

3.3 ADJUSTING

A. Adjust portable dock equipment to function smoothly and safely, and lubricate as recommended by manufacturer.

B. Test lifts for vertical travel and adjust to maintain operating range indicated.

C. After completing installation of exposed, factory-finished portable dock equipment, inspect exposed finishes and repair damaged finishes.

3.4 MAINTENANCE SERVICE

A. Beginning at Substantial Completion, maintenance service shall include [**three**][**six**][**nine**][**12**] months'

full maintenance by [**skilled employees of portable dock equipment Installer**][**manufacturer's authorized service representative**]. Include annual preventive maintenance, repair or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper portable dock equipment operation. Parts and supplies shall be manufacturer's authorized replacement parts and supplies.

3.5 DEMONSTRATION

A. [**Engage a factory-authorized service representative to train**][**Train**] the Owner's maintenance personnel to adjust, operate, and maintain portable dock equipment.

SECTION 11 82 26 00 - FACILITY WASTE COMPACTORS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Facility waste compactors.

B. Related Requirements:

1. Section 113013 "Residential Appliances" for residential trash compactors.
2. Section 114000 "Foodservice Equipment" for food-waste shredding, pulping, grinding, and compacting machines in foodservice facilities.
3. Section 149182 "Trash Chutes" for waste chutes and diverters servicing waste compactors.
4. Section 211000 "Water-Based Fire-Suppression Systems" for building fire sprinklers and piping connections to automatic sprinkler in hopper of each chute-fed compactor.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1. Inspect and discuss electrical, plumbing, and sprinkler roughing-in; equipment bases; and other preparatory work specified elsewhere.
2. Review coordination of chute[**and diverter**] locations with waste compactors.
3. Review sanitary requirements for water bibs, floor drains, and grease traps if required for Project to reduce decomposition and odors.
4. Review haul routes of waste to the compactor, route of hauler's equipment, and protections along these routes that are specified elsewhere.
5. Review required testing, inspection, and certification procedures.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include rated capacities, operating characteristics, furnished specialties and accessories, and finishes.

B. Shop Drawings: For each waste compactor and for special components not dimensioned or detailed in manufacturer's product data.

1. Include plans, elevations, sections, and attachment details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Dimension chute[**and diverter**] locations that interface with waste compactors.
4. Include location and installation details of automatic sprinkler in hopper of each chute-fed compactor.
5. Indicate equipment access points and required space for equipment service and operation.

6. Include setting drawings, templates, and instructions for installing anchor bolts and other anchorages.
7. Include diagrams for power, signal, and control wiring.

1.4 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer.

B. Product Certificates: For each type of waste compactor.

C. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For waste compactors to include in operation and maintenance manuals.

B. Continuing Maintenance Proposal: From Installer to the Owner, in the form of a standard [**one-year**][**two-year**][**five-year**] maintenance agreement, starting on date maintenance service is concluded. State services, obligations, conditions, and terms for agreement period and for future renewal options.

1.6 QUALITY ASSURANCE

A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.

1. Maintenance Proximity: Not more than [**one**][**two**] hour(s') normal travel time from Installer's place of business to Project site.

PART 2 - PRODUCTS

2.1 FACILITY WASTE COMPACTORS

A. Waste Compactor: Manufacturer's standard [stationary-horizontal][self-contained horizontal][compactor-container (combination-container)][vertical][pivoting-ram] -type stationary compactor, complying with requirements[liquidtight]; and with components, options, and accessories needed to provide a complete, functional system.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Compactors, Inc.**]
b. [**Cram-A-Lot; J.V. Manufacturing, Inc.**]
c. [**Harmony Enterprises, Inc.**]
d. [**Marathon Equipment Company; a Dover company**]
e. [**Precision Machinery Systems LLC**]
f. [**PTR Baler & Compactor Company**]
g. [**Rudco Products, Inc.**]

h. [**Sebright Products, Inc.**]
i. [**SP Industries, Inc**]
j. [**Wastequip, LLC**]
k. [**Western Chutes; Buchanan Company, Inc.**]
l. [**Wilkinson Hi-Rise, LLC**]

2. Source Limitations: Obtain from single source from single manufacturer.
3. Waste-Compactor Standards: ANSI Z245.21[**including appendices**] and NFPA 82.
4. Waste-Container Standards: ANSI Z245.30 and ANSI Z245.60.
5. Rated Size (Volume): Minimum [**0.14 cu. yd. (0.11 cu. m)**][**1.00 cu. yd. (0.77 cu. m)**][**1.50 cu. yd. (1.15 cu. m)**][**2.00 cu. yd. (1.53 cu. m)**][**3.50 cu. yd. (2.68 cu. m)**][**5.00 cu. yd. (3.82 cu. m)**][**7.50 cu. yd. (5.73 cu. m)**][**10.00 cu. yd. (7.65 cu. m)**].
6. Clear Top Opening (Length by Width): Minimum [**20 by 28 inches (508 by 711 mm)**][**24 by 36 inches (610 by 914 mm)**][**30 by 48 inches (762 by 1219 mm)**][**60 by 48 inches (1524 by 1219 mm)**][**108 by 72 inches (2743 by 1829 mm)**].
7. Cycle Time: Maximum [**30**][**40**][**50**][**60**][**70**] seconds.
8. Normal/Maximum Resultant Ram Forces: [**20,000/22,000 lbf (89/98 kN)**][**36,000/40,000 lbf (160/178 kN)**][**70,000/80,000 lbf (311/356 kN)**][**125,000/150,000 lbf (556/667 kN)**].
9. Normal/Maximum System Pressures: [**1600/1800 psi (11.0/12.4 MPa)**][**2000/2400 psi (13.8/16.5 MPa)**][**2500/2800 psi (17.2/19.3 MPa)**].
10. Scale Weight: Maximum [**2500 lb (1134 kg)**][**6000 lb (2722 kg)**][**12,000 lb (5443 kg)**][**20,000 lb (9072 kg)**].
11. Electrical Characteristics:

    a. Horsepower: [**3**][**10**][**15**][**20**][**30**][**50**] hp.
    b. Voltage: [**115 V ac single phase, 60 Hertz**][**230 V ac, single phase, 60 Hertz**][**208 V ac, three phase, 60 Hertz**][**230 V ac, three phase, 60 Hertz**][**460 V ac three phase, 60 Hertz**].

12. Finish: [**Manufacturer's standard**][**Manufacturer's standard primer for field painting**].

    a. Color: [**White**][**Black**][**Gray**][**Dark green**][**Yellow**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

13. Deodorizing Device: [**Manufacturer's standard**].

B. Number of Extra Storage Containers: [**One**][**Two**].

2.2 FABRICATION

A. Fabricate waste compactors with smooth, eased, exposed edges to prevent injury to persons in vicinity of the equipment.

B. Fabricate containers, hoppers, compaction chambers, unit bodies, and similar components of steel with welded joints. Reinforce with steel members sized and spaced to withstand impacts and pressures of normal operations and to prevent deformation.

C. Fabricate equipment with replaceable parts at points of normal wear.

D. Fabricate liquidtight compactor baffles to stop liquid from leaking out.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances, clearances, service rough-ins, and other conditions affecting performance of the Work.

B. Examine walls, floors, and chutes for suitable conditions where each waste compactor will be installed.

C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.

D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF FACILITY WASTE COMPACTORS

A. Install each waste compactor according to manufacturer's written instructions, ANSI Z245.2, and ANSI Z245.21[including appendices].

B. Install automatic sprinkler in hopper of each chute-fed compactor according to NFPA 82.

C. Set waste compactors level, plumb, properly aligned, and securely in place. Anchor as required for secure operation.

3.3 FIELD QUALITY CONTROL

A. Perform the following tests and inspections with the assistance of a factory-authorized service representative:

1. Perform installation and startup checks according to[**ANSI Z245.21, Appendix D, "Tests for Evaluation of Equipment and Performance," and**] manufacturer's written instructions.
2. Test and adjust controls, alarms, and safeties. Replace damaged and malfunctioning controls and equipment.
3. Verify unrestricted access to each firefighting access door or hose connection required by ANSI Z245.21 and NFPA 82 for compactor container(s).
4. Verify correct locations, color coding, and legibility of caution, warning, and danger markings.
5. Certify compliance with test parameters.

B. A waste compactor will be considered defective if it does not pass tests and inspections.

C. Prepare test and inspection reports.

3.4 MAINTENANCE SERVICE

A. Maintenance Service: Beginning at Substantial Completion, initial maintenance service shall include [**12**] months' full maintenance by skilled employees of waste-compactor Installer. Include [**monthly**] preventive maintenance, repair, or replacement of worn or defective components, lubrication, cleaning, and adjusting as required for proper waste-compactor operation. Parts and supplies shall be manufacturer's authorized replacement parts and supplies.

3.5 DEMONSTRATION

A. Engage a factory-authorized service representative to train the Owner's maintenance personnel to adjust, operate, and maintain waste compactors according to manufacturer's written instructions and ANSI Z245.2.

END OF SECTION 11 82 26 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 11 97 26 00 - DETENTION GUN LOCKERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Pistol lockers.
2. Tilt-out pistol lockers.

B. Related Requirements:

1. Section 119814 "Detention Door Hardware" for cylinders and keying for detention gun lockers.
2. Section 125500 "Detention Furniture" for detention furniture.

1.2 COORDINATION

A. Detention Specialist: Coordinate with Section 013513.16 "Special Project Procedures for Detention Facilities" for requirements of this Section that are to be performed by a Detention Specialist or other entity.

B. Coordinate installation of anchorages for detention gun lockers. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors that are to be embedded in adjacent construction. Deliver such items to Project site in time for installation.

C. Coordinate size and location of recesses in wall construction to receive recessed detention gun lockers.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for detention gun lockers.

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.

C. Shop Drawings: For detention gun lockers.

1. Include plans, elevations, sections, and attachment details.
2. Indicate locations, dimensions, and profiles of wall and floor reinforcements.

3. Indicate locations and installation details of built-in anchors.
4. Show elevations and indicate dimensions of detention gun lockers, preparations for receiving anchors, and locations of anchorage.
5. Show details of attachment of detention gun lockers to built-in anchors.

D. Samples for Initial Selection: For detention gun lockers with factory-applied color finishes.

1.5 INFORMATIONAL SUBMITTALS

A. Welding certificates.

B. Examination reports documenting inspections of substrates, areas, and conditions.

C. Anchor inspection reports documenting inspections of built-in and cast-in anchors.

D. Field quality-control reports documenting inspections of installed products.

1. Field quality-control certification signed by Contractor[**and Detention Specialist**].

1.6 QUALITY ASSURANCE

A. Welding Qualifications: Qualify procedures and personnel in accordance with the following:

1. AWS D1.1/D1.1M, "Structural Welding Code - Steel."
2. AWS D1.3/D1.3M, "Structural Welding Code - Sheet Steel."
3. AWS D1.6/D1.6M, "Structural Welding Code - Stainless Steel."

1.7 FIELD CONDITIONS

A. Field Measurements: Verify openings for recessed detention gun lockers by field measurements before fabrication.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled content not less than [**25**] percent.

2.2 PISTOL LOCKERS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American Jail Products L.L.C.**]
2. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
3. [**Detention Device Systems (DDS); DDS Group**]

4. [**Maximum Security Products Corp**]
5. [**PSI LLC**]
6. [**Southern Folger Detention Equipment Company**]
7. [**Sweeper Metal Fabricators Corp**]
8. [**Tiffin Metal Products Co.**]
9. [**Willo Products Company, Inc.**]

B. Cabinet: Minimum **20 inches (508 mm)** wide by **15 inches (381 mm)** high by **10 inches (254 mm)** deep; formed from [**0.134-inch (3.42-mm) nominal-thickness steel sheet**][**0.141-inch (3.57-mm) nominal-thickness stainless steel sheet**]. Line each compartment with mothproofed felt or nonabsorbing, closed-cell padding.

1. Compartments: [**Six**].

C. Doors: Formed from [**3/16-inch- (4.8-mm-) thick steel plate**][**0.180-inch (4.55-mm) nominal-thickness steel sheet**][**same material as cabinet**], supported by heavy-duty continuous bottom hinge.

D. Locks: [**Snap**][**Cylinder**] type, keyed differently[**and master keyed**]; provide one lock for each compartment.

1. Lock Preparation: Prepare door panel to accept cylinder specified in Section 119814 "Detention Door Hardware."

E. Mounting: [**Surface**][**Recessed, with mounting flange formed from same material as body**].

F. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Cold-Rolled Steel Sheet: ASTM A1008/A1008M, CS (Commercial Steel), Type B; suitable for exposed applications.
3. Hot-Rolled Steel Sheet: ASTM A1011/A1011M, CS (Commercial Steel), Type B; free of scale, pitting, or surface defects; pickled and oiled.
4. Stainless Steel Sheet, Strip, Plate, and Flat Bars: ASTM A666 or ASTM A240/A240M, austenitic stainless steel, Type 304.

G. Finishes:

1. Steel Factory Prime Finish: Clean, pretreat, and apply manufacturer's standard primer.
2. Steel Baked-Enamel or Powder-Coat Finish: Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat. Comply with coating manufacturer's written instructions for applying and baking to achieve a minimum dry film thickness of **2 mils (0.05 mm)**.

a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

3. Stainless Steel Finish:

a. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.
b. Polished Finish: Grind and polish surfaces to produce uniform finish, free of cross scratches.

1) Run grain of directional finishes with long dimension of each piece.
2) When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.

3) Directional Satin Finish: No. 3.

2.3 TILT-OUT PISTOL LOCKERS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American Jail Products L.L.C.**]
2. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
3. [**Detention Device Systems (DDS); DDS Group**]
4. [**Maximum Security Products Corp**]
5. [**Norix Group, Inc.**]
6. [**PSI LLC**]
7. [**Southern Folger Detention Equipment Company**]
8. [**Sweeper Metal Fabricators Corp**]
9. [**Willo Products Company, Inc.**]

B. Cabinet: Minimum **39 inches (991 mm)** wide by **15 inches (381 mm)** high by **6 inches (152 mm)** deep; formed from [**0.134-inch (3.42-mm) nominal-thickness steel sheet**][**0.141-inch (3.57-mm) nominal-thickness stainless steel sheet**].

1. Compartments: [**Six**].

C. Tilt-Out Compartments: Doors formed from [**3/16-inch- (4.8-mm-) thick steel plate**][**0.180-inch (4.55-mm) nominal-thickness steel sheet**][**same material as cabinet**], supported by heavy-duty continuous bottom hinge, with attached tilt-out compartment with formed metal sides. Line each compartment with mothproofed felt or nonabsorbing, closed-cell padding.

D. Locks: [**Snap**][**Cylinder**] type, keyed differently[**and master keyed**]; provide one lock for each compartment.

1. Lock Preparation: Prepare door panel to accept cylinder specified in Section 119814 "Detention Door Hardware."

E. Mounting: [**Surface**][**Recessed, with mounting flange formed from same material as body**].

F. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Cold-Rolled Steel Sheet: ASTM A1008/A1008M, CS (Commercial Steel), Type B; suitable for exposed applications.
3. Hot-Rolled Steel Sheet: ASTM A1011/A1011M, CS (Commercial Steel), Type B; free of scale, pitting, or surface defects; pickled and oiled.
4. Stainless Steel Sheet, Strip, Plate, and Flat Bars: ASTM A666 or ASTM A240/A240M, austenitic stainless steel, Type 304.

G. Finishes:

1. Steel Factory Prime Finish: Clean, pretreat, and apply manufacturer's standard primer.
2. Steel Baked-Enamel or Powder-Coat Finish: Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish, consisting of prime coat and thermosetting topcoat. Comply with coating manufacturer's written instructions for applying and baking to achieve a minimum dry film thickness of **2 mils (0.05 mm)**.

a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

3. Stainless Steel Finish:

a. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.
b. Polished Finish: Grind and polish surfaces to produce uniform finish, free of cross scratches.

1) Run grain of directional finishes with long dimension of each piece.
2) When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.
3) Directional Satin Finish: No. 3.

2.4 FABRICATION

A. Shop Assembly: Preassemble items in shop to greatest extent possible to minimize field splicing and assembly. Disassemble units only as necessary for shipping and handling limitations. Use connections that maintain structural value of joined pieces. Clearly mark units for reassembly and coordinated installation.

B. Coordinate dimensions and attachment methods of detention gun lockers with those of adjoining construction to produce integrated assemblies with closely fitting joints and with edges and surfaces aligned unless otherwise indicated.

C. Shear and punch metals cleanly and accurately. Remove burrs.

D. Form and grind edges and corners to be free of sharp edges or rough areas.

E. Form metal in maximum lengths to minimize joints. Form bent-metal corners to smallest radius possible without causing grain separation or otherwise impairing the Work.

F. Weld corners and seams continuously to comply with referenced AWS standard and the following:

1. Use materials and methods that minimize distortion and develop strength and corrosion resistance of base metals.
2. Obtain fusion without undercut or overlap.
3. Remove welding flux immediately.
4. Finish exposed welds and surfaces smooth and blended at exposed connections, so that no roughness shows after finishing and contour of welded surface matches that of adjacent surface.
5. Weld before finishing components to greatest extent possible. Remove weld spatter and welding oxides from exposed surfaces by descaling or grinding.

G. Provide for anchorage of type indicated; coordinate with supporting structure. Fabricate and space anchoring devices to secure detention gun lockers rigidly in place and to support expected loads. Build in straps, plates, and brackets as needed to support and anchor fabricated items to adjoining construction. Reinforce formed-metal units as needed to attach and support other construction.

H. Cut, reinforce, drill, and tap detention gun lockers as indicated to receive hardware, fasteners, and similar items.

I. Form exposed work true to line and level with accurate angles, surfaces, and straight sharp edges.

J. Form exposed connections with hairline joints, flush and smooth, using concealed fasteners where

possible. Locate joints where least conspicuous.

2.5 ACCESSORIES

A. Concealed Bolts: ASTM A307, Grade A unless otherwise indicated.

B. Cast-in-Place Anchors in Concrete: Fabricated from corrosion-resistant materials capable of sustaining, without failure, a load equal to [**4**] times the load imposed, as determined by testing in accordance with ASTM E488/E488M, conducted by a qualified testing agency; of type indicated below.

1. Threaded or wedge type; galvanized ferrous castings, either ASTM A47/A47M malleable iron or ASTM A27/A27M cast steel. Provide bolts, washers, and shims as needed; hot-dip galvanized in accordance with ASTM A153/A153M or ASTM F2329/F2329M.

C. Embedded Plate Anchors: Fabricated from mild steel shapes and plates, minimum **3/16 inch (4.8 mm)** thick; with minimum **1/2-inch- (12.7-mm-)** diameter, headed studs welded to back of plate.

D. Proprietary Built-in Masonry Anchors: Fabricated from [0.134-inch (3.42-mm) nominal-thickness steel sheet][1/4-inch (6-mm) nominal-thickness steel plate][1/2-inch (12.7-mm) nominal-thickness steel plate] into [6-inch- (152-mm-)][8-inch- (203-mm-)] deep blocks matching size of concrete masonry units[with weld nuts attached on inside to receive field-bolted attachments].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**M/BED Block Systems, LLC.**]
b. [**Peterson Detention Inc. (PDI)**]

2. Finish: [**Factory primed for field painting for anchors with field-welded attachments**][**Polyester powder coat for anchors with bolted attachments**][**Epoxy paint for anchors with bolted attachments**].

E. Welding Rods and Bare Electrodes: Select in accordance with AWS specifications for metal alloy welded.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of detention gun lockers.

B. Examine roughing-in for embedded and built-in anchors to verify actual locations of detention gun lockers before detention gun locker installation.

C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of detention gun lockers.

D. Inspect built-in and cast-in anchor installations, before installing detention gun lockers, to verify that

anchor installations comply with requirements. Prepare inspection reports.

1. Remove and replace anchors where inspections indicate that they do not comply with specified requirements. Reinspect after repairs or replacements are made.
2. Perform additional inspections to determine compliance of replaced or additional work. Prepare inspection reports.

E. Verify locations of detention gun lockers with those indicated on Shop Drawings.

F. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Fastening to In-Place Construction: Provide anchorage devices and fasteners where necessary for securing detention gun lockers to in-place construction. Include threaded fasteners for [**concrete**][**and**][**masonry**] inserts and other connectors.

B. Cutting, Fitting, and Placement: Obtain manufacturer's written approval for cutting, drilling, and fitting required for installing detention gun lockers. Set detention gun lockers accurately in location, alignment, and elevation; with edges and surfaces level, plumb, true, and free of rack; and measured from established lines and levels.

C. Provide temporary bracing or anchors in formwork for items that are to be built into [concrete][masonry] or similar construction.

D. Fit exposed connections accurately together to form hairline joints. Weld connections that are not to be left as exposed joints but cannot be shop welded because of shipping size limitations.

E. Adjust doors and latches of detention gun lockers to operate easily without binding. Verify that integral locking devices operate properly.

F. Assemble detention gun lockers requiring field assembly with security fasteners with no exposed fasteners on exposed faces and frames.

3.3 FIELD QUALITY CONTROL

A. Inspect installed products to verify compliance with requirements. Prepare inspection reports and indicate compliance with and deviations from the Contract Documents.

B. Remove and replace detention work if inspections indicate that work does not comply with specified requirements. Remove malfunctioning units; replace with new units.

C. Perform additional inspections to determine compliance of replaced or additional work. Prepare inspection reports.

D. Prepare field quality-control certification[endorsed by Detention Specialist,] that states installed products and their installation comply with requirements in the Contract Documents.

END OF SECTION 11 97 26 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 11 97 26 00A - DETENTION FURNITURE

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Detention bunks.
2. Detention mattresses.
3. Detention desks.
4. Detention tables.
5. Detention seating.

B. Related Requirements:

1. Section 102813.63 "Detention Toilet Accessories" for detention toilet and bath accessories.
2. Section 111916 "Detention Gun Lockers" for detention gun lockers.
3. Section 119814 "Detention Door Hardware" for security key cabinets.

1.2 COORDINATION

A. Detention Specialist: Coordinate with Section 013513.16 "Special Project Procedures for Detention Facilities" for requirements of this Section that are to be performed by a Detention Specialist or other entity.

B. Coordinate installation of anchorages for detention furniture. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors that are to be embedded in adjacent construction. Deliver such items to Project site in time for installation.

C. Coordinate size and location of recesses in wall construction to receive detention furniture.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for detention furniture.

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
2. Product Data: For sealants, indicating VOC content.

3. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings: For detention furniture.

1. Include plans, elevations, sections, and attachment details.
2. Indicate locations, dimensions, and profiles of wall and floor reinforcements.
3. Indicate locations and installation details of built-in anchors.
4. Show elevations of detention furniture and indicate dimensions of furniture, preparations for receiving anchors, and locations of anchorage.
5. Show details of attachment of detention furniture to built-in anchors.

D. Samples for Initial Selection: For detention furniture with factory-applied color finishes.

E. Samples for Verification: For each type of detention furniture indicated.

1. Furniture: Full-size units. Approved Samples may become part of the completed Work.
2. Detention Mattresses: Not less than **6 inches (152 mm)** square by full depth, including core and cover fabric.

1.5 INFORMATIONAL SUBMITTALS

A. Welding certificates.

B. Examination reports, documenting inspections of substrates, areas, and conditions.

C. Anchor inspection reports, documenting inspections of built-in and cast-in anchors.

D. Field quality-control reports, documenting inspections of installed products.

1. Field quality-control certification, signed by Contractor[**and Detention Specialist**].

1.6 CLOSEOUT SUBMITTALS

A. Maintenance Data: For detention mattresses to include in maintenance manuals.

1.7 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Security Fasteners: Furnish not less than one box for every 50 boxes or fraction thereof, of each type and size of security fastener installed.
2. Tools: Provide [**two**] sets of tools for installing and removing security fasteners.

1.8 QUALITY ASSURANCE

A. Welding Qualifications: Qualify procedures and personnel in accordance with the following:

1. AWS D1.1/D1.1M, "Structural Welding Code - Steel."

2. AWS D1.3/D1.3M, "Structural Welding Code - Sheet Steel."
3. AWS D1.6/D1.6M, "Structural Welding Code - Stainless Steel."

B. Mockups: Build mockups to set quality standards for fabrication and installation.

1. Build mockup of typical detention cell with furniture as shown on Drawings.
2. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Detention Mattresses: Deliver wrapped to provide protection during transit and Project-site storage. Protect from contact with moisture.

1.10 FIELD CONDITIONS

A. Field Measurements: Verify openings for recessed detention furniture by field measurements before fabrication.

PART 2 - PRODUCTS

2.1 DETENTION BUNKS

A. Freestanding Single Bunks:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Jail Products L.L.C.**]
b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
c. [**Detention Device Systems (DDS); DDS Group**]
d. [**Maximum Security Products Corp**]
e. [**Norix Group, Inc.**]
f. [**PSI LLC**]
g. [**Willo Products Company, Inc.**]

2. Bunk Pan: Formed from [0.134-inch (3.42-mm)][0.105-inch (2.66-mm)] nominal-thickness steel sheet[perforated with at least six holes].

a. Size: Minimum **27 inches (689 mm)** wide by **76 inches (1930 mm)** long with bunk pan **14 inches (356 mm)** above floor.
b. Edges: Turn up edges of [**back and sides and turn down edge of front**][**back, sides, and front**], with minimum **2-inch (51-mm)** flanges.

3. Drawer: Minimum **21 inches (533 mm)** wide by **24 inches (610 mm)** deep by **5 inches (127 mm)** high, with [**full-width integral pull formed from steel sheet**][**solid-steel bar pull**]; formed from **0.134-inch (3.42-mm)** nominal-thickness steel sheet.
4. Legs and Frames: Formed from **2-by-2-by-3/16-inch (51-by-51-by-4.8-mm)** steel angle welded at connections to each other and to bunk pan; provide four legs for each bunk.

5. Mounting Plates: Formed from **1/4-inch- (6-mm-)** thick, steel plate punched with one hole for floor anchorage; provide one mounting plate for each leg.

B. Freestanding Double Bunks:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**American Jail Products L.L.C.**]
   b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
   c. [**Detention Device Systems (DDS); DDS Group**]
   d. [**Maximum Security Products Corp**]
   e. [**Norix Group, Inc.**]
   f. [**PSI LLC**]
   g. [**Sweeper Metal Fabricators Corp**]
   h. [**Willo Products Company, Inc.**]

2. Bunk Pan: Formed from [0.134-inch (3.42-mm)][0.105-inch (2.66-mm)] nominal-thickness steel sheet[each pan perforated with at least six holes].

   a. Size: Minimum **27 inches (689 mm)** wide by **76 inches (1930 mm)** long with lower bunk pan **14 inches (356 mm)** above floor and upper bunk pan at least **49 inches (1245 mm)** above floor.
   b. Upper Bunk Edges: Turn up edges of back and sides and turn down edge of front, with minimum **2-inch (51-mm)** flanges.
   c. Lower Bunk Edges: Turn up edges of [**back and sides and turn down edge of front**][**back, sides, and front**], with minimum **2-inch (51-mm)** flanges.

3. Drawers: Two; minimum **21 inches (533 mm)** wide by **24 inches (610 mm)** deep by **5 inches (127 mm)** high, with [**full-width integral pull formed from steel sheet**][**solid-steel bar pull**]; formed from **0.134-inch (3.42-mm)** nominal-thickness steel sheet.
4. Legs and Frames: Formed from **2-by-2-by-3/16-inch (51-by-51-by-4.8-mm)** steel angle welded at connections to each other and to bunk pan; provide four legs for each bunk.
5. Mounting Plates: Formed from **1/4-inch- (6-mm-)** thick, steel plate punched with one hole for floor anchorage; provide one mounting plate for each leg.
6. Assembly: [**Factory assembled**][**Knocked down for field assembly**].

C. Wall-Mounted Bunks:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**American Jail Products L.L.C.**]
   b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
   c. [**Detention Device Systems (DDS); DDS Group**]
   d. [**Maximum Security Products Corp**]
   e. [**Norix Group, Inc.**]
   f. [**PSI LLC**]
   g. [**Sweeper Metal Fabricators Corp**]
   h. [**Willo Products Company, Inc.**]

2. Bunk Pan: Formed from [0.134-inch (3.42-mm)][0.105-inch (2.66-mm)] nominal-thickness steel sheet[perforated with at least six holes].

   a. Size: Minimum **27 inches (689 mm)** wide by **76 inches (1930 mm)** long with bunk pan **2 inches (51 mm)** from wall.
   b. Edges: Turn up edges of [**back and sides and turn down edge of front**][**back, sides, and front**], with minimum **2-inch (51-mm)** flanges.

3. Drawer: Minimum **21 inches (533 mm)** wide by **24 inches (610 mm)** deep by **5 inches (127 mm)** high, with [**full-width integral pull formed from steel sheet**][**solid-steel bar pull**]; formed from **0.134-inch (3.42-mm)** nominal-thickness steel sheet.
4. Combination End Panel/Mounting Plate: Formed from **3/16-inch- (0.048-mm-)** thick steel sheet welded at connections to bunk pan, with **2-inch (51-mm)** flange for wall mounting; provide two end panel/mounting plates for each bunk.

D. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Cold-Rolled Steel Sheet: ASTM A1008/A1008M, CS (Commercial Steel), Type B; suitable for exposed applications.
3. Hot-Rolled Steel Sheet: ASTM A1011/A1011M, CS (Commercial Steel), Type B; free of scale, pitting, or surface defects; pickled and oiled.

E. Finishes:

1. Steel Factory Prime Finish: Clean, pretreat, and apply manufacturer's standard primer.
2. Steel Baked-Enamel or Powder-Coat Finish: Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat to a minimum dry film thickness of **2 mils (0.05 mm)**.

   a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.2 DETENTION MATTRESSES

A. Detention Mattresses: Comply with 16 CFR 1633 and California Technical Bulletin 121 as determined by testing identical products by a testing and inspecting agency acceptable to authorities having jurisdiction. Identify materials with appropriate markings of applicable testing and inspecting agency.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
   b. [**Chestnut Ridge Foam, Inc**]
   c. [**Derby Industries**]
   d. [**Norix Group, Inc.**]
   e. [**UNICOR, Federal Prison Industries, Inc. (FPI)**]

B. Core: [**Fire-resistive solid foam**][**Fire-resistive densified polyester**][**Cotton, with 10 percent boric acid treatment, tufted to nylon netting to retain shape**].

C. Cover Fabric: Vinyl bonded to nylon scrim; with a minimum total weight of 10 oz./sq. yd. (339 g/sq. m).

Fabricate cover using [all sealed-seam construction with radio-frequency welded inverted seams][four-corner box construction with seams facing inside of detention mattress except end closing seam located at foot of mattress; sew with nylon thread in a double-lock stitch][with integral pillow].

1. Color: [**Clear**][**Manufacturer's standard**].

D. Thickness: [**4 inches (102 mm)**][**6 inches (152 mm)**].

2.3 DETENTION DESKS

A. Single-Seat, Floor-Mounted Desks:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**American Jail Products L.L.C.**]
   b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
   c. [**Maximum Security Products Corp**]
   d. [**PSI LLC**]
   e. [**Sweeper Metal Fabricators Corp**]
   f. [**UNICOR, Federal Prison Industries, Inc. (FPI)**]
   g. [**Willo Products Company, Inc.**]

2. Desk Top: Formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.105-inch (2.66-mm) nominal-thickness steel**][**0.141-inch- (3.57-mm-) thick, stainless steel**][**0.062-inch- (1.59-mm-) thick, stainless steel**] sheet, with minimum **1-1/2-inch (38-mm)** flanged edges.

   a. Size: Minimum **36 inches (914 mm)** wide by **15-1/2 inches (381 mm)** deep.

3. Pedestal: Provide two storage shelves with sides and shelves formed from **0.134-inch (3.42-mm)** nominal-thickness steel.
4. Legs: Formed from **1-1/2-inch-square by 3/16-inch- (38-mm-square by 4.8-mm-)** thick steel tubing welded to desk top and mounting plate for an overall desk height of not less than **30 inches (762 mm)**.
5. Seat: **12-inch (305-mm)** diameter, formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.075-inch (1.90-mm) nominal-thickness steel**][**0.141-inch- (3.57-mm-) thick, stainless steel**][**0.062-inch- (1.59-mm-) thick, stainless steel**] sheet; reinforced with **0.134-inch (3.42-mm)** nominal-thickness steel sheet, with minimum **1-1/2-inch (38-mm)** flanged edges.
6. Swivel Seat Support: Formed from **1-by-2-by-0.075-inch (25-by-51-by-1.90-mm)** nominal-thickness steel tubing, **2-inch-OD-by-0.075-inch (51-mm-OD-by-1.90-mm)** nominal-thickness steel tubing, or **3/8-inch- (9.5-mm-)** thick, steel plate bar; with **1/2-inch (12.7-mm)** pivot pin welded to legs.
7. Towel Bar: Formed from **1/4-by-1-1/2-inch (6-by-38-mm)** [**steel**][**stainless steel**] plate, mounted on one side of desk.
8. Mounting Plates: Formed from **1/4-inch- (6-mm-)** thick, steel plate punched with one hole for floor anchorage; provide one mounting plate for each leg.

B. Wall-Mounted Desk and Seat:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**American Jail Products L.L.C.**]
b. [**Maximum Security Products Corp**]
c. [**Norix Group, Inc.**]
d. [**Willo Products Company, Inc.**]

2. Desk: Formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.141-inch- (3.57-mm-) thick, stainless steel**] sheet, with minimum **1-1/2-inch (38-mm)** flanged edges.

a. Size: Minimum [**12 inches (305 mm) wide by 18 inches (457 mm) deep**][**18 inches (457 mm) wide by 18 inches (457 mm) deep**][**24 inches (610 mm) wide by 18 inches (457 mm) deep**][**30 inches (762 mm) wide by 20 inches (508 mm) deep**].

3. Seat: Minimum **12 inches (305 mm)** wide by [**16 inches (406 mm)**][**18 inches (457 mm)**] deep; formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.141-inch- (3.57-mm-) thick, stainless steel**] sheet, with minimum **1-1/2-inch (38-mm)** flanged edges.

C. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Cold-Rolled Steel Sheet: ASTM A1008/A1008M, CS (Commercial Steel), Type B; suitable for exposed applications.
3. Hot-Rolled Steel Sheet: ASTM A1011/A1011M, CS (Commercial Steel), Type B; free of scale, pitting, or surface defects; pickled and oiled.
4. Stainless Steel Sheet, Strip, Plate, and Flat Bars: ASTM A666 or ASTM A240/A240M, austenitic stainless steel, Type 304.
5. Steel Tubing: ASTM A513/A513M, Type B unless otherwise indicated; thickness indicated or required by structural loads.

D. Finishes:

1. Steel Factory Prime Finish: Clean, pretreat, and apply manufacturer's standard primer.
2. Steel Baked-Enamel or Powder-Coat Finish: Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat to a minimum dry film thickness of **2 mils (0.05 mm)**.

a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

3. Stainless Steel Finish:

a. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.
b. Polished Finish: Grind and polish surfaces to produce uniform finish, free of cross scratches.

1) Run grain of directional finishes with long dimension of each piece.
2) When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.
3) Directional Satin Finish: [**No. 3**][**No. 4**].

2.4 DETENTION TABLES

A. Pedestal-Style Table:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Jail Products L.L.C.**]
    b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
    c. [**Detention Device Systems (DDS); DDS Group**]
    d. [**Maximum Security Products Corp**]
    e. [**PSI LLC**]
    f. [**Sweeper Metal Fabricators Corp**]
    g. [**Willo Products Company, Inc.**]

2. Tabletop: Formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.105-inch (2.66-mm) nominal-thickness steel**][**0.109-inch- (2.78-mm-) thick, stainless steel**][**0.078-inch- (1.98-mm-) thick, stainless steel**][**0.062-inch- (1.59-mm-) thick, stainless steel**] sheet; reinforced with steel shapes or steel plate, with minimum **1-1/2-inch (38-mm)** flanged edges.

    a. Size: Minimum [**30 inches (762 mm)**][**40 inches (1016 mm)**] wide by length required for capacity by [**30 inches (762 mm)**][**35 inches (889 mm)**] high.
    b. Game Top: Engrave, or otherwise integrally incorporate, checkerboard into tabletop.

3. Seats: **12-inch (305-mm)** diameter, formed from [**0.105-inch (2.66-mm) nominal-thickness steel**][**0.075-inch (1.90-mm) nominal-thickness steel**][**0.078-inch- (1.98-mm-) thick, stainless steel**][**0.062-inch- (1.59-mm-) thick, stainless steel**] sheet; reinforced with **0.134-inch (3.42-mm)** nominal-thickness steel plate, with minimum **1-1/2-inch (38-mm)** flanged edges.
4. Pedestal Supports: Formed from [**3-inch-square by 3/16-inch- (76-mm-square by 4.8-mm-)**][**4-inch-square by 0.134-inch- (102-mm-square by 3.42-mm-)**] thick, steel tubing welded to top and base plate.[**Provide two pedestals for tables with capacity of more than four persons.**]
5. Seat Framing: Formed from [**3-inch-square by 0.134-inch- (76-mm-square by 3.42-mm-)**][**3-by-2-by-3/16-inch- (76-by-51-by-4.8-mm-)**] thick, steel tubing welded to pedestal supports.
6. Base Plate: Minimum **16-inch- (406-mm-)** square, **1/4-inch- (6-mm-)** thick, steel plate punched with four holes for floor anchorage.
7. Capacity: [**Four persons**][**Six persons**][**Eight persons**][**As indicated on Drawings**].

B. Bench-Style Table:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Jail Products L.L.C.**]
    b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
    c. [**Maximum Security Products Corp**]
    d. [**Norix Group, Inc.**]
    e. [**PSI LLC**]
    f. [**Sweeper Metal Fabricators Corp**]
    g. [**Willo Products Company, Inc.**]

2. Tabletop: Formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.105-inch (2.66-mm) nominal-thickness steel**][**0.109-inch- (2.78-mm-) thick, stainless steel**] sheet; reinforced with steel channel frame or steel plate, with minimum **1-1/2-inch (38-mm)** flanged edges.

    a. Size: Minimum **24 inches (610 mm)** wide by length required for capacity by [**30 inches**

(762 mm)][35 inches (889 mm)] high.

3. Benches: 12 inches (305 mm) deep by length of tabletop, formed from [0.134-inch (3.42-mm) nominal-thickness steel][0.105-inch (2.66-mm) nominal-thickness steel][0.109-inch- (2.78-mm-) thick, stainless steel][0.062-inch- (1.59-mm-) thick, stainless steel] sheet, with minimum 1-1/2-inch (38-mm) flanged edges.
4. Vertical Supports: Formed from 8-inch (203-mm) hot-rolled steel channels or 0.164-inch- (4.18-mm-) thick, formed-steel channels; braced and welded, with steel base plates punched for floor anchorage.[**Provide three supports for tables with capacity of more than four persons.**]
5. Bench Supports: Formed from 2-by-2-1/2-by-1/4-inch- (51-by-64-by-6-mm-) thick, steel angle or 2-inch-square by 1/4-inch- (51-mm-square by 6-mm-) thick, steel tubing; welded to vertical supports.
6. Floor Anchor: Formed from steel angle punched for floor anchorage.
7. Capacity: [**Four persons**][**Six persons**][**Eight persons**][**As indicated on Drawings**].

C. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Cold-Rolled Steel Sheet: ASTM A1008/A1008M, CS (Commercial Steel), Type B; suitable for exposed applications.
3. Hot-Rolled Steel Sheet: ASTM A1011/A1011M, CS (Commercial Steel), Type B; free of scale, pitting, or surface defects; pickled and oiled.
4. Stainless Steel Sheet, Strip, Plate, and Flat Bars: ASTM A666 or ASTM A240/A240M, austenitic stainless steel, Type 304.
5. Steel Tubing: ASTM A513/A513M, Type B unless otherwise indicated; thickness indicated or required by structural loads.

D. Finishes:

1. Steel Factory Prime Finish: Clean, pretreat, and apply manufacturer's standard primer.
2. Steel Baked-Enamel or Powder-Coat Finish: Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat to a minimum dry film thickness of 2 mils (0.05 mm).

    a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

3. Stainless Steel Finish:

    a. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.
    b. Polished Finish: Grind and polish surfaces to produce uniform finish, free of cross scratches.

        1) Run grain of directional finishes with long dimension of each piece.
        2) When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.
        3) Directional Satin Finish: [**No. 3**][**No 4**].

2.5 DETENTION SEATING

A. Floor-Mounted Stool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**American Jail Products L.L.C.**]
b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
c. [**Detention Device Systems (DDS); DDS Group**]
d. [**Maximum Security Products Corp**]
e. [**Norix Group, Inc.**]
f. [**PSI LLC**]
g. [**UNICOR, Federal Prison Industries, Inc. (FPI)**]
h. [**Willo Products Company, Inc.**]

2. Seats: Minimum **12-inch (305-mm)** diameter, formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.075-inch (1.90-mm) nominal-thickness steel**][**0.125-inch- (3.18-mm-) thick, stainless steel**][**0.062-inch- (1.59-mm-) thick, stainless steel**] sheet; reinforced with **0.134-inch- (3.42-mm-)** thick steel sheet cut to interior dimension of seat, with minimum **1-1/2-inch (38-mm)** flanged edges.
3. Seat Support: Formed from steel pipe or **2-inch-OD-by-0.075-inch- (51-mm-OD-by-1.90-mm-)** thick, steel tubing welded to seat reinforcement and base plate for an overall stool height of not less than **18 inches (457 mm)**.
4. Base Plate: Minimum **6-by-1/4-inch- (152-by-6-mm-)** thick, [**square**][**round**][**steel**] punched with four holes for floor anchorage.

B. Wall-Mounted Stool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Jail Products L.L.C.**]
b. [**Maximum Security Products Corp**]
c. [**PSI LLC**]
d. [**Willo Products Company, Inc.**]

2. Seat: Minimum **12-inch (305-mm)** diameter, formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.075-inch (1.90-mm) nominal-thickness steel**][**0.125-inch- (3.18-mm-) thick, stainless steel**][**0.078-inch- (1.98-mm-) thick, stainless steel**] sheet; reinforced with **0.134-inch- (3.42-mm-)** thick steel sheet cut to interior dimension of seat, with minimum **1-1/2-inch (38-mm)** flanged edges.
3. Seat Support: Formed from **1-by-2-by-0.075-inch- (25-by-51-by-1.90-mm-)** thick, steel tubing; **2-inch-OD-by-0.075-inch- (51-mm-OD-by-1.90-mm-)** thick, steel tubing; or **3/8-inch- (9.5-mm-)** thick, steel plate bar; welded to seat reinforcement and wall bracket.
4. Swivel Wall Bracket: Minimum **1/2-inch (12.7-mm)** pivot pin, with **3/8-inch- (9.5-mm-)** thick, steel plate [**for welding to embedded steel plate**][**for welding to steel wall**][**punched with four holes for wall anchorage**].

C. Floor-Mounted Bench:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Jail Products L.L.C.**]

b. [**BarkerBuilt, Division of Bob Barker Company, Inc**]
c. [**Maximum Security Products Corp**]
d. [**Norix Group, Inc.**]
e. [**PSI LLC**]
f. [**Willo Products Company, Inc.**]

2. Bench Top: Formed from [**0.134-inch (3.42-mm) nominal-thickness steel**][**0.105-inch (2.66-mm) nominal-thickness steel**][**0.141-inch- (3.57-mm-) thick, stainless steel**][**0.109-inch- (2.78-mm-) thick, stainless steel**] sheet, with minimum **1-1/2-inch (38-mm)** flanged edges.

   a. Size: Minimum **12 inches (305 mm)** deep by [**48 inches (1219 mm)**][**60 inches (1524 mm)**][**72 inches (1829 mm)**][**96 inches (2438 mm)**] long.

3. Supports: Formed from **0.164-inch- (4.18-mm-)** thick, formed-steel channels or **2-1/2-inch-OD-by-0.0677-inch- (64-mm-OD-by-1.7-mm-)** thick, steel tubing; welded to bench and base plate for an overall bench height of not less than **18 inches (457 mm)**.[**Provide three supports for benches with length of more than 72 inches (1829 mm).**]
4. Handcuff Ring: Formed from **3/8-inch- (9.5-mm-)** diameter, stainless steel rod;welded to [**front**][**back**][**both sides**] of each support.
5. Base Plates: Minimum **8-inch-square by 1/4-inch- (203-mm-square by 6-mm-)** thick, steel plate punched with four holes for floor anchorage.
6. Capacity: [**Four persons**][**Six persons**][**Eight persons**][**As indicated on Drawings**].

D. Materials:

1. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
2. Cold-Rolled Steel Sheet: ASTM A1008/A1008M, CS (Commercial Steel), Type B; suitable for exposed applications.
3. Hot-Rolled Steel Sheet: ASTM A1011/A1011M, CS (Commercial Steel), Type B; free of scale, pitting, or surface defects; pickled and oiled.
4. Stainless Steel Sheet, Strip, Plate, and Flat Bars: ASTM A666 or ASTM A240/A240M, austenitic stainless steel, Type 304.
5. Steel Tubing: ASTM A513/A513M, Type B unless otherwise indicated; thickness indicated or required by structural loads.
6. Steel Pipe: ASTM A53/A53M, Standard Weight (Schedule 40) unless another weight is indicated or required by structural loads.

E. Finishes:

1. Steel Factory Prime Finish: Clean, pretreat, and apply manufacturer's standard primer.
2. Steel Baked-Enamel or Powder-Coat Finish: Clean, pretreat, and apply manufacturer's standard two-coat, baked-on finish consisting of prime coat and thermosetting topcoat to a minimum dry film thickness of **2 mils (0.05 mm)**.

   a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

3. Stainless Steel Finish:

   a. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.
   b. Polished Finish: Grind and polish surfaces to produce uniform finish, free of cross scratches.

      1) Run grain of directional finishes with long dimension of each piece.
      2) When polishing is completed, passivate and rinse surfaces. Remove embedded

foreign matter and leave surfaces chemically clean.

3) Directional Satin Finish: [**No. 3**][**No 4**].

2.6 FABRICATION

A. Shop Assembly: Preassemble items in shop to greatest extent possible to minimize field splicing and assembly. Disassemble units only as necessary for shipping and handling limitations. Use connections that maintain structural value of joined pieces. Clearly mark units for reassembly and coordinated installation.

B. Coordinate dimensions and attachment methods of detention furniture with those of adjoining construction to produce integrated assemblies with closely fitting joints and with edges and surfaces aligned unless otherwise indicated.

C. Shear and punch metals cleanly and accurately. Remove burrs.

D. Form and grind edges and corners to be free of sharp edges or rough areas.

1. Fabricate detention furniture with no more than **1/32-inch (0.8-mm)** gap between component materials. Weld edges that cannot be crimped to meet tolerance so as to provide a seamless joint with no place for concealment of contraband.

E. Form metal in maximum lengths to minimize joints. Form bent-metal corners to smallest radius possible without causing grain separation or otherwise impairing the Work.

F. Weld corners and seams continuously to comply with referenced AWS standard and the following:

1. Use materials and methods that minimize distortion and develop strength and corrosion resistance of base metals.
2. Obtain fusion without undercut or overlap.
3. Remove welding flux immediately.
4. Finish exposed welds and surfaces smooth and blended at exposed connections so that no roughness shows after finishing and contour of welded surface matches that of adjacent surface.
5. Weld before finishing components to greatest extent possible. Remove weld spatter and welding oxides from exposed surfaces by descaling or grinding.

G. Provide for anchorage of type indicated; coordinate with supporting structure. Fabricate and space anchoring devices to secure detention furniture rigidly in place and to support expected loads. Build in straps, plates, and brackets as needed to support and anchor fabricated items to adjoining construction. Reinforce formed-metal units as needed to attach and support other construction.

H. Cut, reinforce, drill, and tap detention furniture as indicated to receive hardware, security fasteners, and similar items.

I. Form exposed work true to line and level with accurate angles, surfaces, and straight sharp edges.

J. Form exposed connections with hairline joints, flush and smooth using concealed fasteners where possible. Use exposed security fasteners of type indicated or, if not indicated, flat-head (countersunk) security fasteners. Locate joints where least conspicuous.

K. Attach [**drawer slides**][**shelves**] to furniture [**by welding**][**with security fasteners**].

2.7 SECURITY FASTENERS

A. Security Fasteners: Operable only by tools produced by fastener manufacturer or other licensed fabricator for use on specific type of fastener. Drive-system type, head style, material, and protective coating as required for assembly, installation, and strength, and as follows:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Acument Global Technologies, Inc.; Acument Intellectual Properties, LLC**]
   b. [**Bryce Fastener Mfg., Inc.**]
   c. [**Safety Socket LLC**]
   d. [**Tamper-Pruf Screws**]

2. Drive-System Type: [**Pinned Torx-Plus**][**Pinned Torx**].
3. Fastener Strength: **120,000 psi (827 MPa)**.
4. Socket Button Head Fasteners:

   a. Heat-treated alloy steel, ASTM F835.
   b. Stainless steel, **ASTM F879 (ASTM F879M)**, Group 1 CW.

5. Socket Flat Countersunk Head Fasteners:

   a. Heat-treated alloy steel, ASTM F835.
   b. Stainless steel, **ASTM F879 (ASTM F879M)**, Group 1 CW.

6. Socket Head Cap Fasteners:

   a. Heat-treated alloy steel, ASTM A574.
   b. Stainless steel, **ASTM F837 (ASTM F837M)**, Group 1 CW.

7. Protective Coatings for Heat-Treated Alloy Steel:

   a. Zinc and clear trivalent chromium where indicated.
   b. Zinc phosphate with oil, ASTM F1137, Grade I, or black oxide unless otherwise indicated.

2.8 SECURITY SEALANTS

A. Polyurethane Security Sealants: Manufacturer's standard, nonsag, tamper-resistant sealant for joints with low movement.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Master Builders Solutions**]
   b. [**Pecora Corporation**]

2. Sealant shall have a VOC content of 250 g/L or less.
3. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical

Emissions from Indoor Sources Using Environmental Chambers."

4. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
6. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
7. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde shall not exceed 9 mcg/cu. m.

B. Epoxy Security Sealants: Manufacturer's standard, non-sag, tamper-resistant sealant for joints with no movement.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
    b. [**Master Builders Solutions**]
    c. [**Pecora Corporation**]

2. Sealant shall have a VOC content of 250 g/L or less.
3. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
4. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
6. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
7. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde shall not exceed 9 mcg/cu. m.

2.9 ACCESSORIES

A. Concealed Bolts: ASTM A307, Grade A unless otherwise indicated.

B. Cast-in-Place Anchors in Concrete: Fabricated from corrosion-resistant materials capable of sustaining,

without failure, a load equal to [**four**] times the load imposed, as determined by testing per ASTM E488/E488M, conducted by a qualified testing agency; of type indicated below:

1. Threaded or wedge type; galvanized ferrous castings, either ASTM A47/A47M malleable iron or ASTM A27/A27M cast steel. Provide bolts, washers, and shims as needed; hot-dip galvanized per ASTM A153/A153M or ASTM F2329/F2329M.

C. Embedded Plate Anchors: Fabricated from mild steel shapes and plates, minimum **3/16 inch (4.8 mm)** thick; with minimum **1/2-inch- (12.7-mm-)** diameter, headed studs welded to back of plate.

D. Proprietary Built-in Masonry Anchors: Fabricated from [0.134-inch (3.42-mm) nominal-thickness steel sheet][1/4-inch (6-mm) nominal-thickness steel plate][1/2-inch (12.7-mm) nominal-thickness steel plate] into [6-inch- (152-mm-)][8-inch- (203-mm-)] deep blocks matching size of concrete masonry units[with weld nuts attached on inside to receive field-bolted attachments].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**M/BED Block Systems, LLC.**]
   b. [**Peterson Detention Inc. (PDI)**]

2. Finish: [**Factory primed for field painting for anchors with field-welded attachments**][**Polyester powder coat for anchors with bolted attachments**][**Epoxy paint for anchors with bolted attachments**].

E. Welding Rods and Bare Electrodes: Select in accordance with AWS specifications for metal alloy welded.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of detention furniture.

B. Examine roughing-in for embedded and built-in anchors to verify actual locations of detention furniture before detention furniture installation.

C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of detention furniture.

D. Inspect built-in and cast-in anchor installations, before installing detention furniture, to verify that anchor installations comply with requirements. Prepare inspection reports.

1. Remove and replace anchors where inspections indicate that they do not comply with specified requirements. Reinspect after repairs or replacements are made.
2. Perform additional inspections to determine compliance of replaced or additional work. Prepare inspection reports.

E. Verify locations of detention furniture with those indicated on Shop Drawings.

F. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Fastening to In-Place Construction: Provide anchorage devices and fasteners where necessary for securing detention furniture to in-place construction. Include threaded fasteners for [**concrete**][**and**][**masonry**] inserts, security fasteners, and other connectors.

B. Cutting, Fitting, and Placement: Obtain manufacturer's written approval for cutting, drilling, and fitting required for installing detention furniture. Set detention furniture accurately in location, alignment, and elevation; with edges and surfaces level, plumb, true, and free of rack; and measured from established lines and levels.

C. Provide temporary bracing or anchors in formwork for items that are to be built into [concrete][masonry] or similar construction.

D. Fit exposed connections accurately together to form hairline joints. Weld connections that are not to be left as exposed joints but cannot be shop welded because of shipping size limitations.

E. Field Welding: Comply with the following requirements:

1. Use materials and methods that minimize distortion and develop strength and corrosion resistance of base metals.
2. Obtain fusion without undercut or overlap.
3. Remove welding flux immediately.
4. Finish exposed welds and surfaces smooth and blended at exposed connections so that no roughness shows after finishing and contour of welded surface matches that of adjacent surface.
5. Fillet Welds:

    a. Minimum size of **1/8 inch by 1-1/2 inches (3 mm by 38 mm)** long, spaced not greater than **12 inches (305 mm)** o.c. Fill spaces between welds with [**polyurethane**][**epoxy**] security sealant where weld is exposed.
    b. Continuous.

F. Assemble detention furniture requiring field assembly with security fasteners with no exposed fasteners on exposed faces and frames.

G. Anchor furniture [**with security fasteners**][**by welding**][**as indicated on Drawings**] to floors and walls at intervals required by expected loads, but not more than **12 inches (305 mm)** o.c.

1. Install anchors through backup reinforcing plates where necessary to avoid metal distortion.
2. Use security fasteners with head styles appropriate for installation requirements, strength, and finish of adjacent materials, except that a maximum of two different sets of tools shall be required to operate security fasteners for Project.[**Provide stainless steel security fasteners in painted materials.**]
3. Weld nuts onto cast-in-place anchors after installation so as to be nonremovable.

H. Apply [**polyurethane**][**epoxy**] security sealant at all exposed gaps between detention furniture and adjacent construction greater than **1/16 inch (1.6 mm)**.

I. Install one detention mattress for each detention bunk.

3.3 FIELD QUALITY CONTROL

A. Inspect installed products to verify compliance with requirements. Prepare inspection reports and indicate compliance with and deviations from the Contract Documents.

B. Remove and replace detention work if inspections indicate that work does not comply with specified requirements. Remove malfunctioning units; replace with new units.

C. Perform additional inspections to determine compliance of replaced or additional work. Prepare inspection reports.

D. Prepare field quality-control certification[**endorsed by Detention Specialist**] that states installed products and their installation comply with requirements in the Contract Documents.

3.4 CLEANING AND PROTECTION

A. Touchup Painting:

1. Immediately after erection, clean bolted connections and abraded areas of shop paint, and paint exposed areas with same material used for shop painting to comply with SSPC-PA 1 for touching up shop-painted surfaces.
2. Cleaning and touchup painting of bolted connections and abraded areas of shop paint are specified in Section 099123 "Interior Painting."

END OF SECTION 11 97 26 00A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 13 01 11 11 - EXTERIOR PAINTING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes: Surface preparation of exterior substrates and application of the following:

1. Primers.
2. Water-based finish coatings.
3. Solvent-based finish coatings.
4. Floor sealers and paints.

B. Related Requirements:

1. [**Section 051200 "Structural Steel Framing"**] [**Section 051213 "Architecturally Exposed Structural Steel Framing"**] for shop priming structural steel substrates.
2. Section 055000 "Metal Fabrications" for shop priming metal fabrications.
3. Section 055113 "Metal Pan Stairs" for shop priming metal pan stairs.
4. Section 055116 "Metal Floor Plate Stairs" for shop priming metal floor plate stairs.
5. Section 055119 "Metal Grating Stairs" for shop priming metal grating stairs.
6. Section 055213 "Pipe and Tube Railings" for shop [**priming**] [**painting**] pipe and tube railings.
7. [**Section 055313 "Bar Gratings"**] [**Section 055316 "Plank Gratings"**] [**Section 055319 "Expanded Metal Gratings"**] for shop priming metal gratings.
8. Section 099123 "Interior Painting."
9. Section 099300 "Staining and Transparent Finishing" for surface preparation and application of wood stains and transparent finishes on exterior wood substrates.
10. Section 099600 "High-Performance Coatings" for tile-like coatings.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include preparation requirements and application instructions.
2. Indicate VOC content.

B. Samples: For each type of topcoat product.

C. Samples for Initial Selection: For each type of topcoat product.

D. Samples for Verification: For each type of paint system and each color and gloss of topcoat. Submit [**actual paint drawdowns as specified below**] [**paint manufacturer's standard printed cards**] for verification Samples.

1. Submit Samples on rigid backing, 8 inches (200 mm) square.
2. Apply coats on Samples in steps to show each coat required for system.
3. Label each coat of each Sample.
4. Label each Sample for location and application area.

E. Product List: Cross-reference to paint system and locations of application areas. Use same designations indicated on Drawings and in applicable exterior painting schedule articles to cross-reference paint systems specified in this Section. Include color designations.

1.3 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match paint products applied and that are packaged with protective covering for storage and identified with labels describing contents.

1. Paint Products: [**5**] percent, but not less than [**1 gal. (3.8 L)**] of each material and color applied.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than 45 deg F (7 deg C).

1. Maintain containers in clean condition, free of foreign materials and residue.
2. Remove rags and waste from storage areas daily.

1.5 FIELD CONDITIONS

A. Apply paints only when temperature of surfaces to be painted and ambient air temperatures are between 50 and 95 deg F (10 and 35 deg C).

B. Do not apply paints in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures less than 5 deg F (3 deg C) above the dew point; or to damp or wet surfaces.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each paint product from single source from single manufacturer.

2.2 EXTERIOR PAINTS, GENERAL

A. Exterior Paints: Subject to compliance with requirements, [**provide product**] [**provide one of the products**] [**available products that may be incorporated into the Work include but are not limited to products**] listed in product types below and applicable exterior painting schedule articles for the paint category indicated.

B. Material Compatibility:

1. Materials for use within each paint system must be compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer based on testing and field experience.
2. For each coat in a paint system, provide products recommended in writing by topcoat manufacturer for use in paint system and on substrate indicated.

C. Colors: [**As selected by Architect from manufacturer's full range**] [**Match Architect's samples**] [**As indicated in a color schedule on Drawings**] , as directed by the Owner.

1. [**10**] [**20**] [**30**] percent of surface area will be painted with deep tones.

2.3 PRIMERS

A. Alkali-Resistant, Water-Based Primer: Water-based primer formulated for use on alkaline substrates.

B. Exterior Wood Preservative: Solvent-based, zinc or copper napthenate, penetrating antifungal treatment for exterior wood.

C. Exterior, Latex Wood Primer: White, waterborne-emulsion primer formulated for resistance to extractive bleeding, mold, and microbials; for hiding stains; and for use on exterior wood substrates.

D. Exterior, Alkyd/Oil Wood Primer: Solvent-based primer formulated for resistance to extractive bleeding, sag, mold, and microbials; for hiding stains; and for use on exterior wood substrates.

E. Latex Block Filler: Water-based, pigmented, high-solids, emulsion coating formulated to bridge and fill porous surfaces of CMU substrates in preparation for specified subsequent coatings.

F. Water-Based Bonding Primer: Water-based-emulsion primer formulated to promote adhesion of subsequent specified coatings.

G. Solvent-Based Bonding Primer: Solvent-based primer formulated to seal substrates and promote adhesion of specified subsequent coatings.

H. Water-Based, Rust-Inhibitive Primer: Corrosion-resistant, water-based-emulsion primer; formulated for resistance to flash rusting when applied to cleaned, ferrous metal substrates subject to mildly corrosive environments.

I. Zinc-Rich, Inorganic Primer: Corrosion-resistant, inorganic-based, zinc-rich primer formulated for use on prepared ferrous metal substrates subject to severe industrial or marine environments.

1.

J. Surface-Tolerant Metal Primer: Corrosion-resistant, solvent-based metal primer formulated for use on structural steel and metal fabrications that have been minimally prepared.

K. Quick-Drying, Alkyd Metal Primer: Corrosion-resistant, solvent-based, modified-alkyd primer; lead and chromate free; formulated for quick-drying capabilities and for use on cleaned, ferrous metal substrates.

L. Alkyd Metal Primer: Corrosion-resistant, solvent-based, alkyd primer formulated for use on prepared ferrous metal substrates subject to industrial and light marine environments.

M. Water-Based, Galvanized-Metal Primer: Corrosion-resistant, pigmented, acrylic primer; formulated for use on cleaned/etched galvanized metal substrates to prepare it for subsequent water-based coatings.

N. Epoxy, Anticorrosive Primer: Solvent-based, two-component, epoxy, anti-corrosive primer; formulated for use on ferrous and galvanized metal substrates.

O. Vinyl Wash Primer: Two-component, vinyl butyral/phosphoric acid-wash primer formulated for use over cleaned ferrous metal substrates and zinc-rich primers as a tie coat for subsequent corrosion-resistant primers or finish coatings.

P. Quick-Drying Aluminum Primer: Corrosion-resistant, solvent-based, alkyd or modified-alkyd primer formulated for quick-drying capabilities and for use on prepared aluminum substrates.

Q. Wood-Knot Sealer: White shellac or other sealer recommended in writing by manufacturer for this purpose.

2.4 WATER-BASED FINISH COATINGS

A. Exterior Latex Paint: Water-based, pigmented coating; formulated for alkali, mold, microbial, and water resistance and for use on exterior substrates.
   1. Gloss and Sheen: Manufacturer's standard [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

B. Exterior, High-Build Latex Paint: Water-based, high-build, pigmented, emulsion coating; is formulated for abrasion, mold, microbial, and wind-driven rain resistance and for use on exterior substrates.
   1. Gloss and Sheen Level: Manufacturer's standard.

C. Textured Latex Coating: Water-based, pigmented, self-priming coating that contains sand or other hard aggregate for selected texture and is formulated for use on concrete and masonry substrates.
   1. Gloss and Sheen Level: Manufacturer's standard [**flat**] [**nonflat**].
   2. Texture: [**Manufacturer's standard**] [**Fine**] [**Medium**] [**Coarse**].

D. Exterior, Water-Based, Light Industrial Coating: Corrosion-resistant, water-based, pigmented, emulsion coating formulated for resistance to water, alkalis, moderate abrasion, and mild chemical exposure and for use on exterior substrates.
   1. Gloss and Sheen Level: Manufacturer's standard [**low-sheen**] [**semigloss**] [**gloss**].

E. Exterior, Water-Based Alkyd Paint: Water-based, pigmented, low-VOC alkyd paint formulated for flash rust and water resistance and for use on exterior substrates.
   1. Gloss and Sheen Level: Manufacturer's standard [**low sheen**] [**semigloss**] [**gloss**].

F. Exterior, High-Performance Architectural Latex: Water-based, pigmented, low VOC, emulsion coating formulated for use on exterior substrates.
   1. Gloss Level: Manufacturer's standard [**low sheen**] [**semigloss**].

2.5 SOLVENT-BASED FINISH COATINGS

A. Exterior Alkyd Paint: Solvent-based, pigmented, alkyd coating formulated for mold, microbial, and water resistance and for use on exterior substrates.
   1. Gloss and Sheen Level: Manufacturer's standard [**flat**] [**semigloss**] [**gloss**].

B. Quick-Drying Alkyd Paint: Solvent-based, alkyd or modified-alkyd coating formulated for quick-drying capabilities and for use on exterior substrates.
   1. Gloss Level: Manufacturer's standard [**semigloss**] [**gloss**].

C. Aluminum Paint: Aliphatic, solvent-based coating consisting of varnish or alkyd binder combined with aluminum pigment that is formulated for use as a stain-blocking coating and sealer, is able to be recoated with conventional alkyd and latex paints, and for use on wood, metal, bituminous-coated, and prepared masonry substrates.

2.6 FLOOR SEALERS AND PAINTS

A. Concrete Stain: Penetrating semitransparent stain specifically manufactured for interior and exterior concrete horizontal and vertical surfaces.

B. Latex Floor Enamel: Water-based, pigmented coating formulated to hide stains, for alkali and incidental water resistance, and for use on concrete and primed-wood substrates subject to low to medium foot traffic.
   1. Gloss and Sheen Level: Manufacturer's standard [**low gloss**] [**gloss**].
   2. Slip-Resistant Aggregate: Manufacturer's standard.

C. Latex Deck Coating: Water-based, high-solids, acrylic-emulsion coating; formulated for use on exterior substrates subject to low to medium foot traffic.
   1. Gloss Level: Manufacturer's standard.
   2. Surface Texture: [**Smooth**] [**Slip resistant**].

D. Alkyd Floor Enamel: Solvent-based, pigmented coating; self-priming where applied to bare wood; formulated to hide stains, for durability, for microbial and abrasion resistance, and for exterior substrates subject to low to medium foot traffic.
   1. Gloss Level: Manufacturer's standard [**low gloss**] [**gloss**].
   2. Slip-Resistant Aggregate: Manufacturer's standard additive.

E. Water-Based, Concrete-Floor Sealer: Clear, water-based, acrylic-copolymer-emulsion sealer formulated for oil, gasoline, alkali, and water resistance and for use on concrete traffic substrates.

F. Solvent-Based, Concrete-Floor Sealer: Clear, acrylic, solvent-based sealer formulated for oil, gasoline, alkali, and water resistance and for use on concrete traffic substrates.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with requirements for maximum moisture content and other conditions affecting performance of the Work.

B. Maximum Moisture Content of Substrates: When measured with an electronic moisture meter as follows:

   1. Concrete: 12 percent.
   2. Cementitious Composition Board: 12 percent.
   3. Masonry (Clay and CMU): 12 percent.
   4. Wood: 15 percent.
   5. Portland Cement Plaster (Stucco): 12 percent. Verify that plaster is fully cured.

C. Verify suitability of substrates, including surface conditions and compatibility, with finishes and primers. Proceed with coating application only after unsatisfactory conditions have been corrected.

   1. Application of coating indicates acceptance of substrates and conditions.

3.2 PREPARATION

A. Comply with manufacturer's written instructions applicable to substrates and paint systems indicated.

B. Remove hardware, covers, plates, and similar items already in place that are removable and are not to be painted. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and painting.

1. After completing painting operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection.

C. Clean substrates of substances that could impair bond of paints, including dust, dirt, oil, grease, and incompatible paints and encapsulants.

1. Remove incompatible primers and reprime substrate with compatible primers or apply tie coat as required to produce paint systems specified in this Section.

D. Concrete Substrates: Remove release agents, curing compounds, efflorescence, and chalk. Do not paint surfaces if moisture content or alkalinity of surfaces to be painted exceeds that permitted in manufacturer's written instructions.

E. Masonry Substrates: Remove efflorescence and chalk. Do not paint surfaces if moisture content or alkalinity of surfaces or mortar joints exceeds that permitted in manufacturer's written instructions.

F. Steel Substrates: Remove loose rust, loose mill scale, loose shop primer, and other loose foreign matter. Clean using methods recommended in writing by paint manufacturer[**.**][**but not less than the following:**]

1. SSPC-SP 2.
2. SSPC-SP 3.
3. SSPC-SP 7/NACE No. 4.
4. SSPC-SP 11.

G. Shop-Primed Steel Substrates: Clean field welds, bolted connections, and areas where shop paint is abraded. Paint exposed areas with the same material as used for shop priming to comply with SSPC-PA 1 for touching up shop-primed substrates.

H. Galvanized-Metal Substrates: Remove grease and oil residue from galvanized metal by mechanical methods to produce clean, lightly etched surfaces that promote adhesion of subsequently applied paints.

I. Aluminum Substrates: Remove loose surface oxidation.

J. Wood Substrates:

1. Scrape and clean knots. Before applying primer, apply coat of knot sealer recommended in writing by topcoat manufacturer for exterior use in paint system indicated.
2. Sand surfaces that will be exposed to view and remove sanding dust.
3. Prime edges, ends, faces, undersides, and backsides of wood.
4. After priming, fill holes and imperfections in the finish surfaces with putty or plastic wood filler. Sand smooth when dried.

K. Canvas and Cotton Insulation Covering Substrates: Remove dust, dirt, and other foreign material that might impair bond of paints to substrates.

L. Plastic Trim Fabrication Substrates: Remove dust, dirt, and other foreign material that might impair bond of paints to substrates.

3.3 APPLICATION OF EXTERIOR PAINT PRODUCTS

A. Apply paints in accordance with manufacturer's written instructions.

1. Use applicators and techniques suited for paint and substrate indicated.
2. Paint surfaces behind movable items same as similar exposed surfaces. Before final installation, paint surfaces behind permanently fixed items with prime coat only.
3. Paint [**both sides**] [**exterior side**] and edges of exterior doors and entire exposed surface of exterior door frames.
4. Paint entire exposed surface of window frames and sashes.
5. Do not paint over labels of independent testing agencies or equipment name, identification, performance rating, or nomenclature plates.
6. Primers specified in applicable exterior painting schedule articles may be omitted on items that are factory primed or factory finished if compatible with intermediate and topcoat coatings and acceptable to intermediate and topcoat paint manufacturers.

B. Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of same material are to be applied. Tint undercoats to match color of topcoat but provide sufficient difference in shade of undercoats to distinguish each separate coat.

C. If undercoats or other conditions show through topcoat, apply additional coats until cured film has a uniform paint finish, color, and appearance.

D. Apply paints to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.

E. Painting, Fire-Suppression, Plumbing, HVAC, Electrical, Communication, and Electronic Safety and Security Work:

1. Paint the following work where exposed to view:

a. Equipment, including panelboards[**and switch gear**].
b. Uninsulated metal piping.
c. Uninsulated plastic piping.
d. Pipe hangers and supports.
e. Metal conduit.
f. Plastic conduit.
g. Tanks that do not have factory-applied final finishes.

3.4 FIELD QUALITY CONTROL

A. Dry Film Thickness Testing: the Owner may engage the services of a qualified testing and inspecting agency to inspect and test paint for dry film thickness.

1. Touch up and restore painted surfaces damaged by testing.
2. If test results show that dry film thickness of applied paint does not comply with paint manufacturer's written instructions, apply additional coats as needed to provide dry film thickness that complies with paint manufacturer's written instructions.
3. Cost of retesting is Contractor's responsibility.

3.5 CLEANING AND PROTECTION

A. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.

1. Do not clean equipment with free-draining water and prevent solvents, thinners, cleaners, and other contaminants from entering into waterways, sanitary and storm drain systems, and ground.
2. Dispose of contaminants in accordance with requirements of authorities having jurisdiction.
3. Allow empty paint cans to dry before disposal.
4. Collect waste paint by type and deliver to recycling or collection facility.

B. After completing paint application, clean spattered surfaces. Remove spattered paints by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

C. Protect work of other trades against damage from paint application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition, as directed by the Owner.

D. At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.

3.6 EXTERIOR PAINTING SCHEDULE, CONCRETE SUBSTRATES

A. Vertical (Nontraffic) Surfaces:

1. High-Build Latex System: . Dry film thickness of not less than 10 mils (0.25 mm).

   a. Prime Coat: As recommended in writing by topcoat manufacturer.
   b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
   c. Topcoat: Exterior, high-build latex paint.

2. Water-Based, Light Industrial Coating System:

   a. Prime Coat: Alkali-resistant, water-based primer.
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. High Performance Architectural Latex System:

   a. Prime Coat: [**Alkali-resistant, water-based primer**] [**As recommended in writing by topcoat manufacturer**].
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

4. High Performance Architectural Latex over Latex Aggregate System:

   a. Prime Coat: Textured coating, latex, flat.
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

B. Horizontal (Traffic) Surfaces:

1. Latex Floor Enamel System:

   a. Prime Coat: Matching topcoat.
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Latex floor enamel, [**low gloss**] [**gloss**].

2. Latex Deck Coating System:

    a. Prime Coat: As recommended in writing by topcoat manufacturer.
    b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
    c. Topcoat: Latex deck coating.

3. Alkyd Floor Enamel System:

    a. Prime Coat: Matching topcoat.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Alkyd floor enamel, [**low gloss**] [**gloss**].
    d. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

4. Solvent-Based Concrete Floor Sealer System:

    a. Prime Coat: Matching topcoat.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Solvent-based, concrete-floor sealer.

5. Water-Based Concrete Floor Sealer System:

    a. Prime Coat: Matching topcoat.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Water-based, concrete-floor sealer.

6. Latex Zone/Traffic-Marking Paint System:

    a. Traffic-marking paint, latex.

7. Alkyd Zone/Traffic-Marking Paint System:

    a. Traffic-marking paint, solvent-based.

3.7 EXTERIOR PAINTING SCHEDULE, CEMENTITIOUS SUBSTRATES

A. Cementitious Composition Board Substrates: [**Siding**] [**Trim**] [**Panels**] .

1. Latex System:

    a. Prime Coat: Matching topcoat.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex over Alkyd Primer System:

    a. Prime Coat: Alkali-resistant, water-based primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

3. Latex Aggregate System:

    a. Prime Coat: As recommended in writing by topcoat manufacturer.
    b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
    c. Topcoat: Exterior, textured coating, latex [**flat**] [**nonflat**].

4. High-Build Latex System: . Dry film thickness of not less than 10 mils (0.25 mm).

   a. Prime Coat: As recommended in writing by topcoat manufacturer.
   b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
   c. Topcoat: Exterior, high-build latex paint.

5. Water-Based, Light Industrial Coating System:

   a. Prime Coat: Alkali-resistant, water-based primer.
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

6. Alkyd System:

   a. Prime Coat: Exterior, latex wood primer.
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

7. High Performance Architectural Latex System:

   a. Prime Coat: [**Alkali-resistant, water-based primer**] [**As recommended in writing by topcoat manufacturer**].
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

B. Portland Cement Plaster (Stucco) Substrates:

1. Latex System:

   a. Prime Coat: [**Matching topcoat**] [**Alkali-resistant, water-based primer**].
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. High-Build Latex System: . Dry film thickness of not less than 10 mils (0.25 mm).

   a. Prime Coat: As recommended in writing by topcoat manufacturer.
   b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
   c. Topcoat: Exterior, high-build latex paint.

3. Water-Based, Light Industrial Coating System:

   a. Prime Coat: Alkali-resistant, water-based primer.
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

   a. Prime Coat: Alkali-resistant, water-based primer.
   b. Intermediate Coat: Matching topcoat.
   c. Topcoat: Exterior water-based alkyd enamel, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: [**Alkali-resistant, water-based primer**] [**As recommended in writing by topcoat manufacturer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

3.8 EXTERIOR PAINTING SCHEDULE, MASONRY SUBSTRATES

A. Clay Masonry Substrates:

1. Latex System:

a. Prime Coat: Matching topcoat.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex Aggregate System:

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Textured latex coating, [**flat**] [**nonflat**].

3. High-Build Latex System: . Dry film thickness of not less than 10 mils (0.25 mm).

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Exterior, high-build latex paint.

4. Water-Based, Light Industrial Coating System:

a. Prime Coat: Matching topcoat.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

5. Water-Based Alkyd System:

a. Prime Coat: Alkali-resistant, water-based primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

6. High Performance Architectural Latex System:

a. Prime Coat: Alkali-resistant, water-based primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

B. CMU Substrates:

1. Latex System:

a. Prime Coat: Latex block filler.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex over Alkali-Resistant Primer System:

a. Prime Coat: Alkali-resistant, water-based primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

3. Latex Aggregate System:

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Textured latex coating, [**flat**] [**nonflat**].

4. High-Build Latex System: . Dry film thickness of not less than 10 mils (0.25 mm).

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Exterior, high-build latex paint.

5. Water-Based, Light Industrial Coating System:

a. Prime Coat: Latex block filler.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

6. Water-Based Alkyd System:

a. Prime Coat: Alkali-resistant, water-based primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

7. High Performance Architectural Latex System:

a. Prime Coat: [**Alkali-resistant, water-based primer**] [**Latex block filler**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

3.9 EXTERIOR PAINTING SCHEDULE, METAL SUBSTRATES

A. Steel and Iron Substrates:

1. Water-Based, Light Industrial Coating System:

a. Prime Coat: [**Zinc-rich, inorganic primer**] [**Alkyd metal primer**] [**Acrylic metal primer**] [**Epoxy metal primer**] [**Shop primer specified in Section in which substrate is specified**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

2. Water-Based, Light Industrial Coating over Epoxy System:

a. Prime Coat: Epoxy metal primer.
b. Intermediate Coat: High-build epoxy paint, low gloss.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: [**Alkyd metal primer**] [**Surface-tolerant metal primer**] [**Shop primer specified in Section in which substrate is specified**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: [**Alkyd metal primer**] [**Quick-dry, alkyd metal primer**] [**Surface-tolerant metal primer**] [**Shop primer specified in Section in which substrate is specified**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. Quick-Dry Enamel System:

a. Prime Coat: Quick-dry, alkyd metal primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Quick-dry alkyd enamel, [**semigloss**] [**gloss**].

6. Aluminum Paint System:

a. Prime Coat: [**Alkyd metal primer**] [**Shop primer specified in Section in which substrate is specified**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Aluminum paint.

B. Galvanized Metal Substrates:

1. Latex System:

a. Prime Coat: Water-based, galvanized-metal primer.
b. Intermediate Coat: Matching topcoat.

2. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].Water-Based, Light Industrial Coating System:

a. Prime Coat: [**Water-based, galvanized-metal primer**] [**Epoxy metal primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: Water-based, galvanized-metal primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: Water-based, galvanized-metal primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. Aluminum Paint System:

a. Prime Coat: Water-based, galvanized-metal primer.
b. Intermediate Coat: Matching topcoat.

c. Topcoat: Aluminum paint.

6. High Performance Architectural Latex System: <**Insert drawing designation**>

a. Prime Coat: Water-based, galvanized-metal primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

7. Bituminous Coating System: <**Insert drawing designation**>

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Bituminous coating.

C. Aluminum (Not Anodized or Otherwise Coated) Substrates:

1. Latex System:

a. Prime Coat: Quick-dry aluminum primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Water-Based, Light Industrial Coating System:

a. Prime Coat: Quick-dry aluminum primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Pretreatment Coat: Vinyl wash primer.
b. Prime Coat: Quick-dry aluminum primer.
c. Intermediate Coat: Matching topcoat.
d. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: [**Quick-dry aluminum primer**] [**Vinyl wash primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: Quick-dry aluminum primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

6. Aluminum Paint System:

a. Pretreatment Prime Coat: Vinyl wash primer.
b. Prime Coat: Quick-dry aluminum primer.
c. Intermediate Coat: Matching topcoat.
d. Topcoat: Aluminum paint.

7. Bituminous Coating System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Bituminous coating.

D. Copper Substrates:

1. Latex System:

    a. Prime Coat: Quick-dry aluminum primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Water-Based, Light Industrial Coating System:

    a. Prime Coat: Quick-dry aluminum primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

    a. Pretreatment Coat: [**Vinyl wash**] [**Quick-dry aluminum**] primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

    a. Prime Coat: [**Quick-dry aluminum primer**] [**Vinyl wash primer**].
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

    a. Prime Coat: Quick-dry aluminum primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

6. Aluminum Paint System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Aluminum paint.

7. Bituminous Coating System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Bituminous coating.

E. Stainless Steel Substrates:

1. Latex System:

    a. Prime Coat: Solvent-based bonding primer.

b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Water-Based, Light Industrial Coating System:

a. Prime Coat: Quick-dry aluminum primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: [**Solvent-based bonding primer**] [**Alkyd metal primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: Solvent-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

6. Aluminum Paint System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Aluminum paint.

3.10 EXTERIOR PAINTING SCHEDULE, WOOD SUBSTRATES

A. Glue-Laminated Wood Substrates:

1. Latex over Latex Primer System:

a. Prime Coat: Exterior, latex wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex over Alkyd Primer System:

a. Prime Coat: Exterior, alkyd wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: Exterior, alkyd wood primer.
b. Intermediate Coat: Matching topcoat.

c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

B. Exposed Wood-Framed Substrates:

1. Latex over Latex Primer System:

a. Prime Coat: Exterior, latex wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex over Alkyd Primer System:

a. Prime Coat: Exterior, alkyd wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: Exterior, alkyd wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

C. Dressed-Wood Substrates: [**Wood trim**] [**Architectural woodwork**] [**Doors**] [**Windows**] [**Wood board siding**] [**Railings**] [**and**] [**Fences**] .

1. Latex over Latex Primer System:

a. Prime Coat: Exterior, latex wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex over Alkyd Primer System:

    a. Prime Coat: Exterior, alkyd wood primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

3. Water-Based, Light Industrial Coating System:

    a. Prime Coat: Exterior, alkyd wood primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

4. Alkyd System:

    a. Prime Coat: Exterior, alkyd wood primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

5. Water-Based Alkyd System:

    a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

6. High Performance Architectural Latex System:

    a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

D. Wood-Based Panel Substrates:

1. Latex over Latex Primer System:

    a. Prime Coat: Exterior, latex wood primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex over Alkyd Primer System:

    a. Prime Coat: Exterior, alkyd wood primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

    a. Prime Coat: Exterior, alkyd wood primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

    a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
    b. Intermediate Coat: Matching topcoat.

c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

E. Wood-Board, Traffic-Surface Substrates: [**Lumber decking**] [**and**] [**stairs**]

1. Latex Porch and Floor Enamel over Latex Primer System:

a. Prime Coat: Exterior, latex wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Latex floor enamel, [**low gloss**] [**gloss**].
d. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

2. Latex Porch and Floor Enamel over Alkyd Primer System:

a. Prime Coat: Exterior, alkyd wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Latex floor enamel, [**low gloss**] [**gloss**].
d. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

3. Latex Deck Coating System (for Plywood Decks):

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommending in writing by topcoat manufacturer.
c. Topcoat: Latex deck coating.
d. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

4. Alkyd Floor Enamel System:

a. Prime Coat: Matching topcoat.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Alkyd floor enamel, [**low gloss**] [**gloss**].
d. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

5. Alkyd Floor Enamel over Wood Preservative System:

a. Preservative Coat: Exterior wood preservative.
b. Prime Coat: Matching topcoat.
c. Intermediate Coat: Matching topcoat.
d. Topcoat: Alkyd floor enamel, [**low gloss**] [**gloss**].
e. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

F. Wood Shingle and Shake Siding Substrates:

1. Latex over Latex Primer System:

a. Prime Coat: Exterior, latex wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex over Alkyd Primer System:

a. Prime Coat: Exterior, alkyd wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: Exterior, alkyd wood primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: [**Exterior, latex wood primer**] [**Exterior, alkyd wood primer**].
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

3.11 EXTERIOR PAINTING SCHEDULE, MISCELLANEOUS SUBSTRATES

A. Fiberglass Substrates:

1. Latex System:

a. Prime Coat: Solvent-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Water-Based, Light Industrial Coating System:

a. Prime Coat: Solvent-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: Solvent-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: Solvent-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: Solvent-based bonding primer.

b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

B. Plastic Trim Fabrication Substrates:

1. Latex System:

a. Prime Coat: [**Solvent**] [**Water**]-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Water-Based, Light Industrial Coating System:

a. Prime Coat: [**Solvent**] [**Water**]-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: [**Solvent**] [**Water**]-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

a. Prime Coat: Solvent-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. High Performance Architectural Latex System:

a. Prime Coat: [**Solvent**] [**Water**]-based bonding primer.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

C. Exterior Canvas and Cotton Substrates:

1. Latex System:

a. Prime Coat: Matching topcoat.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Water-Based, Light Industrial Coating System:

a. Prime Coat: Matching topcoat.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior, water-based, light industrial coating, [**low sheen**] [**semigloss**] [**gloss**].

3. Alkyd System:

a. Prime Coat: Exterior latex paint, flat.
b. Intermediate Coat: Matching topcoat.
c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

    a. Prime Coat: Exterior latex paint, flat.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. Aluminum Paint System:

    a. Prime Coat: Exterior latex paint, flat.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Aluminum paint.

6. High Performance Architectural Latex System:

    a. Prime Coat: As recommended in writing by topcoat manufacturer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

D. Exterior Bituminous-Coated Substrates:

1. Latex System:

    a. Prime Coat: Water-based, rust-inhibitive primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior latex paint, [**flat**] [**low sheen**] [**semigloss**] [**gloss**].

2. Latex Aggregate System:

    a. Prime Coat: As recommended in writing by topcoat manufacturer.
    b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
    c. Topcoat: Textured latex coating, [**flat**] [**nonflat**].

3. Alkyd System:

    a. Prime Coat: Water-based, rust-inhibitive primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior alkyd paint, [**flat**] [**semigloss**] [**gloss**].

4. Water-Based Alkyd System:

    a. Prime Coat: Water-based, rust-inhibitive primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Exterior water-based alkyd paint, [**low sheen**] [**semigloss**] [**gloss**].

5. Aluminum Paint System:

    a. Prime Coat: Water-based, rust-inhibitive primer.
    b. Intermediate Coat: Matching topcoat.
    c. Topcoat: Aluminum paint.

6. High Performance Architectural Latex System:

    a. Prime Coat: Water-based, rust-inhibitive primer.
    b. Intermediate Coat: Matching topcoat.

c. Topcoat: Exterior, high performance architectural latex, [**low sheen**] [**semigloss**].

SECTION 13 34 19 00 - METAL BUILDING SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Metal building systems.
2. Structural-steel framing.
3. Metal roof panels.
4. Metal wall panels.
5. Foamed-insulation-core metal wall panels.
6. Metal soffit panels.
7. Thermal insulation.
8. Personnel doors and frames.
9. Horizontal sliding doors.
10. Windows.
11. Translucent panels.
12. Accessories.

B. Related Requirements:

1. Division 03 concrete Sections for anchor rod installation, concrete, reinforcement, and formwork requirements.
2. Section 077253 "Snow Guards" for devices designed to hold snow on the roof surface.
3. Section 083323 "Overhead Coiling Doors" for coiling vehicular doors in metal building systems.
4. Section 083613 "Sectional Doors" for sectional vehicular doors in metal building systems.

1.2 DEFINITIONS

A. Terminology Standard: See MBMA's "Metal Building Systems Manual" for definitions of terms for metal building system construction not otherwise defined in this Section or in standards referenced by this Section.

1.3 COORDINATION

A. Coordinate sizes and locations of concrete foundations and casting of anchor-rod inserts into foundation walls and footings. Anchor rod installation, concrete, reinforcement, and formwork requirements are specified in Division 03 concrete Sections.

B. Coordinate imposed load of [**cranes**] [**HVAC**] specified in other Sections with structural performance requirements specified in this Section.

C. Coordinate metal panel assemblies with rain drainage work, flashing, trim, and construction of supports and other adjoining work to provide a leakproof, secure, and noncorrosive installation.

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conferences: Conduct conferences [**at Project site**] [**by web conference**].

1. Metal Building Systems Conference: Review methods and procedures related to metal building systems including, but not limited to, the following:

a. Condition of foundations and other preparatory work performed by other trades.
b. Structural load limitations.
c. Construction schedule. Verify availability of materials and erector's personnel, equipment, and facilities needed to make progress and avoid delays.
d. Required tests, inspections, and certifications.
e. Unfavorable weather and forecasted weather conditions and impact on construction schedule.

2. Metal Building Roof Panel Conference: Review methods and procedures related to metal roof panel assemblies including, but not limited to, the following:

a. Compliance with requirements for purlin and rafter conditions, including flatness and attachment to structural members.
b. Structural limitations of purlins and rafters during and after roofing.
c. Flashings, special roof details, roof drainage, roof penetrations, equipment curbs, and condition of other construction that will affect metal roof panels.
d. Temporary protection requirements for metal roof panel assembly during and after installation.
e. Roof observation and repair after metal roof panel installation.

3. Metal Building Wall Panel Conference: Review methods and procedures related to metal wall panel assemblies including, but not limited to, the following:

a. Compliance with requirements for support conditions, including alignment between and attachment to structural members.
b. Structural limitations of girts and columns during and after wall panel installation.
c. Flashings, special siding details, wall penetrations, openings, and condition of other construction that will affect metal wall panels.
d. Temporary protection requirements for metal wall panel assembly during and after installation.
e. Wall observation and repair after metal wall panel installation.

1.5 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.

B. Shop Drawings: By manufacturer of metal building systems. Indicate components by others. Include full building plan, elevations, sections, details, and the following:

1. Anchor-Rod Plans: Submit anchor-rod plans and templates before foundation work begins. Include location, diameter, and minimum required projection of anchor rods required to attach metal building to foundation. Indicate column reactions at each location.

2. Structural-Framing Drawings: Indicate complete fabrication of primary and secondary framing; include provisions for openings. Indicate welds and bolted connections, distinguishing between shop and field applications. Include transverse cross-sections.

    a. Indicate provisions for attaching [**mezzanines**] [**roof curbs**] [**service walkways**] [**platforms**] [**and**] [**pipe racks**].

3. Metal Panel Layout Drawings: Indicate [**roof**] [**and**] [**wall**]. layouts of panels including methods of support. Include details of edge conditions, joints, panel profiles, corners, anchorages, clip spacing, trim, flashings, closures, and special details. Distinguish between factory- and field-assembled work; indicate locations of exposed fasteners.

    a. Indicate roof-mounted items including roof hatches, equipment supports, pipe supports and penetrations, lighting fixtures, and items mounted on roof curbs.
    b. Indicate wall-mounted items including personnel doors, vehicular doors, windows, louvers, and lighting fixtures.
    c. Indicate translucent panels.

4. Accessory Drawings: Include details of the following items, at a scale of not less than [**1-1/2 inches per 12 inches (1:8)**]

    a. Flashing and trim.
    b. Gutters.
    c. Downspouts.
    d. Service walkways.

C. Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type of exposed finish.

D. Samples for Verification: Actual sample of finished products for each type of exposed finish.

1. Panels: [**Manufacturers' standard size**]. Include fasteners, closures, and other exposed panel accessories.
2. Flashing and Trim: [**Manufacturers' standard size**]. Include fasteners and other exposed accessories.
3. Vapor-Retarder Facings: Minimum 6-inch- (150-mm-) square Samples.
4. Windows: Full-size, nominal 12-inch- (300-mm-) long frame Samples showing typical profile.
5. Accessories: Samples for each type of accessory.

E. Door Schedule: For doors and frames. Use same designations indicated on Drawings. Include details of reinforcement.

1. Door Hardware Schedule: Include details of fabrication and assembly of door hardware. Organize schedule into door hardware sets, indicating complete designations of every item required for each door or opening.
2. Keying Schedule: Detail the Owner's final keying instructions for locks. Include schematic keying diagram and index each key set to unique door designations.

F. Delegated Design Submittals: For metal building systems, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

1.6 INFORMATIONAL SUBMITTALS

A. Letter of Design Certification: Signed and sealed by a qualified professional engineer. Include the following:

1. Name and location of Project.
2. Order number.
3. Name of manufacturer.
4. Name of Contractor.
5. Building dimensions including width, length, height, and roof slope.
6. Indicate compliance with AISC standards for hot-rolled steel and AISI standards for cold-rolled steel, including edition dates of each standard.
7. Governing building code and year of edition.
8. Design Loads: Include dead load, roof live load, collateral loads, roof snow load, deflection, wind loads/speeds and exposure, seismic design category or effective peak velocity-related acceleration/peak acceleration, and auxiliary loads (cranes).
9. Load Combinations: Indicate that loads were applied acting simultaneously with concentrated loads, in accordance with governing building code.
10. Building-Use Category: Indicate category of building use and its effect on load importance factors.

B. Welding certificates.

C. Material Test Reports: For each of the following products, by a qualified testing agency:

1. Structural steel including chemical and physical properties.
2. Bolts, nuts, and washers including mechanical properties and chemical analysis.
3. Tension-control, high-strength, and bolt-nut-washer assemblies.
4. Shop primers.
5. Nonshrink grout.

D. Source quality control reports.

E. Field quality control reports.

F. Surveys: Show final elevations and locations of major members. Indicate discrepancies between actual installation and the Contract Documents. Have surveyor that performed surveys certify their accuracy.

G. Qualification Statements: For [**manufacturer**] [**erector**] [**land surveyor**] [**door inspector**].

1. Fire-Rated Door Inspector: Submit documentation of compliance with NFPA 80, Section 5.2.3.1.
2. Egress Door Inspector: Submit documentation of compliance with NFPA 101, Section 7.2.1.15.4.
3. Submit copy of DHI Fire and Egress Door Assembly Inspector (FDAI) certificate.

H. Delegated Design Engineer Qualifications: For metal building system.

I. Sample Warranties: For special warranties.

1.7 CLOSEOUT SUBMITTALS

A. Maintenance Data: For metal panel finishes[**and door hardware**].

1.8 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials[from the same production run,] to the Owner that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1.9 QUALITY ASSURANCE

A. Manufacturer Qualifications:

1. Accreditation: Manufacturer's facility accredited in accordance with IAS AC472.
2. Engineering Responsibility: Metal building system design and preparation of comprehensive engineering analysis and Shop Drawings by a professional engineer who is legally qualified to practice in [**state**] where Project is located and who is experienced in providing engineering services of the type indicated.

B. Delegated Design Engineer Qualifications: A professional engineer who is legally qualified to practice in [**state**] where Project is located and who is experienced in providing engineering services of the type indicated.

C. Erector Qualifications: An experienced erector who specializes in erecting and installing work similar in material, design, and extent to that indicated for this Project and who is acceptable to manufacturer.

D. Land Surveyor Qualifications: A professional land surveyor who practices in jurisdiction where Project is located and who is experienced in providing surveying services of the kind indicated.

E. Welding Qualifications: Qualify procedures and personnel in accordance with the following welding codes:

1. AWS D1.1/D1.1M.
2. AWS D1.3/D1.3M.

F. Fire-Rated Door Inspector Qualifications: Inspector for field quality-control inspections of fire-rated door assemblies is to comply with qualifications set forth in NFPA 80, Section 5.2.3.1 and with the following:

1. DHI Fire and Egress Door Assembly Inspector (FDAI) certification.

G. Egress Door Inspector Qualifications: Inspector for field quality-control inspections of egress door assemblies is to comply with qualifications set forth in NFPA 101, Section 7.2.1.15.4 and with the following:

1. DHI Fire and Egress Door Assembly Inspector (FDAI) certification.

1.10 DELIVERY, STORAGE, AND HANDLING

A. Deliver components, sheets, panels, and other manufactured items so as not to be damaged or deformed. Package metal panels for protection during transportation and handling.

B. Unload, store, and erect metal panels in a manner to prevent bending, warping, twisting, and surface damage.

C. Stack metal panels horizontally on platforms or pallets, covered with suitable weathertight and ventilated covering. Store metal panels to ensure dryness, with positive slope for drainage of water. Do not store metal panels in contact with other materials that might cause staining, denting, or other surface damage.

D. Protect foam-plastic insulation as follows:

1. Do not expose to sunlight, except to extent necessary for period of installation and concealment.
2. Protect against ignition at all times. Do not deliver foam-plastic insulation materials to Project site before installation time.

3. Complete installation and concealment of foam-plastic materials as rapidly as possible in each area of construction.

1.11 FIELD CONDITIONS

A. Weather Limitations: Proceed with panel installation only when weather conditions permit metal panels to be installed in accordance with manufacturers' written installation instructions and warranty requirements.

1.12 WARRANTY

A. Special Warranty on Metal Panel Finishes: Manufacturer agrees to repair finish or replace metal panels that show evidence of deterioration of factory-applied finishes within specified warranty period.

1. Exposed Panel Finish: Deterioration includes, but is not limited to, the following:

a. Color fading more than 5 Hunter units when tested in accordance with ASTM D2244.
b. Chalking in excess of a No. 8 rating when tested in accordance with ASTM D4214.
c. Cracking, checking, peeling, or failure of paint to adhere to bare metal.

2. Finish Warranty Period: [**25**] [**20**] [**10**] years from date of Substantial Completion.

B. Special Weathertightness Warranty for Standing-Seam Metal Roof Panels: Manufacturer agrees to repair or replace standing-seam metal roof panel assemblies that leak or otherwise fail to remain weathertight within specified warranty period.

1. Warranty Period: [**20**] years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain metal building system components, including primary and secondary framing and metal panel assemblies, from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design metal building system.

B. Structural Performance: Metal building systems to withstand the effects of gravity loads and the following loads and stresses within limits and under conditions indicated in accordance with procedures in MBMA's "Metal Building Systems Manual":

1. Design Loads: [**As indicated on Drawings**].
2. Deflection and Drift Limits:

a. Design metal building system assemblies to withstand serviceability design loads without exceeding deflections and drift limits recommended in AISC's "Design Guide No. 3: Serviceability Design Considerations for Steel Buildings."
b. Deflection to be no greater than the following:

1) Purlins and Rafters: Vertical deflection of [**1/150**] [**1/240**] [**1/360**] of the span.
2) Girts: Horizontal deflection of [**1/120**] [**1/180**] [**1/240**] of the span.
3) Metal Roof Panels: Vertical deflection of [**1/150**] [**1/240**] [**1/360**] of the span.
4) Metal Wall Panels: Horizontal deflection of [**1/180**] [**1/240**] of the span.
5) Design secondary-framing system to accommodate deflection of primary framing and construction tolerances, and to maintain clearances at openings.
6) Lateral Drift: Maximum of [**1/60**] [**1/100**] [**1/200**] [**1/400**] of the building height.

C. Seismic Performance: Metal building system to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**].

D. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

1. Temperature Change: [**120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces**].

E. Fire-Resistance Ratings: Where assemblies are indicated to have a fire-resistance rating, provide metal panel assemblies identical to those of assemblies tested for fire resistance per ASTM E119 or ASTM E108 by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Indicate design designations from UL Product iQ, FM Approvals' "Approval Guide," or from the listings of another qualified testing agency.

F. Fire Propagation Characteristics: Exterior wall assemblies containing foam plastics pass NFPA 285 fire test.

G. Fire-Rated Door Assemblies: Assemblies complying with NFPA 80 that are listed and labeled by a qualified testing agency, for fire-protection ratings indicated, based on testing at positive pressure in accordance with NFPA 252 or UL 10C.

1. Oversize Fire-Rated Door Assemblies: For units exceeding sizes of tested assemblies, provide certification by a qualified testing agency that doors comply with standard construction requirements for tested and labeled fire-rated door assemblies except for size.

H. Structural Performance for Metal Panels: Provide metal panel systems capable of withstanding the effects of the following loads, based on testing in accordance with ASTM E1592:

1. Wind Loads: As indicated on Drawings.

I. Air Infiltration for Metal Roof Panels: Air leakage of not more than [**0.04 cfm/sq. ft. (0.2 L/s per sq. m)**] [**0.06 cfm/sq. ft. (0.3 L/s per sq. m)**] when tested in accordance with ASTM E1680[**or ASTM E283/E283M**] at the following test-pressure difference:

1. Test-Pressure Difference: [**1.57 lbf/sq. ft. (75 Pa)**] [**6.24 lbf/sq. ft. (300 Pa)**].

J. Air Infiltration for Metal Wall Panels: Air leakage of not more than [**0.04 cfm/sq. ft. (0.2 L/s per sq. m)**] [**0.06 cfm/sq. ft. (0.3 L/s per sq. m)**] when tested in accordance with ASTM E283/E283M at the following test-pressure difference:

1. Test-Pressure Difference: [**1.57 lbf/sq. ft. (75 Pa)**] [**6.24 lbf/sq. ft. (300 Pa)**].

K. Water Penetration for Metal Roof Panels: No water penetration when tested in accordance with ASTM E1646[**or ASTM E331**] at the following test-pressure difference:

1. Test-Pressure Difference: [**2.86 lbf/sq. ft. (137 Pa)**] [**6.24 lbf/sq. ft. (300 Pa)**].

L. Water Penetration for Metal Wall Panels: No water penetration when tested in accordance with ASTM E331 at the following test-pressure difference:

1. Test-Pressure Difference: [**2.86 lbf/sq. ft. (137 Pa)**] [**6.24 lbf/sq. ft. (300 Pa)**].

M. Wind-Uplift Resistance: Provide metal roof panel assemblies that comply with UL 580 for wind-uplift-resistance class indicated.

1. Uplift Rating: [**UL 30**] [**UL 60**] [**UL 90**].

N. FM Global Listing: Provide metal roof panels and component materials that comply with requirements in FM Global 4471 as part of a panel roofing system and that are listed in FM Approvals' "Approval Guide" for Class 1 or noncombustible construction, as applicable. Identify materials with FM Global markings.

1. Fire/Windstorm Classification: Class 1A- [**60**] [**75**] [**90**] [**105**] [**120**].
2. Hail Resistance: [**MH**] [**SH**].

O. Thermal Performance for Opaque Elements: Provide the following maximum U-factors and minimum R-values when tested in accordance with ASTM C1363 or ASTM C518:

2.3 METAL BUILDING SYSTEMS

A. System Description: Provide a complete, integrated set of mutually dependent components and assemblies that form a metal building system capable of withstanding structural and other loads, thermally induced movement, and exposure to weather without failure or infiltration of water into building interior.

1. Primary-Frame Type:

a. Rigid Clear Span: Solid-member, structural-framing system without interior columns.
b. Rigid Modular: Solid-member, structural-framing system with interior columns.
c. Truss-Frame Clear Span: Truss-member, structural-framing system without interior columns.
d. Truss-Frame Modular: Truss-member, structural-framing system with interior columns.
e. Lean-to: Solid- or truss-member, structural-framing system, designed to be partially supported by another structure.

2. End-Wall Framing:

a. Manufacturer's standard, for buildings not required to be expandable, consisting of [**primary frame, capable of supporting one-half of a bay design load, and end-wall columns**] [**load-bearing end-wall and corner columns and rafters**].
b. Engineer end walls to be expandable. Provide primary frame, capable of supporting full-bay design loads, and end-wall columns.

3. Secondary-Frame Type: Manufacturer's standard purlins and joists and [**flush-framed**] [**partially inset-framed**] [**exterior-framed (bypass)**] girts.

4. Eave Height: [16 ft. (4.9 m)] [20 ft. (6.1 m)] [24 ft. (7.3 m)] [28 ft. (8.5 m)] [**Manufacturer's standard height, as indicated by nominal height on Drawings**].
5. Bay Spacing: [20 ft. (6.1 m)] [25 ft. (7.6 m)] [30 ft. (9.1 m)] [**As determined by manufacturer**] [**As indicated on Drawings**].
6. Roof Slope: [1/4 inch per 12 inches (1:48)] [1/2 inch per 12 inches (1:24)] [1 inch per 12 inches (1:12)] [4 inches per 12 inches (1:3)] [**Manufacturer's standard for frame type required**].
7. Roof System: Manufacturer's standard [**standing-seam, vertical-rib,**] [**standing-seam, trapezoidal-rib,**] [**lap-seam, tapered-rib**] metal roof panels.

    a. Liner Panels: Tapered rib.

8. Exterior Wall System: Manufacturer's standard [**exposed-fastener, tapered-rib,**] [**exposed-fastener, reverse-rib,**] [**concealed-fastener, flush-profile,**] [**foamed-insulation-core**] metal wall panels.

    a. Liner Panels: [**Tapered rib**] [**Flush profile**].

2.4 STRUCTURAL-STEEL FRAMING

A. Structural Steel: Comply with AISC 360.

B. Bolted Connections: Comply with RCSC's "Specification for Structural Joints Using High-Strength Bolts."

C. Cold-Formed Steel: Comply with AISI S100 for design requirements and allowable stresses.

D. Primary Framing: Manufacturer's standard primary-framing system, designed to withstand required loads and specified requirements. Primary framing includes transverse and lean-to frames; rafters, rake, and canopy beams; sidewall, intermediate, end-wall, and corner columns; and wind bracing.

1. General: Provide frames with attachment plates, bearing plates, and splice members. Factory drill for field-bolted assembly. Provide frame span and spacing indicated.

    a. Slight variations in span and spacing may be acceptable if necessary to comply with manufacturer's standard, as approved by Architect, as directed by the Owner.

2. Rigid Clear-Span Frames: I-shaped frame sections fabricated from shop-welded, built-up steel plates or structural-steel shapes. Interior columns are not permitted.
3. Rigid Modular Frames: I-shaped frame sections fabricated from shop-welded, built-up steel plates or structural-steel shapes. Provide interior columns fabricated from round steel pipes or tubes, or shop-welded, built-up steel plates.
4. Truss-Frame, Clear-Span Frames: Rafter frames fabricated from joist girders, and I-shaped column sections fabricated from shop-welded, built-up steel plates or structural-steel shapes. Interior columns are not permitted.
5. Truss-Frame Modular Frames: Rafter frames fabricated from joist girders, and I-shaped column sections fabricated from shop-welded, built-up steel plates or structural-steel shapes. Provide interior columns fabricated from round steel pipes or tubes, or shop-welded, built-up steel plates.
6. Long-Bay Frames: I-shaped frame sections fabricated from shop-welded, built-up steel plates or structural-steel shapes. Provide interior columns fabricated from round steel pipes or tubes, or shop-welded, built-up steel plates.
7. Frame Configuration: [**Single gable**] [**One-directional, sloped**] [**Lean-to, with high side connected to and supported by another structure**] [**Multiple gable**] [**Load-bearing wall**] [**Multistory**].
8. Exterior Column: [**Uniform depth**] [**Tapered**].

9. Rafter: [**Uniform depth**] [**Tapered**].

E. End-Wall Framing: Manufacturer's standard primary end-wall framing fabricated for field-bolted assembly to comply with the following:

1. End-Wall and Corner Columns: I-shaped sections fabricated from structural-steel shapes; shop-welded, built-up steel plates; or C-shaped, cold-formed, structural-steel sheet.
2. End-Wall Rafters: C-shaped, cold-formed, structural-steel sheet; or I-shaped sections fabricated from shop-welded, built-up steel plates or structural-steel shapes.

F. Secondary Framing: Manufacturer's standard secondary framing, including purlins, girts, eave struts, flange bracing, base members, gable angles, clips, headers, jambs, and other miscellaneous structural members. Unless otherwise indicated, fabricate framing from either cold-formed, structural-steel sheet or roll-formed, metallic-coated steel sheet, prepainted with coil coating, to comply with the following:

1. Purlins:

   a. C- or Z-shaped sections; fabricated from built-up steel plates, steel sheet, or structural-steel shapes; minimum 2-1/2-inch- (64-mm-) wide flanges.
   b. Steel joists of depths indicated on Drawings.

      1) Depth: [**As indicated on Drawings**] [**As needed to comply with system performance requirements**].

2. Girts: C- or Z-shaped sections; fabricated from built-up steel plates, steel sheet, or structural-steel shapes. Form ends of Z-sections with stiffening lips angled 40 to 50 degrees from flange, with minimum 2-1/2-inch- (64-mm-) wide flanges.

   a. Depth: [**As indicated on Drawings**] [**As required to comply with system performance requirements**].

3. Eave Struts: Unequal-flange, C-shaped sections; fabricated from built-up steel plates, steel sheet, or structural-steel shapes; to provide adequate backup for metal panels.
4. Flange Bracing: Minimum 2-by-2-by-1/8-inch (51-by-51-by-3-mm) structural-steel angles or 1-inch- (25-mm-) diameter, cold-formed structural tubing to stiffen primary-frame flanges.
5. Sag Bracing: Minimum 1-by-1-by-1/8-inch (25-by-25-by-3-mm) structural-steel angles.
6. Base or Sill Angles: Manufacturer's standard base angle, minimum 3-by-2-inch (76-by-51-mm), fabricated from zinc-coated (galvanized) steel sheet.
7. Purlin and Girt Clips: Manufacturer's standard clips fabricated from steel sheet. Provide galvanized clips where clips are connected to galvanized framing members.
8. Framing for Openings: Channel shapes; fabricated from cold-formed, structural-steel sheet or structural-steel shapes. Frame head and jamb of door openings and head, jamb, and sill of other openings.
9. Miscellaneous Structural Members: Manufacturer's standard sections fabricated from cold-formed, structural-steel sheet; built-up steel plates; or zinc-coated (galvanized) steel sheet; designed to withstand required loads.

G. Canopy Framing: Manufacturer's standard structural-framing system, designed to withstand required loads; fabricated from shop-welded, built-up steel plates or structural-steel shapes. Provide frames with attachment plates and splice members, factory drilled for field-bolted assembly.

1. Type: [**Straight-beam, eave type**] [**Purlin-extension type**] [**Tapered-beam, below-eave type**] [**As indicated**].

H. Bracing: Provide adjustable wind bracing[**using any method**] as follows:

1. Rods: ASTM A36/A36M; ASTM A572/A572M, Grade 50 (345); or ASTM A529/A529M, Grade 50 (345); minimum 1/2-inch- (13-mm-) diameter steel; threaded full length or threaded a minimum of 6 inches (152 mm) at each end.
2. Cable: ASTM A475, minimum 1/4-inch- (6-mm-) diameter, extra-high-strength grade, Class B, zinc-coated, seven-strand steel; with threaded end anchors.
3. Angles: Fabricated from structural-steel shapes to match primary framing, of size required to withstand design loads.
4. Rigid Portal Frames: Fabricated from shop-welded, built-up steel plates or structural-steel shapes to match primary framing; of size required to withstand design loads.
5. Fixed-Base Columns: Fabricated from shop-welded, built-up steel plates or structural-steel shapes to match primary framing; of size required to withstand design loads.
6. Diaphragm Action of Metal Panels: Design metal building to resist wind forces through diaphragm action of metal panels.

I. Anchor Rods: Headed anchor rods as indicated in Anchor Rod Plan for attachment of metal building to foundation.

J. Materials:

1. W-Shapes: ASTM A992/A992M; ASTM A572/A572M, Grade 50 or 55 (345 or 380); or ASTM A529/A529M, Grade 50 or 55 (345 or 380).
2. Channels, Angles, M-Shapes, and S-Shapes: ASTM A36/A36M; ASTM A572/A572M, Grade 50 or 55 (345 or 380); or ASTM A529/A529M, Grade 50 or 55 (345 or 380).
3. Plate and Bar: ASTM A36/A36M; ASTM A572/A572M, Grade 50 or 55 (345 or 380); or ASTM A529/A529M, Grade 50 or 55 (345 or 380).
4. Steel Pipe: ASTM A53/A53M, Type E or S, Grade B.
5. Cold-Formed Hollow Structural Sections: ASTM A500/A500M, Grade B or C, structural tubing.
6. Structural-Steel Sheet: Hot-rolled, ASTM A1011/A1011M, Structural Steel (SS), Grades 30 through 55 (205 through 380), or High-Strength Low-Alloy Steel (HSLAS) or High-Strength Low-Alloy Steel with Improved Formability (HSLAS-F), Grades 45 through 70 (310 through 480); or cold-rolled, ASTM A1008/A1008M, Structural Steel (SS), Grades 25 through 80 (170 through 550), or HSLAS, Grades 45 through 70 (310 through 480).
7. Metallic-Coated Steel Sheet: ASTM A653/A653M, SS, Grades 33 through 80 (230 through 550), or HSLAS or HSLAS-F, Grades 50 through 80 (340 through 550); with G60 (Z180) coating designation; mill phosphatized.
8. Metallic-Coated Steel Sheet Prepainted with Coil Coating: Steel sheet, metallic coated by the hot-dip process and prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Zinc-Coated (Galvanized) Steel Sheet: ASTM A653/A653M, SS, Grades 33 through 80 (230 through 550), or HSLAS or HSLAS-F, Grades 50 through 80 (340 through 550); with G90 (Z275) coating designation.
    b. Aluminum-Zinc Alloy-Coated Steel Sheet: ASTM A792/A792M, SS, Grade 50 or 80 (340 or 550); with Class AZ50 (AZM150) coating.

9. Joist Girders: Manufactured in accordance with "Standard Specifications for Joist Girders," in SJI's "Standard Specifications, Load Tables, and Weight Tables for Steel Joists and Joist Girders"; with steel-angle, top- and bottom-chord members, and end- and top-chord arrangements as indicated on Drawings and required for primary framing.
10. Steel Joists: Manufactured in accordance with "Standard Specifications for Open Web Steel Joists, K-Series," in SJI's "Standard Specifications, Load Tables, and Weight Tables for Steel Joists and Joist Girders"; with steel-angle, top- and bottom-chord members, and end- and top-chord arrangements as indicated on Drawings and required for secondary framing.
11. Non-High-Strength Bolts, Nuts, and Washers: ASTM A307, Grade A, carbon-steel, hex-head bolts; ASTM A563/A563M carbon-steel hex nuts; and ASTM F844 plain (flat) steel washers.

a. Finish: [**Plain**] [**Hot-dip zinc coating, ASTM F2329, Class C**] [**Mechanically deposited zinc coating, ASTM B695, Class 50**].

12. High-Strength Bolts, Nuts, and Washers, Grade A325 (Grade A325M): ASTM F3125/F3125M, Type 1, heavy-hex steel structural bolts; ASTM A563/A563M, Grade DH (Class 10S), heavy-hex carbon-steel nuts; and ASTM F436/F436M, Type 1, hardened carbon-steel washers.

    a. Finish: [**Plain**] [**Hot-dip zinc coating, ASTM F2329, Class C**] [**Mechanically deposited zinc coating, ASTM B695, Class 50**].

13. High-Strength Bolts, Nuts, and Washers, Grade A490 (Grade A490M): ASTM F3125/F3125M, Type 1, heavy-hex steel structural bolts[**or Grade F2280 tension-control, bolt-nut-washer assemblies with splined ends**]; ASTM A563/A563M, Grade DH (Class 10S), heavy-hex carbon-steel nuts; and ASTM F436/F436M, Type 1, hardened carbon-steel washers; all with plain finish.
14. Tension-Control, High-Strength Bolt-Nut-Washer Assemblies: ASTM F3125/F3125M, Grade F1852, Type 1, [**heavy-hex**] [**round**] head assemblies consisting of steel structural bolts with splined ends; ASTM A563/A563M, Grade DH (Class 10S), heavy-hex carbon-steel nuts; and ASTM F436/F436M, Type 1 hardened carbon-steel washers.

    a. Finish: [**Plain**] [**Mechanically deposited zinc coating, ASTM B695, Class 50**] [**Mechanically deposited zinc coating, ASTM B695, Class 50, baked-epoxy coated**].

15. Unheaded Anchor Rods: [**ASTM F1554, Grade 36**] [**ASTM A572/A572M, Grade 50 (345)**] [**ASTM A36/A36M**] [**ASTM A307, Grade A**].

    a. Configuration: Straight.
    b. Nuts: ASTM A563/A563M, [**heavy-**]hex carbon steel.
    c. Plate Washers: ASTM A36/A36M carbon steel.
    d. Washers: ASTM F436/F436M, hardened carbon steel.
    e. Finish: [**Plain**] [**Hot-dip zinc coating, ASTM F2329, Class C**] [**Mechanically deposited zinc coating, ASTM B695, Class 50**].

16. Headed Anchor Rods: [**ASTM F1554, Grade 36**] [**ASTM A307, Grade A**].

    a. Configuration: Straight.
    b. Nuts: ASTM A563/A563M, [**heavy-**]hex carbon steel.
    c. Plate Washers: ASTM A36/A36M carbon steel.
    d. Washers: ASTM F436/F436M, hardened carbon steel.
    e. Finish: [**Plain**] [**Hot-dip zinc coating, ASTM F2329, Class C**] [**Mechanically deposited zinc coating, ASTM B695, Class 50**].

17. Threaded Rods: [**ASTM A193/A193M**] [**ASTM A572/A572M, Grade 50 (345)**] [**ASTM A36/A36M**] [**ASTM A307, Grade A**].

    a. Nuts: ASTM A563/A563M, [**heavy-**]hex carbon steel.
    b. Washers: [**ASTM F436/F436M, hardened**] [**ASTM A36/A36M**] carbon steel.
    c. Finish: [**Plain**] [**Hot-dip zinc coating, ASTM F2329, Class C**] [**Mechanically deposited zinc coating, ASTM B695, Class 50**].

K. Finish: Factory primed. Apply specified primer immediately after cleaning and pretreating.

1. Clean and prepare in accordance with SSPC-SP2.
2. Coat with manufacturer's standard primer. Apply primer to primary and secondary framing to a minimum dry film thickness of 1 mil (0.025 mm).

a. Prime secondary framing formed from uncoated steel sheet to a minimum dry film thickness of 0.5 mil (0.013 mm) on each side.

2.5 METAL ROOF PANELS

A. Solar Reflectance Index:

B. Roof Solar Reflectance: Provide roof panels with one of the following when tested in accordance with CRRC-1:

1. Three-year, aged, solar reflectance of not less than [**0.55**] and emissivity of not less than [**0.75**].
2. Three-year, aged, Solar Reflectance Index (SRI) of not less than [**64**] when calculated in accordance with ASTM E1980.

C. Standing-Seam, Vertical-Rib, Metal Roof Panels : Formed with vertical ribs at panel edges and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between ribs; designed for sequential installation by mechanically attaching panels to supports using concealed clips located under one side of panels and engaging opposite edge of adjacent panels.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

   a. Exterior Finish: [**Two-coat fluoropolymer**] [**Three-coat fluoropolymer**] [**Siliconized polyester**].
   b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Clips: [**One-piece fixed**] [**Two-piece floating**] to accommodate thermal movement.
3. Joint Type: [**Panels snapped together**] [**Mechanically seamed**].
4. Panel Coverage: [**16 inches (406 mm)**].
5. Panel Height: [**2 inches (51 mm)**].

D. Standing-Seam, Trapezoidal-Rib, Metal Roof Panels : Formed with raised trapezoidal ribs at panel edges and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between ribs; designed for sequential installation by mechanically attaching panels to supports using concealed clips located under one side of panels and engaging opposite edge of adjacent panels.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

   a. Exterior Finish: [**Two-coat fluoropolymer**] [**Three-coat fluoropolymer**] [**Siliconized polyester**].
   b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Clips: [**One-piece fixed**] [**Two-piece floating**] to accommodate thermal movement.
3. Joint Type: [**Panels snapped together**] [**Mechanically seamed**].
4. Panel Coverage: [**24 inches (610 mm)**].
5. Panel Height: [**3 inches (76 mm)**].
6. Uplift Rating: [**UL 30**] [**UL 60**] [**UL 90**].

E. Exposed Fastener, Tapered-Rib, Metal Roof Panels : Formed with raised, trapezoidal major ribs and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between major ribs; designed to be

installed by lapping side edges of adjacent panels and mechanically attaching panels to supports using exposed fasteners in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Two-coat fluoropolymer**] [**Three-coat fluoropolymer**] [**Siliconized polyester**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Major-Rib Spacing: [**6 inches (152 mm)**] [**12 inches (305 mm)**] o.c.
3. Panel Coverage: [**36 inches (914 mm)**].
4. Panel Height: [**0.75 inch (19 mm)**] [**1.125 inches (29 mm)**] [**1.188 inches (30 mm)**] [**1.25 inches (32 mm)**] [**1.5 inches (38 mm)**].

F. Exposed-Fastener, Tapered-Rib, Metal Liner Panels : Formed with raised, trapezoidal major ribs and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between major ribs; designed to be installed by lapping side edges of adjacent panels and mechanically attaching panels to supports using exposed fasteners in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Two-coat fluoropolymer**] [**Three-coat fluoropolymer**] [**Siliconized polyester**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Major-Rib Spacing: [**6 inches (152 mm)**] [**12 inches (305 mm)**] o.c.
3. Panel Coverage: [**36 inches (914 mm)**].
4. Panel Height: [**1.25 inches (32 mm)**] [**1.5 inches (38 mm)**].

G. Finishes:

1. Exposed Coil-Coated Finish:

    a. Two-Coat Fluoropolymer: Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.
    b. Three-Coat Fluoropolymer: Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in both color coat and clear topcoat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.
    c. Siliconized Polyester: Epoxy primer and silicone-modified, polyester-enamel topcoat; with a minimum dry film thickness of 0.2 mil (0.005 mm) for primer and 0.8 mil (0.02 mm) for topcoat.

2. Concealed Finish: Apply pretreatment and manufacturer's standard white or light-colored acrylic or polyester backer finish, consisting of prime coat and wash coat with a minimum total dry film thickness of 0.5 mil (0.013 mm).

2.6 METAL WALL PANELS

A. Exposed-Fastener, Tapered-Rib, Metal Wall Panels : Formed with raised, trapezoidal major ribs and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between major ribs; designed to be installed by lapping side edges of adjacent panels and mechanically attaching panels to supports using exposed fasteners in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Two-coat fluoropolymer**] [**Three-coat fluoropolymer**] [**Siliconized polyester**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Major-Rib Spacing: [**6 inches (152 mm)**] [**12 inches (305 mm)**] o.c.
3. Panel Coverage: [**36 inches (914 mm)**].
4. Panel Height: [**0.75 inch (19 mm)**] [**1.125 inches (29 mm)**] [**1.188 inches (30 mm)**] [**1.25 inches (32 mm)**] [**1.5 inches (38 mm)**].

B. Exposed-Fastener, Reverse-Rib, Metal Wall Panels : Formed with recessed, trapezoidal major valleys and [**intermediate stiffening valleys symmetrically spaced**] [**flat pan**] between major valleys; designed to be installed by lapping side edges of adjacent panels and mechanically attaching panels to supports using exposed fasteners in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Fluoropolymer**] [**Siliconized polyester**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Major-Rib Spacing: [**12 inches (305 mm)**] o.c.
3. Panel Coverage: [**36 inches (914 mm)**].
4. Panel Height: [**1.125 inches (29 mm)**] [**1.188 inches (30 mm)**] [**1.25 inches (32 mm)**] [**1.5 inches (38 mm)**].

C. Concealed-Fastener, Flush-Profile, Metal Wall Panels : Formed with vertical panel edges and [**a single wide recess, centered between panel edges**] [**flush surface**]; with flush joint between panels; with 1-inch- (25-mm-) wide flange for attaching interior finish; designed to be installed by lapping and interconnecting side edges of adjacent panels and mechanically attaching through panel to supports using concealed fasteners[**and factory-applied sealant**] in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Fluoropolymer**] [**Siliconized polyester**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Panel Coverage: [**16 inches (406 mm)**].
3. Panel Height: [**3 inches (76 mm)**].

D. Tapered-Rib, Metal Liner Panels : Formed with raised, trapezoidal major ribs and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between major ribs; designed to be installed by lapping side edges of adjacent panels and mechanically attaching panels to supports using exposed fasteners in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Siliconized polyester**] [**Acrylic enamel**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Major-Rib Spacing: [**6 inches (152 mm)**] [**12 inches (305 mm)**] o.c.
3. Panel Coverage: [**36 inches (914 mm)**].
4. Panel Height: [**1.25 inches (32 mm)**] [**1.5 inches (38 mm)**].

E. Flush-Profile, Metal Liner Panels: [**Solid**] [**Perforated**] panels formed with vertical panel edges and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between panel edges; with flush joint between panels; designed for interior side of metal wall panel assemblies and installed by lapping and interconnecting side edges of adjacent panels and mechanically attaching through panel to supports using concealed fasteners[**and factory-applied sealant**] in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Siliconized polyester**] [**Polyester**] [**Acrylic enamel**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Sound Absorption: NRC not less than [**0.65**] [**0.85**] [**1.00**] when tested in accordance with ASTM C423.
3. Panel Coverage: [**12 inches (305 mm)**].
4. Panel Height: [**1.5 inches (38 mm)**].

F. Finishes:

1. Exposed Coil-Coated Finish:

    a. Two-Coat Fluoropolymer: Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.
    b. Three-Coat Fluoropolymer: Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in both color coat and clear topcoat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.
    c. Siliconized Polyester: Epoxy primer and silicone-modified, polyester-enamel topcoat; with a minimum dry film thickness of 0.2 mil (0.005 mm) for primer and 0.8 mil (0.02 mm) for topcoat.

2. Concealed Finish: Apply pretreatment and manufacturer's standard white or light-colored acrylic or polyester backer finish, consisting of prime coat and wash coat with a minimum total dry film thickness of 0.5 mil (0.013 mm).

2.7 FOAMED-INSULATION-CORE METAL WALL PANELS

A. Concealed-Fastener, Foamed-Insulation-Core Metal Wall Panels : Formed with tongue-and-groove panel edges; designed for sequential installation by interlocking panel edges and mechanically attaching panels to supports using concealed clips or fasteners.

1. Facing Material: Fabricate panel with exterior and interior facings of same material and thickness. Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

   a. Exterior Surface: [**Smooth, flat**] [**Striated**] [**Shallow ribs**] [**Shallow V grooves**].
   b. Exterior Finish: [**Two-coat fluoropolymer**] [**Three-coat fluoropolymer**] [**Siliconized polyester**].
   c. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Panel Coverage: [**36 inches (914 mm)**] [**42 inches (1067 mm)**] nominal.
3. Panel Thickness: [**2 inches (51 mm)**] [**2.5 inches (64 mm)**] [**3 inches (76 mm)**] [**4 inches (102 mm)**] [**5 inches (127 mm)**] [**6 inches (152 mm)**].
4. Insulation Core: Modified polyisocyanurate or polyurethane foam using a non-CFC blowing agent, foamed-in-place or board type, with maximum flame-spread and smoke-developed indexes of 25 and 450, respectively.

   a. Closed-Cell Content: 90 percent when tested in accordance with ASTM D6226.
   b. Density: 2.0 to 2.6 lb/cu. ft. (32 to 42 kg/cu. m) when tested in accordance with ASTM D1622.
   c. Compressive Strength: Minimum 20 psi (140 kPa) when tested in accordance with ASTM D1621.
   d. Shear Strength: 26 psi (179 kPa) when tested in accordance with ASTM C273/C273M.

5. Fire-Test-Response Characteristics: Class A in accordance with ASTM E108.
6. Surface-Burning Characteristics: Flame-spread index of 25 or less and a smoke-developed index of 450 or less, per ASTM E84.

B. Finishes:

1. Exposed Coil-Coated Finish:

   a. Two-Coat Fluoropolymer: Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.
   b. Three-Coat Fluoropolymer: Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in both color coat and clear topcoat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.
   c. Siliconized Polyester: Epoxy primer and silicone-modified, polyester-enamel topcoat; with a minimum dry film thickness of 0.2 mil (0.005 mm) for primer and 0.8 mil (0.02 mm) for topcoat.

2. Concealed Finish: Apply pretreatment and manufacturer's standard white or light-colored acrylic or polyester backer finish, consisting of prime coat and wash coat with a minimum total dry film thickness of 0.5 mil (0.013 mm).

2.8 METAL SOFFIT PANELS

A. General: Provide factory-formed metal soffit panels designed to be installed by lapping and interconnecting side edges of adjacent panels and mechanically attaching through panel to supports using concealed fasteners[**and factory-applied sealant**] in side laps. Include accessories required for weathertight installation.

B. Metal Soffit Panels: Match profile and material of metal [**roof**] [**wall**] panels.

1. Finish: [**Match finish and color of metal roof panels**] [**Match finish and color of metal wall panels**] [**As indicated on Drawings**].

C. Exposed-Fastener, Tapered-Rib-Profile, Metal Soffit Panels : Formed with raised, trapezoidal major ribs and [**intermediate stiffening ribs symmetrically spaced**] [**flat pan**] between major ribs; designed to be installed by lapping side edges of adjacent panels and mechanically attaching panels to supports using exposed fasteners in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Two-coat fluoropolymer**] [**Three-coat fluoropolymer**] [**Siliconized polyester**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Major-Rib Spacing: [**6 inches (152 mm)**] [**12 inches (305 mm)**] o.c.
3. Panel Coverage: [**36 inches (914 mm)**].
4. Panel Height: [**0.75 inch (19 mm)**] [**1.125 inches (29 mm)**] [**1.188 inches (30 mm)**] [**1.25 inches (32 mm)**] [**1.5 inches (38 mm)**].

D. Concealed-Fastener, Flush-Profile, Metal Soffit Panels : Formed with vertical panel edges and [**a single wide recess, centered between panel edges**] [**flush surface**]; with flush joint between panels; with 1-inch- (25-mm-) wide flange for attaching interior finish; designed to be installed by lapping and interconnecting side edges of adjacent panels and mechanically attaching through panel to supports using concealed fasteners[**and factory-applied sealant**] in side laps.

1. Material: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.024-inch (0.61-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness. Prepainted by the coil-coating process to comply with ASTM A755/A755M.

    a. Exterior Finish: [**Fluoropolymer**] [**Siliconized polyester**].
    b. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2. Panel Coverage: [**12 inches (305 mm)**] [**16 inches (406 mm)**].
3. Panel Height: [**1 inch (25 mm)**] [**1.5 inches (38 mm)**].

2.9 THERMAL INSULATION

A. Faced Metal Building Insulation: ASTM C991, Type II, glass-fiber-blanket insulation; 0.5-lb/cu. ft. (8-kg/cu. m) density; 2-inch- (51-mm-) wide, continuous, vapor-tight edge tabs; with a flame-spread index of 25 or less.

B. Unfaced Metal Building Insulation: ASTM C991, Type I, or NAIMA 202, glass-fiber-blanket insulation; 0.5-lb/cu. ft. (8-kg/cu. m) density; 2-inch- (51-mm-) wide, continuous, vapor-tight edge tabs; with a flame-spread index of 25 or less.

C. Mineral-Fiber-Blanket Insulation: ASTM C665, type indicated below; consisting of fibers manufactured from glass, slag wool, or rock wool.

1. Nonreflective Faced: Type II (blankets with nonreflective membrane covering), Category 1 (membrane is a vapor retarder), Class A (membrane-faced surface with a flame-spread index of 25 or less).
2. Reflective Faced: Type III (blankets with reflective membrane covering), Category 1 (membrane is a vapor retarder), Class A (membrane-faced surface with a flame-spread index of 25 or less).
3. Unfaced: Type I (blankets without membrane covering), passing ASTM E136 for combustion characteristics.

D. Faced, Polyisocyanurate Board Insulation: ASTM C1289, Type I (foil facing), Class 2, with maximum flame-spread and smoke-developed indexes of 75 and 450, respectively, based on tests performed on unfaced core. Provide units tested for interior exposure without an approved thermal barrier.

E. Retainer Strips: For securing insulation between supports, 0.025-inch (0.64-mm) nominal-thickness, formed, metallic-coated steel or PVC retainer clips colored to match insulation facing.

F. Vapor-Retarder Facing: ASTM C1136, with permeance not greater than 0.02 perm (1.15 ng/Pa x s x sq. m) when tested in accordance with ASTM E96/E96M, Desiccant Method.
1. Composition:

a. White metallized-polypropylene film facing, fiberglass scrim reinforcement, and kraft-paper backing.
b. Aluminum foil facing, elastomeric barrier coating, fiberglass scrim reinforcement, and kraft-paper backing.
c. White [**polypropylene**] [**vinyl**] film facing, fiberglass scrim reinforcement, and metallized-polyester film backing.
d. White polypropylene film facing and fiberglass-polyester-blend fabric backing.

G. Vapor-Retarder Tape: Pressure-sensitive tape of type recommended by vapor-retarder manufacturer for sealing joints and penetrations in vapor retarder.

2.10 PERSONNEL DOORS AND FRAMES

A. Swinging Personnel Doors and Frames:

1. As specified in Section 081113 "Hollow Metal Doors and Frames."
2. Metal building system manufacturer's standard doors and frames; prepared and reinforced at strike and at hinges to receive factory- and field-applied hardware in accordance with BHMA A156 Series.

a. Steel Doors: 1-3/4 inches (44.5 mm) thick; fabricated from metallic-coated steel face sheets, 0.036-inch (0.91-mm) nominal uncoated steel thickness, of [**seamed**] [**seamless**], hollow-metal construction; with 0.060-inch (1.52-mm) nominal uncoated steel thickness, inverted metallic-coated steel channels welded to face sheets at top and bottom of door.

1) Design: [**Flush panel**] [**As indicated on Drawings**].
2) Core:

a) Kraft honeycomb with U-factor rating of at least 0.47 Btu/sq. ft. x h x deg F (2.67 W/sq. m x K).
b) Polystyrene foam with U-factor rating of at least 0.16 Btu/sq. ft. x h x deg F (0.91 W/sq. m x K).
c) Polyurethane foam with U-factor rating of at least 0.07 Btu/sq. ft. x h x deg F (0.40 W/sq. m x K).

3) Glazing Frames: Steel frames to receive field-installed glass.
4) Glazing: As specified in Section 088000 "Glazing."

b. Steel Frames: Fabricate 2-inch- (51-mm-) wide face frames from zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.060-inch (1.52-mm) nominal uncoated steel thickness.

1) Type: [**Knocked down for field assembly**] [**Factory welded**].

c. Fabricate concealed stiffeners, reinforcement, edge channels, and moldings from either cold- or hot-rolled steel sheet.
d. Hardware:

1) Provide hardware for each door leaf, as follows:

a) Hinges: BHMA A156.1. Three [**plain**] [**antifriction**]-bearing, standard-weight, full-mortise, stainless steel or bronze, template-type hinges; 4-1/2 by 4-1/2 inches (114 by 114 mm), with nonremovable pin.
b) Lockset: BHMA A156.2. [**Key-in-lever cylindrical**] [**Mortise, with lever handle**] type.
c) Exit Device: BHMA A156.3. Touch- or push-bar type.
d) Threshold: BHMA A156.21. Extruded aluminum.
e) Silencers: Pneumatic rubber; three silencers on strike jambs of single door frames and two silencers on heads of double door frames.
f) Closer: BHMA A156.4. Surface-applied, standard-duty hydraulic type.
g) Weather Stripping: Vinyl applied to head and jambs, with vinyl sweep at sill.

2) Provide each pair of double doors with the following hardware in addition to that specified for each leaf:

a) Astragal: Removable type.
b) Surface Bolts: Top and bottom of inactive door.

e. Anchors and Accessories: Manufacturer's standard units, galvanized in accordance with ASTM A123/A123M.
f. Fabrication: Fabricate doors and frames to be rigid; neat in appearance; and free from defects, warp, or buckle. Provide continuous welds on exposed joints; grind, dress, and make welds smooth, flush, and invisible.

B. Materials:

1. Cold-Rolled Steel Sheet: ASTM A1008/A1008M, Commercial Steel (CS), Type B, suitable for exposed applications.
2. Hot-Rolled Steel Sheet: ASTM A1011/A1011M, CS, Type B; free of scale, pitting, or surface defects; pickled and oiled.
3. Metallic-Coated Steel Sheet: ASTM A653/A653M, CS, Type B; with G60 (Z180) zinc (galvanized) or A60 (ZF180) zinc-iron-alloy (galvannealed) coating designation.

C. Finishes for Personnel Doors and Frames:

1. Prime Finish: Factory-apply manufacturer's standard primer immediately after cleaning and pretreating.

a. Shop Primer: Manufacturer's standard, fast-curing, lead- and chromate-free primer complying with SDI A250.10 acceptance criteria; recommended by primer manufacturer for substrate; compatible with substrate and field-applied coatings despite prolonged exposure.

2. Factory-Applied Paint Finish: Manufacturer's standard, complying with SDI A250.3 for performance and acceptance criteria.

a. Color and Gloss: [**As indicated by manufacturer's designations**] [**Match Architect's sample**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.11 HORIZONTAL SLIDING DOORS

A. Horizontal-Sliding Doors: Manufacturer's standard horizontal-sliding door assembly including structural frame, door panels, brackets, guides, tracks, hardware, and installation accessories.

1. Door Frames: Channels and zees; metallic-coated steel sheet or structural-steel shapes, 0.060-inch (1.52-mm) nominal uncoated steel thickness.
2. Door Panels: Same material and finish as metal wall panels.
3. Hardware: Manufacturer's standard metallic-coated steel track, bottom guides, lock angles for side closure, and brackets. Support each door leaf by two four-wheel trolleys. Provide metallic-coated steel handle for each leaf, and slide bolt or padlock hasp. Flash top of track with metallic-coated steel sheet hood.

2.12 WINDOWS

A. Aluminum Windows:

1. As specified in Section 085113 "Aluminum Windows."
2. Metal building system manufacturer's standard, with self-flashing mounting fins, and as follows:

a. Type, Performance Class, and Performance Grade: Comply with AAMA/WDMA/CSA 101/I.S.2/A440 and as follows:

1) Horizontal-Sliding Units: [**HS-LC25**] [**HS-CW30**].
2) Single-Hung Units: [**H-LC25**] [**H-CW30**].
3) Fixed Units: [**FW-LC25**] [**FW-CW30**] [**FW-AW40**].

b. Aluminum Extrusions: ASTM B221 (ASTM B221M), alloy and temper recommended by manufacturer for strength, corrosion resistance, and application of required finish, but not less than 0.064-inch (1.63-mm) thickness at any location for main frame and sash members.

1) Thermally Improved Construction: Fabricate window units with an integral, concealed, low-conductance thermal barrier; located between exterior materials and window members exposed on interior side; in a manner that eliminates direct metal-to-metal contact.

c. Mullions: Between adjacent windows, fabricated of extruded aluminum matching finish of window units.
d. Fasteners, Anchors, and Clips: Nonmagnetic stainless steel, aluminum, or other noncorrosive material, compatible with aluminum window members, trim, hardware, anchors, and other components of window units. Fasteners are not to be exposed, except for attaching hardware.

1) Reinforcement: Where fasteners screw-anchor into aluminum less than 0.128 inch (3.26 mm) thick, reinforce interior with aluminum or nonmagnetic stainless steel to receive screw threads, or provide standard, noncorrosive, pressed-in, spline grommet nuts.

e. Hardware: Manufacturer's standard; of aluminum, stainless steel, die-cast steel, malleable iron, or bronze; including the following:

1) Cam-action sweep sash lock and keeper at meeting rails.
2) Spring-loaded, snap-type lock at jambs.
3) Pole-operated, cam-action locking device on meeting rail where rail is more than 72 inches (1830 mm) above floor.
4) Lift handles for single-hung units.
5) Nylon sash rollers for horizontal-sliding units.
6) Steel or bronze operating arms.

f. Sliding-Type Weather Stripping: Woven-pile weather stripping of wool, polypropylene, or nylon pile and resin-impregnated backing fabric; complying with AAMA 701/702.
g. Insect Screens: Provide removable insect screen on each operable exterior sash, with screen frame finished to match window unit, and as follows:

1) Aluminum Wire Fabric: 18-by-18 (1.1-by-1.1-mm), 18-by-16 (1.1-by-1.3-mm), or 18-by-14 (1.1-by-1.5-mm) mesh of 0.013-inch- (0.3-mm-) diameter, coated aluminum wire.
2) Glass-Fiber Mesh Fabric: 18-by-16 (1.1-by-1.3-mm) or 18-by-14 (1.1-by-1.5-mm) mesh of PVC-coated, glass-fiber threads, woven and fused to form a fabric mesh; complying with ASTM D3656/D3656M.
3) Fabric: Manufacturer's standard aluminum wire fabric or glass-fiber mesh fabric.

B. Glazing: Comply with requirements specified in Section 088000 "Glazing."

1. Float Glass: ASTM C1036, Type I, Quality-Q3, Class I (clear), 3 mm thick.
2. Heat-Treated Float Glass: ASTM C1048, Type I, Quality-Q3, Class I (clear), Condition A, 3 mm thick.
3. Tinted Float Glass: ASTM C1036, Type I, Quality-Q3, Class 2, 3 mm thick.

a. Tint Color: [**Blue**] [**Blue-green**] [**Bronze**] [**Green**] [**Gray**] [**Manufacturer's standard color**].

4. Patterned Glass: ASTM C1036, Type II, Quality-Q6, Class 1 (clear), Form 3, Pattern P3 (random), 3 mm thick.
5. Insulating-Glass Units: Factory-assembled units consisting of sealed lites of 2.5-mm-thick clear float glass separated by a dehydrated interspace, qualified in accordance with ASTM E2190.
6. Safety Glass: Category II materials complying with testing requirements in 16 CFR 1201.

a. Provide safety glazing labeling.

7. Glazing Stops: Screw-applied or snap-on glazing stops coordinated with Section 088000 "Glazing" and with glazing system indicated. Match material and finish of window frames.

8. Factory-Glazed Fabrication: Glaze window units in the factory to greatest extent possible and practical for applications indicated. Comply with requirements in Section 088000 "Glazing."

C. Finish:

1. Mill finish.
2. Baked-Enamel Finish, Organic Coating: Thermosetting, modified-acrylic enamel primer/topcoat system complying with AAMA 2603 except with a minimum dry film thickness of 0.7 mil (0.02 mm), medium gloss.

a. Color: [**As indicated by manufacturer's designations**] [**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.13 TRANSLUCENT PANELS

A. Uninsulated Translucent Panels: Glass-fiber-reinforced polyester, translucent plastic; complying with ASTM D3841, [**Type CC2 (general purpose)**] [**Type CC1 (limited flammability)**], Grade 1 (weather resistant); smooth finish on both sides. Match profile of adjacent metal panels.

1. Roof Panel Weight: Not less than 8 oz./sq. ft. (2441 g/sq. m).
2. Wall Panel Weight: Not less than 6 oz./sq. ft. (1831 g/sq. m).
3. Light Transmittance: Not less than [**55**] percent in accordance with ASTM D1494.
4. Metal Edge: Fabricate full length of each side of panel with metal edge for seaming into standing-seam roof panel joint.
5. Color: [**White**].

B. Insulated Translucent Panels: Fabricate insulating units of two sheets of glass-fiber-reinforced polyester, translucent plastic separated by an air space; complying with ASTM D3841, Type CC1 (limited flammability), Grade 1 (weather resistant); smooth finish on both sides. Match profile of adjacent metal panels.

1. Exterior Panel Weight: Not less than [**8 oz./sq. ft. (2441 g/sq. m)**] [**6 oz./sq. ft. (1831 g/sq. m)**].
2. Interior Panel Weight: Not less than [**8 oz./sq. ft. (2441 g/sq. m)**] [**6 oz./sq. ft. (1831 g/sq. m)**] [**4 oz./sq. ft. (1221 g/sq. m)**].
3. Light Transmittance: Not less than [**42**] percent in accordance with ASTM D1494.
4. Metal Edge: Fabricate full length of each side of panel with metal edge for seaming into standing-seam roof panel joint.
5. Color: [**White**].

C. Mastic for Translucent Panels: Nonstaining, saturated vinyl polymer as recommended by translucent panel manufacturer for sealing laps.

D. Performance:

1. Surface-Burning Characteristics: As determined by testing identical products in accordance with ASTM E84 by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

a. Flame-Spread Index: [**25**] or less.
b. Smoke-Developed Index: [**450**] or less.

2.14 ACCESSORIES

A. General: Provide accessories as standard with metal building system manufacturer and as specified. Fabricate and finish accessories at the factory to greatest extent possible, by manufacturer's standard procedures and processes. Comply with indicated profiles and with dimensional and structural requirements.

1. Form exposed sheet metal accessories that are without excessive oil-canning, buckling, and tool marks and that are true to line and levels indicated, with exposed edges folded back to form hems.

B. Roof Panel Accessories: Provide components required for a complete metal roof panel assembly including copings, fasciae, corner units, ridge closures, clips, sealants, gaskets, fillers, closure strips, and similar items. Match material and finish of metal roof panels unless otherwise indicated.

1. Closures: Provide closures at eaves and ridges, fabricated of same material as metal roof panels.
2. Clips: Manufacturer's standard, formed from [**steel**] [**stainless steel**] sheet, designed to withstand negative-load requirements.
3. Cleats: Manufacturer's standard, mechanically seamed cleats formed from [**steel**] [**stainless steel sheet or nylon-coated aluminum**] sheet.
4. Backing Plates: Provide metal backing plates at panel end splices, fabricated from material recommended by manufacturer.
5. Closure Strips: Closed-cell, expanded, cellular, rubber or crosslinked, polyolefin-foam or closed-cell laminated polyethylene; minimum 1-inch- (25-mm-) thick, flexible closure strips; cut or premolded to match metal roof panel profile. Provide closure strips where indicated or necessary to ensure weathertight construction.
6. Thermal Spacer Blocks: Where metal panels attach directly to purlins, provide thermal spacer blocks of thickness required to provide 1-inch (25-mm) standoff; fabricated from extruded polystyrene.

C. Wall Panel Accessories: Provide components required for a complete metal wall panel assembly including copings, fasciae, mullions, sills, corner units, clips, sealants, gaskets, fillers, closure strips, and similar items. Match material and finish of metal wall panels unless otherwise indicated.

1. Closures: Provide closures at eaves and rakes, fabricated of same material as metal wall panels.
2. Backing Plates: Provide metal backing plates at panel end splices, fabricated from material recommended by manufacturer.
3. Closure Strips: Closed-cell, expanded, cellular, rubber or crosslinked, polyolefin-foam or closed-cell laminated polyethylene; minimum 1-inch- (25-mm-) thick, flexible closure strips; cut or premolded to match metal wall panel profile. Provide closure strips where indicated or necessary to ensure weathertight construction.

D. Flashing and Trim: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.018-inch (0.46-mm) nominal uncoated steel thickness, prepainted with coil coating; finished to match adjacent metal panels.

1. Provide flashing and trim as required to seal against weather and to provide finished appearance. Locations include, but are not limited to, eaves, rakes, corners, bases, framed openings, ridges, fasciae, and fillers.
2. Opening Trim: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, [**0.018-inch (0.46-mm)**] [**0.030-inch (0.76-mm)**] nominal uncoated steel thickness, prepainted with coil coating. Trim head and jamb of door openings, and head, jamb, and sill of other openings.

E. Gutters: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.018-inch (0.46-mm) nominal uncoated steel thickness, prepainted with coil coating; finished to match roof fascia and rake

trim. Match profile of gable trim, complete with end pieces, outlet tubes, and other special pieces as required. Fabricate in minimum 96-inch- (2438-mm-) long sections, sized in accordance with manufacturer's written instructions.

1. Gutter Supports: Fabricated from same material and finish as gutters.
2. Strainers: Bronze, copper, or aluminum wire ball type at outlets.

F. Downspouts: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.018-inch (0.46-mm) nominal uncoated steel thickness, prepainted with coil coating; finished to match metal wall panels. Fabricate in minimum 10-ft.- (3-m-) long sections, complete with formed elbows and offsets.

1. Mounting Straps: Fabricated from same material and finish as gutters.

G. Service Walkways: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.048-inch (1.21-mm) nominal uncoated steel thickness, steel plank grating; with slip-resistant pattern; [**18-inch (457-mm)**] [**24-inch (610-mm)**] [**36-inch (914-mm)**] overall width. Support walkways on framing system anchored to metal roof panels without penetrating panels; with predrilled holes and clamps or hooks for anchoring.

H. Roof Ventilators: Gravity type, complete with hardware, flashing, closures, and fittings.

1. Circular-Revolving Type: Minimum [**20-inch- (508-mm-)**] diameter throat opening; zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.024-inch (0.61-mm) nominal uncoated steel thickness, with coil coating; finished to match metal roof panels; with matching base and rain cap.

    a. Type: [**Directional**] [**Stationary**] revolving.
    b. Bird Screening: Galvanized steel, 1/2-inch- (13-mm-) square mesh, 0.041-inch (1.04-mm) wire; or aluminum, 1/2-inch- (13-mm-) square mesh, 0.063-inch (1.6-mm) wire.
    c. Dampers: Spring-loaded, butterfly type; pull-chain operation; with pull chain of length required to reach within 36 inches (914 mm) of floor.
    d. Reinforce and brace units, with joints properly formed and edges beaded to be watertight under normal positive-pressure conditions.
    e. Mount ventilators on square-to-round bases for ridge or on-slope mounting, designed to match roof pitch and roll formed to match metal roof panel profile.

2. Continuous or Sectional-Ridge Type: Factory-engineered and -fabricated, continuous unit; Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.018-inch (0.46-mm) nominal uncoated steel thickness, prepainted with coil coating; finished to match metal roof panels. Fabricated in minimum 10-ft.- (3-m-) long sections. Provide throat size and total length indicated, complete with side baffles, ventilator assembly, end caps, splice plates, and reinforcing diaphragms.

    a. Bird Screening: Galvanized steel, 1/2-inch- (13-mm-) square mesh, 0.041-inch (1.04-mm) wire; or aluminum, 1/2-inch- (13-mm-) square mesh, 0.063-inch (1.6-mm) wire.
    b. Dampers: Manually operated, spring-loaded, vertically rising type; chain and worm gear operator; with pull chain of length required to reach within 36 inches (914 mm) of floor.
    c. Throat Size: [9 inches (229 mm)] [12 inches (305 mm)][as standard with manufacturer, and as required to comply with ventilation requirements].

I. Louvers: Size and design indicated; self-framing and self-flashing. Fabricate welded frames from zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.048-inch (1.21-mm) nominal uncoated steel thickness; finished to match metal wall panels. Form blades from zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.036-inch (0.91-mm) nominal uncoated steel thickness; folded or beaded at edges, set at an angle that excludes driving rains, and secured to frames by riveting or welding. Fabricate louvers with equal blade spacing to produce uniform appearance.

1. Blades:

    a. Fixed.
    b. Adjustable type, with weather-stripped edges, and manually operated by hand crank or pull chain.

2. Free Area: Not less than [**7.0 sq. ft. (0.65 sq. m)**] for 48-inch- (1220-mm-) wide by 48-inch- (1220-mm-) high louver.
3. Bird Screening: Galvanized steel, 1/2-inch- (13-mm-) square mesh, 0.041-inch (1.04-mm) wire; with rewirable frames, removable and secured with clips; fabricated of same kind and form of metal and with same finish as louvers.

    a. Mounting: [**Interior**] [**Exterior**] face of louvers.

4. Vertical Mullions: Provide mullions at spacings recommended by manufacturer, or 72 inches (1830 mm) o.c., whichever is less.

J. Roof Curbs: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.048-inch (1.21-mm) nominal uncoated steel thickness prepainted with coil coating; finished to match metal roof panels; with welded top box and bottom skirt, and integral full-length cricket; capable of withstanding loads of size and height indicated.

1. Curb Subframing: Zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.060-inch (1.52-mm) nominal uncoated steel thickness, angle-, C-, or Z-shaped metallic-coated steel sheet.
2. Insulation: 1-inch- (25-mm-) thick, rigid type.

K. Pipe Flashing: Premolded, EPDM pipe collar with flexible aluminum ring bonded to base.

L. Materials:

1. Fasteners: Self-tapping screws, bolts, nuts, self-locking rivets and bolts, end-welded studs, and other suitable fasteners designed to withstand design loads. Provide fasteners with heads matching color of materials being fastened by means of plastic caps or factory-applied coating.
2. Fasteners for Metal Roof Panels:

    a. Self-drilling or self-tapping, zinc-plated, hex-head carbon-steel screws, with a stainless steel cap or zinc-aluminum-alloy head and EPDM sealing washer.
    b. Self-drilling, Type 410 stainless steel or self-tapping, Type 304 stainless steel or zinc-alloy-steel hex washer head, with EPDM washer under heads of fasteners bearing on weather side of metal panels.

3. Fasteners for Metal Wall Panels:

    a. Self-drilling or self-tapping, zinc-plated, hex-head carbon-steel screws[with EPDM sealing washers bearing on weather side of metal panels].
    b. Self-drilling, Type 410 stainless steel or self-tapping, Type 304 stainless steel or zinc-alloy-steel hex washer head[with EPDM sealing washers bearing on weather side of metal panels].

4. Fasteners for Flashing and Trim: Blind fasteners or self-drilling screws with hex washer head.
5. Blind Fasteners: High-strength aluminum or stainless steel rivets.
6. Corrosion-Resistant Coating: Cold-applied asphalt mastic, compounded for 15-mil (0.4-mm) dry film thickness per coat. Provide inert-type noncorrosive compound free of asbestos fibers, sulfur components, and other deleterious impurities.

7. Nonmetallic, Shrinkage-Resistant Grout: ASTM C1107/C1107M, factory-packaged, nonmetallic aggregate grout, noncorrosive, nonstaining, mixed with water to consistency suitable for application and a 30-minute working time.
8. Metal Panel Sealants:

    a. Sealant Tape: Pressure-sensitive, 100 percent solids, gray polyisobutylene-compound sealant tape with release-paper backing. Provide permanently elastic, nonsag, nontoxic, nonstaining tape of manufacturer's standard size.
    b. Joint Sealant: ASTM C920; one part elastomeric polyurethane or polysulfide; of type, grade, class, and use classifications required to seal joints in metal panels and remain weathertight; and as recommended by metal building system manufacturer.

2.15 FABRICATION

A. General: Design components and field connections required for erection to permit easy assembly.

1. Mark each piece and part of the assembly to correspond with previously prepared erection drawings, diagrams, and instruction manuals.
2. Fabricate structural framing to produce clean, smooth cuts and bends. Punch holes of proper size, shape, and location. Members to be free of cracks, tears, and ruptures.

B. Tolerances: Comply with MBMA's "Metal Building Systems Manual" for fabrication and erection tolerances.

C. Primary Framing: Shop fabricate framing components to indicated size and section, with baseplates, bearing plates, stiffeners, and other items required for erection welded into place. Cut, form, punch, drill, and weld framing for bolted field assembly.

1. Make shop connections by welding or by using high-strength bolts.
2. Join flanges to webs of built-up members by a continuous, submerged arc-welding process.
3. Brace compression flange of primary framing with steel angles or cold-formed structural tubing between frame web and purlin web or girt web, so flange compressive strength is within allowable limits for any combination of loadings.
4. Weld clips to frames for attaching secondary framing if applicable, or punch for bolts.
5. Shop Priming: Prepare surfaces for shop priming in accordance with SSPC-SP 2. Shop prime primary framing with specified primer after fabrication.

D. Secondary Framing: Shop fabricate framing components to indicated size and section by roll forming or break forming, with baseplates, bearing plates, stiffeners, and other plates required for erection welded into place. Cut, form, punch, drill, and weld secondary framing for bolted field connections to primary framing.

1. Make shop connections by welding or by using non-high-strength bolts.
2. Shop Priming: Prepare uncoated surfaces for shop priming in accordance with SSPC-SP 2. Shop prime uncoated secondary framing with specified primer after fabrication.

E. Metal Panels: Fabricate and finish metal panels at the factory to greatest extent possible, by manufacturer's standard procedures and processes, as necessary to fulfill indicated performance requirements. Comply with indicated profiles and with dimensional and structural requirements.

1. Provide panel profile, including major ribs and intermediate stiffening ribs, if any, for full length of metal panel.

2.16 SOURCE QUALITY CONTROL

A. Special Inspection: the Owner will engage a qualified special inspector to perform source quality control inspections and to submit reports.

1. Accredited Manufacturers: Special inspections will not be required if fabrication is performed by an IAS AC472-accredited manufacturer approved by authorities having jurisdiction to perform such Work without special inspection.

a. After fabrication, submit copy of certificate of compliance to authorities having jurisdiction, certifying that Work was performed in accordance with Contract requirements.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with erector present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Before erection proceeds, survey elevations and locations of concrete- and masonry-bearing surfaces and locations of anchor rods, bearing plates, and other embedments to receive structural framing, with erector present, for compliance with requirements and metal building system manufacturer's tolerances.

1. Engage land surveyor to perform surveying.

C. Proceed with erection only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Clean and prepare surfaces to be painted in accordance with manufacturer's written instructions for each particular substrate condition.

B. Provide temporary shores, guys, braces, and other supports during erection to keep structural framing secure, plumb, and in alignment against temporary construction loads and loads equal in intensity to design loads. Remove temporary supports when permanent structural framing, connections, and bracing are in place unless otherwise indicated.

3.3 ERECTION OF STRUCTURAL FRAMING

A. Erect metal building system in accordance with manufacturer's written instructions and erection drawings.

B. Do not field cut, drill, or alter structural members without written approval from metal building system manufacturer's professional engineer.

C. Set structural framing accurately in locations and to elevations indicated, in accordance with AISC specifications referenced in this Section. Maintain structural stability of frame during erection.

D. Base and Bearing Plates: Clean concrete- and masonry-bearing surfaces of bond-reducing materials, and roughen surfaces prior to setting plates. Clean bottom surface of plates.

1. Set plates for structural members on wedges, shims, or setting nuts as required.
2. Tighten anchor rods after supported members have been positioned and plumbed. Do not remove wedges or shims but, if protruding, cut off flush with edge of plate before packing with grout.
3. Promptly pack grout solidly between bearing surfaces and plates so no voids remain. Neatly finish exposed surfaces; protect grout and allow to cure. Comply with manufacturer's written installation instructions for shrinkage-resistant grouts.

E. Align and adjust structural framing before permanently fastening. Before assembly, clean bearing surfaces and other surfaces that will be in permanent contact with framing. Perform necessary adjustments to compensate for discrepancies in elevations and alignment.

1. Level and plumb individual members of structure.
2. Make allowances for difference between temperature at time of erection and mean temperature when structure will be completed and in service.

F. Primary Framing and End Walls: Erect framing level, plumb, rigid, secure, and true to line. Level baseplates to a true even plane with full bearing to supporting structures, set with double-nutted anchor bolts. Use grout to obtain uniform bearing and to maintain a level base-line elevation. Moist-cure grout for not less than seven days after placement.

1. Make field connections using high-strength bolts installed in accordance with RCSC's "Specification for Structural Joints Using High-Strength Bolts" for bolt type and joint type specified.

    a. Joint Type: Snug tightened or pretensioned as required by manufacturer.

G. Secondary Framing: Erect framing level, plumb, rigid, secure, and true to line. Field bolt secondary framing to clips attached to primary framing.

1. Provide rake or gable purlins with tight-fitting closure channels and fasciae.
2. Locate and space wall girts to suit openings such as doors and windows.
3. Provide supplemental framing at entire perimeter of openings, including doors, windows, louvers, ventilators, and other penetrations of roof and walls.

H. Steel Joists and Joist Girders: Install joists[girders,] and accessories plumb, square, and true to line; securely fasten to supporting construction in accordance with SJI's "Standard Specifications, Load Tables, and Weight Tables for Steel Joists and Joist Girders," joist manufacturer's written instructions, and requirements in this Section.

1. Before installation, splice joists delivered to Project site in more than one piece.
2. Space, adjust, and align joists accurately in location before permanently fastening.
3. Install temporary bracing and erection bridging, connections, and anchors to ensure that joists are stabilized during construction.
4. Joint Installation:

    a. Bolt joists to supporting steel framework using carbon-steel bolts unless otherwise indicated.
    b. Bolt joists to supporting steel framework using high-strength structural bolts unless otherwise indicated. Comply with RCSC's "Specification for Structural Joints Using High-Strength Bolts" for high-strength structural bolt installation and tightening requirements.
    c. Weld joist seats to supporting steel framework.

5. Install and connect bridging concurrently with joist erection, before construction loads are applied. Anchor ends of bridging lines at top and bottom chords if terminating at walls or beams.

I. Bracing: Install bracing in roof and sidewalls where indicated on erection drawings.

1. Tighten rod and cable bracing to avoid sag.
2. Locate interior end-bay bracing only where indicated.

J. Framing for Openings: Provide shapes of proper design and size to reinforce openings and to carry loads and vibrations imposed, including equipment furnished under mechanical and electrical work. Securely attach to structural framing.

K. Erection Tolerances: Maintain erection tolerances of structural framing within AISC 303.

3.4 INSTALLATION OF METAL PANELS, GENERAL

A. Fabricate and finish metal panels and accessories at the factory, by manufacturer's standard procedures and processes, as necessary to fulfill indicated performance requirements demonstrated by laboratory testing. Comply with indicated profiles and with dimensional and structural requirements.

B. On-Site Fabrication: Subject to compliance with requirements of this Section, metal panels may be fabricated on-site using UL-certified, portable roll-forming equipment if panels are of same profile and warranted by manufacturer to be equal to factory-formed panels. Fabricate in accordance with equipment manufacturer's written instructions and to comply with details shown.

C. Examination: Examine primary and secondary framing to verify that structural-panel support members and anchorages have been installed within alignment tolerances required by manufacturer.

1. Examine roughing-in for components and systems penetrating metal panels, to verify actual locations of penetrations relative to seams before metal panel installation.

D. General: Anchor metal panels and other components of the Work securely in place, with provisions for thermal and structural movement.

1. Field cut metal panels as required for doors, windows, and other openings. Cut openings as small as possible, neatly to size required, and without damage to adjacent metal panel finishes.

a. Field cutting of metal panels by torch is not permitted unless approved in writing by manufacturer.

2. Install metal panels perpendicular to structural supports unless otherwise indicated.
3. Flash and seal metal panels with weather closures at perimeter of openings and similar elements. Fasten with self-tapping screws.
4. Locate and space fastenings in uniform vertical and horizontal alignment.
5. Locate metal panel splices over structural supports with end laps in alignment.
6. Lap metal flashing over metal panels to allow moisture to run over and off the material.

E. Lap-Seam Metal Panels: Install screw fasteners using power tools with controlled torque adjusted to compress EPDM washers tightly without damage to washers, screw threads, or metal panels. Install screws in predrilled holes.

1. Arrange and nest side-lap joints so prevailing winds blow over, not into, lapped joints. Lap ribbed or fluted sheets one full rib corrugation. Apply metal panels and associated items for neat and weathertight enclosure. Avoid "panel creep" or application not true to line.

F. Metal Protection: Where dissimilar metals contact each other or corrosive substrates, protect against galvanic action by painting contact surfaces with corrosion-resistant coating, by applying rubberized-asphalt underlayment to each contact surface, or by other permanent separation as recommended by metal roof panel manufacturer.

G. Joint Sealers: Install gaskets, joint fillers, and sealants where indicated and where required for weatherproof performance of metal panel assemblies. Provide types of gaskets, fillers, and sealants indicated; or, if not indicated, provide types used in tested assemblies meeting "Performance Requirements" Article.

1. Seal metal panel end laps with double beads of tape or sealant the full width of panel. Seal side joints where recommended by metal panel manufacturer.
2. Prepare joints and apply sealants to comply with requirements in Section 079200 "Joint Sealants."

3.5 INSTALLATION OF METAL ROOF PANELS

A. General: Provide metal roof panels of full length from eave to ridge unless otherwise indicated or restricted by shipping limitations.

1. Install ridge[**and hip**] caps as metal roof panel work proceeds.
2. Flash and seal metal roof panels with weather closures at eaves and rakes. Fasten with self-tapping screws.

B. Standing-Seam Metal Roof Panels: Fasten metal roof panels to supports with concealed clips at each standing-seam joint, at location and spacing and with fasteners recommended by manufacturer.

1. Install clips to supports with self-drilling or self-tapping fasteners.
2. Install pressure plates at locations indicated in manufacturer's written installation instructions.
3. Snap Joint: Nest standing seams and fasten together by interlocking and completely engaging factory-applied sealant.
4. Seamed Joint: Crimp standing seams with manufacturer-approved motorized seamer tool so that clip, metal roof panel, and factory-applied sealant are completely engaged.
5. Rigidly fasten eave end of metal roof panels and allow ridge end free movement for thermal expansion and contraction. Predrill panels for fasteners.
6. Provide metal closures at [**peaks**] [**rake edges**] [**rake walls**] [**and**] each side of ridge[**and hip**] caps.

C. Lap-Seam Metal Roof Panels: Fasten metal roof panels to supports with exposed fasteners at each lapped joint, at location and spacing recommended by manufacturer.

1. Provide metal-backed sealing washers under heads of exposed fasteners bearing on weather side of metal roof panels.
2. Provide sealant tape at lapped joints of metal roof panels and between panels and protruding equipment, vents, and accessories.
3. Apply a continuous ribbon of sealant tape to weather-side surface of fastenings on end laps and on side laps of nesting-type metal panels, on side laps of ribbed or fluted metal panels, and elsewhere as needed to make metal panels weatherproof to driving rains.
4. At metal panel splices, nest panels with minimum 6-inch (152-mm) end lap, sealed with butyl-rubber sealant and fastened together by interlocking clamping plates.

D. Metal Fascia Panels: Align bottom of metal panels and fasten with blind rivets, bolts, or self-drilling or self-tapping screws. Flash and seal metal panels with weather closures where fasciae meet soffits, along lower panel edges, and at perimeter of all openings.

E. Metal Roof Panel Installation Tolerances: Shim and align metal roof panels within installed tolerance of 1/4 inch in 20 ft. (6 mm in 6 m) on slope and location lines and within 1/8-inch (3-mm) offset of adjoining faces and of alignment of matching profiles.

3.6 INSTALLATION OF METAL WALL PANELS

A. General: Install metal wall panels in orientation, sizes, and locations indicated on Drawings. Install panels perpendicular to girts, extending full height of building, unless otherwise indicated. Anchor metal wall panels and other components of the Work securely in place, with provisions for thermal and structural movement.

1. Unless otherwise indicated, begin metal panel installation at corners with center of rib lined up with line of framing.
2. Shim or otherwise plumb substrates receiving metal wall panels.
3. When two rows of metal panels are required, lap panels 4 inches (102 mm) minimum.
4. When building height requires two rows of metal panels at gable ends, align lap of gable panels over metal wall panels at eave height.
5. Rigidly fasten base end of metal wall panels and allow eave end free movement for thermal expansion and contraction. Predrill panels.
6. Flash and seal metal wall panels with weather closures at eaves and rakes, and at perimeter of all openings. Fasten with self-tapping screws.
7. Install screw fasteners in predrilled holes.
8. Install flashing and trim as metal wall panel work proceeds.
9. Apply elastomeric sealant continuously between metal base channel (sill angle) and concrete, and elsewhere as indicated on Drawings; if not indicated, as necessary for waterproofing.
10. Align bottom of metal wall panels and fasten with blind rivets, bolts, or self-drilling or self-tapping screws.
11. Provide weatherproof escutcheons for pipe and conduit penetrating exterior walls.

B. Metal Wall Panels: Install metal wall panels on exterior side of girts. Attach metal wall panels to supports with fasteners as recommended by manufacturer[**using sealants and gaskets as required for a watertight installation**].

C. Insulated Metal Wall Panels: Install insulated metal wall panels on exterior side of girts. Attach panels to supports at each panel joint using concealed clip and fasteners at maximum 42 inches (1067 mm) o.c., spaced not more than manufacturer's written instruction. Fully engage tongue and groove of adjacent insulated metal wall panels.

1. Install clips to supports with self-tapping fasteners.
2. Apply continuous ribbon of sealant to panel joint on concealed side of insulated metal wall panels as vapor seal; apply sealant to panel joint on exposed side of panels as weather seal.

D. Installation Tolerances: Shim and align metal wall panels within installed tolerance of 1/4 inch in 20 ft. (6 mm in 6 m), noncumulative; level, plumb, and on location lines; and within 1/8-inch (3-mm) offset of adjoining faces and of alignment of matching profiles.

3.7 INSTALLATION OF TRANSLUCENT PANELS

A. Translucent Panels: Attach translucent panels to structural framing with fasteners in accordance with manufacturer's written instructions. Install panels perpendicular to supports unless otherwise indicated. Anchor translucent panels securely in place, with provisions for thermal and structural movement.

1. Provide end laps of not less than 6 inches (152 mm) and side laps of not less than 1-1/2-inch (38-mm) corrugations for metal roof panels.
2. Provide end laps of not less than 4 inches (102 mm) and side laps of not less than 1-1/2-inch (38-mm) corrugations for metal wall panels.
3. Align horizontal laps with adjacent metal panels.
4. Seal intermediate end laps and side laps of translucent panels with translucent mastic.

3.8 INSTALLATION OF METAL SOFFIT PANELS

A. Provide metal soffit panels the full width of soffits. Install panels perpendicular to support framing.

B. Flash and seal metal soffit panels with weather closures where panels meet walls and at perimeter of all openings.

3.9 INSTALLATION OF THERMAL INSULATION

A. General: Install insulation concurrently with metal panel installation, in thickness indicated to cover entire surface, in accordance with manufacturer's written instructions.

1. Set vapor-retarder-faced units with vapor retarder toward warm side of construction unless otherwise indicated. Do not obstruct ventilation spaces except for firestopping.
2. Tape joints and ruptures in vapor retarder, and seal each continuous area of insulation to the surrounding construction to ensure airtight installation.
3. Install factory-laminated, vapor-retarder-faced blankets straight and true in one-piece lengths, with both sets of facing tabs sealed, to provide a complete vapor retarder.
4. Install blankets straight and true in one-piece lengths. Install vapor retarder over insulation, with both sets of facing tabs sealed, to provide a complete vapor retarder.

B. Blanket Roof Insulation: Comply with the following installation method:

1. Over-Framing Installation: Extend insulation and vapor retarder over and perpendicular to top flange of secondary framing. Hold in place by metal roof panels fastened to secondary framing.
2. Between-Purlin Installation: Extend insulation and vapor retarder between purlins. Carry vapor-retarder-facing tabs up and over purlin, overlapping adjoining facing of next insulation course and maintaining continuity of retarder. Hold in place with bands and crossbands below insulation.
3. Over-Purlin-with-Spacer-Block Installation: Extend insulation and vapor retarder over and perpendicular to top flange of secondary framing. Install layer of filler insulation over first layer to fill space formed by metal roof panel standoffs. Hold in place by panels fastened to standoffs.

    a. Thermal Spacer Blocks: Where metal roof panels attach directly to purlins, install thermal spacer blocks.

4. Two-Layers-between-Purlin-with-Spacer-Block Installation: Extend insulation and vapor retarder between purlins. Carry vapor-retarder-facing tabs up and over purlin, overlapping adjoining facing of next insulation course and maintaining continuity of retarder. Install layer of filler insulation over first layer to fill space between purlins formed by thermal spacer blocks. Hold in place with bands and crossbands below insulation.

    a. Thermal Spacer Blocks: Where metal roof panels attach directly to purlins, install thermal spacer blocks.

5. Retainer Strips: Install retainer strips at each longitudinal insulation joint, straight and taut, nesting with secondary framing to hold insulation in place.

C. Blanket Wall Insulation: Extend insulation and vapor retarder over and perpendicular to top flange of secondary framing. Hold in place by metal wall panels fastened to secondary framing.

1. Retainer Strips: Install retainer strips at each longitudinal insulation joint, straight and taut, nesting with secondary framing to hold insulation in place.
2. Sound-Absorption Insulation: Where sound-absorption requirement is indicated for metal liner panels, cover insulation with polyethylene film and provide inserts of wire mesh to form acoustical spacer grid.

D. Board Wall Insulation: Extend board insulation in thickness indicated to cover entire wall. Hold in place by metal wall panels fastened to secondary framing. Comply with manufacturers' written instructions.

1. Retainer Strips: Install retainer strips at each longitudinal insulation joint, straight and taut, nesting with secondary framing to hold insulation in place.

3.10 INSTALLATION OF DOORS AND FRAMES

A. General: Install doors and frames plumb, rigid, properly aligned, and securely fastened in place in accordance with manufacturers' written instructions. Coordinate installation with wall flashings and other components. Seal perimeter of each door frame with elastomeric sealant used for metal wall panels.

B. Personnel Doors and Frames: Install doors and frames in accordance with NAAMM-HMMA 840. Fit non-fire-rated doors accurately in their respective frames, with the following clearances:

1. Between Doors and Frames at Jambs and Head: 1/8 inch (3 mm).
2. Between Edges of Pairs of Doors: 1/8 inch (3 mm).
3. At Door Sills with Threshold: 3/8 inch (9.5 mm).
4. At Door Sills without Threshold: 3/4 inch (19.1 mm).
5. At fire-rated openings, install frames in accordance with, and doors with clearances specified in, NFPA 80.

C. Sliding Service Doors: Bolt support angles to opening head members through factory-punched holes. Bolt door tracks to support angles at maximum 24 inches (610 mm) o.c. Set doors and operating equipment with necessary hardware, jamb and head mold stops, continuous hood flashing, anchors, inserts, hangers, and equipment supports.

D. Field Glazing: Comply with installation requirements in Section 088000 "Glazing."

E. Door Hardware:

1. Install surface-mounted items after finishes have been completed at heights indicated in DHI's TDH-009.
2. Set units level, plumb, and true to line and location. Adjust and reinforce attachment substrates as necessary for proper installation and operation.
3. Drill and countersink units that are not factory prepared for anchorage fasteners. Space fasteners and anchors in accordance with industry standards.
4. Set thresholds for exterior doors in full bed of sealant complying with requirements for concealed mastics specified in Section 079200 "Joint Sealants."

3.11 INSTALLATION OF WINDOWS

A. General: Install windows plumb, rigid, properly aligned, without warp or rack of frames or sash, and securely fasten in place in accordance with manufacturer's written instructions. Coordinate installation

with wall flashings and other components. Seal perimeter of each window frame with elastomeric sealant used for metal wall panels.

1. Separate dissimilar materials from sources of corrosion or electrolytic action at points of contact with other materials by complying with requirements specified in AAMA/WDMA/CSA 101/I.S.2/A440.

B. Set sill members in bed of sealant or with gaskets, for weathertight construction.

C. Install windows and components to drain condensation, water penetrating joints, and moisture migrating within windows to the exterior.

D. Mount screens directly to frames with tapped screw clips.

3.12 INSTALLATION OF ACCESSORIES

A. General: Install accessories with positive anchorage to building and weathertight mounting, and provide for thermal expansion. Coordinate installation with flashings and other components.

1. Install components required for a complete metal roof panel assembly, including trim, copings, ridge closures, seam covers, flashings, sealants, gaskets, fillers, closure strips, and similar items.
2. Install components for a complete metal wall panel assembly, including trim, copings, corners, seam covers, flashings, sealants, gaskets, fillers, closure strips, and similar items.
3. Where dissimilar metals contact each other or corrosive substrates, protect against galvanic action by painting contact surfaces with corrosion-resistant coating, by applying rubberized-asphalt underlayment to each contact surface, or by other permanent separation as recommended by manufacturer.

B. Flashing and Trim: Comply with performance requirements and manufacturer's written installation instructions. Provide concealed fasteners where possible, and set units true to line and level. Install work with laps, joints, and seams that will be permanently watertight and weather resistant.

1. Install exposed flashing and trim that is without excessive oil-canning, buckling, and tool marks and that is true to line and levels indicated, with exposed edges folded back to form hems. Install sheet metal flashing and trim to fit substrates and to result in waterproof and weather-resistant performance.
2. Expansion Provisions: Provide for thermal expansion of exposed flashing and trim. Space movement joints at a maximum of 10 ft. (3 m) with no joints allowed within 24 inches (600 mm) of corner or intersection. Where lapped or bayonet-type expansion provisions cannot be used or would not be sufficiently weather resistant and waterproof, form expansion joints of intermeshing hooked flanges, not less than 1 inch (25 mm) deep, filled with mastic sealant (concealed within joints).

C. Gutters: Join sections with riveted-and-soldered or lapped-and-sealed joints. Attach gutters to eave with gutter hangers spaced as required for gutter size, but not more than 36 inches (914 mm) o.c. using manufacturer's standard fasteners. Provide end closures and seal watertight with sealant. Provide for thermal expansion.

D. Downspouts: Join sections with 1-1/2-inch (38-mm) telescoping joints. Provide fasteners designed to hold downspouts securely 1 inch (25 mm) away from walls; locate fasteners at top and bottom and at approximately 60 inches (1524 mm) o.c. in between.

1. Provide elbows at base of downspouts to direct water away from building.
2. Tie downspouts to underground drainage system indicated.

E. Circular Roof Ventilators: Set ventilators complete with necessary hardware, anchors, dampers, weather guards, rain caps, and equipment supports. Mount ventilators on flat level base. Install preformed filler strips at base to seal ventilator to metal roof panels.

F. Continuous Roof Ventilators: Set ventilators complete with necessary hardware, anchors, dampers, weather guards, rain caps, and equipment supports. Join sections with splice plates and end-cap skirt assemblies where required to achieve indicated length. Install preformed filler strips at base to seal ventilator to metal roof panels.

G. Louvers: Locate and place louver units level, plumb, and at indicated alignment with adjacent work.

1. Use concealed anchorages where possible. Provide brass or lead washers fitted to screws where required to protect metal surfaces and to make a weathertight connection.
2. Provide perimeter reveals and openings of uniform width for sealants and joint fillers.
3. Protect galvanized- and nonferrous-metal surfaces from corrosion or galvanic action by applying a heavy coating of corrosion-resistant paint on surfaces that will be in contact with concrete, masonry, or dissimilar metals.
4. Install concealed gaskets, flashings, joint fillers, and insulation as louver installation progresses, where weathertight louver joints are required. Comply with Section 079200 "Joint Sealants" for sealants applied during louver installation.

H. Roof Curbs: Install curbs at locations indicated on Drawings. Install flashing around bases where they meet metal roof panels.

I. Pipe Flashing: Form flashing around pipe penetration and metal roof panels. Fasten and seal to panel as recommended by manufacturer.

3.13 FIELD QUALITY CONTROL

A. Special Inspections: the Owner will engage a qualified special inspector to perform field quality control special inspections and to submit reports.

B. Door Inspections:

1. Door Inspection Agency: [**the Owner will engage**] [**Engage**] a qualified inspector to perform inspections and to furnish reports to Architect, as directed by the Owner.
2. Fire-Rated Door Inspections: Inspect each fire-rated door in accordance with NFPA 80, Section 5.2.
3. Egress Door Inspections: Inspect each door equipped with panic hardware, each door equipped with fire exit hardware, each door located in an exit enclosure, each electrically controlled egress door, and each door equipped with special locking arrangements in accordance with NFPA 101, Section 7.2.1.15.
4. Repair or remove and replace installations where inspections indicate that they do not comply with specified requirements.
5. Reinspect repaired or replaced installations to determine if replaced or repaired door assembly installations comply with specified requirements.
6. Prepare and submit separate inspection report for each fire-rated door assembly indicating compliance with each item listed in [**NFPA 80**] [**and**] [**NFPA 101**].
7. Product will be considered defective if it does not pass tests and inspections.

C. Prepare test and inspection reports.

3.14 ADJUSTING

A. Doors: After completing installation, test and adjust doors to operate easily, free of warp, twist, or distortion.

B. Door Hardware: Adjust and check each operating item of door hardware and each door to ensure proper operation and function of every unit. Replace units that cannot be adjusted to operate as intended.

C. Windows: Adjust operating sashes and ventilators, screens, hardware, and accessories for a tight fit at contact points and at weather stripping to ensure smooth operation and weathertight closure. Lubricate hardware and moving parts.

D. Roof Ventilators and Adjustable Louvers: After completing installation, including work by other trades, lubricate, test, and adjust units to operate easily, free of warp, twist, or distortion as needed to provide fully functioning units.

1. Adjust louver blades to be weathertight when in closed position.

3.15 CLEANING AND PROTECTION

A. Repair damaged galvanized coatings on galvanized items with galvanized repair paint in accordance with ASTM A780/A780M and manufacturer's written instructions.

B. Remove and replace glass that has been broken, chipped, cracked, abraded, or damaged during construction period.

C. Touchup Painting:

1. After erection, promptly clean, prepare, and prime or reprime field connections, rust spots, and abraded surfaces of prime-painted structural framing[bearing plates,] and accessories.

a. Clean and prepare surfaces by SSPC-SP 2 or SSPC-SP 3.
b. Apply a compatible primer of same type as shop primer used on adjacent surfaces.

2. Cleaning and touchup painting are specified in Section 099113 "Exterior Painting" and Section 099123 "Interior Painting."

D. Metal Panels: Remove temporary protective coverings and strippable films, if any, as metal panels are installed. On completion of metal panel installation, clean finished surfaces as recommended by metal panel manufacturer. Maintain in a clean condition during construction.

1. Replace metal panels that have been damaged or have deteriorated beyond successful repair by finish touchup or similar minor repair procedures.

E. Doors and Frames: Immediately after installation, sand rusted or damaged areas of prime coat until smooth and apply touchup of compatible air-drying primer.

1. Immediately before final inspection, remove protective wrappings from doors and frames.

F. Windows: Clean metal surfaces immediately after installing windows. Avoid damaging protective coatings and finishes. Remove excess sealants, glazing materials, dirt, and other substances. Clean factory-glazed glass immediately after installing windows.

G. Louvers: Clean exposed surfaces that are not protected by temporary covering, to remove fingerprints and soil during construction period. Do not let soil accumulate until final cleaning.

1. Restore louvers damaged during installation and construction period so no evidence remains of corrective work. If results of restoration are unsuccessful, as directed by the Owner, remove damaged units and replace with new units.

a. Touch up minor abrasions in finishes with air-dried coating that matches color and gloss of, and is compatible with, factory-applied finish coating.

END OF SECTION 13 34 19 00

Task	Specification	Specification Description
13 34 19 00	13 34 23 16	Fabricated Control Booths

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 13 34 23 16 - FABRICATED CONTROL BOOTHS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Fabricated steel control booths.
2. Fabricated aluminum control booths.

1.2 ACTION SUBMITTALS

A. Product Data:

1. Fabricated steel control booths.
2. Fabricated aluminum control booths.

B. Product Data Submittals: For each product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for control booths.
2. Include rated capacities, operating characteristics, and electrical characteristics, for included systems.

C. Shop Drawings: For control booths. Include plans, elevations, sections, details, accessories, and fastening and anchorage details, including mechanical fasteners.

1. Anchor-Bolt Plans: Submit anchor-bolt plans and templates. Include location, diameter, and projection of anchor bolts required to attach control booths to foundation. Indicate post reactions at each location.

D. Samples: For each exposed product and for each color and texture specified, approximately **8-1/2 by 11 inches (215 by 280 mm)** in size.

E. Samples for Initial Selection: For each type of exposed finish.

F. Samples for Verification: For each type of exposed finish in manufacturer's standard sizes.

1. Include Samples of wall panels and accessories to verify finish selection.

G. Delegated Design Submittals: For fabricated control booths, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

1.3 INFORMATIONAL SUBMITTALS

A. Sample Warranty: For special warranty.

1.4 CLOSEOUT SUBMITTALS

A. Maintenance Data: For control booths to include in maintenance manuals.

1.5 WARRANTY

A. Special Warranty: Manufacturer agrees to repair finish or replace control booths that fail in materials or workmanship within specified warranty period.

1. Warranty Period: [**Five**] years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design fabricated control booths.

B. Structural Performance: Fabricated control booths to withstand the following loads and stresses within limits and under conditions indicated in accordance with [**ASCE/SEI 7**]

1. Loads: [**As indicated on Drawings**].

C. Seismic Performance: Fabricated control booths to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**].

1. Loads: [**As indicated on Drawings**].

D. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

1. Temperature Change (Range): [**120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces**].

E. Ballistic Resistance: Provide components, including windows, walls, and doors, identical to those tested for compliance with requirements indicated, and as follows:

1. UL Rating: [**Listed and labeled as**][**Level 1**][**Level 2**][**Level 3**][**Level 4**][**Level 5**][**Level 6**][**Level 7**][**Level 8**] when tested in accordance with UL 752.
2. NIJ Classification: [**Type I**][**Type IIA**][**Type II**][**Type IIIA**][**Type III**][**Type IV**] when tested in accordance with NIJ STD-0108.01.

F. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70 and marked for intended location and application.

G. Safety Glazing: Comply with 16 CFR 1201, Category II.

1. Safety Glazing Labeling: Permanently mark glazing with certification label of [the SGCC][the SGCC or another certification agency acceptable to authorities having jurisdiction][manufacturer], indicating manufacturer's name, glass type, thickness, and safety glazing standard with which glass complies.

H. Regulatory Requirements: Comply with applicable provisions in [**the U.S. Department of Justice's "2010 ADA Standards for Accessible Design"**][**and**][**ICC A117.1**].

2.2 FABRICATED STEEL CONTROL BOOTHS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Austin Mohawk and Company, Inc.**]
2. [**B.I.G. Enterprises, Inc**]
3. [**Delta Scientific Corporation**]
4. [**Keystone Structures, Inc.**]
5. [**Little Buildings, Inc.**]
6. [**Panel Built, Inc.**]
7. [**Par-Kut International, Inc**]
8. [**Porta-King Building Systems; a division of Jay Henges Enterprises, Inc.**]
9. [**United Partition Systems, Inc.**]

B. Building Style: [**Standard square corners**][**Radius corners**][**Round corners**][**Butt-glazed corners**][**Wraparound type, with single rounded building end**][**Wraparound type, with both building ends rounded**][**As indicated on Drawings**].

C. Structural Framework: Fabricated from **2-by-2-by-0.075-inch (51-by-51-by-1.90-mm)** steel structural or mechanical tubing. Connect framework by welding.

D. Sliding Doors: Top suspended from aluminum track with ball-bearing rollers; **1-3/4 inches (44 mm)** thick; tubular-frame design fabricated from [**clear-anodized aluminum**][**galvanized steel**]; with [**top half**][**full height**] of door glazed. Equip door with deadlock, lock support, guide hardware, and full weather stripping. Provide door on [**one side**][**both sides**] of booth.

1. Glazing: [**Fixed**][**Horizontal sliding**] unit with clear [**insulating**] glass.
2. Deadlock: Mortised, laminated-hook bolt type with removable cylinder capable of being master keyed.

E. Swinging Doors: **1-3/4 inches (44 mm)** thick; tubular-frame design fabricated from [**clear-anodized aluminum**][**galvanized steel**]; with [**top half**][**full height**] of door glazed. Equip door with deadlock, three butt hinges, closer, and full weather stripping.[**Provide door on back of booth.**]

1. Glazing: [**Fixed**][**Horizontal sliding**] unit with clear [**insulating**] glass.
2. Deadlock: Mortised, with lever handle and removable cylinder capable of being master keyed.

F. Windows: Extruded-aluminum sash frames glazed with clear [**tempered**][**insulating**] glass.

1. Frame Finish: Manufacturer's standard mill or clear anodic.
2. Operable Windows: Equip windows with cam locks, weather stripping, and [**stainless steel**][**nylon**] ball-bearing rollers.
3. Screens: [**Insect**][**Security**] screens for each window.
4. Corner Shape: [**Square**][**Round**].

G. Wall Panel Assembly: Assembly consisting of exterior face panel fabricated from 0.079-inch (2.01-mm) nominal-thickness, galvanized-steel sheet; and interior face panel fabricated from [0.064-inch (1.63-mm)][0.052-inch (1.32-mm)] nominal-thickness, galvanized-steel sheet; with [2-inch- (51-mm-)][3-inch-(76-mm-)] thick, [rigid fiberglass][polystyrene board] insulation in cavity between exterior and interior face panels.

H. Raised Base Assembly: [4-inch- (102-mm-)][3-inch- (76-mm-)] high assembly consisting of perimeter frame welded to structural framework of booth. Fabricate frame from 2-by-4-inch (51-by-102-mm) galvanized-steel structural tubing; 0.108-inch (2.74-mm) nominal-thickness, C-shaped, galvanized-steel sheet channels; or galvanized structural-steel angles. Include anchor clips fabricated from 1/4-inch- (6-mm-) thick galvanized-steel plate, predrilled and welded to exterior of integral floor frame.

1. Tread Plate Floor Assembly: 0.108-inch (2.74-mm) nominal-thickness, galvanized, rolled steel tread plate.
2. Insulated Floor Assembly: Assembly consisting of 0.079-inch (2.01-mm) nominal-thickness, galvanized-steel sheet underside with rigid insulation core; covered by 0.125-inch- (3.18-mm-) thick, aluminum rolled tread plate; with overall assembly thickness of 2 inches (51 mm).
3. Uninsulated Floor Assembly: Assembly consisting of [**one**][**two**] layer(s) of 3/4-inch- (19-mm-) thick plywood or oriented strand board with [0.125-inch- (3.18-mm-) **thick, aluminum rolled tread plate**][**vinyl composition flooring**][**carpeting**].

I. Flush Base Assembly: No perimeter frame, with finished floor fabricated from 0.108-inch (2.74-mm) nominal-thickness, galvanized, rolled steel tread plate.

J. Open Base: No perimeter frame, with surface of supporting concrete base as finished floor.

K. Flat Roof/Ceiling Assembly: Assembly consisting of exterior roof panels, interior ceiling panels, and insulation between exterior and interior panels; sloped to drain at booth perimeter.

1. Exterior Roof Panel: Fabricated from [0.079-inch (2.01-mm)][0.064-inch (1.63-mm)] nominal-thickness, galvanized-steel sheet; with [painted finish][EPDM membrane], continuously welded seams[and full-perimeter gutter].
2. Interior Ceiling Panel: Fabricated from 0.079-inch (2.01-mm) nominal-thickness, galvanized-steel sheet; with fiberglass insulation in cavity between ceiling and roof.
3. Insulated Composite Panel: Fabricated from 0.028-inch (0.71-mm) nominal-thickness, galvanized-steel sheet faces and expanded-foam insulation core.
4. Canopy Fascia: Fabricated from 0.079-inch (2.01-mm) nominal-thickness, galvanized-steel sheet, of [**manufacturer's standard design**][**custom design indicated on Drawings**].

    a. Height: [6 inches (152 mm)][8 inches (203 mm)].
    b. Configuration:

        1) Overhang [3 inches (76 mm)] beyond face of walls below.
        2) Flush with face of walls below.

5. Downspouts: Integral, extending 3 inches (76 mm) beyond booth walls.
6. Roof scuppers.
7. Rooftop finial.

L. Work Counters: Full width of control booth, reinforced; with 16-inch- (406-mm-) wide [**storage**][**cash**] drawer below each counter and an access opening for electrical cords at[**each**] rear corner of counter.

1. Material: [0.078-inch- (1.98-mm-) **thick, stainless steel sheet**][0.079-inch (2.01-mm) **nominal-thickness, galvanized-steel sheet**][1/2-inch- (13-mm-) **thick particleboard with plastic-laminate finish**].
2. Depth: [18 inches (457 mm)][20 inches (508 mm)][22 inches (559 mm)].

M. Electrical:

1. Single-Point Connection: Service-entrance-rated, fused safety switch located on exterior for connection of 125 A, [**120/240 V, single-phase, three-wire**][**120/208 V, single-phase, three-**

wire][**208Y/120 V, three-phase, four-wire**] feeder with equipment ground conductor.

2. Grounding: Grounding electrode bonded to equipment ground conductor at single-point connection in accordance with NFPA 70 and Section 260526 "Grounding and Bonding for Electrical Systems."
3. Power Distribution: Readily accessible panelboard in accordance with Section 262416 "Panelboards" installed at [**interior**][**exterior**] location[**coordinated with Architect**]. Include 25 percent provisions for installation of additional future devices, as directed by the Owner.
4. Power Connections:

    a. [**One**] duplex, weatherproof, ground-fault circuit interrupter (GFCI), NEMA 5-15R power outlet(s) for servicing exterior equipment.
    b. [**One**][**Two**] duplex, [**ground-fault circuit interrupter (GFCI),**] NEMA 5-15R power outlet(s) under counter(s) near access openings.
    c. [**One**][**Two**] Type USB-A power outlet(s) above counter(s) for charging portable devices.
    d. Provide power connections and means of disconnect for interior and exterior HVAC equipment.
    e. Provide power connections and means of disconnect for vehicle[**and pedestrian**] control equipment.

5. Lighting:

    a. Booth Interior: LED. Provide 20-fc (200-lux) average horizontal illuminance, with uniformity not exceeding 2:1 average-to-minimum[dimmable from 100 percent to 10 percent,] on counter work surfaces.
    b. Booth Exterior: LED, located above door. Provide not less than **0.5-fc (5-lux)** average horizontal illuminance, with uniformity not exceeding 3:1 maximum-to-minimum, when measured at finished grade over the distance of **15 ft. (4.5 m)** from entrance door.
    c. Vehicle and Pedestrian Circulation:

        1) LZ1: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **2-fc (20-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **1.5-fc (15-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.
        2) LZ2: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **1.5-fc (15-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **1-fc (10-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.
        3) LZ3: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **1-fc (10-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **0.8-fc (8-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.
        4) LZ4: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **0.8-fc (8-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **0.6-fc (6-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.

    d. Controls: [**Provide manual switches for interior and exterior lighting on wall inside booth door**][**Provide automatic photocontrol for interior and exterior lighting, with**

manual override located on wall inside booth door].

N. Communications:

1. [**One**] communications outlet(s) under counter(s) with [**two**][**four**] TIA-1096-A miniature eight-position series jack(s) for connecting telephone and data equipment.

O. Heating Unit: [**Wall**][**Roof**]-mounted, thermostatically controlled, [**110-V**][**230/208-V**], electric heater with fan-forced operation and with capacity of not less than [**5000 Btu/h (1470 W)**][**7500 Btu/h (2200 W)**]. Enclose in enameled-steel cabinet[**and mount under work counter**].

P. Cooling Unit: [**Wall**][**Roof**]-mounted, thermostatically controlled air conditioner with cooling capacity of not less than [**10,000 Btu/h (2930 W)**][**12,000 Btu/h (3520 W)**][**13,500 Btu/h (3960 W)**]. Enclose in enameled-steel cabinet.

Q. Accessories: Provide the following for each control booth:

1. Through-wall transaction drawers[**and speaking apertures**].
2. Antifatigue mats.
3. Exterior stainless steel counter.
4. [**Floor**][**Wall-mounted**] safe.
5. Ventilation fan.
6. Insect screens on operable openings.
7. Rollup shutters on doors and windows.
8. Intercom.
9. Traffic control lights.
10. Bollards.

R. Anchorage: [**Cast-in-place anchor bolts**][**Postinstalled anchors**] fabricated from non-ferrous or corrosion-resistant materials, with allowable load or strength design greater than or equal to the design load, as determined by testing conducted by a qualified testing agency.

S. Materials:

1. Zinc-Coated (Galvanized) Steel Sheet: ASTM A653/A653M, commercial quality, **G90 (Z275)** coating designation; mill phosphatized.
2. Galvanized Rolled-Steel Floor Plate: ASTM A786/A786M, rolled from plate complying with ASTM A36/A36M or ASTM A283/A283M, Grade C or D); hot-dip galvanized in accordance with ASTM A123/A123M.
3. Steel Structural Tubing: ASTM A500/A500M, Grade B.
4. Steel Plates, Shapes, and Bars: ASTM A36/A36M.
5. Steel Mechanical Tubing: ASTM A513/A513M, welded-steel mechanical tubing.
6. Zinc-Coated (Galvanized) Steel: Hot-dip galvanized in accordance with ASTM A123/A123M.
7. Aluminum: Alloy and temper recommended by aluminum producer and manufacturer for type of use and finish indicated, and as follows:

    a. Sheet: ASTM B209/B209M.
    b. Extruded Shapes: **ASTM B221 (ASTM B221M)**.
    c. Rolled Tread Plate: ASTM B632/B632M, Alloy 6061-T4 or Alloy 6061-T6.

8. Stainless Steel Sheet: ASTM A240/A240M or ASTM A666, Type 304.
9. Plastic Laminate: ISO 4586-3, Grade HGS or HGL.
10. Plywood: DOC PS 1, Exterior grade.
11. Particleboard: ANSI A208.1, Grade M-2.
12. Clear Tempered Float Glass: ASTM C1048, Kind FT, Condition A, Type I, Class 1, and Quality

q3; [**6 mm thick**].

13. Clear Insulating Glass: ASTM E2190. Factory-assembled units consisting of two lites of 2.5-mm-thick clear float glass, ASTM C1036, Type I, Class 1, Quality q3, and dehydrated air space, with a total overall unit thickness of [**1 inch (25 mm)**][**3/4 inch (19 mm)**][**5/8 inch (16 mm)**] and with manufacturer's standard dual seal. Provide tempered lites where indicated.
14. Ballistic-Resistant Glazing: Tested to comply with bullet-resistant testing level indicated.

T. Finish: Immediately after cleaning and pretreating, apply manufacturer's standard baked-on finish, including thermosetting, electrostatically applied, and powder coatings. Comply with coating manufacturer's written instructions for applying and baking.

1. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.3 FABRICATED ALUMINUM CONTROL BOOTHS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Allied Modular Building Systems, Inc.**]
2. [**Austin Mohawk and Company, Inc.**]
3. [**Keystone Structures, Inc.**]
4. [**Mardan Fabrication, Inc.**]
5. [**NRB Modular Solutions Inc.**]
6. [**Porta-King Building Systems; a division of Jay Henges Enterprises, Inc.**]
7. [**Portafab Corporation**]
8. [**Starrco**]

B. Building Style: [**Standard square corners**][**Radius corners**][**Round corners**][**Butt-glazed corners**][**Wraparound type, with single rounded building end**][**Wraparound type, with both building ends rounded**][**As indicated on Drawings**].

C. Structural Framework: Fabricated from **2-by-2-by-0.125-inch (51-by-51-by-3.18-mm)** aluminum tubing, channel, angle, or tee extrusions; with [**clear**][**color**] anodic finish. Connect framework with[**exposed**] mechanical fasteners.

D. Sliding Doors: Top suspended from aluminum track with ball-bearing rollers; **1-3/4 inches (44 mm)** thick; tubular-frame design fabricated from clear-anodized aluminum; with [**top half**][**full height**] of door glazed. Equip door with deadlock, lock support, guide hardware, and full weather stripping. Provide door on [**one side**][**both sides**] of booth.

1. Glazing: [**Fixed**][**Horizontal sliding**] unit with clear [**insulating**] glass.
2. Deadlock: Mortised, laminated-hook bolt type with removable cylinder capable of being master keyed.

E. Swinging Doors: **1-3/4 inches (44 mm)** thick; tubular-frame design fabricated from clear-anodized aluminum; with [**top half**][**full height**] of door glazed. Equip door with deadlock, three butt hinges, closer, and full weather stripping.[**Provide door on back of booth.**]

1. Glazing: [**Fixed**][**Horizontal sliding**] unit with clear [**insulating**] glass.
2. Deadlock: Mortised, with lever handle and removable cylinder capable of being master keyed.

F. Windows: Extruded-aluminum sash frames glazed with clear [**tempered**][**insulating**] glass.

1. Frame Finish: Manufacturer's standard mill or clear anodic.
2. Operable Windows: Equip windows with cam locks, weather stripping, and [**stainless steel**][**nylon**] ball-bearing rollers.
3. Screens: [**Insect**][**Security**] screens for each window.
4. Corner Shape: [**Square**][**Round**].

G. Wall Panel Assembly: Assembly consisting of exterior face panel fabricated from [0.032-inch- (0.81-mm-)][0.063-inch- (1.60-mm-)] thick aluminum sheet, and interior face panel fabricated from [0.032-inch- (0.81-mm-)][0.050-inch- (1.27-mm-)] thick aluminum sheet; with 2-inch- (51-mm-) thick [polystyrene][polyisocyanurate board insulation] in cavity between exterior and interior face panels.

H. Raised Base Assembly: **4-inch- (102-mm-)** high assembly consisting of perimeter frame welded to structural framework of booth. Fabricate frame from **2-by-4-by-0.125-inch (51-by-102-by-3.18-mm)** aluminum tubing or aluminum angles. Include anchor clips fabricated from **1/4-inch- (6-mm-)** thick aluminum, predrilled and welded to exterior of integral floor frame.

1. Insulated Floor Assembly: Assembly consisting of **0.032-inch- (0.81-mm-)** thick, aluminum sheet underside with plywood and rigid insulation core; covered by **0.125-inch- (3.18-mm-)** thick, aluminum rolled tread plate; with overall assembly thickness of **2 inches (51 mm)**.
2. Uninsulated Floor Assembly: Assembly consisting of [**one**][**two**] layer(s) of **3/4-inch- (19-mm-)** thick plywood or oriented strand board with [**0.125-inch- (3.18-mm-) thick, aluminum rolled tread plate**][**vinyl composition flooring**][**carpeting**].

I. Open Base: No perimeter frame, with surface of supporting concrete base as finished floor.

J. Flat Roof/Ceiling Assembly: Assembly consisting of exterior roof panels, interior ceiling panels, and insulation between exterior and interior panels; sloped to drain at booth perimeter.

1. Exterior Roof Panel: Fabricated from **0.032-inch- (0.81-mm-)** thick aluminum sheet; with protective plastic sheet finish and full-perimeter gutter.
2. Interior Ceiling Panel: Fabricated from **0.125-inch- (3.18-mm-)** thick hardboard; with polyisocyanurate board insulation in cavity between ceiling and roof.
3. Insulated Composite Panel: Fabricated from **0.032-inch- (0.81-mm-)** thick aluminum sheet faces and expanded-foam insulation core.
4. Canopy Fascia: Fabricated from **0.063-inch- (1.60-mm-)** thick aluminum sheet, of [**manufacturer's standard design**][**custom design indicated on Drawings**].
    a. Height: [**6 inches (152 mm)**][**8 inches (203 mm)**].
    b. Configuration:
        1) Overhang [**3 inches (76 mm)**] beyond face of walls below.
        2) Flush with face of walls below.
5. Downspouts: Integral, extending **3 inches (76 mm)** beyond booth walls.
6. Roof scuppers.
7. Rooftop finial.

K. Work Counters: Full width of control booth, reinforced; with **16-inch- (406-mm-)** wide [**storage**][**cash**] drawer below each counter and an access opening for electrical cords at[**each**] rear corner of counter.

1. Material: **1/2-inch- (13-mm-)** thick particleboard with plastic-laminate finish.
2. Depth: [**18 inches (457 mm)**][**20 inches (508 mm)**][**22 inches (559 mm)**].

L. Electrical Power Service:

1. Single-Point Connection: Service-entrance-rated, fused safety switch located on exterior for connection of 125 A, [**120/240 V, single-phase, three-wire**][**120/208 V, single-phase, three-wire**][**208Y/120 V, three-phase, four-wire**] feeder with equipment ground conductor.
2. Grounding: Grounding electrode bonded to equipment ground conductor at single-point connection in accordance with NFPA 70 and Section 260526 "Grounding and Bonding for Electrical Systems."
3. Power Distribution: Readily accessible panelboard in accordance with Section 262416 "Panelboards" installed at [**interior**][**exterior**] location[**coordinated with Architect**]. Include 25 percent provisions for installation of additional future devices, as directed by the Owner.
4. Power Connections:

    a. [**One**] duplex, weatherproof, ground-fault circuit interrupter (GFCI), NEMA 5-15R power outlet(s) for servicing exterior equipment.
    b. [**One**][**Two**] duplex, [**ground-fault circuit interrupter (GFCI),**] NEMA 5-15R power outlet(s) under counter(s) near access openings.
    c. [**One**][**Two**] type USB-A power outlet(s) above counter(s) for charging portable devices.
    d. Provide power connections and means of disconnect for interior and exterior HVAC equipment.
    e. Provide power connections and means of disconnect for vehicle[**and pedestrian**] control equipment.

5. Lighting:

    a. Booth Interior: LED. Provide 20-fc (200-lux) average horizontal illuminance, with uniformity not exceeding 2:1 average-to-minimum[dimmable from 100 percent to 10 percent,] on counter work surfaces.
    b. Booth Exterior: LED, located above door. Provide not less than **0.5-fc (5-lux)** average horizontal illuminance, with uniformity not exceeding 3:1 maximum-to-minimum, when measured at finished grade over the distance of **15 ft. (4.5 m)** from entrance door.
    c. Vehicle and Pedestrian Circulation:

        1) LZ1: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **2-fc (20-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **1.5-fc (15-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.
        2) LZ2: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **1.5-fc (15-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **1-fc (10-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.
        3) LZ3: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **1-fc (10-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **0.8-fc (8-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.
        4) LZ4: LED. For drive aisles[**and pedestrian walkways**] in primary directions of travel for distance **10 ft. (3 m)** from booth, provide not less than **0.8-fc (8-lux)** average horizontal illuminance when measured **4 ft. (1.2 m)** above finished grade and not less than **0.6-fc (6-lux)** average vertical illuminance when measured **3 to 5 ft. (1 to 1.5 m)** above finished grade, with horizontal and vertical uniformities not exceeding 2:1 average-to-minimum.

d. Controls: [**Provide manual switches for interior and exterior lighting on wall inside booth door**][**Provide automatic photocontrol for interior and exterior lighting, with manual override located on wall inside booth door**].

M. Communications:

1. [**One**] communications outlet(s) under counter(s) with [**two**][**four**] TIA-1096-A miniature eight-position series jack(s) for connecting telephone and data equipment.

N. Heating Unit: [**Wall**][**Roof**]-mounted, thermostatically controlled, [**110-V**][**230/208-V**] electric heater with fan-forced operation and with capacity of not less than [**5000 Btu/h (1470 W)**][**7500 Btu/h (2200 W)**]. Enclose in enameled-steel cabinet[**and mount under work counter**].

O. Cooling Unit: [**Wall**][**Roof**]-mounted, thermostatically controlled air conditioner with cooling capacity of not less than [**10,000 Btu/h (2930 W)**][**12,000 Btu/h (3520 W)**][**13,500 Btu/h (3960 W)**]. Enclose in enameled-steel cabinet.

P. Accessories: Provide the following for each control booth:

1. Through-wall transaction drawers[**and speaking apertures**].
2. Antifatigue mats.
3. Exterior stainless steel counter.
4. [**Floor**][**Wall-mounted**] safe.
5. Ventilation fan.
6. Insect screens on operable openings.
7. Rollup shutters on doors and windows.
8. Intercom.
9. Traffic control lights.
10. Bollards.

Q. Anchorage: [**Cast-in-place anchor bolts**][**Postinstalled anchors**] fabricated from stainless steel, with allowable load or strength design greater than or equal to the design load, as determined by testing conducted by a qualified testing agency.

R. Materials:

1. Aluminum: Alloy and temper recommended by aluminum producer and manufacturer for type of use and finish indicated, and as follows:

a. Sheet: ASTM B209/B209M.
b. Extruded Shapes: **ASTM B221 (ASTM B221M)**.
c. Rolled Tread Plate: ASTM B632/B632M, Alloy 6061-T4 or Alloy 6061-T6.

2. Stainless Steel Sheet: ASTM A240/A240M or ASTM A666, Type 304.
3. Plastic Laminate: ISO 4586-3, Grade HGS or HGL.
4. Plywood: DOC PS 1, Exterior grade.
5. Particleboard: ANSI A208.1, Grade M-2.
6. Clear Tempered Float Glass: ASTM C1048, Kind FT, Condition A, Type I, Class 1, and Quality q3; [**6 mm thick**].
7. Clear Insulating Glass: ASTM E2190. Factory-assembled units consisting of two lites of 2.5-mm-thick clear float glass, ASTM C1036, Type I, Class 1, Quality q3, and dehydrated air space, with a total overall unit thickness of [**1 inch (25 mm)**][**3/4 inch (19 mm)**][**5/8 inch (16 mm)**] and with manufacturer's standard dual seal. Provide tempered lites where indicated.
8. Ballistic-Resistant Glazing: Tested to comply with bullet-resistant testing level indicated.

S. Clear Anodic Finish: AAMA 611, [**AA-M12C22A41, Class I, 0.018 mm**][**AA-M12C22A31, Class II, 0.010 mm**] or thicker.

T. Color Anodic Finish: AAMA 611, [**AA-M12C22A42/A44, Class I, 0.018 mm**][**AA-M12C22A32/A34, Class II, 0.010 mm**] or thicker.

1. Color: [**Light bronze**][**Medium bronze**][**Dark bronze**][**Black**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

U. Baked-Enamel or Powder-Coat Finish: AAMA 2603, except with a minimum dry film thickness of **1.5 mils (0.04 mm)**. Comply with coating manufacturer's written instructions for cleaning, conversion coating, and applying and baking finish.

1. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.4 FABRICATION

A. Factory fabricate complete control booths, with accessories and options installed at factory.

B. Factory preglaze windows and doors.

C. Factory prewire control booths, ready for connection to service at Project site.

D. Fabricate control booths with [**forklift pockets in base of booth**][**removable lifting eye centered in roof**].

E. Accessible Control Booths: Where indicated to be accessible, fabricate control booths as follows:

1. Provide service windows located no higher than **34 inches (865 mm)** above exterior grade.
2. Provide door opening with minimum **32-inch (813-mm)** clear width.
3. Provide minimum **60-inch (1525-mm)** clear turning spacing within the booth.
4. Provide minimum **27-inch (685-mm)** clearance beneath interior work surfaces. Locate work surfaces **28 inches (710 mm)** minimum and **34 inches (865 mm)** maximum above the floor.
5. Locate controls and operable parts no lower than **15 inches (381 mm)** and no higher than **48 inches (1219 mm)** above the floor where reach is unobstructed. Where side reach is obstructed, locate controls and operable parts no lower than **15 inches (381 mm)** and no higher than **46 inches (1170 mm)** above the floor.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances, including concrete bases; accurate placement, pattern, and orientation of anchor bolts; critical dimensions; and other conditions affecting performance of the Work.

B. Examine roughing-in for electrical and communication systems to verify actual locations of connections before control booth installation.

C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.

D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Install control booths in accordance with manufacturer's written instructions.

B. Accessible Control Booths: Install with interior floor surface at same elevation as adjacent paved surfaces.

C. Set control booths plumb and aligned. Level baseplates true to plane, with full bearing on concrete bases.

D. Fasten control booths securely to concrete base with anchorage indicated.

E. Connect to electrical power service and communication systems.

F. Perform startup checks of [**heating**][**and**][**cooling**] units in accordance with manufacturer's written instructions.

3.3 ADJUSTING

A. Adjust doors, operable windows, and hardware to operate smoothly, easily, properly, and without binding. Confirm that locks engage accurately and securely without forcing or binding.

B. Adjust interior and exterior lighting controls.

C. Lubricate hardware and other moving parts.

D. After completing installation, inspect exposed finishes and repair damaged finishes.

SECTION 13 46 13 00 - LIGHTNING PROTECTION FOR STRUCTURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes: Lightning protection system for ordinary structures.

B. Section Includes: Lightning protection system for the following:

1. Ordinary structures.
2. <**Insert one or more miscellaneous structures or special occupancies**>.

1.2 ACTION SUBMITTALS

A. Product Data: For each product.

B. Shop Drawings:

1. Include layouts of the lightning protection system, with details of the components to be used in the installation.
2. Include raceway locations needed for the installation of conductors.
3. Details of air terminals, ground rods, ground rings, conductor supports, splices, and terminations, including concealment requirements.
4. Include roof attachment details, coordinated with roof installation.
5. Calculations required by NFPA 780 for bonding of metal bodies.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Lightning protection system Shop Drawings, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Lightning protection cabling attachments to roofing systems and accessories.
2. Lightning protection strike termination device attachment to roofing systems, coordinated with the roofing system manufacturer.
3. Lightning protection system components penetrating roofing and moisture protection systems and system components, coordinated with the roofing system manufacturer.

B. Qualification Data: For Installer.

C. Product Certificates: For each type of roof adhesive for attaching the roof-mounted air terminal assemblies, approved by the roofing-material manufacturer.

D. Field quality-control reports.

1.4 CLOSEOUT SUBMITTALS

A. Maintenance Data: For lightning protection system to include in maintenance manuals.

1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:

    a. Dimensioned site plan showing dimensioned route of the ground loop conductor and the ground rod locations. Comply with requirements of Section 017839 "Project Record Documents."
    b. A system testing and inspection record, listing the results of inspections and ground resistance tests, as recommended by NFPA 780, Annex D.

B. Completion Certificate:

1. [**UL Master Label Certificate**][**UL Letter of Findings Limited Scope Inspection Report**][**LPI Master Certificate**][**LPI Limited Scope Certification**].

1.5 QUALITY ASSURANCE

A. Installer Qualifications: [**UL-listed installer, category OWAY**][**or**][**LPI Master Installer**].

PART 2 - PRODUCTS

2.1 LIGHTNING PROTECTION FOR STRUCTURES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**allG Fabrication (formerly ALT)**]
2. [**East Coast Lightning Equipment Inc.**]
3. [**ERICO; brand of nVent Electrical plc**]
4. [**Harger Lightning & Grounding; business of Harger, Inc.**]
5. [**Heary Bros. Lightning Protection Co. Inc**]
6. [**Independent Protection Co**]
7. [**National Lightning Protection**]
8. [**Preferred Lightning Protection**]
9. [**Robbins Lightning, Inc**]
10. [**Thompson Lightning Protection, Inc**]
11. [**VFC Lightning Protection**]
12. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [**allG Fabrication (formerly ALT)**]
2. [**East Coast Lightning Equipment Inc.**]
3. [**ERICO; brand of nVent Electrical plc**]
4. [**Harger Lightning & Grounding; business of Harger, Inc.**]
5. [**Heary Bros. Lightning Protection Co. Inc**]
6. [**Independent Protection Co**]
7. [**National Lightning Protection**]
8. [**Preferred Lightning Protection**]
9. [**Robbins Lightning, Inc**]
10. [**Thompson Lightning Protection, Inc**]

11. [**VFC Lightning Protection**]
12. <**Insert manufacturer's name**>

2.2 PERFORMANCE REQUIREMENTS

A. NFPA Lightning Protection Standard: Comply with NFPA 780 requirements for [**Class I**][**Class II**] buildings.

B. UL Lightning Protection Standard: Comply with UL 96A requirements for [**Class I**][**Class II**] buildings.

C. Lightning Protection Components, Devices, and Accessories: Listed and labeled by a qualified testing agency as complying with UL 96, and marked for intended location and application.

2.3 MATERIALS

A. Air Terminals:

1. [**Copper**][**Stainless steel**][**or**][**Aluminum**] unless otherwise indicated.
2. [**3/8-inch (10-mm)**][**1/2-inch (12.7-mm)**][**5/8-inch (16-mm)**] diameter by [**10 inches (254 mm)**][**12 inches (305 mm)**][**15 inches (380 mm)**][**18 inches (450 mm)**][**24 inches (610 mm)**]<**Insert length of air terminal**> long.
3. [**Pointed**][**Rounded**] tip.
4. [**Integral base support**][**Threaded base support**].

B. Air Terminal Bracing:

1. [**Aluminum**][**Copper**][**Stainless steel**][**Galvanized steel**].
2. [**1/4-inch (6-mm)**]<**Insert size**> diameter rod.

C. Class I Main Conductors:

1. [**Stranded Copper: 57,400 circular mils in diameter**][**Aluminum: 98,600 circular mils in diameter**].

D. Class II Main Conductors:

1. [**Stranded Copper: 115,000 circular mils in diameter**][**Aluminum: 192,000 circular mils in diameter**].

E. Secondary Conductors:

1. [**Stranded Copper: 26,240 circular mils in diameter**][**Aluminum: 41,400 circular mils in diameter**].

F. Ground Loop Conductor: [**Stranded copper**][**Tinned copper**].

G. Ground Rods:

1. Material: [**Solid copper**][**Copper-clad steel**][**Stainless steel**].
2. Diameter: [**5/8 inch (16 mm)**][**3/4 inch (19 mm)**].
3. Rods shall be not less than **120 inches (3050 mm)** long.
4. [**Sectional type, with integral threads**].

H. Conductor Splices and Connectors: Compression fittings that are installed with hydraulically operated tools, or exothermic welds, approved for use with the class type.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install lightning protection components and systems according to [**UL 96A**][**NFPA 780**].

B. Install conductors with direct paths from air terminals to ground connections. Avoid bends less than 90 degrees and **8 inches (203 mm)** in radius and narrow loops.

C. Conceal conductors within normal view from exterior locations at grade within **200 feet (60 m)** of building. Comply with requirements for [**concealed installations in UL 96A**][**concealed systems in NFPA 780**].

1. Roof penetrations required for down conductors and connections to structural-steel framework shall be made using listed through-roof fitting and connector assemblies with solid rods and appropriate roof flashings. Use materials approved by the roofing manufacturer for the purpose. Conform to the methods and materials required at roofing penetrations of the lightning protection components to ensure compatibility with the roofing specifications and warranty.
2. Install conduit where necessary to comply with conductor concealment requirements.
3. Air Terminals on Single-Ply Membrane Roofing: Comply with adhesive manufacturer's written instructions.

D. Ground Ring Electrode: The conductor shall be not less than the main-size lightning conductor.

3.2 CONNECTIONS

A. Aboveground concealed connections, and connections in earth or concrete, shall be done by exothermic welds or by high-compression fittings listed for the purpose.

B. Aboveground exposed connections shall be done using the following types of connectors, listed and labeled for the purpose: [**bolted connectors**][**exothermic weld**][**high compression**][**crimp**].

C. Bonding Straps and Jumpers: Install in locations accessible for inspection and maintenance, except where routed through short lengths of conduit.

1. Bonding to Structure: Bond straps directly to basic structure, taking care not to penetrate any adjacent parts.
2. Bonding to Equipment Mounted on Vibration Isolation Hangers and Supports: Install bonding so vibration is not transmitted to rigidly mounted equipment.

3.3 CORROSION PROTECTION

A. Do not combine materials that can form an electrolytic couple that will accelerate corrosion in the presence of moisture unless moisture is permanently excluded from junction of such materials.

B. Use conductors with protective coatings where conditions would cause deterioration or corrosion of conductors.

3.4 FIELD QUALITY CONTROL

A. Special Inspections: [**Owner will engage**][**Engage**] a qualified special inspector to perform the following special inspections:

1. Perform inspections as required to obtain a UL Master Label for system.
2. Perform inspections to obtain an LPI certification.

B. Prepare test and inspection reports and certificates.

END OF SECTION 13 46 13 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 13 47 13 00 - CATHODIC PROTECTION

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Magnesium anodes, Type II.
2. Magnesium/manganese alloy anodes.
3. Zinc anodes for buried service, Type Z-1.
4. Permanent reference electrodes.
5. Wire and cable.
6. Test stations.
7. Sealing, potting, and dielectric compounds.

1.2 PERFORMANCE REQUIREMENTS

A. Delegated Design: Design, supervise, test, and inspect the installation of cathodic protection systems, including comprehensive engineering analysis by a qualified professional engineer, using performance requirements and design criteria indicated.

1. Design cathodic protection for pipelines in accordance with NACE RP0169.
2. Design cathodic protection for metal underground storage tanks in accordance with NACE RP0285.

B. Survey site and determine soil or water corrosivity (resistivity), current requirements, potential surveys, stray currents, and water chemistry/corrosivity (pH).

C. Select anodes and accessories relevant to level of protection. Design anodes for an estimated life of [**15**][**30**] years before replacement.

D. Cathodic protection systems provide protective potential that complies with referenced NACE standards. Insulators are required if needed to insulate protected metals from other structures.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings: For cathodic protection. Include plans, evaluations, sections, details, and attachments to other work.

1. Detail locations of cathodic protection equipment, devices, and outlets, with characteristics and cross-references to products.
2. Include calculations and details of anode designs.
3. Include labeling and identifying scheme for wires, cables, and test boxes.

C. Delegated Design Submittals: For cathodic protection system indicated to comply with performance requirements and design criteria, including analysis data signed and sealed by the qualified corrosion engineer responsible for their preparation.

1. Conduct site tests necessary for design, including soil resistivity, close-interval potential surveys, testing during construction, interference testing, and training of the Owner's personnel.
2. Provide system design calculations, stating the maximum recommended anode current output density, and the rate of gaseous production, if any, at that current density.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Plans, drawn to scale, and coordinating connections to [**piping**][**and**][**tanks**].

B. Professional Engineer Qualification Data: Submit evidence of current license, corporate authorization (if applicable) of the engineering business, and NACE certifications.

C. Field quality-control reports.

D. Warranty: Sample of special warranty.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:

1. Basic system operation, outlining the step-by-step procedures required for system startup, operation, adjustment of current flow, and shutdown.
2. Instructions for pipe-to-reference cell and tank-to-reference cell potential measurements and frequency of monitoring.
3. Instructions for dielectric connections, interference and sacrificial-anode bonds; and precautions to ensure safe conditions during repair of pipe, tank or other metallic systems. Instructions are to be neatly bound.
4. Locations of all anodes, test stations, and insulating joints.
5. Structure-to-reference cell potentials as measured during the tests required by "Field Quality Control" Article.
6. Recommendations for maintenance testing, including instructions for pipe-to-reference cell potential measurements and frequency of testing.
7. Precautions to ensure safe conditions during repair of pipe system.

1.6 QUALITY ASSURANCE

A. Corrosion Engineer Qualifications: A qualified professional engineer who has education and experience in cathodic protection of buried and submerged metal structures and has NACE accreditation or certification as a Corrosion Specialist or Cathodic Protection Specialist.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Protect anodes from exposure to rain and direct sunlight.

1.8 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace permanent reference electrodes that fail in materials or workmanship within specified warranty period.

1. Warranty Period: [**15**][**30**] years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MAGNESIUM ANODES, TYPE II

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Corrpro Companies, Inc.**]
2. [**Cott Manufacturing Company**]
3. [**CPMasters, Inc.**]
4. [**ELTECH Systems Corporation USA**]
5. [**Farwest Corrosion Control Company**]
6. [**Loresco International**]
7. [**MATCOR**]

B. Comply with ASTM B843.

C. Chemical composition as percent of weight is to be as follows:

1. Aluminum: 0.010 maximum.
2. Manganese: 0.50 to 1.3.
3. Zinc: 0.05 maximum.
4. Silicon: 0.50 maximum.
5. Copper: 0.02 maximum.
6. Nickel: 0.001 maximum.
7. Iron: 0.03 maximum.
8. Other Impurities: 0.05 each; 0.3 maximum total.
9. Magnesium: Remainder.

D. Anode Core: Galvanized steel with anode wire silver-soldered to the core. Connection is to be recessed and epoxy insulated for 600-V rating. Connection is to be covered with heat-shrinkable tubing, and insulation is to be extended over connection.

E. Anode Wires: Factory-installed cables, with copper conductors, suitable for direct burial; not less than No. 10 AWG with Type THWN insulation in accordance with ASTM D1248 and NEMA WC 70/ICEA S-95-658; long enough to extend to accompanying junction box without splicing.

F. Anode Backfill: Backfill materials packaged in water-permeable fabric sack or cardboard container. Anodes are to be factory installed in packaged backfill using methods that result in dense packing of fill with factory-installed anode spacers to ensure centering of anode in packaged anode backfill. Backfill material is to have the following chemical composition by weight:

1. Hydrated Gypsum: 75 percent.
2. Bentonite Clay: 20 percent.
3. Anhydrous Sodium Sulfate: 5 percent.

2.2 MAGNESIUM/MANGANESE ALLOY ANODES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be**

incorporated into the Work include, but are not limited to, the following]:

1. [**Corrpro Companies, Inc.**]
2. [**Cott Manufacturing Company**]
3. [**CPMasters, Inc.**]
4. [**ELTECH Systems Corporation USA**]
5. [**Farwest Corrosion Control Company**]
6. [**Loresco International**]
7. [**MATCOR**]

B. Chemical composition as percent of weight is to be as follows:

1. Aluminum: 0.01 maximum.
2. Manganese: 0.50 to 1.3.
3. Copper: 0.02 maximum.
4. Nickel: 0.001 maximum.
5. Iron: 0.03 maximum.
6. Other Impurities: 0.05 each; 0.3 maximum total.
7. Magnesium: Remainder.

C. Bare Anode Weight: **40 lb (18 kg)**, not including core, and a nominal length of **60 inches (1520 mm)**.

D. Anode Wires: Factory-installed cables, with copper conductors, suitable for direct burial; not less than No. 10 AWG with Type THWN insulation in accordance with ASTM D1248 and NEMA WC 70/ICEA S-95-658; long enough to extend to accompanying junction box without splicing.

E. Anode Backfill: Backfill materials packaged in water-permeable fabric sack or cardboard container. Anodes are to be factory installed in packaged backfill using methods that result in dense packing of fill with factory-installed anode spacers to ensure centering of anode in packaged anode backfill. Backfill material is to have the following chemical composition by weight:

1. Hydrated Gypsum: 75 percent.
2. Bentonite Clay: 20 percent.
3. Anhydrous Sodium Sulfate: 5 percent.

2.3 ZINC ANODES FOR BURIED SERVICE, TYPE Z-1

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Corrpro Companies, Inc.**]
2. [**Cott Manufacturing Company**]
3. [**CPMasters, Inc.**]
4. [**ELTECH Systems Corporation USA**]
5. [**Farwest Corrosion Control Company**]
6. [**Loresco International**]
7. [**MATCOR**]

B. Comply with ASTM B418, Type II.

C. Chemical composition as percent of weight is to be as follows:

1. Aluminum: 0.005 maximum.

2. Cadmium: 0.003 maximum.
3. Iron: 0.0014 maximum.
4. Zinc: Remainder.

D. Bare Anode Ingot Weight: **30 lb (13.6 kg)**, **2 inches (50 mm)** square and **30 inches (760 mm)** long. Packaged weight of anode bag is to be **70 lb (32 kg)**.

E. Anode Wires: Factory-installed cables, with copper conductors, suitable for direct burial; not less than No. 10 AWG with Type THWN insulation in accordance with ASTM D1248 and NEMA WC 70/ICEA S-95-658; long enough to extend to accompanying junction box without splicing.

F. Anode Backfill: Backfill materials packaged in water-permeable fabric sack or cardboard container. Anodes are to be factory installed in packaged backfill using methods that result in dense packing of fill with factory-installed anode spacers to ensure centering of anode in packaged anode backfill. Backfill material is to have the following chemical composition by weight:

1. Hydrated Gypsum: 75 percent.
2. Bentonite Clay: 20 percent.
3. Anhydrous Sodium Sulfate: 5 percent.

2.4 PERMANENT REFERENCE ELECTRODES

A. [**Copper/copper sulfate (Cu/CuSO4)**], suitable for direct burial. Electrode is to be guaranteed by supplier for [**15**][**30**] years' service in the installed environment.

2.5 WIRE AND CABLE

A. Anode Header Cable: Single-conductor, Type HMWPE, insulated cable specifically designed for direct-buried dc service in cathodic protection installations.

1. Conductor: Stranded, annealed, uncoated copper, not less than No. 8 AWG, complying with ASTM B3 and ASTM B8.
2. Insulation: High-molecular-weight polyethylene, complying with NEMA WC 70/ICEA S-95-658.
3. Minimum Average Thickness of Insulation: **110 mils (2.8 mm)** for Nos. 8 through 2 AWG, and **125 mils (3.2 mm)** for Nos. 1 through 4/0 AWG; rated at 600 V.
4. Connectors: [Copper-compression type][exothermic welds].

B. Conductors and Cables: Comply with requirements in Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

1. Bonding Conductors for Joint and Continuity Bonds: Not less than No. 8 AWG, stranded, Type THWN copper conductors.
2. Flexible Pipe Coupling Bonds: Flexible copper straps with electrical resistance equal to No. 1/0 AWG stranded copper wire and with five holes for five exothermic welds to pipe.
3. Test Wires: No. 12 AWG, Type THWN copper conductors.
4. Resistance Wires: No. 16 or No. 22 AWG nickel-chromium wire.
5. Cables for Installation in Conduit: Type THWN copper conductors.

2.6 TEST STATIONS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Corrpro Companies, Inc.**]
2. [**Cott Manufacturing Company**]
3. [**CPMasters, Inc.**]

B. Plastic Test Stations: Flush-mounted type, manufactured of high-impact-resistant PVC or polycarbonate with watertight conduit connections and cover and removable terminal board having at least five terminals.

C. Test Station Mounting Enclosures:

1. Non-Traffic-Area Boxes: Comply with requirements in Section 260533.16 "Boxes and Covers for Electrical Systems."
2. Traffic-Area Boxes: Comply with requirements in Section 260543 "Underground Ducts and Raceways for Electrical Systems." Boxes are to have cast-iron covers with a welded bead legend "CP TEST."

2.7 SEALING, POTTING, AND DIELECTRIC COMPOUNDS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**Chase Corporation - Chase Specialty Coatings**]
3. [**Farwest Corrosion Control Company**]

B. Sealing and Dielectric Insulating Compound: Comply with NACE RP0188. Black, rubber based, soft, permanently pliable, tacky, moldable, and unbacked; [**0.125 inch (3 mm)**][**0.5 inch (13 mm)**] thick.

C. Potting Compound: Comply with NACE RP0188. Cast-epoxy, two-package type; fabricated for this purpose and covered with heat-shrinkable tape.

D. Pressure-Sensitive, Vinyl-Plastic Electrical Tape: Comply with UL 510.

2.8 EXOTHERMIC WELDING MATERIALS

A. Exothermic Weld Kits: Specifically designed by manufacturer for welding materials and shapes required.

B. Exothermic Weld Caps: Dome of high-density polyethylene, **10-mil (0.254-mm)** minimum thickness, filled with mastic and containing a tunnel portion to separate lead wire from exothermic weld.

2.9 COATING REPAIR MATERIALS

A. Touchup Coating Materials: Comply with requirements in Section 099600 "High-Performance Coatings" for coating systems for touchup of factory-applied coatings.

B. Adhesive-Applied Coating Materials: Coating materials are to be compatible with factory-applied coating system.

1. Nominal thickness of coating materials is to be not less than [**8 mils (0.2 mm)**][**16 mils (0.4 mm)**][**24 mils (0.6 mm)**][**40 mils (1.0 mm)**][**60 mils (1.5 mm)**], plus or minus 5 percent.

2. Coating materials are to be one of the following supplied by factory-applied coating system manufacturer:

   a. Polyvinyl-chloride, pressure-sensitive, adhesive tape.
   b. High-density polyethylene/bituminous rubber compound tape.
   c. Butyl rubber tape.
   d. Coal-tar epoxy.

PART 3 - EXECUTION

3.1 INSTALLATION REQUIREMENTS, GENERAL

A. Comply with ANSI/IEEE C2 and NFPA 70.

B. Make connections to ferrous pipe[**and metal tanks**] using exothermic welding.

C. Coat welds with the coating repair material and apply an exothermic weld cap.

3.2 INSTALLATION OF MAGNESIUM ANODES, TYPE II

A. Install magnesium anodes at locations that clear obstructions. Install at least **36 inches (900 mm)** and no more than **10 feet (3 m)** from pipe[**or tank**] to be protected. Install in augered holes with top of anode [**24 inches (600 mm) below pipe invert elevation**][**a minimum of 36 inches (900 mm) below finished grade**]. In soils that will collapse into augered holes, use casing of galvanized sheet steel.

B. Install anodes in a dry condition after plastic or waterproof protective covering has been completely removed from water-permeable permanent container that houses anode metal. Do not use anode-connecting wire for lowering anode into hole. Backfill annular space around anode with fine earth in **6-inch (150-mm)** layers; compact each layer using hand tools. Do not strike anode or connecting wire during backfilling and compacting. After backfilling and compacting to within **6 inches (150 mm)** of finished grade, pour approximately **5 gal. (20 L)** of water into each filled hole. After water has been absorbed by earth, complete backfilling to finished level.

C. If rock strata are encountered before achieving specified augured hole depth, install anodes horizontally at depth at least as deep as bottom of pipe to be protected.

D. Install anodes spaced as indicated, [**directly connected**][**connected through a test station**] to the pipeline, allowing slack in connecting wire to compensate for movement during backfill operation.

E. For tank protection, connect groups of anodes to collector cable. Make contact, through a test station, with tank to be protected.

F. Do not use resistance wires to reduce current output of individual or group anodes.

3.3 INSTALLATION OF MAGNESIUM/MANGANESE ALLOY ANODES

A. Install magnesium anodes at locations that clear obstructions. Install at least **36 inches (900 mm)** and no more than **10 feet (3 m)** from pipe[**or tank**] to be protected. Install in augered holes with top of anode [**24 inches (600 mm) below pipe invert elevation**][**a minimum of 36 inches (900 mm) below finished grade**]. In soils that will collapse into augered holes, use casing of galvanized sheet steel.

B. Install anodes in a dry condition after plastic or waterproof protective covering has been completely removed from water-permeable permanent container that houses anode metal. Do not use anode-connecting wire for lowering anode into hole. Backfill annular space around anode with fine earth in **6-inch (150-mm)** layers; compact each layer using hand tools. Do not strike anode or connecting wire during backfilling and compacting. After backfilling and compacting to within **6 inches (150 mm)** of finished grade, pour approximately **5 gal. (20 L)** of water into each filled hole. After water has been absorbed by earth, complete backfilling to finished level.

C. If rock strata are encountered before achieving specified augured hole depth, install anodes horizontally at depth at least as deep as bottom of pipe to be protected.

D. Install anodes spaced as indicated, [**directly connected**][**connected through a test station**] to the pipeline, allowing slack in connecting wire to compensate for movement during backfill operation.

E. For tank protection, connect groups of anodes to collector cable. Make contact, through a test station, with tank to be protected.

F. Do not use resistance wires to reduce current output of individual or group anodes.

3.4 INSTALLATION OF ZINC ANODES FOR BURIED SERVICE, TYPE Z-1

A. Install zinc anode horizontally in a hole at least **3 inches (76 mm)** larger than anode. Install anode under new copper water tubing, including service lines, blowoffs, and air releases. Separate piping and anode by at least **24 inches (600 mm)**, but not more than **60 inches (1520 mm)**.

B. Install anode midway between both ends of piping. Install anode wire in piping trench and connect to piping at an accessible location. Install anode wire in PVC conduit where rising out of the ground to the aboveground connection.

3.5 INSTALLATION OF PERMANENT REFERENCE ELECTRODES

A. Install directly beneath the buried metallic component being protected.

3.6 INSTALLATION OF WIRE AND CABLE

A. Install conductors, except anode wires, in PVC conduit with waterproof PVC junction boxes. Comply with requirements in Section 260533.13 "Conduit for Electrical Systems" for conduit and its installation.

B. Anode Wire Installation: Cover trench bottom for the anode wire with **3-inch (76-mm)** layer of sand or stone-free earth. Center wire on backfill layer and do not stretch or kink the conductor. Place backfill over wire in layers not exceeding **6 inches (150 mm)** deep, and compact each layer. Use clean fill, free from roots, vegetable matter, and refuse. Place cable underground-line warning tape within **18 inches (460 mm)** of finished grade, above cable and conduit.

C. Bonding Conductors: Install conductors on metallic pipe and tanks, to and across buried flexible couplings, mechanical joints, and flanged joints except at places where insulating joints are specified. Welded and threaded joints are considered electrically continuous and do not require bonding.

1. Install at least two bonds between parts requiring bonding.
2. Bonding conductors must contain sufficient slack for anticipated movement between structures. Bonding conductors across pipe joints are to have not less than a **4-inch (100-mm)** slack for pipe

expansion, contraction, and soil stress.

3. Connect bonding conductors to pipe, coupling follower rings and coupling middle ring or sleeve. Connect bonding conductors with exothermic welds.

D. For wire splicing, use compression connectors or exothermic welds.

3.7 INSTALLATION OF TEST STATIONS

A. Install test stations as follows:

1. At **1000-foot (300-m)** intervals.
2. At insulating joints.
3. At both ends of casings when casing material is included in the cathodic protection system.
4. Where pipe crosses other metal pipes.
5. Where pipe connects to existing piping system.
6. Where pipe connects to dissimilar metal pipe.
7. At each tank component.

B. Install test stations on backfill complying with requirements for trench bottom fill for anode wires unless otherwise indicated.

C. Terminate test conductors on terminal boards and install a spare set of test leads at each testing location.

3.8 INSTALLATION OF PIPE JOINTS

A. Insulating Flange Sets: Cover flanges with sealing and dielectric compound.

B. Insulating Unions: Install electrical isolation at each building entrance and at other locations indicated on approved Delegated Design Drawings. Cover unions with sealing and dielectric compound.

3.9 INSTALLATION OF INSULATING PIPE SLEEVES

A. Install insulating sleeves between metallic piping and metal buildings, hangers, supports, and other metal structures. Completely surround the metallic pipe for the full length of the steel contact and effectively prevent contact between the cathodically protected metallic pipe and other metallic structures. Support insulating sleeve to prevent damage to coating and to accommodate relative movement, vibrations, and temperature differentials.

3.10 DISSIMILAR METALS

A. Underground Dissimilar Piping: Coat insulating joint and pipe at joints of dissimilar piping material with sealing and dielectric compound for a minimum distance of 10 pipe diameters on both sides of joint.

B. Underground Dissimilar Valves: Coat dissimilar ferrous valves and pipe with sealing and dielectric compound for a minimum distance of 10 pipe diameters on both sides of valve.

C. Aboveground Dissimilar Pipe and Valves: If dissimilar metal pipe joints and valves are not buried and are exposed only to atmosphere, coat connection or valve, including pipe, with sealing and dielectric compound for a minimum distance of three pipe diameters on both sides of junction.

3.11 COATINGS

A. Field Joints: Apply adhesive-applied coating system in a thickness to achieve corrosion protection equal to adjacent factory-applied coating.

3.12 IDENTIFICATION

A. Comply with requirements in Section 260553 "Identification for Electrical Systems."

1. Identify anode wires and anode header cables with marker tape.
2. Identify underground wires and cables with underground-line warning tape.
3. Identify text boxes with engraved, laminated acrylic or melamine label, permanently attached to text box.

3.13 FIELD QUALITY CONTROL

A. Comply with NACE RP0169 and NACE RP0285.

B. Testing Agency: [**the Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

C. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

D. Tests and Inspections: Perform the following tests and inspections[**with the assistance of a factory-authorized service representative**]:

1. Static Pull Test: Choose, at random, one completed anode of each type for this destructive test. Demonstrate that anode wire connections have enough strength to withstand a minimum tensile load of **300 lb (136 kg)**. If test fails, replace all anodes and repeat test at another randomly selected anode.
2. Insulation Testing: Before anode system is connected to [**pipe**][**and**][**tank**], test insulation at each insulating joint and fitting. Demonstrate that no metallic contact, or short circuit, exists between the two insulated sections of [**pipe**][**and**][**tank**]. Replace defective joints or fittings.
3. Bonding Tests: Test for electrical continuity across all bonded joints. Repair or add additional bonds until electrical continuity is achieved.
4. Baseline Potentials: After backfilling of [**pipe and**][**pipe, tank, and**] anodes is completed, but before anodes are connected to [**pipe**][**and**][**tank**], measure the static potential of [**pipe**][**and**][**tank**] to soil. Record initial measurements.
5. Anode Output: Measure electrical current as anodes or groups of anodes are connected to [**pipe**][**and**][**tank**]. Use a low-resistance ammeter. Record current, date, time, and location of each measurement.
6. Reference Electrode Potential Measurements: On completion of installation of entire cathodic protection system, make electrode potential measurements of [**pipe**][**and**][**tank**] in accordance with NACE RP0169, using a copper/copper-sulfate reference electrode and a potentiometer-voltmeter, or a dc voltmeter with an internal resistance (sensitivity) of not less than 100,000 ohms per volt and a full scale of 1 or 2 V. Make measurements at same locations as those used for baseline potentials. Record voltage, date, time, and location of each measurement, using one of the following two methods:

a. 0.85 V Negative Voltage: With cathodic system in operation, measure a negative voltage of at least minus 0.85 V between [pipe][tank] and a saturated copper/copper-sulfate reference electrode contacting the earth directly over [pipe][tank].

b. 100-mV Polarization Voltage: Determine polarization voltage shift by interrupting protective current and measuring polarization decay. An immediate voltage shift will occur if protective current is interrupted. Use voltage reading, after immediate shift, as base reading from which to measure polarization decay. Measure at least a minimum polarization voltage shift of 100 mV between [pipe][tank] and a saturated copper/copper-sulfate reference electrode contacting the earth directly over [pipe][tank].

E. Location of Measurements for Piping: For coated piping or conduit, measure from reference electrode in contact with the earth directly over pipe. Measure at intervals not exceeding **400 feet (120 m)**. Make additional measurements at each distribution service riser, with reference electrode placed directly over service line.

F. Location of Measurements for Tanks: For underground tanks, measure from reference electrode located as follows:

1. Directly over center of tank.
2. At a point directly over tank and midway between each pair of anodes.
3. At each end of tank.

G. Interference Testing: Test interference with cathodic protection from any foreign [**pipes**][**and**][**tanks**] in cooperation with the Owner of foreign [**pipes**][**and**][**tanks**]. Report results and recommendations.

H. Stray Current Measurements: Perform at each test station. Mitigate stray currents due to lightning or overhead ac power transmission lines as provided for in NACE standards.

I. Inspect coatings; comply with NACE RP0188. Repair imperfections of factory-applied coatings as specified in "Coatings" Article.

1. Use electronic holiday detectors to detect coating imperfections.
2. All damage to the protective coating during transit and handling is to be repaired before installation.
3. Repair factory-applied coatings to have equal or better corrosion resistance than the factory-applied coating system. Field-repair material is to be of the type approved by, and is to be applied as recommended by, manufacturer of the coating material.

3.14 ADJUSTING

A. Adjust cathodic current using resistors as recommended by corrosion engineer who prepared the Delegated Design Submittal in Part 1.

B. During the first year after Substantial Completion, test, inspect, and adjust cathodic protection system every three months to ensure its continued compliance with specified requirements.

3.15 DEMONSTRATION

A. [**Engage a factory-authorized service representative to train**][**Train**] the Owner's maintenance personnel to adjust, operate, and maintain cathodic protection system.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 13 49 00 00 - RADIATION PROTECTION

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Lead sheet, strip, and plate.
2. Lead bricks.
3. Borated polyethylene sheets.
4. High-density concrete blocks.
5. Lead-lined gypsum board.
6. Lead-lined softwood plywood.
7. Lead glass.
8. Lead glazing plastic.
9. Lead-lined hollow-metal doors.
10. Lead-lined hollow-metal frames.
11. Lead-lined flush wood doors.
12. Lead-lined split-core wood doors.
13. Lead-lined modular shielding partitions.
14. Informational signs.

B. Related Requirements:

1. Section 033000 "Cast-in-Place Concrete" for concrete floor topping over lead shielding in concrete slabs.
2. Section 055000 "Metal Fabrications" for steel framing members for bracing [**lead-brick**][**and**][**high-density concrete block**] wall shielding.

1.2 DEFINITIONS

A. Lead Equivalence: The thickness of lead that provides the same attenuation (reduction of radiation passing through) as the material in question under the specified conditions.

1. Lead equivalence specified for materials used in diagnostic x-ray rooms is as measured at 100 kV unless otherwise indicated.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1. Review methods and procedures related to radiation protection, including, but not limited to, the following:

a. Sequence and schedule of radiation protection work in relation to other work.
b. Supplementary lead shielding at duct, pipe, and conduit penetrations of radiation protection.
c. Methods of attaching other construction and equipment to lead-lined finishes.
d. Notification procedures for work that requires modifying radiation protection.

e. Requirements for field quality control.

1.4 ACTION SUBMITTALS

A. Product Data:

1. Lead sheet, strip, and plate.
2. Lead bricks.
3. Borated polyethylene sheets.
4. High-density concrete blocks.
5. Lead-lined gypsum board.
6. Lead-lined softwood plywood.
7. Lead glass.
8. Lead glazing plastic.
9. Lead-lined hollow-metal doors.
10. Lead-lined hollow-metal frames.
11. Lead-lined flush wood doors.
12. Lead-lined split-core wood doors.
13. Lead-lined modular shielding partitions.
14. Informational signs.

B. Product Data Submittals:

1. Doors and Frames: Include construction details, material descriptions, core descriptions, [**fire-resistance ratings,**][**temperature-rise ratings,**] and finishes.

C. Sustainable Design Submittals:

1. Chain-of-Custody Certificates: For certified wood products. Include statement of costs.
2. Chain-of-Custody Qualification Data: For manufacturer and vendor.
3. Product Data: For composite wood products, indicating that product contains no urea formaldehyde.
4. Laboratory Test Reports: For composite wood products, indicating compliance with requirements for low-emitting materials.
5. Laboratory Test Reports: For composite wood products, indicating compliance with requirements for low-emitting materials.
6. Product Data: For composite wood products, indicating compliance with requirements for formaldehyde emissions.
7. Product Data: For composite wood products, indicating that product contains no urea formaldehyde.

D. Shop Drawings: Show layout of radiation-protected areas, indicating lead thickness or lead equivalence of components. Show components and installation conditions not fully dimensioned or detailed in product data.

1. Show ducts, pipes, conduit, and other objects that penetrate radiation protection; include details of penetrations.
2. Show details of joints between radiation protection materials.
3. Show details of securing [**lead bricks**][**and**][**high-density concrete blocks**] to structure.
4. Include door details, including elevations, frame dimensions and profile, [**glazed light,**][**louver cutouts,**]and clearances and undercuts.

E. Samples: For units with factory-applied color finishes.

F. Product Schedule: For [**observation windows and**]doors and frames, prepared by or under the supervision of supplier, using same reference numbers for details and openings as those on Drawings. Coordinate with final door hardware schedule.

1.5 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: For assemblies with radiation protection materials, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Miscellaneous metal members that support [**lead bricks**][**and**][**high-density concrete blocks**].
2. Items penetrating radiation protection materials, including the following:

a. Electrical services.
b. Air outlets and inlets.
c. Sprinklers.
d. Access panels.

B. Sample Warranty: For warranty.

1.6 QUALITY ASSURANCE

A. Installer Qualifications: Fabricator of products.

B. Manufacturer Qualifications: A qualified manufacturer that is certified for chain of custody by an FSC-accredited certification body.

C. Certified Wood: Provide an invoice including vendor's chain-of-custody number, product cost, and entity being invoiced.

D. Vendor Qualifications: A vendor that is certified for chain of custody by an FSC-accredited certification body.

E. Vendor Qualifications: A vendor that is certified for chain of custody by an FSC-accredited certification body.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Lead-Lined Gypsum Panels and Plywood: Store inside under cover, and keep dry and protected against weather, condensation, direct sunlight, construction traffic, and other potential causes of damage. Stack panels flat and supported on risers on a flat platform to prevent sagging.

B. Lead-Lined, Hollow-Metal Doors and Frames: Comply with requirements in Section 081113 "Hollow Metal Doors and Frames" for delivery, storage, and handling.

C. Lead-Lined Wood Doors: Comply with requirements in Section 081416 "Flush Wood Doors" for delivery, storage, and handling.

1.8 FIELD CONDITIONS

A. Environmental Limitations: Do not deliver or install radiation protection until spaces are enclosed and

weathertight, wet work in spaces is complete and dry, and temporary HVAC system is operating and maintaining ambient temperature and humidity conditions at occupancy levels during the remainder of the construction period.

1.9 WARRANTY

A. Warranty for Lead-Lined Wood Doors: Comply with requirements in Section 081416 "Flush Wood Doors."

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each type of radiation protection product from single source from single manufacturer[**unless otherwise indicated**].

2.2 PERFORMANCE REQUIREMENTS

A. Provide materials and workmanship, including joints and fasteners, that maintain continuity of radiation protection at all points and in all directions equivalent to materials specified in thicknesses and locations indicated.

B. Materials, thicknesses, and configurations of radiation protection products indicated are based on radiation protection design prepared by the Owner's radiation health physicist. This design is available to Contractor upon request.

C. Lead-Lined Assemblies: Unless otherwise indicated, provide lead thickness in lead-lined assemblies of not less than lead thickness indicated for assemblies in which they are installed.

D. Lead Glazing: Unless otherwise indicated, provide lead equivalence of not less than that indicated for assembly in which glazing is installed.

E. Fire-Rated and Smoke-Control Door and Frame Assemblies: Comply with [**Section 081113 "Hollow Metal Doors and Frames"**][**and**][**Section 081416 "Flush Wood Doors"**].

2.3 LEAD SHEET, STRIP, AND PLATE

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**A&L Shielding Inc.**]
2. [**ABM Lead Corporation**]
3. [**El Dorado Metals, Inc**]
4. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
5. [**Mayco Industries**]
6. [**MediRay**]
7. [**NELCO Worldwide**]
8. [**New Shield, Inc.**]

9. [**Pitts Little Corporation**]
10. [**Radiation Protection Products, Inc**]
11. [**Ray-Bar Engineering Corp**]
12. [**Ultraray Radiation Protection**]

B. Lead Sheet, Strip, and Plate: ASTM B749, Alloy UNS No. L51121 (chemical-copper lead).

2.4 LEAD BRICKS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**A&L Shielding Inc.**]
2. [**ABM Lead Corporation**]
3. [**El Dorado Metals, Inc**]
4. [**Global Partners in Shielding, Inc.**]
5. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
6. [**Mayco Industries**]
7. [**MediRay**]
8. [**NELCO Worldwide**]
9. [**New Shield, Inc.**]
10. [**Pitts Little Corporation**]
11. [**Radiation Protection Products, Inc**]
12. [**Ray-Bar Engineering Corp**]
13. [**Ultraray Radiation Protection**]

B. Lead Bricks: Cast- or extruded-lead bricks with interlocking tongue and grooves or wedge-shape edges, made from pig lead complying with ASTM B29 with 0.5 percent antimony added.

2.5 BORATED POLYETHYLENE SHEETS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**A&L Shielding Inc.**]
2. [**Accurate Radiation Shielding, Inc.**]
3. [**El Dorado Metals, Inc**]
4. [**Global Partners in Shielding, Inc.**]
5. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
6. [**NELCO Worldwide**]
7. [**Pitts Little Corporation**]
8. [**Ultraray Radiation Protection**]

B. Borated Polyethylene Sheets: High-density polyethylene containing not less than [**5**][**30**] percent boron.

1. Color: [**As selected by Architect from manufacturer's standard selection**], as directed by the Owner.

2.6 HIGH-DENSITY CONCRETE BLOCKS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide**

products by one of the following][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**El Dorado Metals, Inc**]
2. [**Global Partners in Shielding, Inc.**]
3. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
4. [**Pitts Little Corporation**]
5. [**Ultraray Radiation Protection**]
6. [**Veritas Medical Solutions**]

B. High-Density Concrete Blocks: High-density cast concrete blocks with curved or wedge-shaped interlocking edges for dry-stack installation; [**145 lb/cu. ft. (2320 kg/cu. m)**][**250 lb/cu. ft. (4000 kg/cu. m)**][**300 lb/cu. ft. (4800 kg/cu. m)**] density.

2.7 LEAD-LINED GYPSUM BOARD

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**A&L Shielding Inc.**]
2. [**ABM Lead Corporation**]
3. [**Accurate Radiation Shielding, Inc.**]
4. [**El Dorado Metals, Inc**]
5. [**Global Partners in Shielding, Inc.**]
6. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
7. [**Mayco Industries**]
8. [**NELCO Worldwide**]
9. [**New Shield, Inc.**]
10. [**Pitts Little Corporation**]
11. [**Radiation Protection Products, Inc**]
12. [**Ray-Bar Engineering Corp**]
13. [**Ultraray Radiation Protection**]

B. Lead-Lined Gypsum Board: **5/8-inch- (15.9-mm-)** thick gypsum board complying with Section 092900 "Gypsum Board," of width and length required for support spacing and to prevent cracking during handling, and with a single sheet of lead laminated to the back of the board.

1. Lead Sheet Lining: Full width [**and length of board**][**of board and length necessary to extend from floor to 84 inches (2134 mm) above floor**][**of board and height as indicated on Drawings**].[**Extend lead sheet lining 1 inch (25.4 mm) beyond one vertical edge of board.**]
2. Furnish [**2-inch- (50-mm-)**] wide lead strips for backing joints.
3. Furnish finishing materials, accessories, and trim for lead-lined gypsum board complying with Section 092900 "Gypsum Board."

2.8 LEAD-LINED SOFTWOOD PLYWOOD

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**A&L Shielding Inc.**]
2. [**Accurate Radiation Shielding, Inc.**]

3. [**El Dorado Metals, Inc**]
4. [**General Veneer Manufacturing Co**]
5. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
6. [**Mayco Industries**]
7. [**NELCO Worldwide**]
8. [**New Shield, Inc.**]
9. [**Pitts Little Corporation**]
10. [**Radiation Protection Products, Inc**]
11. [**Ray-Bar Engineering Corp**]

B. Lead-Lined Softwood Plywood: DOC PS 1, Exposure 1; [**fire-retardant-treated**]with touch-sanded C-plugged veneer on face to receive lead lining. [**5/8-inch- (15.9-mm-)**][**3/4-inch- (19-mm-)**] thick plywood of width and length required for support spacing, with a single sheet of lead laminated to the back of the panel.

1. Lead Sheet Lining: Full width [**and length of panel**][**of panel and length necessary to extend from floor to 84 inches (2133 mm) above floor**][**of panel and height as indicated on Drawings**].[**Extend lead sheet lining 1 inch (25.4 mm) beyond one vertical edge of panel.**]
2. Furnish [**2-inch- (50-mm-)**] wide lead strips for backing joints.
3. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.
4. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.
5. Certified Wood: Wood products shall be labeled according to the AF&PA's Sustainable Forestry Initiative, be certified as "FSC Pure" according to FSC STD-01-001 and FSC STD-40-004, or be certified and labeled according to the standards of the Programme for Endorsement of Forest Certification.
6. Certified Wood: Wood products shall [**contain not less than 60 percent**][**be made from**] certified wood tracked through a chain-of-custody process. Certified wood documentation shall be provided by sources certified through a forest certification system with principles, criteria, and standards developed using ISO/IEC Guide 59 or the World Trade Organization's "WTO Agreement on Technical Barriers to Trade."
7. Certified Wood: Wood products shall be certified according to the American Tree Farm System's "AFF Standard," the AF&PA's Sustainable Forestry Initiative, FSC STD-01-001 and FSC STD-40-004, or the standards of the Programme for Endorsement of Forest Certification.

2.9 LEAD GLASS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**A&L Shielding Inc.**]
2. [**ABM Lead Corporation**]
3. [**Accurate Radiation Shielding, Inc.**]
4. [**Amerope Enterprises, Inc**]
5. [**El Dorado Metals, Inc**]
6. [**Global Partners in Shielding, Inc.**]
7. [**Hot Cell Services Corporation**]
8. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
9. [**Mayco Industries**]
10. [**McGrory Glass, Inc**]
11. [**NELCO Worldwide**]
12. [**New Shield, Inc.**]
13. [**Pitts Little Corporation**]

14. [**Radiation Protection Products, Inc**]
15. [**Ray-Bar Engineering Corp**]
16. [**Schott North America, Inc.**]
17. [**Ultraray Radiation Protection**]

B. Lead Glass: Lead-barium, polished glass containing not less than 60 percent heavy metal oxides, including not less than 48 percent lead oxide by weight.

1. Safety Glazing: Where safety glazing is indicated, provide glazing that complies with 16 CFR 1201, Category II.
2. Tempered Safety Glass: ASTM C1048, Kind FT (fully tempered), lead glass with thickness [**as needed to provide lead equivalence indicated**][**as indicated**].
3. Laminated Safety Glass: ASTM C1172 lead glass with thickness [**as needed to provide lead equivalence indicated**][**as indicated**] laminated with polyvinyl butyral interlayer to clear float glass on [**one side**][**both sides**]of lead glass.

2.10 LEAD GLAZING PLASTIC

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
2. [**Mayco Industries**]
3. [**NELCO Worldwide**]
4. [**Ultraray Radiation Protection**]

B. Lead Glazing Plastic: Transparent acrylic sheet impregnated with an organolead compound and containing 30 percent lead by weight.

1. Thickness: [**As needed to provide lead equivalence indicated**][**As indicated**].

2.11 LEAD-LINED HOLLOW-METAL DOORS

A. Lead-Lined Hollow-Metal Doors: Steel doors complying with NAAMM-HMMA 861, except as indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A&L Shielding Inc.**]
b. [**Accurate Radiation Shielding, Inc.**]
c. [**DCI Hollow Metal on Demand**]
d. [**Deronde Products**]
e. [**El Dorado Metals, Inc**]
f. [**Global Partners in Shielding, Inc.**]
g. [**Karpen Steel Custom Doors & Frames**]
h. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
i. [**NELCO Worldwide**]
j. [**New Shield, Inc.**]
k. [**Pitts Little Corporation**]
l. [**Ray-Bar Engineering Corp**]

m. [**Republic Doors and Frames; a Allegion brand**]
n. [**Security Metal Products; a brand of ASSA ABLOY**]
o. [**Ultraray Radiation Protection**]

2. Provide single continuous sheet of lead of thickness [**not less than that required for partition in which door is installed**][**as indicated on Drawings**] extending from top to bottom and edge to edge, supported by hat-channel stiffeners. Do not weld stiffeners through lead lining.
3. Line-inverted channels at top and bottom of doors with lead sheet of same thickness used in door and close with filler channels to provide flush top and bottom edges.
4. Shield cutouts for locksets with lead sheet of same thickness used in door. Overlap lining of cutouts with lining of door by **1 inch (25 mm)**.
5. Prepare doors to receive [**glazed lights**][**and**][**louvers**]; Factory cut and trim openings through doors. Furnish removable stops for glazed openings.
6. Furnish lead-lined astragals for pairs of doors.
7. Factory fit doors to suit frame-opening sizes indicated with [**1/16-inch (1.6-mm)**] clearance at heads and jambs and minimum clearance at bottom.
8. Finish: Apply manufacturer's [**standard primer immediately after cleaning and pretreating**][**factory-applied paint**].

a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

B. Metal Frames for Glazed Lights: Lead-lined frame formed of 0.048-inch- (1.2-mm-) thick, cold-rolled steel sheet; [factory primed for paint][with baked-enamel- or powder-coated] finish[and approved for use in doors of fire-protection rating indicated].

C. Lead Door Louvers: Louvers with [**20**][**30**] percent free area made from formed-lead sheet or lead extrusions of not less than lead thickness required for door in which louver is installed. Fabricate louvers to be lightproof with fixed maze-type blades that maintain required lead equivalence at all points and in all directions. Fit and assemble louvers in doors at factory.

2.12 LEAD-LINED HOLLOW-METAL FRAMES

A. Hollow-Metal Frames: Steel frames complying with NAAMM-HMMA 861, except as indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A&L Shielding Inc.**]
b. [**ABM Lead Corporation**]
c. [**Accurate Radiation Shielding, Inc.**]
d. [**DCI Hollow Metal on Demand**]
e. [**Deronde Products**]
f. [**El Dorado Metals, Inc**]
g. [**Global Partners in Shielding, Inc.**]
h. [**Karpen Steel Custom Doors & Frames**]
i. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
j. [**NELCO Worldwide**]
k. [**New Shield, Inc.**]
l. [**Pioneer Industries; AADG, Inc.; ASSA ABLOY**]
m. [**Pitts Little Corporation**]
n. [**Radiation Protection Products, Inc**]

o. [**Ray-Bar Engineering Corp**]
p. [**Republic Doors and Frames; a Allegion brand**]
q. [**Security Metal Products; a brand of ASSA ABLOY**]
r. [**Ultraray Radiation Protection**]

2. Provide knocked down frames [**where indicated**][**and**][**where installed in existing partitions**].
3. Provide borrowed lite observation window frames of split or telescoping design with welded corners, allowing frame to be installed after construction of partition.

   a. Construct so lead lining overlaps glazing material perimeter by at least **3/8 inch (9.5 mm)**, and furnish removable stops.
   b. Form sill with an opening for sound transmission. Offset sound passage to make opening lightproof and to maintain required lead equivalence at all points and in all directions.

4. Provide [**door**][**and**][**observation window**] frames from steel sheet with minimum thickness of **0.0667 inch (1.7 mm)**.
5. Furnish with additional reinforcements and internal supports to adequately carry the weight of lead-lined doors. Install reinforcements and supports before installing lead lining.
6. Line frame with lead sheet of thickness not less than that required for doors and walls where frames are used. Form lead sheet to match frame contour, continuous in each jamb and across the head, lapping the stops. Form lead shields around areas prepared to receive hardware. Fabricate lead lining wide enough to maintain an effective lap with lead of adjacent shielding.
7. Finish: Apply manufacturer's [**standard primer immediately after cleaning and pretreating**][**factory-applied paint**].

   a. Color and Gloss: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.13 LEAD-LINED FLUSH WOOD DOORS

A. Lead-Lined Flush Wood Doors: Solid-core wood doors with lead sheet laminated to each side of core, with faces applied over lead lining.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**A&L Shielding Inc.**]
   b. [**Accurate Radiation Shielding, Inc.**]
   c. [**General Veneer Manufacturing Co**]
   d. [**Lambton Doors**]
   e. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
   f. [**Masonite Architectural**]
   g. [**Oshkosh Door Company**]
   h. [**Poncraft Door Company**]
   i. [**Radiation Protection Products, Inc**]
   j. [**Ray-Bar Engineering Corp**]
   k. [**Ultraray Radiation Protection**]
   l. [**Vancouver Door Company**]
   m. [**VT Industries, Inc.**]

2. Construction: Hot pressed, bonded (vertical and horizontal edging is bonded to core), with entire

unit abrasive planed before applying lead lining and faces.

3. Core: [**Mineral**][**Particleboard**][**Structural composite lumber**].
4. Lead Lining: Continuous sheets of lead extending from top to bottom and edge to edge; with total lead thickness [**not less than that required for partition in which door is installed**][**as indicated on Drawings**].
5. Wood Veneer Faces: Wood veneer applied to crossbands over core.

    a. Comply with Section 081416 "Flush Wood Doors" for veneer species, grade, and matching; finishing; and other requirements unless otherwise indicated.

6. Plastic-Laminate Faces: High-pressure decorative laminate complying with ISO 4586-3, [**Grade HGS**][**Grade HDS**]; applied to crossbands over core.
7. ANSI/WDMA I.S.1-A Performance Grade: Extra Heavy Duty.

B. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.

C. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.

D. Certified Wood: Wood products shall be labeled according to the AF&PA's Sustainable Forestry Initiative, be certified as "FSC Pure" according to FSC STD-01-001 and FSC STD-40-004, or be certified and labeled according to the standards of the Programme for Endorsement of Forest Certification.

E. Certified Wood: Wood products shall [**contain not less than 60 percent**][**be made from**] certified wood tracked through a chain-of-custody process. Certified wood documentation shall be provided by sources certified through a forest certification system with principles, criteria, and standards developed using ISO/IEC Guide 59 or the World Trade Organization's "WTO Agreement on Technical Barriers to Trade."

F. Certified Wood: Wood products shall be certified according to the American Tree Farm System's "AFF Standard," the AF&PA's Sustainable Forestry Initiative, FSC STD-01-001 and FSC STD-40-004, or the standards of the Programme for Endorsement of Forest Certification.

1. Composite Wood Products: Products shall be made without urea formaldehyde.
2. Composite Wood Products: Products shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Composite Wood Products: Products shall be made using ultra-low-emitting formaldehyde resins as defined in the California Air Resources Board's "Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products" or shall be made with no added formaldehyde.
4. Composite Wood Products: Formaldehyde emission rates shall not be greater than the following when tested according to ASTM D6007 or ASTM E1333:

    a. Hardwood Plywood: 0.05 ppm.
    b. Particleboard: 0.09 ppm.
    c. MDF More Than 5/16 Inch (8 mm) Thick: 0.11 ppm.
    d. MDF 5/16 Inch (8 mm) or Less in Thickness: 0.13 ppm.

5. Composite Wood Products: Products shall be made without urea formaldehyde.
6. Adhesives: Do not use adhesives that contain urea formaldehyde.
7. Adhesives: Use adhesives that meet the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
8. Adhesives: Use adhesives that meet the testing and product requirements of the California

Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

9. Adhesives: Do not use adhesives that contain urea formaldehyde.
10. Adhesives: Do not use adhesives that contain urea formaldehyde.

G. Lead Door Louvers: Louvers with [**20**][**30**] percent free area, made from formed-lead sheet or lead extrusions of not less than lead thickness required for door in which louver is installed. Fabricate louvers to be lightproof with fixed maze-type blades that maintain required lead equivalence at all points and in all directions. Factory fit and assemble louvers in doors.

H. Prepare doors to receive [**glazed lights**][**and**][**louvers**]; factory cut and trim openings through doors.[**Provide removable wood stops for glazed lights.**]

I. Metal Frames for Glazed Lights: Lead-lined frame formed of 0.048-inch- (1.2-mm-) thick, cold-rolled steel sheet; [factory primed for paint][with baked-enamel- or powder-coated] finish[and approved for use in doors of fire-protection rating indicated].

J. Shield cutouts for locksets with lead sheet of same thickness used in door. Lap lining of cutouts with door lining.

K. Furnish lead-lined astragals for pairs of doors.

L. Factory fit doors to suit frame openings indicated with [**1/16-inch (1.6-mm)**] clearance at heads and jambs and minimum clearance at bottom. Factory machine doors for hardware not surface applied.

2.14 LEAD-LINED SPLIT-CORE WOOD DOORS

A. Lead-Lined Split-Core Wood Doors: Solid-core wood doors with lead lining in center of core; with lead thickness [**not less than that required for partition in which door is installed**][**as indicated on Drawings**].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A&L Shielding Inc.**]
    b. [**ABM Lead Corporation**]
    c. [**Accurate Radiation Shielding, Inc.**]
    d. [**Ampco by AJW**]
    e. [**El Dorado Metals, Inc**]
    f. [**Global Partners in Shielding, Inc.**]
    g. [**NELCO Worldwide**]
    h. [**New Shield, Inc.**]
    i. [**Pitts Little Corporation**]
    j. [**Radiation Protection Products, Inc**]
    k. [**Ray-Bar Engineering Corp**]

2. Construction: Split core with lead lining in center of core; bonded (vertical and horizontal edging is bonded to core). Assemble lead lining and core with poured-lead fasteners or steel bolts. Space fasteners not more than **1-1/2 inches (38 mm)** from door edge and about **8 inches (200 mm)** o.c. Countersink bolt heads and cover with lead.
3. Core: [**Mineral**][**Particleboard**][**Structural composite lumber**].
4. Lead Lining: Provide continuous sheet of lead extending from top to bottom and edge to edge;

with total lead thickness [**not less than that required for partition in which door is installed**][**as indicated on Drawings**].

5. Wood Veneer Faces: Wood veneer applied to crossbands over core.

    a. Comply with Section 081416 "Flush Wood Doors" for veneer species, grade, and matching; finishing; and other requirements unless otherwise indicated.

6. Plastic-Laminate Faces: High-pressure decorative laminate complying with ISO 4586-3, [**Grade HGS**][**Grade HDS**]; applied to crossbands over core.
7. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.
8. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.
9. Certified Wood: Wood products shall be labeled according to the AF&PA's Sustainable Forestry Initiative, be certified as "FSC Pure" according to FSC STD-01-001 and FSC STD-40-004, or be certified and labeled according to the standards of the Programme for Endorsement of Forest Certification.
10. Certified Wood: Wood products shall [**contain not less than 60 percent**][**be made from**] certified wood tracked through a chain-of-custody process. Certified wood documentation shall be provided by sources certified through a forest certification system with principles, criteria, and standards developed using ISO/IEC Guide 59 or the World Trade Organization's "WTO Agreement on Technical Barriers to Trade."
11. Certified Wood: Wood products shall be certified according to the American Tree Farm System's "AFF Standard," the AF&PA's Sustainable Forestry Initiative, FSC STD-01-001 and FSC STD-40-004, or the standards of the Programme for Endorsement of Forest Certification.
12. Composite Wood Products: Products shall be made without urea formaldehyde.
13. Composite Wood Products: Products shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
14. Composite Wood Products: Products shall be made using ultra-low-emitting formaldehyde resins as defined in the California Air Resources Board's "Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products" or shall be made with no added formaldehyde.
15. Composite Wood Products: Formaldehyde emission rates shall not be greater than the following when tested according to ASTM D6007 or ASTM E1333:

    a. Hardwood Plywood: 0.05 ppm.
    b. Particleboard: 0.09 ppm.
    c. MDF More Than 5/16 Inch (8 mm) Thick: 0.11 ppm.
    d. MDF 5/16 Inch (8 mm) or Less in Thickness: 0.13 ppm.

16. Composite Wood Products: Products shall be made without urea formaldehyde.
17. Adhesives: Do not use adhesives that contain urea formaldehyde.
18. Adhesives: Use adhesives that meet the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
19. Adhesives: Use adhesives that meet the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
20. Adhesives: Do not use adhesives that contain urea formaldehyde.
21. Adhesives: Do not use adhesives that contain urea formaldehyde.

B. Lead Door Louvers: Louvers with [**20**][**30**] percent free area, made from formed-lead sheet or lead extrusions of not less than lead thickness required for door in which louver is installed. Fabricate louvers to be lightproof with fixed maze-type blades that maintain required lead equivalence at all points and in all directions. Factory fit and assemble louvers in doors.

C. Prepare doors to receive [**glazed lights**][**and**][**louvers**]; factory cut and trim openings through doors.[**Provide removable wood stops for glazed lights.**]

D. Metal Frames for Glazed Lights: Lead-lined frame formed of 0.048-inch- (1.2-mm-) thick, cold-rolled steel sheet; [factory primed for paint][with baked-enamel- or powder-coated] finish[and approved for use in doors of fire-protection rating indicated].

E. Shield cutouts for locksets with lead sheet of same thickness used in door. Lap lining of cutouts with door lining.

F. Furnish lead-lined astragals for pairs of doors.

G. Factory fit doors to suit frame openings indicated with [**1/16-inch (1.6-mm)**] clearance at heads and jambs and minimum clearance at bottom. Factory machine doors for hardware not surface applied.

2.15 LEAD-LINED MODULAR SHIELDING PARTITIONS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Accurate Radiation Shielding, Inc.**]
2. [**Amerope Enterprises, Inc**]
3. [**Global Partners in Shielding, Inc.**]
4. [**MarShield Custom Radiation Shielding Products, a division of Mars Metal Company**]
5. [**New Shield, Inc.**]
6. [**Radiation Protection Products, Inc**]
7. [**Ray-Bar Engineering Corp**]
8. [**S&S Technology**]
9. [**Ultraray Radiation Protection**]

B. Lead-Lined Modular Shielding Partitions: Partial-height modular partitions assembled from factory-finished standard components consisting of lead-lined, steel or aluminum framing members; lead-lined opaque panels; lead glass or glazing plastic vision panels; and hardware necessary for assembly and for securing to other construction. Fabricate opaque panels from honeycomb-core metal panels with polyurethane paint finish.

1. Lead Equivalence for Opaque Panels: [**1/16 inch (1.6 mm)**].
2. Lead Equivalence for Framing Members: [**1/16 inch (1.6 mm)**].
3. Lead Equivalence for Vision Panels: [**1/16 inch (1.6 mm)**].
4. Color of Panels and Framing: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.16 INFORMATIONAL SIGNS

A. Panel Signs: Comply with Section 101423 "Panel Signage."

1. Color: As selected by Architect from manufacturer's full range of colors, as directed by the Owner.
2. Provide copy indicated or as directed.
3. Indicate lead equivalence in millimeters and heights of radiation protection in **inches (millimeters)**.

B. High-Pressure-Laminate Signs: High-pressure laminate engraving stock with contrasting face and core, machine engraved from master templates for accurately formed letters, numbers, and symbols.

1. Color: As selected by Architect from manufacturer's full range of colors, as directed by the Owner.
2. Provide copy indicated or as directed.
3. Indicate lead equivalence in millimeters and heights of radiation protection in **inches (millimeters)**.

C. Rooms Where the Level of Protection Is Uniform Throughout: Provide one sign for each room indicating lead equivalence of partitions, ceilings, floors, doors, and other portions of radiation protection enclosure. Indicate height of radiation protection above floor, or indicate that partitions are radiation protected to full height.

D. Rooms Where the Level of Protection Is Not Uniform Throughout: Provide one sign for each room with different lead equivalences in different locations. Indicate, in tabular form, lead equivalence of each wall, partition, ceiling, floor, door, and window. Indicate height of radiation protection above floor, or indicate that partitions are radiation protected to full height. Indicate where lead equivalence changes or is not continuous.

E. Rooms Where Some Partitions Are without Radiation Protection: Provide one sign for each partition that contains radiation protection, and indicate its lead equivalence. Indicate height of radiation protection above floor, or indicate that partitions are radiation protected to full height.

F. Rooms Where Only the Door Has Radiation Protection: Provide one sign for each door indicating its lead equivalence.

G. Mounting: Provide manufacturer's standard [two-faced tape][adhesive].

2.17 DOOR AND DOOR FRAME FABRICATION

A. Hardware Preparation: Factory prepare doors and frames to receive templated mortised hardware; include cutouts, reinforcement, mortising, drilling, and tapping in accordance with door hardware schedule and templates furnished, as specified in [**Section 087100 "Door Hardware."**][**Section 087111 "Door Hardware (Descriptive Specification)."**]

2.18 MISCELLANEOUS MATERIALS

A. Glazing Compounds, Gaskets, and Accessories: Comply with requirements in Section 088000 "Glazing."

B. Accessories and Fasteners: Manufacturer's standard fasteners and accessories as required for installation, maintaining same lead equivalence as rest of system.

C. Asphalt Coating: Cold-applied asphalt emulsion complying with ASTM D1187/D1187M.

D. Asphalt Felt: ASTM D226/D226M.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates with Installer present for compliance with requirements, installation tolerances, and other conditions affecting performance of radiation protection.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF LEAD SHEET, STRIP, AND PLATES

A. Proceed with installation only after concrete surfaces are clean, dry, and free of depressions and sharp projections that could damage or penetrate lead sheet.

B. Coat concrete surfaces with asphalt emulsion before installing lead sheet.

C. Lead Sheet, 1/8 Inch (3.18 mm) Thick or Less: Install in a single layer with a **2-inch (50-mm)** minimum lap at joints.

D. Lead Sheet More Than 1/8 Inch (3.18 mm) Thick: Install in two or more layers with a **2-inch (50-mm)** minimum lap at joints, or in a single layer with joints butted and covered with a **4-inch- (100-mm-)** wide lead strip of same thickness.

E. Extend lead sheet at least **12 inches (300 mm)** beyond radiation shielding in walls of treatment room.

F. In floor slabs above shielded rooms, where lead sheet is indicated, extend lead sheet at least **12 inches (300 mm)** beyond radiation shielding in walls of room below.

G. At door openings, extend lead sheet at least 12 inches (300 mm) beyond radiation protection in walls and at least 12 inches (300 mm) beyond door opening on both sides[except where lead-lined thresholds are provided].

H. After installation, apply [**one coat**][**two coats**] of asphalt emulsion on top surface of lead sheet and protect from damage until concrete topping is placed.

3.3 INSTALLATION OF LEAD BRICKS

A. Remove projections from concrete surfaces to receive lead bricks, and apply one layer of asphalt felt to prevent contact between lead bricks and concrete.

1. At recesses in concrete floors to receive lead bricks, turn up asphalt felt at perimeter of recess.

B. Install lead bricks to dimensions indicated, tightly fitted together, with joints offset in succeeding courses. Cut bricks neatly at joints with adjacent materials for a snug fit, with edges straight and true and at right angles.

C. Secure lead bricks to structure, as indicated on approved Shop Drawings.

3.4 INSTALLATION OF HIGH-DENSITY CONCRETE BLOCKS

A. Dry-stack blocks in running bond, using methods recommended in writing by high-density concrete block manufacturer.

B. Install concrete blocks to dimensions indicated, tightly fitted together, with joints offset in succeeding courses. Cut neatly at joints with adjacent materials for a snug fit, with edges straight and true and at right angles.

C. Secure concrete blocks to structure, as indicated on approved Shop Drawings.

3.5 INSTALLATION OF LEAD-LINED GYPSUM BOARD

A. Install and finish lead-lined gypsum board in accordance with Section 092900 "Gypsum Board."

B. Install lead-lined gypsum board panels with long edge parallel to supports and lead lining facing supports. Provide blocking at end joints.[**Install using construction adhesive and supplementary fasteners.**]

C. Install lead-lined gypsum board panels in sequence, so lead lining that extends beyond edge of gypsum board is covered by next panel installed.

D. At joints where lead lining does not extend beyond edge of gypsum board panels, install lead strips **2 inches (50 mm)** wide and same thickness as lead lining to face of framing and blocking. Secure lead strips with construction adhesive.

E. Provide shims at face of supports and blocking, where lead lining does not overlap, to provide a uniform plane across panel surfaces.

F. Fasten lead-lined gypsum board to framing, with steel drill screws spaced as recommended in writing by lead-lined gypsum board manufacturer.

G. Two-Layer System: Apply a facing sheet of gypsum board vertically over base sheet, using laminating adhesive recommended in writing by gypsum board manufacturer. Offset joints in finish layer from joints in base layer, and fasten at top and bottom of sheet to support finish panel until adhesive has set.

H. Openings: Extend lead-lined gypsum board into frames of openings, lapping lead lining with lead frames or frame linings at least **1 inch (25 mm)**. Arrange board around openings, so neither horizontal nor vertical joints occur at corners of openings.

I. Install control and expansion joints where indicated, with appropriate trim accessories. Install lead strip on face of framing, extending across joint, and lap with lead lining of gypsum board.

3.6 INSTALLATION OF LEAD-LINED SOFTWOOD PLYWOOD

A. Install fastener shields to framing before installing lead strips at joints.

B. Install lead strips **2 inches (50 mm)** wide and same thickness as lead lining to face of framing and blocking. Secure lead strips with construction adhesive.

C. Provide shims at face of supports and blocking, where lead lining does not overlap, to provide a uniform, plane across panel surfaces.

D. Install lead-lined plywood panels with long edge parallel to supports and lead lining facing supports. Provide blocking at end joints. Fasten lead-lined plywood panels to framing, with adhesive and steel drill screws spaced as recommended in writing by panel manufacturer.

3.7 INSTALLATION OF LEAD-LINED DOORS AND DOOR FRAMES

A. Install lead-lined steel [**doors**][**and**][**door frames**] in accordance with Section 081113 "Hollow Metal Doors and Frames."

1. Apply a coat of asphalt mastic or paint to lead lining in door frames where lead comes in contact with masonry or concrete.

B. Install lead-lined wood doors in accordance with Section 081416 "Flush Wood Doors."

C. Lead-Lined Hollow-Metal Door Frames: Comply with ANSI/NAAMM-HMMA 840 unless otherwise indicated. Except for frames located in existing walls or partitions, place frames before constructing walls. Set frames accurately in position, plumb, and brace securely until permanent anchors are set.

1. Provide three anchors per jamb, located adjacent to hinge on hinge jamb and at corresponding heights on strike jamb.
2. In masonry construction, use wire or T-strap anchors, and apply a coat of asphalt mastic or paint to lead lining where lead comes in contact with masonry or grout.
3. In metal stud construction, use wall anchors attached to studs with screws.
4. In wood stud construction, use strap anchors attached to studs with screws.

D. Lead-Lined Split-Frame Observation Windows: Install lead-lined hollow-metal frames with split or telescoping design, with leaded side of frame on radiation side of wall.

E. Lap lead lining of frames over lining in walls at least **1 inch (25 mm)**.

F. Lead Lining of Frames: Line inside of frames with lead of thickness of not less than that required in doors and walls where frames are used. Form lead to match frame contour, continuous in each jamb and across the head, lapping the stops. Form lead shields around areas prepared to receive hardware. Lap lining over lining in walls at least **1 inch (25 mm)**.

G. Install leaded side of frame on radiation side of wall. Lap lead lining of frames over lining in walls at least **1 inch (25 mm)**.

H. Lead Glazing: Comply with installation requirements in Section 088000 "Glazing" and with manufacturer's written instructions.

I. Line astragals with lead sheet.

J. Hardware: Line covers, escutcheons, and plates to provide effective shielding at cutouts and penetrations of frames and doors. See Section 087100 "Door Hardware" for other installation requirements.

3.8 INSTALLATION OF LEAD-LINED MODULAR SHIELDING PARTITIONS

A. Install partitions after finishes are complete in spaces where partitions are located. Install in accordance with manufacturer's written instructions and approved Shop Drawings.

B. Cut and remove wall base where modular shielding partitions meet other walls, so partition fits tightly to wall.

C. Secure partition framing to floor with **1/4-inch (6.35-mm)** expansion anchors **16 inches (400 mm)** o.c., and fasten to walls and ceilings as indicated. Brace partitions with tie rods fastened to walls or ceilings as indicated.

3.9 INSTALLATION OF PENETRATING ITEMS

A. At penetrations of lead linings, provide lead shields to maintain continuity of protection.

B. Provide lead linings, sleeves, shields, and other protection in thickness of not less than that required in assembly being penetrated.

C. Secure shields at penetrations using adhesive or wire ties but not penetrating fasteners unless indicated on Drawings.

D. Outlet Boxes and Conduit: Cover or line with lead sheet lapped over adjacent lead lining at least **1 inch (25 mm)**. Wrap conduit with lead sheet for a distance of not less than **10 inches (250 mm)** from box.

E. Duct Openings: Unless otherwise indicated, line or wrap ducts with lead sheet for distance from partition/ceiling equal to 3 times the largest opening dimension. Lap lead sheet with adjacent lead lining at least **1 inch (25 mm)**.

F. Piping: Unless otherwise indicated, wrap piping with lead sheet for a distance of not less than **10 inches (250 mm)** from point of penetration.

3.10 FIELD QUALITY CONTROL

A. Testing Agency: the Owner will engage a qualified testing agency to perform tests and inspections after radiology equipment has been installed and placed in operating condition.

B. Correct deficiencies in or remove and replace radiation protection that inspection reports indicate does not comply with specified requirements.

3.11 PROTECTION

A. Lock radiation-protected rooms once doors and locks are installed, and limit access to only those persons performing work in the rooms.

SECTION 22 01 40 81 - EMERGENCY PLUMBING FIXTURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Emergency showers.
2. Emergency eyewashes.
3. Emergency eye/face washes.
4. Emergency combination showers with eyewashes.
5. Emergency combination showers with eye/face washes.
6. Emergency recessed safety stations.
7. Supplemental equipment.
8. Water-tempering equipment.

1.2 DEFINITIONS

A. Barrier-Free Fixture: Emergency plumbing fixture that can be approached, entered, and used by people with disabilities.

B. Plumbed Emergency Plumbing Fixture: Fixture with fixed, potable-water supply.

C. Portable, Self-Contained Emergency Plumbing Fixture: Fixture with flushing-fluid supply.

D. Tepid: Between **60 and 100 deg F (16 and 38 deg C)**.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include flow rates and capacities, furnished specialties, and accessories.

B. Shop Drawings:

1. Plans, elevations, sections, and [**mounting**][**attachment**] details.
2. Details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Diagrams for power, signal, and control wiring.

1.4 INFORMATIONAL SUBMITTALS

A. Field quality-control reports.

B. Emergency fixture third-party certification documentation.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For emergency plumbing fixtures.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials to Owner that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Flushing-Fluid Solution: Separate lot and equal to at least [**200**]<**Insert number**> percent of amount of solution installed for each self-contained unit.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Plumbing fixtures intended to convey or dispense water for human consumption are to comply with the U.S. Safe Drinking Water Act, with requirements of authorities having jurisdiction, and with NSF 61 and NSF 372, or be certified in compliance with NSF 61 and NSF 372 by an ANSI-accredited third-party certification body, in that the weighted average lead content at wetted surfaces is less than or equal to 0.25 percent.

B. Comply with requirements in ICC A117.1 for installation of barrier-free emergency fixtures.

C. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

2.2 EMERGENCY SHOWERS

A. Emergency Shower - Freestanding, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Stingray Systems LLC**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]

c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Stingray Systems LLC**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency showers, freestanding, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1
b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
6. Supply Connection Size: [**NPS 1-1/4 (DN 32)**]<**Insert size**>.
7. Integral Supply Pipe Material: [**Galvanized steel**][**Stainless steel**]<**Insert material**>.
8. Control Valve:

a. Type: Stay-open type with flow regulator.
b. Actuator: Pull rod[**, 60-inch (1524-mm)**].

9. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum-diameter, [**stainless steel**][**plastic**]<**Insert material**>.
10. Mounting: Pedestal[**, barrier-free**].
11. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Modesty curtain.
e. Magnetically actuated proximity switch.
f. <**Insert size**> stainless steel ball valve.
g. <**Insert accessory**>.

B. Emergency Shower - Off Floor, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Sellstrom Manufacturing Company**]
g. [**Speakman Company**]
h. [**Stingray Systems LLC**]
i. [**WaterSaver Faucet Co**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Sellstrom Manufacturing Company**]
g. [**Speakman Company**]
h. [**Stingray Systems LLC**]
i. [**WaterSaver Faucet Co**]
j. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency showers, off floor, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1 (DN 25)**.
7. Integral Supply Pipe Material: [**Galvanized steel**][**Chrome-plated brass**][**Stainless steel**].
8. Control Valve:

a. Type: Stay-open type with flow regulator.
b. Actuator: Pull rod[**, 60-inch (1524-mm)**].

9. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum-diameter, [**stainless steel**][**plastic**]<**Insert material**>.
10. Mounting: [**Horizontal from wall**][**Vertical from ceiling**][**, barrier-free**] and supported from structure.
11. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Modesty curtain.
e. Magnetically actuated proximity switch.
f. <**Insert size**> stainless steel ball valve.
g. <**Insert accessory**>.

C. Emergency Shower - Wall Mounted, Fully Recessed, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Speakman Company**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Bradley Corporation**]
    c. [**Guardian Equipment Co**]
    d. [**Haws Corporation**]
    e. [**Speakman Company**]
    f. [**WaterSaver Faucet Co**]
    g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency showers, wall mounted, fully recessed, plumbed, from single manufacturer.
4. Standards:

    a. ANSI/ISEA Z358.1.
    b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1 (DN 25)**.
7. Integral Supply Pipe Material: [**Chrome-plated brass**][**Stainless steel**]<**Insert material**>.
8. Control Valve: Stay-open type with flow regulator.
9. Enclosure: Wall-mounted, fully recessed, stainless steel enclosure with vandal-resistant access panel.
10. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum-diameter, stainless steel <**Insert material**>.
11. Mounting: [**Horizontal from wall**][**Vertical from ceiling**][**, barrier-free**] and supported from structure.
12. Accessories:

    a. Electric alarm with flashing light and horn.
    b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
    c. Flow switch; single pole.
    d. Modesty curtain.
    e. Magnetically actuated proximity switch.
    f. <**Insert size**> stainless steel ball valve.
    g. <**Insert accessory**>.

D. Emergency Shower - Freeze Resistant, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Guardian Equipment Co**]
    c. [**Haws Corporation**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Guardian Equipment Co**]
c. [**Haws Corporation**]
d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency showers, freeze resistant, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1 (DN 25)**.
7. Integral Supply Pipe Material: Galvanized steel.
8. Control Valve:

a. Type: Stay-open type with flow regulator.
b. Actuator: Wall-mounted push handle.

9. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum-diameter, [**stainless steel**][**plastic**]<**Insert material**>.
10. Mounting: Horizontal from wall[**, barrier-free**]. Concealed piping within heated space.
11. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Modesty curtain.
e. Magnetically actuated proximity switch.
f. <**Insert size**> stainless steel ball valve.
g. <**Insert accessory**>.

2.3 EMERGENCY EYEWASHES

A. Emergency Eyewash - Standard, Freestanding, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bradley Corporation**]
b. [**Guardian Equipment Co**]
c. [**Speakman Company**]
d. [**Stingray Systems LLC**]
e. [**WaterSaver Faucet Co**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bradley Corporation**]
b. [**Guardian Equipment Co**]
c. [**Speakman Company**]
d. [**Stingray Systems LLC**]
e. [**WaterSaver Faucet Co**]
f. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, standard, freestanding, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Galvanized steel**][**Stainless steel**]<**Insert material**>.
8. Control Valve:

a. Type: Stay-open type valve with flow regulator.
b. Actuator: [**Paddle**][**Treadle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**] bowl.
11. Drain Piping:

a. Size: **NPS 1-1/4 (DN 32)** minimum.
b. Finish: Chrome-plated brass.
c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Pedestal.
13. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Dust covers.
e. Magnetically actuated proximity switch.
f. Scald protection valve.
g. <**Insert size**> stainless steel ball valve.
h. <**Insert accessory**>.

B. Emergency Eyewash - Barrier-Free, Freestanding, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bradley Corporation**]
b. [**Stingray Systems LLC**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Bradley Corporation**]
b. [**Stingray Systems LLC**]
c. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, barrier free, freestanding, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Stainless steel**]<**Insert material**>.
8. Control Valve:

a. Type: Stay-open type with flow regulator.
b. Actuator: [**Paddle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**] bowl.
11. Drain Piping:

a. Size: **NPS 1-1/4 (DN 32)** minimum.
b. Finish: Chrome-plated brass.
c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Offset pedestal.
13. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Dust covers.
e. Magnetically actuated proximity switch.
f. Scald protection valve.
g. <**Insert size**> stainless steel ball valve.
h. <**Insert accessory**>.

C. Emergency Eyewash - Standard, Wall Mounted, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bradley Corporation**]
b. [**Speakman Company**]
c. [**Stingray Systems LLC**]
d. [**WaterSaver Faucet Co**]

e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Bradley Corporation**]
   b. [**Speakman Company**]
   c. [**Stingray Systems LLC**]
   d. [**WaterSaver Faucet Co**]
   e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, standard, wall mounted, plumbed, from single manufacturer.
4. Standards:

   a. ANSI/ISEA Z358.1.
   b. ASME A112.18.1/CSA B125.1.
   c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Chrome-plated brass**]<**Insert material**>.
8. Control Valve:

   a. Type: Stay-open with flow regulator.
   b. Actuator: [**Paddle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**]<**Insert material**> bowl.
11. Drain Piping:

    a. Size: **NPS 1-1/4 (DN 32)** minimum.
    b. Finish: Chrome-plated brass.
    c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Wall bracket.
13. Accessories:

    a. Electric alarm with flashing light and horn.
    b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
    c. Flow switch; single pole.
    d. Dust covers.
    e. Magnetically actuated proximity switch.
    f. Scald protection valve.
    g. <**Insert size**> stainless steel ball valve.
    h. <**Insert accessory**>.

D. Emergency Eyewash - Barrier Free, Wall Mounted, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bradley Corporation**]
b. [**Speakman Company**]
c. [**Stingray Systems LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bradley Corporation**]
b. [**Speakman Company**]
c. [**Stingray Systems LLC**]
d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, barrier free, wall mounted, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Supply Connection: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Chrome-plated brass**]<**Insert material**>.
8. Control Valve:

a. Type: Stay-open with flow regulator.
b. Actuator: [**Paddle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**]<**Insert material**> bowl.
11. Drain Piping:

a. Size: **NPS 1-1/4 (DN 32)** minimum.
b. Finish: Chrome-plated brass.
c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Wall bracket.
13. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Dust covers.
e. Magnetically actuated proximity switch.
f. Scald protection valve.
g. <**Insert size**> stainless steel ball valve.
h. <**Insert accessory**>.

E. Emergency Eyewash - Deck or Wall Mounted, Swivel Type, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Bradley Corporation**]
b. [**Guardian Equipment Co**]
c. [**Speakman Company**]
d. [**Stingray Systems LLC**]
e. [**WaterSaver Faucet Co**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bradley Corporation**]
b. [**Guardian Equipment Co**]
c. [**Speakman Company**]
d. [**Stingray Systems LLC**]
e. [**WaterSaver Faucet Co**]
f. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, [**deck**][**wall**] mounted, swivel type, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Chrome-plated brass**][**Stainless steel**].
8. Control Valve:

a. Type: Stay-open type with flow regulator.
b. Actuator: [**Rotation of spray-head assembly**][**Paddle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two spray heads with offset piping.
10. Mounting: [**Deck mounted next to sink**][**Deck mounted on sink**][**Wall mounted**]<**Insert mounting**>.

F. Emergency Eyewash - Portable, Self-Contained :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bradley Corporation**]
b. [**Encon Safety Products**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Speakman Company**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Bradley Corporation**]
b. [**Encon Safety Products**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Speakman Company**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, portable, self-contained, from single manufacturer.
4. Standard: ANSI/ISEA Z358.1.
5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Pressure Tank: [**10 gal. (38 L)**]<**Insert value**>, stainless steel, cylindrical, with pressure gauge, and suitable for on-floor installation.
7. Flushing Fluid: Medically acceptable solution manufactured and labeled in accordance with applicable regulations.
8. Spray-Head Assembly: [**Chrome-plated copper alloy**][**Stainless steel**] piping with flow regulator; control valve; and two spray heads mounted on tank.
9. Control Valve:

a. Type: Stay-open type with flow regulator.
b. Actuator: Paddle.

10. Drench Hose: Handheld spray head with squeeze-handle actuation and hose attached to tank.

G. Emergency Eyewashes - Standard, Self-Contained :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Honeywell Industrial Safety; Honeywell International, Inc.**]
g. [**Sellstrom Manufacturing Company**]
h. [**Speakman Company**]
i. [**WaterSaver Faucet Co**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]

f. [**Honeywell Industrial Safety; Honeywell International, Inc.**]
g. [**Sellstrom Manufacturing Company**]
h. [**Speakman Company**]
i. [**WaterSaver Faucet Co**]
j. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, standard, self-contained, from single manufacturer.
4. Standard: ANSI/ISEA Z358.1.
5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Gravity Tank: [**7 gal. (27 L) minimum**]<**Insert value**>, plastic, and suitable for shelf mounting.
7. Flushing Fluid: Medically acceptable solution manufactured and labeled in accordance with applicable regulations.
8. Actuator: Pull-down front panel or pull strap.
9. Spray Heads: Protected, two mounted on tank.

H. Emergency Eyewash - Freeze Resistant, Self-Contained :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bradley Corporation**]
b. [**Encon Safety Products**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Speakman Company**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bradley Corporation**]
b. [**Encon Safety Products**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Speakman Company**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eyewashes, freeze resistant, self-contained, from single manufacturer.
4. Standard: ANSI/ISEA Z358.1.
5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Gravity Tank: [**7 gal. (27 L) minimum**][**14 gal. (53 L) minimum**][**20 gal. (76 L) minimum**]<**Insert value**>, plastic, and suitable for shelf mounting.
7. Flushing Fluid: Medically acceptable solution manufactured and labeled in accordance with applicable regulations.
8. Actuator: Pull-down front panel or pull strap.
9. Spray Heads: Protected, two mounted on tank.
10. Heating System: Electric, 120 V ac; insulation enclosed in a protective jacket.

2.4 EMERGENCY EYE/FACE WASHES

A. Emergency Eye/Face Wash - Standard, Freestanding, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Bradley Corporation**]
    c. [**Encon Safety Products**]
    d. [**Guardian Equipment Co**]
    e. [**Haws Corporation**]
    f. [**Speakman Company**]
    g. [**Stingray Systems LLC**]
    h. [**WaterSaver Faucet Co**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Bradley Corporation**]
    c. [**Encon Safety Products**]
    d. [**Guardian Equipment Co**]
    e. [**Haws Corporation**]
    f. [**Speakman Company**]
    g. [**Stingray Systems LLC**]
    h. [**WaterSaver Faucet Co**]
    i. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eye/face washes, standard, freestanding, plumbed, from single manufacturer.
4. Standards:

    a. ANSI/ISEA Z358.1.
    b. ASME A112.18.1/CSA B125.1.
    c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Galvanized steel**][**Stainless steel**][**PVC**].
8. Control Valve:

    a. Type: Stay-open type with flow regulator.
    b. Actuator: [**Paddle**][**Treadle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two or four receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**] bowl.
11. Drain Piping:

    a. Size: **NPS 1-1/4 (DN 32)** minimum.
    b. Finish: Chrome-plated brass.

c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Pedestal.
13. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Dust covers.
e. Magnetically actuated proximity switch.
f. Scald protection valve.
g. <**Insert size**> stainless steel ball valve.
h. <**Insert accessory**>.

B. Emergency Eye/Face Wash - Barrier Free, Freestanding, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Guardian Equipment Co**]
d. [**Stingray Systems LLC**]
e. [**WaterSaver Faucet Co**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Guardian Equipment Co**]
d. [**Stingray Systems LLC**]
e. [**WaterSaver Faucet Co**]
f. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eye/face washes, barrier free, freestanding, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Galvanized steel**][**Stainless steel**].
8. Control Valve:

a. Type: Stay-open type with flow regulator.
b. Actuator: [**Paddle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two or four receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**] bowl.
11. Drain Piping:

    a. Size: **NPS 1-1/4 (DN 32)** minimum.
    b. Finish: Chrome-plated brass.
    c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange complying with ASME A112.18.2/CSA B125.2.

12. Mounting: Offset pedestal.
13. Accessories:

    a. Electric alarm with flashing light and horn.
    b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
    c. Flow switch; single pole.
    d. Dust covers.
    e. Magnetically actuated proximity switch.
    f. Scald protection valve.
    g. <**Insert size**> stainless steel ball valve.
    h. <**Insert accessory**>.

C. Emergency Eye/Face Wash - Standard, Wall Mounted, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Bradley Corporation**]
    c. [**Encon Safety Products**]
    d. [**Guardian Equipment Co**]
    e. [**Haws Corporation**]
    f. [**Speakman Company**]
    g. [**Stingray Systems LLC**]
    h. [**WaterSaver Faucet Co**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Bradley Corporation**]
    c. [**Encon Safety Products**]
    d. [**Guardian Equipment Co**]
    e. [**Haws Corporation**]
    f. [**Speakman Company**]
    g. [**Stingray Systems LLC**]
    h. [**WaterSaver Faucet Co**]
    i. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eye/face washes, standard, wall mounted, plumbed, from single manufacturer.

4. Standards:

    a. ANSI/ISEA Z358.1.
    b. ASME A112.18.1/CSA B125.1.
    c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Chrome-plated brass**][**Stainless steel**][**PVC**]<**Insert material**>.
8. Control Valve:

    a. Type: Stay-open type with flow regulator.
    b. Actuator: [**Paddle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two or four receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**]<**Insert material**> bowl.
11. Drain Piping:

    a. Size: **NPS 1-1/4 (DN 32)** minimum.
    b. Finish: Chrome-plated brass.
    c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Wall bracket.
13. Accessories:

    a. Electric alarm with flashing light and horn.
    b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
    c. Flow switch; single pole.
    d. Dust covers.
    e. Magnetically actuated proximity switch.
    f. Scald protection valve.
    g. <**Insert size**> stainless steel ball valve.
    h. <**Insert accessory**>.

D. Emergency Eye/Face Wash - Barrier Free, Wall Mounted, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Bradley Corporation**]
    c. [**Guardian Equipment Co**]
    d. [**Haws Corporation**]
    e. [**Speakman Company**]
    f. [**Stingray Systems LLC**]
    g. [**WaterSaver Faucet Co**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Safety; a Division of Morris Group International**]

b. [**Bradley Corporation**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Speakman Company**]
f. [**Stingray Systems LLC**]
g. [**WaterSaver Faucet Co**]
h. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eye/face washes, accessible, wall mounted, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Chrome-plated brass**][**Stainless steel**].
8. Control Valve:

a. Type: Stay-open with flow regulator.
b. Actuator: [**Paddle**]<**Insert actuator**>.

9. Spray-Head Assembly: Two or four receptor-mounted spray heads.
10. Receptor: [**Stainless steel**][**Plastic**]<**Insert material**> bowl.
11. Drain Piping:

a. Size: **NPS 1-1/4 (DN 32)** minimum.
b. Finish: Chrome-plated brass.
c. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Wall bracket.
13. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Dust covers.
e. Magnetically actuated proximity switch.
f. Scald protection valve.
g. <**Insert size**> stainless steel ball valve.
h. <**Insert accessory**>.

E. Emergency Eye/Face Wash - Deck or Wall Mounted, Swivel Type, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Guardian Equipment Co**]

d. [**Haws Corporation**]
e. [**Stingray Systems LLC**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Guardian Equipment Co**]
d. [**Haws Corporation**]
e. [**Stingray Systems LLC**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eye/face washes, [**deck**][**wall**] mounted, swivel type, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **3 gpm (11.4 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: [**Chrome-plated brass**][**Stainless steel**].
8. Control Valve:

a. Type: Stay-open with flow regulator.
b. Actuator: Movement of spray-head assembly.

9. Spray-Head Assembly: Two or four spray heads with offset piping.
10. Mounting: [**Deck mounted**][**Wall mounted**]<**Insert mounting**>.

a. Location: [**Deck mounted next to sink**][**Deck mounted on sink**][**Wall mounted behind sink**]<**Insert mounting**>

F. Emergency Eye/Face Wash - Deck Mounted, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Guardian Equipment Co**]
c. [**WaterSaver Faucet Co**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Guardian Equipment Co**]

c. [**WaterSaver Faucet Co**]
d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency eye/face washes, deck mounted, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Capacity: Not less than **3 gpm (11.4 L/min.)** for at least 15 minutes.
6. Supply Connection Size: **NPS 1/2 (DN 15)**.
7. Integral Supply Pipe Material: Chrome-plated brass.
8. Control Valve:

a. Type: Stay-open type valve with flow regulator.
b. Actuator: [**Paddle**][**Push down**]<**Insert actuator**>.

9. Spray-Head Assembly: Two or four spray heads.
10. Receptor: Stainless steel <**Insert material**> bowl.
11. Drain Piping:

a. Size: **NPS 1-1/4 (DN 32)** minimum.
b. Fittings: Receptor drain, P-trap, waste to wall, and wall flange.

12. Mounting: Deck.
13. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Dust covers.
e. Magnetically actuated proximity switch.
f. Scald protection valve.
g. <**Insert size**> stainless steel ball valve.
h. <**Insert accessory**>.

2.5 EMERGENCY COMBINATION SHOWERS WITH EYEWASHES

A. Emergency Combination Shower with Eyewash, Standard, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Speakman Company**]

g. [**Stingray Systems LLC**]
h. [**WaterSaver Faucet Co**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Speakman Company**]
g. [**Stingray Systems LLC**]
h. [**WaterSaver Faucet Co**]
i. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency combination showers with eyewashes, standard, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Integral Supply/Drain Pipe:

a. Material: [**Galvanized steel**][**Chrome-plated brass**][**Stainless steel**][**PVC**].
b. Supply Connection Size: [**NPS 1-1/4 (DN 32) minimum**][**NPS 1-1/2 (DN 40)**].
c. Drain Connection Size: Outlet at back or side near bottom. **NPS 1-1/4 (DN 32)** minimum.

6. Shower:

a. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
b. Supply Piping: **NPS 1 (DN 25)**.
c. Control Valve:

1) Stay-open type with flow regulator.
2) Actuator: [**Pull rod**][**, 60-inch (1524-mm)**][**Treadle**]<**Insert actuator**>.

d. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum diameter, [**stainless steel**][**plastic**].
e. Mounting: Pedestal.

7. Eyewash:

a. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
b. Supply Piping Size: **NPS 1/2 (DN 15)**.
c. Control Valve:

1) Stay-open with flow regulator.
2) Actuator: Paddle.

d. Spray-Head Assembly: Two receptor-mounted spray heads.
e. Receptor: [**Stainless steel**][**Plastic**] bowl.

f. Mounting: Attached to shower pedestal.
g. Drench-Hose Option: May be provided instead of eyewash unit.

1) Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
2) Drench Hose: Handheld spray head with squeeze-handle actuator and hose.
3) Mounting: Bracket on shower pedestal.

8. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Modesty curtain.
e. Magnetically actuated proximity switch.
f. <**Insert size**> stainless steel ball valve.
g. <**Insert accessory**>.

B. Emergency Combination Shower with Eyewash, Barrier Free, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Stingray Systems LLC**]
g. [**WaterSaver Faucet Co**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Stingray Systems LLC**]
g. [**WaterSaver Faucet Co**]
h. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency combination showers with eyewashes, barrier free, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Integral Supply/Drain Pipe:

   a. Material: [**Galvanized steel**][**Stainless steel**].
   b. Supply Connection Size: [**NPS 1-1/4 (DN 32) minimum**][**NPS 1-1/2 (DN 40)**].
   c. Drain Connection Size: Outlet at back or side near bottom. **NPS 1-1/4 (DN 32)** minimum.

6. Shower:

   a. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
   b. Supply Piping: **NPS 1 (DN 25)** with flow regulator and stay-open control valve.
   c. Control Valve:

      1) Type: Stay-open type with flow regulator.
      2) Actuator: [**Pull rod**][**, 60-inch (1524-mm)**]<**Insert actuator**>.

   d. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum diameter, [**stainless steel**][**plastic**].
   e. Mounting: Pedestal.

7. Eyewash:

   a. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
   b. Supply Piping: **NPS 1/2 (DN 15)** with flow regulator and stay-open control valve.
   c. Control Valve:

      1) Type: Stay-open type with flow regulator.
      2) Actuator: Paddle.

   d. Spray-Head Assembly: Two receptor-mounted spray heads.
   e. Receptor: [**Stainless steel**][**Plastic**] bowl.
   f. Mounting: Attached shower pedestal.
   g. Drench-Hose Option: May be provided instead of eyewash unit.

      1) Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
      2) Drench Hose: Handheld spray head with squeeze-handle actuator and hose.
      3) Mounting: Bracket on shower pedestal.

8. Accessories:

   a. Electric alarm with flashing light and horn.
   b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
   c. Flow switch; single pole.
   d. Modesty curtain.
   e. Magnetically actuated proximity switch.
   f. <**Insert size**> stainless steel ball valve.
   g. <**Insert accessory**>.

2.6 EMERGENCY COMBINATION SHOWERS WITH EYE/FACE WASHES

A. Emergency Combination Shower with Eye/Face Wash, Standard, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Speakman Company**]
g. [**Stingray Systems LLC**]
h. [**WaterSaver Faucet Co**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Speakman Company**]
g. [**Stingray Systems LLC**]
h. [**WaterSaver Faucet Co**]
i. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency combination showers with eye/face washes, standard, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.
c. ASME A112.18.2/CSA B125.2.

5. Integral Supply/Drain Pipe:

a. Material: [**Galvanized steel**][**Chrome-plated brass**][**Stainless steel**][**PVC**].
b. Supply Connection Size: [**NPS 1-1/4 (DN 32) minimum**][**NPS 1-1/2 (DN 40)**].
c. Drain Connection Size: Outlet at back or side near bottom. **NPS 1-1/4 (DN 32)** minimum.

6. Shower:

a. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
b. Supply Piping: **NPS 1 (DN 25)** with flow regulator and stay-open control valve.
c. Control Valve:

1) Type: Stay-open with flow regulator.
2) Actuator: [**Pull rod**][**, 60-inch (1524-mm)**][**Treadle**]<**Insert actuator**>.

d. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum diameter, [**stainless steel**][**plastic**].
e. Mounting: Pedestal.

7. Eye/Face Wash:

a. Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
b. Supply Piping: **NPS 1/2 (DN 15)** with flow regulator and stay-open control valve.
c. Control Valve:

1) Type: Stay-open type with flow regulator.
2) Actuator: Paddle.

d. Spray-Head Assembly: Two or four receptor-mounted spray heads.
e. Receptor: [**Stainless steel**][**Plastic**] bowl.
f. Mounting: Attached shower pedestal.
g. Drench-Hose Option: May be provided instead of eye/face wash unit.

1) Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
2) Drench Hose: Handheld spray head with squeeze-handle actuator and hose.
3) Mounting: Bracket on shower pedestal.

8. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
c. Flow switch; single pole.
d. Modesty curtain.
e. Magnetically actuated proximity switch.
f. <**Insert size**> stainless steel ball valve.
g. <**Insert accessory**>.

B. Emergency Combination Shower with Eye/Face Wash, Barrier Free, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Stingray Systems LLC**]
g. [**WaterSaver Faucet Co**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Haws Corporation**]
f. [**Stingray Systems LLC**]
g. [**WaterSaver Faucet Co**]
h. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency combination showers with eye/face washes, barrier free, plumbed, from single manufacturer.
4. Standards:

    a. ANSI/ISEA Z358.1.
    b. ASME A112.18.1/CSA B125.1.
    c. ASME A112.18.2/CSA B125.2.

5. Integral Supply/Drain Pipe:

    a. Material: [**Galvanized steel**][**Stainless steel**].
    b. Supply Connection Size: [**NPS 1-1/4 (DN 32) minimum**][**NPS 1-1/2 (DN 40)**].
    c. Drain Connection Size: Outlet at back or side near bottom. **NPS 1-1/4 (DN 32)** minimum.

6. Shower:

    a. Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
    b. Supply Piping: **NPS 1 (DN 25)** with flow regulator and stay-open control valve.
    c. Control Valve:

        1) Type: Stay-open type with flow regulator.
        2) Actuator: [**Pull rod**][**, 60-inch (1524-mm)**]<**Insert actuator**>.

    d. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum diameter, [**stainless steel**][**plastic**].
    e. Mounting: Pedestal.

7. Eye/Face Wash:

    a. Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
    b. Supply Piping: **NPS 1/2 (DN 15)** with flow regulator and stay-open control valve.
    c. Control Valve:

        1) Type: Stay-open type with flow regulator.
        2) Actuator: Paddle.

    d. Spray-Head Assembly: Two or four receptor-mounted spray heads.
    e. Receptor: [**Stainless steel**][**Plastic**] bowl.
    f. Mounting: Attached to shower pedestal.
    g. Drench-Hose Option: May be provided instead of eye/face wash unit.

        1) Capacity: Not less than **3.0 gpm (11.4 L/min.)** for at least 15 minutes.
        2) Drench Hose: Handheld spray head with squeeze-handle actuator and hose.
        3) Mounting: Bracket on shower pedestal.

8. Accessories:

    a. Electric alarm with flashing light and horn.
    b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge. ASSE 1071 compliant.
    c. Flow switch; single pole.
    d. Modesty curtain.
    e. Magnetically actuated proximity switch.
    f. <**Insert size**> stainless steel ball valve.
    g. <**Insert accessory**>.

C. Emergency Combination Shower with Eyewash or Eye/Face Wash, Freeze Resistant, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**B-L-S Industries, Inc**]
    c. [**Bradley Corporation**]
    d. [**Encon Safety Products**]
    e. [**Guardian Equipment Co**]
    f. [**Haws Corporation**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**B-L-S Industries, Inc**]
    c. [**Bradley Corporation**]
    d. [**Encon Safety Products**]
    e. [**Guardian Equipment Co**]
    f. [**Haws Corporation**]
    g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency combination showers with [**eyewashes**][**eye/face washes**], freeze resistant, plumbed, from single manufacturer.
4. Standards:

    a. ANSI/ISEA Z358.1.
    b. ASME A112.18.1/CSA B125.1.
    c. ASME A112.18.2/CSA B125.2.

5. Integral Supply Pipe Material: Galvanized steel.

    a. Supply Connection: [**NPS 1-1/4 (DN 32) minimum**][**NPS 1-1/2 (DN 40)**].

6. Heating System: Electric, [**120**][**240**] V ac; insulation enclosed in a protective jacket with thermometer.

    a. Heating Capacity: [**10 deg F (6 deg C)**]<**Insert temperature**> minimum above ambient temperature.
    b. Design Ambient Temperature: <**Insert temperature**>.

7. Shower:

    a. Shower Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
    b. Supply Piping: **NPS 1 (DN 25)** with flow regulator and stay-open control valve.
    c. Control Valve:

        1) Type: Stay-open type with flow regulator.
        2) Actuator: [**Pull rod**][**, 60-inch (1524-mm)**]<**Insert actuator**>.

    d. Shower Head: [**3-inch- (76-mm-)**][**8-inch- (200-mm-)**] minimum diameter, [**stainless**

steel][**plastic**].
e. Mounting: Pedestal.

8. Eyewash:

a. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
b. Supply Piping: **NPS 1/2 (DN 15)** with flow regulator and stay-open control valve.
c. Control Valve:

1) Type: Stay-open with flow regulator.
2) Actuator: [**Paddle**]<**Insert actuator**>.

9. Eye/Face Wash:

a. Capacity: Not less than **3 gpm (11.4 L/min.)** for at least 15 minutes.
b. Control Valve:

1) Type: Stay-open type with flow regulator.
2) Actuator: [**Paddle**]<**Insert actuator**>.

10. Accessories:

a. Electric alarm with flashing light and horn.
b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge.
c. Flow switch; single pole.
d. Modesty curtain.
e. Magnetically actuated proximity switch.
f. <**Insert size**> stainless steel ball valve.
g. <**Insert accessory**>.

2.7 EMERGENCY RECESSED SAFETY STATIONS

A. Emergency Recessed Safety Station - Emergency Eye/Face Wash with Shower, Barrier Free, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Guardian Equipment Co**]
b. [**Haws Corporation**]
c. [**WaterSaver Faucet Co**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Guardian Equipment Co**]
b. [**Haws Corporation**]
c. [**WaterSaver Faucet Co**]
d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain emergency recessed safety stations, emergency eye/face wash with shower, barrier free, plumbed, from single manufacturer.
4. Standards:

    a. ANSI/ISEA Z358.1.
    b. ASME A112.18.1/CSA B125.1.
    c. ASME A112.18.2/CSA B125.2.
    d. Barrier-free installation.

5. Cabinet:

    a. Mounting: Wall-mounted, fully recessed, stainless steel enclosure with vandal-resistant access panel.
    b. Fire Rated: [**1-hour**][**2-hour**].

        1) UL-listed as "Through Penetration Firestop System No. W-L-7167."

    c. Contents:

        1) Supply valves, flow regulator(s), strainers.
        2) Eye/face wash with daylight or no drain.
        3) Pull-down handle for shower valve activation.
        4) Combination cover and internal drain pan. Pull handle on face of unit down from vertical to horizontal position to activate eye/face wash.
        5) Internal Drain Connection: Outlet at bottom. **NPS 2 (DN 50)** minimum.

6. Eye/Face Wash:

    a. Capacity: Not less than **3 gpm (11.4 L/min.)** for at least 15 minutes.
    b. Supply Piping: **NPS 1/2 (DN 15)** with flow regulator and stay-open control valve.
    c. Control-Valve Actuator: Pull handle on face of unit down from vertical to horizontal position.
    d. Spray-Head Assembly: Two or four receptor-mounted spray heads.

7. Shower:

    a. Shower Capacity: Not less than **20 gpm (76 L/min.)** for at least 15 minutes.
    b. Supply Piping: **NPS 1 (DN 25)** with flow regulator and stay-open control valve.
    c. Control-Valve Actuator: Pull handle on face of unit from up to down position.
    d. Shower Head: **8-inch- (200-mm-)** minimum diameter, [**chrome-plated brass**][**stainless steel**][**plastic**].
    e. Mounting: [**Horizontal from wall, exposed**][**Vertical from ceiling, exposed**][**Vertical from ceiling, recessed**].

8. Accessories:

    a. Electric alarm with flashing light and horn.
    b. Thermostatic mixing valve assembly including ball valve shutoffs and outlet temperature gauge.
    c. Flow switch; single pole.
    d. Modesty curtain.
    e. Magnetically actuated proximity switch.
    f. <**Insert size**> stainless steel ball valve.
    g. <**Insert accessory**>.

2.8 SUPPLEMENTAL EQUIPMENT

A. Personal Eyewash - Self-Contained :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Bradley Corporation**]
   b. [**Encon Safety Products**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Bradley Corporation**]
   b. [**Encon Safety Products**]
   c. <**Insert manufacturer's name**>

3. Source Limitations: Obtain self-contained, personal eyewashes from single manufacturer.
4. Standard: ANSI/ISEA Z358.1.
5. Capacity: Not less than **0.4 gpm (1.5 L/min.)**.
6. Pressure Tank: [**5 gal. (19 L)**]<**Insert value**>, stainless steel, cylindrical, with pressure gauge and base suitable for on-floor installation.
7. Flushing Fluid: Medically acceptable solution manufactured and labeled in accordance with applicable regulations.
8. Spray-Head Assembly: Chrome-plated copper alloy or stainless steel piping with flow regulator; paddle-actuated, stay-open control valve; and two spray heads mounted on tank.

B. Drench Hose - Deck Mounted, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Acorn Safety; a Division of Morris Group International**]
   b. [**Bradley Corporation**]
   c. [**Encon Safety Products**]
   d. [**Guardian Equipment Co**]
   e. [**Speakman Company**]
   f. [**WaterSaver Faucet Co**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Acorn Safety; a Division of Morris Group International**]
   b. [**Bradley Corporation**]
   c. [**Encon Safety Products**]
   d. [**Guardian Equipment Co**]
   e. [**Speakman Company**]

f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain drench hoses, deck mounted, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Supply Fitting: **NPS 1/2 (DN 15)** brass with flow regulator.
7. Drench Hose: Handheld spray head with [**squeeze-handle**][**push handle ball valve**] actuation and hose.
8. Mounting: In hole on deck.

C. Drench Hose - Wall Mounted, Plumbed :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Speakman Company**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Safety; a Division of Morris Group International**]
b. [**Bradley Corporation**]
c. [**Encon Safety Products**]
d. [**Guardian Equipment Co**]
e. [**Speakman Company**]
f. [**WaterSaver Faucet Co**]
g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain drench hoses, wall mounted, plumbed, from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.

5. Capacity: Not less than **0.4 gpm (1.5 L/min.)** for at least 15 minutes.
6. Supply Fitting: **NPS 1/2 (DN 15)** brass with flow regulator.
7. Drench Hose: Handheld spray head with [**squeeze-handle**][**push handle ball valve**] actuation and hose.
8. Mounting: Wall bracket.

2.9 WATER-TEMPERING EQUIPMENT

A. Water-Tempering Equipment - Hot and Cold Water :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Armstrong International, Inc**]
    c. [**Bradley Corporation**]
    d. [**Guardian Equipment Co**]
    e. [**Haws Corporation**]
    f. [**Lawler Manufacturing Company, Inc**]
    g. [**Leonard Valve Company**]
    h. [**Speakman Company**]
    i. [**Stingray Systems LLC**]
    j. [**WaterSaver Faucet Co**]
    k. [**WATTS; A Watts Water Technologies Company**]
    l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Safety; a Division of Morris Group International**]
    b. [**Armstrong International, Inc**]
    c. [**Bradley Corporation**]
    d. [**Guardian Equipment Co**]
    e. [**Haws Corporation**]
    f. [**Lawler Manufacturing Company, Inc**]
    g. [**Leonard Valve Company**]
    h. [**Speakman Company**]
    i. [**Stingray Systems LLC**]
    j. [**WaterSaver Faucet Co**]
    k. [**WATTS; A Watts Water Technologies Company**]
    l. <**Insert manufacturer's name**>

3. Source Limitations: Obtain water-tempering equipment, hot and cold water, from single manufacturer.
4. Standards:

    a. ANSI/ISEA Z358.1.
    b. ASME A112.18.1/CSA B125.1.

5. Description: Factory-fabricated equipment with thermostatic mixing valve.

    a. Thermostatic Mixing Valve: Designed to provide [**85 deg F (29 deg C)**]<**Insert temperature**> tepid, potable water at emergency plumbing fixtures, to maintain temperature at plus or minus [**5 deg F (3 deg C)**]<**Insert temperature**> throughout required 15-minute test period, and in case of unit failure to continue cold-water flow, with union connections, controls, metal piping, **and corrosion-resistant** enclosure. ASSE 1071 compliant.
    b. Supply Connections: For hot and cold water.

c. Cabinet: [**Surface**][**Recess**] mounted.

B. Water-Tempering Equipment - Electric, Tankless :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bradley Corporation**]
b. [**Chronomite Laboratories, Inc; a division of Morris Group International**]
c. [**Encon Safety Products**]
d. [**Haws Corporation**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bradley Corporation**]
b. [**Chronomite Laboratories, Inc; a division of Morris Group International**]
c. [**Encon Safety Products**]
d. [**Haws Corporation**]
e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain water-tempering equipment, electric, tankless from single manufacturer.
4. Standards:

a. ANSI/ISEA Z358.1.
b. ASME A112.18.1/CSA B125.1.

5. Description: Factory-fabricated equipment with electric heating.

a. Heating System: Electric, designed to provide [**85 deg F (29 deg C)**]<**Insert temperature**> tepid, potable water at emergency plumbing fixtures, to maintain temperature at plus or minus [**5 deg F (3 deg C)**]<**Insert temperature**> throughout required 15-minute test period, and in case of unit failure to continue cold-water flow, with union connections, controls, heating coils, high-temperature-limit device, metal piping, and corrosion-resistant enclosure.

1) Electrical Characteristics: [**208 V ac, single phase**][**240 V ac, single phase**][**277 V ac, single phase**][**208 V ac, 3 phase**][**240 V ac, 3 phase**][**480 V ac, 3 phase**], 60 Hz.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine roughing-in for water[**and waste**] piping systems to verify actual locations of piping connections before plumbed emergency plumbing fixture installation.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF EMERGENCY PLUMBING FIXTURES

A. Assemble emergency plumbing fixture piping, fittings, control valves, and other components.

B. Install fixtures level and plumb.

C. Fasten fixtures to substrate.

D. Install shutoff valves in water-supply piping to fixtures, to facilitate maintenance of fixture. Use ball or gate valve if specific type valve is not indicated. Install valves chained or locked in open position if permitted. Install valves in locations where they can easily be reached for operation. Comply with requirements for valves specified in Section 220523 "General-Duty Valves for Plumbing Piping."

1. Exceptions:

a. Omit shutoff valve on supply to group of plumbing fixtures that includes emergency fixture.
b. Omit shutoff valve on supply to emergency fixture if prohibited by authorities having jurisdiction.

E. Install dielectric fitting in supply piping to emergency fixture if piping and fixture connections are made of different metals. Comply with requirements for dielectric fittings specified in Section 221116 "Domestic Water Piping."

F. Install thermometers in supply and outlet piping connections to water-tempering equipment. Comply with requirements for thermometers specified in Section 220500 "Common Work Results for Plumbing."

G. Install trap and waste piping on drain outlet of emergency fixture receptors that are indicated to be directly connected to drainage system. Comply with requirements for waste piping specified in [**Section 221316 "Sanitary Waste and Vent Piping."**][**Section 221316 "Sanitary Waste and Vent Piping" and Section 226600 "Chemical-Waste Systems for Laboratory and Healthcare Facilities."**]

H. Install indirect waste piping on drain outlet of emergency fixture receptors that are indicated to be indirectly connected to drainage system. Comply with requirements for waste piping specified in [**Section 221316 "Sanitary Waste and Vent Piping."**][**Section 221316 "Sanitary Waste and Vent Piping" and Section 226600 "Chemical-Waste Systems for Laboratory and Healthcare Facilities."**]

I. Install escutcheons on piping wall and ceiling penetrations in exposed, finished locations. Comply with requirements for escutcheons specified in Section 220500 "Common Work Results for Plumbing."

J. Fill self-contained fixtures with flushing fluid.

3.3 PIPING CONNECTIONS

A. Connect cold-water-supply piping to plumbed emergency plumbing fixtures not having water-tempering equipment. Comply with requirements for cold-water piping specified in Section 221116 "Domestic Water Piping."

B. Connect hot- and cold-water-supply piping to hot- and cold-water, water-tempering equipment. Connect output from water-tempering equipment to emergency plumbing fixtures. Comply with requirements for hot- and cold-water piping specified in Section 221116 "Domestic Water Piping."

C. Connect cold water and electrical power to electric heating water-tempering equipment. Comply with

requirements for cold-water piping specified in Section 221116 "Domestic Water Piping."

D. Directly connect emergency plumbing fixture receptors with trapped drain outlet to sanitary waste and vent piping. Comply with requirements for waste piping specified in [**Section 221316 "Sanitary Waste and Vent Piping."**][**Section 221316 "Sanitary Waste and Vent Piping" and Section 226600 "Chemical-Waste Systems for Laboratory and Healthcare Facilities."**] Indirectly connect emergency plumbing fixture receptors without trapped drain outlet to [**sanitary waste**][**chemical waste**][**storm drainage**] piping.

E. Where installing piping adjacent to emergency plumbing fixtures, allow space for service and maintenance of fixtures.

3.4 ELECTRICAL CONNECTIONS

A. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Install electrical devices furnished by manufacturer, but not factory mounted in accordance with NFPA 70.

D. Install nameplate for each electrical connection, indicating electrical equipment designation and circuit number feeding connection.

1. Nameplate to be laminated acrylic or melamine plastic signs, as specified in Section 260553 "Identification for Electrical Systems."
2. Nameplate to be laminated acrylic or melamine plastic signs with a black background and engraved white letters at least [**1/2 inch (13 mm)**]<**Insert dimension**> high.

3.5 IDENTIFICATION

A. Install equipment nameplates or equipment markers on emergency plumbing fixtures and equipment and equipment signs on water-tempering equipment. Comply with requirements for identification materials specified in Section 220553 "Identification for Plumbing Piping and Equipment."

3.6 FIELD QUALITY CONTROL

A. Mechanical-Component Testing: After plumbing connections have been made, test for compliance with requirements. Verify ability to achieve indicated capacities.

B. Tests and Inspections:

1. Perform each visual and mechanical inspection.
2. Leak Test: After installation, charge system and test for leaks. Repair leaks and retest until no leaks exist.
3. Operational Test: After electrical circuitry has been energized, start units to confirm proper unit operation.
4. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.
5. Emergency plumbing fixtures[**and water-tempering equipment**] will be considered defective if they do not pass tests and inspections.

C. Prepare test and inspection reports.

3.7 ADJUSTING

A. Operate and adjust emergency plumbing fixtures and controls. Replace damaged and malfunctioning fixtures and controls.

B. Adjust or replace fixture flow regulators for proper flow.

C. Adjust equipment temperature settings.

3.8 CLEANING AND PROTECTION

A. Clean emergency plumbing fixtures with manufacturers' recommended cleaning methods and materials.

B. Install protective covering for installed emergency plumbing fixtures and fittings.

C. Do not allow use of emergency plumbing fixtures for temporary facilities unless approved in writing by Owner.

END OF SECTION 22 01 40 81

SECTION 22 05 00 00 - COMMON WORK RESULTS FOR PLUMBING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Motors.
2. Packless expansion joints.
3. Grooved-joint expansion joints, lead free.
4. Alignment guides and anchors.
5. Sleeves without waterstop.
6. Sleeves with waterstop.
7. Stack-sleeve fittings.
8. Sleeve-seal systems.
9. Grout.
10. Silicone sealants.
11. Escutcheons.
12. Thermometers, bimetallic actuated, lead free.
13. Thermometers, filled system, lead free.
14. Thermometers, liquid in glass, lead free.
15. Thermometers, light activated, lead free.
16. Thermowells, lead free.
17. Pressure gauges, dial type, lead free.
18. Gauge attachments, lead free.
19. Test plugs, lead free.
20. Test-plug kits, lead free.
21. Sight flow indicators, lead free.

B. Related Requirements:

1. Section 221119 "Domestic Water Piping Specialties" for water meters.
2. Section 221513 "General-Service Compressed-Air Piping" for compressed air gauges.
3. Section 331415 "Site Water Distribution Piping" for domestic water meters and combined domestic and fire-protection water-service meters outside the building.

1.2 DEFINITIONS

A. Existing Piping to Remain: Existing piping that is not to be removed and that is not otherwise indicated to be removed, removed and salvaged, or removed and reinstalled.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product, excluding motors which are included in Part 1 of the plumbing equipment Sections.

a. Include construction details, material descriptions, and dimensions of individual

components, and finishes.
b. Include operating characteristics and furnished accessories.

B. Delegated Design Submittals: For each anchor and alignment guide, including analysis data, signed and sealed by the qualified professional engineer responsible for their preparation.

1. Design Calculations: Calculate requirements for thermal expansion of piping systems and for selecting and designing expansion joints, loops, and swing connections.
2. Anchor Details: Detail fabrication of each anchor indicated. Show dimensions and methods of assembly and attachment to building structure.
3. Alignment Guide Details: Detail field assembly and attachment to building structure.
4. Schedule: Indicate type, manufacturer's number, size, material, pressure rating, end connections, and location for each expansion joint.

C. Sustainable Design Submittals:

1. Product Data: For sealants, indicating VOC content.
2. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting materials.

1.4 INFORMATIONAL SUBMITTALS

A. Welding certificates.

B. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For each type of [**expansion joint,**][**and**][**gauge**] to include in operation and maintenance manuals.

1.6 QUALITY ASSURANCE

A. Welding Qualifications: Qualify procedures and personnel in accordance with AWS D1.1/D1.1M.

B. Pipe and Pressure-Vessel Welding Qualifications: Qualify procedures and operators in accordance with 2021 ASME Boiler and Pressure Vessel Code, Section IX.

1.7 COORDINATION

A. Coordinate features of motors, installed units, and accessory devices to be compatible with the following:

1. Motor controllers.
2. Torque, speed, and horsepower requirements of the load.
3. Ratings and characteristics of supply circuit and required control sequence.
4. Ambient and environmental conditions of installation location.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Domestic water[**expansion fittings and loops**] for plumbing piping intended to convey or dispense water for human consumption are to comply with the U.S. Safe Drinking Water Act, with requirements of authorities having jurisdiction, and with NSF 61 and NSF 372, or be certified in compliance with NSF 61 and NSF 372 by an ANSI-accredited third-party certification body, in that the weighted average lead content at wetted surfaces is less than or equal to 0.25 percent.

B. Compatibility: Provide products suitable for piping service fluids, materials, working pressures, and temperatures.

C. Capability: Provide products and installations to accommodate maximum axial movement as scheduled or indicated on Drawings.

2.2 MOTORS

A. Motor Requirements, General:

1. Content includes motors for use on alternating-current power systems of up to 600 V and installed at equipment manufacturer's factory or shipped separately by equipment manufacturer for field installation.
2. Comply with requirements in this Section except when stricter requirements are specified in equipment schedules or Sections.
3. Comply with NEMA MG 1 unless otherwise indicated.
4. Comply with IEEE 841 for severe-duty motors.

B. Motor Characteristics:

1. Duty: Continuous duty at ambient temperature of 40 deg C and at altitude of **3300 ft. (1000 m)** above sea level.
2. Capacity and Torque Characteristics: Sufficient to start, accelerate, and operate connected loads at designated speeds, at installed altitude and environment, with indicated operating sequence, and without exceeding nameplate ratings or considering service factor.

C. Polyphase Motors:

1. Description: NEMA MG 1, Design B, medium induction motor.
2. Efficiency: Premium Efficient, as defined in NEMA MG 1.
3. Service Factor: 1.15.
4. Multispeed Motors: Variable torque.

    a. For motors with 2:1 speed ratio, consequent pole, single winding.
    b. For motors with other than 2:1 speed ratio, separate winding for each speed.

5. Multispeed Motors, Two Winding: Separate winding for each speed.
6. Rotor: Random-wound, squirrel cage.
7. Bearings: Regreasable, shielded, antifriction ball bearings suitable for radial and thrust loading.
8. Temperature Rise: Match insulation rating.
9. Insulation: [**Class F**].
10. Code Letter Designation:

    a. Motors 15 HP and Larger: NEMA starting Code F or Code G.

b. Motors Smaller Than 15 HP: Manufacturer's standard starting characteristic.

11. Enclosure Material: Cast iron for motor frame sizes [**324T**] and larger; rolled steel for motor frame sizes smaller than [**324T**].

D. Additional Requirements for Polyphase Motors:

1. Motors Used with Reduced-Voltage and Multispeed Controllers: Match wiring connection requirements for controller with required motor leads. Provide terminals in motor terminal box, suited to control method.
2. Motors Used with Variable-Frequency Controllers:[**Ratings, characteristics, and features coordinated with and approved by controller manufacturer.**]

a. Windings: Copper magnet wire with moisture-resistant insulation varnish, designed and tested to resist transient spikes, high frequencies, and short time-rise pulses produced by pulse-width-modulated inverters.
b. Premium-Efficient Motors: Class B temperature rise; Class F insulation.
c. Inverter-Duty Motors: Class F temperature rise; Class H insulation.
d. Thermal Protection: Comply with NEMA MG 1 requirements for thermally protected motors.

3. Severe-Duty Motors: Comply with IEEE 841, with 1.15 minimum service factor.

E. Single-Phase Motors:

1. Motors larger than 1/20 hp must be one of the following, to suit starting torque and requirements of specific motor application:

a. Permanent-split capacitor.
b. Split phase.
c. Capacitor start, inductor run.
d. Capacitor start, capacitor run.

2. Multispeed Motors: Variable-torque, permanent-split-capacitor type.
3. Bearings: Prelubricated, antifriction ball bearings or sleeve bearings suitable for radial and thrust loading.
4. Motors 1/20 HP and Smaller: Shaded-pole type.
5. Thermal Protection: Internal protection to automatically open power supply circuit to motor when winding temperature exceeds a safe value calibrated to temperature rating of motor insulation. Thermal-protection device will automatically reset when motor temperature returns to normal range.

F. Electronically Commutated Motors:

1. Microprocessor-Based Electronic Control Module: Converts [120 V][240 V] single-phase AC power to three-phase DC power to operate the brushless DC motor.
2. Three-phase power motor module with permanent magnet rotor.
3. [Circuit board][digital speed controller/LED display].
4. Building Automation System Interface: Via [AC voltage signal][DC voltage signal][Digital Serial Interface (DSI)].

2.3 EXPANSION FITTINGS AND LOOPS FOR PLUMBING PIPING

A. Performance Requirements:

1. Compatibility: Provide products suitable for piping service fluids, materials, working pressures, and temperatures.
2. Capability: Provide products and installations that will accommodate maximum axial movement as scheduled or indicated on Drawings.

B. Packless Expansion Joints:

1. Rubber Union Connector Expansion Joints, Lead Free: [**RUEJLF-01**].

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Amber/Booth Company, Inc.; a VMC Group Company**]
2) [**Flex-Hose Co., Inc**]
3) [**Flexicraft Industries**]
4) [**Flo Fab Inc**]
5) [**General Rubber Corporation**]
6) [**Kadant Unaflex, LLC**]
7) [**Mason Industries, Inc.**]
8) [**Metraflex Company (The)**]
9) [**Proco Products, Inc**]
10) [**Unisource Manufacturing, Inc.**]

b. Source Limitations: Obtain rubber union connector expansion joints from single manufacturer.
c. Material: Twin reinforced EPDM rubber spheres[**with external restraining cables**].
d. Minimum Pressure Rating: [**150 psig at 170 deg F (1035 kPa at 77 deg C)**] unless otherwise indicated.
e. End Connections for NPS 2 (DN 50) and Smaller: Threaded.
f. End Connections for Greater than NPS 2 (DN 50): Flanged.
g. End Fittings: Stainless steel.

2. Flexible-Hose Packless Expansion Joints, Lead Free: [**FHEJLF-01**].

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**ASC Engineered Solutions**]
2) [**Flex-Hose Co., Inc**]
3) [**Flex-Pression**]
4) [**Flex-Weld; a division of Kelco**]
5) [**Flexicraft Industries**]
6) [**Kadant Unaflex, LLC**]
7) [**Mason Industries, Inc.**]
8) [**Proco Products, Inc**]
9) [**Unisource Manufacturing, Inc.**]

b. Source Limitations: Obtain flexible-hose packless expansion joints from single manufacturer.
c. Description: Manufactured assembly with inlet and outlet elbow fittings and two flexible-metal-hose legs joined by long-radius, 180-degree return bend or center section of flexible hose.

d. Flexible Hose: Corrugated-metal inner hoses and braided outer sheaths.
e. Expansion Joints for Copper Tubing NPS 2 (DN 50) and Smaller: Copper-alloy fittings with [**solder-joint**] end connections.

1) Bronze hoses and single-braid bronze sheaths with **450 psig at 70 deg F (3100 kPa at 21 deg C)** and **340 psig at 450 deg F (2340 kPa at 232 deg C)** ratings.
2) Bronze hoses and double-braid bronze sheaths with **700 psig at 70 deg F (4830 kPa at 21 deg C)** and **500 psig at 450 deg F (3450 kPa at 232 deg C)** ratings.

f. Expansion Joints for Copper Tubing NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Copper-alloy fittings with [**threaded**] end connections.

1) Stainless steel hoses and single-braid, stainless steel sheaths with **300 psig at 70 deg F (2070 kPa at 21 deg C)** and **225 psig at 450 deg F (1550 kPa at 232 deg C)** ratings.
2) Stainless steel hoses and double-braid, stainless steel sheaths with **420 psig at 70 deg F (2890 kPa at 21 deg C)** and **315 psig at 450 deg F (2170 kPa at 232 deg C)** ratings.

g. Expansion Joints for Stainless Steel Piping NPS 2 (DN 50) and Smaller: Stainless steel fittings with threaded end connections.

1) Stainless steel hoses and single-braid, stainless steel sheaths with **450 psig at 70 deg F (3100 kPa at 21 deg C)** and **325 psig at 600 deg F (2250 kPa at 315 deg C)** ratings.
2) Stainless steel hoses and double-braid, stainless steel sheaths with **700 psig at 70 deg F (4830 kPa at 21 deg C)** and **515 psig at 600 deg F (3550 kPa at 315 deg C)** ratings.

h. Expansion Joints for Stainless Steel Piping NPS 2-1/2 to NPS 6 (DN 65 to DN 150): Stainless steel fittings with [**flanged**][**welded**] end connections.

1) Stainless steel hoses and single-braid, stainless steel sheaths with **200 psig at 70 deg F (1380 kPa at 21 deg C)** and **145 psig at 600 deg F (1000 kPa at 315 deg C)** ratings.
2) Stainless steel hoses and double-braid, stainless steel sheaths with **275 psig at 70 deg F (1900 kPa at 21 deg C)** and **200 psig at 600 deg F (1380 kPa at 315 deg C)** ratings.

i. Expansion Joints for Stainless Steel Piping NPS 8 to NPS 12 (DN 200 to DN 300): Stainless steel fittings with [**flanged**][**welded**] end connections.

1) Stainless steel hoses and single-braid, stainless steel sheaths with **125 psig at 70 deg F (860 kPa at 21 deg C)** and **90 psig at 600 deg F (625 kPa at 315 deg C)** ratings.
2) Stainless steel hoses and double-braid, stainless steel sheaths with **165 psig at 70 deg F (1130 kPa at 21 deg C)** and **120 psig at 600 deg F (830 kPa at 315 deg C)** ratings.

j. Expansion Joints for Stainless Steel Piping NPS 14 (DN 350) and Larger: Stainless steel fittings with [**flanged**][**welded**] end connections.

1) Stainless steel hoses and double-braid, stainless steel sheaths with

165 psig at 70 deg F (1130 kPa at 21 deg C) and 120 psig at 600 deg F (830 kPa at 315 deg C) ratings.

3. Metal-Bellows Packless Expansion Joints, Lead Free: [**MBEJLF-01**].

   a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

      1) [**Adsco Manufacturing LLC**]
      2) [**Badger Industries, Inc**]
      3) [**Flex-Hose Co., Inc**]
      4) [**Flex-Pression**]
      5) [**Flex-Weld; a division of Kelco**]
      6) [**Flexicraft Industries**]
      7) [**Flo Fab Inc**]
      8) [**Hyspan Precision Products, Inc**]
      9) [**Kadant Unaflex, LLC**]
      10) [**Mason Industries, Inc.**]
      11) [**Proco Products, Inc**]
      12) [**Senior Flexonics Pathway**]
      13) [**Tozen Corporation**]
      14) [**U.S. Bellows, Inc.**]
      15) [**Unisource Manufacturing, Inc.**]
      16) [**Universal Hose and Braid; a Hyspan Company**]

   b. Source Limitations: Obtain metal-bellows packless expansion joints from single manufacturer.
   c. Standards: ASTM F1120 and EJMA's "Standards of the Expansion Joint Manufacturers Association, Inc."
   d. Type: Circular, corrugated bellows[**with external tie rods**].
   e. Minimum Pressure Rating: [**150 psig (1035 kPa)**][**175 psig (1200 kPa)**][**200 psig (1379 kPa)**] unless otherwise indicated.
   f. Configuration: [**Single joint**][**Single joint with base**][**and**][**double joint with base**] class(es) unless otherwise indicated.
   g. Expansion Joints for Copper Tubing: [Single-][multi-]ply phosphor-bronze bellows, copper pipe ends, and brass shrouds.

      1) End Connections for Copper Tubing NPS 2 (DN 50) and Smaller: [Solder joint][threaded].
      2) End Connections for Copper Tubing NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [Solder joint][threaded].
      3) End Connections for Copper Tubing NPS 5 (DN 125) and Larger: Flanged.

   h. Expansion Joints for Stainless Steel Piping: [Single-][multi-]ply stainless steel bellows, stainless steel pipe ends, and carbon steel shroud.

      1) End Connections for Stainless Steel Pipe NPS 2 (DN 50) and Smaller: Threaded.
      2) End Connections for Stainless Steel Pipe NPS 2-1/2 (DN 65) and Larger: [**Flanged**][**Welded**].

4. Externally Pressurized Metal-Bellows Packless Expansion Joints, Lead Free: [**EPEJLF-01**].

   a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

1) [**Adsco Manufacturing LLC**]
2) [**Flex-Hose Co., Inc**]
3) [**Flex-Pression**]
4) [**Flex-Weld; a division of Kelco**]
5) [**Flexicraft Industries**]
6) [**Hyspan Precision Products, Inc**]
7) [**Mason Industries, Inc.**]
8) [**Metraflex Company (The)**]
9) [**Senior Flexonics Pathway**]
10) [**Tozen Corporation**]
11) [**U.S. Bellows, Inc.**]
12) [**Unisource Manufacturing, Inc.**]

b. Source Limitations: Obtain externally pressurized metal-bellows packless expansion joints from single manufacturer.
c. Minimum Pressure Rating: [**150 psig (1035 kPa)**][**200 psig (1379 kPa)**][**300 psig (2068 kPa)**] unless otherwise indicated.
d. Description:

1) Totally enclosed, externally pressurized, multi-ply, stainless steel bellows isolated from fluid flow by an internal pipe sleeve.
2) Carbon-steel housing.
3) Drain plugs and lifting lug for **NPS 3 (DN 80)** and larger.
4) Bellows: With operating clearance between the internal pipe sleeves and external shrouds.
5) Joints: Supplied with a built-in scale to confirm the starting position and operating movement.
6) Joint Axial Movement: [**4 inches (100 mm)**][**6 inches (150 mm)**][**8 inches (200 mm)**] of compression and [**3/4 inch (19 mm)**][**1 inch (25 mm)**][**2 inches (50 mm)**] of extension.

e. Permanent Locking Bolts: Set locking bolts to maintain joint lengths during installation. Temporary welding tabs that are removed after installation in lieu of locking bolts are unacceptable.
f. End Connection Configuration: Flanged; one raised, fixed and one floating flange.

5. Rubber Packless Expansion Joints, Lead Free: [**REJLF-01**].

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Amber/Booth Company, Inc.; a VMC Group Company**]
2) [**Flex-Hose Co., Inc**]
3) [**Flex-Weld; a division of Kelco**]
4) [**Flexicraft Industries**]
5) [**Garlock Sealing Technologies**]
6) [**General Rubber Corporation**]
7) [**Kadant Unaflex, LLC**]
8) [**Mason Industries, Inc.**]
9) [**Proco Products, Inc**]

10) [**Red Valve Company, Inc**]
11) [**Tozen Corporation**]
12) [**U.S. Bellows, Inc.**]
13) [**Unisource Manufacturing, Inc.**]

b. Source Limitations: Obtain rubber packless expansion joints from single manufacturer.
c. Standards: ASTM F1123 and FSA's "Expansion Joints - Piping Technical Handbook."
d. Material: Fabric-reinforced rubber complying with FSA-PSJ-703.
e. Arch Type: [Single][multiple] arches[with external control rods].
f. Spherical Type: [Single][multiple] spheres[with external control rods].
g. Minimum Pressure Rating for NPS 1-1/2 to NPS 12 (DN 40 to DN 300): [**225 psig (1551 kPa) at 170 deg F (77 deg C)**].

C. Grooved-Joint Expansion Joints, Lead Free:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ASC Engineered Solutions**]
b. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
c. [**Victaulic Company**]

2. Source Limitations: Obtain grooved-joint expansion joints from single manufacturer.
3. Description: Factory-assembled expansion joint made of several grooved-end pipe nipples, couplings, and grooved joints.
4. Standard: AWWA C606, for grooved joints.
5. Material: ASTM A53/A53M, Schedule 40 stainless steel pipe with grooved ends.
6. Couplings: [**Five**][**Seven**][**10**][**12**], ASTM A312/A312M ductile-iron flexible type for stainless steel pipe dimensions. Include ferrous housing sections, Grade E EPDM rubber gasket or Grade P fluoroelastomer blend gasket, and bolts and nuts.

D. Alignment Guides and Anchors:

1. Alignment Guides: [**AG-01**].

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Advanced Thermal Systems, Inc**]
2) [**ASC Engineered Solutions**]
3) [**Flex-Hose Co., Inc**]
4) [**Flex-Weld; a division of Kelco**]
5) [**Flexicraft Industries**]
6) [**Hyspan Precision Products, Inc**]
7) [**Metraflex Company (The)**]

b. Source Limitations: Obtain alignment guides from single manufacturer.
c. Description: Steel, factory-fabricated alignment guide, with bolted two-section outer cylinder and base for attaching to structure; with two-section guiding slider for bolting to pipe. Provide dielectric spacer for use with copper tubing/piping.

2. Anchor Materials:

a. Steel Shapes and Plates: ASTM A36/A36M.
b. Bolts and Nuts: ASME B18.10 or ASTM A183, steel hex head.
c. Washers: ASTM F844, steel, plain, flat washers.
d. Mechanical Fasteners: Insert-wedge-type stud with expansion plug anchor for use in hardened portland cement concrete, with tension and shear capacities appropriate for application.

1) Stud: Threaded, [**zinc-coated carbon**][**stainless**] steel.
2) Expansion Plug: [**Zinc-coated carbon**][**Stainless**] steel.
3) Washer and Nut: [**Zinc-coated carbon**][**Stainless**] steel.

e. Chemical Fasteners: Insert-type stud, bonding-system anchor for use with hardened portland cement concrete, with tension and shear capacities appropriate for application.

1) Bonding Material: ASTM C881/C881M, Type IV, Grade 3, two-component epoxy resin suitable for surface temperature of hardened concrete where fastener is to be installed.
2) Stud: ASTM A307, [**zinc-coated carbon**][**stainless**] steel with continuous thread on stud unless otherwise indicated.
3) Washer and Nut: [**Zinc-coated carbon**][**Stainless**] steel.

2.4 SLEEVES AND SLEEVE SEALS

A. Sleeves without Waterstop:

1. Cast-Iron Pipe Sleeves: Cast or fabricated of cast or ductile iron, with plain ends.
2. Steel Pipe Sleeves: ASTM A53/A53M, Type E, Grade B, Schedule 40, hot-dip galvanized, with plain ends.
3. Steel Sheet Sleeves: ASTM A653/A653M, **24 gauge (0.6 mm)** minimum thickness; hot-dip galvanized, round tube closed with welded longitudinal joint.
4. PVC Pipe Sleeves: ASTM D1785, Schedule 40.
5. Molded-PVC Sleeves: With nailing flange.
6. Molded-PE or -PP Sleeves: Removable, tapered-cup shaped, and smooth outer surface with nailing flange.

B. Sleeves with Waterstop:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Advance Products & Systems, LLC**]
b. [**CALPICO, Inc.**]
c. [**GPT; a division of EnPRO Industries**]
d. [**Metraflex Company (The)**]

2. Description: Manufactured [**PVC/HDPE**][**steel**][**stainless steel**][**galvanized-steel**], sleeve-type, waterstop assembly made for imbedding in concrete slab or wall.

C. Stack-Sleeve Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Wade; a subsidiary of McWane Inc.**]
c. [**Zurn Industries, LLC**]

2. Description: Manufactured, [**Dura-coated or Duco-coated**][**galvanized**] cast-iron sleeve with integral clamping flange for use in waterproof floors and roofs. Include clamping ring, bolts, and nuts for membrane flashing.

a. Underdeck Clamp: Clamping ring with setscrews.

D. Sleeve-Seal Systems:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Advance Products & Systems, LLC**]
b. [**GPT; a division of EnPRO Industries**]
c. [**Metraflex Company (The)**]
d. [**Proco Products, Inc**]

2. Description: Modular sealing-element unit, designed for field assembly, for filling annular space between piping and sleeve.

a. Hydrostatic Seal: **20 psig (137 kPa)** minimum.
b. Sealing Elements: [**EPDM-rubber**][**High-temperature-silicone**][**Nitrile (Buna-N)**] interlocking links shaped to fit surface of pipe. Include type and number required for pipe material and size of pipe.
c. Pressure Plates: [**Carbon steel**][**Composite plastic**][**Stainless steel**][**Stainless steel, Type 316**].
d. Connecting Bolts and Nuts: [**Carbon steel, with zinc coating, ASTM B633**][**Stainless steel**][**Stainless steel, Type 316**] of length required to secure pressure plates to sealing elements.

E. Grout:

1. Description: Nonshrink, for interior and exterior sealing openings in non-fire-rated walls or floors.
2. Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.
3. Design Mix: **5000 psi (34.5 MPa)**, 28-day compressive strength.
4. Packaging: Premixed and factory packaged.

F. Silicone Sealants:

1. Silicone Sealant, S, NS, 25, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**GE Construction Sealants; Momentive Performance Materials Inc.**]
2) [**ITW Polymers Sealants North America**]
3) [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
4) [**Sherwin-Williams Company (The)**]
5) [**Sika Corporation**]
6) [**The Dow Chemical Company**]
7) [**Tremco Incorporated**]

b. Standard: ASTM C920, Type S, Grade NS, Class 25, Use NT.

2. Silicone Sealant, S, P, T, NT: Single-component, [**25**][**100/50**], pourable, [**plus 25 percent and minus 25 percent**][**plus 100 percent and minus 50 percent**] movement capability, traffic- and nontraffic-use, neutral-curing silicone joint sealant.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Pecora Corporation**]
2) [**Sika Corporation**]
3) [**The Dow Chemical Company**]
4) [**Tremco Incorporated**]

b. Standard: ASTM C920, Type S, Grade P, [**Class 25**][**Class 100/50**], Uses T and NT.

3. Silicone Foam Sealant: Multicomponent, silicone-based liquid elastomers that, when mixed, expand and cure in place to produce a flexible, nonshrinking foam.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Smooth-On**]

4. Sealant shall have a VOC content of [**250**] g/L or less.

a. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
b. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
c. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
d. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
e. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended

exposure limit, or 33 mcg/cu. m, and that of acetaldehyde shall not exceed 9 mcg/cu. m.

2.5 ESCUTCHEONS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**BrassCraft Manufacturing Co.; a Masco company**]
2. [**Dearborn Brass**]
3. [**Jones Stephens Corp.**]
4. [**Keeney Manufacturing Company (The)**]
5. [**Mid-America Fittings, LLC; A Midland Industries Company**]
6. [**ProFlo; a Ferguson Enterprises, Inc. brand**]

B. Escutcheon Types:

1. One-Piece, Steel Type: With [**polished, chrome-plated**][**polished brass**] finish and setscrew fastener.
2. One-Piece, Stainless Steel Type: With polished stainless steel finish.
3. One-Piece, Cast-Brass Type: With [**polished, chrome-plated**][**polished brass**] finish and setscrew fastener.
4. One-Piece, Deep-Pattern Type: Deep-drawn, box-shaped [**steel**][**brass**] with polished, chrome-plated finish and spring-clip fasteners.
5. One-Piece, Stamped-Steel Type: With polished, chrome-plated finish and spring-clip fasteners.
6. Split-Plate, Stamped-Steel Type: With polished, chrome-plated finish; [**concealed**][**and**][**exposed-rivet**] hinge; and spring-clip fasteners.

C. Floor Plates:

1. Split Floor Plates: Cast brass with concealed hinge.

2.6 METERS AND GAUGES FOR PLUMBING PIPING

A. Thermometers, Bimetallic Actuated, Lead Free:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Ashcroft Inc**]
b. [**Blue Ribbon Corp.**]
c. [**Ernst Flow Industries**]
d. [**Marsh Bellofram**]
e. [**Miljoco Corporation**]
f. [**Noshok**]
g. [**Palmer Wahl Instrumentation Group**]
h. [**REOTEMP Instrument Corporation**]
i. [**Tel-Tru Manufacturing Company**]
j. [**Trerice, H. O. Co**]
k. [**WATTS; A Watts Water Technologies Company**]
l. [**Weiss Instruments, Inc**]
m. [**Weksler Glass Thermometer Corp.**]

n. [**WIKA Instrument Corporation**]
o. [**Winters Instruments - U.S.**]

2. Source Limitations: Provide lead-free bimetallic-actuated thermometers from a single manufacturer.
3. Standard: ASME B40.200.
4. Case: [**Liquid-filled**][**and**][**sealed**] type(s); stainless steel with [**3-inch (75-mm)**][**5-inch (125-mm)**] nominal diameter.
5. Dial: [**Nonreflective aluminum**] with permanent scale markings and scales in [**deg F (deg C)**][**deg F and deg C**].
6. Connector Type(s): Union joint, [**adjustable angle**][**rigid, back**][**and**][**rigid, bottom**]; with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
7. Stem: **0.25 or 0.375 inch (6.4 or 9.5 mm)** in diameter; [**stainless steel**][**lead-free brass**].
8. Window: [Plain glass][Safety glass][acrylic plastic].
9. Ring: Stainless steel.
10. Element: Bimetal coil.
11. Pointer: Dark-colored metal.
12. Accuracy: Plus or minus [**1**][**1.5**] percent of span.

B. Thermometers, Filled System, Lead Free - Direct Mounted, Metal Case, Vapor Actuated:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Ashcroft Inc**]
   b. [**Miljoco Corporation**]
   c. [**Palmer Wahl Instrumentation Group**]
   d. [**REOTEMP Instrument Corporation**]
   e. [**Trerice, H. O. Co**]
   f. [**Weiss Instruments, Inc**]

2. Source Limitations: Provide filled-system, lead-free, direct-mounted, metal-case, vapor-actuated thermometers from a single manufacturer.
3. Standard: ASME B40.200.
4. Case: Sealed type, [**cast aluminum or drawn steel**]; [**4-1/2-inch (115-mm)**][**5-inch (125-mm)**][**6-inch (150-mm)**] nominal diameter.
5. Element: Lead-free [**Bourdon tube**].
6. Movement: Mechanical,[**dampening type,**] with link to pressure element and connection to pointer.
7. Dial: Nonreflective aluminum with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Pointer: Dark-colored metal.
9. Window: [Glass][Safety glass][acrylic plastic].
10. Ring: [**Metal**][**Stainless steel**].
11. Connector Type(s): Union joint, [**adjustable, 180 degrees in vertical plane, 360 degrees in horizontal plane, with locking device**][**rigid, back**][**and**][**rigid, bottom**]; with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
12. Thermal System: Liquid-filled, mercury-free bulb in copper-plated steel, aluminum, or lead-free brass stem and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

13. Accuracy: Plus or minus [**1**] percent of span.

C. Thermometers, Filled System, Lead Free - Direct Mounted, Plastic Case, Vapor Actuated:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**REOTEMP Instrument Corporation**]

2. Source Limitations: Provide filled-system, lead-free, direct-mounted, plastic-case, vapor-actuated thermometers from single manufacturer.
3. Standard: ASME B40.200.
4. Case: Sealed type, [**plastic**]; [**4-1/2-inch (115-mm)**][**5-inch (125-mm)**][**6-inch (150-mm)**] nominal diameter.
5. Element: Lead-free [**Bourdon tube**].
6. Movement: Mechanical, with link to pressure element and connection to pointer.
7. Dial: Nonreflective aluminum with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Pointer: Dark-colored metal.
9. Window: [Glass][Safety glass][acrylic plastic].
10. Ring: [Metal][plastic].
11. Connector Type(s): Union joint, [**adjustable, 180 degrees in vertical plane, 360 degrees in horizontal plane, with locking device**][**rigid, back**][**and**][**rigid, bottom**]; with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
12. Thermal System: Liquid-filled, mercury-free bulb in copper-plated steel or aluminum, or lead-free brass stem and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

13. Stem Length: To match thermowell insertion length.
14. Accuracy: Plus or minus [**1**] percent of span.

D. Thermometers, Filled System, Lead Free - Remote Mounted, Metal Case, Vapor Actuated:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Miljoco Corporation**]
   b. [**Palmer Wahl Instrumentation Group**]
   c. [**REOTEMP Instrument Corporation**]
   d. [**Trerice, H. O. Co**]
   e. [**Weiss Instruments, Inc**]
   f. [**WIKA Instrument Corporation**]

2. Source Limitations: Provide filled-system, lead-free, remote-mounted, metal-case, vapor-actuated thermometers from a single manufacturer.
3. Standard: ASME B40.200.
4. Case: Sealed type, [**cast aluminum or drawn steel**]; [**4-1/2-inch (115-mm)**][**6-inch (150-mm)**] nominal diameter with [**back**][**front**] flange and holes for panel mounting.
5. Element: Lead-free [**Bourdon tube**].
6. Movement: Mechanical, with link to pressure element and connection to pointer.
7. Dial: Nonreflective aluminum with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Pointer: Dark-colored metal.

9. Window: [Glass][Safety glass][acrylic plastic].
10. Ring: [**Metal**][**Stainless steel**].
11. Connector Type(s): Union joint, [**back**][**bottom**]; with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
12. Thermal System: Liquid-filled, mercury-free, bulb in copper-plated steel, aluminum, or lead-free brass stem and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

13. Stem Length: To match thermowell insertion length.
14. Accuracy: Plus or minus [**1**] percent of span.

E. Thermometers, Filled System, Lead Free - Remote Mounted, Plastic Case, Vapor Actuated:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Miljoco Corporation**]
    b. [**REOTEMP Instrument Corporation**]

2. Source Limitations: Provide filled-system, lead-free, remote-mounted, plastic-case, vapor-actuated thermometers from a single manufacturer.
3. Standard: ASME B40.200.
4. Case: Sealed type, [**plastic**]; [**4-1/2-inch (115-mm)**][**6-inch (150-mm)**] nominal diameter with [**back**][**front**] flange and holes for panel mounting.
5. Element: Lead-free [**Bourdon tube**].
6. Movement: Mechanical, with link to pressure element and connection to pointer.
7. Dial: Nonreflective aluminum with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Pointer: Dark-colored metal.
9. Window: [Glass][Safety glass][acrylic plastic].
10. Ring: [Metal][plastic].
11. Connector Type(s): Union joint, threaded, [**back**][**bottom**]; with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
12. Thermal System: Liquid-filled, mercury-free bulb in copper-plated steel, aluminum, or lead-free brass stem and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

13. Accuracy: Plus or minus 1 percent of span or one scale division, to a maximum of 1.5 percent of span.

F. Thermometers, Liquid in Glass, Lead Free - Metal Case, Compact Style:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Miljoco Corporation**]
    b. [**Trerice, H. O. Co**]

2. Source Limitations: Provide liquid-in-glass, lead-free, metal-case, compact-style thermometers by

single manufacturer.
3. Standard: ASME B40.200.
4. Case: [**Cast aluminum**]; **6-inch (150-mm)** nominal size.
5. Case Form: [**Back angle**][**Straight**] unless otherwise indicated.
6. Tube: Glass with magnifying lens and blue[**or red**] organic liquid; mercury free.
7. Tube Background: Nonreflective aluminum with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Window: Glass or plastic.
9. Stem: Aluminum or lead-free brass and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

10. Connector: **3/4 inch (19 mm)**, with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
11. Accuracy: Plus or minus 1 percent of span or one scale division, to a maximum of 1.5 percent of span.

G. Thermometers, Liquid in Glass, Lead Free - Plastic Case, Compact Style:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Blue Ribbon Corp.**]
    b. [**Flo Fab Inc**]
    c. [**Miljoco Corporation**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. [**Weiss Instruments, Inc**]
    f. [**Weksler Glass Thermometer Corp.**]

2. Source Limitations: Provide liquid-in-glass, lead-free, plastic-case, compact-style thermometers from single manufacturer.
3. Standard: ASME B40.200.
4. Case: [**Plastic**]; **6-inch (150-mm)** nominal size.
5. Case Form: [**Back angle**][**Straight**] unless otherwise indicated.
6. Tube: Glass with magnifying lens and blue[**or red**] organic liquid, mercury free.
7. Tube Background: Nonreflective with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Window: Glass or plastic.
9. Stem: Aluminum or lead-free brass and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

10. Connector: **3/4 inch (19 mm)**, with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
11. Accuracy: Plus or minus 1 percent of span or one scale division, to a maximum of 1.5 percent of span.

H. Thermometers, Liquid in Glass, Lead Free - Metal Case, Industrial Style:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Blue Ribbon Corp.**]
    b. [**Flo Fab Inc**]

c. [**Miljoco Corporation**]
d. [**Palmer Wahl Instrumentation Group**]
e. [**Trerice, H. O. Co**]
f. [**Weiss Instruments, Inc**]
g. [**Weksler Glass Thermometer Corp.**]
h. [**Winters Instruments - U.S.**]

2. Source Limitations: Provide liquid-in-glass, lead-free, metal-case, industrial-style thermometers from single manufacturer.
3. Standard: ASME B40.200.
4. Case: [**Cast aluminum**]; [**7-inch (180-mm)**][**9-inch (230-mm)**] nominal size unless otherwise indicated.
5. Case Form: [**Adjustable angle**][**Back angle**][**Straight**] unless otherwise indicated.
6. Tube: Glass with magnifying lens and blue[**or red**] organic liquid, mercury free.
7. Tube Background: Nonreflective aluminum with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Window: [Glass][Safety glass][acrylic plastic].
9. Stem: [**Aluminum**] and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

10. Connector: **1-1/4 inches (32 mm)**, with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
11. Accuracy: Plus or minus 1 percent of span or one scale division, to a maximum of 1.5 percent of span.

I. Thermometers, Liquid in Glass, Lead Free - Plastic Case, Industrial Style:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Ernst Flow Industries**]
    b. [**Marsh Bellofram**]
    c. [**Miljoco Corporation**]
    d. [**Palmer Wahl Instrumentation Group**]
    e. [**WATTS; A Watts Water Technologies Company**]
    f. [**Weiss Instruments, Inc**]
    g. [**Weksler Glass Thermometer Corp.**]
    h. [**Winters Instruments - U.S.**]

2. Source Limitations: Provide liquid-in-glass, lead-free, plastic-case, industrial-style thermometers from single manufacturer.
3. Standard: ASME B40.200.
4. Case: [**Plastic**]; [**7-inch (180-mm)**][**9-inch (230-mm)**] nominal size unless otherwise indicated.
5. Case Form: [**Adjustable angle**][**Back angle**][**Straight**] unless otherwise indicated.
6. Tube: Glass with magnifying lens and blue[**or red**] organic liquid, mercury free.
7. Tube Background: Nonreflective aluminum with permanent scale markings graduated in [**deg F (deg C)**][**deg F and deg C**].
8. Window: [Glass][Safety glass][acrylic plastic].
9. Stem: [**Aluminum**][**Lead-free brass**][**Stainless steel**][**Aluminum, lead-free brass, or stainless steel**] and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

10. Connector: **1-1/4 inches (32 mm)**, with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
11. Accuracy: Plus or minus 1 percent of span or one scale division, to a maximum of 1.5 percent of span.

J. Thermometers, Light Activated, Lead Free - Direct Mounted:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Miljoco Corporation**]
    b. [**Trerice, H. O. Co**]
    c. [**Weiss Instruments, Inc**]
    d. [**Weksler Glass Thermometer Corp.**]
    e. [**Winters Instruments - U.S.**]

2. Source Limitations: Provide light-activated, lead-free, direct-mounted thermometers from single manufacturer.
3. Case: [**Plastic**][**Metal**]; [**7-inch (180-mm)**][**9-inch (230-mm)**] nominal size unless otherwise indicated.
4. Scale Divisions: [**Deg F (deg C)**][**Deg F and deg C**].
5. Case Form: [**Adjustable angle**].
6. Connector: [**1-1/4 inches (32 mm)**], with ASME B1.1 or ASME B1.20.1 screw threads to fit thermowell.
7. Stem: [**Aluminum**] and of length to suit installation.

    a. Design for Thermowell Installation: Bare stem.

8. Display: Digital.
9. Accuracy: Plus or minus **1 deg F (0.5 deg C)**.

K. Thermometers, Light Activated, Lead Free - Remote Mounted:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Miljoco Corporation**]

2. Source Limitations: Provide light-activated, lead-free, remote-mounted thermometers from single manufacturer.
3. Case: Plastic, for wall mounting.
4. Scale Divisions: [**Deg F (deg C)**][**Deg F and deg C**].
5. Sensor: Lead-free bulb and thermistor wire.

    a. Design for Thermowell Installation: Bare stem.

6. Display: Digital.
7. Accuracy: Plus or minus **1 deg F (0.5 deg C)**.

L. Thermowells, Lead Free:

1. Standard: ASME B40.200.

2. Description: Pressure-tight, socket-type fitting made for insertion into piping tee fitting.
3. Material for Use with Copper Tubing: Lead-free copper.
4. Material for Use with Steel Piping: [**Type 304 stainless steel**][**Type 316 stainless steel**].
5. Type: Stepped shank unless straight or tapered shank is indicated.
6. External Threads: **NPS 1/2, NPS 3/4, or NPS 1 (DN 15, DN 20, or NPS 25)**, or as required to match threaded opening in pipe.
7. Internal Threads: Size and thread type as required to match thermometer mounting threads.
8. Bore: Diameter required to match thermometer bulb or stem.
9. Insertion Length: Length to extend [**a minimum of 2 inches (50 mm) into fluid**][**one-third of pipe diameter**][**to center of pipe**][**to match thermometer stem length**].
10. Lagging Extension: Include on thermowells for insulated piping and tubing. Extension is to be of sufficient length to extend beyond finished insulation surface.
11. Bushings: For converting size of thermowell's internal screw thread to size of thermometer connection.
12. Heat-Transfer Medium: [**Mixture of graphite and glycerin**].

M. Pressure Gauges, Dial Type, Lead Free - Direct Mounted, Metal Case:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Ametek U.S. Gauge**]
    b. [**Ashcroft Inc**]
    c. [**Blue Ribbon Corp.**]
    d. [**Ernst Flow Industries**]
    e. [**Flo Fab Inc**]
    f. [**Marsh Bellofram**]
    g. [**Miljoco Corporation**]
    h. [**Noshok**]
    i. [**Palmer Wahl Instrumentation Group**]
    j. [**REOTEMP Instrument Corporation**]
    k. [**Tel-Tru Manufacturing Company**]
    l. [**Trerice, H. O. Co**]
    m. [**WATTS; A Watts Water Technologies Company**]
    n. [**Weiss Instruments, Inc**]
    o. [**Weksler Glass Thermometer Corp.**]
    p. [**WIKA Instrument Corporation**]
    q. [**Winters Instruments - U.S.**]

2. Source Limitations: Provide dial-type, lead-free, direct-mounted, metal-case pressure gauges from single manufacturer.
3. Standard: ASME B40.100.
4. Case: [**Liquid-filled**][**Sealed**][**Open-front, pressure-relief**][**Solid-front, pressure-relief**] type(s); [**cast aluminum or drawn steel**]; [**4-1/2-inch (115-mm)**][**6-inch (150-mm)**] nominal diameter.
5. Pressure-Element Assembly: Lead-free Bourdon tube.
6. Pressure Connection: Lead-free brass, with [**NPS 1/4 (DN 8)**][**NPS 1/4 or NPS 1/2 (DN 8 or DN 15)**][**NPS 1/2 (DN 15)**], ASME B1.20.1 pipe threads and bottom-outlet type unless back-outlet type is indicated.
7. Movement: Mechanical, with link to pressure element and connection to pointer.
8. Dial: Nonreflective aluminum with permanent scale markings graduated in [**psi (kPa)**][**psi and kPa**].
9. Pointer: Dark-colored metal.
10. Window: [Glass][Safety glass][plastic].

11. Ring: [**Metal**][**Brass**][**Stainless steel**].
12. Accuracy: [**Grade A, plus or minus 1 percent of middle half of**][**Grade B, plus or minus 2 percent of middle half of**][**Grade C, plus or minus 3 percent of middle half of**][**Grade D, plus or minus 5 percent of whole**] span.

N. Pressure Gauges, Dial Type, Lead Free - Direct Mounted, Plastic Case:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Ametek U.S. Gauge**]
    b. [**Ashcroft Inc**]
    c. [**Flo Fab Inc**]
    d. [**Marsh Bellofram**]
    e. [**Miljoco Corporation**]
    f. [**Noshok**]
    g. [**Palmer Wahl Instrumentation Group**]
    h. [**REOTEMP Instrument Corporation**]
    i. [**Tel-Tru Manufacturing Company**]
    j. [**Trerice, H. O. Co**]
    k. [**Weiss Instruments, Inc**]
    l. [**Weksler Glass Thermometer Corp.**]
    m. [**WIKA Instrument Corporation**]
    n. [**Winters Instruments - U.S.**]

2. Source Limitations: Provide dial-type, lead-free, direct-mounted, plastic-case pressure gauges from a single manufacturer.
3. Standard: ASME B40.100.
4. Case: [**Sealed**] type; [**plastic**]; [**4-1/2-inch (115-mm)**][**6-inch (150-mm)**] nominal diameter.
5. Pressure-Element Assembly: Lead-free Bourdon tube.
6. Pressure Connection: Lead-free brass, with [**NPS 1/4 (DN 8)**][**NPS 1/4 or NPS 1/2 (DN 8 or DN 15)**][**NPS 1/2 (DN 15)**], ASME B1.20.1 pipe threads and bottom-outlet type unless back-outlet type is indicated.
7. Movement: Mechanical, with link to pressure element and connection to pointer.
8. Dial: Nonreflective aluminum with permanent scale markings graduated in [**psi (kPa)**][**psi and kPa**].
9. Pointer: Dark-colored metal.
10. Window: [Glass][Safety glass][acrylic plastic].
11. Accuracy: [**Grade A, plus or minus 1 percent of middle half of**][**Grade B, plus or minus 2 percent of middle half of**][**Grade C, plus or minus 3 percent of middle half of**][**Grade D, plus or minus 5 percent of whole**] span.

O. Pressure Gauges, Dial Type, Lead Free - Remote Mounted, Metal Case:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Ametek U.S. Gauge**]
    b. [**Ashcroft Inc**]
    c. [**Ernst Flow Industries**]
    d. [**Flo Fab Inc**]
    e. [**Marsh Bellofram**]

f. [**Miljoco Corporation**]
g. [**Noshok**]
h. [**Palmer Wahl Instrumentation Group**]
i. [**REOTEMP Instrument Corporation**]
j. [**Tel-Tru Manufacturing Company**]
k. [**Trerice, H. O. Co**]
l. [**WATTS; A Watts Water Technologies Company**]
m. [**Weiss Instruments, Inc**]
n. [**WIKA Instrument Corporation**]
o. [**Winters Instruments - U.S.**]

2. Source Limitations: Provide dial-type, lead-free, remote-mounted, metal-case pressure gauges from a single manufacturer.
3. Standard: ASME B40.100.
4. Case: [**Liquid-filled**][**Sealed**] type; [**cast aluminum or drawn steel**][**metal**]; [**4-1/2-inch (115-mm)**][**6-inch (150-mm)**] nominal diameter with [**back**][**front**] flange and holes for panel mounting.
5. Pressure-Element Assembly: Lead-free Bourdon tube.
6. Pressure Connection: Lead-free brass, with [**NPS 1/4 (DN 8)**][**NPS 1/4 or NPS 1/2 (DN 8 or DN 15)**][**NPS 1/2 (DN 15)**], ASME B1.20.1 NPT pipe threads and bottom-outlet type unless back-outlet type is indicated.
7. Movement: Mechanical, with link to pressure element and connection to pointer.
8. Dial: Nonreflective aluminum with permanent scale markings graduated in [**psi (kPa)**][**psi and kPa**].
9. Pointer: Dark-colored metal.
10. Window: [Glass][Safety glass][acrylic plastic].
11. Ring: [**Metal**][**Stainless steel**].
12. Accuracy: [**Grade A, plus or minus 1 percent of middle half of**][**Grade B, plus or minus 2 percent of middle half of**][**Grade C, plus or minus 3 percent of middle half of**][**Grade D, plus or minus 5 percent of whole**] span.

P. Pressure Gauges, Dial Type, Lead Free - Remote Mounted, Plastic Case:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Ashcroft Inc**]
   b. [**Flo Fab Inc**]
   c. [**Miljoco Corporation**]
   d. [**Noshok**]
   e. [**Palmer Wahl Instrumentation Group**]
   f. [**REOTEMP Instrument Corporation**]
   g. [**Tel-Tru Manufacturing Company**]
   h. [**Trerice, H. O. Co**]
   i. [**Weiss Instruments, Inc**]
   j. [**WIKA Instrument Corporation**]

2. Source Limitations: Provide dial-type, lead-free, remote-mounted, plastic-case pressure gauges from single manufacturer.
3. Standard: ASME B40.100.
4. Case: [**Sealed**] type; [**plastic**]; [**4-1/2-inch (115-mm)**][**6-inch (150-mm)**] nominal diameter with [**back**][**front**] flange and holes for panel mounting.
5. Pressure-Element Assembly: Lead-free Bourdon tube.
6. Pressure Connection: Lead-free brass, with [**NPS 1/4 (DN 8)**][**NPS 1/4 or NPS 1/2 (DN 8 or**

DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads and bottom-outlet type unless back-outlet type is indicated.
7. Movement: Mechanical, with link to pressure element and connection to pointer.
8. Dial: Nonreflective aluminum with permanent scale markings graduated in [psi (kPa)][**psi and kPa**].
9. Pointer: Dark-colored metal.
10. Window: [Glass][Safety glass][acrylic plastic].
11. Accuracy: [**Grade A, plus or minus 1 percent of middle half of**][**Grade B, plus or minus 2 percent of middle half of**][**Grade C, plus or minus 3 percent of middle half of**][**Grade D, plus or minus 5 percent of whole**] span.

Q. Gauge Attachments, Lead Free:

1. Snubbers: ASME B40.100, lead-free brass; with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads and [**piston**][**porous-metal**]-type surge-dampening device. Include extension for use on insulated piping.
2. Valves: [**Lead-free brass ball**][**Lead-free brass or stainless steel needle**], with [NPS 1/4 (DN 8)][NPS 1/4 or NPS 1/2 (DN 8 or DN 15)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe threads.

R. Test Plugs, Lead Free:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**IMI Flow Design, Inc.**]
    b. [**Miljoco Corporation**]
    c. [**Nexus Valve, Inc.; Aalberts Hydronic Flow Control**]
    d. [**Peterson Equipment Co., Inc**]
    e. [**Trerice, H. O. Co**]
    f. [**WATTS; A Watts Water Technologies Company**]
    g. [**Weiss Instruments, Inc**]
    h. [**Weksler Glass Thermometer Corp.**]

2. Source Limitations: Provide lead-free test plugs from single manufacturer.
3. Description: Test-station fitting made for insertion into piping tee fitting.
4. Body: Lead-free brass or stainless steel with core inserts and gasketed and threaded cap. Include extended stem on units to be installed in insulated piping.
5. Thread Size: [NPS 1/4 (DN 8)][NPS 1/2 (DN 15)], ASME B1.20.1 pipe thread.
6. Minimum Pressure and Temperature Rating: [500 psig at 200 deg F (3450 kPa at 93 deg C)].
7. Core Inserts: [**Chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber.

S. Test-Plug Kits, Lead Free:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Blue Ribbon Corp.**]
    b. [**Peterson Equipment Co., Inc**]

2. Source Limitations: Provide lead-free test-plug kits from single manufacturer.
3. Furnish [**one**] test-plug kit(s) containing [**one**][**two**] thermometer(s), one pressure gauge and adapter, and carrying case. Thermometer sensing elements, pressure gauge, and adapter probes

are to be of diameter to fit test plugs and of length to project into piping.

4. Low-Range Thermometer, Lead Free: Small, bimetallic insertion type with [1- to 2-inch- (25- to 51-mm-)] diameter dial and tapered-end sensing element. Dial range is to be at least [25 to 125 deg F (minus 4 to plus 52 deg C)].
5. High-Range Thermometer, Lead Free: Small, bimetallic insertion type with [1- to 2-inch- (25- to 51-mm-)] diameter dial and tapered-end sensing element. Dial range is to be at least [0 to 220 deg F (minus 18 to plus 104 deg C)].
6. Pressure Gauge, Lead Free: Small, lead-free Bourdon-tube insertion type with [2- to 3-inch- (51- to 76-mm-)] diameter dial and probe. Dial range is to be at least [0 to 200 psig (0 to 1380 kPa)].
7. Carrying Case: Metal or plastic, with formed instrument padding.

T. Sight Flow Indicators, Lead Free:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ARCHON Industries, Inc**]
    b. [**Dwyer Instruments, Inc**]
    c. [**Ernst Flow Industries**]
    d. [**John C. Ernst Co., Inc.**]
    e. [**KOBOLD Instruments, Inc. - USA**]
    f. [**OPW Engineered Systems; OPW Fluid Transfer Group; a Dover company**]

2. Source Limitations: Provide lead-free sight flow indicators from single manufacturer.
3. Description: Piping inline-installation device for visual verification of flow.
4. Construction: Lead-free bronze or stainless steel body, with sight glass and [**ball, flapper, or paddle wheel**] indicator, and threaded or flanged ends.
5. Minimum Pressure Rating: [125 psig (860 kPa)][150 psig (1034 kPa)].
6. Minimum Temperature Rating: [200 deg F (93 deg C)].
7. End Connections: [NPS 2 (DN 50) **and smaller, threaded**][NPS 2-1/2 (DN 65) **and larger, flanged**].

PART 3 - EXECUTION

3.1 INSTALLATION OF EXPANSION JOINTS, GENERAL

A. Install expansion joints of sizes matching sizes of piping in which they are installed.

3.2 INSTALLATION OF PACKLESS EXPANSION JOINTS

A. Install metal-bellows expansion joints in accordance with EJMA's "Standards of the Expansion Joint Manufacturers Association, Inc."

B. Install rubber packless expansion joints in accordance with FSA-PSJ-703.

3.3 INSTALLATION OF GROOVED-JOINT EXPANSION JOINTS

A. Install grooved-joint expansion joints to grooved-end steel piping.

3.4 INSTALLATION OF ALIGNMENT GUIDES AND ANCHORS

A. Install alignment guides to guide expansion and to avoid end-loading and torsional stress.

B. Install [**one**][**two**] guide(s) on each side of pipe expansion fittings and loops. Install guides nearest to expansion joint not more than [**four**] pipe diameters from expansion joint.

C. Attach guides to pipe, and secure guides to building structure.

D. Install anchors at locations to prevent stresses from exceeding those permitted by ASME B31.9 and to prevent transfer of loading and stresses to connected equipment.

E. Anchor Attachments:

1. Anchor Attachment to Steel Pipe: Attach by welding. Comply with ASME B31.9.
2. Anchor Attachment to Copper Tubing: Attach with pipe hangers. Use MSS SP-58, Type 24; U bolts bolted to anchor.

F. Fabricate and install steel anchors by welding steel shapes, plates, and bars. Comply with ASME B31.9 and AWS D1.1/D1.1M.

1. Anchor Attachment to Steel Structural Members: Attach by welding.
2. Anchor Attachment to Concrete Structural Members: Attach by fasteners. Follow fastener manufacturer's written instructions.
3. Use grout to form flat bearing surfaces for guides and anchors attached to concrete.

3.5 INSTALLATION OF PIPE LOOP AND SWING CONNECTIONS

A. Install pipe loops cold-sprung in tension or compression as required to partly absorb tension or compression produced during anticipated change in temperature.

B. Connect risers and branch connections to mains with at least [**five**] pipe fittings, including tee in main.

C. Connect risers and branch connections to terminal units with at least [**four**] pipe fittings, including tee in riser.

D. Connect mains and branch connections to terminal units with at least [**four**] pipe fittings, including tee in main.

3.6 INSTALLATION OF SLEEVES - GENERAL

A. Install sleeves for piping passing through penetrations in floors, partitions, roofs, and walls.

B. For sleeves that will have sleeve-seal system installed, select sleeves of size large enough to provide [**1-inch (25-mm)**][**2-inch (50-mm)**] annular clear space between piping and concrete slabs and walls.

1. Sleeves are not required for core-drilled holes.

C. Install sleeves in concrete floors, concrete roof slabs, and concrete walls as new slabs and walls are constructed.

1. Permanent sleeves are not required for holes in slabs formed by molded-PE or -PP sleeves.
2. Cut sleeves to length for mounting flush with both surfaces.

a. Exception: Extend sleeves installed in floors of mechanical equipment areas or other wet areas [2 inches (50 mm)] above finished floor level.

3. Using [grout][silicone sealant], seal the space outside of sleeves in floors/slabs/walls without sleeve-seal system. Select to maintain fire resistance of floor/slab/wall.

D. Install sleeves for pipes passing through interior partitions.

1. Cut sleeves to length for mounting flush with both surfaces.
2. Install sleeves that are large enough to provide 1/4-inch (6.4-mm) annular clear space between sleeve and pipe or pipe insulation.
3. Seal annular space between sleeve and piping or piping insulation; use joint sealants that joint sealant manufacturer's literature indicates is appropriate for size, depth, and location of joint.

E. Fire-Resistance-Rated Penetrations, Horizontal Assembly Penetrations, and Smoke Barrier Penetrations: Maintain indicated fire or smoke rating of walls, partitions, ceilings, and floors at pipe penetrations. Seal pipe penetrations with fire- and smoke-stop materials. Comply with requirements for firestopping and fill materials specified in Section 078413 "Penetration Firestopping."

3.7 INSTALLATION OF SLEEVES WITH WATERSTOP

A. Install sleeve with waterstop as new walls and slabs are constructed.

B. Assemble fitting components of length to be flush with both surfaces of concrete slabs and walls. Position waterstop flange centered across width of concrete slab or wall.

C. Secure nailing flanges to wooden concrete forms.

D. Using [grout][silicone sealant], seal space around outside of sleeves. Select to maintain fire resistance of floor/slab/wall.

3.8 INSTALLATION OF STACK-SLEEVE FITTINGS

A. Install stack-sleeve fittings in new slabs as slabs are constructed.

1. Install fittings that are large enough to provide 1/4-inch (6.4-mm) annular clear space between sleeve and pipe or pipe insulation.
2. Secure flashing between clamping flanges for pipes penetrating floors with membrane waterproofing. Comply with requirements for flashing specified in Section 076200 "Sheet Metal Flashing and Trim."
3. Install section of cast-iron soil pipe to extend sleeve to 2 inches (50 mm) above finished floor level.
4. Extend cast-iron sleeve fittings below floor slab as required to secure clamping ring if ring is specified.
5. Using silicone sealant, seal space between top hub of stack-sleeve fitting and pipe.

B. Fire-Resistance-Rated Penetrations, Horizontal Assembly Penetrations, and Smoke Barrier Penetrations: Maintain indicated fire or smoke rating of floors at pipe penetrations. Seal pipe penetrations with fire- and smoke-stop materials. Comply with requirements for firestopping specified in Section 078413 "Penetration Firestopping."

3.9 INSTALLATION OF SLEEVE-SEAL SYSTEMS

A. Install sleeve-seal systems in sleeves in exterior concrete walls and slabs-on-grade at service piping entries into building, and passing through exterior walls.

B. Select type, size, and number of sealing elements required for piping material and size and for sleeve ID or hole size. Assemble sleeve-seal system components, and install in annular space between piping and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make a watertight seal.

3.10 INSTALLATION OF ESCUTCHEONS

A. Install escutcheons for piping penetrations of walls, ceilings, and finished floors.

B. Install escutcheons with ID to closely fit around pipe, tube, and insulation of insulated piping and with OD that completely covers opening.

3.11 INSTALLATION OF METERS AND GAUGES

A. Install thermometer with thermowell at each required thermometer location.

B. Install thermowells in vertical position in piping tees.

C. Install thermowells of sizes required to match thermometer connectors. Include bushings if required to match sizes.

D. Install thermowells with extension on insulated piping.

E. Fill thermowells with heat-transfer medium.

F. Install direct-mounted thermometers in thermowells and adjust vertical and tilted positions.

G. Install remote-mounted thermometer bulbs in thermowells and install cases on panels; connect cases with tubing and support tubing to prevent kinks.

H. Install direct-mounted pressure gauges in piping tees with pressure gauge located on pipe at most readable position.

I. Install remote-mounted pressure gauges on panel.

J. Install valve and snubber in piping for each pressure gauge for fluids.

K. Install test plugs in piping tees.

L. Install thermometers in the following locations:

1. Inlet and outlet of each water heater.
2. Inlets and outlets of each domestic water heat exchanger.
3. Inlet and outlet of each domestic hot-water storage tank.
4. Inlet and outlet of each remote domestic water chiller.
5. Outlet side of hot-water-balancing valve.
6. Each main hot-water-recirculating line return pipe.

M. Install pressure gauges in the following locations:

1. Building water service entrance into building.
2. Inlet and outlet of each pressure-reducing valve.
3. Suction and discharge of each domestic water pump.

3.12 CONNECTIONS

A. Install meters and gauges adjacent to machines and equipment to allow space for service and maintenance of meters, gauges, machines, and equipment.

3.13 ADJUSTING

A. After installation, calibrate meters according to manufacturer's written instructions.

B. Adjust faces of meters and gauges to proper angle for best visibility.

3.14 FIELD QUALITY CONTROL

A. Sleeves and Sleeve Seals:

1. Perform the following tests and inspections:

a. Leak Test: After allowing for a full cure, test sleeves and sleeve seals for leaks. Repair leaks and retest until no leaks exist.
b. Sleeves and sleeve seals will be considered defective if they do not pass tests and inspections.

2. Prepare test and inspection reports.

B. Escutcheons:

1. Using new materials, replace broken and damaged escutcheons and floor plates.

3.15 SLEEVES APPLICATION

A. Use sleeves and sleeve seals for the following piping-penetration applications:

1. Exterior Concrete Walls above and below Grade:

a. Sleeves with waterstops.

1) Select sleeve size to allow for [**1-inch (25-mm)**] annular clear space between piping and sleeve for installing sleeve-seal system.

2. Concrete Slabs-on-Grade:

a. Sleeves with waterstops.

1) Select sleeve size to allow for [**1-inch (25-mm)**] annular clear space between piping

and sleeve for installing sleeve-seal system.

3. Concrete Slabs above Grade:

    a. [Sleeves with waterstops][stack-sleeve fittings].

4. Interior Wall and Partitions:

    a. Sleeves without waterstops.

3.16 ESCUTCHEONS APPLICATION

A. Escutcheons for New Piping and Relocated Existing Piping:

1. Piping with Fitting or Sleeve Protruding from Wall: One piece, deep pattern.
2. Chrome-Plated Piping: One piece, [**steel**][**cast brass**][**or split-casting brass**] with polished, chrome-plated finish.
3. Insulated Piping:

    a. One piece, steel with [**polished, chrome-plated**][**polished brass**] finish.
    b. One piece, stainless steel with polished stainless steel finish.
    c. One piece, cast brass with [**polished, chrome-plated**][**polished brass**] finish.
    d. One piece, stamped steel [**or split plate, stamped steel with concealed hinge**][**or split plate, stamped steel with exposed-rivet hinge**] with polished, chrome-plated finish.

4. Bare Piping at Wall and Floor Penetrations in Finished Spaces:

    a. One piece, steel with [**polished, chrome-plated**][**polished brass**] finish.
    b. One piece, stainless steel with polished stainless steel finish.
    c. One piece, cast brass with [**polished, chrome-plated**][**polished brass**] finish.
    d. One piece, stamped steel [**or split plate, stamped steel with concealed hinge**][**or split plate, stamped steel with exposed-rivet hinge**] with polished, chrome-plated finish.

5. Bare Piping at Ceiling Penetrations in Finished Spaces:

    a. One piece, steel with [**polished, chrome-plated**][**polished brass**] finish.
    b. One piece, stainless steel with polished stainless steel finish.
    c. One piece, cast brass with [**polished, chrome-plated**][**polished brass**] finish.
    d. One piece, stamped steel [**or split plate, stamped steel with concealed hinge**][**or split plate, stamped steel with exposed-rivet hinge**] with polished, chrome-plated finish.

6. Bare Piping in Unfinished Service Spaces:

    a. One piece, steel with polished, chrome-plated finish.
    b. One piece, cast brass with [**polished, chrome-plated**][**rough-brass**] finish.
    c. One piece, stamped steel [**or split plate, stamped steel with concealed hinge**][**or split plate, stamped steel with exposed-rivet hinge**] with polished, chrome-plated finish.

7. Bare Piping in Equipment Rooms:

    a. One piece, steel with polished, chrome-plated finish.
    b. One piece, cast brass with [**polished, chrome-plated**][**rough-brass**] finish.
    c. One piece, stamped steel [**or split plate, stamped steel with concealed hinge**][**or split plate, stamped steel with exposed-rivet hinge**] with polished, chrome-plated finish.

B. Escutcheons for Existing Piping to Remain:

1. Chrome-Plated Piping: Split casting, stamped steel with [concealed][exposed-rivet] hinge with polished, chrome-plated finish.
2. Insulated Piping: Split plate, stamped steel with [concealed][exposed-rivet] hinge with polished, chrome-plated finish
3. Bare Piping at Wall and Floor Penetrations in Finished Spaces: Split plate, stamped steel with [concealed][exposed-rivet] hinge with polished, chrome-plated finish.
4. Bare Piping at Ceiling Penetrations in Finished Spaces: Split plate, stamped steel with [concealed][exposed-rivet] hinge with polished, chrome-plated finish.
5. Bare Piping in Unfinished Service Spaces: Split plate, stamped steel with [concealed][exposed-rivet] hinge with polished, chrome-plated finish.
6. Bare Piping in Equipment Rooms: Split plate, stamped steel with [concealed][exposed-rivet] hinge with polished, chrome-plated finish.

C. Install floor plates for piping penetrations of equipment-room floors.

D. Install floor plates with ID to closely fit around pipe, tube, and insulation of piping and with OD that completely covers opening.

1. New Piping and Relocated Existing Piping: One piece, floor plate.
2. Existing Piping: Split floor plate.

3.17 THERMOMETER, LEAD FREE, APPLICATION

A. Thermometers at inlet and outlet of each domestic water heater are to be the following:

1. [**Liquid-filled**][**Sealed**], bimetallic-actuated type.
2. [**Direct**][**Remote**]-mounted, [**metal**][**plastic**]-case, vapor-actuated type.
3. [**Metal**][**Plastic**] case, [**compact**][**industrial**]-style, liquid-in-glass type.
4. [**Direct**][**Remote**]-mounted, light-activated type.
5. Test plug with [**chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber inserts.

B. Thermometers at inlets and outlets of each domestic water heat exchanger are to be the following:

1. [**Liquid-filled**][**Sealed**], bimetallic-actuated type.
2. [**Direct**][**Remote**]-mounted, [**metal**][**plastic**]-case, vapor-actuated type.
3. [**Metal**][**Plastic**] case, [**compact**][**industrial**]-style, liquid-in-glass type.
4. [**Direct**][**Remote**]-mounted, light-activated type.
5. Test plug with [**chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber inserts.

C. Thermometers at inlet and outlet of each domestic hot-water storage tank are to be the following:

1. [**Liquid-filled**][**Sealed**], bimetallic-actuated type.
2. [**Direct**][**Remote**]-mounted, [**metal**][**plastic**]-case, vapor-actuated type.
3. [**Metal**][**Plastic**] case, [**compact**][**industrial**]-style, liquid-in-glass type.
4. [**Direct**][**Remote**]-mounted, light-activated type.
5. Test plug with [**chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber inserts.

D. Thermometers at inlet and outlet of each remote domestic water chiller are to be the following:

1. [**Liquid-filled**][**Sealed**], bimetallic-actuated type.
2. [**Direct**][**Remote**]-mounted, [**metal**][**plastic**]-case, vapor-actuated type.
3. [**Metal**][**Plastic**] case, [**compact**][**industrial**]-style, liquid-in-glass type.

4. [**Direct**][**Remote**]-mounted, light-activated type.
5. Test plug with [**chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber inserts.

E. Thermometer stems are to be of length to match thermowell insertion length.

3.18 THERMOMETER, LEAD FREE, SCALE-RANGE APPLICATION

A. Scale Range for Domestic Cold-Water Piping:

1. [**0 to 100 deg F (Minus 20 to plus 50 deg C)**][**0 to 100 deg F and minus 20 to plus 50 deg C**].
2. [**0 to 150 deg F (Minus 20 to plus 70 deg C)**][**0 to 150 deg F and minus 20 to plus 70 deg C**].
3. [**30 to 240 deg F (0 to plus 115 deg C)**][**30 to 240 deg F and 0 to plus 115 deg C**].

B. Scale Range for Domestic Hot-Water Piping:

1. [**0 to 250 deg F (0 to 150 deg C)**][**0 to 250 deg F and 0 to 150 deg C**].
2. [**20 to 240 deg F (0 to 150 deg C)**][**20 to 240 deg F and 0 to 150 deg C**].
3. [**30 to 240 deg F (0 to plus 115 deg C)**][**30 to 240 deg F and 0 to plus 115 deg C**].

C. Scale Range for Domestic Cooled-Water Piping:

1. [**0 to 100 deg F (Minus 20 to plus 50 deg C)**][**0 to 100 deg F and minus 20 to plus 50 deg C**].
2. [**0 to 150 deg F (Minus 20 to plus 70 deg C)**][**0 to 150 deg F and minus 20 to plus 70 deg C**].

D. Insert additional paragraphs for thermometer scale ranges and applications.

3.19 PRESSURE-GAUGE APPLICATION

A. Pressure gauges at discharge of each water service into building are to be the following:

1. [**Liquid filled**][**Sealed**][**Open front, pressure relief**][**Solid front, pressure relief**] [**direct**][**remote**] mounted, metal case.
2. [**Sealed**] [**direct**][**remote**] mounted, plastic case.
3. Test plug with [**chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber inserts.

B. Pressure gauges at inlet and outlet of each water pressure-reducing valve are to be the following:

1. [**Liquid filled**][**Sealed**][**Open front, pressure relief**][**Solid front, pressure relief**] [**direct**][**remote**] mounted, metal case.
2. [**Sealed**] [**direct**][**remote**] mounted, plastic case.
3. Test plug with [**chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber inserts.

C. Pressure gauges at suction and discharge of each domestic water pump are to be the following:

1. [**Liquid filled**][**Sealed**][**Open front, pressure relief**][**Solid front, pressure relief**] [**direct**][**remote**] mounted, metal case.
2. [**Sealed**] [**direct**][**remote**] mounted, plastic case.
3. Test plug with [**chlorosulfonated polyethylene synthetic**][**EPDM**] self-sealing rubber inserts.

3.20 PRESSURE-GAUGE SCALE-RANGE APPLICATION

A. Scale Range for Water Service Piping:

1. [**0 to 100 psi (0 to 600 kPa)**][**0 to 100 psi and 0 to 600 kPa**].
2. [**0 to 160 psi (0 to 1100 kPa)**][**0 to 160 psi and 0 to 1100 kPa**].
3. [**0 to 200 psi (0 to 1400 kPa)**][**0 to 200 psi and 0 to 1400 kPa**].

B. Scale Range for Domestic Water Piping:

1. [**0 to 100 psi (0 to 600 kPa)**][**0 to 100 psi and 0 to 600 kPa**].
2. [**0 to 160 psi (0 to 1100 kPa)**][**0 to 160 psi and 0 to 1100 kPa**].
3. [**0 to 200 psi (0 to 1400 kPa)**][**0 to 200 psi and 0 to 1400 kPa**].
4. [**0 to 300 psi (0 to 2500 kPa)**][**0 to 300 psi and 0 to 2500 kPa**].

C. Insert additional paragraphs for pressure-gauge scale ranges and applications.

END OF SECTION 22 05 00 00

SECTION 22 05 00 00A - TESTING, ADJUSTING, AND BALANCING FOR PLUMBING

PART 1 - GENERAL

1.1 SUMMARY

A. The Work of this Section Includes:

1. TAB of domestic water system.
2. TAB of plumbing equipment:

a. Domestic water booster pumps.
b. Domestic hot-water in-line circulation pumps.
c. General-duty air compressors.
d. Sanitary sewage pumps.
e. Drainage pumps.
f. Laboratory air compressors.
g. Laboratory vacuum pumps.

3. Pipe-leakage test verification.
4. Testing, adjusting, and balancing of existing plumbing systems and equipment.

B. Related Requirements:

1. Section 230593 "Testing, Adjusting, and Balancing for HVAC" for TAB of HVAC.

1.2 DEFINITIONS

A. AABC: Associated Air Balance Council.

B. FFT: Fast Fourier transform.

C. INCE: Institute of Noise Control Engineering.

D. NC: Noise criteria.

E. NEBB: National Environmental Balancing Bureau.

F. RC: Room criteria.

G. TAB: Testing, adjusting, and balancing.

H. TABB: Testing, Adjusting, and Balancing Bureau.

I. TAB Specialist: An independent entity meeting qualifications to perform TAB work.

J. TDH: Total dynamic head.

1.3 PREINSTALLATION MEETINGS

A. TAB Conference: Conduct a TAB conference at [**Project site**]<**Insert location**> after approval of the TAB strategies and procedures plan, to develop a mutual understanding of the details. Provide a minimum of [**14**]<**Insert number**> days' advance notice of scheduled meeting time and location.

1. Minimum Agenda Items:

a. The Contract Documents examination report.
b. The TAB plan.
c. Requirements for coordination and cooperation of trades and subcontractors.
d. Proposed procedures for documentation and communication flow.
e. <**Insert additional agenda items as required**>.

1.4 INFORMATIONAL SUBMITTALS

A. Qualification Data: Within [**30**][**60**][**90**]<**Insert number**> days of Contractor's Notice to Proceed, submit documentation that the TAB specialist and this Project's TAB team members meet the qualifications specified in "Quality Assurance" Article.

B. Contract Documents Examination Report: Within [**30**][**60**][**90**]<**Insert number**> days of Contractor's Notice to Proceed, provide a summary report of the examination review required in "Examination" Article, if issues are discovered that may preclude the proper testing and balancing of the systems. Submit a summary report of the examination review required in "Examination" Article.

C. Strategies and Procedures Plan: Within [**30**][**60**][**90**]<**Insert number**> days of Contractor's Notice to Proceed, submit TAB strategies and step-by-step procedures, as specified in "Preparation" Article.

D. System Readiness Checklists: Within [**30**][**60**][**90**]<**Insert number**> days of Contractor's Notice to Proceed, submit system readiness checklists, as specified in "Preparation" Article, to be used and filled out by systems installers verifying that systems are ready for TAB.

E. Certified TAB Reports: Within [**14**][**21**][**30**]<**Insert number**> days of completion of testing and balancing work.

1. Submit one copy of the final TAB report to the design professional of record's firm. Provide [**five**]<**Insert number**> additional copies to Contractor.

F. Sample report forms.

G. Instrument calibration reports, to include the following:

1. Instrument type and make.
2. Serial number.
3. Application.
4. Dates of use.
5. Dates of calibration and calibration interval.

1.5 QUALITY ASSURANCE

A. TAB Specialist Firm's Qualifications, Certified by AABC:

1. TAB Field Supervisor: Employee of the TAB specialist firm and certified by AABC.
2. TAB Technician: Employee of the TAB specialist firm and certified by AABC.

B. TAB Specialist Firm's Qualifications: Certified by [**NEBB**][**or**][**TABB**].

1. TAB Certified Professional: Employee of the TAB specialist firm and certified by [**NEBB**][**or**][**TABB**].
2. TAB Technician: Employee of the TAB specialist firm and certified by [**NEBB**][**or**][**TABB**].
3. TAB specialist firm is to be independent, third-party, and unaffiliated with Contractor.

C. Sound and Vibration Specialists: [**NEBB-certified Sound and Vibration Technician**][**TABB-certified Sound and Vibration Technician**][**INCE Board-certified professional**][**Vibration Institute Category I Certified Vibration Analyst**][**Vibration Institute Category II Certified Vibration Analyst**][**Vibration Institute Category III Certified Vibration Analyst**][**Vibration Institute Category IV Certified Vibration Analyst**][**or**][**Licensed professional engineer who specializes in acoustical engineering**]<**Insert sound and vibration certification**>.

D. Instrumentation Type, Quantity, Accuracy, and Calibration: Comply with requirements in ASHRAE 111, Section 4, "Instrumentation."

E. ASHRAE 111 Compliance: Requirements in ASHRAE 111 applicable to analogous domestic water system and plumbing equipment balancing.

F. ASHRAE 188 Compliance: Comply with balancing and report requirements in Section 8.3, "Balancing."

G. Code and Authorities Having Jurisdiction Compliance: Furnish TAB services that comply with governing codes and requirements of authorities having jurisdiction.

1.6 FIELD CONDITIONS

A. Full Owner Occupancy: Owner will occupy the site and existing building during entire TAB period. Cooperate with Owner during TAB operations to minimize conflicts with Owner's operations.

B. Partial Owner Occupancy: Owner may occupy completed areas of building before Substantial Completion. Cooperate with Owner during TAB operations to minimize conflicts with Owner's operations.

PART 2 - PRODUCTS
PART 3 - EXECUTION

3.1 TAB SPECIALIST FIRMS

A. Subject to compliance with requirements, [**engage one of the following**][**available TAB specialist firm that may be engaged include, but are not limited to, the following**]:

1. <**Insert TAB specialist firm's name**>.

3.2 EXAMINATION

A. Examine the Contract Documents to become familiar with Project requirements and to discover conditions in system designs that may preclude proper TAB of systems and equipment. Submit Contract

Documents Examination Report summary of findings.

B. Examine installed systems for balancing devices, such as test ports, gauge cocks, thermometer wells, flow-control devices, and balancing valves and fittings. Note the locations of devices that are not accessible for TAB.

C. Examine approved submittals for plumbing systems and equipment.

D. Examine system and equipment installations, and verify that field quality-control testing, cleaning, and adjusting specified in individual Sections have been performed.

E. Examine plumbing equipment and verify that bearings are greased, belts are aligned and tight, filters are clean, and equipment with functioning controls is ready for operation.

F. Verify with installing Contractor that startup strainer screens have been replaced with permanent screens and that all strainers have been cleaned.

G. Examine control valves for proper installation for their intended function of isolating, throttling, diverting, or mixing fluid flows.

H. Observe demonstration of operating safety interlocks and controls on plumbing equipment.

I. Report deficiencies discovered before and during performance of TAB procedures. Observe and record system reactions to changes in conditions. Record default set points if different from indicated values.

3.3 PREPARATION

A. Prepare a TAB plan that includes the following:

1. Equipment and systems to be tested.
2. Strategies and step-by-step procedures for balancing the systems.
3. Instrumentation to be used.
4. Sample forms with specific identification for all equipment.

B. Prepare system-readiness checklists of plumbing systems and equipment to verify system readiness for TAB work. Include, at a minimum, the following:

1. Domestic Water System:

a. Verify leakage and pressure tests on water distribution systems have been completed in accordance with applicable code and authority having jurisdiction.
b. Water heaters are installed and functioning.
c. Piping is complete and all points of outlet are installed.
d. Water treatment is complete.
e. Systems are flushed, filled, and air purged.
f. Strainers are clean.
g. Control valves are functioning in accordance with the sequence of operation.
h. Shutoff and balance valves are 100 percent open.
i. [**Booster-**][**and**][**hot-water circulating**] pumps are operational and proper rotation is verified.
j. Pump gauge connections are installed directly at pump inlet and outlet flanges or in discharge and suction pipe prior to valves or strainers.
k. Variable-frequency controllers' startup is complete, and safeties are verified.
l. Suitable access to balancing devices and equipment is provided.

2. Sanitary Sewage/Drainage System:

    a. Leakage and pressure tests on sanitary sewage/drainage systems have been completed in accordance with applicable code and authority having jurisdiction requirements.
    b. Piping is complete.
    c. Sanitary sewage pumps/drainage pumps are operational.
    d. Control valves are functioning in accordance with the sequence of operation.
    e. Shutoff valves are 100 percent open.
    f. Suitable access to equipment is provided.

3. Compressed-Air System:

    a. Leakage and pressure tests on compressed air-distribution system have been satisfactorily completed in accordance with Div. 22 requirements.
    b. Piping is complete and all points of outlet are installed.
    c. Systems are flushed, filled, and air purged.
    d. Strainers are clean.
    e. Control valves are functioning in accordance with the sequence of operation.
    f. Shutoff and balance valves are 100 percent open.
    g. Compressors are operational and of proper rotation.
    h. Gauge connections are installed directly at compressor inlet and outlet flanges prior to valves or strainers.
    i. Variable-frequency controllers' startup is complete, and safeties are verified.
    j. Suitable access to balancing devices and equipment is provided,

4. Vacuum System:

    a. Leakage and pressure tests on vacuum system have been satisfactorily completed in accordance with Div. 22 requirements.
    b. Piping is complete and all points of inlet are installed.
    c. Systems are flushed, filled, and purged.
    d. Strainers are clean.
    e. Control valves are functioning in accordance with the sequence of operation.
    f. Shutoff and balance valves are 100 percent open.
    g. Vacuum pumps are operational and of proper rotation.
    h. Gauge connections are installed directly at vacuum pump inlet and outlet flanges prior to valves or strainers.
    i. Variable-frequency controllers' startup is complete, and safeties are verified.
    j. Note location of balancing devices that aren't accessible.

3.4 GENERAL PROCEDURES FOR TESTING AND BALANCING

A. Perform testing and balancing procedures on each system in accordance with the procedures contained in [**AABC's "National Standards for Total System Balance"**][**ASHRAE 111**][**NEBB's "Procedural Standard for Testing, Adjusting and Balancing of Environmental Systems"**][**SMACNA's "HVAC Systems - Testing, Adjusting & Balancing"**][**SMACNA's "TAB Procedural Guide"**] applicable to analogous domestic water system and plumbing equipment balancing in this Section.

B. Cut insulation, pipes, and equipment casings for installation of test probes to the minimum extent necessary for TAB procedures.

1. Installing Contractor to Perform the Following:

    a. Where holes for probes are required in piping or equipment, install pressure and temperature test plugs to seal systems.

b. Install and join new insulation that matches removed materials. Restore insulation, coverings, vapor barrier, and finish in accordance with Section 220716 "Plumbing Equipment Insulation" and Section 220719 "Plumbing Piping Insulation."

C. Mark equipment and balancing devices, including valve position indicators and similar controls and devices, with paint or other suitable, permanent identification material to show final settings.

D. Take and report testing and balancing measurements in [**inch-pound (IP**][**and**] units.

E. Report deficiencies discovered before and during performance of TAB procedures. Observe and record system reactions to changes in conditions. Record default set points if different from indicated values.

3.5 GENERAL PROCEDURES FOR PLUMBING EQUIPMENT

A. Test, adjust, and balance plumbing equipment indicated on Drawings, including, but not limited to, the following:

1. Motors.
2. Domestic water booster pumps.
3. Domestic water in-line pumps.
4. Domestic water heaters.
5. Sanitary sewage pumps.
6. Drainage pumps.
7. Air compressors.
8. Vacuum pumps.
9. <**Insert equipment**>.

3.6 PROCEDURES FOR DOMESTIC WATER SYSTEMS

A. Prepare test reports for pumps and other equipment. Obtain approved submittals and manufacturer-recommended testing procedures. Cross-check the summation of required equipment flow rates with system design flow rates.

B. Prepare schematic diagrams of systems' record Drawings piping layouts.

C. In addition to requirements in "Preparation" Article, prepare domestic water systems for testing and balancing as follows:

1. Check expansion tank for proper setting.
2. Check water heater for proper discharge temperature setting.
3. Check remotest point of outlet for adequate pressure.
4. Check flow-control valves for proper position.
5. Locate start-stop and disconnect switches, electrical interlocks, and motor controllers.
6. Verify that motor controllers are equipped with properly sized thermal protection.
7. Check that air has been purged from the system.

D. Measure and record upstream and downstream pressure of each piece of equipment.

E. Measure and record upstream and downstream pressure of pressure-reducing valves.

F. Check settings and operation of automatic temperature-control valves, self-contained control valves, and pressure-reducing valves. Record final settings.

G. Check settings and operation of each safety valve. Record settings.

3.7 PROCEDURES FOR COMPRESSED-AIR SYSTEMS

A. Prepare test reports for air compressors and other equipment. Obtain approved submittals and manufacturer-recommended testing procedures. Cross-check the summation of required equipment flow rates with system design flow rates.

B. Prepare schematic diagrams of systems' record Drawings piping layouts.

C. In addition to requirements in "Preparation" Article, prepare compressed-air systems for testing and balancing as follows:

1. Check remotest point of outlet for adequate pressure.
2. Check pressure-control valves for proper position.
3. Locate start-stop and disconnect switches, electrical interlocks, and motor controllers.
4. Verify that motor controllers are equipped with properly sized thermal protection.

D. Measure and record upstream and downstream pressure of pressure-reducing valves.

E. Check settings and operation of pressure-reducing valves. Record final settings.

F. Check settings and operation of each safety valve. Record settings.

3.8 PROCEDURES FOR VACUUM SYSTEMS

A. Prepare test reports for vacuum pumps and other equipment. Obtain approved submittals and manufacturer-recommended testing procedures. Cross-check the summation of required equipment flow rates with system design flow rates.

B. Prepare schematic diagrams of systems' record Drawings piping layouts.

C. In addition to requirements in "Preparation" Article, prepare domestic water systems for testing and balancing as follows:

1. Check remotest point of inlet for adequate vacuum.
2. Locate start-stop and disconnect switches, electrical interlocks, and motor controllers.
3. Verify that motor controllers are equipped with properly sized thermal protection.

3.9 PROCEDURES FOR DOMESTIC WATER SYSTEM BOOSTER PUMPS

A. Adjust pumps to deliver total design flow.

1. Measure total water flow.

a. Position valves for full flow through coils.
b. Measure flow by main flow meter, if installed.
c. If main flow meter is not installed, determine flow by pump TDH or known equipment pressure drop.

2. Measure pump TDH as follows:

a. Measure discharge pressure directly at the pump outlet flange or in discharge pipe prior to any valves.
b. Measure inlet pressure directly at the pump inlet flange or in suction pipe prior to any valves or strainers.
c. Convert pressure to head and correct for differences in gauge heights.
d. Verify pump impeller size by measuring the TDH with the discharge valve closed. Note the point on manufacturer's pump curve at zero flow, and verify that the pump has the intended impeller size.
e. With valves open, read pump TDH. Adjust pump discharge valve until design water flow is achieved. If excessive throttling is required to achieve desired flow, pump impellers are to be trimmed to reduce excess throttling.

3. Monitor motor performance during procedures, and do not operate motor in an overloaded condition.

B. Adjust flow-measuring devices installed in mains and branches to design water flows.

1. Measure flow in main and branch pipes.
2. Adjust main and branch balance valves for design flow.
3. Re-measure each main and branch after all have been adjusted.

C. Verify final system conditions as follows:

1. Re-measure and confirm that total water flow is within design.
2. Re-measure final pumps' operating data, TDH, volts, amps, and static profile.
3. Mark final settings.

D. Verify that memory stops have been set.

3.10 PROCEDURES FOR DOMESTIC HOT-WATER CIRCULATING INLINE PUMP

A. Balance system with manual or automatic balancing valves by setting at design flow.

1. Measure flow in main and branch pipes.
2. Adjust main and branch balance valves for design flow.
3. Re-measure each main and branch after all have been adjusted.

B. Adjust pump to deliver total design flow.

1. Measure pump TDH as follows:

a. Measure discharge pressure directly at the pump outlet flange or in discharge pipe prior to any valves.
b. Measure inlet pressure directly at the pump inlet flange or in suction pipe prior to any valves or strainers.
c. Convert pressure to head and correct for differences in gauge heights.
d. Verify pump impeller size by measuring the TDH with the discharge valve closed. Note the point on manufacturer's pump curve at zero flow, and verify that the pump has the intended impeller size.

2. Monitor motor performance during procedures, and do not operate motor in an overloaded condition.
3. Mark final settings and verify that all memory stops have been set.
4. Verify final system conditions as follows:

a. Re-measure and confirm that total flow is within design.
b. Re-measure final pumps' operating data, TDH, volts, amps, speed, and static profile.
c. Mark final settings.

3.11 PROCEDURES FOR MOTORS

A. Motors: [**1/2**]<**Insert value**> hp and larger; test at final balanced conditions and record the following data:

1. Manufacturer's name, model number, and serial number.
2. Motor horsepower rating.
3. Motor rpm.
4. Phase and hertz.
5. Nameplate and measured voltage, each phase.
6. Nameplate and measured amperage, each phase.
7. Service factor and frame size.

B. Motors Driven by Variable-Frequency Controllers: Test manual bypass of controller to prove proper operation. Verify and report Hz at maximum and minimum flows.

3.12 PROCEDURES FOR WATER HEATERS

A. Electric Water Heaters:

1. Measure and record entering- and leaving-water temperatures.
2. Measure and record water flow.
3. Measure and record pressure drop.
4. [**Measure and**]Record relief valve(s) pressure setting.
5. Capacity: Calculate in **Btu/h** **(kW)** of heating output.
6. Efficiency: Calculate operating efficiency for comparison to submitted equipment.

B. Gas- and Oil-Fired Water Heaters:

1. Measure and record entering- and leaving-water temperatures.
2. Measure and record water flow.
3. Measure and record pressure drop.
4. [**Measure and**]Record relief valve(s) pressure setting.
5. Capacity: Calculate in **Btu/h** **(kW)** of heating output.
6. Fuel Consumption: If fuel supply is equipped with flow meter, measure and record consumption.
7. Efficiency: Calculate operating efficiency for comparison to submitted equipment.
8. Fan, motor, and motor controller operating data.

3.13 SOUND TESTS

A. After systems are balanced and Substantial Completion, with all systems operating at normal conditions and with all spaces completed and finished for occupancy, measure and record sound levels at [**five**][**10**][**15**]<**Insert number**> locations as designated by Architect. All building mechanical, electrical, and plumbing equipment, which may affect sound readings, must be operational.

B. Sound-Level Testing Meter Instrumentation - Minimum Requirements:

1. Portable, general-purpose testing meter consisting of a microphone, processing unit, and readout.

2. Capable of showing fluctuations at minimum and maximum levels and measuring the equivalent continuous sound pressure level (Leq).
3. Capable of using one-third octave band filters to measure frequencies from 31.5 Hz to 8000 Hz.
4. Accuracy of plus/minus two decibels.
5. Current NIST-traceable annual calibration. Calibrate instruments prior to taking measurements and after taking measurements each day of use.

C. Test Procedures - Indoors:

1. Measure and record sound levels at the following rooms:

   a. <**Insert list of room numbers and names where sound testing is required**>.

2. For each room/location tested, select a measurement location that has the greatest anticipated sound level. If testing multiple locations for each room type, select at least one location that is near and at least one location that is remote from the predominant sound source.
3. Perform test at quietest background noise period. Note cause of unpreventable sound that affects test outcome.
4. Equipment is to be operating at design values.
5. Sound-testing firm is to have access to controls hardware, software, and onsite technical support at no cost to the sound-testing firm. The installing contractors are to provide a controlled, steady-state environment (flow, pressure, control, and temperature) during duration of sound testing.
6. Use a microphone suitable for the type of noise levels measured that is compatible with meter.
7. At each measurement location, record a set of background sound pressure levels, with fast time constant and minimum time duration of 60 seconds, in the eight unweighted octave bands [**63 Hz to 8000 Hz (NC)**][**31.5 Hz to 4000 Hz (RC)**] with the equipment off.
8. At each measurement location, record a set of sound pressure levels, with fast time constant and minimum time duration of 60 seconds, in the eight unweighted octave bands [**63 Hz to 8000 Hz (NC)**][**31.5 Hz to 4000 Hz (RC)**] with the equipment operating.
9. Take readings no closer than **36 inches (900 mm)** from a wall or from the operating equipment and approximately **48 inches (1200 mm)** from the floor, with the meter held or mounted on a tripod.

D. Reporting:

1. The final report is to contain the following information at a minimum:

   a. Report Title Page: Page indicating Project name, names of Project Architect, engineer, HVAC Contractor, and sound measurement firm with names, addresses, and telephone numbers.
   b. Report Certification Page: Page indicating Project name, sound measurement firm name, name of individual performing measurements, and all required sound technician certifications.
   c. Table of Contents: Identify report sections and total number of pages in each section.
   d. Report Summary/Remarks: Narrative description of system setup conditions, results, and deficiencies.
   e. Instrument Calibration Section: List of instruments to be used to verify the reported data, containing the name/type of each instrument, manufacturer, model number, serial number, calibration date and dates of use, and NIST-traceable calibration certificates.
   f. Sound Measurement Data Sheets: Record sound measurements on sound measurement report forms, indicating the decibel levels measured for both "background" and "building system operating" readings. Record each tested location on a separate NC or RC chart. Record the following information on the forms:

      1) Date and time of test.

2) Equipment Operational Parameters: Speed and frequency at time of measurements.
3) Indoor Measurements: Space location within the building, including floor level and room space number.
4) Outdoor Measurements: Location identifier such as location relative to equipment, building, or property line.
5) Indicate where measurements meet or exceed design criteria.

3.14 VIBRATION TESTS

A. After systems are balanced and Substantially Completion, measure and record vibration levels on equipment having motor horsepower equal to or greater than [**3**]<**Insert number**>[**for pumps and fans,**][**5**]<**Insert number**>[**for chillers and compressors**].

B. Instrumentation:

1. Use portable, battery-operated, and microprocessor-controlled vibration meter with or without a built-in printer.
2. The meter is to automatically identify engineering units, frequency resolution, filter bandwidth, amplitude, and frequency scale values.
3. The meter is to be able to measure machine vibration displacement in mils of deflection; velocity in inches per second (meters/sec); and acceleration in G's (or g-force), inches per second squared (G's, meters per second squared).
4. Calibration of instrument and transducer must be NIST traceable and must be current during the time period measurements are being made. Vibration instruments and transducers must have NIST-traceable calibration every 12 months. Verify calibration date is current for vibration meter before taking readings.

C. Pretest Procedures:

1. Before any vibration measurements are made, confirm that the following items have been completed and any deficiencies found are reported to the appropriate parties for remedy:

a. Verify that all vibration isolators are installed in accordance with respective manufacturer's written instructions.
b. Verify that piping and conduit penetrations through plumbing equipment room envelope are sealed, and that there is no rigid contact with building structure.
c. Inspect steel isolation bases for cracked welds and bending/twisting of steel members.
d. Inspect concrete isolation bases for cracked concrete. Check isolator retainer brackets to be sure they are not loose. Concrete base must be flat and true level.
e. Examine elastomeric isolators for cracks in the rubber and for loose bonds between the rubber and the steel plates and other steel components. Verify clearance is provided between bolts and the side of bolt holes to prevent short circuiting.
f. Examine steel spring isolators for loose or missing bolts, nuts, and lock washers. Verify springs are not overloaded or underloaded, completely collapsed, or cocked. Verify rubber or glass-fiber pad between bottom steel spring plate and the concrete/supporting structure is in place.
g. Inspect isolators that have seismic restraint devices to make sure that all shims have been removed and supportive nuts have been properly adjusted to allow for free floating of the isolated system.
h. Verify that seismic restraints are not preventing proper functioning of vibration isolation function.
i. Verify space under isolated bases are clean and free of debris that could cause short-circuiting.
j. Verify that shipping bolts associated with spring isolators have been removed so that they do not short-circuit the system.

k. Verify flexible piping, hoses, and expansion joint types, lengths, and locations are as specified.
l. Verify that electrical and control connections do not restrain movement of the vibration-isolated equipment.
m. Verify flexible connections between fans and ductwork "bellow" as designed when fans are operating.
n. Verify that hanger isolator rods are free of misalignment and not in rigid contact with the hanger housing.

D. Test Procedures:

1. Perform vibration measurements when other building and outdoor vibration sources are at a minimum level and will not adversely influence measurements of equipment being tested.
2. Observe if there is equipment in the building that might interfere with testing. Note the equipment to the construction manager and request resolution before testing begins.
3. Take measurements when exterior vibration sources, such as trains, roadway traffic, adjacent construction activities, and the like, are at a minimum level.
4. Attach and secure vibration transducer in accordance with the most current edition of [**NEBB's "Procedural Standards for Measurement of Sound and Vibration."**]<**Insert reference document.**>
5. Measure and record vibration levels [**in at least 1.25 Hz increments over a minimum frequency range of 5 to 1000 Hz**]<**Insert increment requirements**>.
6. Measure and record acceleration and/or velocity and/or displacement readings on equipment; bearing and equipment base in the vertical, horizontal, and axial planes; or as per-contract specifications, where measurements can be performed safely and where measurement locations are accessible.

    a. Pumps:

        1) Pump Bearing: Drive end and opposite end.
        2) Motor Bearing: Drive end and opposite end.
        3) Equipment Base: Top and side, within **6 inches (152 mm)** of one isolator.
        4) Building: Floor adjacent to pump/motor, within **6 inches (152 mm)** of one isolator; vertical axis only.

    b. Compressors:

        1) Compressor Bearing: Drive end and opposite end.
        2) Motor Bearing: Drive end and opposite end.
        3) Equipment Base: Top and side, within **6 inches (152 mm)** of one isolator.
        4) Building: Floor adjacent to compressor/motor, within **6 inches (152 mm)** of one isolator; vertical axis only.

7. FFT Analyzer Settings:

    a. Windowing: Hanning.
    b. Averages: At least two.
    c. Frequency Range: 5 to 1,000 Hz (300 to 60,000 rpm).
    d. Frequency Resolution: At least 1.25 Hz (75 rpm).
    e. Line of Resolution: At least 800.
    f. Detection: Peak, peak-to-peak, or RMS.
    g. Averaging: Exponential.

E. Reporting:

1. Vibration Measurement Report Forms:

    a. For each measurement location, record vibration measurements on appropriate test forms, showing the following information:

        1) Date of test.
        2) Equipment designation, location, motor horsepower, and equipment operational parameters (speed/frequency) at time of test.
        3) Measured acceleration, [**in units of g's (g-force), inches/seconds squared (meters/seconds squared)**]<**Insert units of measure**>.
        4) Measured deplacement, [**in units of inches, mils (millimeters)**]<**Insert units of measure**>.
        5) Vibration level plot of vibration amplitude versus frequency for each measurement location.
        6) Verify vibration amplitude level plot versus frequency for each measurement location.

2. Verify actual vibration against vibration limits. Follow the[**General Machinery Vibration Severity Chart**] or[**Vibration Acceleration General Severity Chart**] from [**ASHRAE Handbook - "HVAC Applications," Ch. "Noise and Vibration Control"**][**NEBB's "Procedural Standard for Measurement of Sound and Vibration"**][**or**][**AABC's "National Standards for Total System Balance."**] Acceptable levels of vibration are normally "smooth" to "good."
3. Include General Machinery Vibration Severity Chart with all conditions plotted.
4. Test each bearing on motor, pump, and compressor as required. Track and record vibration levels from rotating component through casing to base.
5. Include horizontal-vertical-axial measurements for tests.

3.15 PROCEDURES FOR TESTING, ADJUSTING, AND BALANCING EXISTING SYSTEMS

A. Perform a preconstruction inspection of existing equipment that is to remain and be reused.

1. Measure and record flows, temperatures, and pressures of each piece of equipment. Compare the values to design or nameplate information, where information is available.
2. Measure motor voltage and amperage. Compare the values to motor nameplate information.
3. Check the condition of filters.
4. Check bearings and other lubricated parts for proper lubrication.
5. Report on the operating condition of the equipment and the results of the measurements taken. Report deficiencies.

B. TAB after Construction: Before performing testing and balancing of renovated existing systems, inspect existing equipment that is to remain and be reused to verify that existing equipment has been cleaned and refurbished in accordance with renovation scope indicated by Contract Documents. Verify the following:

1. New filters are installed.
2. Bearings and other parts are properly lubricated.
3. Deficiencies noted in the preconstruction report are corrected.

C. Perform testing and balancing of existing systems to the extent that existing systems are affected by the renovation work.

1. Compare the indicated system flows of the renovated work to the measured flows and determine the new pump speed.
2. Verify that the indicated system flows of the renovated work result in velocities and pump speeds that are within the acceptable limits defined by equipment manufacturer.

3. If calculations increase or decrease the system flow rates by more than [**5**]<**Insert number**> percent, make equipment adjustments to achieve the calculated rates. If increase or decrease is [**5**]<**Insert number**> percent or less, equipment adjustments are not required.

3.16 TOLERANCES

A. Set plumbing system's flow rates within the following tolerances:

1. Domestic Water Flow Rate: [**Plus or minus 5 percent**][**Plus or minus 10 percent**][**Plus 10 percent or minus 5 percent**]<**Insert value**>. If design value is less than **10 gpm (0.63 L/s)**, flow rate is within 10 percent.
2. Compressed-Air Flow Rate: [**Plus or minus 5 percent**][**Plus or minus 10 percent**][**Plus 10 percent or minus 5 percent**]<**Insert value**>. If design value is less than **10 gpm (0.63 L/s)**, flow rate is within 10 percent.
3. Vacuum Flow Rate: [**Plus or minus 5 percent**][**Plus or minus 10 percent**][**Plus 10 percent or minus 5 percent**]<**Insert value**>.

3.17 PROGRESS REPORTING

A. Initial Construction-Phase Report: Based on examination of the Contract Documents as specified in "Examination" Article, prepare a report on the adequacy of design for system-balancing devices. Recommend changes and additions to system-balancing devices, to facilitate proper performance measuring and balancing. Recommend changes and additions to plumbing systems and general construction to allow access for performance-measuring and -balancing devices.

B. Status Reports: Prepare [**weekly**][**biweekly**][**monthly**]<**Insert time interval**> progress reports to describe completed procedures, procedures in progress, and scheduled procedures. Include a list of deficiencies and problems found in systems being tested and balanced. Prepare a separate report for each system and each building floor for systems serving multiple floors.

3.18 FINAL TESTING AND BALANCING REPORT

A. General: Prepare a certified written report; tabulate and divide the report into separate sections for tested systems and balanced systems.

1. Include a certification sheet at the front of the report's binder, signed and sealed by the certified testing and balancing engineer.
2. Include a list of instruments used for procedures, along with proof of calibration.
3. Certify validity and accuracy of field data.

B. Final Report Contents: In addition to certified field-report data, include the following:

1. Pump curves.
2. Manufacturers' test data.
3. Field test reports prepared by system and equipment installers.
4. Other information relative to equipment performance; do not include Shop Drawings and product data.

C. General Report Data: In addition to form titles and entries, include the following data:

1. Title page.

2. Name and address of the TAB specialist firm and technician.
3. Project name.
4. Project location.
5. Project Architect's name, firm, and address.
6. Project engineer's name, firm, and address.
7. Project Contractor's name, firm, and address.
8. Report date.
9. Signature of TAB supervisor who certifies the report.
10. Table of Contents with the total number of pages defined for each section of the report. Number each page in the report.
11. Summary of contents, including the following:

    a. Indicated versus final performance.
    b. Notable characteristics of systems.
    c. Description of system operation sequence if it varies from the Contract Documents.

12. Nomenclature sheets for each item of equipment.
13. Notes to explain why certain final data in the body of reports vary from indicated values.
14. Test conditions for pump performance forms, including the following:

    a. Variable-frequency controller settings for variable-flow hydronic systems.
    b. Settings for pressure controller(s).
    c. Other system operating conditions that affect performance.

D. System Diagrams: Include schematic layouts of distribution systems. Present each system with single-line diagram and include the following:

1. Flow rates.
2. Pipe and valve sizes and locations.
3. Balancing stations.
4. Position of balancing devices.

E. Gas- and Oil-Fired Water Heaters Test Reports: In addition to manufacturer's factory startup equipment reports, include the following:

1. Unit Data:

    a. System identification.
    b. Location.
    c. Make and type.
    d. Model number and unit size.
    e. Manufacturer's serial number.
    f. Fuel type in input data.
    g. Output capacity in **Btu/h (kW)**.
    h. Ignition type.
    i. Burner-control types.
    j. Motor horsepower and speed.
    k. Motor volts, phase, and hertz.
    l. Motor full-load amperage and service factor.
    m. Sheave make, size in **inches (mm)**, and bore.
    n. Center-to-center dimensions of sheave and amount of adjustments in **inches (mm)**.

2. Test Data (Indicated and Actual Values):

    a. Total airflow rate in **cfm (L/s)**.
    b. Entering-water temperature in **deg F (deg C)**.

c. Leaving-water temperature in deg F (deg C).
d. Low-fire fuel input in Btu/h (kW).
e. High-fire fuel input in Btu/h (kW).
f. High-temperature-limit setting in deg F (deg C).
g. Operating set point in Btu/h (kW).
h. Heating value of fuel in Btu/h (kW).

F. Electric Water Heater Test Reports: In addition to manufacturer's factory startup equipment reports, include the following:

1. Unit Data:

a. System identification.
b. Location.
c. Model number and unit size.
d. Manufacturer's serial number.
e. Output capacity in Btu/h (kW).
f. Number of stages.
g. Connected volts, phase, and hertz.
h. Rated amperage.

2. Test Data (Indicated and Actual Values):

a. Heat output in Btu/h (kW).
b. Entering-water temperature in deg F (deg C).
c. Leaving-water temperature in deg F (deg C).
d. High-temperature-limit setting in deg F (deg C).
e. Operating set point in deg F (deg C).
f. Voltage at each connection.
g. Amperage for each phase.

G. Pump Test Reports: Calculate impeller size by plotting the shutoff head on pump curves, and include the following:

1. Unit Data:

a. Unit identification.
b. Location.
c. Service.
d. Make and size.
e. Model number and serial number.
f. Water flow rate in gpm (L/s).
g. Water-pressure differential in feet of head or psig (kPa).
h. Required net positive suction head in feet of head or psig (kPa).
i. Pump speed.
j. Impeller diameter in inches (mm).
k. Motor make and frame size.
l. Motor horsepower and rpm.
m. Voltage at each connection.
n. Amperage for each phase.
o. Full-load amperage and service factor.
p. Seal type.

2. Test Data (Indicated and Actual Values):

a. Static head in **feet of head or psig (kPa)**.
b. Pump shutoff pressure in **feet of head or psig (kPa)**.
c. Actual impeller size in **inches (mm)**.
d. Full-open flow rate in **gpm (L/s)**.
e. Full-open pressure in **feet of head or psig (kPa)**.
f. Final discharge pressure in **feet of head or psig (kPa)**.
g. Final suction pressure in **feet of head or psig (kPa)**.
h. Final total pressure in **feet of head or psig (kPa)**.
i. Final water flow rate in **gpm (L/s)**.
j. Voltage at each connection.
k. Amperage for each phase.

H. Instrument Calibration Reports:

1. Report Data:

a. Instrument type and make.
b. Serial number.
c. Application.
d. Dates of use.
e. Dates of calibration.

3.19 VERIFICATION OF TAB REPORT

A. The TAB specialist firm's test and balance technician is to conduct the final verification in the presence of [**Architect**][**Owner**][**Construction Manager**][**Commissioning Authority**].

B. [**Architect**][**Owner**][**Construction Manager**][**Commissioning Authority**] are to randomly select measurements, documented in the final report, to be rechecked. Rechecking is to be limited to the lesser of either [**10**]<**Insert number**> percent of the total measurements recorded or the extent of measurements that can be accomplished in [**a normal 8-hour business day**]<**Insert value**>.

C. If rechecks yield measurements that differ from the measurements documented in the final report by more than the tolerances allowed, the measurements are to be noted as "FAILED."

D. If the number of "FAILED" measurements is greater than [**10**][**20**]<**Insert number**> percent of the total measurements checked during the final inspection, the TAB are to considered incomplete and are to be rejected.

E. If recheck measurements find the number of failed measurements noncompliant with requirements indicated, proceed as follows:

1. TAB specialists are to recheck all measurements and make adjustments. Revise the final report and balancing device settings to include all changes; resubmit the final report and request a second final inspection. Track all changes to show changes made to previous report.
2. If the second final inspection also fails, Owner may pursue other Contract options to complete TAB Work.

F. Prepare test and inspection reports.

3.20 REVERIFICATION

A. TAB specialist firm technicians are to recheck all measurements and make adjustments as required to complete the balancing. Revise the final report and request a second verification.

B. If the second verification also fails, [**Owner**][**Architect**] may contact [**AABC headquarters regarding the AABC National Performance Guaranty**][**TABB Quality Assurance Program, Customer Complaint Procedures**]<**Insert guaranty organization**>.

3.21 ADDITIONAL TESTS

A. Within [**90**]<**Insert number**> days of completing TAB, perform additional TAB to verify that balanced conditions are being maintained throughout and to correct unusual conditions.

END OF SECTION 22 05 00 00A

Task	Specification	Specification Description
22 05 19 00	22 05 00 00a	Testing, Adjusting, and Balancing for Plumbing

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 05 23 00 - GENERAL-DUTY VALVES FOR PLUMBING PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Ball valves.
2. Butterfly valves.
3. Check valves.
4. Gate valves.
5. Chainwheels.

1.2 DEFINITIONS

A. CWP: Cold working pressure.

B. EPDM: Ethylene propylene-diene terpolymer.

C. FKM: Fluoroelastomer.

D. NBR: Nitrile butadiene rubber (also known as Buna-N).

E. NRS: Nonrising stem.

F. OS&Y: Outside screw and yoke.

G. PTFE: Polytetrafluoroethylene.

H. RPTFE: Reinforced polytetrafluoroethylene.

I. RS: Rising stem.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.

a. Include material descriptions and dimensions of individual components.
b. Include operating characteristics and furnished accessories.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Prepare valves for shipping as follows:

1. Protect internal parts against rust and corrosion.
2. Protect threads, flange faces, grooved ends, press ends, solder ends, and weld ends.

3. Set ball valves open to minimize exposure of functional surfaces.
4. Set butterfly valves closed or slightly open.
5. Block check valves in either closed or open position.
6. Set gate valves closed to prevent rattling.

B. Use the following precautions during storage:

1. Maintain valve end protection.
2. Store valves indoors and maintain at higher-than-ambient-dew-point temperature. If outdoor storage is necessary, store valves off the ground in watertight enclosures.

C. Use sling to handle large valves; rig sling to avoid damage to exposed parts. Do not use operating handles or stems or other components as lifting or rigging points unless specifically indicated for this purpose in manufacturer's written instructions.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each type of valve from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Standards:

1. Domestic-water piping valves intended to convey or dispense water for human consumption must comply with the U.S. Safe Drinking Water Act (SDWA), requirements of authorities having jurisdiction, and NSF 61/NSF 372; or to be certified in compliance with NSF 61/NSF 372 by an American National Standards Institute (ANSI)-accredited third-party certification body, that the weighted average lead content at wetted surfaces is less than or equal to 0.25 percent.

B. ASME Compliance:

1. ASME B1.20.1 for threads for threaded-end valves.
2. ASME B16.1 for flanges on iron valves.
3. ASME B16.5 for flanges on steel valves.
4. ASME B16.10 and ASME B16.34 for ferrous valve dimensions and design criteria.
5. ASME B16.18 for cast-copper solder-joint connections.
6. ASME B16.22 for wrought-copper solder-joint connections.
7. ASME B16.34 for flanged- and threaded-end connections.
8. ASME B16.51 for press joint connections.
9. ASME B31.9 for building services piping valves.

C. AWWA Compliance: Comply with AWWA C606 for grooved-end connections.

D. Provide bronze valves made with dezincification-resistant materials. Bronze valves made with copper alloy (brass) containing more than 15 percent zinc are unacceptable.

E. Valve Pressure-Temperature Ratings: Not less than indicated and as required for system pressures and temperatures.

F. Valve Sizes: Same as upstream piping unless otherwise indicated.

G. Valve Bypass and Drain Connections: MSS SP-45.

H. Valve Actuator Type:

1. Gear Actuator: For quarter-turn ball valves [**NPS 4 (DN 100)**] and larger.
2. Hand Lever: For quarter-turn ball valves smaller than [**NPS 4 (DN 100)**].

I. Valves in Insulated Piping:

1. Provide **2-inch (50-mm)** extended neck stems.
2. Provide extended operating handles with nonthermal-conductive covering material and protective sleeves that allow operation of valves without breaking vapor seals or disturbing insulation.
3. Provide memory stops that are fully adjustable after insulation is applied.

2.3 BALL VALVES, LEAD FREE

A. Ball Valves, Lead Free, Threaded Ends - Brass, One Piece:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Bonomi North America, Inc.**]
   b. [**KITZ Corporation**]
   c. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Design: One piece.
5. Body Material: Forged brass or bronze.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Brass or stainless steel.
9. Ball: Chrome-plated brass or stainless steel.
10. Port: Reduced.

B. Ball Valves, Lead Free, Threaded or Soldered Ends - Brass, Two Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**A.Y. McDonald Mfg. Co.**]
   b. [**American Valve, Inc**]
   c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   d. [**Bonomi North America, Inc.**]
   e. [**Center Line; a Crane Co. brand**]
   f. [**DynaQuip Controls**]
   g. [**FNW; Ferguson Enterprises, Inc.**]
   h. [**Hammond Valve**]
   i. [**Jenkins Valves; a Crane Co. brand**]

j. [**Jomar Valve**]
k. [**KITZ Corporation**]
l. [**Lance Valves**]
m. [**Marwin Valve; Richards Industries**]
n. [**Milwaukee Valve Company**]
o. [**Mueller Streamline Co.; a company of Mueller Industries**]
p. [**Red-White Valve Corp.**]
q. [**Stockham; a Crane Co. brand**]
r. [**Viega LLC**]
s. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Forged brass.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Brass.
9. Ball: Chrome-plated brass.
10. Port: Full.

C. Ball Valves, Lead Free, Press Ends - Brass, Two Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bonomi North America, Inc.**]
d. [**Crane Fluid Systems; Crane Co.**]
e. [**Hammond Valve**]
f. [**Jenkins Valves; a Crane Co. brand**]
g. [**Jomar Valve**]
h. [**KITZ Corporation**]
i. [**Lance Valves**]
j. [**Milwaukee Valve Company**]
k. [**Stockham; a Crane Co. brand**]
l. [**Viega LLC**]
m. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110, MSS SP-145, IAPMO/ANSI Z1157.
3. CWP Rating: Minimum **200 psig (1380 kPa)**.
4. Body Design: Two piece.
5. Body Material: Forged brass.
6. Ends: Press.
7. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
8. Seats: PTFE or RPTFE.
9. Stem: Brass.
10. Ball: Chrome-plated brass.
11. Port: Full.
12. O-Ring Seal: NBR or EPDM.

D. Ball Valves, Lead Free, Threaded or Soldered Ends - Brass, Two Piece with Full Port and Stainless

Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**American Valve, Inc**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**Hammond Valve**]
    e. [**Jenkins Valves; a Crane Co. brand**]
    f. [**Jomar Valve**]
    g. [**KITZ Corporation**]
    h. [**Lance Valves**]
    i. [**Marwin Valve; Richards Industries**]
    j. [**Milwaukee Valve Company**]
    k. [**Red-White Valve Corp.**]
    l. [**Stockham; a Crane Co. brand**]
    m. [**Viega LLC**]
    n. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Forged brass.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Full.

E. Ball Valves, Lead Free, Press Ends - Brass, Two Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Valve, Inc**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Center Line; a Crane Co. brand**]
    d. [**Hammond Valve**]
    e. [**Jomar Valve**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**Viega LLC**]
    l. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110, MSS SP-145, and IAPMO/ANSI Z1157.
3. CWP Rating: Minimum **200 psig (1380 kPa)**.
4. Body Design: Two piece.
5. Body Material: Forged brass.

6. Ends: Press.
7. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
8. Seats: PTFE or RPTFE.
9. Stem: Stainless steel.
10. Ball: Stainless steel, vented.
11. Port: Full.
12. O-Ring Seal: NBR or EPDM.

F. Ball Valves, Lead Free, Threaded or Soldered Ends - Brass, Two Piece with Regular Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**American Valve, Inc**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**Center Line; a Crane Co. brand**]
    e. [**FNW; Ferguson Enterprises, Inc.**]
    f. [**Hammond Valve**]
    g. [**Jomar Valve**]
    h. [**KITZ Corporation**]
    i. [**Lance Valves**]
    j. [**Milwaukee Valve Company**]
    k. [**Red-White Valve Corp.**]
    l. [**Stockham; a Crane Co. brand**]
    m. [**Viega LLC**]
    n. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Forged brass.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Brass.
9. Ball: Chrome-plated brass.
10. Port: Regular.

G. Ball Valves, Lead Free, Threaded or Soldered Ends - Brass, Two Piece with Regular Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**American Valve, Inc**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**Center Line; a Crane Co. brand**]
    e. [**Hammond Valve**]
    f. [**Jomar Valve**]

g. [**KITZ Corporation**]
h. [**Lance Valves**]
i. [**Marwin Valve; Richards Industries**]
j. [**Milwaukee Valve Company**]
k. [**Neles Corporation**]
l. [**Red-White Valve Corp.**]
m. [**Stockham; a Crane Co. brand**]
n. [**Viega LLC**]
o. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Brass or bronze.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Regular.

H. Ball Valves, Lead Free, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bonomi North America, Inc.**]
b. [**Jomar Valve**]
c. [**Marwin Valve; Richards Industries**]
d. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Three piece.
5. Body Material: Forged brass.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Brass.
9. Ball: Chrome-plated brass.
10. Port: Full.

I. Ball Valves, Lead Free, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**DynaQuip Controls**]
b. [**Marwin Valve; Richards Industries**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Three piece.

5. Body Material: Forged brass.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Full.

J. Ball Valves, Lead Free, Threaded Ends - Bronze, One Piece with Bronze Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**NIBCO INC.**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. [**Zurn Industries, LLC**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Design: One piece.
5. Body Material: Bronze.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Bronze.
9. Ball: Chrome-plated brass.
10. Port: Reduced.

K. Ball Valves, Lead Free, Threaded Ends - Bronze, One Piece with Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**NIBCO INC.**]
    b. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: One piece.
5. Body Material: Bronze.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Reduced.

L. Ball Valves, Lead Free, Threaded or Soldered Ends - Bronze, Two Piece with Full Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Bonomi North America, Inc.**]
c. [**Center Line; a Crane Co. brand**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Milwaukee Valve Company**]
g. [**NIBCO INC.**]
h. [**Red-White Valve Corp.**]
i. [**Stockham; a Crane Co. brand**]
j. [**Viega LLC**]
k. [**WATTS; A Watts Water Technologies Company**]
l. [**Zurn Industries, LLC**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Bronze.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Bronze or brass.
9. Ball: Chrome-plated brass.
10. Port: Full.

M. Ball Valves, Lead Free, Press Ends - Bronze, Two Piece with Full Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Center Line; a Crane Co. brand**]
c. [**Hammond Valve**]
d. [**Milwaukee Valve Company**]
e. [**NIBCO INC.**]
f. [**Red-White Valve Corp.**]
g. [**Stockham; a Crane Co. brand**]
h. [**Viega LLC**]
i. [**Zurn Industries, LLC**]

2. Standards: MSS SP-110, MSS SP-145, and IAPMO/ANSI Z1157.
3. CWP Rating: Minimum **200 psig (1380 kPa)**.
4. Body Design: Two piece.
5. Body Material: Bronze.
6. Ends: Press.
7. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
8. Seats: PTFE or RTPFE.
9. Stem: Bronze or brass.
10. Ball: Chrome-plated brass.
11. Port: Full.
12. O-Ring Seal: EPDM or NBR.

N. Ball Valves, Lead Free, Threaded or Soldered Ends - Bronze, Two Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Center Line; a Crane Co. brand**]
c. [**DynaQuip Controls**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Milwaukee Valve Company**]
g. [**NIBCO INC.**]
h. [**Red-White Valve Corp.**]
i. [**Stockham; a Crane Co. brand**]
j. [**Viega LLC**]
k. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Bronze.
6. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Full.

O. Ball Valves, Lead Free, Threaded Ends - Bronze, Two Piece with Regular Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DynaQuip Controls**]
e. [**Hammond Valve**]
f. [**Jenkins Valves; a Crane Co. brand**]
g. [**Jomar Valve**]
h. [**Lance Valves**]
i. [**Milwaukee Valve Company**]
j. [**NIBCO INC.**]
k. [**Red-White Valve Corp.**]
l. [**Stockham; a Crane Co. brand**]
m. [**Viega LLC**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Bronze.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Bronze or brass.

9. Ball: Chrome-plated brass.
10. Port: Regular.

P. Ball Valves, Lead Free, Threaded Ends - Bronze, Two Piece with Regular Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Center Line; a Crane Co. brand**]
    c. [**DynaQuip Controls**]
    d. [**Hammond Valve**]
    e. [**Jenkins Valves; a Crane Co. brand**]
    f. [**Jomar Valve**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**Viega LLC**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Two piece.
5. Body Material: Bronze.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Regular.

Q. Ball Valves, Lead Free, Threaded Ends - Bronze, Three Piece with Full Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Three piece.
5. Body Material: Bronze.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Bronze or brass.
9. Ball: Chrome-plated brass.
10. Port: Full.

R. Ball Valves, Lead Free, Threaded Ends - Bronze, Three Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**DynaQuip Controls**]
c. [**NIBCO INC.**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Three piece.
5. Body Material: Bronze.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Full.

S. Ball Valves, Lead Free, Threaded or Soldered Ends - Bronze, Three Piece with Regular Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**NIBCO INC.**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Three piece.
5. Body Material: Bronze.
6. Ends: Threaded or soldered.
7. Seats: PTFE.
8. Stem: Bronze.
9. Ball: Chrome-plated brass.
10. Port: Regular.

T. Ball Valves, Lead Free, Threaded or Soldered Ends - Bronze, Three Piece with Regular Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**NIBCO INC.**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **600 psig (4140 kPa)**.
4. Body Design: Three piece.
5. Body Material: Bronze.
6. Ends: Threaded or soldered.
7. Seats: PTFE.

8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Regular.

U. Ball Valves, Lead Free, Flanged or Threaded Ends - Steel, with Full Port, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**DynaQuip Controls**]
    c. [**FNW; Ferguson Enterprises, Inc.**]
    d. [**Hammond Valve**]
    e. [**Jomar Valve**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**Neles Corporation**]
    i. [**NIBCO INC.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**Viega LLC**]
    l. [**WATTS; A Watts Water Technologies Company**]

2. Standards: MSS SP-72 and MSS SP-110.
3. CWP Rating: **285 psig (1964 kPa)**.
4. Body Design: Split body.
5. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
6. Ends: Flanged or threaded. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Full.

V. Ball Valves, Lead Free, Flanged or Threaded Ends - Steel, with Regular Port, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**FNW; Ferguson Enterprises, Inc.**]
    c. [**Hammond Valve**]
    d. [**Jomar Valve**]
    e. [**Lance Valves**]
    f. [**Milwaukee Valve Company**]
    g. [**Neles Corporation**]
    h. [**NIBCO INC.**]
    i. [**Stockham; a Crane Co. brand**]

2. Standards: MSS SP-72 and MSS SP-110.
3. CWP Rating: **285 psig (1964 kPa)**.
4. Body Design: Uni-body.
5. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
6. Ends: Flanged or threaded. See Part 3 ball valve schedule articles.

7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Regular.

W. Ball Valves, Lead Free, Flanged or Threaded Ends - Iron, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Valve, Inc**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Sure Flow Equipment Inc**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. [**Zurn Industries, LLC**]

2. Standards: MSS SP-72, MSS SP-110, and MSS SP-145.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Split body.
5. Body Material: ASTM A126, gray iron.
6. Ends: Flanged or threaded. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel.
10. Port: Full.

X. Ball Valves, Lead Free, Threaded or Flanged Ends - Stainless Steel, Two Piece with Full Port:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Guardian Worldwide LLC.**]
    d. [**Jomar Valve**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Split body.
5. Body Material: Type 316 stainless steel.
6. Ends: Threaded or flanged. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Type 316 stainless steel.
9. Ball: Type 316 stainless steel.
10. Port: Full.

Y. Ball Valves, Lead Free, Press Ends - Stainless Steel, Two Piece with Full Port:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Jomar Valve**]

2. Standards: MSS SP-110, MSS SP-145, IAPMO PS-117, and ICC-ES LC1002.
3. CWP Rating: Minimum **200 psig (1380 kPa)**.
4. Body Design: Split body.
5. Body Material: Type 316 stainless steel.
6. Ends: Press.
7. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
8. Seats: PTFE.
9. Stem: Type 316 stainless steel.
10. Ball: Type 316 stainless steel.
11. Port: Full.
12. O-Ring Seal: EPDM or NBR.

Z. Ball Valves - CPVC, Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**Colonial Engineering, Inc.**]
d. [**GF Piping Systems: Georg Fischer LLC**]
e. [**Hayward Flow Control; Hayward Industries, Inc.**]
f. [**IPEX USA LLC**]
g. [**Jomar Valve**]
h. [**Red-White Valve Corp.**]
i. [**Spears Manufacturing Company**]
j. [**Thermoplastic Valves, Inc**]

2. Standard: MSS SP-122.
3. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
4. Body Material: CPVC.
5. Body Design: Union type.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 ball valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable, socket, socket or threaded, threaded, or flanged. See Part 3 ball valve schedule articles.
8. Ball: CPVC, full port.
9. Seals: PTFE or EPDM-rubber O-rings.
10. Handle: Tee shaped.

AA. Ball Valves - CPVC, Non-Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**Colonial Engineering, Inc.**]
d. [**IPEX USA LLC**]
e. [**Jomar Valve**]
f. [**Red-White Valve Corp.**]
g. [**Spears Manufacturing Company**]

2. Standard: MSS SP-122.
3. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)**. See Part 3 ball valve schedule articles.
4. Body Material: CPVC.
5. Body Design: Non-union type.
6. End Connections: Socket or threaded.
7. Ball: CPVC, full or reduced port.
8. Seals: PTFE or EPDM-rubber O-rings.
9. Handle: Tee shaped.

BB. Ball Valves - PVC, Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**Colonial Engineering, Inc.**]
d. [**GF Piping Systems: Georg Fischer LLC**]
e. [**Hayward Flow Control; Hayward Industries, Inc.**]
f. [**IPEX USA LLC**]
g. [**Jomar Valve**]
h. [**Red-White Valve Corp.**]
i. [**Spears Manufacturing Company**]
j. [**Thermoplastic Valves, Inc**]

2. Standard: MSS SP-122.
3. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
4. Body Material: PVC.
5. Body Design: Union type.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 ball valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable union with socket, socket or threaded, threaded, or flanged. See Part 3 ball valve schedule articles.
8. Ball: PVC, full port.
9. Seals: PTFE or EPDM-rubber O-rings.
10. Handle: Tee shaped.

CC. Ball Valves - PVC, Non-Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**Colonial Engineering, Inc.**]
d. [**IPEX USA LLC**]
e. [**Jomar Valve**]
f. [**Red-White Valve Corp.**]
g. [**Spears Manufacturing Company**]

2. Standard: MSS SP-122.
3. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature.
4. Body Material: PVC.
5. Body Design: Non-union type.
6. End Connections: Socket or threaded.
7. Ball: PVC, full or reduced port.
8. Seals: PTFE or EPDM-rubber O-rings.
9. Handle: Tee shaped.

2.4 BALL VALVES, GENERAL PURPOSE

A. Ball Valves, Threaded or Soldered Ends - Brass, Two Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**American Valve, Inc**]
c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
d. [**Center Line; a Crane Co. brand**]
e. [**DynaQuip Controls**]
f. [**FNW; Ferguson Enterprises, Inc.**]
g. [**Hammond Valve**]
h. [**Jenkins Valves; a Crane Co. brand**]
i. [**Jomar Valve**]
j. [**KITZ Corporation**]
k. [**Lance Valves**]
l. [**Legend Valve & Fitting, Inc**]
m. [**Marwin Valve; Richards Industries**]
n. [**Milwaukee Valve Company**]
o. [**Red-White Valve Corp.**]
p. [**Siemens Industry, Inc., Building Technologies Division**]
q. [**Stockham; a Crane Co. brand**]
r. [**Viega LLC**]
s. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-110.
3. SWP Rating: **150 psig (1035 kPa)**.
4. CWP Rating: **600 psig (4140 kPa)**.
5. Body Design: Two piece.
6. Body Material: Forged brass.
7. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
8. Seats: PTFE.
9. Stem: Brass.

10. Ball: Chrome-plated brass.
11. Port: Full.

B. Ball Valves, Threaded or Soldered Ends - Brass, Two Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**American Valve, Inc**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**DynaQuip Controls**]
    f. [**FNW; Ferguson Enterprises, Inc.**]
    g. [**Hammond Valve**]
    h. [**Jamesbury; a brand of Valmet**]
    i. [**Jenkins Valves; a Crane Co. brand**]
    j. [**Jomar Valve**]
    k. [**KITZ Corporation**]
    l. [**Lance Valves**]
    m. [**Legend Valve & Fitting, Inc**]
    n. [**Marwin Valve; Richards Industries**]
    o. [**Milwaukee Valve Company**]
    p. [**Red-White Valve Corp.**]
    q. [**RuB Inc**]
    r. [**Siemens Industry, Inc., Building Technologies Division**]
    s. [**Stockham; a Crane Co. brand**]
    t. [**Viega LLC**]
    u. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-110.
3. SWP Rating: **150 psig (1035 kPa)**.
4. CWP Rating: **600 psig (4140 kPa)**.
5. Body Design: Two piece.
6. Body Material: Forged brass.
7. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
8. Seats: PTFE.
9. Stem: Stainless steel.
10. Ball: Stainless steel, vented.
11. Port: Full.

C. Ball Valves, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-110.
3. SWP Rating: **150 psig (1035 kPa)**.
4. CWP Rating: **600 psig (4140 kPa)**.

5. Body Design: Three piece.
6. Body Material: Forged brass.
7. Ends: Threaded or soldered ends. See Part 3 ball valve schedule articles.
8. Seats: PTFE.
9. Stem: Brass.
10. Ball: Chrome-plated brass.
11. Port: Full.

D. Ball Valves, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**DynaQuip Controls**]
    b. [**Marwin Valve; Richards Industries**]
    c. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-110.
3. SWP Rating: **150 psig (1035 kPa)**.
4. CWP Rating: **600 psig (4140 kPa)**.
5. Body Design: Three piece.
6. Body Material: Forged brass.
7. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
8. Seats: PTFE.
9. Stem: Stainless steel.
10. Ball: Stainless steel, vented.
11. Port: Full.

E. Ball Valves, Threaded Ends - Bronze, Two Piece, Safety Exhaust:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**DynaQuip Controls**]
    c. [**Lance Valves**]

2. Standards: MSS SP-110 and MSS SP-145.
3. CWP Rating: **200 psig (1380 kPa)** or other pressure. See Part 3 ball valve schedule articles.
4. Body Design: Two piece.
5. Body Material: Bronze, ASTM B584, Alloy C844.
6. Ends: Threaded.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Chrome-plated brass, with exhaust vent opening for pneumatic applications.
10. Port: Full.

F. Ball Valves, Flanged Ends - Steel, with Full Port and Stainless Steel Trim, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**DynaQuip Controls**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**Jamesbury; a brand of Valmet**]
f. [**Jomar Valve**]
g. [**Lance Valves**]
h. [**Milwaukee Valve Company**]
i. [**NIBCO INC.**]
j. [**Stockham; a Crane Co. brand**]
k. [**Viega LLC**]
l. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-72.
3. CWP Rating: **285 psig (1964 kPa)**.
4. Body Design: Split body.
5. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
6. Ends: Flanged.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Full.

G. Ball Valves, Flanged Ends - Steel, with Full Port and Stainless Steel Trim, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**DynaQuip Controls**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**Jamesbury; a brand of Valmet**]
f. [**Jomar Valve**]
g. [**Lance Valves**]
h. [**Milwaukee Valve Company**]
i. [**NIBCO INC.**]
j. [**Stockham; a Crane Co. brand**]
k. [**Viega LLC**]
l. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-72.
3. CWP Rating: **720 psig (4960 kPa)**.
4. Body Design: Split body.
5. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
6. Ends: Flanged.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel, vented.
10. Port: Full.

H. Ball Valves, Flanged Ends - Iron, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**American Valve, Inc**]
   b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   c. [**Sure Flow Equipment Inc**]
   d. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-72.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Split body.
5. Body Material: ASTM A126, gray iron.
6. Ends: Flanged.
7. Seats: PTFE.
8. Stem: Stainless steel.
9. Ball: Stainless steel.
10. Port: Full.

I. Ball Valves, Threaded or Flanged Ends - Stainless Steel, Two Piece with Full Port:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**A.Y. McDonald Mfg. Co.**]
   b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   c. [**FNW; Ferguson Enterprises, Inc.**]
   d. [**Hammond Valve**]
   e. [**Jomar Valve**]

2. Standard: MSS SP-110.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Split body.
5. Body Material: Type 316 stainless steel.
6. Ends: Threaded or flanged. See Part 3 ball valve schedule articles.
7. Seats: PTFE.
8. Stem: Type 316 stainless steel.
9. Ball: Type 316 stainless steel.
10. Port: Full.

2.5 BUTTERFLY VALVES, LEAD FREE

A. Butterfly Valves, Lead Free, Single Flange (Lug Type) - Iron, with Aluminum-Bronze Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABZ Valve; an ASC Engineered Solution**]

b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DeZURIK**]
e. [**DynaQuip Controls**]
f. [**Flo Fab Inc**]
g. [**FNW; Ferguson Enterprises, Inc.**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**NIBCO INC.**]
r. [**Norriseal**]
s. [**Red-White Valve Corp.**]
t. [**Stockham; a Crane Co. brand**]
u. [**Sure Flow Equipment Inc**]
v. [**Viega LLC**]
w. [**WATTS; A Watts Water Technologies Company**]
x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)**, or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
7. Stem: One- or two-piece stainless steel.
8. Disc: Aluminum bronze.

B. Butterfly Valves, Lead Free, Single Flange (Lug Type) - Iron, with Ductile-Iron Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DeZURIK**]
e. [**DynaQuip Controls**]
f. [**Flo Fab Inc**]
g. [**FNW; Ferguson Enterprises, Inc.**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]

o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**NIBCO INC.**]
r. [**Norriseal**]
s. [**Red-White Valve Corp.**]
t. [**Stockham; a Crane Co. brand**]
u. [**Sure Flow Equipment Inc**]
v. [**Viega LLC**]
w. [**WATTS; A Watts Water Technologies Company**]
x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)**, or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
7. Stem: One- or two-piece stainless steel.
8. Disc: Nickel-plated[**or -coated**] ductile iron.

C. Butterfly Valves, Lead Free, Single Flange (Lug Type) - Iron, with Stainless Steel Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**WATTS; A Watts Water Technologies Company**]
y. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating, NPS 12 (DN 300) and Smaller: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See

Part 3 butterfly valve schedule articles.

4. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
7. Stem: One- or two-piece stainless steel.
8. Disc: Stainless steel.

D. Butterfly Valves, Lead Free, Flangeless (Wafer Type) - Iron, with Aluminum-Bronze Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABZ Valve; an ASC Engineered Solution**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Center Line; a Crane Co. brand**]
    d. [**DeZURIK**]
    e. [**DynaQuip Controls**]
    f. [**Flo Fab Inc**]
    g. [**FNW; Ferguson Enterprises, Inc.**]
    h. [**Hammond Valve**]
    i. [**Jamesbury; a brand of Valmet**]
    j. [**Jenkins Valves; a Crane Co. brand**]
    k. [**Jomar Valve**]
    l. [**Kennedy Valve Company; a division of McWane, Inc.**]
    m. [**KITZ Corporation**]
    n. [**Lance Valves**]
    o. [**Legend Valve & Fitting, Inc**]
    p. [**Milwaukee Valve Company**]
    q. [**NIBCO INC.**]
    r. [**Norriseal**]
    s. [**Red-White Valve Corp.**]
    t. [**Stockham; a Crane Co. brand**]
    u. [**Sure Flow Equipment Inc**]
    v. [**Viega LLC**]
    w. [**WATTS; A Watts Water Technologies Company**]
    x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
7. Stem: One- or two-piece stainless steel.
8. Disc: Aluminum bronze.

E. Butterfly Valves, Lead Free, Flangeless (Wafer Type) - Iron, with Ductile-Iron Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DeZURIK**]
e. [**DynaQuip Controls**]
f. [**Flo Fab Inc**]
g. [**FNW; Ferguson Enterprises, Inc.**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**NIBCO INC.**]
r. [**Norriseal**]
s. [**Red-White Valve Corp.**]
t. [**Stockham; a Crane Co. brand**]
u. [**Sure Flow Equipment Inc**]
v. [**Viega LLC**]
w. [**WATTS; A Watts Water Technologies Company**]
x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
7. Stem: One- or two-piece stainless steel.
8. Disc: Nickel-plated[**or -coated**] ductile iron.

F. Butterfly Valves, Lead Free, Flangeless (Wafer Type) - Iron, with Stainless Steel Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]

m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**WATTS; A Watts Water Technologies Company**]
y. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
7. Stem: One- or two-piece stainless steel.
8. Disc: Stainless steel.

G. Butterfly Valves, Lead Free, Grooved End - Ductile Iron, 175 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Hammond Valve**]
c. [**Kennedy Valve Company; a division of McWane, Inc.**]
d. [**NIBCO INC.**]
e. [**Norriseal**]
f. [**Red-White Valve Corp.**]
g. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
h. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
i. [**Victaulic Company**]
j. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **175 psig (1200 kPa)**.
4. Body Material: Coated, ductile iron.
5. Ends: Grooved.
6. Stem: Two-piece stainless steel.
7. Disc: Coated, ductile iron.
8. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.

H. Butterfly Valves, Lead Free, Grooved End - Ductile Iron, 300 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**Hammond Valve**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**NIBCO INC.**]
g. [**Norriseal**]
h. [**Red-White Valve Corp.**]
i. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
j. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
k. [**Victaulic Company**]
l. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating, NPS 8 (DN 200) and Smaller: **300 psig (2070 kPa)**.
4. Body Material: Coated, ductile iron.
5. Ends: Grooved.
6. Stem: Two-piece stainless steel.
7. Disc: Coated, ductile iron.
8. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.

I. Butterfly Valves, Lead Free, Grooved End - Stainless Steel:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
e. [**Victaulic Company**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating, NPS 8 (DN 200) and Smaller: **300 psig (2070 kPa)**.
4. CWP Rating, NPS 10 (DN 250) and Larger: **200 psig (1380 kPa)**.
5. Body Material: Type 316 stainless steel, ASTM A743/A743M.
6. Ends: Grooved.
7. Stem: Type 416 stainless steel.
8. Disc: Type 316 stainless steel or ductile iron, encapsulated with Grade "EN" EPDM.
9. Seat: EDPM.

J. Butterfly Valves - CPVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Colonial Engineering, Inc.**]

c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**Hayward Flow Control; Hayward Industries, Inc.**]
e. [**NIBCO INC.**]
f. [**Spears Manufacturing Company**]
g. [**Thermoplastic Valves, Inc**]

2. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 butterfly valve schedule articles.
3. Body Material: CPVC.
4. Body Design: Flangeless (wafer) type.
5. Seat: EPDM rubber.
6. Seals: PTFE or EPDM-rubber O-rings.
7. Disc: CPVC.
8. Stem: Stainless steel.
9. Handle: Lever.

K. Butterfly Valves - PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**ASC Engineered Solutions**]
d. [**Colonial Engineering, Inc.**]
e. [**GF Piping Systems: Georg Fischer LLC**]
f. [**Hayward Flow Control; Hayward Industries, Inc.**]
g. [**IPEX USA LLC**]
h. [**Legend Valve & Fitting, Inc**]
i. [**NIBCO INC.**]
j. [**Spears Manufacturing Company**]
k. [**Thermoplastic Valves, Inc**]

2. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 butterfly valve schedule articles.
3. Body Material: PVC.
4. Body Design: Flangeless (wafer) type.
5. Seat: EPDM rubber.
6. Seals: PTFE or EPDM-rubber O-rings.
7. Disc: PVC.
8. Stem: Stainless steel.
9. Handle: Lever.

2.6 BUTTERFLY VALVES, GENERAL PURPOSE

A. Butterfly Valves, Single Flange (Lug Type) - Iron, with Aluminum-Bronze Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DeZURIK**]
e. [**DynaQuip Controls**]
f. [**Flo Fab Inc**]
g. [**FNW; Ferguson Enterprises, Inc.**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**NIBCO INC.**]
r. [**Norriseal**]
s. [**Red-White Valve Corp.**]
t. [**Stockham; a Crane Co. brand**]
u. [**Sure Flow Equipment Inc**]
v. [**Viega LLC**]
w. [**WATTS; A Watts Water Technologies Company**]
x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: NBR.
7. Stem: One- or two-piece stainless steel.
8. Disc: Aluminum bronze.

B. Butterfly Valves, Single Flange (Lug Type) - Iron, with Ductile-Iron Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DeZURIK**]
e. [**DynaQuip Controls**]
f. [**Flo Fab Inc**]
g. [**FNW; Ferguson Enterprises, Inc.**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]

o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**NIBCO INC.**]
r. [**Norriseal**]
s. [**Red-White Valve Corp.**]
t. [**Stockham; a Crane Co. brand**]
u. [**Sure Flow Equipment Inc**]
v. [**Viega LLC**]
w. [**WATTS; A Watts Water Technologies Company**]
x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: NBR.
7. Stem: One- or two-piece stainless steel.
8. Disc: Nickel-plated[**or -coated**] ductile iron.

C. Butterfly Valves, Single Flange (Lug Type) - Iron, with Stainless Steel Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**WATTS; A Watts Water Technologies Company**]
y. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.

3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: NBR.
7. Stem: One- or two-piece stainless steel.
8. Disc: Stainless steel.

D. Butterfly Valves, Flangeless (Wafer Type) - Iron, with Aluminum-Bronze Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABZ Valve; an ASC Engineered Solution**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Center Line; a Crane Co. brand**]
    d. [**DeZURIK**]
    e. [**DynaQuip Controls**]
    f. [**Flo Fab Inc**]
    g. [**FNW; Ferguson Enterprises, Inc.**]
    h. [**Hammond Valve**]
    i. [**Jamesbury; a brand of Valmet**]
    j. [**Jenkins Valves; a Crane Co. brand**]
    k. [**Jomar Valve**]
    l. [**Kennedy Valve Company; a division of McWane, Inc.**]
    m. [**KITZ Corporation**]
    n. [**Lance Valves**]
    o. [**Legend Valve & Fitting, Inc**]
    p. [**Milwaukee Valve Company**]
    q. [**NIBCO INC.**]
    r. [**Norriseal**]
    s. [**Red-White Valve Corp.**]
    t. [**Stockham; a Crane Co. brand**]
    u. [**Sure Flow Equipment Inc**]
    v. [**Viega LLC**]
    w. [**WATTS; A Watts Water Technologies Company**]
    x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: NBR.
7. Stem: One- or two-piece stainless steel.
8. Disc: Aluminum bronze.

E. Butterfly Valves, Flangeless (Wafer Type) - Iron, with Ductile-Iron Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DeZURIK**]
e. [**DynaQuip Controls**]
f. [**Flo Fab Inc**]
g. [**FNW; Ferguson Enterprises, Inc.**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**NIBCO INC.**]
r. [**Norriseal**]
s. [**Red-White Valve Corp.**]
t. [**Stockham; a Crane Co. brand**]
u. [**Sure Flow Equipment Inc**]
v. [**Viega LLC**]
w. [**WATTS; A Watts Water Technologies Company**]
x. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: NBR.
7. Stem: One- or two-piece stainless steel.
8. Disc: Nickel-plated[**or -coated**] ductile iron.

F. Butterfly Valves, Flangeless (Wafer Type) - Iron, with Stainless Steel Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]

l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
s. [**NIBCO INC.**]
t. [**Norriseal**]
u. [**Red-White Valve Corp.**]
v. [**Stockham; a Crane Co. brand**]
w. [**Sure Flow Equipment Inc**]
x. [**Viega LLC**]
y. [**WATTS; A Watts Water Technologies Company**]
z. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
4. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
5. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
6. Seat: NBR.
7. Stem: One- or two-piece stainless steel.
8. Disc: Stainless steel.

G. Butterfly Valves, Grooved End - Ductile Iron, 175 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America**]
d. [**Hammond Valve**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**NIBCO INC.**]
g. [**Norriseal**]
h. [**Red-White Valve Corp.**]
i. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
j. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
k. [**Victaulic Company**]
l. [**Zurn Industries, LLC**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating: **175 psig (1200 kPa)**.
4. Body Material: Coated, ductile iron.
5. Ends: Grooved.
6. Stem: Two-piece stainless steel.
7. Disc: Coated, ductile iron.
8. Seat: NBR.

H. Butterfly Valves, Grooved End - Ductile Iron, 300 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America**]
    c. [**Hammond Valve**]
    d. [**Kennedy Valve Company; a division of McWane, Inc.**]
    e. [**NIBCO INC.**]
    f. [**Norriseal**]
    g. [**Red-White Valve Corp.**]
    h. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    i. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
    j. [**Victaulic Company**]
    k. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating, NPS 8 (DN 200) and Smaller: **300 psig (2070 kPa)**.
4. Body Material: Coated, ductile iron
5. Ends: Grooved.
6. Stem: Two-piece stainless steel.
7. Disc: Coated, ductile iron.
8. Seat: NBR.

I. Butterfly Valves, Grooved End - Stainless Steel:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**ASC Engineered Solutions**]
    d. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    e. [**Victaulic Company**]

2. Standard: MSS SP-67, Type I.
3. CWP Rating, NPS 8 (DN 200) and Smaller: **300 psig (2070 kPa)**.
4. Body Material: Type 316 stainless steel, ASTM A743/A743M.
5. Ends: Grooved.
6. Stem: Type 416 stainless steel.
7. Disc: Type 316 stainless steel.
8. Seat: NBR.

2.7 CHECK VALVES, LEAD FREE

A. Check Valves, Lead Free, Swing Type, Threaded or Soldered Ends - Bronze, with Bronze Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Jenkins Valves; a Crane Co. brand**]
    d. [**Jomar Valve**]
    e. [**Keckley Company**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Red-White Valve Corp.**]
    j. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    k. [**Stockham; a Crane Co. brand**]
    l. [**Val-Matic Valve & Manufacturing Corp.**]
    m. [**Victaulic Company**]

2. Standard: MSS SP-80, Type 3.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered. See Part 3 check valve schedule articles.
7. Disc: Bronze.

B. Check Valves, Lead Free, Swing Type, Threaded or Soldered Ends - Bronze, with Nonmetallic Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Jenkins Valves; a Crane Co. brand**]
    d. [**Jomar Valve**]
    e. [**Keckley Company**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]

2. Standard: MSS SP-80, Type 4.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered. See Part 3 check valve schedule articles.
7. Disc: PTFE.

C. Check Valves, Lead Free, Swing Type, Threaded or Soldered Ends - Bronze, with Bronze Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Crane Fluid Systems; Crane Co.**]
    d. [**Hammond Valve**]
    e. [**Jenkins Valves; a Crane Co. brand**]
    f. [**Jomar Valve**]
    g. [**Lance Valves**]
    h. [**Milwaukee Valve Company**]
    i. [**NIBCO INC.**]
    j. [**Powell Valves**]
    k. [**Red-White Valve Corp.**]
    l. [**Stockham; a Crane Co. brand**]

2. Standard: MSS SP-80, Type 3.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered. See Part 3 check valve schedule articles.
7. Disc: Bronze.

D. Check Valves, Lead Free, Swing Type, Threaded or Soldered Ends - Bronze, with Nonmetallic Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Crane Fluid Systems; Crane Co.**]
    b. [**FNW; Ferguson Enterprises, Inc.**]
    c. [**Jenkins Valves; a Crane Co. brand**]
    d. [**Jomar Valve**]
    e. [**Lance Valves**]
    f. [**Milwaukee Valve Company**]
    g. [**NIBCO INC.**]
    h. [**Powell Valves**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]

2. Standard: MSS SP-80, Type 4.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered. See Part 3 check valve schedule articles.
7. Disc: PTFE.

E. Check Valves, Lead Free, Swing Type, Press Ends - Bronze:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
d. [**Hammond Valve**]
e. [**Milwaukee Valve Company**]
f. [**NIBCO INC.**]

2. Standards: MSS SP-80 and MSS SP-139.
3. CWP Rating: Minimum **200 psig (1380 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B584, bronze.
6. Ends: Press.
7. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
8. Disc: Brass or bronze.

F. Check Valves, Lead Free, Swing Type, Flanged or Threaded Ends - Iron, with Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
e. [**Cooper Valves**]
f. [**Crane Fluid Systems; Crane Co.**]
g. [**DeZURIK**]
h. [**GA Industries, Inc**]
i. [**Hammond Valve**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Milwaukee Valve Company**]
p. [**Powell Valves**]
q. [**Victaulic Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Clear or full waterway.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged or threaded. See Part 3 check valve schedule articles.
7. Trim: Bronze.
8. Gasket: Asbestos free.

G. Check Valves, Lead Free, Swing Type, Flanged or Threaded Ends - Iron, with Nonmetallic-to-Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**ASC Engineered Solutions**]
b. [**Cooper Valves**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**DeZURIK**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**KITZ Corporation**]
g. [**Lance Valves**]
h. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
i. [**Victaulic Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Clear or full waterway.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged or threaded. See Part 3 check valve schedule articles.
7. Trim: Composition.
8. Seat Ring: Bronze.
9. Disc Holder: Bronze.
10. Disc: PTFE.
11. Gasket: Asbestos free.

H. Check Valves, Lead Free, Swing Type, Flanged or Threaded Ends - Iron, with Metal Seats, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Cooper Valves**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Crispin Valve**]
e. [**DeZURIK**]
f. [**GA Industries, Inc**]
g. [**Hammond Valve**]
h. [**Jenkins Valves; a Crane Co. brand**]
i. [**KITZ Corporation**]
j. [**Lance Valves**]
k. [**Milwaukee Valve Company**]
l. [**Powell Valves**]
m. [**Victaulic Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Design: Clear or full waterway.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged or threaded. See Part 3 check valve schedule articles.
7. Trim: Bronze.
8. Gasket: Asbestos free.

I. Check Valves, Lead Free, Swing Type, Flanged or Threaded Ends - Iron, with Lever- and Spring-

Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crispin Valve**]
    e. [**DeZURIK**]
    f. [**GA Industries, Inc**]
    g. [**Kennedy Valve Company; a division of McWane, Inc.**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Clear or full waterway.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged or threaded. See Part 3 check valve schedule articles.
7. Trim: Bronze.
8. Gasket: Asbestos free.
9. Closure Control: Factory-installed exterior lever and weight.

J. Check Valves, Lead Free, Swing Type, Flanged or Threaded Ends - Iron, with Lever- and Weight-Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**ASC Engineered Solutions**]
    c. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    d. [**Cooper Valves**]
    e. [**Crispin Valve**]
    f. [**DeZURIK**]
    g. [**GA Industries, Inc**]
    h. [**Kennedy Valve Company; a division of McWane, Inc.**]
    i. [**Milwaukee Valve Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Clear or full waterway.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged or threaded. See Part 3 check valve schedule articles.
7. Trim: Bronze.
8. Gasket: Asbestos free.
9. Closure Control: Factory-installed exterior lever and weight.

K. Check Valves, Lead Free, Swing Type, Grooved Ends - Iron, 300 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**ASC Engineered Solutions**]
c. [**DeZURIK**]
d. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
e. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
f. [**Victaulic Company**]

2. CWP Rating: **300 psig (2070 kPa)**.
3. Body Material: ASTM A536, ductile iron.
4. Seat: EPDM.
5. Disc: Spring operated, ductile iron or stainless steel.

L. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cooper Valves**]
d. [**Crispin Valve**]
e. [**DeZURIK**]
f. [**DFT Inc.**]
g. [**Flomatic Valves; Flomatic Corporation**]
h. [**GA Industries, Inc**]
i. [**Keckley Company**]
j. [**KITZ Corporation**]
k. [**Metraflex Company (The)**]
l. [**Milwaukee Valve Company**]
m. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
n. [**Val-Matic Valve & Manufacturing Corp.**]
o. [**Victaulic Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Compact wafer, spring loaded.
6. Seat: Bronze.

M. Check Valves, Lead Free, Center Guided - Iron, Globe, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crispin Valve**]
b. [**DFT Inc.**]
c. [**Flomatic Valves; Flomatic Corporation**]
d. [**GA Industries, Inc**]

e. [**KITZ Corporation**]
f. [**Metraflex Company (The)**]
g. [**Milwaukee Valve Company**]
h. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
i. [**Val-Matic Valve & Manufacturing Corp.**]
j. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: Bronze.

N. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cooper Valves**]
d. [**Crispin Valve**]
e. [**DeZURIK**]
f. [**DFT Inc.**]
g. [**Flomatic Valves; Flomatic Corporation**]
h. [**GA Industries, Inc**]
i. [**Keckley Company**]
j. [**KITZ Corporation**]
k. [**Metraflex Company (The)**]
l. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
m. [**Victaulic Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
5. Style: Compact wafer, spring loaded.
6. Seat: Bronze.

O. Check Valves, Lead Free, Center Guided - Iron, Globe, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crispin Valve**]
b. [**DFT Inc.**]
c. [**Flomatic Valves; Flomatic Corporation**]
d. [**GA Industries, Inc**]
e. [**Hilton Valves**]
f. [**KITZ Corporation**]
g. [**Metraflex Company (The)**]
h. [**Mueller Steam Specialty; A Watts Water Technologies Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: Bronze.

P. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Cooper Valves**]
    c. [**DeZURIK**]
    d. [**DFT Inc.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Keckley Company**]
    g. [**Metraflex Company (The)**]
    h. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
    i. [**Val-Matic Valve & Manufacturing Corp.**]
    j. [**Victaulic Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Compact wafer, spring loaded.
6. Seat: Bronze.

Q. Check Valves, Lead Free, Center Guided - Iron, Globe, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**DFT Inc.**]
    b. [**Flomatic Valves; Flomatic Corporation**]
    c. [**Metraflex Company (The)**]
    d. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
    e. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: MSS SP-125.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: Bronze.

R. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Cooper Valves**]
c. [**Crispin Valve**]
d. [**DFT Inc.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Keckley Company**]
g. [**Metraflex Company (The)**]
h. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
i. [**Victaulic Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
5. Style: Compact wafer, spring loaded.
6. Seat: Bronze.

S. Check Valves, Lead Free, Center Guided - Iron, Globe, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crispin Valve**]
b. [**DFT Inc.**]
c. [**Metraflex Company (The)**]

2. Standard: MSS SP-125.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: Bronze.

T. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Cooper Valves**]
c. [**DeZURIK**]
d. [**DFT Inc.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Val-Matic Valve & Manufacturing Corp.**]
g. [**Victaulic Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Compact wafer, spring loaded.

6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

U. Check Valves, Lead Free, Center Guided - Iron, Globe, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**DFT Inc.**]
   b. [**Flomatic Valves; Flomatic Corporation**]
   c. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: MSS SP-125.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

V. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Cooper Valves**]
   b. [**DeZURIK**]
   c. [**DFT Inc.**]
   d. [**Flomatic Valves; Flomatic Corporation**]
   e. [**GA Industries, Inc**]
   f. [**Val-Matic Valve & Manufacturing Corp.**]
   g. [**Victaulic Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
5. Style: Compact wafer, spring loaded.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

W. Check Valves, Lead Free, Center Guided - Iron, Globe, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**DFT Inc.**]
   b. [**Flomatic Valves; Flomatic Corporation**]
   c. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: MSS SP-125.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.

5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

X. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Cooper Valves**]
    b. [**DeZURIK**]
    c. [**DFT Inc.**]
    d. [**Flomatic Valves; Flomatic Corporation**]
    e. [**Val-Matic Valve & Manufacturing Corp.**]
    f. [**Victaulic Company**]

2. Standard: MSS SP-125.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Compact wafer, spring loaded.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

Y. Check Valves, Lead Free, Center Guided - Iron, Globe, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**DFT Inc.**]
    b. [**Flomatic Valves; Flomatic Corporation**]
    c. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: MSS SP-125.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Material: ASTM A126, gray iron.
5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

Z. Check Valves, Lead Free, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Cooper Valves**]
    b. [**DeZURIK**]
    c. [**DFT Inc.**]
    d. [**Flomatic Valves; Flomatic Corporation**]
    e. [**Victaulic Company**]

2. Standard: MSS SP-125.

3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
5. Style: Compact wafer, spring loaded.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

AA. Check Valves, Lead Free, Center Guided - Iron, Globe, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**DFT Inc.**]
    b. [**Flomatic Valves; Flomatic Corporation**]
    c. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]

2. Standard: MSS SP-125.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
5. Style: Globe, spring loaded.
6. Ends: Flange.
7. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

BB. Check Valves, Lead Free, Dual-Plate Type - Iron, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABZ Valve; an ASC Engineered Solution**]
    b. [**Anvil; an ASC Engineered Solution**]
    c. [**DeZURIK**]
    d. [**Flo Fab Inc**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Jomar Valve**]
    g. [**Keckley Company**]
    h. [**Lance Valves**]
    i. [**Metraflex Company (The)**]
    j. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    k. [**Stockham; a Crane Co. brand**]
    l. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A126, gray iron.
6. Seat: Bronze.

CC. Check Valves, Lead Free, Dual-Plate Type - Iron, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**DeZURIK**]
d. [**Jomar Valve**]
e. [**Keckley Company**]
f. [**Lance Valves**]
g. [**Metraflex Company (The)**]
h. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
i. [**Stockham; a Crane Co. brand**]
j. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
6. Seat: Bronze.

DD. Check Valves, Lead Free, Dual-Plate Type - Iron, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABZ Valve; an ASC Engineered Solution**]
   b. [**Anvil; an ASC Engineered Solution**]
   c. [**Keckley Company**]
   d. [**Stockham; a Crane Co. brand**]
   e. [**Sure Flow Equipment Inc**]
   f. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: API 594.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A126, gray iron.
6. Seat: Bronze.

EE. Check Valves, Lead Free, Dual-Plate Type - Iron, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABZ Valve; an ASC Engineered Solution**]
   b. [**Anvil; an ASC Engineered Solution**]
   c. [**Keckley Company**]
   d. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
   e. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
6. Seat: Bronze.

FF. Check Valves, Lead Free, Single-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Flowserve Corporation**]
    b. [**GA Industries, Inc**]
    c. [**Jomar Valve**]
    d. [**Keckley Company**]

2. Standard: API 594.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Wafer, single spring-loaded plate.
5. Body Material: ASTM A126, gray iron.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

GG. Check Valves, Lead Free, Dual-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Flomatic Valves; Flomatic Corporation**]
    b. [**Keckley Company**]
    c. [**Stockham; a Crane Co. brand**]
    d. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A126, gray iron.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

HH. Check Valves, Lead Free, Dual-Plate Type - Iron, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**DeZURIK**]
    b. [**Keckley Company**]
    c. [**Stockham; a Crane Co. brand**]
    d. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

II. Check Valves, Lead Free, Single-Plate Type - Iron, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Flowserve Corporation**]
    b. [**GA Industries, Inc**]
    c. [**Jomar Valve**]
    d. [**Keckley Company**]
    e. [**Victaulic Company**]

2. Standard: API 594.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Design: Wafer, single spring-loaded plate.
5. Body Material: ASTM A126, gray iron.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

JJ. Check Valves, Lead Free, Dual-Plate Type - Iron, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Jomar Valve**]
    b. [**Keckley Company**]
    c. [**Stockham; a Crane Co. brand**]
    d. [**Sure Flow Equipment Inc**]
    e. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: API 594.
3. CWP Rating: **400 psig (2760 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A126, gray iron.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

KK. Check Valves, Lead Free, Dual-Plate Type - Iron, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Keckley Company**]
    b. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    c. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Design: Wafer, spring-loaded plates.
5. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
6. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

LL. Check Valves, Lead Free - CPVC, Union-Type Ball Check:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**Hayward Flow Control; Hayward Industries, Inc.**]
e. [**IPEX USA LLC**]
f. [**NIBCO INC.**]
g. [**Spears Manufacturing Company**]
h. [**Thermoplastic Valves, Inc**]

2. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 check valve schedule articles.
3. Body Material: CPVC.
4. Body Design: Union-type ball check.
5. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 check valve schedule articles.
6. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable, socket, socket or threaded, threaded, flanged. See Part 3 check valve schedule articles.
7. Ball: CPVC.
8. Seals: EPDM- or FKM-rubber O-rings.

MM. Check Valves, Lead Free - PVC, Union-Type Ball Check:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**Hayward Flow Control; Hayward Industries, Inc.**]
e. [**IPEX USA LLC**]
f. [**NIBCO INC.**]
g. [**Spears Manufacturing Company**]
h. [**Thermoplastic Valves, Inc**]

2. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 check valve schedule articles.
3. Body Material: PVC.
4. Body Design: Union-type ball check.
5. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 check valve schedule articles.
6. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable, [**socket**][**socket or threaded**][**threaded**][**flange**].
7. Ball: PVC.
8. Seals: EPDM- or FKM-rubber O-rings.

2.8 CHECK VALVES, GENERAL PURPOSE

A. Check Valves, Lift Type, Threaded or Soldered Ends - Bronze, with Bronze Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**American Valve, Inc**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Jenkins Valves; a Crane Co. brand**]
    g. [**Jomar Valve**]
    h. [**Keckley Company**]
    i. [**Metraflex Company (The)**]
    j. [**Milwaukee Valve Company**]
    k. [**NIBCO INC.**]
    l. [**Stockham; a Crane Co. brand**]
    m. [**Val-Matic Valve & Manufacturing Corp.**]
    n. [**Victaulic Company**]
    o. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 1.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Vertical flow.
5. Body Material: ASTM B61 or ASTM B62, bronze.
6. Ends: Threaded or soldered ends. See Part 3 check valve schedule articles.
7. Disc: Bronze.

B. Check Valves, Lift Type, Threaded or Soldered Ends - Bronze, with Nonmetallic Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Crane Fluid Systems; Crane Co.**]
    b. [**Jenkins Valves; a Crane Co. brand**]
    c. [**Jomar Valve**]
    d. [**Keckley Company**]
    e. [**Lance Valves**]
    f. [**Milwaukee Valve Company**]
    g. [**NIBCO INC.**]
    h. [**Red-White Valve Corp.**]
    i. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**Val-Matic Valve & Manufacturing Corp.**]
    l. [**Victaulic Company**]

2. Standard: MSS SP-80, Type 2.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Vertical flow.
5. Body Material: ASTM B61 or ASTM B62, bronze.
6. Ends: Threaded or soldered ends. See Part 3 check valve schedule articles.
7. Disc: NBR or PTFE.

C. Check Valves, Swing Type, Threaded or Soldered Ends - Bronze, with Bronze Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Jenkins Valves; a Crane Co. brand**]
    d. [**Jomar Valve**]
    e. [**Keckley Company**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Red-White Valve Corp.**]
    j. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    k. [**Stockham; a Crane Co. brand**]
    l. [**Val-Matic Valve & Manufacturing Corp.**]
    m. [**Victaulic Company**]

2. Standard: MSS SP-80, Type 3.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered ends. See Part 3 check valve schedule articles.
7. Disc: Bronze.

D. Check Valves, Swing Type, Threaded or Soldered Ends - Bronze, with Nonmetallic Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Jenkins Valves; a Crane Co. brand**]
    d. [**Jomar Valve**]
    e. [**Keckley Company**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]

2. Standard: MSS SP-80, Type 4.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered ends. See Part 3 check valve schedule articles.
7. Disc: PTFE.

E. Check Valves, Swing Type, Threaded or Soldered Ends - Bronze, with Bronze Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Jomar Valve**]
g. [**Lance Valves**]
h. [**Legend Valve & Fitting, Inc**]
i. [**Milwaukee Valve Company**]
j. [**NIBCO INC.**]
k. [**Powell Valves**]
l. [**Red-White Valve Corp.**]
m. [**Stockham; a Crane Co. brand**]

2. Standard: MSS SP-80, Type 3.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered ends. See Part 3 check valve schedule articles.
7. Disc: Bronze.

F. Check Valves, Swing Type, Threaded or Soldered Ends - Bronze, with Nonmetallic Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

a. [**Crane Fluid Systems; Crane Co.**]
b. [**Jenkins Valves; a Crane Co. brand**]
c. [**Jomar Valve**]
d. [**Lance Valves**]
e. [**Milwaukee Valve Company**]
f. [**NIBCO INC.**]
g. [**Powell Valves**]
h. [**Red-White Valve Corp.**]
i. [**Stockham; a Crane Co. brand**]

2. Standard: MSS SP-80, Type 4.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Design: Horizontal flow.
5. Body Material: ASTM B62, bronze.
6. Ends: Threaded or soldered ends. See Part 3 check valve schedule articles.
7. Disc: PTFE.

G. Check Valves, Swing Type, Flanged Ends - Iron, with Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
d. [**Cooper Valves**]
e. [**Crane Fluid Systems; Crane Co.**]
f. [**DeZURIK**]
g. [**FNW; Ferguson Enterprises, Inc.**]
h. [**GA Industries, Inc**]
i. [**Hammond Valve**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Milwaukee Valve Company**]
p. [**Powell Valves**]
q. [**Victaulic Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Design: Clear or full waterway.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Gasket: Asbestos free.

H. Check Valves, Swing Type, Flanged Ends - Iron, with Nonmetallic-to-Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Cooper Valves**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**DeZURIK**]
d. [**Kennedy Valve Company; a division of McWane, Inc.**]
e. [**KITZ Corporation**]
f. [**Lance Valves**]
g. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
h. [**Victaulic Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Design: Clear or full waterway.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Composition.
9. Seat Ring: Bronze.
10. Disc Holder: Bronze.
11. Disc: PTFE.
12. Gasket: Asbestos free.

I. Check Valves, Swing Type, Flanged Ends - Iron, with Metal Seats, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Cooper Valves**]
    c. [**Crane Fluid Systems; Crane Co.**]
    d. [**Crispin Valve**]
    e. [**DeZURIK**]
    f. [**FNW; Ferguson Enterprises, Inc.**]
    g. [**GA Industries, Inc**]
    h. [**Hammond Valve**]
    i. [**Jenkins Valves; a Crane Co. brand**]
    j. [**KITZ Corporation**]
    k. [**Lance Valves**]
    l. [**Milwaukee Valve Company**]
    m. [**Powell Valves**]
    n. [**Victaulic Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
5. Body Design: Clear or full waterway.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Gasket: Asbestos free.

J. Check Valves, Swing Type, Flanged Ends - Iron, with Lever- and Spring-Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crispin Valve**]
    e. [**DeZURIK**]
    f. [**GA Industries, Inc**]
    g. [**Kennedy Valve Company; a division of McWane, Inc.**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Design: Clear or full waterway.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Gasket: Asbestos free.
10. Closure Control: Factory-installed, exterior lever and spring.

K. Check Valves, Swing Type, Flanged Ends - Iron, with Lever- and Weight-Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crispin Valve**]
    e. [**DeZURIK**]
    f. [**GA Industries, Inc**]
    g. [**Kennedy Valve Company; a division of McWane, Inc.**]
    h. [**Milwaukee Valve Company**]

2. Standard: MSS SP-71, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Design: Clear or full waterway.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Gasket: Asbestos free.
10. Closure Control: Factory-installed, exterior lever and weight.

L. Check Valves, Swing Type, Grooved Ends - Iron, 300 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**DeZURIK**]
    c. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    d. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
    e. [**Victaulic Company**]

2. CWP Rating: **300 psig (2070 kPa)**.
3. Body Material: ASTM A536, ductile iron.
4. Seat: NBR.
5. Disc: Spring operated, ductile iron or stainless steel.

M. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABZ Valve; an ASC Engineered Solution**]
    b. [**Anvil; an ASC Engineered Solution**]
    c. [**DeZURIK**]

d. [**Flomatic Valves; Flomatic Corporation**]
e. [**Jomar Valve**]
f. [**Keckley Company**]
g. [**Lance Valves**]
h. [**Legend Valve & Fitting, Inc**]
i. [**Metraflex Company (The)**]
j. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
k. [**Stockham; a Crane Co. brand**]
l. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A126, gray iron.
7. Seat: Bronze.

N. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**DeZURIK**]
d. [**Jomar Valve**]
e. [**Keckley Company**]
f. [**Lance Valves**]
g. [**Legend Valve & Fitting, Inc**]
h. [**Metraflex Company (The)**]
i. [**Stockham; a Crane Co. brand**]
j. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Seat: Bronze.

O. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**Keckley Company**]
d. [**Stockham; a Crane Co. brand**]
e. [**Sure Flow Equipment Inc**]
f. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A126, gray iron.
7. Seat: Bronze.

P. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABZ Valve; an ASC Engineered Solution**]
    b. [**Anvil; an ASC Engineered Solution**]
    c. [**Keckley Company**]
    d. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    e. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Seat: Bronze.

Q. Check Valves, Single-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**GA Industries, Inc**]
    b. [**Jomar Valve**]
    c. [**Keckley Company**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Design: Wafer, single spring-loaded plate.
6. Body Material: ASTM A126, gray iron.
7. Seat: NBR.

R. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Flomatic Valves; Flomatic Corporation**]
    b. [**Keckley Company**]
    c. [**Stockham; a Crane Co. brand**]

d. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A126, gray iron.
7. Seat: NBR.

S. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**DeZURIK**]
   b. [**Keckley Company**]
   c. [**Stockham; a Crane Co. brand**]
   d. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Seat: NBR.

T. Check Valves, Single-Plate Type - Iron, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**GA Industries, Inc**]
   b. [**Jomar Valve**]
   c. [**Keckley Company**]
   d. [**Victaulic Company**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
5. Body Design: Wafer, single spring-loaded plate.
6. Body Material: ASTM A126, gray iron.
7. Seat: NBR.

U. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Jomar Valve**]
   b. [**Keckley Company**]

c. [**Stockham; a Crane Co. brand**]
d. [**Sure Flow Equipment Inc**]
e. [**Val-Matic Valve & Manufacturing Corp.**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A126, gray iron.
7. Seat: NBR.

V. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Keckley Company**]
b. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
c. [**Sure Flow Equipment Inc**]

2. Standard: API 594.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
5. Body Design: Wafer, spring-loaded plates.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Seat: NBR.

2.9 GATE VALVES, LEAD FREE

A. Gate Valves, Lead Free, Threaded or Soldered Ends - Bronze, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]
f. [**Lance Valves**]
g. [**Milwaukee Valve Company**]
h. [**Powell Valves**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 1.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: Bronze with integral seat and screw-in bonnet.
5. Ends: Threaded or solder joint. See Part 3 gate valve schedule articles.

6. Stem: Bronze.
7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron[bronze, or aluminum].

B. Gate Valves, Lead Free, Threaded or Soldered Ends - Bronze, RS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**Jenkins Valves; a Crane Co. brand**]
    e. [**KITZ Corporation**]
    f. [**Milwaukee Valve Company**]
    g. [**NIBCO INC.**]
    h. [**Powell Valves**]
    i. [**Stockham; a Crane Co. brand**]
    j. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 2.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: Bronze with integral seat and screw-in bonnet.
5. Ends: Threaded or solder joint. See Part 3 gate valve schedule articles.
6. Stem: Bronze.
7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron, bronze, or aluminum.

C. Gate Valves, Lead Free, Threaded Ends - Bronze, NRS, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Valve, Inc**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Crane Fluid Systems; Crane Co.**]
    d. [**Jenkins Valves; a Crane Co. brand**]
    e. [**KITZ Corporation**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**Powell Valves**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 1.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: Bronze with integral seat and union-ring bonnet.
5. Ends: Threaded.
6. Stem: Bronze.

7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron[bronze, or aluminum].

D. Gate Valves, Lead Free, Threaded Ends - Bronze, RS, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**Jenkins Valves; a Crane Co. brand**]
    e. [**KITZ Corporation**]
    f. [**Milwaukee Valve Company**]
    g. [**Powell Valves**]
    h. [**Stockham; a Crane Co. brand**]
    i. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 2.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: Bronze with integral seat and union-ring bonnet.
5. Ends: Threaded.
6. Stem: Bronze.
7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron[bronze, or aluminum].

E. Gate Valves, Lead Free, Press Ends - Bronze:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
    c. [**Hammond Valve**]
    d. [**Milwaukee Valve Company**]
    e. [**NIBCO INC.**]

2. Standards: MSS SP-80 and MSS SP-139.
3. CWP Rating: Minimum **200 psig (1380 kPa)**.
4. Body Material: Bronze with integral seat and union-ring bonnet.
5. Ends: Press.
6. Press Ends Connection Rating: Minimum **200 psig (1380 kPa)**.
7. Stem: Brass or bronze, RS or NRS. See Part 3 gate valve schedule articles.
8. Disc: Solid wedge, bronze.
9. Packing: Graphite.
10. Port: Full.
11. Handwheel: Malleable iron, bronze, or aluminum.

F. Gate Valves, Lead Free, Flanged Ends - Iron, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Jenkins Valves; a Crane Co. brand**]
    g. [**Jomar Valve**]
    h. [**Kennedy Valve Company; a division of McWane, Inc.**]
    i. [**KITZ Corporation**]
    j. [**Lance Valves**]
    k. [**Powell Valves**]
    l. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: Gray iron with bolted bonnet.
5. Ends: Flanged.
6. Trim: Bronze.
7. Disc: Solid wedge.
8. Packing and Gasket: Asbestos free.

G. Gate Valves, Lead Free, Flanged Ends - Iron, OS&Y, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**Jomar Valve**]
    e. [**Kennedy Valve Company; a division of McWane, Inc.**]
    f. [**KITZ Corporation**]
    g. [**Lance Valves**]
    h. [**Milwaukee Valve Company**]
    i. [**Powell Valves**]
    j. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
    k. [**WATTS; A Watts Water Technologies Company**]
    l. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: Gray iron with bolted bonnet.
5. Ends: Flange.
6. Trim: Bronze.
7. Disc: Solid wedge.
8. Packing and Gasket: Asbestos free.

H. Gate Valves, Lead Free, Flanged Ends - Iron, NRS, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Jenkins Valves; a Crane Co. brand**]
    g. [**KITZ Corporation**]
    h. [**Victaulic Company**]
    i. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Material: Gray iron with bolted bonnet.
5. Ends: Flange.
6. Trim: Bronze.
7. Disc: Solid wedge.
8. Packing and Gasket: Asbestos free.

I. Gate Valves, Lead Free, Flanged Ends - Iron, OS&Y, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**KITZ Corporation**]
    e. [**Milwaukee Valve Company**]
    f. [**Powell Valves**]
    g. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
    h. [**Victaulic Company**]
    i. [**WATTS; A Watts Water Technologies Company**]
    j. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating: **500 psig (3450 kPa)**.
4. Body Material: Gray iron with bolted bonnet.
5. Ends: Flanged.
6. Trim: Bronze.
7. Disc: Solid wedge.
8. Packing and Gasket: Asbestos free.

J. Gate Valves - CPVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Asahi/America**]
b. [**KITZ Corporation**]
c. [**Spears Manufacturing Company**]

2. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 gate valve schedule articles.
3. Body Material: CPVC.
4. Body Design: NRS.
5. End Connections for Valves NPS 2 (DN 50) and Smaller: Socket or threaded. See Part 3 gate valve schedule articles.
6. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Socket, socket or threaded, threaded, flanged. See Part 3 gate valve schedule articles.
7. Gate and Stem: Plastic.
8. Seals: EPDM rubber.
9. Handle: Wheel.

K. Gate Valves - PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Asahi/America**]
b. [**KITZ Corporation**]
c. [**Spears Manufacturing Company**]

2. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 gate valve schedule articles.
3. Body Material: PVC.
4. Body Design: NRS.
5. End Connections for Valves NPS 2 (DN 50) and Smaller: Socket or threaded. See Part 3 gate valve schedule articles.
6. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Socket, socket or threaded, threaded, or flanged.
7. Gate and Stem: Plastic.
8. Seals: EPDM rubber.
9. Handle: Wheel.

2.10 GATE VALVES, GENERAL PURPOSE

A. Gate Valves, Threaded or Soldered Ends - Bronze, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]

f. [**Lance Valves**]
g. [**Milwaukee Valve Company**]
h. [**Powell Valves**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 1.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
5. Ends: Threaded or soldered joint. See Part 3 gate valve schedule articles.
6. Stem: Bronze.
7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron[bronze, or aluminum].

B. Gate Valves, Threaded or Soldered Ends - Bronze, RS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Hammond Valve**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]
f. [**Milwaukee Valve Company**]
g. [**NIBCO INC.**]
h. [**Powell Valves**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 2.
3. CWP Rating: **200 psig (1380 kPa)**.
4. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
5. Ends: Threaded or soldered joint. See Part 3 gate valve schedule articles.
6. Stem: Bronze.
7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron, bronze, or aluminum.

C. Gate Valves, Threaded Ends - Bronze, NRS, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Jenkins Valves; a Crane Co. brand**]

e. [**KITZ Corporation**]
f. [**Lance Valves**]
g. [**Milwaukee Valve Company**]
h. [**Powell Valves**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 1.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
5. Ends: Threaded.
6. Stem: Bronze.
7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron[bronze, or aluminum].

D. Gate Valves, Threaded Ends - Bronze, RS, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Hammond Valve**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]
f. [**Milwaukee Valve Company**]
g. [**Powell Valves**]
h. [**Stockham; a Crane Co. brand**]
i. [**WATTS; A Watts Water Technologies Company**]

2. Standard: MSS SP-80, Type 2.
3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
5. Ends: Threaded.
6. Stem: Bronze.
7. Disc: Solid wedge, bronze.
8. Packing: Asbestos free.
9. Handwheel: Malleable iron[bronze, or aluminum].

E. Gate Valves, Flanged Ends - Iron, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
c. [**Cooper Valves**]
d. [**Crane Fluid Systems; Crane Co.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**FNW; Ferguson Enterprises, Inc.**]

g. [**Jenkins Valves; a Crane Co. brand**]
h. [**Jomar Valve**]
i. [**Kennedy Valve Company; a division of McWane, Inc.**]
j. [**KITZ Corporation**]
k. [**Lance Valves**]
l. [**Legend Valve & Fitting, Inc**]
m. [**Powell Valves**]
n. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Disc: Solid wedge.
9. Packing and Gasket: Asbestos free.

F. Gate Valves, Flanged Ends - Iron, OS&Y, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**Jomar Valve**]
f. [**Kennedy Valve Company; a division of McWane, Inc.**]
g. [**KITZ Corporation**]
h. [**Lance Valves**]
i. [**Legend Valve & Fitting, Inc**]
j. [**Milwaukee Valve Company**]
k. [**Powell Valves**]
l. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
m. [**WATTS; A Watts Water Technologies Company**]
n. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Disc: Solid wedge.
9. Packing and Gasket: Asbestos free.

G. Gate Valves, Flanged Ends - Iron, NRS, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
c. [**Cooper Valves**]
d. [**Crane Fluid Systems; Crane Co.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**FNW; Ferguson Enterprises, Inc.**]
g. [**Jenkins Valves; a Crane Co. brand**]
h. [**KITZ Corporation**]
i. [**Victaulic Company**]
j. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Disc: Solid wedge.
9. Packing and Gasket: Asbestos free.

H. Gate Valves, Flanged Ends - Iron, OS&Y, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**KITZ Corporation**]
f. [**Milwaukee Valve Company**]
g. [**Powell Valves**]
h. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
i. [**Victaulic Company**]
j. [**WATTS; A Watts Water Technologies Company**]
k. [**Zurn Industries, LLC**]

2. Standard: MSS SP-70, Type I.
3. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
4. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Disc: Solid wedge.
9. Packing and Gasket: Asbestos free.

2.11 CHAINWHEELS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be**

incorporated into the Work include, but are not limited to, the following]:

1. [**Babbitt Steam Specialty Co**]
2. [**Roto Hammer Industries; Rotork**]
3. [**Trumbull Industries**]

B. Description: Valve actuation assembly with sprocket rim, chain guides, chain[and attachment brackets for mounting chainwheels directly to handwheels].

1. Sprocket Rim with Chain Guides: [**Ductile iron**][**Ductile or cast iron**][**Cast iron**][**Aluminum**][**Bronze**], of type and size required for valve.[**Include zinc or epoxy coating.**]
2. Chain: [**Hot-dip, galvanized steel**][**Brass**][**Stainless steel**], of size required to fit sprocket rim.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine valve interior for cleanliness, freedom from foreign matter, and corrosion. Remove special packing materials, such as blocks, used to prevent disc movement during shipping and handling.

B. Operate valves in positions from fully open to fully closed. Examine guides and seats made accessible by such operations.

C. Examine threads on valve and mating pipe for form and cleanliness.

D. Examine mating flange faces for conditions that might cause leakage. Check bolting for proper size, length, and material. Verify that gasket is of proper size, that its material composition is suitable for service, and that it is free from defects and damage.

E. Examine press fittings to verify they have been properly pressed.

F. Do not attempt to repair defective valves; replace with new valves. Remove defective valves from site.

3.2 INSTALLATION OF VALVES

A. Install valves with unions or flanges at each piece of equipment arranged to allow service, maintenance, and equipment removal without system shutdown.

B. Provide support of piping adjacent to valves such that no force is imposed upon valves.

C. Locate valves for easy access and where not blocked by equipment, other piping, or building components.

D. For valves in horizontal piping, install valves with stem at or above center of pipe.

E. Install valves in position that does not project into aisles or block access to other equipment.

F. Install valves in position to allow full stem and actuator or manual operator movement.

G. Verify that joints of each valve have been properly installed and sealed to assure there is no leakage or damage.

H. Chainwheels: Install chainwheels on manual operators for [**butterfly**][**globe**][**and**][**gate**] valves [**NPS 4 (DN 100)**] and larger and more than [**96 inches (2400 mm)**] above floor. Extend chains to [**60 inches (1520 mm)**] above finished floor.

I. Install check valves for proper direction of flow and as follows:

1. Check Valves: [**Center-guided type**][**and**][**plate type**], in horizontal or vertical position, between flanges.
2. Check Valves, Swing Type: In horizontal position with hinge pin level.
3. Check Valves, Lift Type: With stem upright and plumb.

J. Valve Tags: Comply with requirements in Section 220553 "Identification for Plumbing Piping and Equipment" for valve tags and schedules.

K. Adhere to manufacturer's written installation instructions. When soldering or brazing valves, do not heat valves above maximum permitted temperature. Do not use solder with melting point temperature above valve manufacturer's written recommended maximum.

3.3 ADJUSTING

A. Adjust or replace valve packing after piping systems have been tested and put into service but before final adjusting and balancing. Replace valves if persistent leaking occurs.

3.4 GENERAL REQUIREMENTS FOR VALVE APPLICATIONS

A. If valves with specified CWP ratings are unavailable, the same types of valves with higher CWP ratings may be substituted.

B. Select valves with the following end connections:

1. For Copper Tubing, NPS 2 (DN 50) and Smaller: Threaded ends except where solder-joint valve-end option or press-end option is indicated in valve schedules below.
2. For Copper Tubing, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Flanged ends except where threaded valve-end option is indicated in valve schedules below.
3. For Copper Tubing, NPS 5 (DN 125) and Larger: Flanged ends.
4. For Steel Piping, NPS 2 (DN 50) and Smaller: Threaded ends.
5. For Steel Piping, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Flanged ends except where threaded valve-end option is indicated in valve schedules below.
6. For Steel Piping, NPS 5 (DN 125) and Larger: Flanged ends.
7. For Stainless Steel Piping, NPS 2 (DN 50) and Smaller: [**Threaded**][**Press**] ends.
8. For Stainless Steel Piping, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Flanged ends.
9. For Grooved-End Copper Tubing: Valve ends may be grooved.
10. For Grooved-End Steel Piping: Valve ends may be grooved.
11. Wafer-Type Valves: Flanged connections.

3.5 LOW-PRESSURE, COMPRESSED-AIR BALL VALVE SCHEDULE - 150 PSIG (1035 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; [**threaded**][**soldered**] ends.
2. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.

3. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; [**threaded**][**soldered**] ends.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
5. Ball valves, threaded or flanged ends - stainless steel, two piece with full port; [**threaded**][**flanged**] ends.
6. Ball valves, threaded ends - bronze, two piece, safety exhaust; [**200 psig (1380 kPa)**].

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.
4. Ball valves, threaded or flanged ends - stainless steel, two piece with full port; [**threaded**][**flanged**] ends.

3.6 HIGH-PRESSURE, COMPRESSED-AIR BALL VALVE SCHEDULE - 150 TO 200 PSIG (1035 TO 1380 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; [**threaded**][**soldered**] ends.
2. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
3. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; [**threaded**][**soldered**] ends.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
5. Ball valves, threaded or flanged ends - stainless steel, two piece with full port; [**threaded**][**flanged**] ends.
6. Ball valves, threaded ends - bronze, two piece, safety exhaust; [**200 psig (1380 kPa)**].

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.
4. Ball valves, threaded or flanged ends - stainless steel, two piece with full port; [**threaded**][**flanged**] ends.

3.7 DOMESTIC HOT- AND COLD-WATER BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, lead free, threaded ends - brass, one piece.
2. Ball valves, lead free, threaded or soldered ends - brass, two piece with full port and brass trim; [**threaded**][**soldered**] ends.
3. Ball valves, lead free, threaded or soldered ends - brass, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
4. Ball valves, lead free, threaded or soldered ends - brass, two piece with regular port and brass trim; [**threaded**][**soldered**] ends.
5. Ball valves, lead free, threaded or soldered ends - brass, two piece with regular port and stainless

steel trim; [**threaded**][**soldered**] ends.

6. Ball valves, lead free, threaded or soldered ends - brass, three piece with full port and brass trim; [**threaded**][**soldered**] ends.
7. Ball valves, lead free, threaded or soldered ends - brass, three piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
8. Ball valves, lead free, threaded ends - bronze, one piece with bronze trim.
9. Ball valves, lead free, threaded ends - bronze, one piece with stainless steel trim.
10. Ball valves, lead free, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; [**threaded**][**soldered**] ends.
11. Ball valves, lead free, threaded or soldered ends - bronze, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
12. Ball valves, lead free, threaded ends - bronze, two piece with regular port and bronze or brass trim.
13. Ball valves, lead free, threaded ends - bronze, two piece with regular port and stainless steel trim.
14. Ball valves, lead free, threaded ends - bronze, three piece with full port and bronze or brass trim.
15. Ball valves, lead free, threaded ends - bronze, three piece with full port and stainless steel trim.
16. Ball valves, lead free, threaded or soldered ends - bronze, three piece with regular port and bronze or brass trim; [**threaded**][**soldered**] ends.
17. Ball valves, lead free, threaded or soldered ends - bronze, three piece with regular port and stainless steel trim; [**threaded**][**soldered**] ends.
18. Ball valves, lead free, threaded or flanged ends - stainless steel, two piece with full port; [**threaded**][**flanged**] ends.
19. Ball valves, lead free, press ends - brass, two piece with full port and brass trim.
20. Ball valves, lead free, press ends - brass, two piece with full port and stainless steel trim.
21. Ball valves, lead free, press ends - bronze, two piece with full port and bronze or brass trim.
22. Ball valves, lead free, press ends - stainless steel, two piece with full port.
23. Ball valves, lead free, flanged or threaded ends - steel, with full port, Class 150; [**threaded**][**flanged**] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, lead free, flanged or threaded ends - iron, Class 125; [**flanged**][**threaded**] ends.
2. Ball valves, lead free, flanged or threaded ends - steel, with full port, Class 150; [**flanged**][**threaded**] ends.
3. Ball valves, lead free, flanged or threaded ends - steel, with regular port, Class 150; [**flanged**][**threaded**] ends.
4. Ball valves, threaded or flanged ends - stainless steel, two piece with full port; [**threaded**][**flanged**] ends.

C. For CPVC Pipe:

1. CPVC Union-Type Ball Check Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**] at [**73 deg F (23 deg C)**].

    a. End Connections for Valves NPS 2 (DN 50) and Smaller: [Socket][threaded].
    b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

D. For PVC Pipe:

1. PVC Union-Type Ball Check Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**] at [**73 deg F (23 deg C)**].

    a. End Connections for Valves NPS 2 (DN 50) and Smaller: [Socket][threaded].
    b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

3.8 LOW-PRESSURE, COMPRESSED-AIR BUTTERFLY VALVE SCHEDULE - 150 PSIG (1035 kPa) OR LESS

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, NBR seat.
2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; [**150**][**200**] CWP, NBR seat.
3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; [**150**][**200**] CWP, NBR seat.
4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, NBR seat.
5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc; [**150**][**200**] CWP, NBR seat.
6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; [**150**][**200**] CWP, NBR seat.
7. Butterfly valves, grooved end - ductile iron, 175 CWP; NBR seat.
8. Butterfly valves, grooved end - ductile iron, 300 CWP; NBR seat.
9. Butterfly valves, grooved end - stainless steel; NBR seat.

3.9 HIGH-PRESSURE, COMPRESSED-AIR BUTTERFLY VALVE SCHEDULE - 150 TO 200 PSIG (1035 TO 1380 kPa)

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; 200 CWP, NBR seat.
2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; 200 CWP, NBR seat.
3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; 200 CWP, NBR seat.
4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; 200 CWP, NBR seat.
5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc; 200 CWP, NBR seat.
6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; 200 CWP, NBR seat.
7. Butterfly valves, grooved end - ductile iron, 175 CWP; NBR seat.
8. Butterfly valves, grooved end - ductile iron, 300 CWP; NBR seat.
9. Butterfly valves, grooved end - stainless steel; NBR seat.

3.10 DOMESTIC HOT- AND COLD-WATER BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, lead free, single flange (lug type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
2. Butterfly valves, lead free, single flange (lug type) - iron, with ductile-iron disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
3. Butterfly valves, lead free, single flange (lug type) - iron, with stainless steel disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
4. Butterfly valves, lead free, flangeless (wafer type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
5. Butterfly valves, lead free, flangeless (wafer type) - iron, with ductile-iron disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
6. Butterfly valves, lead free, flangeless (wafer type) - iron, with stainless steel disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
7. Butterfly valves, lead free, grooved end - ductile iron, 175 CWP; [**EPDM**][**NBR**] seat.
8. Butterfly valves, lead free, grooved end - ductile iron, 300 CWP; [**EPDM**][**NBR**] seat.

B. For CPVC Pipe: CPVC butterfly valve for [**NPS 2-1/2 (DN 65)**][**NPS 5 (DN 125)**] and larger.

C. For PVC Pipe: PVC butterfly valve for [**NPS 2-1/2 (DN 65)**][**NPS 5 (DN 125)**] and larger.

D. For Stainless Steel Pipe: Stainless steel, grooved-end butterfly valve for **NPS 2-1/2 (DN 65)** and larger.

3.11 LOW-PRESSURE, COMPRESSED-AIR CHECK VALVE SCHEDULE - 150 PSIG (1035 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Vertical, Upflow Applications Only:

   a. Check valves, lift type, threaded or soldered ends - bronze, with bronze disc, Class 125; [**threaded**][**soldered**] ends.
   b. Check valves, lift type, threaded or soldered ends - bronze, with nonmetallic disc, Class 125; [**threaded**][**soldered**] ends.

2. Horizontal and Vertical Applications:

   a. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 125; [**threaded**][**soldered**] ends.
   b. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 125; [**threaded**][**soldered**] ends.
   c. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150; [**threaded**][**soldered**] ends.
   d. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150; [**threaded**][**soldered**] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, swing type, grooved ends - iron, 300 CWP.
5. Check valves, dual-plate type - iron, with metal seat, Class 125.
6. Check valves, dual-plate type - iron, with metal seat, Class 150.
7. Check valves, dual-plate type - iron, with metal seat, Class 250.
8. Check valves, dual-plate type - iron, with metal seat, Class 300.
9. Check valves, dual-plate type - iron, with resilient seat, Class 125.
10. Check valves, dual-plate type - iron, with resilient seat, Class 150.
11. Check valves, dual-plate type - iron, with resilient seat, Class 250.
12. Check valves, dual-plate type - iron, with resilient seat, Class 300.
13. Check valves, single-plate type - iron, with resilient seat, Class 125; NBR seat.
14. Check valves, single-plate type - iron, with resilient seat, Class 250; NBR seat.

3.12 HIGH-PRESSURE, COMPRESSED-AIR CHECK VALVE SCHEDULE - 150 TO 200 PSIG (1035 TO 1380 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Vertical, Upflow Applications Only:

   a. Check valves, lift type, threaded or soldered ends - bronze, with bronze disc, Class 125; [**threaded**][**soldered**] ends.

b. Check valves, lift type, threaded or soldered ends - bronze, with nonmetallic disc, Class 125; [**threaded**][**soldered**] ends.

2. Horizontal and Vertical Applications:

a. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 125; [**threaded**][**soldered**] ends.
b. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 125; [**threaded**][**soldered**] ends.
c. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150; [**threaded**][**soldered**] ends.
d. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150; [**threaded**][**soldered**] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, swing type, grooved ends - iron, 300 CWP.
5. Check valves, dual-plate type - iron, with metal seat, Class 125.
6. Check valves, dual-plate type - iron, with metal seat, Class 150.
7. Check valves, dual-plate type - iron, with metal seat, Class 250.
8. Check valves, dual-plate type - iron, with metal seat, Class 300.
9. Check valves, dual-plate type - iron, with resilient seat, Class 125.
10. Check valves, dual-plate type - iron, with resilient seat, Class 150.
11. Check valves, dual-plate type - iron, with resilient seat, Class 250.
12. Check valves, dual-plate type - iron, with resilient seat, Class 300.
13. Check valves, single-plate type - iron, with resilient seat, Class 125; NBR seat.
14. Check valves, single-plate type - iron, with resilient seat, Class 250; NBR seat.

3.13 DOMESTIC HOT- AND COLD-WATER CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, lead free, swing type, threaded or soldered ends - bronze, with bronze disc, Class 125; [**threaded**][**soldered**] ends.
2. Check valves, lead free, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 125; [**threaded**][**soldered**] ends.
3. Check valves, lead free, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150; [**threaded**][**soldered**] ends.
4. Check valves, lead free, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150; [**threaded**][**soldered**] ends.
5. Check valves, lead free, swing type, press ends - bronze.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, lead free, swing type, flanged or threaded ends - iron, with metal seats, Class 125; [**flanged**][**threaded**] ends.
2. Check valves, lead free, swing type, flanged or threaded ends - iron, with nonmetallic-to-metal Seats, Class 125; [**flanged**][**threaded**] ends.
3. Check valves, lead free, swing type, flanged or threaded ends - iron, with metal seats, Class 250; [**flanged**][**threaded**] ends.
4. Check valves, lead free, swing type, flanged or threaded ends - iron, with lever- and spring-

closure control, Class 125; [**flanged**][**threaded**] ends.
5. Check valves, lead free, swing type, flanged or threaded ends - iron, with lever- and weight-closure control, Class 125; [**flanged**][**threaded**] ends.
6. Check valves, lead free, swing type, grooved ends - iron, 300 CWP.
7. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 125.
8. Check valves, lead free, center guided - iron, globe, with metal seat, Class 125.
9. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 150.
10. Check valves, lead free, center guided - iron, globe, with metal seat, Class 150.
11. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 250.
12. Check valves, lead free, center guided - iron, globe, with metal seat, Class 250.
13. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 300.
14. Check valves, lead free, center guided - iron, globe, with metal seat, Class 300.
15. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 125; [EPDM][NBR] seat.
16. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 125; [EPDM][NBR] seat.
17. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 150; [EPDM][NBR] seat.
18. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 150; [EPDM][NBR] seat.
19. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 250; [EPDM][NBR] seat.
20. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 250; [EPDM][NBR] seat.
21. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 300; [EPDM][NBR] seat.
22. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 300; [EPDM][NBR] seat.
23. Check valves, lead free, dual-plate type - iron, with metal seat, Class 125.
24. Check valves, lead free, dual-plate type - iron, with metal seat, Class 150.
25. Check valves, lead free, dual-plate type - iron, with metal seat, Class 250.
26. Check valves, lead free, dual-plate type - iron, with metal seat, Class 300.
27. Check valves, lead free, single-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
28. Check valves, lead free, dual-plate type - iron, with resilient seat, Class 125; [EPDM][NBR] seat.
29. Check valves, lead free, dual-plate type - iron, with resilient seat, Class 150; [EPDM][NBR] seat.
30. Check valves, lead free, single-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
31. Check valves, lead free, dual-plate type - iron, with resilient seat, Class 250; [EPDM][NBR] seat.
32. Check valves, lead free, dual-plate type - iron, with resilient seat, Class 300; [EPDM][NBR] seat.

C. For CPVC Pipe:

1. NPS 2 (DN 50) and Smaller: [**Union**][**Non-union**] ball valve.
2. NPS 4 (DN 100) and Smaller: [**Union**][**Non-union**] ball valve.

D. For PVC Pipe:

1. NPS 2 (DN 50) and Smaller: [**Union**][**Non-union**] ball valve.
2. NPS 4 (DN 100) and Smaller: [**Union**][**Non-union**] ball valve.

3.14 PUMP-DISCHARGE CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, lead free, swing type, threaded or soldered ends - bronze, with bronze disc, Class 125; [**threaded**][**soldered**] ends.

2. Check valves, lead free, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 125; [**threaded**][**soldered**] ends.
3. Check valves, lead free, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150; [**threaded**][**soldered**] ends.
4. Check valves, lead free, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150; [**threaded**][**soldered**] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger for Domestic Water Pumps:

1. Check valves, lead free, swing type, flanged or threaded ends - iron, with lever- and spring-closure control, Class 125; [**flanged**][**threaded**] ends.
2. Check valves, lead free, swing type, flanged or threaded ends - iron, with lever- and weight-closure control, Class 125; [**flanged**][**threaded**] ends.
3. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 125.
4. Check valves, lead free, center guided - iron, globe, with metal seat, Class 125.
5. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 150.
6. Check valves, lead free, center guided - iron, globe, with metal seat, Class 150.
7. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 250.
8. Check valves, lead free, center guided - iron, globe, with metal seat, Class 250.
9. Check valves, lead free, center guided - iron, compact wafer, with metal seat, Class 300.
10. Check valves, lead free, center guided - iron, globe, with metal seat, Class 300.
11. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 125; [EPDM][NBR] seat.
12. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 125; [EPDM][NBR] seat.
13. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 150; [EPDM][NBR] seat.
14. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 150; [EPDM][NBR] seat.
15. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 250; [EPDM][NBR] seat.
16. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 250; [EPDM][NBR] seat.
17. Check valves, lead free, center guided - iron, compact wafer, with resilient seat, Class 300; [EPDM][NBR] seat.
18. Check valves, lead free, center guided - iron, globe, with resilient seat, Class 300; [EPDM][NBR] seat.

C. Pipe NPS 2-1/2 (DN 65) and Larger for Sanitary Waste and Storm Drainage:

1. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
2. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.15 LOW-PRESSURE, COMPRESSED-AIR GATE VALVE SCHEDULE - 150 PSIG (1035 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; [**threaded**][**soldered**] ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; [**threaded**][**soldered**] ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.16 HIGH-PRESSURE, COMPRESSED-AIR GATE VALVE SCHEDULE - 150 TO 200 PSIG (1035 TO 1380 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; [threaded][soldered] ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; [threaded][soldered] ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.17 DOMESTIC HOT- AND COLD-WATER GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, lead free, threaded or soldered ends - bronze, NRS, Class 125; [threaded][soldered] ends.
2. Gate valves, lead free, threaded or soldered ends - bronze, RS, Class 125; [threaded][soldered] ends.
3. Gate valves, lead free, threaded ends - bronze, NRS, Class 150.
4. Gate valves, lead free, threaded ends - bronze, RS, Class 150.
5. Gate valves, lead free, press ends - bronze.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, lead free, flanged ends - iron, NRS, Class 125.
2. Gate valves, lead free, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, lead free, flanged ends - iron, NRS, Class 250.
4. Gate valves, lead free, flanged ends - iron, OS&Y, Class 250.

C. For CPVC Pipe:

1. NPS 2 (DN 50) and Smaller: [**Union**][**Non-union**] gate valve.
2. NPS 4 (DN 100) and Smaller: [**Union**][**Non-union**] gate valve.

D. For PVC Pipe:

1. NPS 2 (DN 50) and Smaller: [**Union**][**Non-union**] gate valve.
2. NPS 4 (DN 100) and Smaller: [**Union**][**Non-union**] gate valve.

END OF SECTION 22 05 23 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 05 23 00A - GENERAL-DUTY VALVES FOR HVAC PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Angle valves.
2. Globe valves.
3. Ball valves.
4. Butterfly valves.
5. Check valves.
6. Gate valves.
7. Plug valves.
8. Chainwheels.

1.2 DEFINITIONS

A. CWP: Cold working pressure.

B. EPDM: Ethylene-propylene-diene monomer.

C. FKM: Fluoroelastomer.

D. NBR: Nitrile butadiene rubber (also known as "Buna-N").

E. NRS: Nonrising stem.

F. OS&Y: Outside screw and yoke.

G. PTFE: Polytetrafluoroethylene.

H. RPTFE: Reinforced polytetrafluoroethylene.

I. RS: Rising stem.

J. SWP: Steam working pressure.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include material descriptions and dimensions of individual components.
2. Include operating characteristics and furnished accessories.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Prepare valves for shipping as follows:

1. Protect internal parts against rust and corrosion.
2. Protect threads, flange faces, grooved ends, press ends, solder ends, and weld ends.
3. Set ball valves open to minimize exposure of functional surfaces.
4. Set butterfly valves closed or slightly open.
5. Block check valves in either closed or open position.
6. Set gate valves closed to prevent rattling.
7. Set plug valves to open to minimize exposure of functional surfaces.

B. Use the following precautions during storage:

1. Maintain valve end protection.
2. Store valves indoors and maintain at higher than ambient dew point temperature. If outdoor storage is necessary, store valves off the ground in watertight enclosures.

C. Use sling to handle large valves; rig sling to avoid damage to exposed parts. Do not use operating handles or stems or other components as lifting or rigging points unless specifically indicated for this purpose in manufacturer's written instructions.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each type of valve from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. ASME Compliance:

1. ASME B1.20.1 for threads for threaded-end valves.
2. ASME B16.1 for flanges on iron valves.
3. ASME B16.5 for flanges on steel valves.
4. ASME B16.10 and ASME B16.34 for ferrous valve dimensions and design criteria.
5. ASME B16.18 for cast-copper solder-joint connections.
6. ASME B16.22 for wrought copper and copper-alloy solder-joint connections.
7. ASME B16.34 for flanged- and threaded-end connections.
8. ASME B16.51 for press joint connections.
9. ASME B31.1 for power piping valves.
10. ASME B31.9 for building services piping valves.

B. AWWA Compliance: Comply with AWWA C606 for grooved-end connections.

C. Provide bronze valves made with dezincification-resistant materials. Bronze valves made with copper alloy (brass) containing more than 15 percent zinc are unacceptable.

D. Valve Pressure-Temperature Ratings: Not less than indicated and as required for system pressures and temperatures.

E. Valve Sizes: Same as upstream piping unless otherwise indicated.

F. Valve Bypass and Drain Connections: MSS SP-45.

G. Wrench: Furnish Owner with one wrench for every [**five**][**10**]<**Insert number**> plug valves, for each size square plug-valve head.

H. Valve Actuator Type:

1. Gear Actuator: For quarter-turn ball valves [**NPS 4 (DN 100)**]<**Insert pipe size**> and larger.
2. Hand Lever: For quarter-turn ball valves smaller than [**NPS 4 (DN 100)**]<**Insert pipe size**>.

I. Valves in Insulated Piping:

1. Provide **2-inch (50-mm)** extended neck stems.
2. Provide extended operating handles with nonthermal-conductive covering material and protective sleeves that allow operation of valves without breaking vapor seals or disturbing insulation.
3. Provide memory stops that are fully adjustable after insulation is applied.

2.3 ANGLE VALVES

A. Angle Valves, Threaded Ends - Bronze, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Hammond Valve**]
d. [**Milwaukee Valve Company**]
e. [**NIBCO INC.**]
f. [**WATTS; A Watts Water Technologies Company**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Valve, Inc**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Hammond Valve**]
d. [**Milwaukee Valve Company**]
e. [**NIBCO INC.**]
f. [**WATTS; A Watts Water Technologies Company**]
g. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: PTFE.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[**, bronze, or aluminum**].

B. Angle Valves, Threaded Ends - Bronze, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Crane Fluid Systems; Crane Co.**]
    b. [**KITZ Corporation**]
    c. [**Milwaukee Valve Company**]
    d. [**Stockham; a Crane Co. brand**]
    e. [**WATTS; A Watts Water Technologies Company**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Crane Fluid Systems; Crane Co.**]
    b. [**KITZ Corporation**]
    c. [**Milwaukee Valve Company**]
    d. [**Stockham; a Crane Co. brand**]
    e. [**WATTS; A Watts Water Technologies Company**]
    f. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: PTFE or stainless steel. See Part 3 angle valve schedule articles.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[**, bronze, or aluminum**].

2.4 GLOBE VALVES

A. Globe Valves, Threaded or Soldered Ends - Bronze, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**FNW; Ferguson Enterprises, Inc.**]
    d. [**Hammond Valve**]
    e. [**KITZ Corporation**]
    f. [**Milwaukee Valve Company**]
    g. [**NIBCO INC.**]
    h. [**Powell Valves**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**WATTS; A Watts Water Technologies Company**]
    l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**FNW; Ferguson Enterprises, Inc.**]
    d. [**Hammond Valve**]
    e. [**KITZ Corporation**]
    f. [**Milwaukee Valve Company**]
    g. [**NIBCO INC.**]
    h. [**Powell Valves**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**WATTS; A Watts Water Technologies Company**]
    l. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
6. Ends: Threaded or soldered. See Part 3 globe valve schedule articles.
7. Stem: Bronze.
8. Disc: PTFE.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[**, bronze, or aluminum**].

B. Globe Valves, Threaded Ends - Bronze, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**KITZ Corporation**]
    e. [**Milwaukee Valve Company**]
    f. [**NIBCO INC.**]
    g. [**Powell Valves**]
    h. [**Red-White Valve Corp.**]
    i. [**Siemens Industry, Inc., Building Technologies Division**]
    j. [**Valve Solutions, Inc.**]
    k. [**WATTS; A Watts Water Technologies Company**]
    l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**KITZ Corporation**]
    e. [**Milwaukee Valve Company**]
    f. [**NIBCO INC.**]

g. [**Powell Valves**]
h. [**Red-White Valve Corp.**]
i. [**Siemens Industry, Inc., Building Technologies Division**]
j. [**Valve Solutions, Inc.**]
k. [**WATTS; A Watts Water Technologies Company**]
l. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 2.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: PTFE or stainless steel. See Part 3 globe valve schedule articles.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[**, bronze, or aluminum**].

C. Globe Valves, Flanged Ends - Iron, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**KITZ Corporation**]
g. [**Milwaukee Valve Company**]
h. [**NIBCO INC.**]
i. [**Powell Valves**]
j. [**Red-White Valve Corp.**]
k. [**Siemens Industry, Inc., Building Technologies Division**]
l. [**Stockham; a Crane Co. brand**]
m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**KITZ Corporation**]
g. [**Milwaukee Valve Company**]
h. [**NIBCO INC.**]
i. [**Powell Valves**]
j. [**Red-White Valve Corp.**]
k. [**Siemens Industry, Inc., Building Technologies Division**]
l. [**Stockham; a Crane Co. brand**]
m. <**Insert manufacturer's name**>

3. Standard: MSS SP-85, Type I.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Packing and Gasket: Asbestos free.
9. Operator: Handwheel or chainwheel.

D. Globe Valves, Flanged Ends - Iron, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**Jenkins Valves; a Crane Co. brand**]
    e. [**Milwaukee Valve Company**]
    f. [**NIBCO INC.**]
    g. [**Siemens Industry, Inc., Building Technologies Division**]
    h. [**Stockham; a Crane Co. brand**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Hammond Valve**]
    d. [**Jenkins Valves; a Crane Co. brand**]
    e. [**Milwaukee Valve Company**]
    f. [**NIBCO INC.**]
    g. [**Siemens Industry, Inc., Building Technologies Division**]
    h. [**Stockham; a Crane Co. brand**]
    i. <**Insert manufacturer's name**>

3. Standard: MSS SP-85, Type I.
4. CWP Rating: **500 psig (3450 kPa)**.
5. Body Material: ASTM A126, gray iron with bolted bonnet.
6. Ends: Flanged.
7. Trim: Bronze.
8. Packing and Gasket: Asbestos free.
9. Operator: Handwheel or chainwheel.

2.5 BALL VALVES

A. Ball Valves, Threaded Ends - Brass, One Piece:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**KITZ Corporation**]
b. [**WATTS; A Watts Water Technologies Company**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**KITZ Corporation**]
b. [**WATTS; A Watts Water Technologies Company**]
c. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. CWP Rating: **400 psig (2760 kPa)**.
5. Body Design: One piece.
6. Body Material: Forged brass.
7. Ends: Threaded.
8. Seats: PTFE.
9. Stem: Brass.
10. Ball: Chrome-plated brass.
11. Port: Reduced.

B. Ball Valves, Threaded or Soldered Ends - Brass, Two Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**American Valve, Inc**]

s. [**Viega LLC**]
t. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Two piece.
7. Body Material: Forged brass.
8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Brass.
11. Ball: Chrome-plated brass.
12. Port: Full.

C. Ball Valves, Press Ends - Brass, Two Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**FNW; Ferguson Enterprises, Inc.**]
e. [**Hammond Valve**]
f. [**Jenkins Valves; a Crane Co. brand**]
g. [**Jomar Valve**]
h. [**KITZ Corporation**]
i. [**Lance Valves**]
j. [**Legend Valve & Fitting, Inc**]
k. [**Milwaukee Valve Company**]
l. [**Red-White Valve Corp.**]
m. [**Stockham; a Crane Co. brand**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**FNW; Ferguson Enterprises, Inc.**]

j. [**Legend Valve & Fitting, Inc**]
k. [**Marwin Valve; Richards Industries**]
l. [**Milwaukee Valve Company**]
m. [**Red-White Valve Corp.**]
n. [**Siemens Industry, Inc., Building Technologies Division**]
o. [**Stockham; a Crane Co. brand**]
p. [**Viega LLC**]
q. [**WATTS; A Watts Water Technologies Company**]
r. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**American Valve, Inc**]
c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
d. [**Center Line; a Crane Co. brand**]
e. [**FNW; Ferguson Enterprises, Inc.**]
f. [**Hammond Valve**]
g. [**Jomar Valve**]
h. [**KITZ Corporation**]
i. [**Lance Valves**]
j. [**Legend Valve & Fitting, Inc**]
k. [**Marwin Valve; Richards Industries**]
l. [**Milwaukee Valve Company**]
m. [**Red-White Valve Corp.**]
n. [**Siemens Industry, Inc., Building Technologies Division**]
o. [**Stockham; a Crane Co. brand**]
p. [**Viega LLC**]
q. [**WATTS; A Watts Water Technologies Company**]
r. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Two piece.
7. Body Material: Brass or bronze.
8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Regular.

H. Ball Valves, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Bray International, Inc.**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Bray International, Inc.**]
    b. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Three piece.
7. Body Material: Forged brass.
8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Brass.
11. Ball: Chrome-plated brass.
12. Port: Full.

I. Ball Valves, Threaded or Soldered Ends - Brass, Three Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Bray International, Inc.**]
    b. [**DynaQuip Controls**]
    c. [**Marwin Valve; Richards Industries**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Bray International, Inc.**]
    b. [**DynaQuip Controls**]
    c. [**Marwin Valve; Richards Industries**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Three piece.
7. Body Material: Forged brass.
8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
9. Seats: PTFE.

10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Full.

J. Ball Valves, Threaded Ends - Bronze, One Piece with Bronze Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**NIBCO INC.**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**NIBCO INC.**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. CWP Rating: **400 psig (2760 kPa)**.
5. Body Design: One piece.
6. Body Material: Bronze.
7. Ends: Threaded.
8. Seats: PTFE.
9. Stem: Bronze.
10. Ball: Chrome-plated brass.
11. Port: Reduced.

K. Ball Valves, Threaded Ends - Bronze, One Piece with Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**NIBCO INC.**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**NIBCO INC.**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. CWP Rating: **600 psig (4140 kPa)**.
5. Body Design: One piece.

6. Body Material: Bronze.
7. Ends: Threaded.
8. Seats: PTFE.
9. Stem: Stainless steel.
10. Ball: Stainless steel, vented.
11. Port: Reduced.

L. Ball Valves, Threaded or Soldered Ends - Bronze, Two Piece with Full Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**DynaQuip Controls**]
    d. [**FNW; Ferguson Enterprises, Inc.**]
    e. [**Hammond Valve**]
    f. [**Jenkins Valves; a Crane Co. brand**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**Zurn Industries, LLC**]
    l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**DynaQuip Controls**]
    d. [**FNW; Ferguson Enterprises, Inc.**]
    e. [**Hammond Valve**]
    f. [**Jenkins Valves; a Crane Co. brand**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Red-White Valve Corp.**]
    j. [**Stockham; a Crane Co. brand**]
    k. [**Zurn Industries, LLC**]
    l. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Two piece.
7. Body Material: Bronze.
8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Bronze.
11. Ball: Chrome-plated brass.
12. Port: Full.

M. Ball Valves, Press Ends - Bronze, Two Piece with Full Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Center Line; a Crane Co. brand**]
    c. [**Hammond Valve**]
    d. [**Milwaukee Valve Company**]
    e. [**NIBCO INC.**]
    f. [**Red-White Valve Corp.**]
    g. [**Stockham; a Crane Co. brand**]
    h. [**Viega LLC**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Center Line; a Crane Co. brand**]
    c. [**Hammond Valve**]
    d. [**Milwaukee Valve Company**]
    e. [**NIBCO INC.**]
    f. [**Red-White Valve Corp.**]
    g. [**Stockham; a Crane Co. brand**]
    h. [**Viega LLC**]
    i. <**Insert manufacturer's name**>

3. Standards: MSS SP-110 and IAPMO/ANSI Z1157.
4. CWP Rating: Minimum **200 psig (1380 kPa)**.
5. Body Design: Two piece.
6. Body Material: Bronze.
7. Ends: Press.
8. Press-End Connections Rating: Minimum **200 psig (1380 kPa)**.
9. Seats: PTFE or RPTFE.
10. Stem: Bronze or brass.
11. Ball: Chrome-plated brass.
12. Port: Full.
13. O-Ring Seal: EPDM or NBR.

N. Ball Valves, Threaded or Soldered Ends - Bronze, Two Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**DynaQuip Controls**]

m. [**Viega LLC**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Center Line; a Crane Co. brand**]
d. [**DynaQuip Controls**]
e. [**Hammond Valve**]
f. [**Jenkins Valves; a Crane Co. brand**]
g. [**Jomar Valve**]
h. [**Lance Valves**]
i. [**Milwaukee Valve Company**]
j. [**NIBCO INC.**]
k. [**Red-White Valve Corp.**]
l. [**Stockham; a Crane Co. brand**]
m. [**Viega LLC**]
n. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Two piece.
7. Body Material: Bronze.
8. Ends: Threaded.
9. Seats: PTFE.
10. Stem: Bronze.
11. Ball: Chrome-plated brass.
12. Port: Regular.

P. Ball Valves, Threaded Ends - Bronze, Two Piece with Regular Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Center Line; a Crane Co. brand**]
c. [**DynaQuip Controls**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Jomar Valve**]
g. [**Milwaukee Valve Company**]
h. [**NIBCO INC.**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**Viega LLC**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Center Line; a Crane Co. brand**]
c. [**DynaQuip Controls**]

d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Jomar Valve**]
g. [**Milwaukee Valve Company**]
h. [**NIBCO INC.**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**Viega LLC**]
l. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Two piece.
7. Body Material: Bronze.
8. Ends: Threaded.
9. Seats: PTFE.
10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Regular.

Q. Ball Valves, Threaded Ends - Bronze, Three Piece with Full Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   b. [**WATTS; A Watts Water Technologies Company**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   b. [**WATTS; A Watts Water Technologies Company**]
   c. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Three piece.
7. Body Material: Bronze.
8. Ends: Threaded.
9. Seats: PTFE.
10. Stem: Bronze.
11. Ball: Chrome-plated brass.
12. Port: Full.

R. Ball Valves, Threaded Ends - Bronze, Three Piece with Full Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**DynaQuip Controls**]
c. [**NIBCO INC.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**DynaQuip Controls**]
c. [**NIBCO INC.**]
d. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Three piece.
7. Body Material: Bronze.
8. Ends: Threaded.
9. Seats: PTFE.
10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Full.

S. Ball Valves, Threaded or Soldered Ends - Bronze, Three Piece with Regular Port and Bronze or Brass Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**NIBCO INC.**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**NIBCO INC.**]
c. <**Insert manufacturer's name**>

3. Standards: MSS SP-110 and MSS SP-145.
4. CWP Rating: **600 psig (4140 kPa)**.
5. Body Design: Three piece.
6. Body Material: Bronze.
7. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
8. Seats: PTFE.
9. Stem: Bronze.
10. Ball: Chrome-plated brass.

11. Port: Regular.

T. Ball Valves, Threaded or Soldered Ends - Bronze, Three Piece with Regular Port and Stainless Steel Trim:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**NIBCO INC.**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**NIBCO INC.**]
c. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating: **150 psig (1035 kPa)**.
5. CWP Rating: **600 psig (4140 kPa)**.
6. Body Design: Three piece.
7. Body Material: Bronze.
8. Ends: Threaded or soldered. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Stainless steel.
11. Ball: Stainless steel, vented.
12. Port: Regular.

U. Ball Valves, Flanged Ends - Steel, with Full Port and Stainless Steel Trim, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Bray International, Inc.**]
c. [**DynaQuip Controls**]
d. [**FNW; Ferguson Enterprises, Inc.**]
e. [**Hammond Valve**]
f. [**Jamesbury; a brand of Valmet**]
g. [**Jomar Valve**]
h. [**Lance Valves**]
i. [**Max-Air Technology Inc.**]
j. [**Milwaukee Valve Company**]
k. [**NIBCO INC.**]
l. [**Stockham; a Crane Co. brand**]
m. [**Viega LLC**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Bray International, Inc.**]
c. [**DynaQuip Controls**]
d. [**FNW; Ferguson Enterprises, Inc.**]
e. [**Hammond Valve**]
f. [**Jamesbury; a brand of Valmet**]
g. [**Jomar Valve**]
h. [**Lance Valves**]
i. [**Max-Air Technology Inc.**]
j. [**Milwaukee Valve Company**]
k. [**NIBCO INC.**]
l. [**Stockham; a Crane Co. brand**]
m. [**Viega LLC**]
n. <**Insert manufacturer's name**>

3. Standard: MSS SP-72.
4. CWP Rating: **285 psig (1964 kPa)**.
5. Body Design: Split body.
6. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
7. Ends: Flanged.
8. Seats: PTFE.
9. Stem: Stainless steel.
10. Ball: Stainless steel, vented.
11. Port: Full.

V. Ball Valves, Flanged Ends - Steel, with Full Port and Stainless Steel Trim, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Bray International, Inc.**]
c. [**DynaQuip Controls**]
d. [**FNW; Ferguson Enterprises, Inc.**]
e. [**Hammond Valve**]
f. [**Jamesbury; a brand of Valmet**]
g. [**Jomar Valve**]
h. [**Lance Valves**]
i. [**Milwaukee Valve Company**]
j. [**NIBCO INC.**]
k. [**Stockham; a Crane Co. brand**]
l. [**Viega LLC**]
m. [**WATTS; A Watts Water Technologies Company**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]

b. [**Bray International, Inc.**]
c. [**DynaQuip Controls**]
d. [**FNW; Ferguson Enterprises, Inc.**]
e. [**Hammond Valve**]
f. [**Jamesbury; a brand of Valmet**]
g. [**Jomar Valve**]
h. [**Lance Valves**]
i. [**Milwaukee Valve Company**]
j. [**NIBCO INC.**]
k. [**Stockham; a Crane Co. brand**]
l. [**Viega LLC**]
m. [**WATTS; A Watts Water Technologies Company**]
n. <**Insert manufacturer's name**>

3. Standard: MSS SP-72.
4. CWP Rating: **720 psig (4960 kPa)**.
5. Body Design: Split body.
6. Body Material: Carbon steel, ASTM A216/A216M, Type WCB.
7. Ends: Flanged.
8. Seats: PTFE.
9. Stem: Stainless steel.
10. Ball: Stainless steel, vented.
11. Port: Full.

W. Ball Valves, Flanged Ends - Iron, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**American Valve, Inc**]
   b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   c. [**Sure Flow Equipment Inc**]
   d. [**WATTS; A Watts Water Technologies Company**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Valve, Inc**]
   b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   c. [**Sure Flow Equipment Inc**]
   d. [**WATTS; A Watts Water Technologies Company**]
   e. <**Insert manufacturer's name**>

3. Standard: MSS SP-72.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Design: Split body.
6. Body Material: ASTM A126, gray iron.
7. Ends: Flanged.
8. Seats: PTFE.
9. Stem: Stainless steel.
10. Ball: Stainless steel.
11. Port: Full.

X. Ball Valves, Threaded or Flanged Ends - Stainless Steel, Two Piece with Full Port:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Bray International, Inc.**]
    d. [**FNW; Ferguson Enterprises, Inc.**]
    e. [**Guardian Worldwide LLC.**]
    f. [**Hammond Valve**]
    g. [**Jomar Valve**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Bray International, Inc.**]
    d. [**FNW; Ferguson Enterprises, Inc.**]
    e. [**Guardian Worldwide LLC.**]
    f. [**Hammond Valve**]
    g. [**Jomar Valve**]
    h. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. SWP Rating:**150 psig (1030 kPa)**.
5. WOG Rating: **1000 psig (6895 kPa)**.
6. Body Design: Split body.
7. Body Material: Type 316 stainless steel.
8. Ends: Threaded or flanged. See Part 3 ball valve schedule articles.
9. Seats: PTFE.
10. Stem: Type 316 stainless steel.
11. Ball: Type 316 stainless steel.
12. Port: Full.

Y. Ball Valves - CPVC, Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Valve, Inc**]
    b. [**Asahi/America**]
    c. [**Colonial Engineering, Inc.**]
    d. [**GF Piping Systems: Georg Fischer LLC**]
    e. [**Hayward Flow Control; Hayward Industries, Inc.**]
    f. [**IPEX USA LLC**]
    g. [**Jomar Valve**]
    h. [**Red-White Valve Corp.**]

i. [**Spears Manufacturing Company**]
j. [**Thermoplastic Valves, Inc**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**Colonial Engineering, Inc.**]
d. [**GF Piping Systems: Georg Fischer LLC**]
e. [**Hayward Flow Control; Hayward Industries, Inc.**]
f. [**IPEX USA LLC**]
g. [**Jomar Valve**]
h. [**Red-White Valve Corp.**]
i. [**Spears Manufacturing Company**]
j. [**Thermoplastic Valves, Inc**]
k. <**Insert manufacturer's name**>

3. Standard: MSS SP-122.
4. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
5. Body Material: CPVC.
6. Body Design: Union type.
7. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 ball valve schedule articles.
8. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable socket, socket or threaded, threaded, or flanged. See Part 3 ball valve schedule articles.
9. Ball: CPVC; full port.
10. Seals: PTFE or EPDM-rubber O-rings.
11. Handle: Tee shaped.

Z. Ball Valves - CPVC, Non-Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**Colonial Engineering, Inc.**]
d. [**IPEX USA LLC**]
e. [**Jomar Valve**]
f. [**Red-White Valve Corp.**]
g. [**Spears Manufacturing Company**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**Colonial Engineering, Inc.**]

d. [**IPEX USA LLC**]
e. [**Jomar Valve**]
f. [**Red-White Valve Corp.**]
g. [**Spears Manufacturing Company**]
h. <**Insert manufacturer's name**>

3. Standard: MSS SP-122.
4. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
5. Body Material: CPVC.
6. Body Design: Non-union type.
7. End Connections: Socket or threaded.
8. Ball: CPVC; full or reduced port.
9. Seals: PTFE or EPDM-rubber O-rings.
10. Handle: Tee shaped.

AA. Ball Valves - PVC, Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**American Valve, Inc**]
   b. [**Asahi/America**]
   c. [**Colonial Engineering, Inc.**]
   d. [**GF Piping Systems: Georg Fischer LLC**]
   e. [**Hayward Flow Control; Hayward Industries, Inc.**]
   f. [**IPEX USA LLC**]
   g. [**Jomar Valve**]
   h. [**Red-White Valve Corp.**]
   i. [**Spears Manufacturing Company**]
   j. [**Thermoplastic Valves, Inc**]
   k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Valve, Inc**]
   b. [**Asahi/America**]
   c. [**Colonial Engineering, Inc.**]
   d. [**GF Piping Systems: Georg Fischer LLC**]
   e. [**Hayward Flow Control; Hayward Industries, Inc.**]
   f. [**IPEX USA LLC**]
   g. [**Jomar Valve**]
   h. [**Red-White Valve Corp.**]
   i. [**Spears Manufacturing Company**]
   j. [**Thermoplastic Valves, Inc**]
   k. <**Insert manufacturer's name**>

3. Standard: MSS SP-122.
4. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
5. Body Material: PVC.

6. Body Design: Union type.
7. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 ball valve schedule articles.
8. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable union with socket, socket or threaded, threaded, or flanged. See Part 3 ball valve schedule articles.
9. Ball: PVC; full port.
10. Seals: PTFE or EPDM-rubber O-rings.
11. Handle: Tee shaped.

BB. Ball Valves - PVC, Non-Union Type:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Valve, Inc**]
    b. [**Asahi/America**]
    c. [**Colonial Engineering, Inc.**]
    d. [**IPEX USA LLC**]
    e. [**Jomar Valve**]
    f. [**Red-White Valve Corp.**]
    g. [**Spears Manufacturing Company**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Valve, Inc**]
    b. [**Asahi/America**]
    c. [**Colonial Engineering, Inc.**]
    d. [**IPEX USA LLC**]
    e. [**Jomar Valve**]
    f. [**Red-White Valve Corp.**]
    g. [**Spears Manufacturing Company**]
    h. <**Insert manufacturer's name**>

3. Standard: MSS SP-122.
4. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 ball valve schedule articles.
5. Body Material: PVC.
6. Body Design: Non-union type.
7. End Connections: Socket or threaded.
8. Ball: PVC; full or reduced port.
9. Seals: PTFE or EPDM-rubber O-rings.
10. Handle: Tee shaped.

2.6 BUTTERFLY VALVES

A. Butterfly Valves, Single Flange (Lug Type) - Iron, with Aluminum-Bronze Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bray International, Inc.**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**Zurn Industries, LLC**]
y. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bray International, Inc.**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**Hammond Valve**]
i. [**Jamesbury; a brand of Valmet**]
j. [**Jenkins Valves; a Crane Co. brand**]
k. [**Jomar Valve**]
l. [**Kennedy Valve Company; a division of McWane, Inc.**]
m. [**KITZ Corporation**]
n. [**Lance Valves**]
o. [**Legend Valve & Fitting, Inc**]
p. [**Milwaukee Valve Company**]
q. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]

x. [**Zurn Industries, LLC**]
y. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
8. Stem: One- or two-piece stainless steel.
9. Disc: Aluminum bronze.

B. Butterfly Valves, Single Flange (Lug Type) - Iron, with Ductile-Iron Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bray International, Inc.**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**Mueller Steam Specialty; A Watts Water Technologies Company**]

z. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
8. Stem: One- or two-piece stainless steel.
9. Disc: Nickel-plated[**or -coated**] ductile iron.

C. Butterfly Valves, Single Flange (Lug Type) - Iron, with Stainless Steel Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Bray International, Inc.**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]

h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Max-Air Technology Inc.**]
r. [**Milwaukee Valve Company**]
s. [**Mueller Steam Specialty; A Watts Water Technologies Company**]
t. [**NIBCO INC.**]
u. [**Norriseal**]
v. [**Red-White Valve Corp.**]
w. [**Stockham; a Crane Co. brand**]
x. [**Sure Flow Equipment Inc**]
y. [**Viega LLC**]
z. [**Zurn Industries, LLC**]
aa. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
8. Stem: One- or two-piece stainless steel.
9. Disc: Stainless steel.

D. Butterfly Valves, Flangeless (Wafer Type) - Iron, with Aluminum-Bronze Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABZ Valve; an ASC Engineered Solution**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Bray International, Inc.**]
    d. [**Center Line; a Crane Co. brand**]
    e. [**DeZURIK**]
    f. [**DynaQuip Controls**]
    g. [**Flo Fab Inc**]
    h. [**FNW; Ferguson Enterprises, Inc.**]
    i. [**Hammond Valve**]
    j. [**Jamesbury; a brand of Valmet**]
    k. [**Jenkins Valves; a Crane Co. brand**]
    l. [**Jomar Valve**]
    m. [**Kennedy Valve Company; a division of McWane, Inc.**]
    n. [**KITZ Corporation**]
    o. [**Lance Valves**]
    p. [**Legend Valve & Fitting, Inc**]
    q. [**Milwaukee Valve Company**]
    r. [**NIBCO INC.**]
    s. [**Norriseal**]
    t. [**Red-White Valve Corp.**]
    u. [**Stockham; a Crane Co. brand**]
    v. [**Sure Flow Equipment Inc**]
    w. [**Viega LLC**]
    x. [**Zurn Industries, LLC**]
    y. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABZ Valve; an ASC Engineered Solution**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Bray International, Inc.**]
    d. [**Center Line; a Crane Co. brand**]
    e. [**DeZURIK**]
    f. [**DynaQuip Controls**]
    g. [**Flo Fab Inc**]
    h. [**FNW; Ferguson Enterprises, Inc.**]
    i. [**Hammond Valve**]
    j. [**Jamesbury; a brand of Valmet**]
    k. [**Jenkins Valves; a Crane Co. brand**]
    l. [**Jomar Valve**]
    m. [**Kennedy Valve Company; a division of McWane, Inc.**]
    n. [**KITZ Corporation**]
    o. [**Lance Valves**]
    p. [**Legend Valve & Fitting, Inc**]
    q. [**Milwaukee Valve Company**]
    r. [**NIBCO INC.**]
    s. [**Norriseal**]
    t. [**Red-White Valve Corp.**]

u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**Zurn Industries, LLC**]
y. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
5. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
8. Stem: One- or two-piece stainless steel.
9. Disc: Aluminum bronze.

E. Butterfly Valves, Flangeless (Wafer Type) - Iron, with Ductile-Iron Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bray International, Inc.**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**Zurn Industries, LLC**]
y. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bray International, Inc.**]

d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**Zurn Industries, LLC**]
y. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
5. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
8. Stem: One- or two-piece stainless steel.
9. Disc: Nickel-plated[**or -coated**] ductile iron.

F. Butterfly Valves, Flangeless (Wafer Type) - Iron, with Stainless Steel Disc:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Bray International, Inc.**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]

p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**Zurn Industries, LLC**]
y. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Bray International, Inc.**]
d. [**Center Line; a Crane Co. brand**]
e. [**DeZURIK**]
f. [**DynaQuip Controls**]
g. [**Flo Fab Inc**]
h. [**FNW; Ferguson Enterprises, Inc.**]
i. [**Hammond Valve**]
j. [**Jamesbury; a brand of Valmet**]
k. [**Jenkins Valves; a Crane Co. brand**]
l. [**Jomar Valve**]
m. [**Kennedy Valve Company; a division of McWane, Inc.**]
n. [**KITZ Corporation**]
o. [**Lance Valves**]
p. [**Legend Valve & Fitting, Inc**]
q. [**Milwaukee Valve Company**]
r. [**NIBCO INC.**]
s. [**Norriseal**]
t. [**Red-White Valve Corp.**]
u. [**Stockham; a Crane Co. brand**]
v. [**Sure Flow Equipment Inc**]
w. [**Viega LLC**]
x. [**Zurn Industries, LLC**]
y. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **150 psig (1035 kPa)** or **200 psig (1380 kPa)**. See Part 3 butterfly valve schedule articles.
5. Body Design: Flangeless (wafer type), suitable for bidirectional dead-end service at rated pressure.
6. Body Material: ASTM A126, cast iron or ASTM A536, ductile iron.
7. Seat: EPDM or NBR. See Part 3 butterfly valve schedule articles.
8. Stem: One- or two-piece stainless steel.
9. Disc: Stainless steel.

G. Butterfly Valves, Grooved End - Ductile Iron, 175 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America**]
d. [**Hammond Valve**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**NIBCO INC.**]
g. [**Norriseal**]
h. [**Red-White Valve Corp.**]
i. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
j. [**Victaulic Company**]
k. [**Zurn Industries, LLC**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America**]
d. [**Hammond Valve**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**NIBCO INC.**]
g. [**Norriseal**]
h. [**Red-White Valve Corp.**]
i. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
j. [**Victaulic Company**]
k. [**Zurn Industries, LLC**]
l. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. CWP Rating: **175 psig (1200 kPa)**.
5. Body Material: Coated, ductile iron.
6. Ends: Grooved.
7. Stem: Two-piece stainless steel.
8. Disc: Coated, ductile iron.
9. Seat: EPDM.

H. Butterfly Valves, Grooved End - Ductile Iron, 300 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America**]

d. [**Hammond Valve**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**NIBCO INC.**]
g. [**Norriseal**]
h. [**Red-White Valve Corp.**]
i. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
j. [**Victaulic Company**]
k. [**WATTS; A Watts Water Technologies Company**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Grinnell G-Fire; brand of Johnson Controls International plc, Building Solutions North America**]
d. [**Hammond Valve**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**NIBCO INC.**]
g. [**Norriseal**]
h. [**Red-White Valve Corp.**]
i. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
j. [**Victaulic Company**]
k. [**WATTS; A Watts Water Technologies Company**]
l. <**Insert manufacturer's name**>

3. Standard: MSS SP-67, Type I.
4. NPS 8 (DN 50) and Smaller CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: Coated, ductile iron
6. Ends: Grooved.
7. Stem: Two-piece stainless steel.
8. Disc: Coated, ductile iron.
9. Seat: EPDM.

I. Butterfly Valves, Single Flange (Lug Type) - High Performance, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Flowseal; Crane Energy Flow Solutions**]
f. [**Hammond Valve**]
g. [**Jamesbury; a brand of Valmet**]
h. [**Lance Valves**]
i. [**Milwaukee Valve Company**]
j. [**Stockham; a Crane Co. brand**]
k. [**XOMOX; Crane ChemPharma & Energy**]

l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Flowseal; Crane Energy Flow Solutions**]
f. [**Hammond Valve**]
g. [**Jamesbury; a brand of Valmet**]
h. [**Lance Valves**]
i. [**Milwaukee Valve Company**]
j. [**Stockham; a Crane Co. brand**]
k. [**XOMOX; Crane ChemPharma & Energy**]
l. <**Insert manufacturer's name**>

3. Standard: MSS SP-68.
4. CWP Rating: **285 psig (1965 kPa)** at **100 deg F (38 deg C)**.
5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
6. Body Material: Carbon or stainless steel. See Part 3 butterfly valve schedule articles.
7. Seat: Reinforced PTFE or metal.
8. Stem: Stainless steel; offset from seat plane.
9. Disc: Type 316 stainless steel.
10. Service: Bidirectional.

J. Butterfly Valves, Single Flange (Lug Type) - High Performance, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Flowseal; Crane Energy Flow Solutions**]
f. [**Hammond Valve**]
g. [**Jamesbury; a brand of Valmet**]
h. [**Milwaukee Valve Company**]
i. [**NIBCO INC.**]
j. [**Process Development & Control, Inc.**]
k. [**Stockham; a Crane Co. brand**]
l. [**XOMOX; Crane ChemPharma & Energy**]
m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABZ Valve; an ASC Engineered Solution**]

b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Flowseal; Crane Energy Flow Solutions**]
f. [**Hammond Valve**]
g. [**Jamesbury; a brand of Valmet**]
h. [**Milwaukee Valve Company**]
i. [**NIBCO INC.**]
j. [**Process Development & Control, Inc.**]
k. [**Stockham; a Crane Co. brand**]
l. [**XOMOX; Crane ChemPharma & Energy**]
m. <**Insert manufacturer's name**>

3. Standard: MSS SP-68.
4. CWP Rating: **720 psig (4965 kPa)** at **100 deg F (38 deg C)**.
5. Body Design: Single flange (lug type), suitable for bidirectional dead-end service at rated pressure without use of downstream flange.
6. Body Material: Carbon or stainless steel. See Part 3 butterfly valve schedule articles.
7. Seat: Reinforced PTFE or metal.
8. Stem: Stainless steel; offset from seat plane.
9. Disc: Type 316 stainless steel.
10. Service: Bidirectional.

2.7 CHECK VALVES

A. Check Valves, Lift Type, Threaded Ends - Bronze, with Bronze Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**American Valve, Inc**]
c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
d. [**Crane Fluid Systems; Crane Co.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Jenkins Valves; a Crane Co. brand**]
g. [**Jomar Valve**]
h. [**Keckley Company**]
i. [**Metraflex Company (The)**]
j. [**Milwaukee Valve Company**]
k. [**NIBCO INC.**]
l. [**Stockham; a Crane Co. brand**]
m. [**Val-Matic Valve & Manufacturing Corp.**]
n. [**Victaulic Company**]
o. [**WATTS; A Watts Water Technologies Company**]
p. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**American Valve, Inc**]

c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
d. [**Crane Fluid Systems; Crane Co.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Jenkins Valves; a Crane Co. brand**]
g. [**Jomar Valve**]
h. [**Keckley Company**]
i. [**Metraflex Company (The)**]
j. [**Milwaukee Valve Company**]
k. [**NIBCO INC.**]
l. [**Stockham; a Crane Co. brand**]
m. [**Val-Matic Valve & Manufacturing Corp.**]
n. [**Victaulic Company**]
o. [**WATTS; A Watts Water Technologies Company**]
p. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Design: Vertical flow.
6. Body Material: ASTM B61 or ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: Bronze.

B. Check Valves, Lift Type, Threaded Ends - Bronze, with Nonmetallic Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Crane Fluid Systems; Crane Co.**]
   b. [**Jenkins Valves; a Crane Co. brand**]
   c. [**Jomar Valve**]
   d. [**Keckley Company**]
   e. [**Lance Valves**]
   f. [**Milwaukee Valve Company**]
   g. [**NIBCO INC.**]
   h. [**Red-White Valve Corp.**]
   i. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
   j. [**Stockham; a Crane Co. brand**]
   k. [**Val-Matic Valve & Manufacturing Corp.**]
   l. [**Victaulic Company**]
   m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Crane Fluid Systems; Crane Co.**]
   b. [**Jenkins Valves; a Crane Co. brand**]
   c. [**Jomar Valve**]
   d. [**Keckley Company**]
   e. [**Lance Valves**]
   f. [**Milwaukee Valve Company**]
   g. [**NIBCO INC.**]
   h. [**Red-White Valve Corp.**]

i. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
j. [**Stockham; a Crane Co. brand**]
k. [**Val-Matic Valve & Manufacturing Corp.**]
l. [**Victaulic Company**]
m. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 2.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Design: Vertical flow.
6. Body Material: ASTM B61 or ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: NBR or PTFE.

C. Check Valves, Swing Type, Threaded Ends - Bronze, with Bronze Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Jenkins Valves; a Crane Co. brand**]
d. [**Jomar Valve**]
e. [**Keckley Company**]
f. [**Lance Valves**]
g. [**Milwaukee Valve Company**]
h. [**NIBCO INC.**]
i. [**Red-White Valve Corp.**]
j. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
k. [**Stockham; a Crane Co. brand**]
l. [**Val-Matic Valve & Manufacturing Corp.**]
m. [**Victaulic Company**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Jenkins Valves; a Crane Co. brand**]
d. [**Jomar Valve**]
e. [**Keckley Company**]
f. [**Lance Valves**]
g. [**Milwaukee Valve Company**]
h. [**NIBCO INC.**]
i. [**Red-White Valve Corp.**]
j. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
k. [**Stockham; a Crane Co. brand**]
l. [**Val-Matic Valve & Manufacturing Corp.**]
m. [**Victaulic Company**]
n. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 3.
4. CWP Rating: **200 psig (1380 kPa)**.

5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: Bronze.

D. Check Valves, Swing Type, Threaded Ends - Bronze, with Nonmetallic Disc, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Jenkins Valves; a Crane Co. brand**]
    d. [**Jomar Valve**]
    e. [**Keckley Company**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]
    l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**Jenkins Valves; a Crane Co. brand**]
    d. [**Jomar Valve**]
    e. [**Keckley Company**]
    f. [**Lance Valves**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]
    l. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 4.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: PTFE.

E. Check Valves, Swing Type, Threaded Ends - Bronze, with Bronze Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Jomar Valve**]
g. [**Lance Valves**]
h. [**Legend Valve & Fitting, Inc**]
i. [**Milwaukee Valve Company**]
j. [**NIBCO INC.**]
k. [**Powell Valves**]
l. [**Red-White Valve Corp.**]
m. [**Stockham; a Crane Co. brand**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Jomar Valve**]
g. [**Lance Valves**]
h. [**Legend Valve & Fitting, Inc**]
i. [**Milwaukee Valve Company**]
j. [**NIBCO INC.**]
k. [**Powell Valves**]
l. [**Red-White Valve Corp.**]
m. [**Stockham; a Crane Co. brand**]
n. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 3.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: Bronze.

F. Check Valves, Swing Type, Threaded Ends - Bronze, with Nonmetallic Disc, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crane Fluid Systems; Crane Co.**]
b. [**Jenkins Valves; a Crane Co. brand**]
c. [**Jomar Valve**]
d. [**Lance Valves**]
e. [**Milwaukee Valve Company**]
f. [**NIBCO INC.**]
g. [**Powell Valves**]
h. [**Red-White Valve Corp.**]

i. [**Stockham; a Crane Co. brand**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Crane Fluid Systems; Crane Co.**]
b. [**Jenkins Valves; a Crane Co. brand**]
c. [**Jomar Valve**]
d. [**Lance Valves**]
e. [**Milwaukee Valve Company**]
f. [**NIBCO INC.**]
g. [**Powell Valves**]
h. [**Red-White Valve Corp.**]
i. [**Stockham; a Crane Co. brand**]
j. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 4.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B62, bronze.
7. Ends: Threaded.
8. Disc: PTFE.

G. Check Valves, Swing Type, Press Ends - Bronze:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
d. [**Hammond Valve**]
e. [**Legend Valve & Fitting, Inc**]
f. [**Milwaukee Valve Company**]
g. [**NIBCO INC.**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
d. [**Hammond Valve**]
e. [**Legend Valve & Fitting, Inc**]
f. [**Milwaukee Valve Company**]
g. [**NIBCO INC.**]
h. <**Insert manufacturer's name**>

3. Standard: MSS SP-80.

4. CWP Rating: Minimum **200 psig (1380 kPa)**.
5. Body Design: Horizontal flow.
6. Body Material: ASTM B584, bronze.
7. Ends: Press.
8. Press Ends Connection Rating: Minimum **200 psig (1380 kPa)**.
9. Disc: Brass or bronze.

H. Check Valves, Swing Type, Flanged Ends - Iron, with Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Bray International, Inc.**]
    d. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    e. [**Cooper Valves**]
    f. [**Crane Fluid Systems; Crane Co.**]
    g. [**DeZURIK**]
    h. [**FNW; Ferguson Enterprises, Inc.**]
    i. [**GA Industries, Inc**]
    j. [**Hammond Valve**]
    k. [**Jenkins Valves; a Crane Co. brand**]
    l. [**Jomar Valve**]
    m. [**Kennedy Valve Company; a division of McWane, Inc.**]
    n. [**KITZ Corporation**]
    o. [**Lance Valves**]
    p. [**Milwaukee Valve Company**]
    q. [**Powell Valves**]
    r. [**Victaulic Company**]
    s. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Bray International, Inc.**]
    d. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    e. [**Cooper Valves**]
    f. [**Crane Fluid Systems; Crane Co.**]
    g. [**DeZURIK**]
    h. [**FNW; Ferguson Enterprises, Inc.**]
    i. [**GA Industries, Inc**]
    j. [**Hammond Valve**]
    k. [**Jenkins Valves; a Crane Co. brand**]
    l. [**Jomar Valve**]
    m. [**Kennedy Valve Company; a division of McWane, Inc.**]
    n. [**KITZ Corporation**]
    o. [**Lance Valves**]
    p. [**Milwaukee Valve Company**]
    q. [**Powell Valves**]
    r. [**Victaulic Company**]

s. **<Insert manufacturer's name>**

3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Bronze.
10. Gasket: Asbestos free.

I. Check Valves, Swing Type, Flanged Ends - Iron, with Nonmetallic-to-Metal Seats, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Bray International, Inc.**]
   b. [**Cooper Valves**]
   c. [**Crane Fluid Systems; Crane Co.**]
   d. [**DeZURIK**]
   e. [**Kennedy Valve Company; a division of McWane, Inc.**]
   f. [**KITZ Corporation**]
   g. [**Lance Valves**]
   h. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
   i. [**Victaulic Company**]
   j. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. [**Bray International, Inc.**]
   b. [**Cooper Valves**]
   c. [**Crane Fluid Systems; Crane Co.**]
   d. [**DeZURIK**]
   e. [**Kennedy Valve Company; a division of McWane, Inc.**]
   f. [**KITZ Corporation**]
   g. [**Lance Valves**]
   h. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
   i. [**Victaulic Company**]
   j. **<Insert manufacturer's name>**

3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Composition.
10. Seat Ring: Bronze.
11. Disc Holder: Bronze.

12. Disc: PTFE.
13. Gasket: Asbestos free.

J. Check Valves, Swing Type, Flanged Ends - Iron, with Metal Seats, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Bray International, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Crispin Valve**]
    f. [**DeZURIK**]
    g. [**FNW; Ferguson Enterprises, Inc.**]
    h. [**GA Industries, Inc**]
    i. [**Hammond Valve**]
    j. [**Jenkins Valves; a Crane Co. brand**]
    k. [**KITZ Corporation**]
    l. [**Lance Valves**]
    m. [**Milwaukee Valve Company**]
    n. [**Powell Valves**]
    o. [**Victaulic Company**]
    p. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Bray International, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Crispin Valve**]
    f. [**DeZURIK**]
    g. [**FNW; Ferguson Enterprises, Inc.**]
    h. [**GA Industries, Inc**]
    i. [**Hammond Valve**]
    j. [**Jenkins Valves; a Crane Co. brand**]
    k. [**KITZ Corporation**]
    l. [**Lance Valves**]
    m. [**Milwaukee Valve Company**]
    n. [**Powell Valves**]
    o. [**Victaulic Company**]
    p. <**Insert manufacturer's name**>

3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Bronze.
10. Gasket: Asbestos free.

K. Check Valves, Swing Type, Flanged Ends - Iron, with Lever- and Spring-Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Bray International, Inc.**]
    c. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    d. [**Cooper Valves**]
    e. [**Crispin Valve**]
    f. [**DeZURIK**]
    g. [**GA Industries, Inc**]
    h. [**Kennedy Valve Company; a division of McWane, Inc.**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Bray International, Inc.**]
    c. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    d. [**Cooper Valves**]
    e. [**Crispin Valve**]
    f. [**DeZURIK**]
    g. [**GA Industries, Inc**]
    h. [**Kennedy Valve Company; a division of McWane, Inc.**]
    i. <**Insert manufacturer's name**>

3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Bronze.
10. Gasket: Asbestos free.
11. Closure Control: Factory-installed, exterior lever and spring.

L. Check Valves, Swing Type, Flanged Ends - Iron, with Lever- and Weight-Closure Control, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**ASC Engineered Solutions**]
    c. [**Bray International, Inc.**]
    d. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    e. [**Cooper Valves**]
    f. [**Crispin Valve**]
    g. [**DeZURIK**]

h. [**GA Industries, Inc**]
i. [**Kennedy Valve Company; a division of McWane, Inc.**]
j. [**Milwaukee Valve Company**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**ASC Engineered Solutions**]
c. [**Bray International, Inc.**]
d. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
e. [**Cooper Valves**]
f. [**Crispin Valve**]
g. [**DeZURIK**]
h. [**GA Industries, Inc**]
i. [**Kennedy Valve Company; a division of McWane, Inc.**]
j. [**Milwaukee Valve Company**]
k. <**Insert manufacturer's name**>

3. Standard: MSS SP-71, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Clear or full waterway.
7. Body Material: ASTM A126, gray iron with bolted bonnet.
8. Ends: Flanged.
9. Trim: Bronze.
10. Gasket: Asbestos free.
11. Closure Control: Factory-installed, exterior lever and weight.

M. Check Valves, Swing Type, Grooved End - Iron, 300 CWP:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**DeZURIK**]
e. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
f. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
g. [**Victaulic Company**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**ASC Engineered Solutions**]
d. [**DeZURIK**]

e. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
f. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
g. [**Victaulic Company**]
h. <**Insert manufacturer's name**>

3. CWP Rating: **300 psig (2070 kPa)**.
4. Body Material: ASTM A536, ductile iron.
5. Seat: EPDM.
6. Disc: Spring operated, ductile iron or stainless steel.

N. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cooper Valves**]
d. [**Crispin Valve**]
e. [**DeZURIK**]
f. [**DFT Inc.**]
g. [**Flomatic Valves; Flomatic Corporation**]
h. [**GA Industries, Inc**]
i. [**Keckley Company**]
j. [**KITZ Corporation**]
k. [**Metraflex Company (The)**]
l. [**Milwaukee Valve Company**]
m. [**Val-Matic Valve & Manufacturing Corp.**]
n. [**Victaulic Company**]
o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cooper Valves**]
d. [**Crispin Valve**]
e. [**DeZURIK**]
f. [**DFT Inc.**]
g. [**Flomatic Valves; Flomatic Corporation**]
h. [**GA Industries, Inc**]
i. [**Keckley Company**]
j. [**KITZ Corporation**]
k. [**Metraflex Company (The)**]
l. [**Milwaukee Valve Company**]
m. [**Val-Matic Valve & Manufacturing Corp.**]
n. [**Victaulic Company**]
o. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.

4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Compact wafer.
8. Seat: Bronze.

O. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ASC Engineered Solutions**]
    b. [**Crispin Valve**]
    c. [**DFT Inc.**]
    d. [**Flomatic Valves; Flomatic Corporation**]
    e. [**GA Industries, Inc**]
    f. [**KITZ Corporation**]
    g. [**Metraflex Company (The)**]
    h. [**Milwaukee Valve Company**]
    i. [**Val-Matic Valve & Manufacturing Corp.**]
    j. [**WATTS; A Watts Water Technologies Company**]
    k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ASC Engineered Solutions**]
    b. [**Crispin Valve**]
    c. [**DFT Inc.**]
    d. [**Flomatic Valves; Flomatic Corporation**]
    e. [**GA Industries, Inc**]
    f. [**KITZ Corporation**]
    g. [**Metraflex Company (The)**]
    h. [**Milwaukee Valve Company**]
    i. [**Val-Matic Valve & Manufacturing Corp.**]
    j. [**WATTS; A Watts Water Technologies Company**]
    k. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: Bronze.

P. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cooper Valves**]
d. [**Crispin Valve**]
e. [**DeZURIK**]
f. [**DFT Inc.**]
g. [**Flomatic Valves; Flomatic Corporation**]
h. [**GA Industries, Inc**]
i. [**Keckley Company**]
j. [**KITZ Corporation**]
k. [**Metraflex Company (The)**]
l. [**Victaulic Company**]
m. [**WATTS; A Watts Water Technologies Company**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cooper Valves**]
d. [**Crispin Valve**]
e. [**DeZURIK**]
f. [**DFT Inc.**]
g. [**Flomatic Valves; Flomatic Corporation**]
h. [**GA Industries, Inc**]
i. [**Keckley Company**]
j. [**KITZ Corporation**]
k. [**Metraflex Company (The)**]
l. [**Victaulic Company**]
m. [**WATTS; A Watts Water Technologies Company**]
n. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Compact wafer.
8. Seat: Bronze.

Q. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crispin Valve**]
b. [**DFT Inc.**]
c. [**Flomatic Valves; Flomatic Corporation**]
d. [**GA Industries, Inc**]
e. [**KITZ Corporation**]
f. [**Metraflex Company (The)**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Crispin Valve**]
    b. [**DFT Inc.**]
    c. [**Flomatic Valves; Flomatic Corporation**]
    d. [**GA Industries, Inc**]
    e. [**KITZ Corporation**]
    f. [**Metraflex Company (The)**]
    g. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: Bronze.

R. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Cooper Valves**]
    c. [**DeZURIK**]
    d. [**DFT Inc.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Keckley Company**]
    g. [**Metraflex Company (The)**]
    h. [**Val-Matic Valve & Manufacturing Corp.**]
    i. [**Victaulic Company**]
    j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Cooper Valves**]
    c. [**DeZURIK**]
    d. [**DFT Inc.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Keckley Company**]
    g. [**Metraflex Company (The)**]
    h. [**Val-Matic Valve & Manufacturing Corp.**]
    i. [**Victaulic Company**]
    j. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.

6. Body Material: ASTM A126, gray iron.
7. Style: Compact wafer, spring loaded.
8. Seat: Bronze.

S. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**DFT Inc.**]
    b. [**Flomatic Valves; Flomatic Corporation**]
    c. [**Metraflex Company (The)**]
    d. [**Val-Matic Valve & Manufacturing Corp.**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**DFT Inc.**]
    b. [**Flomatic Valves; Flomatic Corporation**]
    c. [**Metraflex Company (The)**]
    d. [**Val-Matic Valve & Manufacturing Corp.**]
    e. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: Bronze.

T. Check Valves, Center Guided - Iron, Compact Wafer, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Anvil; an ASC Engineered Solution**]
    b. [**Cooper Valves**]
    c. [**Crispin Valve**]
    d. [**DFT Inc.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**Keckley Company**]
    g. [**Metraflex Company (The)**]
    h. [**Victaulic Company**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Anvil; an ASC Engineered Solution**]
b. [**Cooper Valves**]
c. [**Crispin Valve**]
d. [**DFT Inc.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Keckley Company**]
g. [**Metraflex Company (The)**]
h. [**Victaulic Company**]
i. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Compact wafer, spring loaded.
8. Seat: Bronze.

U. Check Valves, Center Guided - Iron, Globe, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crispin Valve**]
b. [**DFT Inc.**]
c. [**Metraflex Company (The)**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Crispin Valve**]
b. [**DFT Inc.**]
c. [**Metraflex Company (The)**]
d. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: Bronze.

V. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Cooper Valves**]
c. [**DeZURIK**]

d. [**DFT Inc.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Val-Matic Valve & Manufacturing Corp.**]
g. [**Victaulic Company**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Cooper Valves**]
c. [**DeZURIK**]
d. [**DFT Inc.**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Val-Matic Valve & Manufacturing Corp.**]
g. [**Victaulic Company**]
h. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Compact wafer.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

W. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**DFT Inc.**]
b. [**Flomatic Valves; Flomatic Corporation**]
c. [**Val-Matic Valve & Manufacturing Corp.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**DFT Inc.**]
b. [**Flomatic Valves; Flomatic Corporation**]
c. [**Val-Matic Valve & Manufacturing Corp.**]
d. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

X. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Cooper Valves**]
   b. [**DeZURIK**]
   c. [**DFT Inc.**]
   d. [**Flomatic Valves; Flomatic Corporation**]
   e. [**GA Industries, Inc**]
   f. [**Val-Matic Valve & Manufacturing Corp.**]
   g. [**Victaulic Company**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Cooper Valves**]
   b. [**DeZURIK**]
   c. [**DFT Inc.**]
   d. [**Flomatic Valves; Flomatic Corporation**]
   e. [**GA Industries, Inc**]
   f. [**Val-Matic Valve & Manufacturing Corp.**]
   g. [**Victaulic Company**]
   h. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Compact wafer.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

Y. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**DFT Inc.**]
   b. [**Flomatic Valves; Flomatic Corporation**]
   c. [**Val-Matic Valve & Manufacturing Corp.**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**DFT Inc.**]
   b. [**Flomatic Valves; Flomatic Corporation**]
   c. [**Val-Matic Valve & Manufacturing Corp.**]
   d. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

Z. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Cooper Valves**]
    b. [**DeZURIK**]
    c. [**DFT Inc.**]
    d. [**Flomatic Valves; Flomatic Corporation**]
    e. [**Val-Matic Valve & Manufacturing Corp.**]
    f. [**Victaulic Company**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Cooper Valves**]
    b. [**DeZURIK**]
    c. [**DFT Inc.**]
    d. [**Flomatic Valves; Flomatic Corporation**]
    e. [**Val-Matic Valve & Manufacturing Corp.**]
    f. [**Victaulic Company**]
    g. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Compact wafer, spring loaded.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

AA. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**DFT Inc.**]
    b. [**Flomatic Valves; Flomatic Corporation**]
    c. [**Val-Matic Valve & Manufacturing Corp.**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**DFT Inc.**]
b. [**Flomatic Valves; Flomatic Corporation**]
c. [**Val-Matic Valve & Manufacturing Corp.**]
d. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Material: ASTM A126, gray iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

BB. Check Valves, Center Guided - Iron, Compact Wafer, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Cooper Valves**]
b. [**DeZURIK**]
c. [**DFT Inc.**]
d. [**Flomatic Valves; Flomatic Corporation**]
e. [**Victaulic Company**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Cooper Valves**]
b. [**DeZURIK**]
c. [**DFT Inc.**]
d. [**Flomatic Valves; Flomatic Corporation**]
e. [**Victaulic Company**]
f. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Compact wafer, spring loaded.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

CC. Check Valves, Center Guided - Iron, Globe, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**DFT Inc.**]

b. [**Flomatic Valves; Flomatic Corporation**]
c. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**DFT Inc.**]
b. [**Flomatic Valves; Flomatic Corporation**]
c. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
d. <**Insert manufacturer's name**>

3. Standard: MSS SP-125.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
7. Style: Globe, spring loaded.
8. Ends: Flanged.
9. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

DD. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Jomar Valve**]
g. [**Keckley Company**]
h. [**Lance Valves**]
i. [**Legend Valve & Fitting, Inc**]
j. [**Metraflex Company (The)**]
k. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
l. [**Stockham; a Crane Co. brand**]
m. [**Sure Flow Equipment Inc**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Flomatic Valves; Flomatic Corporation**]
f. [**Jomar Valve**]
g. [**Keckley Company**]
h. [**Lance Valves**]

i. [**Legend Valve & Fitting, Inc**]
j. [**Metraflex Company (The)**]
k. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
l. [**Stockham; a Crane Co. brand**]
m. [**Sure Flow Equipment Inc**]
n. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A126, gray iron.
8. Seat: Bronze.

EE. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Jomar Valve**]
f. [**Keckley Company**]
g. [**Lance Valves**]
h. [**Legend Valve & Fitting, Inc**]
i. [**Metraflex Company (The)**]
j. [**Stockham; a Crane Co. brand**]
k. [**Sure Flow Equipment Inc**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**Bray International, Inc.**]
d. [**DeZURIK**]
e. [**Jomar Valve**]
f. [**Keckley Company**]
g. [**Lance Valves**]
h. [**Legend Valve & Fitting, Inc**]
i. [**Metraflex Company (The)**]
j. [**Stockham; a Crane Co. brand**]
k. [**Sure Flow Equipment Inc**]
l. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.

8. Seat: Bronze.

FF. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABZ Valve; an ASC Engineered Solution**]
   b. [**Anvil; an ASC Engineered Solution**]
   c. [**Bray International, Inc.**]
   d. [**Keckley Company**]
   e. [**Stockham; a Crane Co. brand**]
   f. [**Sure Flow Equipment Inc**]
   g. [**Val-Matic Valve & Manufacturing Corp.**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABZ Valve; an ASC Engineered Solution**]
   b. [**Anvil; an ASC Engineered Solution**]
   c. [**Bray International, Inc.**]
   d. [**Keckley Company**]
   e. [**Stockham; a Crane Co. brand**]
   f. [**Sure Flow Equipment Inc**]
   g. [**Val-Matic Valve & Manufacturing Corp.**]
   h. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A126, gray iron.
8. Seat: Bronze.

GG. Check Valves, Dual-Plate Type - Iron, with Metal Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABZ Valve; an ASC Engineered Solution**]
   b. [**Anvil; an ASC Engineered Solution**]
   c. [**Bray International, Inc.**]
   d. [**Keckley Company**]
   e. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
   f. [**Sure Flow Equipment Inc**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**ABZ Valve; an ASC Engineered Solution**]
b. [**Anvil; an ASC Engineered Solution**]
c. [**Bray International, Inc.**]
d. [**Keckley Company**]
e. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
f. [**Sure Flow Equipment Inc**]
g. **<Insert manufacturer's name>**

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
8. Seat: Bronze.

HH. Check Valves, Single-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**GA Industries, Inc**]
   b. [**Jomar Valve**]
   c. [**Keckley Company**]
   d. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. [**GA Industries, Inc**]
   b. [**Jomar Valve**]
   c. [**Keckley Company**]
   d. **<Insert manufacturer's name>**

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Wafer, single spring-loaded plate.
7. Body Material: ASTM A126, gray iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

II. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Bray International, Inc.**]
   b. [**Flomatic Valves; Flomatic Corporation**]
   c. [**Keckley Company**]
   d. [**Stockham; a Crane Co. brand**]

e. [**Sure Flow Equipment Inc**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bray International, Inc.**]
b. [**Flomatic Valves; Flomatic Corporation**]
c. [**Keckley Company**]
d. [**Stockham; a Crane Co. brand**]
e. [**Sure Flow Equipment Inc**]
f. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A126, gray iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

JJ. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bray International, Inc.**]
b. [**DeZURIK**]
c. [**Keckley Company**]
d. [**Stockham; a Crane Co. brand**]
e. [**Sure Flow Equipment Inc**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bray International, Inc.**]
b. [**DeZURIK**]
c. [**Keckley Company**]
d. [**Stockham; a Crane Co. brand**]
e. [**Sure Flow Equipment Inc**]
f. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **300 psig (2070 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **250 psig (1725 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

KK. Check Valves, Single-Plate Type - Iron, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**GA Industries, Inc**]
    b. [**Jomar Valve**]
    c. [**Keckley Company**]
    d. [**Victaulic Company**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**GA Industries, Inc**]
    b. [**Jomar Valve**]
    c. [**Keckley Company**]
    d. [**Victaulic Company**]
    e. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Design: Wafer, single spring-loaded plate.
7. Body Material: ASTM A126, gray iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

LL. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Jomar Valve**]
    b. [**Keckley Company**]
    c. [**Stockham; a Crane Co. brand**]
    d. [**Sure Flow Equipment Inc**]
    e. [**Val-Matic Valve & Manufacturing Corp.**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Jomar Valve**]
    b. [**Keckley Company**]
    c. [**Stockham; a Crane Co. brand**]
    d. [**Sure Flow Equipment Inc**]
    e. [**Val-Matic Valve & Manufacturing Corp.**]
    f. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.

6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A126, gray iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

MM. Check Valves, Dual-Plate Type - Iron, with Resilient Seat, Class 300:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Keckley Company**]
    b. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    c. [**Sure Flow Equipment Inc**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Keckley Company**]
    b. [**Shurjoint; a part of Aalberts Integrated Piping Systems**]
    c. [**Sure Flow Equipment Inc**]
    d. <**Insert manufacturer's name**>

3. Standard: API 594.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **400 psig (2760 kPa)**.
6. Body Design: Wafer, spring-loaded plates.
7. Body Material: ASTM A395/A395M or ASTM A536, ductile iron.
8. Seat: EPDM or NBR. See Part 3 check valve schedule articles.

NN. Check Valves - CPVC, Union-Type Ball Check:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Valve, Inc**]
    b. [**Asahi/America**]
    c. [**GF Piping Systems: Georg Fischer LLC**]
    d. [**Hayward Flow Control; Hayward Industries, Inc.**]
    e. [**IPEX USA LLC**]
    f. [**Legend Valve & Fitting, Inc**]
    g. [**NIBCO INC.**]
    h. [**Spears Manufacturing Company**]
    i. [**Thermoplastic Valves, Inc**]
    j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Valve, Inc**]

b. [**Asahi/America**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**Hayward Flow Control; Hayward Industries, Inc.**]
e. [**IPEX USA LLC**]
f. [**Legend Valve & Fitting, Inc**]
g. [**NIBCO INC.**]
h. [**Spears Manufacturing Company**]
i. [**Thermoplastic Valves, Inc**]
j. <**Insert manufacturer's name**>

3. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 check valve schedule articles.
4. Body Material: CPVC.
5. Body Design: Union-type ball check.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 check valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable, socket, socket or threaded, threaded, flanged. See Part 3 check valve schedule articles.
8. Ball: CPVC.
9. Seals: EPDM- or FKM-rubber O-rings.

OO. Check Valves - PVC, Union-Type Ball Check:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**Hayward Flow Control; Hayward Industries, Inc.**]
e. [**IPEX USA LLC**]
f. [**Legend Valve & Fitting, Inc**]
g. [**NIBCO INC.**]
h. [**Spears Manufacturing Company**]
i. [**Thermoplastic Valves, Inc**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Valve, Inc**]
b. [**Asahi/America**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**Hayward Flow Control; Hayward Industries, Inc.**]
e. [**IPEX USA LLC**]
f. [**Legend Valve & Fitting, Inc**]
g. [**NIBCO INC.**]
h. [**Spears Manufacturing Company**]
i. [**Thermoplastic Valves, Inc**]
j. <**Insert manufacturer's name**>

3. Pressure Rating and Temperature: **125 psig (860 kPa)** **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 check valve schedule articles.

4. Body Material: PVC.
5. Body Design: Union-type ball check.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Detachable, socket or threaded. See Part 3 check valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Detachable, socket, socket or threaded, threaded, flanged. See Part 3 check valve schedule articles.
8. Ball: PVC.
9. Seals: EPDM- or FKM-rubber O-rings.

2.8 GATE VALVES

A. Gate Valves, Threaded or Soldered Ends - Bronze, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Valve, Inc**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Crane Fluid Systems; Crane Co.**]
    d. [**FNW; Ferguson Enterprises, Inc.**]
    e. [**Jenkins Valves; a Crane Co. brand**]
    f. [**KITZ Corporation**]
    g. [**Lance Valves**]
    h. [**Milwaukee Valve Company**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]
    l. [**WATTS; A Watts Water Technologies Company**]
    m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Valve, Inc**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**Crane Fluid Systems; Crane Co.**]
    d. [**FNW; Ferguson Enterprises, Inc.**]
    e. [**Jenkins Valves; a Crane Co. brand**]
    f. [**KITZ Corporation**]
    g. [**Lance Valves**]
    h. [**Milwaukee Valve Company**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]
    l. [**WATTS; A Watts Water Technologies Company**]
    m. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
6. Ends: Threaded or soldered. See Part 3 gate valve schedule articles.

7. Stem: Bronze.
8. Disc: Solid wedge; bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[**, bronze, or aluminum**].

B. Gate Valves, Threaded or Soldered Ends - Bronze, RS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**FNW; Ferguson Enterprises, Inc.**]
    d. [**Hammond Valve**]
    e. [**Jenkins Valves; a Crane Co. brand**]
    f. [**KITZ Corporation**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]
    l. [**WATTS; A Watts Water Technologies Company**]
    m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**FNW; Ferguson Enterprises, Inc.**]
    d. [**Hammond Valve**]
    e. [**Jenkins Valves; a Crane Co. brand**]
    f. [**KITZ Corporation**]
    g. [**Milwaukee Valve Company**]
    h. [**NIBCO INC.**]
    i. [**Powell Valves**]
    j. [**Red-White Valve Corp.**]
    k. [**Stockham; a Crane Co. brand**]
    l. [**WATTS; A Watts Water Technologies Company**]
    m. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 2.
4. CWP Rating: **200 psig (1380 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and screw-in bonnet.
6. Ends: Threaded or soldered. See Part 3 gate valve schedule articles.
7. Stem: Bronze.
8. Disc: Solid wedge; bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron, bronze, or aluminum.

C. Gate Valves, Threaded Ends - Bronze, NRS, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]
f. [**Lance Valves**]
g. [**Milwaukee Valve Company**]
h. [**Powell Valves**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**WATTS; A Watts Water Technologies Company**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Valve, Inc**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]
f. [**Lance Valves**]
g. [**Milwaukee Valve Company**]
h. [**Powell Valves**]
i. [**Red-White Valve Corp.**]
j. [**Stockham; a Crane Co. brand**]
k. [**WATTS; A Watts Water Technologies Company**]
l. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 1.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: Solid wedge, bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[**, bronze, or aluminum**].

D. Gate Valves, Threaded Ends - Bronze, RS, Class 150:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Hammond Valve**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]

f. [**Milwaukee Valve Company**]
g. [**Powell Valves**]
h. [**Stockham; a Crane Co. brand**]
i. [**WATTS; A Watts Water Technologies Company**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**Hammond Valve**]
d. [**Jenkins Valves; a Crane Co. brand**]
e. [**KITZ Corporation**]
f. [**Milwaukee Valve Company**]
g. [**Powell Valves**]
h. [**Stockham; a Crane Co. brand**]
i. [**WATTS; A Watts Water Technologies Company**]
j. <**Insert manufacturer's name**>

3. Standard: MSS SP-80, Type 2.
4. CWP Rating: **300 psig (2070 kPa)**.
5. Body Material: ASTM B62, bronze with integral seat and union-ring bonnet.
6. Ends: Threaded.
7. Stem: Bronze.
8. Disc: Solid wedge, bronze.
9. Packing: Asbestos free.
10. Handwheel: Malleable iron[**, bronze, or aluminum**].

E. Gate Valves, Press Ends - Bronze:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
c. [**Hammond Valve**]
d. [**Milwaukee Valve Company**]
e. [**NIBCO INC.**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
c. [**Hammond Valve**]
d. [**Milwaukee Valve Company**]
e. [**NIBCO INC.**]
f. <**Insert manufacturer's name**>

3. Standard: MSS SP-80.

4. CWP Rating: Minimum **200 psig (1380 kPa)**.
5. Body Material: Bronze with integral seat and union-ring bonnet.
6. Ends: Press.
7. Press Ends Connection Rating: Minimum **200 psig (1380 kPa)**.
8. Stem: Brass or bronze RS or NRS. See Part 3 gate valve schedule articles.
9. Disc: Solid wedge, bronze.
10. Packing: Graphite.
11. Port: Full.
12. Handwheel: Malleable iron, bronze, or aluminum.

F. Gate Valves, Flanged Ends - Iron, NRS, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**FNW; Ferguson Enterprises, Inc.**]
    g. [**Jenkins Valves; a Crane Co. brand**]
    h. [**Jomar Valve**]
    i. [**Kennedy Valve Company; a division of McWane, Inc.**]
    j. [**KITZ Corporation**]
    k. [**Lance Valves**]
    l. [**Legend Valve & Fitting, Inc**]
    m. [**Powell Valves**]
    n. [**Zurn Industries, LLC**]
    o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**FNW; Ferguson Enterprises, Inc.**]
    g. [**Jenkins Valves; a Crane Co. brand**]
    h. [**Jomar Valve**]
    i. [**Kennedy Valve Company; a division of McWane, Inc.**]
    j. [**KITZ Corporation**]
    k. [**Lance Valves**]
    l. [**Legend Valve & Fitting, Inc**]
    m. [**Powell Valves**]
    n. [**Zurn Industries, LLC**]
    o. <**Insert manufacturer's name**>

3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.

5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

G. Gate Valves, Flanged Ends - Iron, OS&Y, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**FNW; Ferguson Enterprises, Inc.**]
    d. [**Hammond Valve**]
    e. [**Jomar Valve**]
    f. [**Kennedy Valve Company; a division of McWane, Inc.**]
    g. [**KITZ Corporation**]
    h. [**Lance Valves**]
    i. [**Legend Valve & Fitting, Inc**]
    j. [**Milwaukee Valve Company**]
    k. [**Powell Valves**]
    l. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
    m. [**WATTS; A Watts Water Technologies Company**]
    n. [**Zurn Industries, LLC**]
    o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Crane Fluid Systems; Crane Co.**]
    c. [**FNW; Ferguson Enterprises, Inc.**]
    d. [**Hammond Valve**]
    e. [**Jomar Valve**]
    f. [**Kennedy Valve Company; a division of McWane, Inc.**]
    g. [**KITZ Corporation**]
    h. [**Lance Valves**]
    i. [**Legend Valve & Fitting, Inc**]
    j. [**Milwaukee Valve Company**]
    k. [**Powell Valves**]
    l. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
    m. [**WATTS; A Watts Water Technologies Company**]
    n. [**Zurn Industries, LLC**]
    o. <**Insert manufacturer's name**>

3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Material: ASTM A126, gray iron with bolted bonnet.

7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

H. Gate Valves, Flanged Ends - Iron, NRS, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**FNW; Ferguson Enterprises, Inc.**]
    g. [**Jenkins Valves; a Crane Co. brand**]
    h. [**KITZ Corporation**]
    i. [**Victaulic Company**]
    j. [**Zurn Industries, LLC**]
    k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Clow Valve Company; a subsidiary of McWane, Inc.**]
    c. [**Cooper Valves**]
    d. [**Crane Fluid Systems; Crane Co.**]
    e. [**Flomatic Valves; Flomatic Corporation**]
    f. [**FNW; Ferguson Enterprises, Inc.**]
    g. [**Jenkins Valves; a Crane Co. brand**]
    h. [**KITZ Corporation**]
    i. [**Victaulic Company**]
    j. [**Zurn Industries, LLC**]
    k. <**Insert manufacturer's name**>

3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

I. Gate Valves, Flanged Ends - Iron, OS&Y, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**KITZ Corporation**]
f. [**Milwaukee Valve Company**]
g. [**Powell Valves**]
h. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
i. [**Victaulic Company**]
j. [**WATTS; A Watts Water Technologies Company**]
k. [**Zurn Industries, LLC**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Crane Fluid Systems; Crane Co.**]
c. [**FNW; Ferguson Enterprises, Inc.**]
d. [**Hammond Valve**]
e. [**KITZ Corporation**]
f. [**Milwaukee Valve Company**]
g. [**Powell Valves**]
h. [**Tyco Fire Products; brand of Johnson Controls International plc, Building Solutions North America**]
i. [**Victaulic Company**]
j. [**WATTS; A Watts Water Technologies Company**]
k. [**Zurn Industries, LLC**]
l. <**Insert manufacturer's name**>

3. Standard: MSS SP-70, Type I.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **500 psig (3450 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Material: ASTM A126, gray iron with bolted bonnet.
7. Ends: Flanged.
8. Trim: Bronze.
9. Disc: Solid wedge.
10. Packing and Gasket: Asbestos free.

J. Gate Valves - CPVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Asahi/America**]
b. [**KITZ Corporation**]
c. [**Spears Manufacturing Company**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Asahi/America**]
b. [**KITZ Corporation**]
c. [**Spears Manufacturing Company**]
d. <**Insert manufacturer's name**>

3. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 gate valve schedule articles.
4. Body Material: CPVC.
5. Body Design: NRS.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Socket or threaded. See Part 3 gate valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Socket, socket or threaded, threaded, or flanged. See Part 3 gate valve schedule articles.
8. Gate and Stem: Plastic.
9. Seals: EPDM rubber.
10. Handle: Wheel.

K. Gate Valves - PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Asahi/America**]
b. [**KITZ Corporation**]
c. [**Spears Manufacturing Company**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Asahi/America**]
b. [**KITZ Corporation**]
c. [**Spears Manufacturing Company**]
d. <**Insert manufacturer's name**>

3. Pressure Rating and Temperature: **125 psig (860 kPa)**, **150 psig (1035 kPa)**, or other pressure at **73 deg F (23 deg C)** or other temperature. See Part 3 gate valve schedule articles.
4. Body Material: PVC.
5. Body Design: NRS.
6. End Connections for Valves NPS 2 (DN 50) and Smaller: Socket or threaded. See Part 3 gate valve schedule articles.
7. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].
8. Gate and Stem: Plastic.
9. Seals: EPDM rubber.
10. Handle: Wheel.

2.9 PLUG VALVES

A. Plug Valves, Lubricated Type, Threaded Ends - Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**American Valve, Inc**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**DeZURIK**]
    e. [**Flowserve Corporation**]
    f. [**Homestead Valve: a division of Olson Technologies, Inc.**]
    g. [**Nordstrom; a Flowserve Corporation brand**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**A.Y. McDonald Mfg. Co.**]
    b. [**American Valve, Inc**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**DeZURIK**]
    e. [**Flowserve Corporation**]
    f. [**Homestead Valve: a division of Olson Technologies, Inc.**]
    g. [**Nordstrom; a Flowserve Corporation brand**]
    h. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type I, single gland.
4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **200 psig (1380 kPa)**.
5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

B. Plug Valves, Lubricated Type, Flanged Ends - Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Crispin Valve**]
    b. [**DeZURIK**]
    c. [**Flomatic Valves; Flomatic Corporation**]
    d. [**Flowserve Corporation**]
    e. [**GA Industries, Inc**]
    f. [**Homestead Valve: a division of Olson Technologies, Inc.**]
    g. [**Kennedy Valve Company; a division of McWane, Inc.**]
    h. [**National Oilwell Varco**]
    i. [**NIBCO INC.**]
    j. [**Nordstrom; a Flowserve Corporation brand**]
    k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Crispin Valve**]

b. [**DeZURIK**]
c. [**Flomatic Valves; Flomatic Corporation**]
d. [**Flowserve Corporation**]
e. [**GA Industries, Inc**]
f. [**Homestead Valve: a division of Olson Technologies, Inc.**]
g. [**Kennedy Valve Company; a division of McWane, Inc.**]
h. [**National Oilwell Varco**]
i. [**NIBCO INC.**]
j. [**Nordstrom; a Flowserve Corporation brand**]
k. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type I single gland or Type II regular gland. See Part 3 plug valve schedule articles.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **150 psig (1035 kPa)**.
6. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
7. Plug: Cast iron or bronze with sealant groove.

C. Plug Valves, Lubricated Type, Threaded Ends - Cylindrical, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Flowserve Corporation**]
b. [**Homestead Valve: a division of Olson Technologies, Inc.**]
c. [**National Oilwell Varco**]
d. [**Nordstrom; a Flowserve Corporation brand**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Flowserve Corporation**]
b. [**Homestead Valve: a division of Olson Technologies, Inc.**]
c. [**National Oilwell Varco**]
d. [**Nordstrom; a Flowserve Corporation brand**]
e. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type IV.
4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **200 psig (1380 kPa)**.
5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

D. Plug Valves, Lubricated Type, Flanged Ends - Cylindrical, Class 125:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Flomatic Valves; Flomatic Corporation**]
b. [**Flowserve Corporation**]

c. [**Homestead Valve: a division of Olson Technologies, Inc.**]
d. [**National Oilwell Varco**]
e. [**Nordstrom; a Flowserve Corporation brand**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Flomatic Valves; Flomatic Corporation**]
b. [**Flowserve Corporation**]
c. [**Homestead Valve: a division of Olson Technologies, Inc.**]
d. [**National Oilwell Varco**]
e. [**Nordstrom; a Flowserve Corporation brand**]
f. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type IV.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **200 psig (1380 kPa)**.
5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

E. Plug Valves, Lubricated Type, Threaded Ends - Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**DeZURIK**]
b. [**Homestead Valve: a division of Olson Technologies, Inc.**]
c. [**National Oilwell Varco**]
d. [**Nordstrom; a Flowserve Corporation brand**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**DeZURIK**]
b. [**Homestead Valve: a division of Olson Technologies, Inc.**]
c. [**National Oilwell Varco**]
d. [**Nordstrom; a Flowserve Corporation brand**]
e. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type I single gland or Type II regular gland. See Part 3 plug valve schedule articles.
4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **400 psig (2760 kPa)**.
5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

F. Plug Valves, Lubricated Type, Flanged Ends - Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crispin Valve**]
b. [**DeZURIK**]
c. [**Flowserve Corporation**]
d. [**Homestead Valve: a division of Olson Technologies, Inc.**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**National Oilwell Varco**]
g. [**Nordstrom; a Flowserve Corporation brand**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Crispin Valve**]
b. [**DeZURIK**]
c. [**Flowserve Corporation**]
d. [**Homestead Valve: a division of Olson Technologies, Inc.**]
e. [**Kennedy Valve Company; a division of McWane, Inc.**]
f. [**National Oilwell Varco**]
g. [**Nordstrom; a Flowserve Corporation brand**]
h. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type I single gland or Type II regular gland. See Part 3 plug valve schedule articles.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. CWP Rating, NPS 14 to NPS 24 (DN 350 to DN 600): **300 psig (2070 kPa)**.
6. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
7. Plug: Cast iron or bronze with sealant groove.

G. Plug Valves, Lubricated Type, Threaded Ends - Cylindrical, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Flowserve Corporation**]
b. [**National Oilwell Varco**]
c. [**Nordstrom; a Flowserve Corporation brand**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Flowserve Corporation**]
b. [**National Oilwell Varco**]
c. [**Nordstrom; a Flowserve Corporation brand**]
d. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type IV.
4. CWP Rating, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **400 psig (2760 kPa)**.
5. Body Material: ASTM A48/A48M or ASTM A126, cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

H. Plug Valves, Lubricated Type, Flanged Ends - Cylindrical, Class 250:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Flowserve Corporation**]
   b. [**National Oilwell Varco**]
   c. [**Nordstrom; a Flowserve Corporation brand**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Flowserve Corporation**]
   b. [**National Oilwell Varco**]
   c. [**Nordstrom; a Flowserve Corporation brand**]
   d. <**Insert manufacturer's name**>

3. Standard: MSS SP-78, Type IV.
4. CWP Rating, NPS 2-1/2 to NPS 12 (DN 65 to DN 300): **400 psig (2760 kPa)**.
5. Body Material: ASTM A48/A48M or ASTM A126, Grade 40 cast iron with lubrication-sealing system.
6. Plug: Cast iron or bronze with sealant groove.

I. Plug Valves, Eccentric Type, Flanged Ends - with Resilient Seat, 175 CWP.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. Clow Valve Company; a subsidiary of McWane, Inc.
   b. DeZURIK.
   c. Flowserve Corporation.
   d. GA Industries, Inc.
   e. Homestead Valve: a division of Olson Technologies, Inc.
   f. Kennedy Valve Company; a division of McWane, Inc.
   g. Milliken Valve Company; a Mueller brand.
   h. National Oilwell Varco.
   i. Nordstrom; a Flowserve Corporation brand.
   j. Val-Matic Valve & Manufacturing Corp.
   k. <**Insert manufacturer's name**>.

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:
3. Standard: MSS SP-108.
4. CWP Rating: **175 psig (1200 kPa)** minimum.
5. Body and Plug: ASTM A48/A48M, gray iron; ASTM A126, gray iron; or ASTM A536, ductile iron.
6. Bearings: Oil-impregnated bronze or stainless steel.
7. Ends: Flanged.
8. Stem-Seal Packing: Asbestos free.
9. Plug, Resilient-Seat Material: Suitable for potable-water service unless otherwise indicated.

2.10 CHAINWHEELS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
2. [**Babbitt Steam Specialty Co**]
3. [**Roto Hammer Industries; Rotork**]
4. [**Trumbull Industries**]
5. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
2. [**Babbitt Steam Specialty Co**]
3. [**Roto Hammer Industries; Rotork**]
4. [**Trumbull Industries**]
5. <**Insert manufacturer's name**>

C. Description: Valve actuation assembly with sprocket rim, chain guides, chain[**, and attachment brackets for mounting chainwheels directly to handwheels**].

1. Sprocket Rim with Chain Guides: [**Ductile iron**][**Ductile or cast iron**][**Cast iron**][**Aluminum**][**Bronze**], of type and size required for valve.[**Include zinc or epoxy coating.**]
2. Chain: [**Hot-dip, galvanized steel**][**Brass**][**Stainless steel**], of size required to fit sprocket rim.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine valve interior for cleanliness, freedom from foreign matter, and corrosion. Remove special packing materials, such as blocks, used to prevent disc movement during shipping and handling.

B. Operate valves in positions from fully open to fully closed. Examine guides and seats made accessible by such operations.

C. Examine threads on valve and mating pipe for form and cleanliness.

D. Examine mating flange faces for conditions that might cause leakage. Check bolting for proper size, length, and material. Verify that gasket is of proper size, that its material composition is suitable for service, and that it is free from defects and damage.

E. Examine press fittings to verify they have been properly pressed.

F. Do not attempt to repair defective valves; replace with new valves. Remove defective valves from site.

3.2 INSTALLATION OF VALVES

A. Install valves with unions or flanges at each piece of equipment arranged to allow service, maintenance,

and equipment removal without system shutdown.

B. Provide support of piping adjacent to valves such that no force is imposed upon valves.

C. Locate valves for easy access and where not blocked by equipment, other piping, or building components.

D. For valves in horizontal piping, install valves with stem at or above center of pipe.

E. Install valves in position that does not project into aisles or block access to other equipment.

F. Install valves in position to allow full stem and actuator or manual operator movement.

G. Verify that joints of each valve have been properly installed and sealed to ensure that there is no leakage or damage.

H. Chainwheels: Install chainwheels on manual operators for [**globe**][**butterfly**][**gate**][**and**][**plug**] valves [**NPS 4 (DN 100)**]<**Insert pipe size**> and larger and more than [**96 inches (2400 mm)**]<**Insert dimension**> above floor. Extend chains to [**60 inches (1520 mm)**]<**Insert dimension**> above finished floor.

I. Install check valves for proper direction of flow and as follows:

1. Check Valves: [**Center-guided type**][**and**][**plate type**], in horizontal or vertical position, between flanges.
2. Check Valves, Swing Type: In horizontal position with hinge pin level.
3. Check Valves, Lift Type: With stem upright and plumb.

J. Valve Tags: Comply with requirements for valve tags and schedules in Section 230553 "Identification for HVAC Piping and Equipment."

K. Adhere to manufacturer's written installation instructions. When soldering or brazing valves, do not heat valves above maximum permitted temperature. Do not use solder with melting point temperature above valve of manufacturer's written recommended maximum.

3.3 ADJUSTING

A. Adjust or replace valve packing after piping systems have been tested and put into service, but before final adjusting and balancing. Replace valves if persistent leaking occurs.

3.4 GENERAL REQUIREMENTS FOR VALVE APPLICATIONS

A. If valves with specified SWP classes or CWP ratings are unavailable, the same types of valves with higher SWP classes or CWP ratings may be substituted.

B. Select valves with the following end connections:

1. For Copper Tubing, NPS 2 (DN 50) and Smaller: Threaded ends except where solder-joint valve-end option is indicated in valve schedules.
2. For Copper Tubing, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Flanged ends except where threaded valve-end option is indicated in valve schedules.
3. For Copper Tubing, NPS 5 (DN 125) and Larger: Flanged ends.
4. For Steel Piping, NPS 2 (DN 50) and Smaller: Threaded ends.

5. For Steel Piping, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Flanged ends except where threaded valve-end option is indicated in valve schedules.
6. For Steel Piping, NPS 5 (DN 125) and Larger: Flanged ends.
7. For Grooved-End Copper Tubing, except Steam and Steam Condensate Piping: Valve ends may be grooved.
8. For Grooved-End Steel Piping, except Steam and Steam Condensate Piping: Valve ends may be grooved.
9. Wafer-Type Valves: Flanged connections.

3.5 CHILLED-WATER ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; [**threaded**][**soldered**] ends.
4. Globe valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.6 CONDENSER-WATER ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; [**threaded**][**soldered**] ends.
4. Globe valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.7 HEATING-WATER ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; [**threaded**][**soldered**] ends.
4. Globe valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.8 LOW-PRESSURE STEAM ANGLE OR GLOBE VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; threaded ends.
4. Globe valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.9 HIGH-PRESSURE STEAM ANGLE OR GLOBE VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; threaded ends.
4. Globe valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.10 STEAM-CONDENSATE ANGLE OR GLOBE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Angle valves, threaded ends - bronze, Class 125.
2. Angle valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.
3. Globe valves, threaded or soldered ends - bronze, Class 125; threaded ends.
4. Globe valves, threaded ends - bronze, Class 150; [**PTFE**][**stainless steel**] disc.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Globe valves, flanged ends - iron, Class 125.
2. Globe valves, flanged ends - iron, Class 250.

3.11 CHILLED-WATER BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, one piece.
2. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; [**threaded**][**soldered**] ends.
3. Ball valves, press ends - brass, two piece with full port and brass trim.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.

5. Ball valves, press ends - brass, two piece with full port and stainless steel trim.
6. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; [**threaded**][**soldered**] ends.
7. Ball valves, threaded or soldered ends - brass, two piece with regular port and stainless steel trim; [**threaded**][**soldered**] ends.
8. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; [**threaded**][**soldered**] ends.
9. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
10. Ball valves, threaded ends - bronze, one piece with bronze trim.
11. Ball valves, threaded ends - bronze, one piece with stainless steel trim.
12. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; [**threaded**][**soldered**] ends.
13. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
14. Ball valves, threaded or soldered ends - bronze, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
15. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
16. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
17. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
18. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
19. Ball valves, threaded or soldered ends - bronze, three piece with regular port and bronze or brass trim; [**threaded**][**soldered**] ends.
20. Ball valves, threaded or soldered ends - bronze, three piece with regular port and stainless steel trim; [**threaded**][**soldered**] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.12 COOLING-COIL CONDENSATE BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; [**threaded**][**soldered**] ends.
2. Ball valves, press ends - brass, two piece with full port and brass trim.
3. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; [**threaded**][**soldered**] ends.
4. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; [**threaded**][**soldered**] ends.
5. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
6. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.

B. For CPVC Pipe:

1. CPVC Union-Type Ball Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

    a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
    b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

C. For PVC Pipe:

1. PVC Union-Type Ball Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

   a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
   b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

3.13 CONDENSER-WATER BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, one piece.
2. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; [**threaded**][**soldered**] ends.
3. Ball valves, press ends - brass, two piece with full port and brass trim.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
5. Ball valves, press ends - brass, two piece with full port and stainless steel trim.
6. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; [**threaded**][**soldered**] ends.
7. Ball valves, threaded or soldered ends - brass, two piece with regular port and stainless steel trim; [**threaded**][**soldered**] ends.
8. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; [**threaded**][**soldered**] ends.
9. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
10. Ball valves, threaded ends - bronze, one piece with bronze trim.
11. Ball valves, threaded ends - bronze, one piece with stainless steel trim.
12. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; [**threaded**][**soldered**] ends.
13. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
14. Ball valves, threaded or soldered ends - bronze, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
15. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
16. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
17. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
18. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
19. Ball valves, threaded or soldered ends - bronze, three piece with regular port and bronze or brass trim; [**threaded**][**soldered**] ends.
20. Ball valves, threaded or soldered ends - bronze, three piece with regular port and stainless steel trim; [**threaded**][**soldered**] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

C. For CPVC Pipe:

1. CPVC Union-Type Ball Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F**

(23 deg C)]<**Insert temperature**>.

a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

D. For PVC Pipe:

1. PVC Union-Type Ball Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

3.14 HEATING-WATER BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, one piece.
2. Ball valves, threaded or soldered ends - brass, two piece with full port and brass trim; [**threaded**][**soldered**] ends.
3. Ball valves, press ends - brass, two piece with full port and brass trim.
4. Ball valves, threaded or soldered ends - brass, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
5. Ball valves, press ends - brass, two piece with full port and stainless steel trim.
6. Ball valves, threaded or soldered ends - brass, two piece with regular port and brass trim; [**threaded**][**soldered**] ends.
7. Ball valves, threaded or soldered ends - brass, two piece with regular port and stainless steel trim; [**threaded**][**soldered**] ends.
8. Ball valves, threaded or soldered ends - brass, three piece with full port and brass trim; [**threaded**][**soldered**] ends.
9. Ball valves, threaded or soldered ends - brass, three piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
10. Ball valves, threaded ends - bronze, one piece with bronze trim.
11. Ball valves, threaded ends - bronze, one piece with stainless steel trim.
12. Ball valves, threaded or soldered ends - bronze, two piece with full port and bronze or brass trim; [**threaded**][**soldered**] ends.
13. Ball valves, press ends - bronze, two piece with full port and bronze or brass trim.
14. Ball valves, threaded or soldered ends - bronze, two piece with full port and stainless steel trim; [**threaded**][**soldered**] ends.
15. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
16. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
17. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
18. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
19. Ball valves, threaded or soldered ends - bronze, three piece with regular port and bronze or brass trim; [**threaded**][**soldered**] ends.
20. Ball valves, threaded or soldered ends - bronze, three piece with regular port and stainless steel trim; [**threaded**][**soldered**] ends.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.

2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.15 LOW-PRESSURE STEAM BALL VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, two piece with full port and brass trim.
2. Ball valves, threaded - brass, two piece with full port and stainless steel trim.
3. Ball valves, threaded - brass, two piece with regular port and brass trim.
4. Ball valves, threaded ends - brass, two piece with regular port and stainless steel trim.
5. Ball valves, threaded ends - brass, three piece with full port and brass trim.
6. Ball valves, threaded ends - brass, three piece with full port and stainless steel trim.
7. Ball valves, threaded ends - bronze, two piece with full port and bronze or brass trim.
8. Ball valves, threaded ends - bronze, two piece with full port and stainless steel trim.
9. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
10. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
11. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
12. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
13. Ball valves, threaded ends - bronze, three piece with regular port and bronze or brass trim.
14. Ball valves, threaded ends - bronze, three piece with regular port and stainless steel trim.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.16 LOW-PRESSURE CLEAN STEAM BALL VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller: Ball valves, threaded ends - stainless steel, two piece with full port.

B. Pipe NPS 2-1/2 (DN 65) and Larger: Ball valves, flanged ends - stainless steel, two piece with full port.

3.17 HIGH-PRESSURE STEAM BALL VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, two piece with full port and brass trim.
2. Ball valves, threaded ends - brass, two piece with full port and stainless steel trim.
3. Ball valves, threaded ends - brass, two piece with regular port and brass trim.
4. Ball valves, threaded ends - brass, two piece with regular port and stainless steel trim.
5. Ball valves, threaded ends - brass, three piece with full port and brass trim.
6. Ball valves, threaded ends - brass, three piece with full port and stainless steel trim.
7. Ball valves, threaded ends - bronze, two piece with full port and bronze or brass trim.
8. Ball valves, threaded ends - bronze, two piece with full port and stainless steel trim.
9. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
10. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
11. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
12. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
13. Ball valves, threaded ends - bronze, three piece with regular port and bronze or brass trim.
14. Ball valves, threaded ends - bronze, three piece with regular port and stainless steel trim.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.18 HIGH-PRESSURE CLEAN STEAM BALL VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2 (DN 50) and Smaller: Ball valves, threaded ends - stainless steel, two piece with full port.

B. Pipe NPS 2-1/2 (DN 65) and Larger: Ball valves, flanged ends - stainless steel, two piece with full port.

3.19 STEAM-CONDENSATE BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Ball valves, threaded ends - brass, two piece with full port and brass trim.
2. Ball valves, threaded ends - brass, two piece with full port and stainless steel trim.
3. Ball valves, threaded ends - brass, two piece with regular port and brass trim.
4. Ball valves, threaded ends - brass, two piece with regular port and stainless steel trim.
5. Ball valves, threaded ends - brass, three piece with full port and brass trim.
6. Ball valves, threaded ends - brass, three piece with full port and stainless steel trim.
7. Ball valves, threaded ends - bronze, two piece with full port and bronze or brass trim.
8. Ball valves, threaded ends - bronze, two piece with full port and stainless steel trim.
9. Ball valves, threaded ends - bronze, two piece with regular port and bronze or brass trim.
10. Ball valves, threaded ends - bronze, two piece with regular port and stainless steel trim.
11. Ball valves, threaded ends - bronze, three piece with full port and bronze or brass trim.
12. Ball valves, threaded ends - bronze, three piece with full port and stainless steel trim.
13. Ball valves, threaded ends - bronze, three piece with regular port and bronze or brass trim.
14. Ball valves, threaded ends - bronze, three piece with regular port and stainless steel trim.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 150.
2. Ball valves, flanged ends - steel, with full port and stainless steel trim, Class 300.
3. Ball valves, flanged ends - iron, Class 125.

3.20 CLEAN STEAM-CONDENSATE BALL VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller: Ball valves, threaded ends - stainless steel, two piece with full port.

B. Pipe NPS 2-1/2 (DN 65) and Larger: Ball valves, flanged ends - stainless steel, two piece with full port.

3.21 CHILLED-WATER BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; [**150**][**200**] CWP,

[**EPDM**][**NBR**] seat.
3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
7. Butterfly valves, grooved end - ductile iron, 175 CWP.
8. Butterfly valves, grooved end - ductile iron, 300 CWP.
9. Butterfly valves, single flange (lug type) - high performance, Class 150; [**carbon steel**][**stainless steel**] body.
10. Butterfly valves, single flange (lug type) - high performance, Class 300; [**carbon steel**][**stainless steel**] body.

3.22 CONDENSER-WATER BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc: [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
7. Butterfly valves, grooved end - ductile iron, 175 CWP.
8. Butterfly valves, grooved end - ductile iron, 300 CWP.
9. Butterfly valves, single flange (lug type) - high performance, Class 150; [**carbon steel**][**stainless steel**] body.
10. Butterfly valves, single flange (lug type) - high performance, Class 300; [**carbon steel**][**stainless steel**] body.

3.23 HEATING-WATER BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
2. Butterfly valves, single flange (lug type) - iron, with ductile-iron disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
3. Butterfly valves, single flange (lug type) - iron, with stainless steel disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
4. Butterfly valves, flangeless (wafer type) - iron, with aluminum-bronze disc; [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
5. Butterfly valves, flangeless (wafer type) - iron, with ductile-iron disc: [**150**][**200**] CWP, [**EPDM**][**NBR**] seat.
6. Butterfly valves, flangeless (wafer type) - iron, with stainless steel disc; [**150**][**200**] CWP,

[**EPDM**][**NBR**] seat.
7. Butterfly valves, grooved end - ductile iron, 175 CWP.
8. Butterfly valves, grooved end - ductile iron, 300 CWP.
9. Butterfly valves, single flange (lug type) - high performance, Class 150; [**carbon steel**][**stainless steel**] body.
10. Butterfly valves, single flange (lug type) - high performance, Class 300; [**carbon steel**][**stainless steel**] body.

3.24 LOW-PRESSURE STEAM BUTTERFLY VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; [**carbon steel**][**stainless steel**] body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; [**carbon steel**][**stainless steel**] body.

3.25 LOW-PRESSURE CLEAN STEAM BUTTERFLY VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; stainless steel body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; stainless steel body.

3.26 HIGH-PRESSURE STEAM BUTTERFLY VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high-performance, Class 150 [**carbon steel**][**stainless steel**] body.
2. Butterfly valves, single flange (lug type) - high-performance, Class 300 [**carbon steel**][**stainless steel**] body.

3.27 HIGH-PRESSURE CLEAN STEAM BUTTERFLY VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; stainless steel body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; stainless steel body.

3.28 STEAM-CONDENSATE BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; [**carbon steel**][**stainless steel**] body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; [**carbon steel**][**stainless steel**] body.

3.29 CLEAN-STEAM-CONDENSATE BUTTERFLY VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Butterfly valves, single flange (lug type) - high performance, Class 150; stainless steel body.
2. Butterfly valves, single flange (lug type) - high performance, Class 300; stainless steel body.

3.30 CHILLED-WATER CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, lift type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, lift type, threaded ends - bronze, with nonmetallic disc, Class 125.
3. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
4. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
5. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
6. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.
7. Check valves, swing type, press ends - bronze.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
5. Check valves, center guided - iron, globe, with metal seat, Class 125.
6. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
7. Check valves, center guided - iron, globe, with metal seat, Class 150.
8. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
9. Check valves, center guided - iron, globe, with metal seat, Class 250.
10. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
11. Check valves, center guided - iron, globe, with metal seat, Class 300.
12. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [**EPDM**][**NBR**].
13. Check valves, center guided - iron, globe, with resilient seat, Class 125; [**EPDM**][**NBR**].
14. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [**EPDM**][**NBR**].
15. Check valves, center guided - iron, globe, with resilient seat, Class 150; [**EPDM**][**NBR**].
16. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [**EPDM**][**NBR**].
17. Check valves, center guided - iron, globe, with resilient seat, Class 250; [**EPDM**][**NBR**].
18. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [**EPDM**][**NBR**].
19. Check valves, center guided - iron, globe, with resilient seat, Class 300; [**EPDM**][**NBR**].
20. Check valves, dual-plate type - iron, with metal seat, Class 125.
21. Check valves, dual-plate type - iron, with metal seat, Class 150.
22. Check valves, dual-plate type - iron, with metal seat, Class 250.
23. Check valves, dual-plate type - iron, with metal seat, Class 300.
24. Check valves, single-plate type - iron, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
25. Check valves, dual-plate type - iron, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
26. Check valves, dual-plate type - iron, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
27. Check valves, single-plate type - iron, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
28. Check valves, dual-plate type - iron, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
29. Check valves, dual-plate type - iron, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.

C. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

1. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
2. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

D. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

1. Check valves, swing type, grooved ends - iron, 300 CWP.

E. For CPVC Pipe:

1. CPVC Union-Type Ball Check Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

   a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
   b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

F. For PVC Pipe:

1. PVC Union-Type Ball Check Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100)**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

   a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
   b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

3.31 CONDENSER-WATER CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, lift type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, lift type, threaded ends - bronze, with nonmetallic disc, Class 125.
3. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
4. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
5. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
6. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.
7. Check valves, swing type, press ends - bronze.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
5. Check valves, center guided - iron, globe, with metal seat, Class 125.
6. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
7. Check valves, center guided - iron, globe, with metal seat, Class 150.
8. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
9. Check valves, center guided - iron, globe, with metal seat, Class 250.
10. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
11. Check valves, center guided - iron, globe, with metal seat, Class 300.
12. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [**EPDM**][**NBR**].
13. Check valves, center guided - iron, globe, with resilient seat, Class 125; [**EPDM**][**NBR**].
14. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [**EPDM**][**NBR**].
15. Check valves, center guided - iron, globe, with resilient seat, Class 150; [**EPDM**][**NBR**].
16. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [**EPDM**][**NBR**].

17. Check valves, center guided - iron, globe, with resilient seat, Class 250; [**EPDM**][**NBR**].
18. Check valves, center guided - iron, compact water, with resilient seat, Class 300; [**EPDM**][**NBR**].
19. Check valves, center guided - iron, globe, with resilient seat, Class 300; [**EPDM**][**NBR**].
20. Check valves, dual-plate type - iron, with metal seat, Class 125.
21. Check valves, dual-plate type - iron, with metal seat, Class 150.
22. Check valves, dual-plate type - iron, with metal seat, Class 250.
23. Check valves, dual-plate type - iron, with metal seat, Class 300.
24. Check valves, single-plate type - iron, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
25. Check valves, dual-plate type - iron, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
26. Check valves, dual-plate type - iron, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
27. Check valves, single-plate type - iron, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
28. Check valves, dual-plate type - iron, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
29. Check valves, dual-plate type - iron, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.

C. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

1. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
2. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

D. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

1. Check valves, swing type, grooved ends - iron, 300 CWP.

E. For CPVC Pipe:

1. CPVC Union-Type Ball Check Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

    a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
    b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

F. For PVC Pipe:

1. PVC Union-Type Ball Check Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100)**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

    a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
    b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

3.32 HEATING-WATER CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, lift type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, lift type, threaded ends - bronze, with nonmetallic disc, Class 125.
3. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
4. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
5. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
6. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.
7. Check valves, swing type, press ends - bronze.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
5. Check valves, center guided - iron, globe, with metal seat, Class 125.
6. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
7. Check valves, center guided - iron, globe, with metal seat, Class 150.
8. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
9. Check valves, center guided - iron, globe, with metal seat, Class 250.
10. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
11. Check valves, center guided - iron, globe, with metal seat, Class 300.
12. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [**EPDM**][**NBR**].
13. Check valves, center guided - iron, globe, with resilient seat, Class 125; [**EPDM**][**NBR**].
14. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [**EPDM**][**NBR**].
15. Check valves, center guided - iron, globe, with resilient seat, Class 150; [**EPDM**][**NBR**].
16. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [**EPDM**][**NBR**].
17. Check valves, center guided - iron, globe, with resilient seat, Class 250; [**EPDM**][**NBR**].
18. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [**EPDM**][**NBR**].
19. Check valves, center guided - iron, globe, with resilient seat, Class 300; [**EPDM**][**NBR**].
20. Check valves, dual-plate type - iron, with metal seat, Class 125.
21. Check valves, dual-plate type - iron, with metal seat, Class 150.
22. Check valves, dual-plate type - iron, with metal seat, Class 250.
23. Check valves, dual-plate type - iron, with metal seat, Class 300.
24. Check valves, single-plate type - iron, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
25. Check valves, dual-plate type - iron, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
26. Check valves, dual-plate type - iron, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
27. Check valves, single-plate type - iron, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
28. Check valves, dual-plate type - iron, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
29. Check valves, dual-plate type - iron, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.

C. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

1. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
2. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

D. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

1. Check valves, swing type, grooved ends - iron, 300 CWP.

3.33 LOW-PRESSURE STEAM CHECK VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
3. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.

4. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
5. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.34 HIGH-PRESSURE STEAM CHECK VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
3. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
5. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.35 STEAM-CONDENSATE CHECK VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
2. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
3. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Check valves, swing type, flanged ends - iron, with metal seats, Class 125.
2. Check valves, swing type, flanged ends - iron, with nonmetallic-to-metal seats, Class 125.
3. Check valves, swing type, flanged ends - iron, with metal seats, Class 250.
4. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
5. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.36 PUMP-DISCHARGE CHECK VALVE SCHEDULE

A. Chilled-Water Pump Discharge:

1. Pipe NPS 2 (DN 50) and Smaller:

a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
c. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 150.
d. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 150.

2. Pipe NPS 2-1/2 (DN 65) and Larger:

a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

c. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
d. Check valves, center guided - iron, globe, with metal seat, Class 125.
e. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
f. Check valves, center guided - iron, globe, with metal seat, Class 150.
g. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
h. Check valves, center guided - iron, globe, with metal seat, Class 250.
i. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
j. Check valves, center guided - iron, globe, with metal seat, Class 300.
k. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
l. Check valves, center guided - iron, globe, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
m. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
n. Check valves, center guided - iron, globe, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
o. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
p. Check valves, center guided - iron, globe, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
q. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.
r. Check valves, center guided - iron, globe, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.

3. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

4. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

a. Check valves, swing type, grooved ends - iron, 300 CWP.

B. Condenser-Water Pump Discharge:

1. Pipe NPS 2 (DN 50) and Smaller:

a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
c. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150.
d. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150.

2. Pipe NPS 2-1/2 (DN 65) and Larger:

a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.
c. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
d. Check valves, center guided - iron, globe, with metal seat, Class 125.

e. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
f. Check valves, center guided - iron, globe, with metal seat, Class 150.
g. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
h. Check valves, center guided - iron, globe, with metal seat, Class 250.
i. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
j. Check valves, center guided - iron, globe, with metal seat, Class 300.
k. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
l. Check valves, center guided - iron, globe, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
m. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
n. Check valves, center guided - iron, globe, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
o. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
p. Check valves, center guided - iron, globe, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
q. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.
r. Check valves, center guided - iron, globe, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.

3. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

a. Check valves, swing type, grooved-end - iron, 300 CWP.

C. Heating-Water Pump Discharge:

1. Pipe NPS 2 (DN 50) and Smaller:

a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
c. Check valves, swing type, threaded or soldered ends - bronze, with bronze disc, Class 150.
d. Check valves, swing type, threaded or soldered ends - bronze, with nonmetallic disc, Class 150.

2. Pipe NPS 2-1/2 (DN 65) and Larger:

a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.
c. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 125.
d. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 125.
e. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 150.
f. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 150.
g. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 250.
h. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 250.
i. Check valves, center guided - iron, spring loaded, compact wafer, with metal seat, Class 300.
j. Check valves, center guided - iron, spring loaded, globe, with metal seat, Class 300.

k. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
l. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
m. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
n. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
o. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
p. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
q. Check valves, center guided - iron, spring loaded, compact wafer, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.
r. Check valves, center guided - iron, spring loaded, globe, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.

3. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300):

a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

4. Pipe NPS 3 to NPS 12 (DN 80 to DN 300):

a. Check valves, swing type, grooved ends - iron, 300 CWP.

D. Steam-Condensate Pump Discharge:

1. Pipe NPS 2 (DN 50) and Smaller:

a. Check valves, swing type, threaded ends - bronze, with bronze disc, Class 125.
b. Check valves, swing type, threaded ends - bronze, with nonmetallic disc, Class 125.
c. Check valves, swing type, threaded - bronze, with bronze disc, Class 150.
d. Check valves, swing type, threaded - bronze, with nonmetallic disc, Class 150.

2. Pipe NPS 2-1/2 (DN 65) and Larger for Steam Condensate Pumps:

a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.
c. Check valves, center guided - iron, compact wafer, with metal seat, Class 125.
d. Check valves, center guided - iron, globe, with metal seat, Class 125.
e. Check valves, center guided - iron, compact wafer, with metal seat, Class 150.
f. Check valves, center guided - iron, globe, with metal seat, Class 150.
g. Check valves, center guided - iron, compact wafer, with metal seat, Class 250.
h. Check valves, center guided - iron, globe, with metal seat, Class 250.
i. Check valves, center guided - iron, compact wafer, with metal seat, Class 300.
j. Check valves, center guided - iron, globe, with metal seat, Class 300.
k. Check valves, center guided - iron, compact wafer, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.
l. Check valves, center guided - iron, globe, with resilient seat, Class 125; [**EPDM**][**NBR**] seat.

m. Check valves, center guided - iron, compact wafer, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
n. Check valves, center guided - iron, globe, with resilient seat, Class 150; [**EPDM**][**NBR**] seat.
o. Check valves, center guided - iron, compact wafer, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
p. Check valves, center guided - iron, globe, with resilient seat, Class 250; [**EPDM**][**NBR**] seat.
q. Check valves, center guided - iron, compact wafer, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.
r. Check valves, center guided - iron, globe, with resilient seat, Class 300; [**EPDM**][**NBR**] seat.

3. Pipe NPS 2-1/2 to NPS 12 (DN 65 to DN 300) for Steam Condensate Pumps:

a. Check valves, swing type, flanged ends - iron, with lever- and spring-closure control, Class 125.
b. Check valves, swing type, flanged ends - iron, with lever- and weight-closure control, Class 125.

3.37 CHILLED-WATER GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; [**threaded**][**soldered**] ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; [**threaded**][**soldered**] ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.
5. Gate valves, press ends - bronze; [**RS**][**NRS**].

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

C. CPVC Pipe:

1. CPVC Gate Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

D. PVC Pipe:

1. PVC Gate Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100)**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

3.38 CONDENSER-WATER GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; [**threaded**][**soldered**] ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; [**threaded**][**soldered**] ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.
5. Gate valves, press ends - bronze; [**RS**][**NRS**].

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

C. CPVC Pipe:

1. CPVC Gate Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100) and smaller**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

    a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
    b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100) and Larger: [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

D. PVC Pipe:

1. PVC Gate Valve: [**NPS 2 (DN 50) and smaller**][**NPS 4 (DN 100)**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> at [**73 deg F (23 deg C)**]<**Insert temperature**>.

    a. End Connections for Valves NPS 2 (DN 50) and Smaller: [**Socket**][**or**][**threaded**].
    b. End Connections for Valves NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**Socket**][**Socket or threaded**][**Threaded**][**Flanged**].

3.39 HEATING-WATER GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; [**threaded**][**soldered**] ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; [**threaded**][**soldered**] ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.
5. Gate valves, press ends - bronze; [**RS**][**NRS**].

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.40 LOW-PRESSURE STEAM GATE VALVE SCHEDULE - 15 PSIG (104 kPa) OR LESS

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; threaded ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; threaded ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.41 HIGH-PRESSURE STEAM GATE VALVE SCHEDULE - MORE THAN 15 PSIG (104 kPa)

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; threaded ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; threaded ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.42 STEAM-CONDENSATE GATE VALVE SCHEDULE

A. Pipe NPS 2 (DN 50) and Smaller:

1. Gate valves, threaded or soldered ends - bronze, NRS, Class 125; threaded ends.
2. Gate valves, threaded or soldered ends - bronze, RS, Class 125; threaded ends.
3. Gate valves, threaded ends - bronze, NRS, Class 150.
4. Gate valves, threaded ends - bronze, RS, Class 150.

B. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Gate valves, flanged ends - iron, NRS, Class 125.
2. Gate valves, flanged ends - iron, OS&Y, Class 125.
3. Gate valves, flanged ends - iron, NRS, Class 250.
4. Gate valves, flanged ends - iron, OS&Y, Class 250.

3.43 CHILLED-WATER PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.
2. Plug valves, lubricated type, flanged ends - Class 125; [**Type I single gland**][**or**][**Type II regular gland**].
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
6. Plug valves, lubricated type, flanged ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

3.44 CONDENSER-WATER PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.
2. Plug valves, lubricated type, flanged ends - Class 125; [**Type I single gland**][**or**][**Type II regular gland**].
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
6. Plug valves, lubricated type, flanged ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

3.45 HEATING-WATER PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.
2. Plug valves, lubricated type, flanged ends - Class 125; [**Type I single gland**][**or**][**Type II regular gland**].
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
6. Plug valves, lubricated type, flanged ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

3.46 STEAM-CONDENSATE PLUG VALVE SCHEDULE

A. Pipe NPS 2-1/2 (DN 65) and Larger:

1. Plug valves, lubricated type, threaded ends - Class 125.

2. Plug valves, lubricated type, flanged ends - Class 125; [**Type I single gland**][**or**][**Type II regular gland**].
3. Plug valves, lubricated type, threaded ends - cylindrical, Class 125.
4. Plug valves, lubricated type, flanged ends - cylindrical, Class 125.
5. Plug valves, lubricated type, threaded ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
6. Plug valves, lubricated type, flanged ends - Class 250; [**Type I single gland**][**or**][**Type II regular gland**].
7. Plug valves, lubricated type, threaded ends - cylindrical, Class 250.
8. Plug valves, lubricated type, flanged ends - cylindrical, Class 250.
9. Plug valves, eccentric type, flanged ends - with resilient seat, 175 CWP.

END OF SECTION 22 05 23 00A

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
22 05 23 00	22 05 00 00a	Testing, Adjusting, and Balancing for Plumbing

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 07 16 00 - PLUMBING EQUIPMENT INSULATION

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Calcium silicate equipment insulation.
2. Cellular glass equipment insulation.
3. Flexible elastomeric equipment insulation.
4. Glass-fiber equipment insulation.
5. Mineral wool equipment insulation.
6. Polyolefin equipment insulation.
7. Insulating cements.
8. Insulation adhesives.
9. Insulation mastics and coatings.
10. Insulation sealants.
11. Field-applied insulation jackets.
12. Field-applied fabric-reinforcing mesh for insulation.
13. Field-applied cloths for insulation.
14. Vapor-retarder tapes.
15. Insulation securements.
16. Insulation corner angles.

B. Related Requirements:

1. Section 220719 "Plumbing Piping Insulation."

1.2 ACTION SUBMITTALS

A. Product Data: For each specified system and assembly, including components and accessories.

1. Include thermal conductivity, water-vapor permeance thickness, and jackets (both factory and field applied, if any).

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
2. Environmental Product Declaration (EPD): For each product.
3. Health Product Declaration (HPD): For each product.
4. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
5. Environmental Product Declaration (EPD): For each product.
6. Health Product Declaration (HPD): For each product.
7. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
8. Environmental Product Declaration (EPD): For each product.
9. Environmental Product Declaration (EPD): For each product.
10. Environmental Product Declaration (EPD): For each product.
11. Third-Party Certifications: For each product.
12. Third-Party-Certified Life-Cycle Assessment: For each product.
13. Product Data: For adhesives, mastics, and sealants, indicating VOC content.

14. Laboratory Test Reports: For adhesives, mastics, and sealants, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.

1. Detail removable insulation at equipment connections.
2. Detail application of field-applied jackets.
3. Detail application at linkages of control devices.
4. Detail field application for each equipment type.

D. Samples: For each type of insulation and jacket indicated. Identify each Sample, describing product and intended use. Sample sizes are as follows:

1. Sheet Form Insulation Materials: **12 inches (300 mm)** square.
2. Sheet Jacket Materials: **12 inches (300 mm)** square.
3. Manufacturer's Color Charts: For products where color is specified, show the full range of colors available for each type of finish material.

1.3 INFORMATIONAL SUBMITTALS

A. Qualification Statements: For qualified Installer.

B. Material Test Reports: From a qualified testing agency acceptable to authorities having jurisdiction indicating, interpreting, and certifying test results for compliance of insulation materials, sealers, attachments, cements, and jackets, with requirements indicated. Include dates of tests and test methods employed.

C. Field Quality Control Reports: For specified tests and inspections.

1.4 QUALITY ASSURANCE

A. Installer Qualifications: Skilled mechanics who have successfully completed an apprenticeship program or another craft training program [**, certified by the Department of Labor, Bureau of Apprenticeship and Training**] .

1.5 MOCKUPS

A. Before installing insulation, build mockups for each type of insulation and finish listed below to demonstrate quality of insulation application and finishes. Build mockups in the location indicated or, if not indicated, as directed by Architect. Use materials indicated for the completed Work.

1. Equipment Mockups:

a. One tank or vessel.
b. One pump.

2. For each mockup, fabricate cutaway sections to allow observation of application details for insulation materials, adhesives, mastics, attachments, and jackets.
3. Notify Architect [**seven**]<**Insert number**> days in advance of dates and times when mockups will be constructed.
4. Obtain Architect's approval of mockups before starting insulation application.

5. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
6. Maintain mockups during construction in an undisturbed condition as a standard for judging the completed Work.
7. Demolish and remove mockups when directed.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Packaging: Insulation system materials are to be delivered to the Project site in unopened containers. The packaging is to include, the name of the manufacturer, fabricator, type, description, and size [**, as well as ASTM standard designation, and maximum use temperature**] .

1.7 COORDINATION

A. Coordinate sizes and locations of supports, hangers, and insulation shields specified in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment."

B. Coordinate clearance requirements with equipment Installer for equipment insulation application. Before preparing equipment Shop Drawings, establish and maintain clearance requirements for installation of insulation and field-applied jackets and finishes and for space required for maintenance.

1.8 SCHEDULING

A. Schedule insulation application after pressure testing systems. Insulation application may begin on segments that have satisfactory test results.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Surface-Burning Characteristics: For insulation and related materials, as determined by testing identical products in accordance with ASTM E84, by a testing agency acceptable to authorities having jurisdiction. Factory label insulation, jacket materials, adhesive, mastic, tapes, and cement material containers with appropriate markings of applicable testing agency.

1. All Insulation Installed Indoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
2. All Insulation Installed Indoors; Outdoors-Installed Insulation in Contact with Airstream: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
3. All Insulation Installed Indoors and Outdoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.

2.2 EQUIPMENT INSULATION MATERIALS, GENERAL

A. Comply with requirements in "Domestic Water Boiler Breeching Insulation Schedule" and "Indoor Equipment Insulation Schedule" articles for where insulating materials are to be applied.

B. Products are not to contain asbestos, lead, mercury, or mercury compounds.

C. Products that come into contact with stainless steel are to have a leachable chloride content of less than 50 ppm when tested in accordance with ASTM C871.

D. Insulation materials for use on austenitic stainless steel are to be qualified as acceptable in accordance with ASTM C795.

E. Foam insulation materials are not to use CFC or HCFC blowing agents in the manufacturing process.

2.3 CALCIUM SILICATE EQUIPMENT INSULATION

A. Equipment Insulation - Calcium Silicate:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**TPS Industrial; a trademark of Chase Manufacturing, Inc.**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**TPS Industrial; a trademark of Chase Manufacturing, Inc.**]
    c. <**Insert manufacturer's name**>

3. Description: Flat-, curved-, and grooved-block sections of noncombustible, inorganic, hydrous calcium silicate with a non-asbestos fibrous reinforcement.
4. Standard: ASTM C533, Type I or Type II.
5. Prefabricated Fitting Covers: ASTM C450 and ASTM C585 for dimensions used in preforming insulation to cover valves, elbows, tees, and flanges.

2.4 CELLULAR GLASS EQUIPMENT INSULATION

A. Equipment Insulation - Cellular Glass:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Owens Corning**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Owens Corning**]

b. <**Insert manufacturer's name**>

3. Description: Cellular glass equipment insulation of inorganic, incombustible, foamed or cellulated glass with annealed, rigid, hermetically sealed cells.
4. Standard: ASTM C552.
5. Block Insulation: Type I.
6. Special-Shaped Insulation: Type III.
7. Board Insulation: Type IV.
8. Factory fabricate shapes in accordance with ASTM C450 and ASTM C585.
9. Equipment insulation without facing.
10. Equipment Insulation With Factory-Applied Insulation Facing:

    a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
    b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.
    c. FSK Facing: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.
    d. FSP Facing: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type III.
    e. Vinyl Facing: White vinyl with a permeance of **1.3 perms (0.86 metric perm)** when tested in accordance with ASTM E96/E96M, Procedure A, and complying with NFPA 90A and NFPA 90B.

2.5 FLEXIBLE ELASTOMERIC EQUIPMENT INSULATION

A. Equipment Insulation - Flexible Elastomeric:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Aeroflex USA**]
    b. [**Armacell LLC**]
    c. [**K-Flex USA**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Aeroflex USA**]
    b. [**Armacell LLC**]
    c. [**K-Flex USA**]
    d. <**Insert manufacturer's name**>

3. Description: Closed-cell or expanded-rubber flexible elastomeric equipment insulation.
4. Standard ASTM C543/ASTMC534M, Type II for sheet materials.
5. Suitable for maximum use temperature between **70 deg F (minus 57 deg C)** and **220 deg F (104 deg C)**.

2.6 GLASS-FIBER EQUIPMENT INSULATION

A. Equipment Insulation - Glass-Fiber Blanket:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Johns Manville; a Berkshire Hathaway company**]
   c. [**Knauf Insulation**]
   d. [**Manson Insulation Inc.**]
   e. [**Owens Corning**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Johns Manville; a Berkshire Hathaway company**]
   c. [**Knauf Insulation**]
   d. [**Manson Insulation Inc.**]
   e. [**Owens Corning**]
   f. <**Insert manufacturer's name**>

3. Description: Glass-fiber blanket equipment insulation consisting of glass fibers bonded with a thermosetting resin.
4. Suitable for maximum use temperature up to **450 deg F (232 deg C)** in accordance with ASTM C411.
5. Unfaced, Type I.
6. Factory-Applied Insulation Facing:

   a. FSK: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.
   b. Vinyl: White vinyl with a permeance of **1.3 perms (0.86 metric perm)** when tested in accordance with ASTM E96/E96M, Procedure A, and complying with NFPA 90A and NFPA 90B.

B. Equipment Insulation - High-Temperature, Glass-Fiber Blanket:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Johns Manville; a Berkshire Hathaway company**]
   c. [**Knauf Insulation**]
   d. [**Manson Insulation Inc.**]
   e. [**Owens Corning**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**Knauf Insulation**]
d. [**Manson Insulation Inc.**]
e. [**Owens Corning**]
f. <**Insert manufacturer's name**>

3. Description: High-temperature glass-fiber equipment blanket insulation consisting of glass fibers bonded with a thermosetting resin.
4. Standard: ASTM C553, Type V.
5. Unfaced.
6. Suitable for maximum use temperature up to **1000 deg F (650 deg C)**.

C. Equipment Insulation - Glass-Fiber Board:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**Knauf Insulation**]
d. [**Manson Insulation Inc.**]
e. [**Owens Corning**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**Knauf Insulation**]
d. [**Manson Insulation Inc.**]
e. [**Owens Corning**]
f. <**Insert manufacturer's name**>

3. Description: Glass-fiber board equipment insulation consisting of glass fibers bonded with a thermosetting resin.
4. Standard: ASTM C612, Type IA or Type IB.
5. Suitable for maximum use temperature between **35 deg F (1.7 deg C)** and **250 deg F (121 deg C)** for jacketed and between **35 deg F (1.7 deg C)** and **450 deg F (232 deg C)** for unfaced in accordance with ASTM C411.
6. Unfaced.
7. Factory-Applied Insulation Facing:

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type III.
b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.

D. Equipment Insulation - High-Temperature, Glass-Fiber Board:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Johns Manville; a Berkshire Hathaway company**]
    c. [**Knauf Insulation**]
    d. [**Manson Insulation Inc.**]
    e. [**Owens Corning**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Johns Manville; a Berkshire Hathaway company**]
    c. [**Knauf Insulation**]
    d. [**Manson Insulation Inc.**]
    e. [**Owens Corning**]
    f. <**Insert manufacturer's name**>

3. Description: High-temperature, glass-fiber board insulation consisting of glass fibers bonded with a thermosetting resin.
4. Standard: ASTM C612, Type III, unfaced.
5. Suitable for maximum use temperature up to **1000 deg F (650 deg C)** in accordance with ASTM C411.

E. Equipment Insulation - Glass-Fiber, Pipe and Tank:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Johns Manville; a Berkshire Hathaway company**]
    c. [**Knauf Insulation**]
    d. [**Manson Insulation Inc.**]
    e. [**Owens Corning**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Johns Manville; a Berkshire Hathaway company**]
    c. [**Knauf Insulation**]
    d. [**Manson Insulation Inc.**]
    e. [**Owens Corning**]
    f. <**Insert manufacturer's name**>

3. Description: Glass-fiber, pipe and tank insulation consisting of glass fibers bonded with a

thermosetting resin.
4. Standard: ASTM C1393.
5. Suitable for maximum use temperature between **35 deg F (1.7 deg C)** and **850 deg F (454 deg C)**, in accordance with ASTM C411.
6. Semirigid board material with factory-applied [**ASJ**][**FSK**] jacket.
7. Factory-Applied Insulation Facing:

    a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type III.
    b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.

2.7 MINERAL WOOL EQUIPMENT INSULATION

A. Equipment Insulation - Mineral Wool Blanket:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**Owens Corning**]
    c. [**ROCKWOOL**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**Owens Corning**]
    c. [**ROCKWOOL**]
    d. <**Insert manufacturer's name**>

3. Description: Mineral wool equipment insulation blanket consisting of basalt volcanic rock-derived fibers bonded with a thermosetting resin.
4. Standard: ASTM C553.
5. Unfaced.
6. Suitable for maximum use temperature up to **1200 deg F (650 deg C)** in accordance with ASTM C447.

B. Equipment Insulation - Mineral Wool Board:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**Owens Corning**]
    c. [**ROCKWOOL**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Owens Corning**]
c. [**ROCKWOOL**]
d. <**Insert manufacturer's name**>

3. Description: Mineral wool board equipment insulation consisting of basalt volcanic rock-derived fibers bonded with a thermosetting resin.
4. Standard: ASTM C612, Type III, unfaced.
5. Suitable for maximum use temperature up to **1100 deg F (600 deg C)** in accordance with ASTM C411.

C. Equipment Insulation - Mineral Wool, Pipe and Tank:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Owens Corning**]
c. [**ROCKWOOL**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Owens Corning**]
c. [**ROCKWOOL**]
d. <**Insert manufacturer's name**>

3. Description: Mineral wool, pipe and tank insulation consisting of fibers bonded with a thermosetting resin.
4. Standard: ASTM C1393.
5. Suitable for maximum use temperature up to **1000 deg F (538 deg C)**, in accordance with ASTM C411.
6. Semirigid board material.
7. Factory-Applied Insulation Facings:

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type III.
b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.

2.8 POLYOLEFIN EQUIPMENT INSULATION

A. Equipment Insulation - Polyolefin:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Armacell LLC**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Armacell LLC**]
b. <**Insert manufacturer's name**>

3. Description: Polyethylene type of polyolefin thermal plastic equipment insulation.
4. Standard: ASTM C1427, Type I, Grade I for tubular materials and Type II, Grade I for sheet materials.

2.9 INSULATING CEMENTS

A. Insulating Cement for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

3. Standard: ASTM C195.

B. Insulating Cement for Expanded or Exfoliated Vermiculite:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

3. Standard: ASTM C196.

C. Hydraulic-Setting Insulating and Finishing Cement for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

3. Standard: ASTM C449.

2.10 INSULATION ADHESIVES

A. Materials are to be compatible with insulation materials, jackets, and substrates and for bonding insulation to itself and to surfaces to be insulated unless otherwise indicated.

B. Insulation Adhesive for Lagging Cloth:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Vimasco Corporation**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Vimasco Corporation**]
d. <**Insert manufacturer's name**>

3. Standard: MIL-A-3316C, Class I, Grade A.
4. Adhesives to be compatible with insulation materials, jackets, and substrates.
5. Fire-resistant, water-based lagging adhesive and coating for use indoors to adhere fire-resistant lagging cloths over insulation.
6. Service Temperature Range: [**20 to plus 180 deg F (Minus 6 to plus 82 deg C)**][**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**] .
7. Color: White.

8. Verify adhesive is as recommended by insulation manufacturer and has a VOC content of [**50**]<**Insert number**> g/L or less.

C. Insulation Adhesive for Calcium Silicate:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. [**Vimasco Corporation**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. [**Vimasco Corporation**]
   e. <**Insert manufacturer's name**>

3. Description: Fibrous, sodium-silicate-based adhesive with a service temperature range of **50 to 800 deg F (10 to 427 deg C)**.
4. Adhesive: As recommended by adhesive manufacturer and with a VOC content of 80 g/L or less.

D. Insulation Adhesive for Cellular Glass:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. <**Insert manufacturer's name**>

3. Description: Two-component, thermosetting urethane adhesive containing no flammable solvents, with a service temperature range of **minus 100 to plus 200 deg F (minus 73 to plus 93 deg C)**.
4. Adhesive: As recommended by cellular-glass manufacturer and with a VOC content of 80 g/L or less.

E. Insulation Adhesive, Solvent Based for Flexible Elastomeric and Polyolefin:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Aeroflex USA**]
    b. [**Armacell LLC**]
    c. [**K-Flex USA**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Aeroflex USA**]
    b. [**Armacell LLC**]
    c. [**K-Flex USA**]
    d. <**Insert manufacturer's name**>

3. Description: Solvent-based adhesive for flexible elastomeric and polyolefin insulation.
4. Flame-spread index is 25 or less and smoke-developed index is 50 or less as tested in accordance with ASTM E84.
5. Wet Flash Point: Below **0 deg F (minus 18 deg C)**.
6. Service Temperature Range: **40 to 200 deg F (4 to plus 93 deg C)**.
7. Color: [**Black**]<**Insert color**> .
8. Adhesive: As recommended by flexible elastomeric and polyolefin manufacturer and with a VOC content of [**80**]<**Insert value**> g/L or less.

F. Insulation Adhesive for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]
    d. <**Insert manufacturer's name**>

3. Standard: MIL-A-3316C, Class 2, Grade A.
4. Adhesive: As recommended by mineral-fiber manufacturer and with a VOC content of 80 g/L or less.
5. Verify fiberglass adhesive has a VOC content of 80 g/L or less when calculated in accordance with 40 CFR 59, Subpart D (EPA Method 24).

G. Insulation Adhesive for ASJ, FSK and PVDC Facings/Jackets: Comply with MIL-A-3316C, Class 2, Grade A for bonding insulation jacket lap seams and joints.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. <**Insert manufacturer's name**>

3. Description: Adhesive for bonding ASJ, FSK and PVDC facing/jacket lap seams and joints.
4. Standard: MIL-A-3316C, Class 2, Grade A.
5. Verify adhesives have a VOC content of 80 g/L or less.

H. Insulation Adhesive for PVC Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**P.I.C. Plastics, Inc.**]
   c. [**Proto Corporation**]
   d. [**Sekisui Voltek, LLC**]
   e. [**Speedline Corporation**]
   f. [**The Dow Chemical Company**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**P.I.C. Plastics, Inc.**]
   c. [**Proto Corporation**]
   d. [**Sekisui Voltek, LLC**]
   e. [**Speedline Corporation**]
   f. [**The Dow Chemical Company**]
   g. <**Insert manufacturer's name**>

3. Description: PVC jacket adhesive to be compatible with and as recommended in PVC jacket manufacturer's literature.

I. Adhesive: As recommended by PVC jacket manufacturer and with a VOC content of 50 g/L or less.

2.11 INSULATION MASTICS AND COATINGS

A. Materials are to be compatible with insulation materials, jackets, and substrates.

1. Mastics: As recommended by insulation manufacturer and with a VOC content of 50 g/L or less.
2. Verify mastics comply with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify mastics comply with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
4. Verify mastics comply with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify the building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

B. Insulation Vapor-Retarder Mastic - Water Based, Indoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Knauf Insulation**]
    d. [**Mon-Eco Industries, Inc.**]
    e. [**Vimasco Corporation**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Knauf Insulation**]
    d. [**Mon-Eco Industries, Inc.**]
    e. [**Vimasco Corporation**]
    f. <**Insert manufacturer's name**>

3. Description: Insulation vapor-retarder mastic, water-based, suitable for indoor use on below-ambient services.
4. Water-Vapor Permeance: Comply with ASTM E96/E96M or ASTM F1249.
5. Service Temperature Range: [**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**][**Minus 20 to plus 180 deg F (Minus 29 to plus 82 deg C)**] .
6. Standard: MIL-PRF-19565C, Type II, for permeance requirements [**, with supplier listing on DOD QPD - Qualified Products Database**] .
7. Color: [**White**]<**Insert color**> .

C. Insulation Vapor-Retarder Mastic - Solvent Based, Indoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. <**Insert manufacturer's name**>

3. Description: Insulation vapor-retarder mastic, solvent-based, suitable for indoor use on below-ambient services.
4. Water-Vapor Permeance: ASTM E96/E96M or ASTM F1249.
5. Service Temperature Range: **0 to 180 deg F (Minus 18 to plus 82 deg C)**.
6. Color: [**White**]<**Insert color**> .

D. Insulation Vapor-Retarder Mastic - Solvent Based, Outdoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. <**Insert manufacturer's name**>

3. Description: Insulation vapor-retarder mastic, solvent-based, suitable for outdoor use on below-ambient services.
4. Water-Vapor Permeance: ASTM E96/E96M or ASTM F1249.
5. Service Temperature Range: **Minus 50 to plus 220 deg F (Minus 46 to plus 104 deg C)**.
6. Color: [**White**]<**Insert color**> .

E. Insulation Breather Mastic - Water Based, Indoor/Outdoor:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Knauf Insulation**]
    d. [**Mon-Eco Industries, Inc.**]
    e. [**Vimasco Corporation**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Knauf Insulation**]
    d. [**Mon-Eco Industries, Inc.**]
    e. [**Vimasco Corporation**]
    f. <**Insert manufacturer's name**>

3. Description: Insulation breather mastic, water-based, suitable for indoor and outdoor use on above-ambient surfaces.
4. Water-Vapor Permeance: ASTM E96/E96M, greater than **1.0 perm (0.66 metric perms)** at manufacturer's recommended dry film thickness.
5. Service Temperature Range: [**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**][**Minus 20 to plus 180 deg F (Minus 29 to plus 82 deg C)**] .
6. Color: [**White**]<**Insert color**> .

2.12 INSULATION SEALANTS

A. Insulation Joint Sealant:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]
    d. [**Owens Corning**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]
    d. [**Owens Corning**]

e. **<Insert manufacturer's name>**

3. Permanently flexible, elastomeric sealant.
4. Service Temperature Range: [**Minus 150 to plus 250 deg F (Minus 101 to plus 121 deg C)**][**Minus 100 to plus 300 deg F (Minus 73 to plus 149 deg C)**] .
5. Color: White or gray.
6. Sealant shall have a VOC content of 420 g/L or less.

B. Flashing Sealant for FSK and Metal Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. **<Insert manufacturer's name>**

3. Sealant to be compatible with insulation materials, jackets, and substrates.
4. Fire- and water-resistant, flexible, elastomeric sealant.
5. Service Temperature Range: **Minus 40 to plus 250 deg F (Minus 40 to plus 121 deg C)**.
6. Color: Aluminum.
7. Verify sealant has a VOC content of 420 g/L or less.

C. Flashing Sealants for ASJ, PVDC, and PVC Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. **<Insert manufacturer's name>**

3. Sealant to be compatible with insulation materials, jackets, and substrates.
4. Fire- and water-resistant, flexible, elastomeric sealant.

5. Service Temperature Range: **Minus 40 to plus 250 deg F (Minus 40 to plus 121 deg C)**.
6. Color: White.
7. Verify sealant has a VOC content of 420 g/L or less.

2.13 FIELD-APPLIED INSULATION JACKETS

A. Field-applied jackets are to comply with ASTM C1136, Type I, unless otherwise indicated.

B. Insulation Jacket, Field Applied - FSK:

1. Aluminum-foil-face, fiberglass-reinforced scrim with kraft-paper backing.

C. Equipment Insulation Jacket, Field Applied - PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**P.I.C. Plastics, Inc.**]
    c. [**Proto Corporation**]
    d. [**Speedline Corporation**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**P.I.C. Plastics, Inc.**]
    c. [**Proto Corporation**]
    d. [**Speedline Corporation**]
    e. <**Insert manufacturer's name**>

3. High-impact-resistant, UV-resistant PVC complying with ASTM 1784, Class 16354-C.
4. Thickness: As indicated in "Indoor, Field-Applied Insulation Jacket Schedule" and "Outdoor, Field-Applied Insulation Jacket Schedule" articles.
5. Jacket: Roll stock ready for shop or field cutting and forming.
6. Adhesive: As recommended by jacket material manufacturer.
7. Color: [**White**][**Color-code jackets based on system. Color as selected by Architect**] .
8. Factory-fabricated tank heads and tank side panels.

D. Insulation Jacket, Field Applied - Metal:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**RPR Products, Inc.**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**RPR Products, Inc.**]
    c. <**Insert manufacturer's name**>

3. Jacket Material: Aluminum.

    a. Description: [**Sheet and roll stock ready for shop or field sizing**][**Factory cut and rolled to size**] .
    b. Standard: **ASTM B209 (ASTM B209M)**, Alloy 3003, 3005, 3105, or 5005, Temper H-14.
    c. Finish and Thickness: As indicated in "Indoor, Field-Applied Insulation Jacket Schedule" and "Outdoor, Field-Applied Insulation Jacket Schedule" articles.
    d. Moisture Barrier for Indoor Applications: [**1-mil- (0.025-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**2.5-mil- (0.063-mm-) thick polysurlyn**] .
    e. Moisture Barrier for Outdoor Applications: [**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**2.5-mil- (0.063-mm-) thick polysurlyn**] .
    f. Factory-Fabricated Fitting Covers:

        1) Same material, finish, and thickness as jacket.
        2) Preformed two-piece or gore, 45- and 90-degree, short- and long-radius elbows.
        3) Tee covers.
        4) Flange and union covers.
        5) End caps.
        6) Beveled collars.
        7) Valve covers.
        8) Field fabricate fitting covers only if factory-fabricated fitting covers are not available.

4. Jacket Material - Stainless Steel Jacket.

    a. Description: [**Sheet and roll stock ready for shop or field sizing**][**Factory cut and rolled to size**] .
    b. Standard: ASTM A240/A240M.
    c. Material Type, Finish, and Thickness: As indicated in "Indoor, Field-Applied Insulation Jacket Schedule" and "Outdoor, Field-Applied Insulation Jacket Schedule" articles.
    d. Moisture Barrier for Indoor Applications: [**1-mil- (0.025-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**2.5-mil- (0.063-mm-) thick polysurlyn**] .
    e. Moisture Barrier for Outdoor Applications: [**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**2.5-mil- (0.063-mm-) thick polysurlyn**] .
    f. Factory-Fabricated Fitting Covers:

        1) Same material, finish, and thickness as jacket.
        2) Preformed two-piece or gore, 45- and 90-degree, short- and long-radius elbows.
        3) Tee covers.
        4) Flange and union covers.
        5) End caps.
        6) Beveled collars.
        7) Valve covers.
        8) Field fabricate fitting covers only if factory-fabricated fitting covers are not available.

E. Insulation Jacket, Field Applied - Outdoor, Self Adhesive (Asphaltic):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**MFM Building Products Corp.**]
    b. [**Polyguard Products, Inc.**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**MFM Building Products Corp.**]
    b. [**Polyguard Products, Inc.**]
    c. <**Insert manufacturer's name**>

3. Description: Self-adhesive outdoor asphaltic jacket of rubberized bituminous resin on a cross-laminated polyethylene film covered with [**white**][**stucco-embossed**] aluminum-foil.
4. Vapor Barrier/Waterproofing Membrane: **60-mil-** **(1.5-mm-)** thick.

F. Insulation Jacket, Field Applied - Indoor/Outdoor, Self Adhesive (Non-Asphaltic):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**3M**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**3M**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
    d. <**Insert manufacturer's name**>

3. Description: Vapor barrier and waterproofing jacket for installation over insulation located aboveground outdoors or indoors.
4. Specialized jacket to have five layers of laminated aluminum and polyester film with low-temperature acrylic pressure-sensitive adhesive.
5. Outer aluminum surface is to be coated with UV-resistant coating for protection from environmental contaminants.
6. Permeance: 0.00 perm as tested in accordance with ASTM F1249.
7. Flamespread/Smoke Developed: 25/50 as tested in accordance with ASTM E84.
8. Aluminum Finish: [**Embossed**][**Smooth**] .
9. Outer Aluminum Surface: Coated with UV-resistant coating for protection from environmental contaminants.

G. Insulation Jacket, Field Applied - Indoor, PVDC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. <**Insert manufacturer's name**>

3. Description: PVDC jacket for indoor applications with white PVDC biaxially oriented barrier film.
4. Vapor Barrier/Waterproofing Membrane: **4 mil (0.10 mm)** thick.
5. Permeance: **0.02 perm (0.013 metric perm)** when tested in accordance with ASTM E96/E96M.
6. Flame-Spread/Smoke-Developed Index: Flame-spread index of 10 and a smoke-developed index of 20 when tested in accordance with ASTM E84.

H. Insulation Jacket, Field Applied - Outdoor, PVDC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. <**Insert manufacturer's name**>

3. Description: PVDC jacket for outdoor applications with white PVDC biaxially oriented barrier film.
4. Vapor Barrier/Waterproofing Membrane: **6 mil (0.15 mm)** thick.
5. Permeance: **0.01 perm (0.007 metric perm)** when tested in accordance with ASTM E96/E96M.
6. Flame-Spread/Smoke-Developed Index: Flame-spread index of 25 and a smoke-developed index of 50 when tested in accordance with ASTM E84.

I. Insulation Jacket, Field Applied - PVDC-SSL:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**Johns Manville; a Berkshire Hathaway company**]
b. <**Insert manufacturer's name**>

3. Description: PVDC jacket with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip.
4. Thickness: **6 mil (0.15 mm)**.
5. Permeance: **0.01 perm (0.007 metric perm)** when tested in accordance with ASTM E96/E96M.
6. Flame-Spread/Smoke-Developed Index: Flame-spread index of 25 and a smoke-developed index of 50 when tested in accordance with ASTM E84.

2.14 FIELD-APPLIED FABRIC-REINFORCING MESH FOR INSULATION

A. Woven Glass-Fiber Mesh for Equipment Insulation, Field Applied:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. <**Insert manufacturer's name**>

3. Description: Woven glass-fiber mesh for covering equipment insulation.
4. Weight: Approximately **4 oz./sq. yd. (114 g/sq. m)**.
5. Thread Count: **5 strands by 5 strands/sq. in. (2 strands by 2 strands/sq. mm)**.

B. Woven Polyester Mesh for Equipment Insulation, Field Applied:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Vimasco Corporation**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Childers Brand; H. B. Fuller Construction Products**]

b. [**Foster Brand; H. B. Fuller**]
c. [**Vimasco Corporation**]
d. <**Insert manufacturer's name**>

3. Description: Woven polyester mesh for covering pipe and pipe fittings insulation.
4. Weight: **1 oz./sq. yd. (34 g/sq. m)**.
5. Thread Count: **10 strands by 10 strands/sq. in. (4 strands by 4 strands/sq. mm)**.
6. Weave Type: Leno.

2.15 FIELD-APPLIED CLOTHS FOR INSULATION

A. Woven Glass-Fiber Cloth, Field Applied, for Insulation:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Alpha Associates, Inc.**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Alpha Associates, Inc.**]
   b. <**Insert manufacturer's name**>

3. Description: Woven glass-fiber cloth.
4. Standard: MIL-C-20079H, Type I, plain weave.
5. Weave: Plain.
6. Weight: Minimum of **8 oz./sq. yd. (271 g/sq. m)**, presized.

2.16 VAPOR-RETARDER TAPES

A. Vapor-Retarder Tape for ASJ:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**3M Industrial Adhesives and Tapes Division**]
   b. [**Avery Dennison Corporation, Specialty Tapes Division**]
   c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
   d. [**Knauf Insulation**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**3M Industrial Adhesives and Tapes Division**]
   b. [**Avery Dennison Corporation, Specialty Tapes Division**]

c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
d. [**Knauf Insulation**]
e. <**Insert manufacturer's name**>

3. Description: White vapor-retarder tape matching factory-applied jacket with acrylic adhesive.
4. Standard: ASTM C1136.
5. Width: [**3 inches (75 mm)**]<**Insert value**> .
6. Thickness: [**11.5 mils (0.29 mm)**]<**Insert value**> .
7. Adhesion: [**90 ounces force/inch (1.0 N/mm)**]<**Insert value**> in width.
8. Elongation: [**2**]<**Insert number**> percent.
9. Tensile Strength: [**40 lbf/inch (7.2 N/mm)**]<**Insert value**> in width.
10. ASJ Tape Disks and Squares: Precut disks or squares of ASJ tape.

B. Vapor-Retarder Tape for FSK:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Avery Dennison Corporation, Specialty Tapes Division**]
c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
d. [**Knauf Insulation**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Avery Dennison Corporation, Specialty Tapes Division**]
c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
d. [**Knauf Insulation**]
e. <**Insert manufacturer's name**>

3. Description: Foil-face, vapor-retarder tape matching factory-applied jacket with acrylic adhesive.
4. Standard: ASTM C1136.
5. Width: [**3 inches (75 mm)**]<**Insert value**> .
6. Thickness: [**6.5 mils (0.16 mm)**]<**Insert value**> .
7. Adhesion: [**90 ounces force/inch (1.0 N/mm)**]<**Insert value**> in width.
8. Elongation: [**2**]<**Insert number**> percent.
9. Tensile Strength: [**40 lbf/inch (7.2 N/mm)**]<**Insert value**> in width.
10. FSK Tape Disks and Squares: Precut disks or squares of FSK tape.

C. Vapor-Retarder Tape for PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Ideal Tape Co., Inc., an American Biltrite Company**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**3M Industrial Adhesives and Tapes Division**]
    b. [**Ideal Tape Co., Inc., an American Biltrite Company**]
    c. <**Insert manufacturer's name**>

3. Description: White, vapor-retarder tape matching field-applied PVC jacket with acrylic adhesive.
4. Suitable for indoor and outdoor applications.
5. Width: [**2 inches (50 mm)**]<**Insert value**> .
6. Thickness: [**6 mils (0.15 mm)**]<**Insert value**> .
7. Adhesion: [**64 ounces force/inch (0.7 N/mm)**]<**Insert value**> in width.
8. Elongation: 500 percent.
9. Tensile Strength: **18 lbf/inch (3.3 N/mm)** in width.

D. Vapor-Retarder Tape - Aluminum Foil:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**3M Industrial Adhesives and Tapes Division**]
    b. [**Avery Dennison Corporation, Specialty Tapes Division**]
    c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
    d. [**Knauf Insulation**]
    e. [**Sekisui Voltek, LLC**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**3M Industrial Adhesives and Tapes Division**]
    b. [**Avery Dennison Corporation, Specialty Tapes Division**]
    c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
    d. [**Knauf Insulation**]
    e. [**Sekisui Voltek, LLC**]
    f. <**Insert manufacturer's name**>

3. Description: Aluminum-foil vapor-retarder tape with acrylic adhesive.
4. Width: [**2 inches (50 mm)**]<**Insert value**> .
5. Thickness: [**3.7 mils (0.093 mm)**]<**Insert value**> .
6. Adhesion: [**100 ounces force/inch (1.1 N/mm)**]<**Insert value**> in width.
7. Elongation: [**5**]<**Insert number**> percent.
8. Tensile Strength: [**34 lbf/inch (6.2 N/mm)**]<**Insert value**> in width.

E. Vapor-Retarder Tape - PVDC, for Indoor Applications:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]

b. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. **[Johns Manville; a Berkshire Hathaway company]**
   b. **<Insert manufacturer's name>**

3. Description: White vapor-retarder PVDC tape with acrylic adhesive, for indoor applications.
4. Width: **[3 inches (75 mm)]<Insert value>** .
5. Film Thickness: **[6 mils (0.15 mm)]<Insert value>** .
6. Adhesive Thickness: **[1.5 mils (0.04 mm)]<Insert value>** .
7. Elongation at Break: **[145]<Insert value>** percent.
8. Tensile Strength: **[55 psi (138 kPa)]<Insert value>** in width.

F. Vapor-Retarder Tape -PVDC, for Outdoor Applications:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :

   a. **[Johns Manville; a Berkshire Hathaway company]**
   b. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. **[Johns Manville; a Berkshire Hathaway company]**
   b. **<Insert manufacturer's name>**

3. Description: White vapor-retarder PVDC tape with acrylic adhesive, for outdoor applications.
4. Width: **[3 inches (75 mm)]<Insert value>** .
5. Film Thickness: **[6 mils (0.15 mm)]<Insert value>** .
6. Adhesive Thickness: **[1.5 mils (0.04 mm)]<Insert value>** .
7. Elongation at Break: **[145]<Insert number>** percent.
8. Tensile Strength: **[55 psi (379 kPa)]<Insert value>** in width.

2.17 INSULATION SECUREMENTS

A. Insulation Bands:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :

   a. **[Johns Manville; a Berkshire Hathaway company]**
   b. **[RPR Products, Inc.]**
   c. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**RPR Products, Inc.**]
c. <**Insert manufacturer's name**>

3. Insulation Bands - Stainless Steel: ASTM A240/A240M, [**Type 304**][**or**][**Type 316**] ; **0.015 inch (0.38 mm)** thick, [**1/2 inch (13 mm)**][**3/4 inch (19 mm)**] wide with [**wing seal**][**or**][**closed seal**] .
4. Insulation Bands - Aluminum: **ASTM B209 (ASTM B209M)**, Alloy 3003, 3005, 3105, or 5005; Temper H-14, **0.020 inch (0.51 mm)** thick, [**1/2 inch (13 mm)**][**3/4 inch (19 mm)**] wide with [**wing seal**][**or**][**closed seal**] .
5. Springs: Twin spring set constructed of stainless steel with ends flat and slotted to accept metal bands. Spring size is determined by manufacturer for application.

B. Insulation Pins and Hangers:

1. Insulation Pins and Hangers - Capacitor-Discharge-Weld Pins:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]
4) [**Nelson Stud Welding**]
5) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]
4) [**Nelson Stud Welding**]
5) <**Insert manufacturer's name**>

c. Copper- or zinc-coated steel pin, fully annealed for capacitor-discharge welding.
d. Shank: [**0.106-inch- (2.6-mm-)**][**0.135-inch- (3.5-mm-)**] diameter.
e. Length: To suit depth of insulation indicated.

2. Insulation Pins and Hangers - Cupped-Head, Capacitor-Discharge-Weld Pins:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**AGM Industries, Inc**]
2) [**CL WARD & Family Inc.**]
3) [**Gemco**]
4) [**Midwest Fasteners, Inc**]
5) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1) **[AGM Industries, Inc]**
2) **[CL WARD & Family Inc.]**
3) **[Gemco]**
4) **[Midwest Fasteners, Inc]**
5) **<Insert manufacturer's name>**

c. Copper- or zinc-coated steel pin, fully annealed for capacitor-discharge welding.
d. Shank: [**0.106-inch- (2.6-mm-)**][**0.135-inch- (3.5-mm-)**] diameter.
e. Length: To suit depth of insulation indicated, with integral **1-1/2-inch (38-mm)** galvanized carbon-steel washer.

3. Insulation Pins and Hangers - Metal, Adhesively Attached, Perforated Base:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) **[AGM Industries, Inc]**
2) **[CL WARD & Family Inc.]**
3) **[Gemco]**
4) **[Midwest Fasteners, Inc]**
5) **[Nelson Stud Welding]**
6) **<Insert manufacturer's name>**

b. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1) **[AGM Industries, Inc]**
2) **[CL WARD & Family Inc.]**
3) **[Gemco]**
4) **[Midwest Fasteners, Inc]**
5) **[Nelson Stud Welding]**
6) **<Insert manufacturer's name>**

c. Description: Baseplate welded to projection spindle that is capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place.
d. Baseplate: Perforated, galvanized carbon-steel sheet, **0.030 inch (0.76 mm)** thick by **2 inches (50 mm)** square.
e. Spindle: [**Copper- or zinc-coated, low-carbon steel**][**Aluminum**][**Stainless steel**] , fully annealed, **0.106-inch- (2.6-mm-)** diameter shank; length to suit depth of insulation indicated.
f. Adhesive: Recommended by hanger manufacturer. Use product with demonstrated capability to bond insulation hanger securely to substrates indicated without damaging insulation, hangers, and substrates.

4. Insulation Hangers - Nonmetal, Adhesively Attached, Perforated Base:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following] :

1) [**Gemco**]
2) [**Midwest Fasteners, Inc**]
3) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**Gemco**]
2) [**Midwest Fasteners, Inc**]
3) <**Insert manufacturer's name**>

c. Description: Baseplate fastened to projecting spindle that is capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place.
d. Baseplate Material: Perforated, nylon sheet, **0.030 inch (0.76 mm)** thick by **1-1/2 inches (38 mm)** in diameter.
e. Spindle: Nylon, **0.106-inch- (2.6-mm-)** diameter shank; length to suit depth of insulation indicated, up to **2-1/2 inches (63 mm)**.
f. Adhesive: Recommended by hanger manufacturer. Use product with demonstrated capability to bond insulation hanger securely to substrates indicated without damaging insulation, hangers, and substrates.

5. Insulation Hangers - Self-Sticking-Base:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]
4) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]
4) <**Insert manufacturer's name**>

c. Description: Baseplate welded to projecting spindle that is capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place.
d. Baseplate Material: Galvanized carbon-steel sheet, **0.030 inch (0.76 mm)** thick by **2 inches (50 mm)** square.
e. Spindle: [**Copper- or zinc-coated, low-carbon steel**][**Aluminum**][**Stainless steel**] , fully annealed; **0.106-inch- (2.6-mm-)** diameter shank, length to suit depth of insulation indicated.
f. Adhesive-backed base with a peel-off protective cover.

6. Insulation Washers - Insulation Retaining:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]
4) [**Nelson Stud Welding**]
5) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]
4) [**Nelson Stud Welding**]
5) <**Insert manufacturer's name**>

c. Description: Self-locking washers formed from **0.016-inch- (0.41-mm-)** thick, [**galvanized-steel**][**aluminum**][**stainless steel**] sheet, with beveled edge sized as required to hold insulation securely in place but not less than **1-1/2 inches (38 mm)** in diameter.

d. Protect ends with capped self-locking washers incorporating a spring steel insert to ensure permanent retention of cap in exposed locations.

7. Insulation Washers - Nonmetal, Insulation Retaining:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**Gemco**]
2) [**Midwest Fasteners, Inc**]
3) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**Gemco**]
2) [**Midwest Fasteners, Inc**]
3) <**Insert manufacturer's name**>

c. Description: Self-locking washers formed from **0.016-inch- (0.41-mm-)** thick nylon sheet, with beveled edge sized as required to hold insulation securely in place but not less than **1-1/2 inches (38 mm)** in diameter.

C. Insulation Staples: Outward-clinching insulation staples, nominal **3/4-inch- (19-mm-)** wide, stainless steel or Monel.

D. Insulation Wire:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**C & F Wire Products**]
    b. [**Johns Manville; a Berkshire Hathaway company**]
    c. [**RPR Products, Inc.**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**C & F Wire Products**]
    b. [**Johns Manville; a Berkshire Hathaway company**]
    c. [**RPR Products, Inc.**]
    d. <**Insert manufacturer's name**>

3. Description: [**0.080-inch (2.0-mm) nickel-copper alloy**][**0.062-inch (1.6-mm) soft-annealed, stainless steel**][**0.062-inch (1.6-mm) soft-annealed, galvanized steel**] .

2.18 INSULATION CORNER ANGLES

A. Insulation Corner Angles - PVC:

1. Thickness: Minimum [**30-mils (0.8-mm-)**]<**Insert dimension**> .
2. Dimensions: Minimum **1- by 1-inch (25- by 25-mm)**.
3. Material: PVC in accordance with ASTM D1784, Class 16354-C, white or color-coded to match adjacent surface.

B. Insulation Corner Angles - Aluminum:

1. Thickness: Minimum [**0.040-inch (1.0-mm-)**]<**Insert dimension**> .
2. Dimensions: Minimum **1- by 1-inch (25- by 25-mm)**.
3. Material: Aluminum in accordance with **ASTM B209 (ASTM B209M)**, Alloy 3003, 3005, 3105, or 5005; Temper H-14.

C. Insulation Corner Angles - Stainless Steel:

1. Thickness: [**0.024-inch (0.61-mm-)**]<**Insert dimension**> .
2. Dimensions: Minimum **1- by 1-inch (25- by 25-mm)**.
3. Material: Stainless steel in accordance with ASTM A240/A240M, [**Type 304**][**or**][**Type 316**] .

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions for compliance with requirements for installation tolerances and other conditions affecting performance of insulation application.

1. Verify that equipment to be insulated has been tested and is free of defects.

2. Verify that surfaces to be insulated are clean and dry.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Clean and dry surfaces to receive insulation. Remove materials that will adversely affect insulation application.

B. Clean and prepare surfaces to be insulated. Before insulating, apply a corrosion coating to insulated surfaces as follows:

1. Stainless Steel: Coat 300 series stainless steel with an epoxy primer **5 mils (0.127 mm)** thick and an epoxy finish **5 mils (0.127 mm)** thick if operating in a temperature range between **140 and 300 deg F (60 and 149 deg C)**. Consult coating manufacturer for appropriate coating materials and application methods for operating temperature range.
2. Carbon Steel: Coat carbon steel operating at a service temperature between **32 and 300 deg F (0 and 149 deg C)** with an epoxy coating. Consult coating manufacturer for appropriate coating materials and application methods for operating temperature range.

C. Coordinate insulation installation with the tradesman installing heat tracing. Comply with requirements for heat tracing that apply to insulation.

D. Mix insulating cements with clean potable water; if insulating cements are to be in contact with stainless steel surfaces, use demineralized water.

3.3 INSTALLATION OF EQUIPMENT INSULATION, GENERAL

A. Install insulation materials, accessories, and finishes with smooth, straight, and even surfaces; free of voids throughout the length of equipment.

B. Install insulation materials, forms, vapor barriers or retarders, jackets, and of thicknesses required for each item of equipment, as specified in insulation system schedules.

C. Install accessories compatible with insulation materials and suitable for the service. Install accessories that do not corrode, soften, or otherwise attack insulation or jacket in either wet or dry state.

D. Install insulation with longitudinal seams at top and bottom of horizontal runs.

E. Install multiple layers of insulation with longitudinal and end seams staggered.

F. Keep insulation materials dry during storage, application, and finishing. Replace insulation materials that get wet during storage or in the installation process before being properly covered and sealed in accordance with Contract Documents [**, unless otherwise approved by the engineer of record**] .

G. Install insulation with tight longitudinal seams and end joints. Bond seams and joints with adhesive recommended by insulation material manufacturer.

H. Install insulation with least number of joints practical.

I. Where vapor barrier is indicated, seal joints, seams, and penetrations in insulation at hangers, supports, anchors, and other projections with vapor-barrier mastic.

1. Install insulation continuously through hangers and around anchor attachments.
2. For insulation application where vapor barriers are indicated, extend insulation on anchor legs from point of attachment to supported item to point of attachment to structure. Taper and seal ends attached to structure with vapor-barrier mastic.
3. Install insert materials and insulation to tightly join the insert. Seal insulation to insulation inserts with adhesive or sealing compound recommended by insulation material manufacturer.
4. Cover inserts with jacket material matching adjacent insulation. Install shields over jacket, arranged to protect jacket from tear or puncture by hanger, support, and shield.

J. Apply adhesives, mastics, and sealants at manufacturer's recommended coverage rate and wet and dry film thicknesses.

K. Install insulation with factory-applied jackets as follows:

1. Draw jacket tight and smooth, but not to the extent of creating wrinkles or area of compression in the insulation.
2. Cover circumferential joints with **3-inch- (75-mm-)** wide strips, of same material as insulation jacket. Secure strips with adhesive and outward-clinching staples along both edges of strip, spaced **4 inches (100 mm)** o.c.
3. Overlap jacket longitudinal seams at least **1-1/2 inches (38 mm)**. Clean and dry surface to receive self-sealing lap. Staple laps with outward-clinching staples along edge at [**2 inches (50 mm)**][**4 inches (100 mm)**] o.c.

    a. For below-ambient services, apply vapor-barrier mastic over staples.

4. Cover joints and seams with tape, in accordance with insulation material manufacturer's written instructions, to maintain vapor seal.
5. Where vapor barriers are indicated, apply vapor-barrier mastic on seams and joints.

L. Cut insulation in a manner to avoid compressing insulation.

M. Finish installation with systems at operating conditions. Repair joint separations and cracking due to thermal movement.

N. Repair damaged insulation facings by applying same facing material over damaged areas. Extend patches at least **4 inches (100 mm)** beyond damaged areas. Adhere, staple, and seal patches in similar fashion to butt joints.

O. For above-ambient services, do not install insulation to the following:

1. Vibration-control devices.
2. Testing agency labels and stamps.
3. Nameplates and data plates.
4. Manholes.
5. Handholes.
6. Cleanouts.

P. Insulation Installation on Pumps:

1. Fabricate metal boxes lined with insulation. Fit boxes around pumps and coincide box joints with splits in pump casings. Fabricate joints with outward bolted flanges. Bolt flanges on **6-inch (150-mm)** centers, starting at corners. Install **3/8-inch- (10-mm-)** diameter fasteners with wing nuts. Alternatively, secure the box sections together using a field-adjustable latching mechanism.
2. Fabricate boxes from [**galvanized steel**][**aluminum**][**or**][**stainless steel**] , at least [**0.040 inch (1.0 mm)**][**0.050 inch (1.3 mm)**][**0.060 inch (1.6 mm)**] thick.
3. For below-ambient services, install a vapor barrier at seams, joints, and penetrations. Seal

between flanges with replaceable gasket material to form a vapor barrier.

3.4 INSTALLATION OF MINERAL WOOL EQUIPMENT INSULATION

A. Secure mineral wool equipment insulation with adhesive and anchor pins and speed washers.

B. Apply adhesives in accordance with manufacturer's recommended coverage rates per unit area, for [**100**][**50**]<**Insert number**> percent coverage of tank and vessel surfaces.

C. Groove and score insulation materials to fit as closely as possible to equipment, including contours. Bevel insulation edges for cylindrical surfaces for tight joints. Stagger end joints.

D. Protect exposed corners with secured corner angles.

E. Install adhesively attached or self-sticking insulation hangers and speed washers on sides of tanks and vessels as follows:

1. Do not weld anchor pins to ASME-labeled pressure vessels.
2. Select insulation hangers and adhesive that are compatible with service temperature and with substrate.
3. On tanks and vessels, maximum anchor-pin spacing is to be **3 inches (75 mm)** from insulation end joints and **16 inches (400 mm)** o.c. in both directions.
4. Do not compress insulation during installation.
5. Cut and miter insulation segments to fit curved sides and domed heads of tanks and vessels.
6. Impale insulation over anchor pins, and attach speed washers.
7. Cut excess portion of pins extending beyond speed washers or bend parallel with insulation surface. Cover exposed pins and washers with tape matching insulation facing.

F. Secure each layer of insulation with stainless steel or aluminum bands. Select band material compatible with insulation materials.

G. Where insulation hangers on equipment and vessels are not permitted or practical and where insulation support rings are not provided, install a girdle network for securing insulation. Stretch prestressed aircraft cable around the diameter of vessel and make taut with clamps, turnbuckles, or breather springs. Place one circumferential girdle around equipment approximately **6 inches (150 mm)** from each end. Install wire or cable between two circumferential girdles **12 inches (300 mm)** o.c. Install a wire ring around each end and around outer periphery of center openings, and stretch prestressed aircraft cable radially from the wire ring to nearest circumferential girdle. Install additional circumferential girdles along the body of equipment or tank at a minimum spacing of **48 inches (1200 mm)** o.c. Use this network for securing insulation with tie wire or bands.

H. Stagger joints between insulation layers at least **3 inches (75 mm)**.

I. Install insulation in removable and replaceable segments on equipment access doors, manholes, handholes, and other elements that require frequent removal for service and inspection.

J. Bevel and seal insulation ends around manholes, handholes, ASME stamps, and nameplates.

K. For equipment with surface temperatures below ambient, apply mastic to open ends, joints, seams, breaks, and punctures in insulation.

3.5 INSTALLATION OF GLASS-FIBER EQUIPMENT INSULATION

A. Secure glass-fiber equipment insulation with adhesive and anchor pins and speed washers.

B. Apply adhesives in accordance with manufacturer's recommended coverage rates per unit area, for [**100**][**50**]<**Insert number**> percent coverage of tank and vessel surfaces.

C. Groove and score insulation materials to fit as closely as possible to equipment, including contours. Bevel insulation edges for cylindrical surfaces for tight joints. Stagger end joints.

D. Protect exposed corners with secured corner angles.

E. Install adhesively attached or self-sticking insulation hangers and speed washers on sides of tanks and vessels as follows:

1. Do not weld anchor pins to ASME-labeled pressure vessels.
2. Select insulation hangers and adhesive that are compatible with service temperature and with substrate.
3. On tanks and vessels, maximum anchor-pin spacing is to be **3 inches (75 mm)** from insulation end joints and **16 inches (400 mm)** o.c. in both directions.
4. Do not compress insulation during installation.
5. Cut and miter insulation segments to fit curved sides and domed heads of tanks and vessels.
6. Impale insulation over anchor pins, and attach speed washers.
7. Cut excess portion of pins extending beyond speed washers or bend parallel with insulation surface. Cover exposed pins and washers with tape matching insulation facing.
8. Secure each layer of insulation with stainless steel or aluminum bands. Select band material compatible with insulation materials.
9. Where insulation hangers on equipment and vessels are not permitted or practical and where insulation support rings are not provided, install a girdle network for securing insulation. Stretch prestressed aircraft cable around the diameter of vessel and make taut with clamps, turnbuckles, or breather springs. Place one circumferential girdle around equipment approximately **6 inches (150 mm)** from each end. Install wire or cable between two circumferential girdles **12 inches (300 mm)** o.c. Install a wire ring around each end and around outer periphery of center openings, and stretch prestressed aircraft cable radially from the wire ring to nearest circumferential girdle. Install additional circumferential girdles along the body of equipment or tank at a minimum spacing of **48 inches (1200 mm)** o.c. Use this network for securing insulation with tie wire or bands.
10. Stagger joints between insulation layers at least **3 inches (75 mm)**.
11. Install insulation in removable and replaceable segments on equipment access doors, manholes, handholes, and other elements that require frequent removal for service and inspection.
12. Bevel and seal insulation ends around manholes, handholes, ASME stamps, and nameplates.
13. For equipment with surface temperatures below ambient, apply mastic to open ends, joints, seams, breaks, and punctures in insulation.

3.6 INSTALLATION OF CALCIUM SILICATE EQUIPMENT INSULATION

A. On Domestic Water Boiler Breechings:

1. Secure single-layer insulation with stainless steel bands at **12-inch (300-mm)** intervals, and tighten bands without deforming insulation material.
2. Install two-layer insulation with joints tightly butted and staggered at least **3 inches (75 mm)**. Secure inner layer with wire spaced at **12-inch (300-mm)** intervals. Secure outer layer with stainless steel bands at **12-inch (300-mm)** intervals.
3. On exposed applications without metal jacket, finish insulation surface with a skim coat of mineral-fiber, hydraulic-setting cement. When cement is dry, apply flood coat of lagging adhesive

and press on one layer of glass cloth. Overlap edges at least 1 inch (25 mm). Apply finish coat of lagging adhesive over glass cloth. Thin finish coat to achieve smooth, uniform finish.

3.7 INSTALLATION OF FLEXIBLE ELASTOMERIC EQUIPMENT INSULATION

A. Install in accordance with manufacturer's written installation instructions and ASTM C1710.

B. Apply [**100**]<**Insert value**> percent coverage of adhesive to surface with manufacturer's recommended adhesive.

C. Seal longitudinal seams and end joints with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

D. Finish: After adhesive has fully cured, apply two coats of insulation manufacturer's recommended protective coating.

3.8 INSTALLATION OF WOVEN GLASS-FIBER CLOTH

A. Where woven glass-fiber jackets are indicated, install directly over bare insulation or insulation with factory-applied jackets.

1. Draw jacket smooth and tight to surface with 2-inch (50-mm) overlap at seams and joints.
2. Embed glass cloth between two 0.062-inch- (1.6-mm-) thick coats of lagging adhesive.
3. Completely encapsulate insulation with coating, leaving no exposed insulation.

3.9 INSTALLATION OF FIELD-APPLIED INSULATION JACKETS

A. Insulation Jacket, Field-Applied - FSK:

1. Draw jacket material smooth and tight.
2. Install lap or joint strips with same material as jacket.
3. Secure jacket to insulation with manufacturer's recommended adhesive.
4. Install jacket with 1-1/2-inch (38-mm) laps at longitudinal seams and 3-inch- (75-mm-) wide joint strips at end joints.
5. Seal openings, punctures, and breaks in vapor-retarder jackets and exposed insulation with vapor-barrier mastic.

B. Insulation Jacket, Field-Applied - PVC:

1. Install with 1-inch (25-mm) overlap at longitudinal seams and end joints; for horizontal applications, install with longitudinal seams along top and bottom of tanks and vessels. Seal with manufacturer's recommended adhesive.
2. Apply two continuous beads of adhesive to seams and joints, one bead under lap and the finish bead along seam and joint edge.

C. Insulation Jacket, Field-Applied - Metal:

1. Where metal jackets are indicated, install with 2-inch (50-mm) overlap at longitudinal seams and end joints.
2. Overlap longitudinal seams arranged to shed water.
3. Seal end joints with weatherproof sealant recommended by insulation manufacturer.

4. Secure jacket with stainless steel bands **12 inches (300 mm)** o.c. and at end joints.

D. Insulation Jacket, Field-Applied - PVDC:

1. Jacket can be wrapped in cigarette fashion along length of roll for insulation systems with an outer circumference of **33-1/2 inches (850 mm)** or less. A **33-1/2-inch- (850-mm-)** circumference limit allows for **2-inch- (50-mm-)** overlap seal.
2. Using the length of roll allows for longer sections of jacket to be installed at one time. Use adhesive on the lap seal. Visually inspect lap seal for "fishmouthing," and use PVDC tape along lap seal to secure joint.
3. Repair holes or tears in PVDC jacket by placing PVDC tape over the hole or tear and wrapping a minimum of 1-1/4 circumferences to avoid damage to tape edges.

E. Insulation Jacket, Field-Applied - PVDC-SSL:

1. Apply three separate wraps of filament tape per insulation section to secure pipe insulation to pipe prior to installation of PVDC jacket.
2. Wrap presized jackets around individual pipe insulation sections, with one end overlapping the previously installed sheet. Install presized jacket with an approximate overlap at butt joint of **2 inches (50 mm)** over the previous section. Adhere lap seal using adhesive or SSL, and then apply 1-1/4 circumferences of appropriate PVDC tape around overlapped butt joint.
3. Continuous jacket can be spiral-wrapped around a length of pipe insulation. Apply adhesive or PVDC tape at overlapped spiral edge. When electing to use adhesives, refer to manufacturer's written instructions for application of adhesives along this spiral edge to maintain a permanent bond.
4. Jacket can be wrapped in cigarette fashion along length of roll for insulation systems with an outer circumference of **33-1/2 inches (850 mm)** or less. The **33-1/2-inch- (850-mm-)** circumference limit allows for **2-inch- (50-mm-)** overlap seal. Using the length of roll allows for longer sections of jacket to be installed at one time. Use adhesive on the lap seal. Visually inspect lap seal for "fishmouthing," and use PVDC tape along lap seal to secure joint.
5. Repair holes or tears in PVDC jacket by placing PVDC tape over the hole or tear and wrapping a minimum of 1-1/4 circumferences to avoid damage to tape edges.

3.10 FINISHES

A. Equipment Insulation with ASJ, Glass-Cloth, or Other Paintable Jacket Material: Paint jacket with paint system identified below and as specified in Section 099113 "Exterior Painting" and Section 099123 "Interior Painting."

1. Flat Acrylic Finish: [**Two**]<**Insert number**> finish coats over a primer that is compatible with jacket material and finish coat paint. Add fungicidal agent to render fabric mildew proof.

    a. Finish Coat Material: Interior, flat, latex-emulsion size.

B. Color: Final color as selected by Architect. Vary first and second coats to allow visual inspection of the completed Work.

C. Do not field paint aluminum or stainless steel jackets.

3.11 FIELD QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections [**with the assistance of a factory-authorized service representative**] .

D. Tests and Inspections: Inspect field-insulated equipment, randomly selected by Architect, by removing field-applied jacket and insulation in layers in reverse order of their installation. Extent of inspection is limited to [**one**]<**Insert number**> location(s) for each type of equipment defined in the "Indoor Plumbing Equipment Insulation Schedule" Article. For large equipment, remove only a portion adequate to determine compliance.

E. All insulation applications will be considered defective if they do not pass tests and inspections.

F. Prepare test and inspection reports.

3.12 DOMESTIC WATER BOILER BREECHING INSULATION SCHEDULE

A. Round, exposed breeching and connector insulation is to be one of the following:

1. Equipment Insulation - Calcium Silicate: **4 inches (100 mm)** thick.
2. Equipment Insulation - High-Temperature Glass-Fiber Blanket: **3 inches (75 mm)** thick and **3 lb/cu. ft. (48-kg/cu. m)** nominal density.
3. Equipment Insulation - Mineral Wool Blanket: **3 inches (75 mm)** thick and **4 lb/cu. ft. (64 kg/cu. m)** nominal density.

B. Round, concealed breeching and connector insulation is to be one of the following:

1. Equipment Insulation - Calcium Silicate: **4 inches (100 mm)** thick.
2. Equipment Insulation - High-Temperature Glass-Fiber Blanket: **3 inches (75 mm)** thick and **3 lb/cu. ft. (48 kg/cu. m)** nominal density.
3. Equipment Insulation - Mineral Wool Blanket: **3 inches (75 mm)** thick and **4 lb/cu. ft. (64 kg/cu m)** nominal density.

C. Rectangular, exposed breeching and connector insulation is to be one of the following:

1. Equipment Insulation - Calcium Silicate: **4 inches (100 mm)** thick.
2. Equipment Insulation - High-Temperature Glass-Fiber Blanket: **3 inches (75 mm)** thick and **3 lb/cu. ft. (48 kg/cu. m)** nominal density.
3. Equipment Insulation - High-Temperature Glass-Fiber Board: **3 inches (75 mm)** thick and [**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
4. Equipment Insulation - Mineral Wool Blanket: **3 inches (75 mm)** thick and **4 lb/cu. ft. (64 kg/cu. m)** nominal density.
5. Equipment Insulation - Mineral Wool Board: **3 inches (75 mm)** thick and [**4 lb/cu. ft. (64 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.

D. Rectangular, concealed breeching and connector insulation is to be one of the following:

1. Equipment Insulation - Calcium Silicate: **4 inches (100 mm)** thick.
2. Equipment Insulation - High-Temperature Glass-Fiber Blanket: **3 inches (75 mm)** thick and **3 lb/cu. ft. (48 kg/cu. m)** nominal density.
3. Equipment Insulation - High-Temperature Glass-Fiber Board: **3 inches (75 mm)** thick and [**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
4. Equipment Insulation - Mineral Wool Blanket: **3 inches (75 mm)** thick and [**4 lb/cu. ft. (64 kg/cu. m)**]<**Insert density**> nominal density.

5. Equipment Insulation - Mineral Wool Board: **3 inches (75 mm)** thick and [**4 lb/cu. ft. (64 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.

3.13 INDOOR PLUMBING EQUIPMENT INSULATION SCHEDULE

A. Insulation materials and thicknesses are identified below. If more than one material is listed for a type of equipment, selection from materials listed is Contractor's option.

B. Insulate indoor and outdoor equipment that is not factory insulated.

C. Heat-exchanger (water-to-water for domestic water-heating service) insulation is to be one of the following:

1. Equipment Insulation - Calcium Silicate: [**3 inches (75 mm)**]<**Insert dimension**> thick.
2. Equipment Insulation - Cellular Glass: [**3 inches (75 mm)**]<**Insert dimension**> thick.
3. Equipment Insulation - Glass-Fiber Blanket: [**2 inches (50 mm)**]<**Insert dimension**> thick and [**2 lb/cu. ft. (32 kg/cu. m)**][**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
4. Equipment Insulation - Glass-Fiber Board: [**2 inches (50 mm)**]<**Insert dimension**> thick and [**2 lb/cu. ft. (32 kg/cu. m)**][**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
5. Equipment Insulation - Glass-Fiber, Pipe and Tank: [**2 inches (50 mm)**]<**Insert dimension**> thick.
6. Equipment Insulation - Mineral Wool Blanket: [**2 inch (50 mm)**]<**Insert dimension**> thick and [**4 lb/cu. ft. (64 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**]<**Insert density**> nominal density.
7. Equipment Insulation - Mineral Wool Board: [**2 inch (50 mm)**]<**Insert dimension**> thick and [**4 lb/cu. ft. (64 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**]<**Insert density**> nominal density.
8. Equipment Insulation - Mineral Wool, Pipe and Tank: [**2 inch (50 mm)**]<**Insert dimension**> thick.

D. Steam-to-hot-water converter insulation is to be one of the following:

1. Equipment Insulation - Calcium Silicate: [**3 inches (75 mm)**]<**Insert dimension**> thick.
2. Equipment Insulation - Cellular Glass: [**3 inches (75 mm)**]<**Insert dimension**> thick.
3. Equipment Insulation - Glass-Fiber Blanket: [**2 inches (50 mm)**]<**Insert dimension**> thick and [**2 lb/cu. ft. (32 kg/cu. m)**][**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
4. Equipment Insulation - Glass-Fiber Board: [**2 inches (50 mm)**]<**Insert dimension**> thick and [**2 lb/cu. ft. (32 kg/cu. m)**][**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
5. Equipment Insulation - Glass-Fiber, Pipe and Tank: [**2 inches (50 mm)**]<**Insert dimension**> thick.
6. Equipment Insulation - Mineral Wool Blanket: [**2 inch (50 mm)**]<**Insert dimension**> thick and [**4 lb/cu. ft. (64 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**][**8 lb/cu. ft. (128 kg/cu. m)**]<**Insert density**> nominal density.
7. Equipment Insulation - Mineral Wool Board: [**2 inch (50 mm)**]<**Insert dimension**> thick and [**4 lb/cu. ft. (64 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**][**8 lb/cu. ft. (128 kg/cu. m)**]<**Insert density**> nominal density.
8. Equipment Insulation - Mineral Wool, Pipe and Tank: [**2 inch (38 mm)**]<**Insert dimension**> thick.

E. Domestic water pump insulation is to be one of the following:

1. Equipment Insulation - Cellular Glass: [**2 inches (50 mm)**]<**Insert dimension**> thick.
2. Equipment Insulation - Glass-Fiber Blanket: [**1 inch (25 mm)**]<**Insert dimension**> thick and [**2 lb/cu. ft. (32 kg/cu. m)**][**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
3. Equipment Insulation - Glass-Fiber Board: [**1 inch (25 mm)**]<**Insert dimension**> thick and [**2 lb/cu. ft. (32 kg/cu. m)**][**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
4. Equipment Insulation - Mineral Wool Blanket: [**1 inch (25 mm)**]<**Insert dimension**> thick and [**4 lb/cu. ft. (64 kg/cu. m)**][**6 lb/cu. ft. (96 kg/cu. m)**] nominal density.
5. Equipment Insulation - Mineral Wool Board: [**1 inch (25 mm)**]<**Insert dimension**> thick and [**4**

lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.

F. Domestic chilled-water (potable) pump insulation is to be one of the following:

1. Equipment Insulation - Cellular Glass: [3 inches (75 mm)]<**Insert dimension**> thick.
2. Equipment Insulation - Glass-Fiber Blanket: [2 inches (50 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
3. Equipment Insulation - Glass-Fiber Board: [2 inches (50 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
4. Equipment Insulation - Mineral Wool Blanket: [2 inch (50 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)][8 lb/cu. ft. (128 kg/cu. m)]<**Insert density**> nominal density.
5. Equipment Insulation - Mineral Wool Board: [2 inch (50 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)][8 lb/cu. ft. (128 kg/cu. m)]<**Insert density**> nominal density.

G. Domestic hot-water pump insulation is to be one of the following:

1. Equipment Insulation - Cellular Glass: [2 inches (50 mm)]<**Insert dimension**> thick.
2. Equipment Insulation - Glass-Fiber Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
3. Equipment Insulation - Glass-Fiber Board: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
4. Equipment Insulation - Mineral Wool Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.
5. Equipment Insulation - Mineral Wool Board: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.

H. Domestic water, domestic chilled-water (potable), and domestic hot-water hydropneumatic tank insulation are to be one of the following:

1. Equipment Insulation - Cellular Glass: [2 inches (50 mm)]<**Insert dimension**> thick.
2. Equipment Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
3. Equipment Insulation - Glass-Fiber Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
4. Equipment Insulation - Glass-Fiber Board: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
5. Equipment Insulation - Glass-Fiber, Pipe and Tank: [1 inch (25 mm)]<**Insert dimension**> thick.
6. Equipment Insulation - Mineral Wool Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)][8 lb/cu. ft. (128 kg/cu. m)]<**Insert density**> nominal density.
7. Equipment Insulation - Mineral Wool Board: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)][8 lb/cu. ft. (128 kg/cu. m)]<**Insert density**> nominal density.
8. Equipment Insulation - Mineral Wool, Pipe and Tank: [1.5 inch (38 mm)]<**Insert dimension**> thick.
9. Equipment Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

I. Domestic hot-water storage tank insulation is to be one of the following, of R-value indicated:

1. R-value: [**12.5**]<**Insert value**> .
2. Equipment Insulation - Cellular glass.
3. Equipment Insulation - Glass-Fiber Blanket: [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
4. Equipment Insulation - Glass-Fiber Board: [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6

lb/cu. ft. (96 kg/cu. m)] nominal density.
5. Equipment Insulation - Glass-fiber pipe and tank.
6. Equipment Insulation - Mineral Wool Blanket: [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)][8 lb/cu. ft. (128 kg/cu. m)]<**Insert density**> nominal density.
7. Equipment Insulation - Mineral Wool Board: [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)][8 lb/cu. ft. (128 kg/cu. m)]<**Insert density**> nominal density.
8. Equipment Insulation - Mineral Wool, Pipe and Tank.

J. Domestic water storage tank insulation is to be one of the following:

1. Equipment Insulation - Cellular Glass: [2 inches (50 mm)]<**Insert dimension**> thick.
2. Equipment Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
3. Equipment Insulation - Glass-Fiber Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
4. Equipment Insulation - Glass-Fiber Board: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
5. Equipment Insulation - Glass-Fiber, Pipe and Tank: [1 inch (25 mm)]<**Insert dimension**> thick.
6. Equipment Insulation - Mineral Wool Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.
7. Equipment Insulation - Mineral Wool Board: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.
8. Equipment Insulation - Mineral Wool, Pipe and Tank: [1.5 inch (38 mm)]<**Insert dimension**> thick.
9. Equipment Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

K. Domestic chilled-water (potable) storage tank insulation is to be one of the following:

1. Equipment Insulation - Cellular Glass: [2 inches (50 mm)]<**Insert dimension**> thick.
2. Equipment Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
3. Equipment Insulation - Glass-Fiber Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
4. Equipment Insulation - Glass-Fiber Board: [1 inch (25 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
5. Equipment Insulation - Glass-Fiber, Pipe and Tank: [1 inch (25 mm)]<**Insert dimension**> thick.
6. Equipment Insulation - Mineral Wool Blanket: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.
7. Equipment Insulation - Mineral Wool Board: [1 inch (25 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.
8. Equipment Insulation - Mineral Wool, Pipe and Tank: [1.5 inch (38 mm)]<**Insert dimension**> thick.
9. Equipment Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

L. Domestic water filter-housing insulation is to be one of the following:

1. Equipment Insulation - Cellular Glass: [3 inches (75 mm)]<**Insert dimension**> thick.
2. Equipment Insulation - Glass-Fiber Blanket: [2 inches (50 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
3. Equipment Insulation - Glass-Fiber Board: [2 inches (50 mm)]<**Insert dimension**> thick and [2 lb/cu. ft. (32 kg/cu. m)][3 lb/cu. ft. (48 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)] nominal density.
4. Equipment Insulation - Glass-Fiber, Pipe and Tank: [2 inches (50 mm)]<**Insert dimension**> thick.
5. Equipment Insulation - Mineral Wool Blanket: [2 inch (50 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.
6. Equipment Insulation - Mineral Wool Board: [2 inch (50 mm)]<**Insert dimension**> thick and [4 lb/cu. ft. (64 kg/cu. m)][6 lb/cu. ft. (96 kg/cu. m)]<**Insert density**> nominal density.
7. Equipment Insulation - Mineral Wool, Pipe and Tank: [2 inch (50 mm)]<**Insert dimension**> thick.

3.14 INDOOR, FIELD-APPLIED INSULATION JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Equipment, Concealed from View:

1. None.
2. PVC: [**Standard**][**Color-coded by system**] .

    a. Thickness: [**20 mils (0.5 mm)**][**30 mils (0.8 mm)**] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

    a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

    a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**] .

5. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth No. 2B finish**][**corrugated**][**stucco embossed**] .

    a. Thickness: [**0.010 inch (0.25 mm)**][**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

D. Equipment, Exposed to View, up to 48 Inches (1200 mm) in Diameter or with Flat Surfaces of up to 72 Inches (1800 mm):

1. None.
2. PVC: [**Standard**][**Color-coded by system**] .

    a. Thickness: [**20 mils (0.5 mm)**][**30 mils (0.8 mm)**] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

    a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

    a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**] .

5. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth No. 2B finish**][**corrugated**][**stucco embossed**] .

    a. Thickness: [**0.010 inch (0.25 mm)**][**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

E. Equipment, Exposed to View, Larger Than 48 Inches (1200 mm) in Diameter or with Flat Surfaces Larger Than 72 Inches (1800 mm):

1. None.
2. Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

3. Painted Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth**][**stucco embossed**] , with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

3.15 OUTDOOR, FIELD-APPLIED INSULATION JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Equipment, Concealed from View:

1. None.
2. PVC: [**Standard**][**Color-coded by system**] :

   a. Thickness: [**20 mils (0.5 mm)**][**30 mils (0.8 mm)**] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

   a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

   a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**] .

5. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth No. 2B finish**][**corrugated**][**stucco embossed**] .

   a. Thickness: [**0.010 inch (0.25 mm)**][**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] thick.

D. Equipment, Exposed to View, up to 48 Inches (1200 mm) in Diameter or with Flat Surfaces of up to 72 Inches (1800 mm):

1. None.
2. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

    a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

3. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**][**with Z-shaped locking seam**] .

    a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth No. 2B finish**][**corrugated**][**stucco embossed**][**with Z-shaped locking seam**] .

    a. Thickness: [**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

E. Equipment, Exposed to View, Larger Than 48 Inches (1200 mm) in Diameter or with Flat Surfaces Larger Than 72 Inches (1800 mm):

1. None.
2. Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

    a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

3. Painted Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

    a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth**][**stucco embossed**] , with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

    a. Thickness: [**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

END OF SECTION 22 07 16 00

SECTION 22 07 19 00 - FIRE-SUPPRESSION SYSTEMS INSULATION

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Calcium silicate fire-suppression system insulation.
2. Cellular glass fire-suppression system insulation.
3. Flexible elastomeric fire-suppression system insulation.
4. Glass-fiber fire-suppression system insulation.
5. Mineral wool fire-suppression system insulation.
6. Phenolic fire-suppression system insulation.
7. Polyisocyanurate fire-suppression system insulation.
8. Polyolefin fire-suppression system insulation.
9. Insulating cements.
10. Insulation adhesives.
11. Insulation mastics and coatings.
12. Insulation sealants.
13. Field-applied insulation jackets.
14. Field-applied fabric-reinforcing mesh for insulation.
15. Field-applied cloths for insulation.
16. Vapor-retarder tapes.
17. Insulation securements.
18. Insulation corner angles.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

1. Include thermal conductivity, water-vapor permeance thickness, and jackets (both factory and field applied if any).

B. Shop Drawings:

1. Include plans, elevations, sections, and attachment details.
2. Detail application of protective shields, saddles, and inserts at hangers for each type of insulation and hanger.
3. Detail attachment and covering of heat tracing inside insulation.
4. Detail insulation application at pipe expansion joints for each type of insulation.
5. Detail insulation application at elbows, fittings, flanges, valves, and specialties for each type of insulation.
6. Detail removable insulation at piping specialties and equipment connections.
7. Detail application of field-applied jackets.
8. Detail application at linkages of control devices.
9. Detail field application for fire-suppression water storage tanks.

C. Samples: For each type of insulation and jacket indicated. Identify each Sample, describing product and intended use. Sample sizes are as follows:

1. Preformed Pipe Insulation Materials: **12 inches (300 mm)** long by **NPS 2 (DN 50)**.

2. Sheet Form Insulation Materials: **12 inches (300 mm)** square.
3. Jacket Materials for Pipe: **12 inches (300 mm)** long by **NPS 2 (DN 50)**.
4. Sheet Jacket Materials: **12 inches (300 mm)** square.
5. Manufacturer's Color Charts: For products where color is specified, show the full range of colors available for each type of finish material.

D. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
2. Product Data: For adhesives, mastics, and sealants, indicating VOC content.
3. Laboratory Test Reports: For adhesives and sealants, indicating compliance with requirements for low-emitting materials.

1.3 INFORMATIONAL SUBMITTALS

A. Material Test Reports: From a qualified testing agency acceptable to authorities having jurisdiction indicating, interpreting, and certifying test results for compliance of insulation materials, sealers, attachments, cements, and jackets, with requirements indicated. Include dates of tests and test methods employed.

B. Field Quality Control Reports: For specified tests and inspections.

C. Qualification Statements: For Installer.

1.4 QUALITY ASSURANCE

A. Installer Qualifications: Skilled mechanics who have successfully completed an apprenticeship program or another craft training program [certified by the Department of Labor, Bureau of Apprenticeship and Training] .

1.5 DELIVERY, STORAGE, AND HANDLING

A. Packaging: Insulation system materials are to be delivered to Project site in unopened containers. The packaging is to include name of manufacturer, fabricator, type, description, and size [as well as ASTM standard designation, and maximum use temperature] .

1.6 COORDINATION

A. Coordinate sizes and locations of supports, hangers, and insulation shields specified in Section 210529 "Hangers and Supports for Fire-Suppression Piping and Equipment."

B. Coordinate clearance requirements with piping Installer for piping insulation application and with equipment Installer for equipment insulation application. Before preparing piping Shop Drawings, establish and maintain clearance requirements for installation of insulation and field-applied jackets and finishes and for space required for maintenance.

C. Coordinate installation and testing of heat tracing.

1.7 SCHEDULING

A. Schedule insulation application after pressure testing systems [**and after installing and testing heat tracing**] . Insulation application may begin on segments that have satisfactory test results.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Surface-Burning Characteristics: For insulation and related materials, as determined by testing identical products in accordance with ASTM E84 by a testing agency acceptable to authorities having jurisdiction. Factory label insulation, jacket materials, adhesive, mastic, tapes, and cement material containers with appropriate markings of applicable testing agency.

1. All Insulation Installed Indoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
2. All Insulation Installed Indoors; Outdoors-Installed Insulation in Contact with Airstream: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
3. All Insulation Installed Indoors and Outdoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.

2.2 FIRE-SUPPRESSION SYSTEM INSULATION MATERIALS, GENERAL

A. Comply with requirements in "Diesel Fire Pump Engine Exhaust Insulation Schedule"; "Fire-Suppression Equipment Insulation Schedule"; "Fire-Suppression System Piping Insulation Schedule, General"; "Indoor Fire-Suppression System Piping Insulation Schedule"; and "Outdoor, Aboveground Piping Insulation Schedule" articles for where insulating materials are applied.

B. Products are not to contain asbestos, lead, mercury, or mercury compounds.

C. Products that come in contact with stainless steel are to have a leachable chloride content of less than 50 ppm when tested in accordance with ASTM C871.

D. Insulation materials for use on austenitic stainless steel are qualified as acceptable in accordance with ASTM C795.

E. Foam insulation materials do not use CFC or HCFC blowing agents in the manufacturing process.

2.3 CALCIUM SILICATE FIRE-SUPPRESSION SYSTEM INSULATION

A. Pipe Insulation - Calcium Silicate, Preformed:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**TPS Industrial; a trademark of Chase Manufacturing, Inc.**]

2. Description: ASTM C533, flat-, curved-, and grooved-block sections of noncombustible, inorganic,

hydrous calcium silicate with a non-asbestos fibrous reinforcement, Type I.
3. Standard: ASTM C533, Type I.
4. Prefabricated Fitting Covers: ASTM C450 and ASTM C585 for dimensions used in preforming insulation to cover valves, elbows, tees, and flanges.

2.4 CELLULAR GLASS FIRE-SUPPRESSION SYSTEM INSULATION

A. Pipe Insulation - Cellular Glass, Preformed:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Owens Corning**]

2. Description: Cellular-glass insulation of inorganic, incombustible, foamed, or cellulated glass with annealed, rigid, hermetically sealed cells.
3. Standard: ASTM C552.
4. Block Insulation: Type I.
5. Special-Shaped Insulation: Type III.
6. Board Insulation: Type IV.
7. Factory-fabricate shapes in accordance with ASTM C450, ASTM C585, and ASTM C1639.
8. Without Insulation Facing: Type II, Class 1.
9. Factory-Applied Insulation Facing: Type II, Class 2.

    a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
    b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.
    c. ASJ+: Aluminum-foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
    d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.5 FLEXIBLE ELASTOMERIC FIRE-SUPPRESSION SYSTEM INSULATION

A. Pipe Insulation - Flexible Elastomeric:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Aeroflex USA**]
    b. [**Armacell LLC**]
    c. [**K-Flex USA**]

2. Description: Closed-cell or expanded-rubber flexible elastomeric pipe insulation.
3. Standard: ASTM C534/C534M, Type I, for tubular materials; Type II for sheet materials.
4. Suitable for maximum use temperature between **minus 70 and plus 220 deg F (minus 57 and plus 104 deg C)**.

2.6 GLASS-FIBER FIRE-SUPPRESSION SYSTEM INSULATION

A. Equipment Insulation - Glass-Fiber Board:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Johns Manville; a Berkshire Hathaway company**]
   c. [**Knauf Insulation**]
   d. [**Manson Insulation Inc.**]
   e. [**Owens Corning**]

2. Description: Glass-fiber board equipment insulation consisting of glass fibers bonded with a thermosetting resin.
3. Standard: ASTM C612, Type IA or Type IB.
4. Suitable for maximum use temperature between **35 and 250 deg F (1.7 and 121 deg C)** for jacketed and between **35 and 450 deg F (1.7 and 232 deg C)** for unfaced in accordance with ASTM C411.
5. Unfaced.
6. Factory-Applied Insulation Facing:

   a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type III.
   b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.

B. Pipe Insulation - Glass-Fiber, Preformed:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**Knauf Insulation**]
   c. [**Manson Insulation Inc.**]
   d. [**Owens Corning**]

2. Description: Glass fibers bonded with a thermosetting resin.
3. Suitable for maximum use temperature up to **850 deg F (454 deg C)** in accordance with ASTM C411. Comply with ASTM C547.
4. Preformed Pipe Insulation: Type I, Grade A.
5. Fabricated shapes in accordance with ASTM C450 and ASTM C585.
6. Unfaced.
7. Factory-Applied Insulation Facing:

   a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
   b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.
   c. ASJ+: Aluminum-foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.

d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

C. Pipe Insulation - Glass-Fiber, Pipe and Tank:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**Knauf Insulation**]
d. [**Manson Insulation Inc.**]
e. [**Owens Corning**]

2. Description: Glass fibers bonded with a thermosetting resin.
3. Standard: ASTM C1393.
4. Suitable for maximum use temperature between **35 and 850 deg F (1.7 and 454 deg C)**, in accordance with ASTM C411.
5. Semirigid board material.
6. Factory-Applied Insulation Facing:

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.
c. ASJ+: Aluminum-foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.7 MINERAL WOOL FIRE-SUPPRESSION SYSTEM INSULATION

A. Pipe Insulation - Mineral Wool, Preformed:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Owens Corning**]
c. [**ROCKWOOL**]

2. Description: Mandrel-wound mineral wool fibers bonded with a thermosetting resin, unfaced; suitable for maximum use temperature up to **1200 deg F (650 deg C)** in accordance with ASTM C447. Comply with ASTM C547.
3. Standard: ASTM C547.
4. Preformed Pipe Insulation: Type II, Grade A.
5. Fabricated shapes in accordance with ASTM C450 and ASTM C585.
6. Unfaced.
7. Factory-Applied Insulation Facing:

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.
c. ASJ+: Aluminum-foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

B. Pipe Insulation - Mineral Wool, Pipe and Tank:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Owens Corning**]
c. [**ROCKWOOL**]

2. Description: Mineral wool fibers bonded with a thermosetting resin.
3. Standard: ASTM C1393.
4. Suitable for maximum use temperature up to **1000 deg F (538 deg C)**, in accordance with ASTM C411.
5. Semirigid board material.
6. Factory-Applied Insulation Facing:

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.
c. ASJ+: Aluminum-foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.8 PHENOLIC FIRE-SUPPRESSION SYSTEM INSULATION

A. Pipe Insulation - Phenolic:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Kingspan Tarec Industrial Insulation NV**]
c. [**Polyguard Products, Inc.**]
d. [**Resolco Inc.**]

2. Description: Prefabricated phenolic pipe insulation of rigid, expanded, closed-cell structure.
3. Standard: ASTM C1126.
4. Prefabricated Pipe Insulation: Type III.

5. Prefabricated shapes in accordance with ASTM C450 and ASTM C585.
6. Unfaced.
7. Factory-Applied Insulation Facing:

    a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
    b. ASJ+: Aluminum-foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
    c. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.9 POLYISOCYANURATE FIRE-SUPPRESSION SYSTEM INSULATION

A. Pipe Insulation - Polyisocyanurate:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Duna USA Inc.**]
    b. [**Dyplast Products**]
    c. [**Johns Manville; a Berkshire Hathaway company**]

2. Description: Prefabricated, rigid cellular polyisocyanurate pipe insulation intended for use as thermal insulation.
3. Standard: ASTM C591.
4. Type IV, except thermal conductivity (k-value) to not exceed **0.19 Btu x in./h x sq. ft. x deg F (0.027 W/m x K)** at **75 deg F (24 deg C)** after 180 days of aging.
5. Flame-spread index is to be 25 or less and smoke-developed index is to be 50 or less for thickness up to **1-1/2 inches (38 mm)** as tested in accordance with ASTM E84.
6. Fabricate shapes in accordance with ASTM C450 and ASTM C585.
7. Unfaced.
8. Factory-Applied Insulation Facing:

    a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
    b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.

2.10 POLYOLEFIN FIRE-SUPPRESSION SYSTEM INSULATION

A. Pipe Insulation - Polyolefin:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Armacell LLC**]

2. Description: Polyethylene type of polyolefin thermal plastic insulation.

3. Standard: ASTM C1427, Type I, Grade 1, for tubular materials and with Type II, Grade 1, for sheet materials [self-seal] .

2.11 INSULATING CEMENTS

A. Insulating Cement for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]

2. Standard: ASTM C195.

B. Insulating Cement for Expanded or Exfoliated Vermiculite:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]

2. Standard: ASTM C196.

C. Hydraulic-Setting Insulating and Finishing Cement for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]

2. Standard: ASTM C449.

2.12 INSULATION ADHESIVES

A. Materials are to be compatible with insulation materials, jackets, and substrates and for bonding insulation to itself and to surfaces to be insulated unless otherwise indicated.

B. Insulation Adhesive for Lagging Cloth:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Vimasco Corporation**]

2. Standard: MIL-A-3316C, Class I, Grade A.
3. Adhesives to be compatible with insulation materials, jackets, and substrates.
4. Fire-resistant, water-based lagging adhesive and coating for use indoors to adhere fire-resistant lagging cloths over pipe insulation.
5. Service Temperature Range: [**20 to plus 180 deg F (Minus 6 to plus 82 deg C)**][**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**] .
6. Color: White.
7. Verify adhesive is as recommended by insulation manufacturer and has a VOC content of [**50**] g/L or less.

C. Insulation Adhesive for Calcium Silicate:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. [**Vimasco Corporation**]

2. Description: Fibrous, sodium-silicate-based adhesive with a service temperature range of **50 to 800 deg F (10 to 427 deg C)**.
3. Adhesive: As recommended by adhesive manufacturer and with a VOC content of 80 g/L or less.

D. Insulation Adhesive for Cellular-Glass:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]

2. Description: Two-component, thermosetting urethane containing no flammable solvent, with a service temperature range of minus **100 to plus 200 deg F (minus73 to plus 93 deg C)**.
3. Adhesive: As recommended by cellular-glass manufacturer and with a VOC content of 80 g/L or less.

E. Insulation Adhesive, Solvent Based for Flexible Elastomeric and Polyolefin:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Aeroflex USA**]
   b. [**Armacell LLC**]
   c. [**Foster Brand; H. B. Fuller**]
   d. [**K-Flex USA**]

2. Description: Solvent-based adhesive for flexible elastomeric and polyolefin insulation.
3. Flame-spread index is to be 25 or less and smoke-developed index is to be 50 or less as tested

in accordance with ASTM E84.
4. Wet Flash Point: Below **0 deg F (minus 18 deg C)**.
5. Service Temperature Range: **40 to 200 deg F (4 to plus 93 deg C)**.
6. Color: [**Black**].
7. Adhesive: As recommended by flexible elastomeric and polyolefin manufacturer and with a VOC content of [**80**] g/L or less.

F. Insulation Adhesive for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]

2. Standard: MIL-A-3316C, Class 2, Grade A.
3. Adhesive: As recommended by mineral-fiber manufacturer and with a VOC content of 80 g/L or less.
4. Verify fiberglass adhesive has a VOC content of 80 g/L or less when calculated in accordance with 40 CFR 59, Subpart D (EPA Method 24).

G. Insulation Adhesive - for Phenolic and Polyisocyanurate:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]

2. Description: Solvent-based resin adhesive, with a service temperature range of **minus 75 to plus 300 deg F (minus 59 to plus 149 deg C)**.

H. Adhesive: As recommended by phenolic and polyisocyanate manufacturer and with a VOC content of 50 g/L or less.

I. Insulation Adhesive for ASJ, FSK, and PVDC Facings/Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]

2. Description: Insulation adhesive for bonding ASJ, FSK, and PVDC facing/jacket insulation lap seams and joints.
3. Standard: MIL-A-3316C, Class 2, Grade A.
4. Verify adhesives have a VOC content of 80 g/L or less.
5. Verify adhesives have a VOC content of 80 g/L or less.

J. Insulation Adhesive for PVC Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**P.I.C. Plastics, Inc.**]
    c. [**Proto Corporation**]
    d. [**Sekisui Voltek, LLC**]
    e. [**Speedline Corporation**]
    f. [**The Dow Chemical Company**]

2. Description: PVC jacket adhesive to be compatible with and as recommended in PVC jacket manufacturer's literature.
3. Adhesive: As recommended by PVC jacket manufacturer and with a VOC content of 50 g/L or less.

2.13 INSULATION MASTICS AND COATINGS

A. Materials are to be compatible with insulation materials, jackets, and substrates.

1. Product Data: For adhesives, mastics, and sealants, indicating VOC content.
2. Laboratory Test Reports: For adhesives, mastics, and sealants, indicating compliance with requirements for low-emitting materials.

B. Insulation Vapor-Retarder Mastic - Water Based, Indoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Knauf Insulation**]
    d. [**Mon-Eco Industries, Inc.**]
    e. [**Vimasco Corporation**]

2. Description: Insulation vapor-retarder mastic, water based, and suitable for indoor use on below-ambient services.
3. Water-Vapor Permeance: Comply with ASTM E96/E96M or ASTM F1249.
4. Service Temperature Range: [**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**][**Minus 20 to plus 180 deg F (Minus 29 to plus 82 deg C)**] .
5. Standard: MIL-PRF-19565C, Type II, for permeance requirements [with supplier listing on DOD's Qualified Products Database] .
6. Color: [**White**].

C. Insulation Vapor-Retarder Mastic - Solvent Based, Indoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]

2. Description: Insulation vapor-retarder mastic, solvent based, and suitable for indoor use on below-ambient services.
3. Water-Vapor Permeance: Comply with ASTM E96/E96M or ASTM F1249.
4. Service Temperature Range: **Minus 50 to plus 220 deg F (Minus 46 to plus 104 deg C)**.
5. Color: [**White**].

D. Insulation Breather Mastic - Water Based, Indoor/Outdoor:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Knauf Insulation**]
d. [**Mon-Eco Industries, Inc.**]
e. [**Vimasco Corporation**]

2. Description: Insulation breather mastic, water based, and suitable for indoor and outdoor use on above-ambient surfaces.
3. Water-Vapor Permeance: ASTM E96/E96M, greater than **1.0 perm (0.66 metric perm)** at manufacturer's recommended dry film thickness.
4. Service Temperature Range: [**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**][**Minus 20 to plus 180 deg F (Minus 29 to plus 82 deg C)**] .
5. Color: [**White**].

2.14 INSULATION SEALANTS

A. Insulation Joint Sealant:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. [**Owens Corning**]

2. Permanently flexible, elastomeric sealant.
3. Service Temperature Range: [**Minus 150 to plus 250 deg F (Minus 101 to plus 121 deg C)**][**Minus 100 to plus 300 deg F (Minus 73 to plus 149 deg C)**] .
4. Color: White or gray.
5. Verify sealant has a VOC content of 420 g/L or less.

B. Flashing Sealant for FSK and Metal Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]

2. Flashing sealant to be compatible with insulation materials, jackets, and substrates.
3. Fire- and water-resistant, flexible, elastomeric sealant.
4. Service Temperature Range: **Minus 40 to plus 250 deg F (Minus 40 to plus 121 deg C)**.
5. Color: Aluminum.
6. Verify sealant has a VOC content of 420 g/L or less.

C. Flashing Sealant for ASJ and PVC Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]

2. Flashing sealant to be compatible with insulation materials, jackets, and substrates.
3. Fire- and water-resistant, flexible, elastomeric sealant.
4. Service Temperature Range: **Minus 40 to plus 250 deg F (Minus 40 to plus 121 deg C)**.
5. Color: White.
6. Verify sealant has a VOC content of 420 g/L or less.

2.15 FIELD-APPLIED INSULATION JACKETS

A. Field-applied jackets are to comply with ASTM C1136, Type I unless otherwise indicated.

B. Insulation Jacket, Field Applied - FSK:

1. Aluminum-foil-face, fiberglass-reinforced scrim with kraft-paper backing.

C. Insulation Jacket, Field Applied - PVC: High-impact-resistant, UV-resistant PVC complying with ASTM D1784, Class 16354-C; thickness as scheduled; roll stock ready for shop or field cutting and forming. Thickness is indicated in field-applied jacket schedules.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Airex Manufacturing Inc.**]
    b. [**Johns Manville; a Berkshire Hathaway company**]
    c. [**P.I.C. Plastics, Inc.**]
    d. [**Proto Corporation**]
    e. [**Speedline Corporation**]

2. Description: High-impact-resistant, UV-resistant PVC complying with ASTM D1784, Class 16354-C.
3. Thickness: As indicated in "Outdoor, Field-Applied Insulation Jacket Schedule" Article.
4. Jacket: Roll stock ready for shop or field cutting and forming.
5. Adhesive: As recommended by jacket material manufacturer.
6. Color: [**White**][**Color-code jackets based on system. Color as selected by Architect**] , as directed by the Owner.
7. Factory-fabricated fitting covers to match jacket if available; otherwise, field fabricate.

    a. Shapes: 45- and 90-degree, short- and long-radius elbows, tees, valves, flanges, unions, reducers, and end caps.

8. Factory-fabricated tank heads and tank side panels.

D. Insulation Jacket, Field Applied - Metal:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**RPR Products, Inc.**]

2. Jacket Material - Aluminum:

    a. Description: [**Sheet and roll stock ready for shop or field sizing**][**Factory cut and rolled to size**] .
    b. Standard: ASTM B209 (ASTM B209M), Alloy 3003, 3005, 3105, or 5005, Temper H-14.
    c. Finish and Thickness: As indicated in "Indoor, Field-Applied Insulation Jacket Schedule" and "Outdoor, Field-Applied Insulation Jacket Schedule" Articles.
    d. Moisture Barrier for Indoor Applications: [**1-mil- (0.025-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**2.5-mil- (0.063-mm-) thick polysurlyn**] .
    e. Moisture Barrier for Outdoor Applications: [**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**2.5-mil- (0.063-mm-) thick polysurlyn**] .
    f. Factory-Fabricated Fitting Covers:

        1) Same material, finish, and thickness as jacket.
        2) Preformed two-piece or gore, 45- and 90-degree, short- and long-radius elbows.
        3) Tee covers.
        4) Flange and union covers.
        5) End caps.
        6) Beveled collars.
        7) Valve covers.
        8) Field fabricate fitting covers only if factory-fabricated fitting covers are unavailable.

3. Jacket Material - Stainless Steel:

    a. Description: [**Sheet and roll stock ready for shop or field sizing**][**Factory cut and rolled to size**] .
    b. Standard: ASTM A240/A240M.
    c. Material Type, Finish, and Thickness: As indicated in "Indoor, Field-Applied Insulation Jacket Schedule" and "Outdoor, Field-Applied Insulation Jacket Schedule" Articles.
    d. Moisture Barrier for Indoor Applications: [**1-mil- (0.025-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick, heat-bonded polyethylene**

and kraft paper][**3-mil- (0.075-mm-) thick polysurlyn**] .

e. Moisture Barrier for Outdoor Applications: [**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick polysurlyn**] .

f. Factory-Fabricated Fitting Covers:

1) Same material, finish, and thickness as jacket.
2) Preformed two-piece or gore, 45- and 90-degree, short- and long-radius elbows.
3) Tee covers.
4) Flange and union covers.
5) End caps.
6) Beveled collars.
7) Valve covers.
8) Field fabricate fitting covers only if factory-fabricated fitting covers are unavailable.

E. Insulation Jacket, Field Applied - Outdoor, Self Adhesive (Asphaltic):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**MFM Building Products Corp.**]
b. [**Polyguard Products, Inc.**]

2. Description: Self-adhesive outdoor asphaltic jacket of rubberized bituminous resin on a cross-laminated polyethylene film covered with [**white**][**stucco-embossed**] aluminum-foil.
3. Vapor Barrier/Waterproofing Membrane: **60-mil (1.5-mm)** thickness.

F. Insulation Jacket, Field Applied - Indoor/Outdoor Self Adhesive (Non-Asphaltic):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**3M**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Ideal Tape Co., Inc., an American Biltrite Company**]

2. Description: Vapor barrier and waterproofing jacket for installation over insulation located aboveground outdoors or indoors.
3. Specialized jacket consisting of five layers of laminated aluminum and polyester film.
4. Adhesive Lap: Self-adhesive, low-temperature acrylic, pressure-sensitive adhesive lap.
5. Permeance: 0.00 perm as tested in accordance with ASTM F1249.
6. Flame Spread/Smoke Developed: 25/50 as tested in accordance with ASTM E84.
7. Aluminum Finish: [**Embossed**][**Smooth**] .
8. Outer Aluminum Surface: Coated with UV-resistant coating for protection from environmental contaminants.

2.16 FIELD-APPLIED FABRIC-REINFORCING MESH FOR INSULATION

A. Woven Glass-Fiber Fabric for Fire-Suppression System Pipe Insulation:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Childers Brand; H. B. Fuller Construction Products**]

2. Description: Woven glass-fiber fabric for covering pipe and pipe fittings insulation.
3. Weight: Approximately **4 oz./sq. yd. (114 g/sq. m)**.
4. Thread Count: **10 strands by 10 strands/sq. in. (4 strands by 4 strands/sq. mm)**.

B. Woven Glass-Fiber Fabric for Fire-Suppression System Equipment Insulation:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :

a. [**Childers Brand; H. B. Fuller Construction Products**]

2. Description: Woven glass-fiber fabric for covering equipment insulation.
3. Weight: Approximately **6 oz./sq. yd. (203 g/sq. m)**.
4. Thread Count: **5 strands by 5 strands/sq. in. (2 strands by 2 strands/sq. mm)**.

C. Woven Polyester Fabric for Fire-Suppression System Insulation:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :

a. [**Foster Brand; H. B. Fuller**]
b. [**Vimasco Corporation**]

2. Description: Woven polyester fabric for covering pipe, fittings, and equipment insulation.
3. Weight: Approximately **1 oz./sq. yd. (34 g/sq. m)**.
4. Thread Count: **10 strands by 10 strands/sq. in. (4 strands by 4 strands/sq. mm)**.
5. Weave Type: Leno.

2.17 FIELD-APPLIED CLOTHS FOR INSULATION

A. Woven Glass-Fiber Cloth, Field Applied, for Insulation:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]** :

a. [**Alpha Associates, Inc.**]

2. Description: Woven glass-fiber cloth.
3. Standard: MIL-C-20079H, Type I.
4. Weave: Plain.
5. Weight: Minimum of **8 oz./sq. yd. (271 g/sq. m)**, presized.

2.18 VAPOR-RETARDER TAPES

A. Vapor-Retarder Tape for ASJ: White vapor-retarder tape matching factory-applied jacket with acrylic adhesive, complying with ASTM C1136.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**3M Industrial Adhesives and Tapes Division**]
    b. [**Avery Dennison Corporation, Specialty Tapes Division**]
    c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
    d. [**Knauf Insulation**]

2. Description: White vapor-retarder tape matching factory-applied jacket with acrylic adhesive.
3. Standard: ASTM C1136.
4. Width: [**3 inches (75 mm)**].
5. Thickness: [**11.5 mils (0.29 mm)**].
6. Adhesion: [**90 ounces force/inch (1.0 N/mm)**] in width.
7. Elongation: [**2**] percent.
8. Tensile Strength: [**40 lbf/inch (7.2 N/mm)**] in width.
9. ASJ Tape Disks and Squares: Precut disks or squares of ASJ tape.

B. Vapor-Retarder Tape for FSK:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**3M Industrial Adhesives and Tapes Division**]
    b. [**Avery Dennison Corporation, Specialty Tapes Division**]
    c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
    d. [**Knauf Insulation**]

2. Description: Foil-face, vapor-retarder tape matching factory-applied jacket with acrylic adhesive.
3. Standard: ASTM C1136.
4. Width: [**3 inches (75 mm)**].
5. Thickness: [**6.5 mils (0.16 mm)**].
6. Adhesion: [**90 ounces force/inch (1.0 N/mm)**] in width.
7. Elongation: [**2**] percent.
8. Tensile Strength: [**40 lbf/inch (7.2 N/mm)**] in width.
9. FSK Tape Disks and Squares: Precut disks or squares of FSK tape.

C. Vapor-Retarder Tape for PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**3M Industrial Adhesives and Tapes Division**]
    b. [**Ideal Tape Co., Inc., an American Biltrite Company**]

2. Description: White vapor-retarder tape matching field-applied PVC jacket with acrylic adhesive.
3. Application: Suitable for indoor and outdoor applications.
4. Width: [**2 inches (50 mm)**].
5. Thickness: [**6 mils (0.15 mm)**].
6. Adhesion: [**64 ounces force/inch (0.7 N/mm)**] in width.
7. Elongation: [**500**] percent.
8. Tensile Strength: [**18 lbf/inch (3.3 N/mm)**] in width.

D. Vapor-Retarder Tape Aluminum Foil:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**3M Industrial Adhesives and Tapes Division**]
   b. [**Avery Dennison Corporation, Specialty Tapes Division**]
   c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
   d. [**Knauf Insulation**]
   e. [**Sekisui Voltek, LLC**]

2. Description: Aluminum-foil vapor-retarder tape with acrylic adhesive.
3. Width: [**2 inches (50 mm)**].
4. Thickness: [**3.7 mils (0.093 mm)**].
5. Adhesion: [**100 ounces force/inch (1.1 N/mm)**] in width.
6. Elongation: [**5**] percent.
7. Tensile Strength: [**34 lbf/inch (6.2 N/mm)**] in width.

2.19 INSULATION SECUREMENTS

A. Insulation Bands:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**RPR Products, Inc.**]

2. Insulation Bands - Stainless Steel: ASTM A240/A240M, [Type 304][Type 316] ; 0.015 inch (0.38 mm) thick, [1/2 inch (13 mm)][3/4 inch (19 mm)] wide with [wing seal][closed seal] .
3. Insulation Bands - Aluminum: ASTM B209 (ASTM B209M); Alloy 3003, 3005, 3105, or 5005; Temper H-14; 0.020 inch (0.51 mm) thick, [1/2 inch (13 mm)][3/4 inch (19 mm)] wide with [wing seal][closed seal] .
4. Springs: Twin spring set constructed of stainless steel with ends flat and slotted to accept metal bands. Spring size is determined by manufacturer for application.

B. Insulation Pins and Hangers:

1. Insulation Hangers - Metal, Adhesively Attached, Perforated Base:

   a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following] :

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]

b. Description: Baseplate welded to projection spindle that is capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place.
c. Baseplate: Perforated, galvanized carbon steel sheet, **0.030 inch (0.76 mm)** thick by **2 inches (50 mm)** square.
d. Spindle: [**Copper- or zinc-coated, low carbon steel**][**Aluminum**][**Stainless steel**] , fully annealed, **0.106-inch- (2.6-mm-)** diameter shank; length to suit depth of insulation indicated.
e. Adhesive: Recommended by hanger manufacturer. Use product with demonstrated capability to bond insulation hanger securely to substrates indicated without damaging insulation, hangers, and substrates.

2. Insulation Hangers - Self-Sticking-Base:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]

b. Description: Baseplate welded to projecting spindle that is capable of holding insulation, of thickness indicated, securely in position indicated when self-locking washer is in place.
c. Baseplate Material: Galvanized carbon steel sheet, **0.030 inch (0.76 mm)** thick by **2 inches (50 mm)** square.
d. Spindle: [**Copper- or zinc-coated, low-carbon steel**][**Aluminum**][**Stainless steel**] , fully annealed, **0.106-inch- (2.6-mm-)** diameter shank; length to suit depth of insulation indicated.
e. Adhesive-backed base with a peel-off protective cover.

3. Insulation Washers - Insulation Retaining:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**AGM Industries, Inc**]
2) [**Gemco**]
3) [**Midwest Fasteners, Inc**]
4) [**Nelson Stud Welding**]

b. Description: Self-locking washers formed from **0.016-inch- (0.41-mm-)** thick, [**galvanized-steel**][**aluminum**][**stainless steel**] sheet, with beveled edge sized as required to hold insulation securely in place but not less than **1-1/2 inches (38 mm)** in diameter.
c. Protect ends with capped self-locking washers incorporating a spring steel insert to ensure permanent retention of cap in exposed locations.

C. Insulation Staples: Outward-clinching insulation staples, nominal **3/4 inch (19 mm)** wide, stainless steel or Monel.

D. Insulation Wire:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**C & F Wire Products**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**RPR Products, Inc.**]

2. Description: [**0.080-inch (2.0-mm) nickel-copper alloy**][**0.062-inch (1.6-mm) soft-annealed, stainless steel**][**0.062-inch (1.6-mm) soft-annealed, galvanized steel**] .

2.20 INSULATION CORNER ANGLES

A. Insulation Corner Angles - PVC:

1. Thickness: [**30 mils (0.8 mm)**].
2. Dimensions: Minimum **1 by 1 inch (25 by 25 mm)**.
3. Material: PVC in accordance with ASTM D1784, Class 16354-C. White or color-coded to match adjacent surface.

B. Insulation Corner Angles - Aluminum:

1. Thickness: [**0.040 inch (1.0 mm)**].
2. Dimensions: Minimum **1 by 1 inch (25 by 25 mm)**.
3. Material: Aluminum in accordance with **ASTM B209 (ASTM B209M)**; Alloy 3003, 3005, 3105, or 5005; Temper H-14.

C. Insulation Corner Angles - Stainless Steel:

1. Thickness: [**0.024 inch (0.61 mm)**].
2. Dimensions: Minimum **1 by 1 inch (25 by 25 mm)**.
3. Material: Stainless steel in accordance with ASTM A240/A240M, [Type 304][Type 316] .

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions for compliance with requirements for installation tolerances and other conditions affecting performance of insulation application.

1. Verify that systems and equipment to be insulated have been tested and are free of defects.
2. Verify that surfaces to be insulated are clean and dry.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Clean and dry surfaces to receive insulation. Remove materials that will adversely affect insulation application.

B. Clean and prepare surfaces to be insulated. Before insulating, apply a corrosion coating to insulated surfaces as follows:

1. Stainless Steel: Coat 300 series stainless steel with epoxy primer **5 mils (0.127 mm)** thick and epoxy finish **5 mils (0.127 mm)** thick if operating in a temperature range of between **140 and 300 deg F (60 and 149 deg C)**. Consult coating manufacturer for appropriate coating materials and application methods for operating temperature range.
2. Carbon Steel: Coat carbon steel operating at a service temperature between **32 and 300 deg F (0 and 149 deg C)** with an epoxy coating. Consult coating manufacturer for appropriate coating materials and application methods for operating temperature range.

C. Coordinate insulation installation with the tradesman installing heat tracing. Comply with requirements for heat tracing that apply to insulation.

D. Mix insulating cements with clean potable water; if insulating cements are to be in contact with stainless steel surfaces, use demineralized water.

3.3 INSTALLATION OF FIRE-SUPPRESSION SYSTEM INSULATION, GENERAL

A. Install insulation materials, accessories, and finishes with smooth, straight, and even surfaces; free of voids throughout the length of equipment and piping including fittings, valves, and specialties.

B. Install insulation materials, forms, vapor barriers or retarders, jackets, and of thicknesses required for each item of equipment and pipe system as specified in insulation system schedules.

C. Install accessories compatible with insulation materials and suitable for the service. Install accessories that do not corrode, compress, or otherwise damage insulation or jacket.

D. Install insulation with longitudinal seams at top and bottom (12 o'clock and 6 o'clock) of horizontal runs.

E. Install multiple layers of insulation with longitudinal and end seams staggered.

F. Do not weld brackets, clips, or other attachment devices to piping, fittings, and specialties.

G. Keep insulation materials dry during storage, application, and finishing. Replace insulation materials that get wet during storage or in the installation process before being properly covered and sealed in accordance with Contract Documents [unless otherwise approved by engineer of record] .

H. Install insulation with tight longitudinal seams and end joints. Bond seams and joints with adhesive recommended by insulation material manufacturer.

I. Install insulation with least number of joints practical.

J. Seal longitudinal seams and end joints with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

K. Where vapor barrier is indicated, seal joints, seams, and penetrations in insulation at hangers, supports, anchors, and other projections with vapor-barrier mastic.

1. Install insulation continuously through hangers and around anchor attachments.
2. For insulation application where vapor barriers are indicated, extend insulation on anchor legs from point of attachment to supported item to point of attachment to structure. Taper and seal ends attached to structure with vapor-barrier mastic.
3. Install insert materials and install insulation to tightly join the insert. Seal insulation to insulation inserts with adhesive or sealing compound recommended by insulation material manufacturer.
4. Cover inserts with jacket material matching adjacent pipe insulation. Install shields over jacket, arranged to protect jacket from tear or puncture by hanger, support, and shield.

L. Apply adhesives, mastics, and sealants at manufacturer's recommended coverage rate and wet and dry film thicknesses.

M. Install insulation with factory-applied jackets as follows:

1. Draw jacket tight and smooth, but not to the extent of creating wrinkles or areas of compression in the insulation.
2. Cover circumferential joints with **3-inch- (75-mm-)** wide strips, of same material as insulation jacket. Secure strips with adhesive and outward clinching staples along both edges of strip, spaced **4 inches (100 mm)** o.c.
3. Overlap jacket longitudinal seams at least **1-1/2 inches (38 mm)**. Install insulation with longitudinal seams at bottom of pipe. Clean and dry surface to receive self-sealing lap. Staple laps with outward clinching staples along edge at [**2 inches (50 mm)**][**4 inches (100 mm)**] o.c.
4. For below-ambient services, apply vapor-barrier mastic over staples.
5. Cover joints and seams with tape, in accordance with insulation material manufacturer's written instructions, to maintain vapor seal.
6. Where vapor barriers are indicated, apply vapor-barrier mastic on seams and joints and at ends adjacent to pipe flanges and fittings.

N. Cut insulation in a manner to avoid compressing insulation.

O. Finish installation with systems at operating conditions. Repair joint separations and cracking due to thermal movement.

P. Repair damaged insulation facings by applying same facing material over damaged areas. Extend patches at least **4 inches (100 mm)** beyond damaged areas. Adhere, staple, and seal patches in similar fashion to butt joints.

Q. For above-ambient services, do not install insulation to the following:

1. Vibration-control devices.
2. Testing agency labels and stamps.
3. Nameplates and data plates.
4. Manholes.
5. Handholes.
6. Cleanouts.

R. Insulation Installation on Fittings, Valves, Strainers, Flanges, Mechanical Couplings and Unions:

1. Install insulation over fittings, valves, strainers, flanges, unions, and other specialties with continuous thermal and vapor-retarder integrity unless otherwise indicated.
2. Insulate pipe elbows using [prefabricated fitting insulation][mitered or routed fittings] made from same material and density as adjacent pipe insulation. Each piece is butted tightly against adjoining piece and bonded with adhesive. Fill joints, seams, voids, and irregular surfaces with insulating cement finished to a smooth, hard, and uniform contour that is uniform with adjoining pipe insulation.
3. Insulate tee fittings with [prefabricated fitting insulation][sectional pipe insulation] of same material

and thickness as used for adjacent pipe. Cut sectional pipe insulation to fit. Butt each section closely to the next and hold in place with tie wire. Bond pieces with adhesive.

4. Insulate valves using [prefabricated fitting insulation][sectional pipe insulation] of same material, density, and thickness as used for adjacent pipe. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker. For valves, insulate up to and including the bonnets, valve stuffing-box studs, bolts, and nuts. Fill joints, seams, and irregular surfaces with insulating cement.
5. Insulate strainers using [prefabricated fitting insulation][sectional pipe insulation] of same material, density, and thickness as used for adjacent pipe. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker. Fill joints, seams, and irregular surfaces with insulating cement. Insulate strainers so strainer basket flange or plug can be easily removed and replaced without damaging the insulation and jacket. Provide a removable reusable insulation cover. For below-ambient services, provide a design that maintains vapor barrier.
6. Insulate flanges and unions using a section of oversized preformed pipe insulation. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker.
7. Cover segmented insulated surfaces with a layer of finishing cement and coat with a mastic. Install vapor-barrier mastic for below-ambient services and a breather mastic for above-ambient services. Reinforce the mastic with fabric-reinforcing mesh. Trowel the mastic to a smooth and well-shaped contour.
8. For services not specified to receive a field-applied jacket except for flexible elastomeric and polyolefin, install fitted PVC cover over elbows, tees, strainers, valves, flanges, and unions. Terminate ends with PVC end caps. Tape PVC covers to adjoining insulation facing using PVC tape.
9. Stencil or label the outside insulation jacket of each union with the word "union." Match size and color of pipe labels.

S. Insulate instrument connections for pressure gauges, test connections, flow meters, sensors, switches, and transmitters on insulated pipes, vessels, and equipment. Shape insulation at these connections by tapering it to and around the connection with insulating cement and finish with finishing cement, mastic, and flashing sealant.

T. Install removable insulation covers [**at locations indicated on Drawings**] . Installation complies with the following:

1. Make removable flange and union insulation from sectional pipe insulation of same thickness as that on adjoining pipe. Install same insulation jacket as adjoining pipe insulation.
2. When flange and union covers are made from sectional pipe insulation, extend insulation from flanges or union long at least two times the insulation thickness over adjacent pipe insulation on each side of flange or union. Secure flange cover in place with stainless steel or aluminum bands. Select band material compatible with insulation and jacket.
3. Construct removable valve insulation covers in same manner as for flanges, except divide the two-part section on the vertical center line of valve body.
4. When covers are made from block insulation, make two halves, each consisting of mitered blocks wired to stainless steel fabric. Secure this wire frame, with its attached insulation, to flanges with tie wire. Extend insulation at least **2 inches (50 mm)** over adjacent pipe insulation on each side of valve. Fill space between flange or union cover and pipe insulation with insulating cement. Finish cover assembly with insulating cement applied in two coats. After first coat is dry, apply and trowel second coat to a smooth finish.
5. Unless a PVC jacket is indicated in field-applied jacket schedules, finish exposed surfaces with a metal jacket.

3.4 PENETRATIONS

A. Insulation Installation at Roof Penetrations: Install insulation continuously through roof penetrations.

1. Seal penetrations with flashing sealant.
2. For applications requiring only indoor insulation, terminate insulation above roof surface and seal with joint sealant. For applications requiring indoor and outdoor insulation, install insulation for outdoor applications tightly joined to indoor insulation ends. Seal joint with joint sealant.
3. Extend jacket of outdoor insulation outside roof flashing at least **2 inches (50 mm)** below top of roof flashing.
4. Seal jacket to roof flashing with flashing sealant.

B. Insulation Installation at Below-Grade Exterior Wall Penetrations: Terminate insulation flush with sleeve seal. Seal terminations with flashing sealant.

C. Insulation Installation at Aboveground Exterior Wall Penetrations: Install insulation continuously through wall penetrations.

1. Seal penetrations with flashing sealant.
2. For applications requiring only indoor insulation, terminate insulation inside wall surface and seal with joint sealant. For applications requiring indoor and outdoor insulation, install insulation for outdoor applications tightly joined to indoor insulation ends. Seal joint with joint sealant.
3. Extend jacket of outdoor insulation outside wall flashing and overlap wall flashing at least **2 inches (50 mm)**.
4. Seal jacket to wall flashing with flashing sealant.

D. Insulation Installation at Interior Wall and Partition Penetrations That Are Not Fire Rated: Install insulation continuously through walls and partitions.

E. Insulation Installation at Fire-Rated Wall and Partition Penetrations: Install insulation continuously through penetrations of fire-rated walls and partitions.

1. Comply with requirements in Section 078413 "Penetration Firestopping."

F. Insulation Installation at Floor Penetrations:

1. Pipe: Install insulation continuously through floor penetrations.
2. Seal penetrations through fire-rated assemblies. Comply with requirements in Section 078413 "Penetration Firestopping."

3.5 INSTALLATION OF GLASS-FIBER FIRE-SUPPRESSION SYSTEM INSULATION

A. Installation on the following:

1. Straight Pipes and Tubes:

a. Secure each layer of preformed pipe insulation to pipe with wire or bands and tighten bands without deforming insulation materials.
b. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and applicable insulation joint sealant.
c. For insulation with jackets on above-ambient surfaces, secure laps with outward-clinched staples at **6 inches (150 mm)** o.c.
d. For insulation with jackets on below-ambient surfaces, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive as recommended by insulation material manufacturer and seal with vapor-barrier mastic and flashing sealant.

2. Pipe Flanges:

   a. Install prefabricated pipe insulation to outer diameter of pipe flange.
   b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
   c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with glass-fiber or mineral wool blanket insulation.
   d. Install jacket material with manufacturer's recommended adhesive, overlap seams at least **1 inch (25 mm)**, and seal joints with flashing sealant.

3. Insulation Installation on Pipe Fittings and Elbows:

   a. Install prefabricated sections of same material as straight segments of pipe insulation when available.
   b. When preformed insulation elbows and fittings are unavailable, install mitered sections of pipe insulation, to a thickness equal to adjoining pipe insulation. Secure insulation materials with wire or bands.

4. Insulation Installation on Valves and Pipe Specialties:

   a. Install prefabricated sections of same material as straight segments of pipe insulation when available.
   b. When prefabricated sections are unavailable, install mitered sections of pipe insulation to valve body.
   c. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
   d. Install insulation to flanges as specified for flange insulation application.

3.6 INSTALLATION OF MINERAL WOOL FIRE-SUPPRESSION SYSTEM INSULATION

A. Installation on the following:

1. Straight Pipes and Tubes:

   a. Secure each layer of preformed pipe insulation to pipe with wire or bands, and tighten bands without deforming insulation materials.
   b. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and joint sealant.
   c. For insulation with jackets on above-ambient surfaces, secure laps with outward-clinched staples at **6 inches (150 mm)** o.c.
   d. For insulation with jackets on below-ambient surfaces, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive, as recommended by insulation material manufacturer, and seal with vapor-barrier mastic and flashing sealant.

2. Pipe Flanges:

   a. Install prefabricated pipe insulation to outer diameter of pipe flange.
   b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
   c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with glass-fiber or mineral wool blanket insulation.
   d. Install jacket material with manufacturer's recommended adhesive, overlap seams at least **1 inch (25 mm)**, and seal joints with flashing sealant.

3. Pipe Fittings and Elbows:

   a. Install prefabricated sections of same material as straight segments of pipe insulation when available.
   b. When preformed insulation elbows and fittings are unavailable, install mitered sections of pipe insulation, to a thickness equal to adjoining pipe insulation. Secure insulation materials with wire or bands.

4. Valves and Pipe Specialties:

   a. Install prefabricated sections of same material as straight segments of pipe insulation when available.
   b. When prefabricated sections are unavailable, install mitered sections of pipe insulation to valve body.
   c. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
   d. Install insulation to flanges as specified for flange insulation application.

3.7 INSTALLATION OF CALCIUM SILICATE FIRE-SUPPRESSION SYSTEM INSULATION

A. Installation on the following:

1. Straight Pipes and Tubes:

   a. Secure single-layer insulation with stainless steel bands at **12-inch (300-mm)** intervals and tighten bands without deforming insulation materials.
   b. Install two-layer insulation with joints tightly butted and staggered at least **3 inches (75 mm)**. Secure inner layer with wire spaced at **12-inch (300-mm)** intervals. Secure outer layer with stainless steel bands at **12-inch (300-mm)** intervals.
   c. Apply a skim coat of mineral-fiber, hydraulic-setting cement to insulation surface. When cement is dry, apply flood coat of lagging adhesive and press on one layer of glass cloth or tape. Overlap edges at least **1 inch (25 mm)**. Apply finish coat of lagging adhesive over glass cloth or tape. Thin finish coat to achieve smooth, uniform finish.

2. Pipe Flanges:

   a. Install prefabricated pipe insulation to outer diameter of pipe flange.
   b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
   c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of block insulation of same material and thickness as pipe insulation. Where voids are difficult to fill with block insulation, fill voids with a fibrous insulation material suitable for specific operating temperature.
   d. Finish flange insulation same as pipe insulation.

3. Pipe Fittings and Elbows:

   a. Install prefabricated sections of same material as straight segments of pipe insulation when available.
   b. When prefabricated insulation sections of insulation are unavailable, install mitered sections of calcium silicate insulation. Secure insulation materials with wire or bands.
   c. Finish fittings insulation same as pipe insulation.

4. Valves and Pipe Specialties:

a. Install pipe insulation, quads, hex sections, or beveled lag segments, adhered together, to valve body. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
b. Install insulation to flanges as specified for flange insulation application.
c. Finish valve and specialty insulation same as pipe insulation.

3.8 INSTALLATION OF CELLULAR-GLASS FIRE-SUPPRESSION SYSTEM INSULATION

A. Installation on the following:

1. Straight Pipes and Tubes:

a. Secure each layer of insulation to pipe with wire or bands and tighten bands without deforming insulation materials.
b. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and applicable insulation joint sealant.
c. For insulation with jackets on above-ambient services, secure laps with outward-clinched staples at **6 inches (150 mm)** o.c.
d. For insulation with jackets on below-ambient services, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive as recommended by insulation material manufacturer and seal with vapor-barrier mastic and flashing sealant.

2. Pipe Flanges:

a. Install prefabricated pipe insulation to outer diameter of pipe flange.
b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of cellular-glass block insulation of same thickness as pipe insulation. Where voids are difficult to fill with block insulation, fill voids with a fibrous insulation material suitable for specific operating temperature.
d. Install jacket material with manufacturer's recommended adhesive, overlap seams at least **1 inch (25 mm)**, and seal joints with flashing sealant.

3. Pipe Fittings and Elbows:

a. Install prefabricated sections of same material as straight segments of pipe insulation when available.
b. When preformed sections of insulation are unavailable, install mitered or routed sections of cellular-glass insulation. Secure insulation materials with wire or bands.

4. Valves and Pipe Specialties:

a. Install prefabricated sections of cellular-glass insulation to valve body.
b. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
c. Install insulation to flanges as specified for flange insulation application.

3.9 INSTALLATION OF FLEXIBLE ELASTOMERIC FIRE-SUPPRESSION SYSTEM INSULATION

A. Installation on the following:

1. Equipment and Tanks:

a. Apply [**100**] percent coverage of adhesive to surface with manufacturer's recommended adhesive.
b. Seal longitudinal seams and end joints.

2. Pipe Flanges:

a. Install pipe insulation to outer diameter of pipe flange.
b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of sheet insulation of same thickness as pipe insulation.
d. Secure insulation to flanges and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

3. Pipe Fittings and Elbows:

a. Install sections of pipe insulation and miter if required in accordance with manufacturer's written instructions.
b. Secure insulation materials and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

4. Valves and Pipe Specialties:

a. Install preformed valve covers manufactured of same material as pipe insulation when available.
b. When preformed valve covers are unavailable, install cut sections of pipe and sheet insulation to valve body. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
c. Install insulation to flanges as specified for flange insulation application.
d. Secure insulation to valves and specialties and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

B. Finish: After adhesive has fully cured, apply two coats of insulation and manufacturer's recommended protective coating.

3.10 INSTALLATION OF PHENOLIC FIRE-SUPPRESSION SYSTEM INSULATION

A. General Installation Requirements:

1. Secure single-layer insulation with stainless steel bands at **12-inch (300-mm)** intervals and tighten bands without deforming insulation materials.
2. Install two-layer insulation with joints tightly butted and staggered at least **3 inches (75 mm)**. Secure inner layer with **0.062-inch (1.6-mm)** wire spaced at **12-inch (300-mm)** intervals. Secure outer layer with stainless steel bands at **12-inch (300-mm)** intervals.

B. Insulation on the following:

1. Straight Pipes and Tubes:

a. Secure each layer of insulation to pipe with wire or bands and tighten bands without deforming insulation materials.
b. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and applicable insulation joint sealant.

c. For insulation with factory-applied jackets on above-ambient services, secure laps with outward-clinched staples at **6 inches (150 mm)** o.c.
d. For insulation with factory-applied jackets with vapor retarders on below-ambient services, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive as recommended by insulation material manufacturer and seal with vapor-barrier mastic and flashing sealant.

2. Pipe Flanges:

a. Install prefabricated pipe insulation to outer diameter of pipe flange.
b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of block insulation of same material and thickness as pipe insulation. Where voids are difficult to fill with block insulation, fill voids with a fibrous insulation material suitable for specific operating temperature.

3. Pipe Fittings and Elbows:

a. Install prefabricated insulation sections, or mitered or routed fittings, of same material as straight segments of pipe insulation.

4. Valves and Pipe Specialties:

a. Install preformed insulation sections of same material as straight segments of pipe insulation.
b. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
c. Install insulation to flanges as specified for flange insulation application.

3.11 INSTALLATION OF POLYISOCYANURATE FIRE-SUPPRESSION SYSTEM INSULATION

A. Insulation on the following:

1. Straight Pipes and Tubes:

a. Secure each layer of insulation to pipe with tape or bands and tighten without deforming insulation materials. Orient longitudinal joints between half sections in 3- and 9-o'clock positions on the pipe.
b. For insulation with jackets with vapor barriers, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive or tape as recommended by insulation material manufacturer and seal with vapor-barrier mastic.
c. All insulation is tightly butted and free of voids and gaps at all joints. Vapor barrier must be continuous. Before installing jacket material, install vapor-barrier system.

2. Pipe Flanges:

a. Install preformed pipe insulation to outer diameter of pipe flange.
b. Make width of insulation section same as overall width of flange and bolts, same thickness of adjacent pipe insulation, not to exceed **1-1/2-inch (38-mm)** thickness.
c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of polyisocyanurate block insulation of same thickness as pipe insulation. Where voids are difficult to fill with block insulation, fill voids with a fibrous insulation material suitable for specific operating temperature.

3. Fittings and Elbows:

   a. Install prefabricated sections of same material as straight segments of pipe insulation.

4. Valves and Pipe Specialties:

   a. Install prefabricated sections of polyisocyanurate insulation to valve body.
   b. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
   c. Install insulation to flanges as specified for flange insulation application.

3.12 INSTALLATION OF POLYOLEFIN FIRE-SUPPRESSION SYSTEM INSULATION

A. Insulation on the following:

1. Straight Pipes and Tubes:

   a. Seal split-tube longitudinal seams and end joints with manufacturer's recommended adhesive [or via self-seal mechanism] to eliminate openings in insulation that allow passage of air to surface being insulated.

2. Pipe Flanges:

   a. Install pipe insulation to outer diameter of pipe flange.
   b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
   c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of polyolefin sheet insulation of same thickness as pipe insulation.
   d. Secure insulation to flanges and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

3. Pipe Fittings and Elbows:

   a. Install mitered sections of polyolefin pipe insulation.
   b. Secure insulation materials and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

4. Valves and Pipe Specialties:

   a. Install cut sections of polyolefin pipe and sheet insulation to valve body.
   b. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
   c. Install insulation to flanges as specified for flange insulation application.
   d. Secure insulation to valves and specialties, and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

3.13 INSTALLATION OF WOVEN GLASS-FIBER CLOTH FOR INSULATION

A. Where woven glass-fiber cloths are indicated, install directly over bare insulation or insulation with factory-applied facings.

1. Draw cloths smooth and tight to surface with **2-inch (50-mm)** overlap at seams and joints.
2. Embed glass cloth between two **0.062-inch- (1.6-mm-)** thick coats of lagging adhesive.
3. Completely encapsulate insulation with coating, leaving no exposed insulation.

3.14 INSTALLATION OF FIELD-APPLIED INSULATION JACKETS

A. Insulation Jacket, Field-Applied - FSK:

1. Draw jacket material smooth and tight.
2. Install lap or joint strips with same material as jacket.
3. Secure jacket to insulation with manufacturer's recommended adhesive.
4. Install jacket with **1-1/2-inch (38-mm)** laps at longitudinal seams and **3-inch- (75-mm-)** wide joint strips at end joints.
5. Seal openings, punctures, and breaks in vapor-retarder jackets and exposed insulation with vapor-barrier mastic.

B. Insulation Jacket, Field-Applied - PVC:

1. Install with **1-inch (25-mm)** overlap at longitudinal seams and end joints.
2. Seal with manufacturer's recommended adhesive.
3. Apply two continuous beads of adhesive to seams and joints, one bead under lap and the finish bead along seam and joint edge.

C. Insulation Jacket, Field-Applied - Metal:

1. Install with **2-inch (50-mm)** overlap at longitudinal seams and end joints.
2. Overlap longitudinal seams arranged to shed water.
3. Seal end joints with weatherproof sealant recommended by insulation manufacturer.
4. Secure jacket with stainless steel bands **12 inches (300 mm)** o.c. and at end joints.

3.15 FINISHES

A. Insulation with ASJ, Glass-Cloth, or Other Paintable Jacket Material: Paint jacket with paint system identified below and as specified in [**Section 099113 "Exterior Painting"**][**Section 099114 "Exterior Painting (MPI Standards)**] and [**Section 099123 "Interior Painting."**][**Section 099124 "Interior Painting (MPI Standards)."**]

1. Flat Acrylic Finish: [**Two**] finish coats over a primer that is compatible with jacket material and finish coat paint. Add fungicidal agent to render fabric mildew proof.

    a. Finish Coat Material: Interior, flat, latex-emulsion size.

B. Color: Final color as selected by Architect. Vary first and second coats to allow visual inspection of the completed Work, as directed by the Owner.

C. Do not field paint aluminum or stainless steel jackets.

3.16 FIELD QUALITY CONTROL

A. Testing Agency: [**the Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections [**with the assistance of a factory-authorized service representative**] .

D. Tests and Inspections:

1. Inspect field-insulated equipment, randomly selected by Architect, by removing field-applied jacket and insulation in layers in reverse order of their installation. Extent of inspection is limited to [**one**] location(s) for each type of equipment defined in the "Fire-Suppression Equipment Insulation Schedule" Article. For large equipment, remove only a portion adequate to determine compliance, as directed by the Owner.
2. Inspect pipe, fittings, strainers, and valves, randomly selected by Architect, by removing field-applied jacket and insulation in layers in reverse order of their installation. Extent of inspection is limited to [**three**] locations of straight pipe, [**three**] locations of threaded fittings, [**three**] locations of welded fittings, [**two**] locations of threaded strainers, [**two**] locations of welded strainers, [**three**] locations of threaded valves, and [**three**] locations of flanged valves for each pipe service defined in the "Fire-Suppression System Piping Insulation Schedule, General" Article, as directed by the Owner.
3. All insulation applications will be considered defective if they do not pass tests and inspections.

E. Prepare test and inspection reports.

3.17 DIESEL FIRE PUMP ENGINE EXHAUST INSULATION SCHEDULE

A. Indoor and Outdoor, Exposed, Rigid, Engine Exhaust Pipe and Silencer:

1. Pipe Insulation - Calcium Silicate, Preformed: [**4 inches (100 mm)**] thick.

3.18 FIRE-SUPPRESSION EQUIPMENT INSULATION SCHEDULE

A. Insulation materials and thicknesses are identified below. If more than one material is listed for a type of equipment, selection from materials listed is Contractor's option.

B. Insulate indoor and outdoor equipment that is not factory insulated.

C. Fire-suppression water storage tank insulation is to be one of the following:

1. Fire-Suppression System Insulation - Cellular Glass: [**2 inches (50 mm)**] thick.
2. Pipe Insulation - Flexible Elastomeric: [**1 inch (25 mm)**] thick.
3. Equipment Insulation - Glass-Fiber Board: [**1 inch (25 mm)**] thick and [**2 lb/cu. ft. (32 kg/cu. m)**][**3 lb/cu. ft. (48 kg/cu. m)**][**6 lb/cu. ft. (96-kg/cu. m)**] nominal density.
4. Pipe Insulation - Glass-Fiber, Pipe and Tank: [**1 inch (25 mm)**] thick.
5. Pipe Insulation - Mineral Wool, Pipe and Tank: [**1-1/2 inches (38 mm)**] thick.
6. Pipe Insulation - Polyisocyanurate: [**1 inch (25 mm)**] thick.
7. Pipe Insulation - Polyolefin: [**1 inch (25 mm)**] thick.

3.19 FIRE-SUPPRESSION SYSTEM PIPING INSULATION SCHEDULE, GENERAL

A. Insulation materials and thicknesses are identified below. If more than one material is listed for a type of equipment, selection from materials listed is Contractor's option.

B. Acceptable preformed pipe and tubular insulation materials and thicknesses are identified for each piping system and pipe size range. If more than one material is listed for a piping system, selection from materials listed is Contractor's option.

C. Items Not Insulated: Unless otherwise indicated, do not install insulation on the following:

1. Indoor fire-suppression piping.
2. Underground piping.

3.20 INDOOR FIRE-SUPPRESSION SYSTEM PIPING INSULATION SCHEDULE

A. Indoor Engine Coolant Piping for Remote Radiator of Engine-Driven Fire Pump:

1. All Pipe Sizes: Insulation is to be one of the following:

a. Pipe Insulation - Calcium Silicate, Preformed: [**2 inches (50 mm)**] thick.
b. Pipe Insulation - Cellular Glass, Preformed: [**2 inches (50 mm)**] thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [**2 inches (50 mm)**] thick.
d. Pipe Insulation - Mineral Wool, Preformed: [**2 inches (50 mm)**] thick.

B. Indoor Fire Pump Engine Exhaust Piping and Silencer:

1. All Pipe Sizes: Insulation is to be the following:

a. Pipe Insulation - Calcium Silicate, Preformed: [**4 inches (100 mm)**] thick.

3.21 OUTDOOR, ABOVEGROUND PIPING INSULATION SCHEDULE

A. Fire-Suppression Water Piping:

1. All Pipe Sizes: Insulation is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [**2 inches (50 mm)**] thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [**2 inches (50 mm)**] thick.
c. Pipe Insulation - Mineral Wool, Preformed: [**2 inches (50 mm)**] thick.
d. Pipe Insulation - Phenolic: [**2 inches (50 mm)**] thick.

B. Outdoor Engine Coolant Piping for Remote Radiator of Engine-Driven Fire Pump:

1. All Pipe Sizes: Insulation is to be one of the following:

a. Pipe Insulation - Calcium Silicate, Preformed: [**2 inches (50 mm)**] thick.
b. Pipe Insulation - Cellular Glass, Preformed: [**2 inches (50 mm)**] thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [**2 inches (50 mm)**] thick.
d. Pipe Insulation - Mineral Wool, Preformed: [**2 inches (50 mm)**] thick.

C. Outdoor Fire Pump Engine Exhaust Piping and Silencer:

1. All Pipe Sizes: Insulation is to be the following:

a. Pipe Insulation - Calcium Silicate, Preformed: [**4 inches (100 mm)**] thick.

D. Outdoor Fire-Suppression Piping Filled with Water:

1. All Pipe Sizes: Insulation is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [**2 inches (50 mm)**] thick.
b. Pipe Insulation Flexible Elastomeric: [**2 inches (50 mm)**] thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [**2 inches (50 mm)**] thick.
d. Pipe Insulation - Mineral Wool, Preformed: [**2 inches (50 mm)**] thick.
e. Pipe Insulation - Phenolic: [**2 inches (50 mm)**] thick.
f. Pipe Insulation - Polyisocyanurate: [**2 inches (50 mm)**] thick.
g. Pipe Insulation - Polyolefin: [**2 inches (50 mm)**] thick.

3.22 INDOOR, FIELD-APPLIED INSULATION JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Piping, Concealed from View:

1. None.
2. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

3. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**] .

4. Stainless Steel: [Type 304][Type 316] , [smooth No. 2B finish][corrugated][stucco embossed] .

a. Thickness: [**0.010 inch (0.25 mm)**][**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

D. Piping, Exposed to View:

1. None.
2. PVC: [**Standard**][**Color-coded by system**] .

a. Thickness: [**20 mils (0.5 mm)**][**30 mils (0.8 mm)**] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**] .

5. Stainless Steel: [Type 304][Type 316] , [smooth No. 2B finish][corrugated][stucco embossed] .

    a. Thickness: [0.010 inch (0.25 mm)][0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)] .

3.23 OUTDOOR, FIELD-APPLIED INSULATION JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Equipment, Concealed from View:

1. None.
2. PVC: [**Standard**][**Color-coded by system**] .

    a. Thickness: [20 mils (0.5 mm)][30 mils (0.8 mm)] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

    a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)][0.040 inch (1.0 mm)] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

    a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)] .

5. Stainless Steel: [Type 304][Type 316] , [smooth No. 2B finish][corrugated][stucco embossed] .

    a. Thickness: [0.010 inch (0.25 mm)][0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)] .

D. Equipment, Exposed, up to 48 Inches (1200 mm) in Diameter or with Flat Surfaces up to 72 Inches (1800 mm):

1. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**][**with Z-shaped locking seam**] .

    a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)][0.040 inch (1.0 mm)] .

2. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**][**with Z-shaped locking seam**] .

    a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)][0.040 inch (1.0 mm)] .

3. Stainless Steel: [Type 304][Type 316] , [smooth No. 2B finish][corrugated][stucco embossed][with Z-shaped locking seam] .

    a. Thickness: [0.010 inch (0.25 mm)][0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)] .

E. Equipment, Exposed, Larger Than **48 Inches (1200 mm)** in Diameter or with Flat Surfaces Larger Than **72 Inches (1800 mm)**:

1. Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) as recommended deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

2. Painted Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

3. Stainless Steel: [Type 304][Type 316] , [smooth,][stucco embossed,] with [1-1/4-inch- (32-mm-) deep corrugations][2-1/2-inch- (65-mm-) deep corrugations][4-by-1-inch (100-by-25-mm) box ribs] .

   a. Thickness: [**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

F. Outdoor Exposed Piping:

1. PVC: [**Standard**][**Color-coded by system**] .

   a. Thickness: [**20 mils (0.5 mm)**][**30 mils (0.8 mm)**][**40 mils (1.0 mm)**] .

2. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**][**with Z-shaped locking seam**] .

   a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

3. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**][**with Z-shaped locking seam**] .

   a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Stainless Steel: [Type 304][Type 316] , [smooth No. 2B finish][corrugated][stucco embossed][with Z-shaped locking seam] .

   a. Thickness: [**0.010 inch (0.25 mm)**][**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

END OF SECTION 22 07 19 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 07 19 00A - PLUMBING PIPING INSULATION

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Cellular glass pipe insulation.
2. Flexible elastomeric pipe insulation.
3. Glass-fiber pipe insulation.
4. Mineral wool pipe insulation.
5. Phenolic pipe insulation.
6. Polyolefin pipe insulation.
7. Insulating cements.
8. Insulation adhesives.
9. Insulation mastics and coatings.
10. Insulation sealants.
11. Field-applied insulation jackets.
12. Field-applied fabric-reinforcing mesh.
13. Field-applied cloths for insulation.
14. Vapor-retarder tapes.
15. Insulation securements.
16. Protective shielding guards.

B. Related Requirements:

1. Section 220716 "Plumbing Equipment Insulation" for equipment insulation.

1.2 ACTION SUBMITTALS

A. Product Data: For each specified system and assembly, including components and accessories.

1. Include thermal conductivity, water-vapor permeance thickness, and jackets (both factory and field applied if any).

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
2. Environmental Product Declaration (EPD): For each product.
3. Health Product Declaration (HPD): For each product.
4. Environmental Product Declaration (EPD): For each product.
5. Health Product Declaration (HPD): For each product.
6. Environmental Product Declaration (EPD): For each product.
7. Environmental Product Declaration (EPD): For each product.
8. Environmental Product Declaration (EPD): For each product.
9. Third-Party Certifications: For each product.
10. Third-Party-Certified Life-Cycle Assessment: For each product.
11. Product Data: For adhesives, mastics, and sealants, indicating VOC content.
12. Laboratory Test Reports: For adhesives, mastics, and sealants, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings:

1. Include plans, elevations, sections, details, and attachment details.
2. Detail application of protective shields, saddles, and inserts at hangers for each type of insulation and hanger.
3. Detail attachment and covering of heat tracing inside insulation.
4. Detail insulation application at pipe expansion joints for each type of insulation.
5. Detail insulation application at elbows, fittings, flanges, valves, and specialties for each type of insulation.
6. Detail removable insulation at piping specialties, equipment connections, and access panels.
7. Detail application of field-applied jackets.
8. Detail application at linkages of control devices.

D. Samples: For each type of insulation and jacket indicated. Identify each Sample, describing product and intended use. Sample sizes are as follows:

1. Preformed Pipe Insulation Materials: **12 inches (300 mm)** long by **NPS 2 (DN 50)**.
2. Jacket Materials for Pipe: **12 inches (300 mm)** long by **NPS 2 (DN 50)**.
3. Sheet Jacket Materials: **12 inches (300 mm)** square.
4. Manufacturer's Color Charts: For products where color is specified, show the full range of colors available for each type of finish material.

1.3 INFORMATIONAL SUBMITTALS

A. Qualification Statements: For qualified Installer.

B. Material Test Reports: From a qualified testing agency acceptable to authorities having jurisdiction indicating, interpreting, and certifying test results for compliance of insulation materials, sealers, attachments, cements, and jackets, with requirements indicated. Include dates of tests and test methods employed.

C. Field quality control reports.

1.4 QUALITY ASSURANCE

A. Installer Qualifications: Skilled mechanics who have successfully completed an apprenticeship program or another craft training program [**, certified by the Department of Labor, Bureau of Apprenticeship and Training**] .

1.5 MOCKUPS

A. Before installing insulation, build mockups for each type of insulation and finish listed below to demonstrate quality of insulation application and finishes. Build mockups in the location indicated or, if not indicated, as directed by Architect. Use materials indicated for the completed Work.

1. Piping Mockups:

a. One **10-foot (3-m)** section of **NPS 2 (DN 50)** straight pipe.
b. One each of a 90-degree threaded, welded, and flanged elbow.
c. One each of a threaded, welded, and flanged tee fitting.
d. One **NPS 2 (DN 50)** or smaller valve and one **NPS 2-1/2 (DN 65)** or larger valve.

e. Four support hangers, including hanger shield and insert.
f. One threaded strainer and one flanged strainer with removable portion of insulation.
g. One threaded reducer and one welded reducer.
h. One pressure temperature tap.
i. One mechanical coupling.
j. One union.

2. For each mockup, fabricate cutaway sections to allow observation of application details for insulation materials, adhesives, mastics, attachments, and jackets.
3. Notify Architect [**seven**]<**Insert number**> days in advance of dates and times when mockups will be constructed.
4. Obtain Architect's approval of mockups before starting insulation application.
5. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
6. Maintain mockups during construction in an undisturbed condition as a standard for judging the completed Work.
7. Demolish and remove mockups when directed.

B. Comply with the following applicable standards and other requirements specified for miscellaneous components:

1. Supply and Drain Protective Shielding Guards: ICC A117.1.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Packaging: Insulation system materials are to be delivered to the Project site in unopened containers. The packaging is to include name of the manufacturer, fabricator, type, description, and size [**, as well as ASTM standard designation and maximum use temperature**] .

1.7 COORDINATION

A. Coordinate sizes and locations of supports, hangers, and insulation shields specified in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment."

B. Coordinate clearance requirements with piping Installer for piping insulation application. Before preparing piping Shop Drawings, establish and maintain clearance requirements for installation of insulation and field-applied jackets and finishes and for space required for maintenance.

C. Coordinate installation and testing of heat tracing.

1.8 SCHEDULING

A. Schedule insulation application after pressure testing systems [**and after installing and testing heat tracing**] . Insulation application may begin on segments that have satisfactory test results.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Surface-Burning Characteristics: For insulation and related materials, as determined by testing identical

products in accordance with ASTM E84, by a testing agency acceptable to authorities having jurisdiction. Factory label insulation, jacket materials, adhesive, mastic, tapes, and cement material containers with appropriate markings of applicable testing agency.

1. All Insulation Installed Indoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
2. All Insulation Installed Indoors; Outdoors-Installed Insulation in Contact with Airstream: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
3. All Insulation Installed Indoors and Outdoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.

2.2 PIPING INSULATION MATERIALS, GENERAL

A. Comply with requirements in "Piping Insulation Schedule, General," "Indoor Piping Insulation Schedule," "Outdoor, Aboveground Piping Insulation Schedule," and "Outdoor, Underground Piping Insulation Schedule" articles for where insulating materials are applied.

B. Products are not to contain asbestos, lead, mercury, or mercury compounds.

C. Products that come into contact with stainless steel are to have a leachable chloride content of less than 50 ppm when tested in accordance with ASTM C871.

D. Insulation materials for use on austenitic stainless steel are to be qualified as acceptable in accordance with ASTM C795.

E. Foam insulation materials are not to use CFC or HCFC blowing agents in the manufacturing process.

2.3 CELLULAR GLASS PIPE INSULATION

A. Pipe Insulation - Cellular Glass, Preformed:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Owens Corning**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Owens Corning**]
    b. <**Insert manufacturer's name**>

3. Description: Preformed pipe insulation of inorganic, incombustible, foamed or cellulated glass with annealed, rigid, hermetically sealed cells.
4. Standard: ASTM C552.
5. Fabricated shapes in accordance with ASTM C450, ASTM C585, and ASTM C1639.
6. Without Insulation Facing: Type II, Class 1.
7. Factory-Applied Insulation Facing: Type II, Class 2.

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.
c. ASJ+: Aluminum foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.4 FLEXIBLE ELASTOMERIC PIPE INSULATION

A. Pipe Insulation - Flexible Elastomeric:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Aeroflex USA**]
   b. [**Armacell LLC**]
   c. [**K-Flex USA**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Aeroflex USA**]
   b. [**Armacell LLC**]
   c. [**K-Flex USA**]
   d. <**Insert manufacturer's name**>

3. Description: Closed-cell or expanded-rubber flexible elastomeric pipe insulation.
4. Standard: ASTM C534/C534M, Type I, for tubular materials; Type II for sheet materials.
5. Suitable for maximum use temperature between **minus 70 deg F (minus 57 deg C)** and **220 deg F (104 deg C)**.

2.5 GLASS-FIBER PIPE INSULATION

A. Pipe Insulation - Glass-Fiber, Preformed:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**Knauf Insulation**]
   c. [**Manson Insulation Inc.**]
   d. [**Owens Corning**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Knauf Insulation**]
c. [**Manson Insulation Inc.**]
d. [**Owens Corning**]
e. <**Insert manufacturer's name**>

3. Description: Glass fibers bonded with a thermosetting resin; suitable for maximum use temperature up to **850 deg F (454 deg C)** in accordance with ASTM C411. Comply with ASTM C547.
4. Preformed Pipe Insulation: Type I, Grade A.
5. Fabricated shapes in accordance with ASTM C450 and ASTM C585.
6. Unfaced.
7. Factory-Applied Insulation Facing:

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.
c. ASJ+: Aluminum foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

B. Pipe Insulation - Glass-Fiber, Pipe and Tank:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**Knauf Insulation**]
d. [**Manson Insulation Inc.**]
e. [**Owens Corning**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**Knauf Insulation**]
d. [**Manson Insulation Inc.**]
e. [**Owens Corning**]
f. <**Insert manufacturer's name**>

3. Description: Glass fibers bonded with a thermosetting resin.
4. Standard: ASTM C1393.
5. Suitable for maximum use temperature between **35 and 850 deg F (1.7 and 454 deg C)**, in

accordance with ASTM C411.
6. Semirigid board material.
7. Factory-Applied Insulation Facing:

    a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
    b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.
    c. ASJ+: Aluminum foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
    d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.6 MINERAL WOOL PIPE INSULATION

A. Pipe Insulation - Mineral Wool, Preformed:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**Owens Corning**]
    c. [**ROCKWOOL**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**Owens Corning**]
    c. [**ROCKWOOL**]
    d. <**Insert manufacturer's name**>

3. Description: Mandrel-wound mineral wool fibers bonded with a thermosetting resin, unfaced; suitable for maximum use temperature up to **1200 deg F (650 deg C)** in accordance with ASTM C447. Comply with ASTM C547.
4. Standard: ASTM C547.
5. Preformed Pipe Insulation: Type II, Grade A.
6. Fabricated shapes in accordance with ASTM C450 and ASTM C585.
7. Unfaced.
8. Factory-Applied Insulation Facing:

    a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
    b. ASJ-SSL: ASJ with self-sealing, pressure-sensitive, acrylic-based adhesive covered by a removable protective strip; complying with ASTM C1136, Type I.
    c. ASJ+: Aluminum foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
    d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

B. Pipe Insulation - Mineral Wool, Pipe and Tank:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**Owens Corning**]
   c. [**ROCKWOOL**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**Owens Corning**]
   c. [**ROCKWOOL**]
   d. <**Insert manufacturer's name**>

3. Description: Mineral wool fibers bonded with a thermosetting resin.
4. Standard: ASTM C1393.
5. Suitable for maximum use temperature up to **1000 deg F (538 deg C)**, in accordance with ASTM C411.
6. Semirigid board material.
7. Factory-Applied Insulation Facing:

   a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
   b. FSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with kraft-paper backing; complying with ASTM C1136, Type III.
   c. ASJ+: Aluminum foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
   d. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.7 PHENOLIC PIPE INSULATION

A. Pipe Insulation - Phenolic:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**Kingspan Tarec Industrial Insulation NV**]
   c. [**Polyguard Products, Inc.**]
   d. [**Resolco Inc.**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**Kingspan Tarec Industrial Insulation NV**]
c. [**Polyguard Products, Inc.**]
d. [**Resolco Inc.**]
e. <**Insert manufacturer's name**>

3. Description: Prefabricated pipe insulation of rigid, expanded, closed-cell structure.
4. Standard: ASTM C1126.
5. Prefabricated Pipe Insulation: Type III.
6. Prefabricated shapes in accordance with ASTM C450 and ASTM C585.
7. Unfaced.
8. Factory-Applied Insulation Facing:

a. ASJ: White, kraft-paper, fiberglass-reinforced scrim with aluminum-foil backing; complying with ASTM C1136, Type I.
b. ASJ+: Aluminum foil reinforced with glass scrim bonded to a kraft paper interleaving with an outer film leaving no paper exposed; complying with ASTM C1136, Types I, II, III, IV, and VII.
c. PSK Jacket: Aluminum-foil, fiberglass-reinforced scrim with polyethylene backing; complying with ASTM C1136, Type II.

2.8 POLYOLEFIN PIPE INSULATION

A. Pipe Insulation - Polyolefin:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Armacell LLC**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Armacell LLC**]
b. <**Insert manufacturer's name**>

3. Description: Polyethylene thermal plastic insulation.
4. Standard: ASTM C1427, Type I, Grade 1, for tubular materials and with Type II, Grade 1, for sheet materials [**, self-seal**] .

2.9 INSULATING CEMENTS

A. Insulating Cement for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following] :

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

3. Standard: ASTM C195.

B. Insulating Cement for Expanded or Exfoliated Vermiculite:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

3. Standard: ASTM C196.

C. Hydraulic-Setting Insulating and Finishing Cement for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ramco Insulation, Inc.**]
b. <**Insert manufacturer's name**>

3. Standard: ASTM C449.

2.10 INSULATION ADHESIVES

A. Materials are to be compatible with insulation materials, jackets, and substrates and for bonding insulation to itself and to surfaces to be insulated unless otherwise indicated.

B. Insulation Adhesive for Lagging Cloth:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Vimasco Corporation**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Vimasco Corporation**]
   d. <**Insert manufacturer's name**>

3. Standard: MIL-A-3316C, Class I, Grade A.
4. Adhesives to be compatible with insulation materials, jackets, and substrates.
5. Fire-resistant, water-based lagging adhesive and coating for use indoors to adhere fire-resistant lagging cloths over pipe insulation.
6. Service Temperature Range: [**20 to plus 180 deg F (Minus 6 to plus 82 deg C)**][**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**] .
7. Color: White.
8. Verify adhesive is as recommended by insulation manufacturer and has a VOC content of [**50**]<**Insert number**> g/L or less.

C. Insulation Adhesive for Cellular Glass:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. <**Insert manufacturer's name**>

3. Description: Two-component, thermosetting urethane adhesive containing no flammable solvents,

with a service temperature range of **minus 100 to plus 200 deg F (minus 73 to plus 93 deg C)**.

4. Adhesive: As recommended by cellular-glass manufacturer and with a VOC content of 80 g/L or less.

D. Insulation Adhesive, Solvent Based for Flexible Elastomeric and Polyolefin:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Aeroflex USA**]
    b. [**Armacell LLC**]
    c. [**Foster Brand; H. B. Fuller**]
    d. [**K-Flex USA**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Aeroflex USA**]
    b. [**Armacell LLC**]
    c. [**Foster Brand; H. B. Fuller**]
    d. [**K-Flex USA**]
    e. <**Insert manufacturer's name**>

3. Description: Solvent-based adhesive for flexible elastomeric and polyolefin insulation.
4. Flame-spread index is to be 25 or less and smoke-developed index is to be 50 or less as tested in accordance with ASTM E84.
5. Wet Flash Point: Below **0 deg F (minus 18 deg C)**.
6. Service Temperature Range: **40 to 200 deg F (4 to plus 93 deg C)**.
7. Color: [**Black**]<**Insert color**> .
8. Adhesive: As recommended by flexible elastomeric and polyolefin manufacturer and with a VOC content of [**80**]<**Insert value**> g/L or less.

E. Insulation Adhesive for Glass Fiber and Mineral Wool:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]

d. **<Insert manufacturer's name>**

3. Standard: MIL-A-3316C, Class 2, Grade A.
4. Adhesive: As recommended by mineral-fiber manufacturer and with a VOC content of 80 g/L or less.
5. Verify fiberglass adhesive has a VOC content of 80 g/L or less when calculated in accordance with 40 CFR 59, Subpart D (EPA Method 24).

F. Insulation Adhesive for Phenolic:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. **<Insert manufacturer's name>**

3. Description: Solvent-based resin adhesive, with a service temperature range of **minus 75 to plus 300 deg F (minus 59 to plus 149 deg C)**.
4. Adhesive: As recommended by phenolic manufacturer and with a VOC content of 50 g/L or less.

G. Insulation Adhesive for ASJ and FSK Facings/Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Mon-Eco Industries, Inc.**]
   d. **<Insert manufacturer's name>**

3. Description: Pipe insulation adhesive for bonding ASJ and FSK facing/jacket insulation lap seams and joints.
4. Standard: MIL-A-3316C, Class 2, Grade A.
5. Verify adhesives have a VOC content of 80 g/L or less.

H. Insulation Adhesive for PVC Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**P.I.C. Plastics, Inc.**]
   c. [**Proto Corporation**]
   d. [**Sekisui Voltek, LLC**]
   e. [**Speedline Corporation**]
   f. [**The Dow Chemical Company**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Johns Manville; a Berkshire Hathaway company**]
   b. [**P.I.C. Plastics, Inc.**]
   c. [**Proto Corporation**]
   d. [**Sekisui Voltek, LLC**]
   e. [**Speedline Corporation**]
   f. [**The Dow Chemical Company**]
   g. <**Insert manufacturer's name**>

3. Description: PVC jacket adhesive to be compatible with and as recommended in PVC jacket manufacturer's literature.
4. Adhesive: As recommended by PVC jacket manufacturer and with a VOC content of 50 g/L or less.

2.11 INSULATION MASTICS AND COATINGS

A. Materials are to be compatible with insulation materials, jackets, and substrates.

1. Mastics: As recommended by insulation manufacturer and with a VOC content of 50 g/L or less.

B. Insulation Vapor-Retarder Mastic - Water Based, Indoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Knauf Insulation**]
   d. [**Mon-Eco Industries, Inc.**]
   e. [**Vimasco Corporation**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Knauf Insulation**]
d. [**Mon-Eco Industries, Inc.**]
e. [**Vimasco Corporation**]
f. <**Insert manufacturer's name**>

3. Description: Insulation vapor-retarder mastic, water-based, suitable for indoor use on below-ambient services.
4. Water-Vapor Permeance: Comply with ASTM E96/E96M or ASTM F1249.
5. Service Temperature Range: [**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**][**Minus 20 to plus 180 deg F (Minus 29 to plus 82 deg C)**] .
6. Standard: MIL-PRF-19565C, Type II, for permeance requirements [**, with supplier listing on DOD QPD - Qualified Products Database**] .
7. Color: [**White**]<**Insert color**> .

C. Insulation Vapor-Retarder Mastic - Solvent Based, Indoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. <**Insert manufacturer's name**>

3. Description: Insulation vapor-retarder mastic, solvent-based, suitable for indoor use on below-ambient services.
4. Water-Vapor Permeance: Comply with ASTM E96/E96M or ASTM F1249.
5. Service Temperature Range: **0 to 180 deg F (Minus 18 to plus 82 deg C)**.
6. Color: [**White**]<**Insert color**> .

D. Insulation Vapor-Retarder Mastic - Solvent Based, Outdoor Use:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Mon-Eco Industries, Inc.**]
    d. <**Insert manufacturer's name**>

3. Description: Insulation vapor-retarder mastic, solvent-based, suitable for outdoor use on below-ambient services.
4. Water-Vapor Permeance: Comply with ASTM E96/E96M or ASTM F1249.
5. Service Temperature Range: **Minus 50 to plus 220 deg F (Minus 46 to plus 104 deg C)**.
6. Color: [**White**]<**Insert color**> .

E. Insulation Breather Mastic - Water Based, Indoor/Outdoor:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Knauf Insulation**]
    d. [**Mon-Eco Industries, Inc.**]
    e. [**Vimasco Corporation**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. [**Foster Brand; H. B. Fuller**]
    c. [**Knauf Insulation**]
    d. [**Mon-Eco Industries, Inc.**]
    e. [**Vimasco Corporation**]
    f. <**Insert manufacturer's name**>

3. Description: Insulation breather mastic, water-based, suitable for indoor and outdoor use on above-ambient surfaces.
4. Water-Vapor Permeance: ASTM E96/E96M, greater than **1.0 perm (0.66 metric perm)** at manufacturer's recommended dry film thickness.
5. Service Temperature Range: [**0 to plus 180 deg F (Minus 18 to plus 82 deg C)**][**Minus 20 to plus 180 deg F (Minus 29 to plus 82 deg C)**] .
6. Color: [**White**]<**Insert color**> .

2.12 INSULATION SEALANTS

A. Insulation Joint Sealant:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. [**Owens Corning**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. [**Owens Corning**]
e. <**Insert manufacturer's name**>

3. Permanently flexible, elastomeric sealant.
4. Service Temperature Range: [**Minus 58 to plus 176 deg F (Minus 50 to plus 80 deg C)**][**Minus 100 to plus 300 deg F (Minus 73 to plus 149 deg C)**] .
5. Color: White or gray.
6. Sealant shall have a VOC content of 420 g/L or less.

B. Flashing Sealant for FSK and Metal Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. [**Mon-Eco Industries, Inc.**]
d. <**Insert manufacturer's name**>

3. Flashing sealant to be compatible with insulation materials, jackets, and substrates.
4. Fire- and water-resistant, flexible, elastomeric sealant.
5. Service Temperature Range: **Minus 40 to plus 250 deg F (Minus 40 to plus 121 deg C)**.
6. Color: Aluminum.
7. Verify sealant has a VOC content of 420 g/L or less.

C. Flashing Sealant for ASJ and PVC Jackets:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Childers Brand; H. B. Fuller Construction Products**]
b. [**Foster Brand; H. B. Fuller**]
c. <**Insert manufacturer's name**>

3. Flashing sealant to be compatible with insulation materials, jackets, and substrates.
4. Fire- and water-resistant, flexible, elastomeric sealant.
5. Service Temperature Range: **Minus 40 to plus 250 deg F (Minus 40 to plus 121 deg C)**.
6. Color: White.
7. Verify sealant has a VOC content of 420 g/L or less.

2.13 FIELD-APPLIED INSULATION JACKETS

A. Field-applied jackets are to comply with ASTM C1136, Type I, unless otherwise indicated.

B. Insulation Jacket, Field Applied - FSK:

1. Aluminum-foil-face, fiberglass-reinforced scrim with kraft-paper backing.

C. Pipe Insulation Jacket, Field Applied - PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Airex Manufacturing Inc.**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**P.I.C. Plastics, Inc.**]
d. [**Proto Corporation**]
e. [**Speedline Corporation**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Airex Manufacturing Inc.**]
b. [**Johns Manville; a Berkshire Hathaway company**]
c. [**P.I.C. Plastics, Inc.**]
d. [**Proto Corporation**]
e. [**Speedline Corporation**]
f. <**Insert manufacturer's name**>

3. Description: High-impact-resistant, UV-resistant PVC complying with ASTM D1784, Class 16354-C.
4. Thickness: As indicated in "Outdoor, Field-Applied Jacket Schedule" Articles under Part 3.
5. Jacket: Roll stock ready for shop or field cutting and forming.
6. Adhesive: As recommended by jacket material manufacturer.
7. Color: [**White**][**Color-code jackets based on system. Color as selected by Architect**] .
8. Factory-fabricated fitting covers to match jacket if available; otherwise, field fabricate.

    a. Shapes: 45- and 90-degree, short- and long-radius elbows, tees, valves, flanges, unions, reducers, end caps, soil-pipe hubs, traps, mechanical joints, and P-trap and supply covers for lavatories.

D. Insulation Jacket, Field Applied - Metal:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**RPR Products, Inc.**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Johns Manville; a Berkshire Hathaway company**]
    b. [**RPR Products, Inc.**]
    c. <**Insert manufacturer's name**>

3. Jacket Material - Aluminum:

    a. Description: [**Sheet and roll stock ready for shop or field sizing**][**Factory cut and rolled to size**] .
    b. Standard: ASTM B209 (ASTM B209M), Alloy 3003, 3005, 3105, or 5005, Temper H-14.
    c. Finish and Thickness: As indicated in "Indoor, Field-Applied Insulation Jacket Schedule" and "Outdoor, Field-Applied Insulation Jacket Schedule" articles under Part 3.
    d. Moisture Barrier for Indoor Applications: [**1-mil- (0.025-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick polysurlyn**] .
    e. Moisture Barrier for Outdoor Applications: [**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick polysurlyn**] .
    f. Factory-Fabricated Fitting Covers:

        1) Same material, finish, and thickness as jacket.
        2) Preformed two-piece or gore, 45- and 90-degree, short- and long-radius elbows.
        3) Tee covers.
        4) Flange and union covers.
        5) End caps.
        6) Beveled collars.
        7) Valve covers.
        8) Field fabricate fitting covers only if factory-fabricated fitting covers are not available.

4. Jacket Material - Stainless Steel:

a. Description: [**Sheet and roll stock ready for shop or field sizing**][**Factory cut and rolled to size**] .
b. Standard: ASTM A240/A240M.
c. Material Type, Finish, and Thickness: As indicated in "Indoor, Field-Applied Insulation Jacket Schedule" and "Outdoor, Field-Applied Insulation Jacket Schedule" articles under Part 3.
d. Moisture Barrier for Indoor Applications: [**1-mil- (0.025-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**3-mil- (0.075-mm-) thick polysurlyn**] .
e. Moisture Barrier for Outdoor Applications: [**3-mil- (0.075-mm-) thick, heat-bonded polyethylene and kraft paper**][**2.5-mil- (0.063-mm-) thick polysurlyn**] .
f. Factory-Fabricated Fitting Covers:

1) Same material, finish, and thickness as jacket.
2) Preformed two-piece or gore, 45- and 90-degree, short- and long-radius elbows.
3) Tee covers.
4) Flange and union covers.
5) End caps.
6) Beveled collars.
7) Valve covers.
8) Field fabricate fitting covers only if factory-fabricated fitting covers are not available.

E. Underground Direct-Buried Jacket:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Owens Corning**]
b. [**Polyguard Products, Inc.**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Owens Corning**]
b. [**Polyguard Products, Inc.**]
c. <**Insert manufacturer's name**>

3. Description: Underground direct-buried jacket of rubberized bituminous resin reinforced with a woven-glass fiber or polyester scrim and laminated aluminum foil.
4. Vapor Barrier and Waterproofing Membrane: **125 mils (3.2 mm)** thick.

F. Insulation Jacket, Field Applied - Outdoor, Self Adhesive (Asphaltic):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**MFM Building Products Corp.**]
b. [**Polyguard Products, Inc.**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**MFM Building Products Corp.**]
   b. [**Polyguard Products, Inc.**]
   c. <**Insert manufacturer's name**>

3. Description: Self-adhesive outdoor asphaltic jacket of rubberized bituminous resin on a cross-laminated polyethylene film covered with [**white**][**stucco-embossed**] aluminum-foil.
4. Vapor Barrier/Waterproofing Membrane: **60 mils (1.5 mm)** thick.

G. Insulation Jacket, Field Applied - Indoor/Outdoor, Self Adhesive (Non-Asphaltic):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**3M**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**3M**]
   b. [**Foster Brand; H. B. Fuller**]
   c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
   d. <**Insert manufacturer's name**>

3. Description: Vapor barrier and waterproofing jacket for installation over insulation located aboveground outdoors or indoors.
4. Specialized jacket consisting of five layers of laminated aluminum and polyester film.
5. Adhesive Lap: Self-adhesive, low-temperature acrylic, pressure-sensitive adhesive lap.
6. Permeance: 0.00 perm as tested in accordance with ASTM F1249.
7. Flamespread/Smoke Developed: 25/50 as tested in accordance with ASTM E84.
8. Aluminum Finish: [**Embossed**][**Smooth**] .
9. Outer Aluminum Surface: Coated with UV-resistant coating for protection from environmental contaminants.

2.14 FIELD-APPLIED FABRIC-REINFORCING MESH

A. Woven Glass-Fiber Mesh for Pipe Insulation, Field Applied:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Childers Brand; H. B. Fuller Construction Products**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Childers Brand; H. B. Fuller Construction Products**]
    b. <**Insert manufacturer's name**>

3. Description: Woven glass-fiber mesh for covering pipe and pipe fittings insulation.
4. Weight: Approximately **2 oz./sq. yd. (68 g/sq. m)**.
5. Thread Count: **10 strands by 10 strands/sq. in. (4 strands by 4 strands/sq. mm)**.

B. Woven Polyester Mesh for Pipe Insulation, Field Applied:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Foster Brand; H. B. Fuller**]
    b. [**Vimasco Corporation**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Foster Brand; H. B. Fuller**]
    b. [**Vimasco Corporation**]
    c. <**Insert manufacturer's name**>

3. Description: Woven polyester mesh for covering pipe and pipe fittings insulation.
4. Weight: Approximately **1 oz./sq. yd. (34 g/sq. m)**.
5. Thread Count: **10 strands by 10 strands/sq. in. (4 strands by 4 strands/sq. mm)**.
6. Weave Type: Leno.

2.15 FIELD-APPLIED CLOTHS FOR INSULATION

A. Woven Glass-Fiber Cloth, Field Applied, for Insulation:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Alpha Associates, Inc.**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Alpha Associates, Inc.**]
    b. <**Insert manufacturer's name**>

3. Description: Woven glass-fiber cloth.
4. Standard: MIL-C-20079H, Type I.
5. Weave: Plain.
6. Weight: Minimum of **8 oz./sq. yd. (271 g/sq. m)**, presized.

2.16 VAPOR-RETARDER TAPES

A. Vapor-Retarder Tape for ASJ:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**3M Industrial Adhesives and Tapes Division**]
   b. [**Aeroflex USA**]
   c. [**Avery Dennison Corporation, Specialty Tapes Division**]
   d. [**Ideal Tape Co., Inc., an American Biltrite Company**]
   e. [**Knauf Insulation**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**3M Industrial Adhesives and Tapes Division**]
   b. [**Aeroflex USA**]
   c. [**Avery Dennison Corporation, Specialty Tapes Division**]
   d. [**Ideal Tape Co., Inc., an American Biltrite Company**]
   e. [**Knauf Insulation**]
   f. <**Insert manufacturer's name**>

3. Description: White vapor-retarder tape matching factory-applied jacket with acrylic adhesive.
4. Standard: ASTM C1136.
5. Width: [**3 inches (75 mm)**]<**Insert value**> .
6. Thickness: [**11.5 mils (0.29 mm)**]<**Insert value**> .
7. Adhesion: [**90 ounces force/inch (1.0 N/mm)**]<**Insert value**> in width.
8. Elongation: [**2**]<**Insert number**> percent.
9. Tensile Strength: [**40 lbf/inch (7.2 N/mm)**]<**Insert value**> in width.
10. ASJ Tape Disks and Squares: Precut disks or squares of ASJ tape.

B. Vapor-Retarder Tape for FSK:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**3M Industrial Adhesives and Tapes Division**]
   b. [**Avery Dennison Corporation, Specialty Tapes Division**]
   c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
   d. [**Knauf Insulation**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Avery Dennison Corporation, Specialty Tapes Division**]
c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
d. [**Knauf Insulation**]
e. <**Insert manufacturer's name**>

3. Description: Foil-face, vapor-retarder tape matching factory-applied jacket with acrylic adhesive.
4. Standard: ASTM C1136.
5. Width: [**3 inches (75 mm)**]<**Insert value**> .
6. Thickness: [**6.5 mils (0.16 mm)**]<**Insert value**> .
7. Adhesion: [**90 ounces force/inch (1.0 N/mm)**]<**Insert value**> in width.
8. Elongation: [**2**]<**Insert number**> percent.
9. Tensile Strength: [**40 lbf/inch (7.2 N/mm)**]<**Insert value**> in width.
10. FSK Tape Disks and Squares: Precut disks or squares of FSK tape.

C. Vapor-Retarder Tape for PVC:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Ideal Tape Co., Inc., an American Biltrite Company**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Ideal Tape Co., Inc., an American Biltrite Company**]
c. <**Insert manufacturer's name**>

3. Description: White vapor-retarder tape matching field-applied PVC jacket with acrylic adhesive.
4. Application: Suitable for indoor and outdoor applications.
5. Width: [**2 inches (50 mm)**]<**Insert value**> .
6. Thickness: [**6 mils (0.15 mm)**]<**Insert value**> .
7. Adhesion: [**64 ounces force/inch (0.7 N/mm)**]<**Insert value**> in width.
8. Elongation: [**500**]<**Insert value**> percent.
9. Tensile Strength: [**18 lbf/inch (3.3 N/mm)**]<**Insert value**> in width.

D. Vapor-Retarder Tape - Aluminum Foil:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Avery Dennison Corporation, Specialty Tapes Division**]
c. [**Ideal Tape Co., Inc., an American Biltrite Company**]

d. [**Knauf Insulation**]
e. [**Sekisui Voltek, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**3M Industrial Adhesives and Tapes Division**]
b. [**Avery Dennison Corporation, Specialty Tapes Division**]
c. [**Ideal Tape Co., Inc., an American Biltrite Company**]
d. [**Knauf Insulation**]
e. [**Sekisui Voltek, LLC**]
f. <**Insert manufacturer's name**>

3. Description: Aluminum-foil vapor-retarder tape with acrylic adhesive.
4. Width: [**2 inches (50 mm)**]<**Insert value**> .
5. Thickness: [**3.7 mils (0.093 mm)**]<**Insert value**> .
6. Adhesion: [**100 ounces force/inch (1.1 N/mm)**]<**Insert value**> in width.
7. Elongation: [**5**]<**Insert number**> percent.
8. Tensile Strength: [**34 lbf/inch (6.2 N/mm)**]<**Insert value**> in width.

2.17 INSULATION SECUREMENTS

A. Insulation Bands:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**RPR Products, Inc.**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Johns Manville; a Berkshire Hathaway company**]
b. [**RPR Products, Inc.**]
c. <**Insert manufacturer's name**>

3. Insulation Bands - Stainless Steel: ASTM A240/A240M, [**Type 304**][**or**][**Type 316**] ; **0.015 inch (0.38 mm)** thick, [**1/2 inch (13 mm)**][**3/4 inch (19 mm)**] wide with [**wing seal**][**or**][**closed seal**] .
4. Insulation Bands - Aluminum: **ASTM B209 (ASTM B209M)**, Alloy 3003, 3005, 3105, or 5005; Temper H-14, **0.020 inch (0.51 mm)** thick, [**1/2 inch (13 mm)**][**3/4 inch (19 mm)**] wide with [**wing seal**][**or**][**closed seal**] .
5. Springs: Twin spring set constructed of stainless steel, with ends flat and slotted to accept metal bands. Spring size is determined by manufacturer for application.

B. Insulation Staples: Outward clinching insulation staples, nominal **3/4 inch (19 mm)** wide, stainless steel or Monel.

C. Insulation Wire:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**C & F Wire Products**]
   b. [**Johns Manville; a Berkshire Hathaway company**]
   c. [**RPR Products, Inc.**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**C & F Wire Products**]
   b. [**Johns Manville; a Berkshire Hathaway company**]
   c. [**RPR Products, Inc.**]
   d. <**Insert manufacturer's name**>

3. Description: [**0.080-inch (2.0-mm) nickel-copper alloy**][**0.062-inch (1.6-mm) soft-annealed, stainless steel**][**0.062-inch (1.6-mm) soft-annealed, galvanized steel**] .

2.18 PROTECTIVE SHIELDING GUARDS

A. Protective Shielding Pipe Covers, :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Buckaroos, Inc.**]
   b. [**McGuire Manufacturing**]
   c. [**MVG Molded Products**]
   d. [**Plumberex Specialty Products, Inc.**]
   e. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
   f. [**Truebro; IPS Corporation**]
   g. [**Zurn Industries, LLC**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Buckaroos, Inc.**]
   b. [**McGuire Manufacturing**]
   c. [**MVG Molded Products**]
   d. [**Plumberex Specialty Products, Inc.**]
   e. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
   f. [**Truebro; IPS Corporation**]
   g. [**Zurn Industries, LLC**]
   h. <**Insert manufacturer's name**>

3. Description: Manufactured plastic wraps for covering plumbing fixture [**hot-water supply**][**hot-**

and cold-water supplies] and trap and drain piping. Comply with Americans with Disabilities Act (ADA) and Architectural Barriers Act (ABA) Accessibility Guidelines requirements.

B. Protective Shielding Piping Enclosures, :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
   b. [**Truebro; IPS Corporation**]
   c. [**Zurn Industries, LLC**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
   b. [**Truebro; IPS Corporation**]
   c. [**Zurn Industries, LLC**]
   d. <**Insert manufacturer's name**>

3. Description: Manufactured plastic enclosure for covering plumbing fixture hot- and cold-water supplies and trap and drain piping. Comply with ADA and ABA Accessibility Guidelines requirements.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions for compliance with requirements for installation tolerances and other conditions affecting performance of insulation application.

1. Verify that piping to be insulated has been tested and is free of defects.
2. Verify that surfaces to be insulated are clean and dry.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Clean and dry surfaces to receive insulation. Remove materials that will adversely affect insulation application.

B. Clean and prepare surfaces to be insulated. Before insulating, apply a corrosion coating to insulated surfaces as follows:

1. Stainless Steel: Coat 300 series stainless steel with an epoxy primer **5 mils (0.127 mm)** thick and an epoxy finish **5 mils (0.127 mm)** thick if operating in a temperature range of between **140 and 300 deg F (60 and 149 deg C)**. Consult coating manufacturer for appropriate coating materials and application methods for operating temperature range.

2. Carbon Steel: Coat carbon steel operating at a service temperature of between **32 and 300 deg F (0 and 149 deg C)** with an epoxy coating. Consult coating manufacturer for appropriate coating materials and application methods for operating temperature range.

C. Coordinate insulation installation with the tradesman installing heat tracing. Comply with requirements for heat tracing that apply to insulation.

D. Mix insulating cements with clean potable water; if insulating cements are to be in contact with stainless steel surfaces, use demineralized water.

3.3 INSTALLATION OF PIPING INSULATION, GENERAL

A. Requirements in this article apply to all insulation materials, except where more specific requirements are specified in various pipe insulation material installation articles.

B. Install insulation materials, accessories, and finishes with smooth, straight, and even surfaces; free of voids throughout the length of piping, including fittings, valves, and specialties.

C. Install insulation materials, forms, vapor barriers or retarders, jackets, and of thicknesses required for each item of pipe system, as specified in insulation system schedules.

D. Install accessories compatible with insulation materials and suitable for the service. Install accessories that do not corrode, compress, or otherwise damage insulation or jacket.

E. Install insulation with longitudinal seams at top and bottom (12 o'clock and 6 o'clock positions) of horizontal runs.

F. Install multiple layers of insulation with longitudinal and end seams staggered.

G. Do not weld brackets, clips, or other attachment devices to piping, fittings, and specialties.

H. Keep insulation materials dry during storage, application, and finishing. Replace insulation materials that get wet during storage or in the installation process before being properly covered and sealed in accordance with Contract Documents [**, unless otherwise approved by the engineer-of-record**] .

I. Install insulation with tight longitudinal seams and end joints. Bond seams and joints with adhesive recommended by insulation material manufacturer.

J. Install insulation with least number of joints practical.

K. Where vapor barrier is indicated, seal joints, seams, and penetrations in insulation at hangers, supports, anchors, and other projections with vapor-barrier mastic.

1. Install insulation continuously through hangers and around anchor attachments.
2. For insulation application where vapor barriers are indicated, extend insulation on anchor legs from point of attachment to supported item to point of attachment to structure. Taper and seal ends attached to structure with vapor-barrier mastic.
3. Install insert materials and insulation to tightly join the insert. Seal insulation to insulation inserts with adhesive or sealing compound recommended by insulation material manufacturer.
4. Cover inserts with jacket material matching adjacent pipe insulation. Install shields over jacket, arranged to protect jacket from tear or puncture by hanger, support, and shield.

L. Apply adhesives, mastics, and sealants at manufacturer's recommended coverage rate and wet and dry

film thicknesses.

M. Install insulation with factory-applied jackets as follows:

1. Draw jacket tight and smooth, but not to the extent of creating wrinkles or areas of compression in the insulation.
2. Cover circumferential joints with **3-inch- (75-mm-)** wide strips, of same material as insulation jacket. Secure strips with adhesive and outward-clinching staples along both edges of strip, spaced **4 inches (100 mm)** o.c.
3. Overlap jacket longitudinal seams at least **1-1/2 inches (38 mm)**. Install insulation with longitudinal seams at bottom of pipe. Clean and dry surface to receive self-sealing lap. Staple laps with outward-clinching staples along edge at **4 inches (100 mm)** o.c.
4. For below-ambient services, apply vapor-barrier mastic over staples.
5. Cover joints and seams with tape, in accordance with insulation material manufacturer's written instructions, to maintain vapor seal.
6. Where vapor barriers are indicated, apply vapor-barrier mastic on seams and joints and at ends adjacent to pipe flanges and fittings.

N. Cut insulation in a manner to avoid compressing insulation.

O. Finish installation with systems at operating conditions. Repair joint separations and cracking due to thermal movement.

P. Repair damaged insulation facings by applying same facing material over damaged areas. Extend patches at least [**4 inches (100 mm)**]<**Insert value**> beyond damaged areas. Adhere, staple, and seal patches in similar fashion to butt joints.

Q. For above-ambient services, do not install insulation to the following:

1. Vibration-control devices.
2. Testing agency labels and stamps.
3. Nameplates and data plates.
4. Cleanouts.

R. Insulation Installation on Fittings, Valves, Strainers, Flanges, Mechanical Couplings, and Unions:

1. Install insulation over fittings, valves, strainers, flanges, mechanical couplings, unions, and other specialties with continuous thermal and vapor-retarder integrity unless otherwise indicated.
2. Insulate pipe elbows using [**preformed fitting insulation**][**or**][**mitered or routed fittings**] made from same material and density as that of adjacent pipe insulation. Each piece is butted tightly against adjoining piece and bonded with adhesive. Fill joints, seams, voids, and irregular surfaces with insulating cement finished to a smooth, hard, and uniform contour that is uniform with adjoining pipe insulation.
3. Insulate tee fittings with [**preformed fitting insulation**][**or**][**sectional pipe insulation**] of same material and thickness as that used for adjacent pipe. Cut sectional pipe insulation to fit. Butt each section closely to the next and hold in place with tie wire. Bond pieces with adhesive.
4. Insulate valves using [**preformed fitting insulation**][**or**][**sectional pipe insulation**] of same material, density, and thickness as that used for adjacent pipe. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker. For valves, insulate up to and including the bonnets, valve stuffing-box studs, bolts, and nuts. Fill joints, seams, and irregular surfaces with insulating cement.
5. Insulate strainers using [**preformed fitting insulation**][**or**][**sectional pipe insulation**] of same material, density, and thickness as used for adjacent pipe. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker. Fill joints, seams, and irregular surfaces with insulating cement. Insulate strainers, so strainer basket flange or plug can be easily removed and replaced without damaging the

insulation and jacket. Provide a removable reusable insulation cover. For below-ambient services, provide a design that maintains vapor barrier.

6. Insulate flanges, mechanical couplings, and unions, using a section of oversized preformed pipe insulation. Overlap adjoining pipe insulation by not less than two times the thickness of pipe insulation, or one pipe diameter, whichever is thicker. Stencil or label the outside insulation jacket of each union with the word "union" matching size and color of pipe labels.
7. Cover segmented insulated surfaces with a layer of finishing cement and coat with a mastic. Install vapor-barrier mastic for below-ambient services and a breather mastic for above-ambient services. Reinforce the mastic with fabric-reinforcing mesh. Trowel the mastic to a smooth and well-shaped contour.
8. For services not specified to receive a field-applied jacket, except for flexible elastomeric and polyolefin, install fitted PVC cover over elbows, tees, strainers, valves, flanges, and unions. Terminate ends with PVC end caps. Tape PVC covers to adjoining insulation facing, using PVC tape.

S. Insulate instrument connections for thermometers, pressure gauges, pressure temperature taps, test connections, flow meters, sensors, switches, and transmitters on insulated pipes. Shape insulation at these connections by tapering it to and around the connection with insulating cement and finish with finishing cement, mastic, and flashing sealant.

T. Install removable insulation covers [**at locations indicated on Drawings**] . Installation conforms to the following:

1. Make removable flange and union insulation from sectional pipe insulation of same thickness as that on adjoining pipe. Install same insulation jacket as that of adjoining pipe insulation.
2. When flange and union covers are made from sectional pipe insulation, extend insulation from flanges or union at least two times the insulation thickness over adjacent pipe insulation on each side of flange or union. Secure flange cover in place with stainless steel or aluminum bands. Select band material compatible with insulation and jacket.
3. Construct removable valve insulation covers in same manner as for flanges, except divide the two-part section on the vertical center line of valve body.
4. When covers are made from block insulation, make two halves, each consisting of mitered blocks wired to stainless steel fabric. Secure this wire frame, with its attached insulation, to flanges with tie wire. Extend insulation at least **2 inches (50 mm)** over adjacent pipe insulation on each side of valve. Fill space between flange or union cover and pipe insulation with insulating cement. Finish cover assembly with insulating cement applied in two coats. After first coat is dry, apply and trowel second coat to a smooth finish.
5. Unless a PVC jacket is indicated in field-applied jacket schedules, finish exposed surfaces with a metal jacket.

3.4 PENETRATIONS

A. Insulation Installation at Roof Penetrations: Install insulation continuously through roof penetrations.

1. Seal penetrations with flashing sealant.
2. For applications requiring only indoor insulation, terminate insulation above roof surface and seal with joint sealant. For applications requiring indoor and outdoor insulation, install insulation for outdoor applications tightly joined to indoor insulation ends. Seal joint with joint sealant.
3. Extend jacket of outdoor insulation outside roof flashing at least **2 inches (50 mm)** below top of roof flashing.
4. Seal jacket to roof flashing with flashing sealant.

B. Insulation Installation at Underground Exterior Wall Penetrations: Terminate insulation flush with sleeve seal. Seal terminations with flashing sealant.

C. Insulation Installation at Aboveground Exterior Wall Penetrations: Install insulation continuously through wall penetrations.

1. Seal penetrations with flashing sealant.
2. For applications requiring only indoor insulation, terminate insulation inside wall surface and seal with joint sealant. For applications requiring indoor and outdoor insulation, install insulation for outdoor applications tightly joined to indoor insulation ends. Seal joint with joint sealant.
3. Extend jacket of outdoor insulation outside wall flashing and overlap wall flashing at least **2 inches (50 mm)**.
4. Seal jacket to wall flashing with flashing sealant.

D. Insulation Installation at Interior Wall and Partition Penetrations That Are Not Fire Rated: Install insulation continuously through walls and partitions.

E. Insulation Installation at Fire-Rated Wall and Partition Penetrations: Install insulation continuously through penetrations of fire-rated walls and partitions.

1. Comply with requirements in Section 078413 "Penetration Firestopping" for firestopping and fire-resistive joint sealers.

F. Insulation Installation at Floor Penetrations:

1. Pipe: Install insulation continuously through floor penetrations.
2. Seal penetrations through fire-rated assemblies. Comply with requirements in Section 078413 "Penetration Firestopping."

3.5 INSTALLATION OF CELLULAR-GLASS PIPE INSULATION

A. Installation on:

1. Straight Pipes and Tubes:

a. Secure each layer of insulation to pipe with wire or bands, and tighten bands without deforming insulation materials.
b. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and joint sealant.
c. For insulation with jackets on above-ambient services, secure laps with outward-clinched staples at **6 inches (150 mm)** o.c.
d. For insulation with jackets on below-ambient services, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive, as recommended by insulation material manufacturer, and seal with vapor-barrier mastic and flashing sealant.

2. Pipe Flanges:

a. Install prefabricated pipe insulation to outer diameter of pipe flange.
b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of cellular-glass block insulation of same thickness as that of pipe insulation. Where voids are difficult to fill with block insulation, fill the voids with a fibrous insulation material suitable for the specific operating temperature.
d. Install jacket material with manufacturer's recommended adhesive, overlap seams at least **1 inch (25 mm)**, and seal joints with flashing sealant.

3. Pipe Fittings and Elbows:

a. Install prefabricated sections of same material as that of straight segments of pipe insulation when available. Secure according to manufacturer's written instructions.
b. When preformed sections of insulation are not available, install mitered or routed sections of cellular-glass insulation. Secure insulation materials with wire or bands.

4. Insulation Installation on Valves and Pipe Specialties:

a. Install prefabricated sections of cellular-glass insulation to valve body.
b. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
c. Install insulation to flanges as specified for flange insulation application.

3.6 INSTALLATION OF FLEXIBLE ELASTOMERIC PIPE INSULATION

A. Seal longitudinal seams and end joints with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

B. Insulation on:

1. Pipe Flanges:

a. Install pipe insulation to outer diameter of pipe flange.
b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of sheet insulation of same thickness as that of pipe insulation.
d. Secure insulation to flanges and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

2. Pipe Fittings and Elbows:

a. Install sections of pipe insulation and miter if required in accordance with manufacturer's written instructions.
b. Secure insulation materials and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

3. Valves and Pipe Specialties:

a. Install prefabricated valve covers manufactured of same material as that of pipe insulation when available.
b. When prefabricated valve covers are not available, install cut sections of pipe and sheet insulation to valve body. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
c. Install insulation to flanges as specified for flange insulation application.
d. Secure insulation to valves and specialties, and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

C. Finish: After adhesive has fully cured, apply two coats of insulation manufacturer's recommended protective coating.

3.7 INSTALLATION OF GLASS-FIBER PIPE INSULATION

A. Insulation on:

1. Straight Pipes and Tubes:

a. Secure each layer of preformed pipe insulation to pipe with wire or bands, and tighten bands without deforming insulation materials.
b. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and joint sealant.
c. For insulation with jackets on above-ambient surfaces, secure laps with outward-clinched staples at **6 inches (150 mm)** o.c.
d. For insulation with jackets on below-ambient surfaces, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive, as recommended by insulation material manufacturer, and seal with vapor-barrier mastic and flashing sealant.

2. Pipe Flanges:

a. Install prefabricated pipe insulation to outer diameter of pipe flange.
b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with glass-fiber or mineral-wool blanket insulation.
d. Install jacket material with manufacturer's recommended adhesive, overlap seams at least **1 inch (25 mm)**, and seal joints with flashing sealant.

3. Pipe Fittings and Elbows:

a. Install prefabricated sections of same material as that of straight segments of pipe insulation when available.
b. When prefabricated insulation elbows and fittings are not available, install mitered sections of pipe insulation, to a thickness equal to adjoining pipe insulation. Secure insulation materials with wire or bands.

4. Valves and Pipe Specialties:

a. Install prefabricated sections of same material as that of straight segments of pipe insulation when available.
b. When prefabricated sections are not available, install fabricated sections of pipe insulation to valve body.
c. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
d. Install insulation to flanges as specified for flange insulation application.

3.8 INSTALLATION OF PHENOLIC PIPE INSULATION

A. General Installation Requirements:

1. Secure single-layer insulation with stainless steel bands at **12-inch (300-mm)** intervals, and tighten bands without deforming insulation materials.
2. Install two-layer insulation with joints tightly butted and staggered at least **3 inches (75 mm)**. Secure inner layer with **0.062-inch (1.6-mm)** wire spaced at **12-inch (300-mm)** intervals. Secure outer layer with stainless steel bands at **12-inch (300-mm)** intervals.

B. Insulation on:

1. Straight Pipes and Tubes:

    a. Secure each layer of insulation to pipe with wire or bands, and tighten bands without deforming insulation materials.
    b. Where vapor barriers are indicated, seal longitudinal seams, end joints, and protrusions with vapor-barrier mastic and joint sealant.
    c. For insulation with jackets on above-ambient services, secure laps with outward-clinched staples at **6 inches (150 mm)** o.c.
    d. For insulation with jackets with vapor retarders on below-ambient services, do not staple longitudinal tabs. Instead, secure tabs with additional adhesive, as recommended by insulation material manufacturer, and seal with vapor-barrier mastic and flashing sealant.

2. Pipe Flanges:

    a. Install prefabricated pipe insulation to outer diameter of pipe flange.
    b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
    c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of block insulation of same material and thickness as that of pipe insulation. Where voids are difficult to fill with block insulation, fill the voids with a fibrous insulation material suitable for the specific operating temperature.

3. Pipe Fittings and Elbows:

    a. Install preformed insulation sections of same material as that of straight segments of pipe insulation. Secure according to manufacturer's written instructions.

4. Valves and Pipe Specialties:

    a. Install preformed insulation sections of same material as that of straight segments of pipe insulation. Secure according to manufacturer's written instructions.
    b. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
    c. Install insulation to flanges as specified for flange insulation application.

3.9 INSTALLATION OF POLYOLEFIN PIPE INSULATION

A. Insulation on:

1. Straight Pipes and Tubes:

    a. Seal split-tube longitudinal seams and end joints with manufacturer's recommended adhesive [**, or via self-seal mechanism**] to eliminate openings in insulation that allow passage of air to surface being insulated.

2. Pipe Flanges:

    a. Install pipe insulation to outer diameter of pipe flange.
    b. Make width of insulation section same as overall width of flange and bolts, plus twice the thickness of pipe insulation.
    c. Fill voids between inner circumference of flange insulation and outer circumference of adjacent straight pipe segments with cut sections of polyolefin sheet insulation of same thickness as that of pipe insulation.
    d. Secure insulation to flanges and seal seams with manufacturer's recommended adhesive

to eliminate openings in insulation that allow passage of air to surface being insulated.

3. Pipe Fittings and Elbows:

   a. Install mitered sections of polyolefin pipe insulation.
   b. Secure insulation materials and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

4. Valves and Pipe Specialties:

   a. Install cut sections of polyolefin pipe and sheet insulation to valve body.
   b. Arrange insulation to permit access to packing and to allow valve operation without disturbing insulation.
   c. Install insulation to flanges as specified for flange insulation application.
   d. Secure insulation to valves and specialties, and seal seams with manufacturer's recommended adhesive to eliminate openings in insulation that allow passage of air to surface being insulated.

3.10 INSTALLATION OF WOVEN GLASS-FIBER CLOTH

A. Where woven glass-fiber jackets are indicated, install directly over bare insulation or insulation with factory-applied jackets.

1. Draw jacket smooth and tight to surface with **2-inch (50-mm)** overlap at seams and joints.
2. Embed glass cloth between two **0.062-inch- (1.6-mm-)** thick coats of lagging adhesive.
3. Completely encapsulate insulation with coating, leaving no exposed insulation.

3.11 INSTALLATION OF FIELD-APPLIED INSULATION JACKETS

A. Insulation Jacket, Field-Applied - FSK:

1. Draw jacket material smooth and tight.
2. Install lap or joint strips with same material as jacket.
3. Secure jacket to insulation with manufacturer's recommended adhesive.
4. Install jacket with **1-1/2-inch (38-mm)** laps at longitudinal seams and **3-inch- (75-mm-)** wide joint strips at end joints.
5. Seal openings, punctures, and breaks in vapor-retarder jackets and exposed insulation with vapor-barrier mastic.

B. Insulation Jacket, Field-Applied - PVC:

1. Install with **1-inch (25-mm)** overlap at longitudinal seams and end joints. Seal with manufacturer's recommended adhesive.
2. Apply two continuous beads of adhesive to seams and joints, one bead under lap and the finish bead along seam and joint edge.

C. Insulation Jacket, Field-Applied - Metal:

1. Install with **2-inch (50-mm)** overlap at longitudinal seams and end joints.
2. Overlap longitudinal seams arranged to shed water.
3. Seal end joints with weatherproof sealant recommended by insulation manufacturer.
4. Secure jacket with stainless steel bands **12 inches (300 mm)** o.c. and at end joints.

3.12 FINISHES

A. Insulation with ASJ, Glass-Cloth, or Other Paintable Jacket Material: Paint jacket with paint system identified below and as specified in Section 099113 "Exterior Painting" and Section 099123 "Interior Painting."

1. Flat Acrylic Finish: [**Two**]<**Insert number**> finish coats over a primer that is compatible with jacket material and finish coat paint. Add fungicidal agent to render fabric mildew proof.

a. Finish Coat Material: Interior, flat, latex-emulsion size.

B. Color: Final color as selected by Architect. Vary first and second coats to allow visual inspection of the completed Work.

C. Do not field paint aluminum or stainless steel jackets.

3.13 FIELD QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections [**with the assistance of a factory-authorized service representative**] .

D. Tests and Inspections: Inspect pipe, fittings, strainers, and valves, randomly selected by Architect, by removing field-applied jacket and insulation in layers in reverse order of their installation. Extent of inspection is limited to [**three**]<**Insert number**> locations of straight pipe, [**three**]<**Insert number**> locations of threaded fittings, [**three**]<**Insert number**> locations of welded fittings, [**two**]<**Insert number**> locations of threaded strainers, [**two**]<**Insert number**> locations of welded strainers, [**three**]<**Insert number**> locations of threaded valves, and [**three**]<**Insert number**> locations of flanged valves for each pipe service defined in the "Piping Insulation Schedule, General" Article.

E. All insulation applications will be considered defective if they do not pass tests and inspections.

F. Prepare test and inspection reports.

3.14 PIPING INSULATION SCHEDULE, GENERAL

A. Acceptable preformed pipe and tubular insulation materials and thicknesses are identified for each piping system and pipe size range. If more than one material is listed for a piping system, selection from materials listed is Contractor's option.

B. Items Not Insulated: Unless otherwise indicated, do not install insulation on the following:

1. Drainage piping located in crawl spaces.
2. Underground piping.
3. Chrome-plated pipes and fittings unless there is a potential for personnel injury.

3.15 INDOOR PIPING INSULATION SCHEDULE

A. Domestic Cold Water Piping:

1. Insulation for pipe size NPS 1 (DN 25) and smaller is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [1/2 inch (13 mm)][3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [1/2 inch (13 mm)][3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.

2. Insulation for pipe size NPS 1-1/4 (DN 32) and larger is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

B. Domestic Hot and Recirculated Hot Water Piping:

1. Insulation for pipe size NPS 1-1/4 (DN32) and smaller is to be one of the following:

a. Pipe Insulation - Cellular Glass Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.

2. Insulation for pipe size NPS 1-1/2 (DN 40) and larger is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

C. Domestic Chilled Water (Potable) Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

D. Stormwater and Overflow Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

E. Roof Drain and Overflow Drain Bodies:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [1 inch (25 mm)]<**Insert dimension**> thick.

F. Exposed Sanitary Drains, Domestic Water, Domestic Hot Water, and Stops for Plumbing Fixtures for People with Disabilities:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Flexible Elastomeric: [1/2 inch (13 mm)][3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Mineral Wool, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Polyolefin: [1/2 inch (13 mm)][3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.

G. Sanitary Waste Piping Where Heat Tracing Is Installed:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass: [2 inches (50 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Mineral Wool, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.

d. Pipe Insulation - Phenolic: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.

H. Floor Drains, Traps, and Sanitary Drain Piping within 10 Feet (3 m) of Drain Receiving Condensate and Equipment Drain Water below 60 Deg F (16 Deg C):

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [1/2 inch (13 mm)][1 inch (25 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [1 inch (25 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [3/4 inch (19 mm)][1 inch (25 mm)]<**Insert dimension**> thick.

I. Hot Service Drains and Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.

J. Hot Service Vent Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.

3.16 OUTDOOR, ABOVEGROUND PIPING INSULATION SCHEDULE

A. Domestic Water Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [2 inches (50 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Glass-Fiber, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [2 inches (50 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [2 inches (50 mm)]<**Insert dimension**> thick.

B. Domestic Hot and Recirculated Hot Water Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Flexible Elastomeric: [2 inches (50 mm)]<**Insert dimension**> thick.

c. Pipe Insulation - Glass-Fiber, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Mineral Wool, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
e. Pipe Insulation - Phenolic: [2 inches (50 mm)]<**Insert dimension**> thick.
f. Pipe Insulation - Polyolefin: [2 inches (50 mm)]<**Insert dimension**> thick.

C. Sanitary Waste Piping Where Heat Tracing Is Installed:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Mineral Wool, Preformed: [2 inches (50 mm)]<**Insert dimension**> thick.
d. Pipe Insulation - Phenolic: [2 inches (50 mm)]<**Insert dimension**> thick.

D. Hot Service Drains and Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.

E. Hot Service Vent Piping:

1. Insulation for all pipe sizes is to be one of the following:

a. Pipe Insulation - Cellular Glass, Preformed: [1-1/2 inches (38 mm)]<**Insert dimension**> thick.
b. Pipe Insulation - Glass-Fiber, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.
c. Pipe Insulation - Mineral Wool, Preformed: [1 inch (25 mm)]<**Insert dimension**> thick.

3.17 OUTDOOR, UNDERGROUND PIPING INSULATION SCHEDULE

A. Sanitary Waste Piping, All Sizes, Where Heat Tracing Is Installed: Pipe insulation - cellular glass, preformed [2 inches (50 mm)]<**Insert dimension**> thick.

B. Chilled Water, All Sizes: Pipe insulation - cellular glass, preformed [2 inches (50 mm)]<**Insert dimension**> thick.

3.18 INDOOR, FIELD-APPLIED INSULATION JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Piping, Concealed from View:

1. None.
2. PVC: [**Standard**][**Color-coded by system**] .

a. Thickness: [20 mils (0.5 mm)][30 mils (0.8 mm)] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)][0.040 inch (1.0 mm)] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)] .

5. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth No. 2B finish**][**corrugated**][**stucco embossed**] .

a. Thickness: [0.010 inch (0.25 mm)][0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)] .

D. Piping, Exposed to View:

1. None.
2. PVC: [**Standard**][**Color-coded by system**] .

a. Thickness: [20 mils (0.5 mm)][30 mils (0.8 mm)] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)][0.040 inch (1.0 mm)] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

a. Thickness: [0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)][0.032 inch (0.81 mm)] .

5. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth No. 2B finish**][**corrugated**][**stucco embossed**] .

a. Thickness: [0.010 inch (0.25 mm)][0.016 inch (0.41 mm)][0.020 inch (0.51 mm)][0.024 inch (0.61 mm)] .

3.19 OUTDOOR, FIELD-APPLIED INSULATION JACKET SCHEDULE

A. Install jacket over insulation material. For insulation with factory-applied jacket, install the field-applied jacket over the factory-applied jacket.

B. If more than one material is listed, selection from materials listed is Contractor's option.

C. Piping, Concealed from View:

1. None.
2. PVC: [**Standard**][**Color-coded by system**] .

a. Thickness: [20 mils (0.5 mm)][30 mils (0.8 mm)] .

3. Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

   a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Painted Aluminum: [**Smooth**][**Corrugated**][**Stucco embossed**] .

   a. Thickness: [**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**][**0.032 inch (0.81 mm)**] .

5. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth No. 2B finish**][**corrugated**][**stucco embossed**] .

   a. Thickness: [**0.010 inch (0.25 mm)**][**0.016 inch (0.41 mm)**][**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

D. Piping, Exposed to View:

1. PVC: [**Standard**][**Color-coded by system**] .

   a. Thickness: [**20 mils (0.5 mm)**][**30 mils (0.8 mm)**][**40 mils (1.0 mm)**] .

2. Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

3. Painted Aluminum: [**Smooth**][**Stucco embossed**] with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.032 inch (0.81 mm)**][**0.040 inch (1.0 mm)**] .

4. Stainless Steel: [**Type 304**][**or**][**Type 316**] , [**smooth**][**stucco embossed**] , with [**1-1/4-inch- (32-mm-) deep corrugations**][**2-1/2-inch- (65-mm-) deep corrugations**][**4-by-1-inch (100-by-25-mm) box ribs**] .

   a. Thickness: [**0.020 inch (0.51 mm)**][**0.024 inch (0.61 mm)**] .

3.20 UNDERGROUND, FIELD-APPLIED INSULATION JACKET

A. For underground direct-buried piping applications, install underground direct-buried jacket over insulation material.

END OF SECTION 22 07 19 00A

SECTION 22 08 00 00 - COMMISSIONING OF PLUMBING

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes Cx process requirements for the following plumbing systems, assemblies, and equipment:

1. Domestic hot- and cold-water piping.
2. Gray-water piping and storage.
3. Sanitary waste and vent piping.
4. Storm drainage piping.
5. Rainwater retention piping and equipment.
6. Plumbing pumps.
7. General-service compressed-air piping and equipment.
8. Plumbing equipment.
9. Compressed-air piping and equipment for laboratory and healthcare facilities.
10. Vacuum piping and equipment for laboratory and healthcare facilities.
11. Medical gases piping, equipment, and alarms.
12. Chemical waste systems for laboratory and healthcare facilities.
13. Processed-water systems for laboratory and healthcare facilities.
14. <**Insert additional systems**>.

B. Related Requirements:

1. Section 019113 "General Commissioning Requirements" for general Cx process requirements and CxA responsibilities.
2. For construction checklists, comply with requirements in various Division 22 Sections specifying plumbing systems, system components, equipment, and products.

1.2 DEFINITIONS

A. Cx: Commissioning, as defined in Section 019113 "General Commissioning Requirements."

B. CxA: Commissioning Authority, as defined in Section 019113 "General Commissioning Requirements."

C. IAPMO: International Association of Plumbing and Mechanical Officials.

D. IgCC: International Green Construction Code.

E. "Systems," "Assemblies," "Subsystems," "Equipment," and "Components": Where these terms are used together or separately, they shall mean "as-built" systems, assemblies, subsystems, equipment, and components.

1.3 INFORMATIONAL SUBMITTALS

A. Qualification Data: For plumbing testing technician.

B. Construction Checklists:

1. Draft Cx plan, including draft construction checklists to be prepared by CxA under Section 019113 "General Commissioning Requirements." Contractor is to review Construction Checklist in accordance with requirements in Section 019113 "General Commissioning Requirements" and ASHRAE 202 and to resolve any issues with the CxA.
2. Cx plan, including material, installation, and performance construction checklists for systems, assemblies, subsystems, equipment, and components relating to plumbing to be part of the Cx process and in accordance with requirements in Section 019113 "General Commissioning Requirements"[**, IAPMO "Green Plumbing and Mechanical Code Supplement,"**] and ASHRAE 202.

C. Test Equipment and Instruments: For all test equipment and instruments to be used in conducting Cx tests by Contractor, provide the following:

1. Equipment/instrument identification number.
2. Planned Cx application or use.
3. Manufacturer, make, model, and serial number.
4. Calibration history, including certificates from agencies that calibrate the equipment and instrumentation.
5. Equipment manufacturers' proprietary instrumentation and tools. For each instrument or tool, identify the following:

    a. Instrument or tool identification number.
    b. Equipment schedule designation of equipment for which the instrument or tool is required.
    c. Manufacturer, make, model, and serial number.
    d. Calibration history, including certificates from agencies that calibrate the instrument or tool, where appropriate.

1.4 QUALITY ASSURANCE

A. Plumbing Testing Technician Qualifications: Technicians to perform plumbing Construction Checklist verification tests. Construction Checklist verification test demonstrations, Cx tests, and Cx test demonstrations shall have the following minimum qualifications:

1. Journey level or equivalent skill level with knowledge of plumbing system, electrical concepts, and building operations.
2. Minimum [**three years'**]<**Insert time**> experience installing, servicing, and operating systems manufactured by approved manufacturer.

B. Medical Gas Piping Systems Testing Technician Qualifications: Technicians to perform medical compressed-air, vacuum, and medical gas piping for laboratory and healthcare facilities system Construction Checklist verification tests. Construction Checklist verification test demonstrations, Cx tests, and Cx test demonstrations shall have the following minimum qualifications:

1. Journey level or equivalent skill level. Vocational school four-year-program graduate or an Associate's degree in mechanical systems, plumbing systems, or similar field. Degree requirement may be offset by three years' experience in servicing plumbing systems and gas piping for laboratory and healthcare facilities. Generally, required knowledge includes design and maintenance of gas piping for laboratory and healthcare facility systems, electrical concepts, building operations, and application and use of tools and instrumentation to measure performance of plumbing system equipment, assemblies, and systems.
2. Minimum [**three years'**]<**Insert time**> experience installing, servicing, and operating systems manufactured by approved manufacturer.

C. Testing Equipment and Instrumentation Quality and Calibration:

1. Capable of testing and measuring performance within the specified acceptance criteria.
2. Be calibrated at manufacturer's recommended intervals with current calibration tags permanently affixed to the instrument being used.
3. Be maintained in good repair and operating condition throughout duration of use on Project.
4. Be recalibrated/repaired if dropped or damaged in any way since last calibrated.

D. Proprietary Test Instrumentation and Tools:

1. Equipment Manufacturer's Proprietary Instrumentation and Tools: For installed equipment included in the Cx process, test instrumentation and tools manufactured or prescribed by equipment manufacturer to service, calibrate, adjust, repair, or otherwise work on its equipment or required as a condition of equipment warranty, shall comply with the following:

    a. Be calibrated by manufacturer with current calibration tags permanently affixed.
    b. Include a separate list of proprietary test instrumentation and tools in operation and maintenance manuals.
    c. Plumbing system proprietary test instrumentation and tools become property of Owner at the time of Substantial Completion.

PART 2 - PRODUCTS (Not Used)
PART 3 - EXECUTION

3.1 Cx PROCESS

A. Perform Cx process for plumbing systems in accordance with:

1. [**IgCC, which requires compliance with ASHRAE 202.**]
2. [**ASHRAE 202.**]
3. [**Commissioning standards acceptable to the authority having jurisdiction.**]
4. <**Insert standard**>.

3.2 CONSTRUCTION CHECKLISTS

A. Preliminary detailed construction checklists are to be prepared under Section 019113 "General Commissioning Requirements" for each plumbing system, assembly, subsystem, equipment, and component required to be commissioned, as detailed in [**ASHRAE 202.**][**IgCC.**][**IAPMO's "Green Plumbing and Mechanical Code Supplement."**]<**Insert Cx standard.**> Contractor performs the following:

1. Review plumbing preliminary construction checklists and provide written comments on Construction Checklist items where appropriate.
2. Return preliminary Construction Checklist with review comments within [**10**]<**Insert number**> days of receipt.
3. When review comments have been resolved, the CxA will provide final construction checklists marked "Approved for Use, (date)."
4. Use only construction checklists marked "Approved for Use, (date)." Mark construction checklists in the appropriate place, as indicated Project events are completed, and provide pertinent details and other information.

B. Prepare preliminary detailed construction checklists for each plumbing system, assembly, subsystem, equipment, and component required to be commissioned, as detailed in [**ASHRAE 202.**][**IgCC.**][**IAPMO's "Green Plumbing and Mechanical Code Supplement."**]<**Insert Cx standard.**>

1. Submit preliminary construction checklists to CxA and Designer for review.
2. When review comments have been resolved, the CxA will provide final construction checklists marked "Approved for Use, (date)."
3. Use only construction checklists marked "Approved for Use, (date)." Mark construction checklists in the appropriate place as indicated Project events are completed, and provide pertinent details and other information.

C. Systems Required to Be Commissioned under IgCC:

1. Domestic hot-water systems and controls.
2. Water-pumping and -mixing systems over **5 hp (4 kW)** and purification systems.
3. Irrigation system performance that uses more than **1000 gal. (4000 L)** per day.
4. Renewable energy systems and energy storage systems.

D. Additional Systems Required to Be Commissioned:

1. Facility water-distribution piping, including the following:

    a. Domestic[**and fire-suppression**] water piping, fittings, and specialties outside the building.
    b. Pumps, motors, accessories, and controls.
    c. Outdoor water-storage tanks.
    d. Sleeves and sleeve seals.
    e. Meters and gauges.
    f. General-duty and specialty valves.
    g. Hangers and supports.
    h. Heat tracing.
    i. Vibration isolation[**and seismic restraints**].

2. Domestic water piping, including the following:

    a. Domestic cold- and hot-water piping, fittings, and specialties inside the building.
    b. Pumps, motors, accessories, and controls.
    c. Sleeves and sleeve seals.
    d. Indoor water-storage tanks.
    e. Meters and gauges.
    f. General-duty and specialty valves.
    g. Hangers and supports.
    h. Heat tracing.
    i. Vibration isolation[**and seismic restraints**].

3. Sanitary waste and vent piping, including the following:

    a. Gravity and forced-main sewerage piping, fittings, and specialties.
    b. Sanitary waste interceptors.
    c. Pumps, motors, accessories, and controls.
    d. Drains.
    e. Sleeves and sleeve seals.
    f. Meters and gauges.
    g. General-duty and specialty valves.
    h. Hangers and supports.
    i. Heat tracing.
    j. Vibration isolation[**and seismic restraints**].

4. Gray-water piping, including the following:

a. Piping, fittings, and specialties.
b. Pumps, motors, accessories, and controls.
c. Storage tanks.
d. Sleeves and sleeve seals.
e. Meters and gauges.
f. General-duty and specialty valves.
g. Hangers and supports.
h. Heat tracing.
i. Vibration isolation[**and seismic restraints**].

5. Storm-water piping, including the following:

a. Drainage piping, fittings, and specialties.
b. Pumps, motors, accessories, and controls.
c. Drains and collection basins.
d. Rainwater-collection and storage equipment.
e. Sleeves and sleeve seals.
f. Meters and gauges.
g. General-duty and specialty valves.
h. Hangers and supports.
i. Heat tracing.
j. Vibration isolation[**and seismic restraints**].

6. Plumbing fixtures, including the following:

a. Water closets, supports and connections, supplies, and flush valves.
b. Urinals, supports and connections, supplies, and flush valves.
c. Lavatories, supports, supplies, drain connections, and faucets.
d. Sinks, supports, supplies, drain connections, and faucets.
e. Tubs, drain connections, and faucets.
f. Showers, supplies, drain connections, and faucets.
g. Wash fountains, supplies, drain connections, and faucets.
h. Emergency plumbing fixtures, supplies, drain connections, and controls.
i. Drinking fountains, supplies, and drainage connections.

7. General-service compressed-air piping, including the following:

a. Piping, fittings, and specialties inside the building.
b. Compressors, motors, accessories, and controls.
c. Compressed-air outlets and connections.
d. Sleeves and sleeve seals.
e. Meters and gauges.
f. General-duty and specialty valves.
g. Hangers and supports.
h. Vibration isolation[**and seismic restraints**].

8. Compressed-air piping for laboratory and healthcare facilities, including the following:

a. Piping, fittings, and specialties inside the building.
b. Compressors, motors, accessories, and controls.
c. Medical gas alarms.
d. Compressed-air outlets and connections.
e. Sleeves and sleeve seals.
f. Meters and gauges.
g. General-duty and specialty valves.
h. Hangers and supports.

i. Vibration isolation[**and seismic restraints**].

9. Vacuum piping for laboratory and healthcare facilities, including the following:

a. Piping, fittings, and specialties inside the building.
b. Vacuum pumps, motors, accessories, and controls.
c. Medical gas alarms.
d. Vacuum terminal units and connections.
e. Sleeves and sleeve seals.
f. Meters and gauges.
g. General-duty and specialty valves.
h. Hangers and supports.
i. Vibration isolation[**and seismic restraints**].

10. Gas piping for laboratory and healthcare facilities, including the following:

a. [**Carbon-dioxide**][**helium**][**nitrogen**][**nitrous-oxide**][**and**][**oxygen**] piping, fittings, and specialties inside the building.
b. Storage tanks, manifolds, mounting devices, and accessories.
c. Medical gas alarms.
d. Medical gas terminal units and connections.
e. Sleeves and sleeve seals.
f. Meters and gauges.
g. General-duty and specialty valves.
h. Hangers and supports.
i. Vibration isolation[**and seismic restraints**].

11. Processed-water piping for laboratory and healthcare facilities, including the following:

a. Water piping, fittings, and specialties inside the building.
b. Water-purification equipment, accessories, and controls.
c. Pumps, motors, accessories, and controls.
d. Sleeves and sleeve seals.
e. Meters and gauges.
f. General-duty and specialty valves.
g. Hangers and supports.
h. Heat tracing.
i. Vibration isolation[**and seismic restraints**].

12. <**Insert additional systems**>.

3.3 Cx TESTING PREPARATION

A. Certify that plumbing systems, subsystems, and equipment have been installed, calibrated, and started and that they are operating in accordance with the Contract Documents and approved submittals.

B. Certify that plumbing system instrumentation and control systems have been completed and calibrated, point-to-point checkout has been successfully completed, and systems are operating in accordance with their design sequence of operation, Contract Documents, and approved submittals. Certify that all sensors are operating within specified accuracy and that all systems are set to and maintaining set points as required by the design documents.

C. Set systems, subsystems, and equipment into operating mode to be tested in accordance with approved test procedures (for example, normal shutdown, normal auto position, normal manual

position, unoccupied cycle, emergency power, and alarm conditions).

3.4 Cx TEST CONDITIONS

A. Perform tests using design conditions, whenever possible.

1. Simulated conditions may, with approval of Architect, be imposed using an artificial load when it is impractical to test under design conditions. Before simulating conditions, calibrate testing instruments. Provide equipment to simulate loads. Set simulated conditions as directed by CxA, and document simulated conditions and methods of simulation. After tests, return configurations and settings to normal operating conditions.
2. Cx test procedures may direct that set points be altered when simulating conditions is impractical.
3. Cx test procedures may direct that sensor values be altered with a signal generator when design or simulating conditions and altering set points are impractical.

B. If tests cannot be completed because of a deficiency outside the scope of the plumbing system, document the deficiency and report it to Architect. After deficiencies are resolved, reschedule tests.

C. If seasonal testing is specified, complete appropriate initial performance tests and documentation and schedule seasonal tests.

3.5 Cx TESTS COMMON TO PLUMBING SYSTEMS

A. Measure capacities and effectiveness of systems, assemblies, subsystems, equipment, and components, including operational and control functions, to verify compliance with acceptance criteria.

B. Test systems, assemblies, subsystems, equipment, and components for operating modes, interlocks, control responses, responses to abnormal or emergency conditions, and response compared to acceptance criteria.

C. Coordinate schedule with, and perform Cx activities at the direction of, CxA.

D. Comply with Construction Checklist requirements, including material verification, installation checks, startup, and performance test requirements specified in Division 22 Sections specifying plumbing systems and equipment.

E. Provide technicians, instrumentation, tools, and equipment to perform and document the following:

1. Cx Construction Checklist verification tests.
2. Cx Construction Checklist verification test demonstrations.

3.6 CONSTRUCTION CHECKLIST EXAMPLES

A. Vibration Isolation in Plumbing Systems:

1. Prerequisites: Acceptance of results of construction checklists for vibration[**and seismic**] control devices specified in [**Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."**][**Section 220548.13 "Vibration Controls for Plumbing Piping and Equipment."**]
2. Components to Be Tested:

a. Vibration isolation control devices in plumbing systems.

b. [**Seismic control devices for proper device selection and mounting.**]
c. Support systems.

3. Test Purpose: Evaluate effectiveness of vibration isolation[**and proper installation of seismic**] control devices.
4. Test Conditions: Measure vibration of the facility structure at [**three**]<**Insert number**> locations designated by Owner's witness at the following operating conditions:

a. Maximum speed.
b. Minimum speed.
c. Critical speed.

5. Acceptance Criteria: Structure-borne vibration not to exceed specified performance.

B. Supervision of Alarms in Plumbing Systems:

1. Prerequisites: Acceptance of results of construction checklists for plumbing systems specified in the following Sections:

a. Section 220963 "Medical Gas Alarms."
b. Section 221216 "Facility Elevated, Potable-Water Storage Tanks."
c. Section 221329 "Sanitary Sewerage Pumps."
d. Section 221429 "Sump Pumps."
e. Section 223400 "Fuel-Fired, Domestic-Water Heaters."
f. Section 226113 "Compressed-Air Piping for Laboratory and Healthcare Facilities."
g. Section 226313 "Gas Piping for Laboratory and Healthcare Facilities."
h. Section 331415 "Site Water Distribution Piping."

2. Test Scope:

a. [**Supervised**][**Monitored**] plumbing system alarms.

3. Test Purpose:

a. Verify reporting of [**supervised**][**monitored**] plumbing alarm at [**building management system**][**security monitoring service**][**alarm monitoring service**][**other alarm monitoring system**]<**Insert system**>.

4. Test Conditions:

a. Alarm monitoring systems operating in normal, automatic mode.
b. Activate [**supervised**][**monitored**] plumbing alarms, one at a time.

5. Acceptance Criteria:

a. Activation of [**supervised**][**monitored**] plumbing alarm generates alarm at [**building management system**][**security monitoring service**][**alarm monitoring service**][**other alarm monitoring system**]<**Insert system**> control panel.

C. Plumbing Meter Reporting:

1. Prerequisites: Acceptance of results of construction checklists for plumbing systems specified in the following Sections :

a. Section 221119 "Domestic Water Piping Specialties."
b. Section 223100 "Domestic Water Softeners."
c. Section 331415 "Site Water Distribution Piping."

2. Test Scope:

a. [**Supervised**][**Monitored**] plumbing system water meters.

3. Test Purpose:

a. Verify accuracy of reporting of [**supervised**][**monitored**] plumbing system water meters at [**building management system**][**utility management service**][**other utility consumption management system**]<**Insert system**>.

4. Test Conditions:

a. Plumbing system water meter recording systems operating in normal, automatic mode.
b. Compare cumulative consumption data at plumbing system water meter recording systems with independent, calibrated, flow-measuring instrumentation under the following conditions:

1) Low Flow: [**1**]<**Insert number**> percent of maximum design flow rate for a period of [**four hours**]<**Insert time**>.
2) High Flow: [**80**]<**Insert number**> percent of maximum design flow rate for a period of [**20 minutes**]<**Insert time**>.

c. Activate [**supervised**][**monitored**] plumbing alarms, one at a time.

5. Acceptance Criteria:

a. Cumulative flow reported for low-flow condition is within [**5**]<**Insert number**> percent flow recorded by calibrated flow-measuring instrumentation.
b. Cumulative flow reported for high-flow condition is within [**1**]<**Insert number**> percent flow recorded by calibrated flow-measuring instrumentation.

D. Heat Tracing in Plumbing Systems:

1. Prerequisites: Acceptance of results of construction checklists for heat tracing specified in heat-tracing systems. Comply with requirements listed in Section 220533 "Heat Tracing for Plumbing Piping."
2. Equipment and Systems To Be Tested:

a. Self-regulating, parallel-resistance heating cables.
b. Heater trace circuit controller.

3. Test Purpose:

a. Evaluate response to ambient temperature below freeze-protection set point.
b. Evaluate heating cable fault alarm.

4. Test Conditions:

a. Subject temperature sensor to temperature approximately [**3 deg F (2 deg C)**]<**Insert value**> above freeze-protection set point (initial set point [**41 deg F (5 deg C)**]<**Insert value**>). Monitor sensed temperature with a calibration-grade thermometer. Gradually

change set point or sensed temperature until freeze-protection circuit is energized.

b. Subject temperature sensor to temperature approximately [**3 deg F (2 deg C)**]<**Insert value**> below freeze-protection set point (initial set point [**41 deg F (5 deg C)**]<**Insert value**>). Monitor sensed temperature with a calibration-grade thermometer. Gradually change set point or sensed temperature until freeze-protection circuit is de-energized.

c. Simulate an electrical fault on the heating cable.

5. Acceptance Criteria:

a. Freeze-protection circuit is energized at set-point temperature of minus **2 deg F (1 deg C)**.

b. Freeze-protection circuit is de-energized at set-point temperature of plus **2 deg F (1 deg C)**.

c. Heater trace circuit controller initiates an alarm of cable fault. Alarm is correctly reported at the fire-alarm control panel.

3.7 Cx TESTS FOR COMPRESSED-AIR SYSTEMS

A. Air Compressor Run Time:

1. Prerequisites:

a. Acceptance of results of construction checklists specified in the following:

1) Section 221519 "General-Service Packaged Air Compressors and Receivers."
2) Section 226119 "Compressed-Air Equipment for Laboratory and Healthcare Facilities."

2. Test Scope:

a. Air compressors in plumbing systems.
b. Associated compressed-air piping, valves, and appurtenances.
c. Associated air pressure controllers.

3. Test Purpose: Evaluate air compressor run time and number of compressor starts.
4. Test Conditions:

a. Keep compressed air openings closed during test.
b. For systems with multiple compressors, lock out compressor motors on all but one compressor. Repeat test for each compressor in turn.
c. Record number of air compressor motor starts during a 14-day period.
d. Record air compressor motor run time during the same 14-day period.

5. Acceptance Criteria:

a. Number of compressor motor starts during test period shall not exceed [**20**]<**Insert number**>.

b. Compressor motor run time during test period shall not exceed [**60 minutes**]<**Insert time**>.

3.8 Cx TESTS FOR VACUUM SYSTEMS

A. Vacuum Pump Run Time:

1. Prerequisites:

    a. Acceptance of results of construction checklists for vacuum equipment for laboratory and healthcare facilities.

2. Test Scope:

    a. Vacuum pumps in plumbing systems.
    b. Associated vacuum piping, valves, and appurtenances.
    c. Associated vacuum pressure controllers.

3. Test Purpose:

    a. Evaluate vacuum pump run time and number of vacuum pump starts.

4. Test Conditions:

    a. Keep vacuum piping openings closed during test.
    b. For systems with multiple vacuum pumps, lock out vacuum pump motors on all but one pump. Repeat test for each vacuum pump in turn.
    c. Record number of vacuum pump motor starts during a 14-day period.
    d. Record vacuum pump motor run time during the same 14-day period.

5. Acceptance Criteria:

    a. Number of vacuum pump motor starts during test period shall not exceed [**20**]<**Insert number**>.
    b. Vacuum pump motor run time during test period shall not exceed [**60 minutes**]<**Insert time**>.

3.9 Cx TESTS FOR PROCESSED-WATER SYSTEMS

A. Processed-Water System Tests:

1. Prerequisites: Acceptance of results of construction checklists specified for processed-water systems. Comply with requirements in Section 226713 "Processed Water Piping for Laboratory and Healthcare Facilities" and Section 226719 "Processed Water Equipment for Laboratory and Healthcare Facilities."
2. Test Scope:

    a. Processed-water equipment in plumbing systems.
    b. Associated processed-water piping, valves, and appurtenances.
    c. Processed-water point-of-use fixtures.

3. Test Purpose: Evaluate processed-water quality at points of use.
4. Test Conditions:

    a. Operate water-processing equipment and circulation pumps in normal automatic mode for seven days prior to the test.
    b. Collect processed-water samples from points of use.
    c. Collect and handle water samples in accordance with analytical laboratory recommendations.
    d. Document that the following parameters meet minimum standards required for the specified grade of processed water, as applicable:

1) Resistivity.
2) pH.
3) Total organic carbon (TOC).
4) Sodium.
5) Chloride.
6) Total silica.
7) Microbial.
8) Endotoxin.
9) Bacteria.

5. Acceptance Criteria:

a. Measured processed-water parameters shall meet the following criteria:

1) Resistivity: [**10**]<**Insert value**> megohms.
2) pH: [**6**]<**Insert value**> units.
3) TOC: [**500**]<**Insert value**> ppb.
4) Sodium: [**5**]<**Insert value**> ug/L.
5) Chloride: [**5**]<**Insert value**> ug/L.
6) Total Silica: [**3**]<**Insert value**> ug/L.
7) Microbial: [**10**]<**Insert value**> CFU/mL.
8) Endotoxin: [**0.01**]<**Insert value**> EU/mL.
9) Bacteria: [**10 CFU/100 mL**]<**Insert values**>.

END OF SECTION 22 08 00 00

SECTION 22 11 16 00 - DOMESTIC WATER PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Copper tube, drawn temper - domestic water.
2. Copper tube, annealed temper - domestic water.
3. Copper tube fittings, solder joint - domestic water.
4. Wrought-copper, solder-joint fittings - domestic water.
5. Copper tube fittings, mechanically formed tee - domestic water.
6. Copper tube appurtenances, grooved end, mechanical joint - domestic water.
7. Copper or bronze, pressure-seal-joint fittings - domestic water.
8. Copper tube, push-on-joint fittings - domestic water.
9. Ductile-iron pipe and fittings - domestic water.
10. Ductile-iron pipe appurtenances, grooved end - domestic water.
11. Stainless steel pipe and fittings - domestic water.
12. Stainless steel pipe appurtenances, grooved end, mechanical joint - domestic water.
13. Stainless steel pipe, pressure-seal-joint fittings - domestic water.
14. CPVC pipe and fittings - domestic water.
15. PVC pipe and fittings - domestic water.
16. PEX tube and fittings - domestic water.
17. PEX-AL-PEX tube and fittings - domestic water.
18. PEX-AL-HDPE tube and fittings - domestic water.
19. Polypropylene (PP-R and PP-RCT) pipe and fittings - domestic water.
20. Pipe joining materials - domestic water.
21. Encasement for piping.
22. Transition fittings - domestic water.
23. Dielectric fittings - domestic water.

B. Related Requirements:

1. Section 331415 "Site Water Distribution Piping" for water-service piping [**and water meters**] outside the building from source to the point where water-service piping enters the building.

1.2 DEFINITIONS

A. DHWR: Domestic hot water return.

B. PP-RCT: Polypropylene random copolymer with modified crystallinity and temperature resistance.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

B. Sustainable Design Submittals:

1. Product Data: For adhesives, indicating VOC content.

2. Environmental Product Declaration (EPD): For each product.

3. Health Product Declaration (HPD): For each product.

4. Environmental Product Declaration (EPD): For each product.

5. Health Product Declaration (HPD): For each product.

6. Environmental Product Declaration (EPD): For each product.

7. Environmental Product Declaration (EPD): For each product.

8. Environmental Product Declaration (EPD): For each product.
9. Third-Party Certifications: For each product.
10. Third-Party-Certified Life-Cycle Assessment: For each product.

11. Product Data for Embodied Carbon Emissions: Indicating embodied carbon emissions, defined as GWP/unit times material amount used in Project.

12. Product Data for Cradle-to-Cradle Certification:

    a. Confirming Cradle-to-Cradle certification under Version 3.1, 4, or 4.1 at Bronze level. Submittal must contain inventory assessment completed to at least 0.1 percent (1000 ppm) and certification expiration.

    b. Confirming Cradle-to-Cradle certification under Version 3.1, 4, or 4.1 at Silver level or Material Health Silver Certificate. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and certification expiration.

    c. Confirming Cradle-to-Cradle certification under Version 3.1, 4, or 4.1 at Gold level or Material Health Gold Certificate. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and certification expiration.

13. Product Data for Health Product Declaration Compliance:

    a. Prechecked for LEED HPD with full ingredient inventory to at least 0.1 percent (1000 ppm) and proof of publication in HPD Repository Standard.

    b. HPD prechecked for LEED v4.1, Option 2, confirming that either no GreenScreen LT-1 hazards or no GHS Category 1 hazards are present in installed product. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and HPD expiration.

14. Product Data for Declare Certification:

    a. Confirming Declare certification under Version 2. Submittal must contain inventory assessment completed to at least 0.1 percent (1000 ppm) and certification expiration date.

    b. Confirming Declare certification Third-Party Verified and Red List Free or Red List Approved. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and certification expiration date.

15. Product Data for Global Green Tag: Product Health Data (PhD) containing inventory assessment

completed to at least 0.1 percent (1000 ppm) and certification expiration date.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Piping layout, or BIM model, drawn to scale, showing the items described in this Section, and coordinated with all building trades.

B. System purging and disinfecting activities report.

C. Field Quality -Control Reports: For specified tests and inspections.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: Installers of pressure-sealed joints are to be certified by pressure-seal joint manufacturer as having been trained and qualified to join piping with pressure-seal pipe couplings and fittings.

1.6 FIELD CONDITIONS

A. Interruption of Existing Water Service: Do not interrupt water service to facilities occupied by the Owner or others unless permitted under the following conditions and then only after arranging to provide temporary water service in accordance with requirements indicated:

1. Notify [**Architect**][**Construction Manager**][**the Owner**] no fewer than [**two**] days in advance of proposed interruption of water service.
2. Do not interrupt water service without [**Architect's**][**Construction Manager's**][**the Owner's**] written permission.

1.7 WARRANTY

A. Polypropylene (PP-R and PP-RCT) Pipe and Fittings Manufacturer's Warranty: Manufacturer agrees to repair or replace PP-R and PP-RCT pipe and fittings that fail in materials or workmanship within 10 years from date of Substantial Completion.

1. Warranty is to cover labor and material costs of repairing and/or replacing defective materials and repairing any incidental damage caused by failure of piping system due to defects in materials or manufacturing.
2. Warranty is to be in effect only upon submission by Contractor to manufacturer of valid pressure/leak documentation indicating that the system was tested and passed manufacturer's pressure/leak test.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Domestic water piping, tubing, fittings, joints, and appurtenances intended to convey or dispense water for human consumption are to comply with the U.S. Safe Drinking Water Act, with requirements of authorities having jurisdiction, and with NSF/ANSI/CAN 61 and NSF/ANSI/CAN 372, or be certified in compliance with NSF/ANSI/CAN 61 and NSF/ANSI/CAN 372 by an ANSI-accredited third-party

certification body, in that the weighted average lead content at wetted surfaces is less than or equal to 0.25 percent.

2.2 PIPING MATERIALS

A. Potable-water piping and components are to comply with NSF/ANSI 14, NSF/ANSI/CAN 61, and NSF/ANSI/CAN 372. [**Include marking "NSF-pw" on piping.**]

2.3 COPPER TUBE AND FITTINGS - DOMESTIC WATER

A. Copper Tube, Drawn Temper - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Cambridge-Lee Industries, LLC**]
   b. [**Cerro Flow Products, LLC**]
   c. [**Mueller Streamline Co.; a company of Mueller Industries**]

2. Standard: [**ASTM B88, Type K (ASTM B88M, Type A)**][**ASTM B88, Type L (ASTM B88M, Type B)**][**and**][**ASTM B88, Type M (ASTM B88M, Type C)**] .

B. Copper Tube, Annealed Temper - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Cambridge-Lee Industries, LLC**]
   b. [**Cerro Flow Products, LLC**]
   c. [**Mueller Streamline Co.; a company of Mueller Industries**]

2. Standard: [**ASTM B88, Type K (ASTM B88M, Type A)**][**ASTM B88, Type L (ASTM B88M, Type B)**][**and**][**ASTM B88, Type M (ASTM B88M, Type C)**] .

C. Copper Tube Fittings, Solder Joint - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
   b. [**Mueller Streamline Co.; a company of Mueller Industries**]
   c. [**NIBCO INC.**]

D. Cast-Copper, Solder-Joint Fittings - Domestic Water: ASME B16.18, pressure fittings. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

E. Wrought-Copper, Solder-Joint Fittings - Domestic Water: ASME B16.22, pressure fittings. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
b. [**Mueller Streamline Co.; a company of Mueller Industries**]
c. [**NIBCO INC.**]

F. Bronze Flanges: ASME B16.24, Class 150, with solder-joint ends. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

G. Cast Copper Unions: MSS SP-123, cast-copper-alloy, hexagonal-stock body, with ball-and-socket, metal-to-metal seating surfaces and solder-joint or threaded ends. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

H. Wrought Copper Unions: ASME B16.22. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

I. Copper Tube Fittings, Mechanically Formed Tee - Domestic Water: For forming T-branch on copper water tube.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**T-DRILL Industries Inc**]

2. Description: Tee formed in copper tube in accordance with ASTM F2014.

J. Copper Tube Appurtenances, Grooved End, Mechanical Joint - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
c. [**ASC Engineered Solutions**]
d. [**Shurjoint; a brand of Aalbert Integrated Piping Systems (Aalberts Industries)**]
e. [**Victaulic Company**]

2. Source Limitations: Obtain appurtenances for grooved-end, mechanical-joint copper tube from single manufacturer.
3. Grooved-End Copper Fittings: ASTM B75/B75M copper tube or ASTM B584 bronze castings.
4. Grooved-End-Tube Couplings: To fit copper tube dimensions; rigid pattern unless otherwise indicated; gasketed fitting, EPDM-rubber gasket, UL classified per NSF/ANSI/CAN 61 and NSF/ANSI/CAN 372, and rated for minimum [**180 deg F (80 deg C)**] , for use with ferrous housing

and steel bolts and nuts; **300 psig (2060 kPa)** minimum CWP pressure rating.

K. Copper or Bronze, Pressure-Seal-Joint Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
   b. [**Conex Bänninger; a part of IBP Group LLC**]
   c. [**Copper Press Brand; Merit Brass Company**]
   d. [**Elkhart Brass Mfg. Co., Inc**]
   e. [**FNW; Ferguson Enterprises, Inc.**]
   f. [**Mueller Streamline Co.; a company of Mueller Industries**]
   g. [**NIBCO INC.**]
   h. [**Viega LLC**]

2. Source Limitations: Obtain copper or bronze pressure-seal-joint fittings from single manufacturer.
3. Housing: Copper.
4. O-Rings and Pipe Stops: EPDM.
5. Tools: Manufacturer's special tools.
6. Working-Pressure Rating: Minimum **200 psig (1370 kPa)** at **250 deg F (121 deg C)**.

L. Copper Tube, Push-on-Joint Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
   b. [**NIBCO INC.**]
   c. [**SharkBite, A Division of Reliance Worldwide Corporation**]

2. Source Limitations: Obtain copper tube, push-on-joint fittings from single manufacturer.
3. Description:

   a. Cast-copper fitting complying with ASME B16.18 or wrought-copper fitting complying with ASME B16.22.
   b. Stainless steel teeth and EPDM-rubber, O-ring seal in each end instead of solder-joint ends.

2.4 DUCTILE-IRON PIPE AND FITTINGS - DOMESTIC WATER

A. Ductile-Iron Pipe, Mechanical Joint:

1. AWWA C151/A21.51, with mechanical-joint bell and plain spigot end unless grooved or flanged ends are indicated.
2. Glands, Gaskets, and Bolts: AWWA C111/A21.11, ductile- or gray-iron glands, rubber gaskets, and steel bolts.

B. Ductile-Iron Fittings, Standard Pattern, Mechanical Joint:

1. AWWA C110/A21.10, ductile or gray iron.
2. Glands, Gaskets, and Bolts: AWWA C111/A21.11, ductile- or gray-iron glands, rubber gaskets, and steel bolts.

C. Ductile-Iron Fittings, Compact Pattern, Mechanical Joint:

1. AWWA C153/A21.53, ductile iron.
2. Glands, Gaskets, and Bolts: AWWA C111/A21.11, ductile- or gray-iron glands, rubber gaskets, and steel bolts.

D. Ductile-Iron Pipe, Push-on Joint:

1. AWWA C151/A21.51.
2. Push-on-joint bell and plain spigot end unless grooved or flanged ends are indicated.

E. Ductile-Iron Fittings, Standard Pattern, Push-on Joint:

1. AWWA C110/A21.10, ductile or gray iron.
2. Gaskets: AWWA C111/A21.11, rubber.

F. Ductile-Iron Fittings, Compact Pattern, Push-on Joint:

1. AWWA C153/A21.53, ductile iron.
2. Gaskets: AWWA C111/A21.11, rubber.

G. Ductile-Iron Pipe, Plain End: AWWA C151/A21.51.

H. Ductile-Iron Pipe Appurtenances, Grooved End - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
    b. [**ASC Engineered Solutions**]
    c. [**SCI; an ASC Engineered Solution**]
    d. [**Shurjoint; a brand of Aalbert Integrated Piping Systems (Aalberts Industries)**]
    e. [**Star Pipe Products**]
    f. [**Victaulic Company**]

2. Source Limitations: Obtain appurtenances for grooved-end, ductile-iron pipe from single manufacturer.
3. Fittings for Grooved-End, Ductile-Iron Pipe: ASTM A47/A47M, malleable-iron castings or ASTM A536, ductile-iron castings with dimensions that match pipe.

4. Mechanical Couplings for Grooved-End, Ductile-Iron-Pipe:

    a. AWWA C606 for ductile-iron-pipe dimensions.
    b. Ferrous housing sections.
    c. EPDM-rubber gaskets suitable for hot and cold water.
    d. Bolts and nuts.
    e. Minimum Pressure Rating:

1) NPS 14 to NPS 18 (DN 350 to DN 450): [**250 psig (1725 kPa)**].
2) NPS 20 to NPS 46 (DN 500 to DN 1150): [**150 psig (1035 kPa)**].

2.5 STAINLESS STEEL PIPE AND FITTINGS - DOMESTIC WATER

A. Potable-Water Piping and Components: Comply with NSF/ANSI 61 and NSF/ANSI/CAN 372.

B. Stainless Steel Pipe: ASTM A312/A312M, seamless, stainless steel of types and schedules as indicated in "Domestic Water Piping Applications" Article.

C. Stainless Steel Pipe Fittings: ASTM A815/A815M.

D. Stainless Steel Pipe Appurtenances, Grooved End, Mechanical Joint - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
c. [**ASC Engineered Solutions**]
d. [**GroovJoint**]
e. [**Shurjoint; a brand of Aalbert Integrated Piping Systems (Aalberts Industries)**]
f. [**Victaulic Company**]

2. Source Limitations: Obtain appurtenances for grooved-end, stainless steel pipe from single manufacturer.
3. Fittings for Grooved-End, Stainless Steel Pipe: Stainless steel casting with dimensions matching stainless steel pipe.

4. Mechanical Couplings for Grooved-End, Stainless Steel Pipe:

a. AWWA C606 for stainless steel pipe dimensions.
b. Stainless steel housing sections.
c. Stainless steel bolts and nuts.
d. EPDM-rubber gaskets suitable for hot and cold water.
e. Minimum Pressure Rating:

1) NPS 8 (DN 200) and Smaller: [**600 psig (4137 kPa)**] .
2) NPS 10 and NPS 12 (DN 250 to DN 300): [**400 psig (2758 kPa)**].
3) NPS 14 to NPS 24 (DN 350 to DN 600): [**250 psig (1725 kPa)**].

E. Stainless Steel Pipe, Pressure-Seal-Joint Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**GroovJoint**]
c. [**Merit Brass Company**]

d. [**Victaulic Company**]
e. [**Viega LLC**]

2. Source Limitations: Obtain stainless steel pipe, pressure-seal-joint fittings from single manufacturer.
3. Material: Type 316 stainless steel, ASTM A312/A312M, [**Schedule 5**][**Schedule 10**] .
4. Fittings: Type 316 stainless steel with EPDM O-ring seal in each end, and approved for potable-water applications.
5. Listing: ICC-ES LC1002 or UL classified in accordance with NSF/ANSI/CAN 61 and NSF/ANSI/CAN 372.
6. Working-Pressure Rating: Minimum **200 psig (1379 kPa)** at **250 deg F (121 deg C)**.

2.6 CPVC PIPE AND FITTINGS - DOMESTIC WATER

A. CPVC Pipe - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Charlotte Pipe and Foundry Company**]
b. [**IPEX USA LLC**]
c. [**Spears Manufacturing Company**]
d. [**Uponor Inc.**]

2. Source Limitations: Obtain CPVC pipe from single manufacturer.

3. CPVC Pipe: ASTM F441/F441M, with wall thickness as indicated in "Domestic Water Piping Applications" Article.

4. CPVC Socket Fittings: [**ASTM F438 for Schedule 40**][**and**][**ASTM F439 for Schedule 80**] .

5. CPVC Threaded Fittings: ASTM F437, Schedule 80.

B. CPVC Piping System: ASTM D2846/D2846M, SDR 11, pipe and socket fittings.

C. CPVC Tubing System: ASTM D2846/D2846M, SDR 11, tube and socket fittings.

2.7 PVC PIPE AND FITTINGS - DOMESTIC WATER

A. PVC Pipe - Domestic Water: ASTM D1785, with wall thickness as indicated in "Domestic Water Piping Applications" Article.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Charlotte Pipe and Foundry Company**]
b. [**Spears Manufacturing Company**]

2. Source Limitations: Obtain PVC pipe from single manufacturer.

B. PVC Fittings - Domestic Water: ASTM D2466, schedule 40 PVC plastic pipe fittings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Charlotte Pipe and Foundry Company**]
b. [**Spears Manufacturing Company**]

2. Source Limitations: Obtain PVC fittings from single manufacturer.

3. PVC Socket Fittings: [**ASTM D2466 for Schedule 40**][**and**][**ASTM D2467 for Schedule 80**] .

4. PVC Schedule 80 Threaded Fittings: ASTM D2464.

2.8 PEX TUBE AND FITTINGS - DOMESTIC WATER

A. PEX Tube - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**HeatLink Group Inc.**]
b. [**IPEX USA LLC**]
c. [**MrPex Systems Inc**]
d. [**NIBCO INC.**]
e. [**REHAU**]
f. [**SharkBite, A Division of Reliance Worldwide Corporation**]
g. [**Sioux Chief Manufacturing Company, Inc.**]
h. [**Uponor Inc.**]
i. [**Viega LLC**]
j. [**Zurn; Zurn Elkay**]

2. Source Limitations: Obtain PEX tube from single manufacturer.
3. Tube Material: PEX plastic in accordance with ASTM F876 [**and ASTM F877**] .

B. PEX Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**NIBCO INC.**]
b. [**Oatey Co.**]
c. [**SharkBite, A Division of Reliance Worldwide Corporation**]
d. [**Uponor Inc.**]
e. [**Zurn; Zurn Elkay**]

2. Source Limitations: Obtain PEX tube fittings from single manufacturer.

3. Fittings: [**ASTM F1807, metal insert and copper crimp rings**][**ASTM F1960, cold expansion fittings and reinforcing rings**] .
4. Push-Fit Fittings: ASSE/ANSI 1061, push-fit fittings.

C. Manifold: Multiple-outlet, plastic or corrosion-resistant-metal assembly complying with ASTM F876; with plastic or corrosion-resistant-metal valve for each outlet.

2.9 PEX-AL-PEX TUBE AND FITTINGS - DOMESTIC WATER

A. PEX-AL-PEX Tube - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Heat Innovations Inc**]

2. Source Limitations: Obtain PEX-AL-PEX tube and fittings from single manufacturer.
3. PEX-AL-PEX Tube: PEX plastic bonded to inside and outside of a welded aluminum tube in accordance with ASTM F1281.

B. PEX-AL-PEX Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Heat Innovations Inc**]

2. PEX-AL-PEX Tube Fittings: ASTM F1974, metal insert fittings with split ring and compression nut (compression joint) or metal insert fittings with copper crimp rings (crimp joint).

2.10 PEX-AL-HDPE TUBE AND FITTINGS - DOMESTIC WATER

A. PEX-AL-HDPE Tube - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Uponor Inc.**]
b. [**Viega LLC**]

2. Source Limitations: Obtain PEX-AL-HDPE tube and fittings from single manufacturer.

B. PEX-AL-HDPE Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Uponor Inc.**]
    b. [**Viega LLC**]

2. PEX-AL-HDPE Tube Fittings: Metal-insert type with copper or stainless steel crimp ring and matching PEX-AL-HDPE tube dimensions.

2.11 POLYPROPYLENE (PP-R AND PP-RCT) PIPE AND FITTINGS - DOMESTIC WATER

A. Polypropylene (PP-R and PP-RCT) Pipe - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**aquatherm**]
    b. [**IPEX USA LLC**]
    c. [**Nupi Americas**]
    d. [**Uponor Inc.**]

2. Source Limitations: Obtain polypropylene (PP-R and PP-RCT) pipe and fittings from single manufacturer.
3. Polypropylene (PP-R and PP-RCT) Pipe: ASTM F2389, [**SDR 7.4**][**SDR 11**] pipe pressure rating to comply with temperature and pressure ratings of code requirements for applicable service.

4. Smoke and Fire Ratings:

    a. Where indicated on Drawings that a plenum-rated piping system is required, pipe is to be wrapped and/or insulated with fiberglass or mineral-wool pipe insulation, and field installed.
    b. System is to have a flame-spread index of less than 25 and smoke-developed index of less than 50.
    c. Pipe, wrap, or insulate as a system to comply with requirements of CAN/ULC-S102.2, ASTM E84, or UL 2846.
    d. For insulation required for thermal and condensation reasons, see Section 220719 "Plumbing Piping Insulation."

5. Integration of PP-R and PP-RCT Piping Systems with Other Systems:

    a. When integrating PP-R and PP-RCT piping systems with other systems or with components not made of PP-R or PP-RCT (for example, valves, pumps, other piping, check valves, or strainers), ensure that operating parameters for PP-R and PP-RCT will not damage other materials in the system or vice versa.
    b. Verify that all parts of the system are compatible with the medium being carried before installation. PP-R and PP-RCT pipe do not require treatment to protect them from corrosion. Metals (ferrous and non-ferrous) in the system may be susceptible to corrosion. Provide water treatment to protect system metals.
    c. Do not mix PP-R and PP-RCT pipe with other piping systems in conditions that will cause the other system or components to fail.

d. For Domestic Hot Water Recirculation (DHWR) Systems:

1) When using copper piping in conjunction with PP-R and PP-RCT in a DHWR system, ensure that operating conditions will not cause degradation or erosion/corrosion of copper.
2) Follow CDA guidelines in CDA's "Copper Tube Handbook" for sizing, temperature, and flow velocity in the copper tubing.
3) Sustained high levels of copper in DHWR piping can damage components within the system, even PP-R and PP-RCT.
4) Ensure that maximum hot-water temperature within any part of the system/loop does not exceed **140 deg F (60 deg C)**. Some regulations and codes further restrict temperature at any fixture to maximum of **120 deg F (50 deg C)**. Do not exceed temperature rating of pipe for the operating pressure.
5) Maximum temperature used must not exceed rating of pipe for the operating pressure.
6) Flow rates in a DHWR system should not exceed **1.5 ft./sec (0.5 m/s)** anywhere in the system, except in some special cases where velocities up to **3 ft./sec (1 m/s)** are needed to achieve proper flow temperature.

7) When adding PP-R or PP-RCT to an existing copper system in a DHWR application, the level of copper in the water must be tested. Do not install PP-R or PP-RCT where dissolved copper levels exceed **0.1 ppm (0.1 mg/L)**.
8) Do not install PP-R or PP-RCT under the following conditions:

a) Excessive temperature above **140 deg F (60 deg C)**.
b) High flow velocity greater than **1.5 ft./s (0.5 m/s)** (or **3 ft./s (0.1 m/s)** in special cases).
c) Improper system chemistry, such as chemicals, additives, disinfectants, or corrosion products that can degrade the piping.
d) Turbulence at fittings, elbows, and abrupt direction changes.
e) Velocities greater than **8 ft./s (2 m/s)** in cold water, and **5 ft./s (2 m/s)** in hot water.
f) Transitions such as changes in direction, including bends, tees, and elbows; and at joints where fittings are improperly aligned or mismatched. These conditions are further aggravated by burrs left from improper cutting, which create micro-turbulence and concentrate stress within the piping system.

B. Polypropylene (PP-R and PP-RCT) Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**aquatherm**]
b. [**IPEX USA LLC**]
c. [**Nupi Americas**]
d. [**Uponor Inc.**]

2. Polypropylene Fittings: ASTM F2389, [**SDR 7.4**][**SDR 11**] socket-fusion, butt-fusion, electrofusion, or fusion-outlet fittings to be used for fusion-welded joints between pipe and fittings.
3. Polypropylene Mechanical Fittings and Transition Fittings: To be used where transitions are made to other piping materials or to valves and appurtenances.
4. Polypropylene Threaded Transition Fittings: Polypropylene pipe is to be unthreaded. Threaded transition fittings in accordance with ASTM F2389 to be used where a threaded connection is

required.

5. PP-R and PP-RCT Socket Fittings: ASTM F2389, [**SDR 7.4**][**SDR 11**] .

2.12 PIPE JOINING MATERIALS - DOMESTIC WATER

A. Pipe-Flange Gasket Materials:

1. AWWA C110/A21.10, rubber, flat face, **1/8 inch (3.2 mm)** thick or ASME B16.21, nonmetallic and asbestos free.
2. Full-face or ring type.

B. Metal Pipe-Flange Bolts and Nuts: ASME B18.2.1, carbon steel.

C. Solder Filler Metals: ASTM B32, lead-free alloys.

D. Flux: ASTM B813, water flushable.

E. Brazing Filler Metals: AWS A5.8M/A5.8, BCuP Series, copper-phosphorus alloys for general-duty brazing.

F. Solvent Cements for Joining CPVC Piping and Tubing: ASTM F493.

1. Product Data: Verify CPVC welding solvent cement has a VOC content of 490 g/L or less.

2. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

3. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the recommended indoor exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

5. Verify adhesive complies with VOC emissions evaluation criteria.

G. Solvent Cements for Joining PVC Piping: ASTM D2564. Include primer in accordance with ASTM F656.

1. Product Data:

a. Verify PVC welding solvent cement has a VOC content of 510 g/L or less.

b. Verify adhesive primer has a VOC content of 550 g/L or less.

2. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

3. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the recommended indoor exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

5. Verify adhesive complies with VOC emissions evaluation criteria.

6. Product Data: Verify adhesive primer complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

7. Product Data: Verify adhesive primer complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

8. Product Data: Verify adhesive primer complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

H. Plastic Pipe-Flange Gaskets, Bolts, and Nuts: Type and material recommended in writing by piping system manufacturer.

2.13 ENCASEMENT FOR PIPING

A. Standard: ASTM A674 or AWWA C105/A21.5.

1. Form: [**Sheet**][**tube**] .
2. Color: [**Black**][**natural**].

2.14 TRANSITION FITTINGS - DOMESTIC WATER

A. General Requirements:

1. Same size as pipes to be joined.
2. Pressure rating at least equal to pipes to be joined.
3. End connections compatible with pipes to be joined.

B. Fitting-Type Transition Couplings: Manufactured piping coupling or specified piping system fitting.

C. Sleeve-Type Transition Couplings - Domestic Water: AWWA C219.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Cascade Waterworks Mfg. Co.**]
b. [**Dresser Pipeline Solutions**]
c. [**Ford Meter Box Company, Inc. (The)**]
d. [**JCM Industries, Inc**]
e. [**Romac Industries, Inc.**]
f. [**Smith-Blair, a Xylem brand.**]
g. [**Viking Johnson**]

2. Source Limitations: Obtain sleeve-type transition couplings from single manufacturer.

D. Plastic-to-Metal Transition Fittings - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**aquatherm**]
b. [**Charlotte Pipe and Foundry Company**]
c. [**Sioux Chief Manufacturing Company, Inc.**]
d. [**Spears Manufacturing Company**]
e. [**Uponor Inc.**]

2. Source Limitations: Obtain plastic-to-metal transition fittings from single manufacturer.
3. Description: [**CPVC**][**PVC**] one-piece fitting with manufacturer's Schedule 80 equivalent dimensions.

a. End Connections: One end with threaded brass insert and one solvent-cement-socket [**or threaded**] end.

E. Plastic-to-Metal Transition Unions - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Colonial Engineering, Inc.**]
b. [**NIBCO INC.**]
c. [**Spears Manufacturing Company**]

2. Source Limitations: Obtain plastic-to-metal transition unions from single manufacturer.
3. Description: [**CPVC**][**PVC**] four-part union.

a. Threaded End: Brass [**or stainless steel**] .
b. End Connections: Solvent-cement-joint [**or threaded**] plastic end.
c. Gasket: Rubber O-ring.
d. Union nut.

2.15 DIELECTRIC FITTINGS - DOMESTIC WATER

A. General Requirements: Assembly of copper alloy and ferrous materials with separating nonconductive insulating material. Include end connections compatible with pipes to be joined.

B. Dielectric Unions - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
c. [**HART Industrial Unions, LLC**]
d. [**Jomar Valve**]
e. [**Matco-Norca**]
f. [**WATTS; A Watts Water Technologies Company**]
g. [**Wilkins**]
h. [**Zurn; Zurn Elkay**]

2. Source Limitations: Obtain dielectric unions from single manufacturer.
3. Standard: ASSE/IAPMO/ANSI/CAN 1079.

4. Pressure Rating: [**125 psig (860 kPa) minimum at 180 deg F (82 deg C)**][**150 psig (1035 kPa) minimum at 180 deg F (82 deg C)**][**250 psig (1725 kPa) minimum at 180 deg F (82 deg C)**] .
5. End Connections: Solder-joint copper alloy and threaded ferrous.

C. Dielectric Flanges - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ASC Engineered Solutions**]
b. [**Capitol Manufacturing Company**]
c. [**GF Piping Systems**]
d. [**Matco-Norca**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Wilkins**]
g. [**Zurn; Zurn Elkay**]

2. Source Limitations: Obtain dielectric flanges from single manufacturer.
3. Standard: ASSE/IAPMO/ANSI/CAN 1079.
4. Description: Factory-fabricated, bolted, companion-flange assembly.

5. Pressure Rating: [**125 psig (860 kPa) minimum at 180 deg F (82 deg C)**][**150 psig (1035 kPa) minimum at 180 deg F (82 deg C)**][**175 psig (1200 kPa) minimum at 180 deg F (82 deg C)**][**300 psig (2070 kPa) minimum at 180 deg F (82 deg C)**].
6. End Connections: Solder-joint copper alloy and threaded ferrous; threaded solder-joint copper alloy and threaded ferrous.

D. Dielectric-Flange Insulating Kits - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Advance Products & Systems, LLC**]
b. [**CALPICO, Inc.**]
c. [**GPT Industries, LLC.**]

2. Source Limitations: Obtain dielectric-flange insulating kits from single manufacturer.
3. Description: Nonconducting materials for field assembly of companion flanges.

4. Pressure Rating: [**150 psig (1035 kPa)**] .
5. Gasket: Phenolic.
6. Temperature Rating: [**225 deg F (108 deg C)**] .
7. Bolt Sleeves: Phenolic or polyethylene.
8. Washers: Phenolic with steel backing washers.

E. Dielectric Nipples - Domestic Water:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
c. [**Matco-Norca**]
d. [**Sioux Chief Manufacturing Company, Inc.**]
e. [**Victaulic Company**]

2. Source Limitations: Obtain dielectric nipples from single manufacturer.
3. Standard: IAPMO PS 66.
4. Description: Electroplated steel nipple complying with ASTM F1545.

5. Pressure Rating and Temperature: [**300 psig (2070 kPa) at 225 deg F (107 deg C)**].
6. End Connections: Male threaded or grooved.
7. Lining: Inert and noncorrosive, propylene.

PART 3 - EXECUTION

3.1 DOMESTIC WATER PIPING APPLICATIONS

A. Transition and special fittings with pressure ratings at least equal to piping rating may be used in applications in paragraphs below.

B. Flanges and unions may be used for aboveground piping joints.

C. Fitting Option: Extruded-tee connections and brazed joints may be used on aboveground copper tubing.

D. Under-Building-Slab, Domestic Water, Building-Service Piping, NPS 3 (DN 80) and Smaller: To be the following:

1. Annealed-Temper Copper Tube: [**ASTM B88, Type K (ASTM B88M, Type A)**][**ASTM B88, Type L (ASTM B88M, Type B)**] ; [**wrought-copper, solder-joint fittings; and brazed**][**copper pressure-seal-joint fittings; and pressure-sealed**] joints.
2. PVC Pipe: [**Schedule 40**][**Schedule 80**] , socket fittings, and solvent-cemented joints.
3. Polypropylene (PP-R and PP-RCT) Pipe: [**SDR 7.4**][**SDR 11**] pipe and socket-fusion, butt-fusion, fusion-outlet, or electrofusion fittings and joints.

E. Under-Building-Slab, Domestic Water, Building-Service Piping, NPS 4 to NPS 8 (DN 100 to DN 200) and Larger: To be the following:

1. Annealed-Temper Copper Tube: [**ASTM B88, Type K (ASTM B88M, Type A)**][**ASTM B88, Type L (ASTM B88M, Type B)**] ; wrought-copper, solder-joint fittings; and brazed joints.
2. Mechanical-Joint, Ductile-Iron Pipe: [**Standard**][**compact**] pattern, mechanical-joint fittings, and mechanical joints.
3. Push-on-Joint, Ductile-Iron Pipe: [**Standard**][**compact**] pattern, push-on-joint fittings, and gasketed joints.
4. Plain-End, Ductile-Iron Pipe: Grooved-end, ductile-iron-pipe appurtenances; and grooved joints.
5. PVC Pipe: [**Schedule 40**][**Schedule 80**] , socket fittings, and solvent-cemented joints.
6. Polypropylene (PP-R and PP-RCT) Pipe: [**SDR 7.4**][**SDR 11**] pipe and socket-fusion, butt-fusion, fusion-outlet, or electrofusion fittings and joints.

F. Under-Building-Slab, Combined Domestic Water, Building-Service, and Fire-Service-Main Piping, NPS 6 to NPS 12 (DN 150 to DN 300): To be the following:

1. Mechanical-Joint, Ductile-Iron Pipe: [**Standard**][**compact**] pattern, mechanical-joint fittings, and mechanical joints.
2. Push-on-Joint, Ductile-Iron Pipe: [**Standard**][**compact**] pattern, push-on-joint fittings, and gasketed joints.
3. Plain-End, Ductile-Iron Pipe: Grooved-end, ductile-iron-pipe appurtenances; and grooved joints.

G. Under-Building-Slab, Domestic Water Piping, NPS 2 (DN 50) and Smaller: To be the following:

1. Drawn-Temper Copper Tube: **ASTM B88, Type L (ASTM B88M, Type B)**; [**wrought-copper, solder-joint fittings; and brazed**][**copper pressure-seal-joint fittings; and pressure-sealed**] joints.
2. Annealed-Temper Copper Tube: **ASTM B88, Type L (ASTM B88M, Type B)**; [**wrought-copper, solder-joint fittings; and brazed**][**copper pressure-seal-joint fittings; and pressure-sealed**] joints.
3. PVC Pipe: [**Schedule 40**][**Schedule 80**] , socket fittings, and solvent-cemented joints.
4. Polypropylene (PP-R and PP-RCT) Pipe: [**SDR 7.4**][**SDR 11**] pipe and socket-fusion, butt-fusion, fusion-outlet, or electrofusion fittings and joints.

H. Aboveground Domestic Water Piping, NPS 2 (DN 50) and Smaller: To be the following:

1. Drawn-Temper Copper Tube: [**ASTM B88, Type L (ASTM B88M, Type B)**][**ASTM B88, Type M (ASTM B88M, Type C)**] .

    a. [**Cast-copper**][**wrought-copper**] solder-joint fittings and [**brazed**][**soldered**] joints.
    b. Copper pressure-seal-joint fittings and pressure-sealed joints.
    c. Copper push-on-joint fittings; and push-on joints.

2. Stainless Steel Pipe: [**Schedule 5**][**Schedule 10**] , pressure-seal-joint fittings, and pressure-sealed joints.
3. CPVC Pipe: [**Schedule 40 socket fittings and solvent-cemented joints**][**Schedule 80 socket fittings and solvent-cemented joints**][**Schedule 80 pipe; CPVC, Schedule 80 threaded**

fittings; and threaded joints] .

4. CPVC Tubing System: CPVC tube, CPVC socket fittings, and solvent-cemented joints. [**NPS 1-1/2 (DN 40) and NPS 2 (DN 50) CPVC pipe with CPVC socket fittings may be used instead of tubing.**]

5. PEX Tube - Domestic Water: **NPS 1 (DN 25)** and smaller.

    a. Fittings for PEX tube:

        1) ASTM F1807, metal insert and copper crimp rings.
        2) ASTM F1960, cold expansion fittings and reinforcing rings.
        3) ASSE/ANSI 1061, push-fit fittings.

6. PEX-AL-PEX Tube: **NPS 1 (DN 25)** and smaller, fittings for PEX-AL-PEX tube, and crimped joints.
7. PVC Pipe: [**Schedule 40**][**Schedule 80**] , socket fittings, and solvent-cemented joints.
8. Polypropylene (PP-R and PP-RCT) Pipe: [**SDR 7.4**][**SDR 11**] pipe and socket-fusion, butt-fusion, fusion-outlet, or electrofusion fittings and joints.

I. Aboveground Domestic Water Piping, NPS 2-1/2 to NPS 4 (DN 65 to DN 100): To be the following:

1. Drawn-Temper Copper Tube: [**ASTM B88, Type L (ASTM B88M, Type B)**][**ASTM B88, Type M (ASTM B88M, Type C)**] .

    a. [**Cast-copper**][**wrought-copper**] solder-joint fittings and [**brazed**][**soldered**] joints.
    b. Copper pressure-seal-joint fittings and pressure-sealed joints.
    c. Grooved-end, copper-tube appurtenances; and grooved joints.

2. Stainless Steel Pipe: [**Schedule 5**][**Schedule 10**][**Schedule 40**] pipe, grooved-joint fittings, and grooved joints.
3. CPVC Pipe: [**Schedule 40, socket fittings, and solvent-cemented joints**][**Schedule 80, socket fittings, and solvent-cemented joints**][**Schedule 80 pipe; CPVC, Schedule 80 threaded fittings; and threaded joints**] .
4. PVC Pipe: [**Schedule 40**][**Schedule 80**] , socket fittings, and solvent-cemented joints.
5. Polypropylene (PP-R and PP-RCT) Pipe: [**SDR 7.4**][**SDR 11**] pipe and socket-fusion, butt-fusion, fusion-outlet, or electrofusion fittings and joints.

J. Aboveground Domestic Water Piping, NPS 5 to NPS 8 (DN 125 to DN 200): To be the following:

1. Drawn-Temper Copper Tube: [**ASTM B88, Type L (ASTM B88M, Type B)**][**ASTM B88, Type M (ASTM B88M, Type C)**] .

    a. [**Cast-copper**][**wrought-copper**] solder-joint fittings and [**brazed**][**soldered**] joints.
    b. Grooved-end, copper-tube appurtenances; and grooved joints.

2. Stainless Steel Pipe: [**Schedule 5**][**Schedule 10**][**Schedule 40**] pipe, grooved-joint fittings, and grooved joints.

3. CPVC Pipe: [**Schedule 40, socket fittings, and solvent-cemented joints**][**Schedule 80, socket fittings, and solvent-cemented joints**][**Schedule 80 pipe; CPVC, Schedule 80 threaded fittings; and threaded joints**] .
4. PVC Pipe: [**Schedule 40**][**Schedule 80**] , socket fittings, and solvent-cemented joints.
5. Polypropylene (PP-R and PP-RCT) Pipe: [**SDR 7.4**][**SDR 11**] pipe and socket-fusion, butt-fusion, fusion-outlet, or electrofusion fittings and joints.

K. Aboveground, Combined Domestic Water-Service and Fire-Service-Main Piping, NPS 6 to NPS 12 (DN 150 to DN 300): To be the following:

1. Plain-End, Ductile-Iron Pipe: Grooved-end, ductile-iron-pipe appurtenances; and grooved joints.
2. Stainless Steel Pipe: [**Schedule 5**][**Schedule 10**][**Schedule 40**] pipe, grooved-joint fittings, and grooved joints.

3.2 EARTHWORK

A. Comply with requirements in Section 312000 "Earth Moving" for excavating, trenching, and backfilling.

3.3 INSTALLATION OF DOMESTIC WATER PIPING, GENERAL

A. Requirements in this article apply to all piping materials, except where more specific requirements are specified in various pipe and fittings installation articles.

B. Drawing plans, schematics, and diagrams indicate general location and arrangement of domestic water piping. Indicated locations and arrangements are used to size pipe and calculate friction loss, expansion, and other design considerations. Install piping as indicated unless deviations to layout are approved on coordination drawings.

C. Install valves in accordance with Section 220523 "General-Duty Valves for Plumbing Piping."

D. Install water-pressure-reducing valves downstream from shutoff valves. Comply with requirements for pressure-reducing valves in Section 221119 "Domestic Water Piping Specialties."

E. Install domestic water piping level [**with 0.25 percent slope downward toward drain**][**without pitch**] and plumb.

F. Rough-in domestic water piping for water-meter installation in accordance with utility company's requirements.

G. Install seismic restraints on piping. Comply with requirements for seismic-restraint devices in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

H. Install piping concealed from view and protected from physical contact by building occupants unless otherwise indicated and except in equipment rooms and service areas.

I. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

J. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal, and coordinate with other services occupying that space.

K. Install piping to permit valve servicing.

L. Install nipples, unions, special fittings, and valves with pressure ratings the same as or higher than the system pressure rating used in applications below.

M. Install piping free of sags and bends.

N. Install fittings for changes in direction and branch connections.

O. Install pressure gauges on suction and discharge piping for each plumbing pump and packaged booster pump. Comply with requirements for pressure gauges in Section 220500 "Common Work Results for Plumbing."

P. Install thermostats in hot-water circulation piping. Comply with requirements for thermostats in Section 221123.21 "Inline, Domestic-Water Pumps."

Q. Install thermometers on [**inlet and**] outlet piping from each water heater. Comply with requirements for thermometers in Section 220500 "Common Work Results for Plumbing."

R. Install sleeves for piping penetrations of walls, ceilings, and floors. Comply with requirements for sleeves specified in Section 220500 "Common Work Results for Plumbing."

S. Install sleeve seals for piping penetrations of concrete walls and slabs. Comply with requirements for sleeve seals specified in Section 220500 "Common Work Results for Plumbing."

T. Install escutcheons for piping penetrations of walls, ceilings, and floors. Comply with requirements for escutcheons specified in Section 220500 "Common Work Results for Plumbing."

U. Joint Construction, General:

1. Ream ends of pipes and tubes and remove burrs. Bevel plain ends of steel pipe.
2. Remove scale, slag, dirt, and debris from inside and outside of pipes, tubes, and fittings before assembly.
3. Threaded Joints: Thread pipe with tapered pipe threads in accordance with ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and restore full ID. Join pipe fittings and valves as follows:

    a. Apply appropriate tape or thread compound to external pipe threads.
    b. Damaged Threads: Do not use pipe or pipe fittings with threads that are corroded or damaged.

4. Joints for Dissimilar-Material Piping: Make joints using adapters compatible with materials of both piping systems.

3.4 INSTALLATION OF COPPER TUBE AND FITTINGS - DOMESTIC WATER

A. Install copper tubing under building slab in accordance with CDA's "Copper Tube Handbook."

B. Install underground copper tube in polyethylene encasement in accordance with ASTM A674 or AWWA C105/A21.5.

C. Install unions in copper tubing at final connection to each piece of equipment, machine, and specialty.

D. Joint Construction:

1. Brazed Joints for Copper Tubing: Comply with CDA's "Copper Tube Handbook," "Brazed Joints" chapter.
2. Soldered Joints for Copper Tubing: Apply ASTM B813, water-flushable flux to end of tube. Join copper tube and fittings in accordance with ASTM B828 or CDA's "Copper Tube Handbook."
3. Pressure-Sealed Joints for Copper Tubing: Join copper tube and pressure-seal fittings with tools and procedure recommended in writing by pressure-seal-fitting manufacturer. Leave insertion marks on pipe after assembly.

4. Push-on Joints for Copper Tubing: Clean end of tube. Measure insertion depth with manufacturer's depth gauge. Join copper tube and push-on-joint fittings by inserting tube to measured depth.
5. Extruded-Tee Connections: Form tee in copper tube in accordance with ASTM F2014. Use tool designed for copper tube; drill pilot hole, form collar for outlet, dimple tube to form seating stop, and braze branch tube into collar.
6. Grooved-End Copper Tubing: Make joints in accordance with AWWA C606. Roll groove ends of tubes. Lubricate and install gasket over ends of tubes or tube and fitting. Install coupling housing sections over gasket with keys seated in tubing grooves. Install and tighten housing bolts.

3.5 INSTALLATION OF DUCTILE-IRON PIPE AND FITTINGS - DOMESTIC WATER

A. Install ductile-iron piping under building slab with restrained joints in accordance with AWWA C600 and AWWA M41.

B. Install underground ductile-iron pipe in polyethylene encasement in accordance with ASTM A674 or AWWA C105/A21.5.

C. Joint Construction:

1. Grooved-End, Ductile-Iron Piping: Make joints in accordance with AWWA C606. Cut round-bottom grooves in ends of pipe at gasket-seat dimension required for specified (flexible or rigid) joint. Lubricate and install gasket over ends of pipes or pipe and fitting. Install coupling housing sections over gasket with keys seated in piping grooves. Install and tighten housing bolts.
2. Flanged Joints: Select appropriate asbestos-free, nonmetallic gasket material in size, type, and thickness suitable for domestic water service. Join flanges with gasket and bolts in accordance with ASME B31.9.

3.6 INSTALLATION OF STAINLESS STEEL PIPE AND FITTINGS - DOMESTIC WATER

A. Joint Construction of Grooved-End Steel Piping: Make joints in accordance with AWWA C606. [**Square cut**][**Roll**] groove ends of pipe as specified. Lubricate and install gasket over ends of pipes or pipe and fitting. Install coupling housing sections over gasket with keys seated in piping grooves. Install and tighten housing bolts.

3.7 INSTALLATION OF CPVC PIPE AND FITTINGS - DOMESTIC WATER

A. Joint Construction of Solvent-Cemented Plastic Piping: Clean and dry joining surfaces. Join pipe and fittings in accordance with the following:

1. Comply with ASTM F402 for safe-handling practice of cleaners, primers, and solvent cements. Apply primer.
2. Join in accordance with ASTM D2846/D2846M.

3.8 INSTALLATION OF PVC PIPE AND FITTINGS - DOMESTIC WATER

A. Joint Construction of Solvent-Cemented Plastic Piping: Clean and dry joining surfaces. Join pipe and fittings in accordance with the following:

1. Comply with ASTM F402 for safe-handling practice of cleaners, primers, and solvent cements. Apply primer.

2. Join in accordance with ASTM D2855.

3.9 INSTALLATION OF PEX TUBE AND FITTINGS - DOMESTIC WATER

A. Install PEX tube with loop at each change of direction of more than 90 degrees.

B. Joint Construction:

1. Joints for PEX Tubing, ASTM: Join in accordance with ASTM F1807 for metal insert and copper crimp ring fittings and ASTM F1960 for cold expansion fittings and reinforcing rings.
2. Joints for PEX Tubing, ASSE: Join in accordance with ASSE/ANSI 1061 for push-fit fittings.

3.10 INSTALLATION OF PEX-AL-PEX TUBE AND FITTINGS - DOMESTIC WATER

A. Install PEX-AL-PEX tubing and fittings per manufacturer instructions.

B. Joint Connection:

1. Joints PEX-AL-PEX Tubing, ASTM: Join in accordance with using approved mechanical compression, press, or crimp fittings per ASTM F1281.

3.11 INSTALLATION OF PEX-AL-HDPE TUBE AND FITTINGS - DOMESTIC WATER

A. Install PEX-AL-HDPE tubing and fittings per manufacturer instructions.

B. Joint Connections:

1. Joints for PEX-AL-HDPE Tubing: Join in accordance with manufacturer's written instructions and standard ISO/EN.

3.12 INSTALLATION OF POLYPROPYLENE PIPING AND FITTINGS - DOMESTIC WATER

A. Install Polypropylene piping and fitting per manufacturer's instructions.

B. Joint Connections:

1. Jointing Polypropylene Piping and Fittings, ASTM and ISO: Join by the use of the thermal fusion method specifically approved by the manufacturer based on ASTM F2389 and ISO 15874.

3.13 INSTALLATION OF TRANSITION FITTINGS - DOMESTIC WATER

A. Install transition couplings at joints of dissimilar piping.

B. Transition Fittings in Underground Domestic Water Piping:

1. Fittings for NPS 1-1/2 (DN 40) and Smaller: Fitting-type coupling.
2. Fittings for NPS 2 (DN 50) and Larger: Sleeve-type coupling.

C. Transition Fittings in Aboveground Domestic Water Piping NPS 2 (DN 50) and Smaller: Plastic-to-metal

transition [**fittings**][**unions**] .

3.14 INSTALLATION OF DIELECTRIC FITTINGS - DOMESTIC WATER

A. Install dielectric fittings in piping at connections of dissimilar metal piping and tubing.

B. Dielectric Fittings for NPS 2 (DN 50) and Smaller: Use dielectric [**couplings**][**couplings or nipples**][**nipples**][**unions**] .

C. Dielectric Fittings for NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Use dielectric [**flanges**][**flange kits**][**nipples**] .

D. Dielectric Fittings for NPS 5 (DN 125) and Larger: Use dielectric flange kits.

3.15 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with requirements for seismic-restraint devices specified in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

B. Comply with requirements for hangers, supports, and anchor devices in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment."

C. Metal Tube/Pipe:

1. Install hangers with maximum horizontal spacing and minimum rod diameters, to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.
2. Support vertical runs of metal tube/pipe to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

D. Plastic Pipe:

1. Install vinyl-coated hangers with maximum horizontal spacing and minimum rod diameters, to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.
2. Support vertical runs of plastic pipe to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

E. PEX Tube:

1. Install vinyl-coated hangers for PEX tube, with maximum horizontal spacing and minimum rod diameters, to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.
2. Support vertical runs of PEX tube to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

F. Support horizontal piping within [**12 inches (300 mm)**] of each fitting.

3.16 PIPING CONNECTIONS

A. Drawings indicate general arrangement of piping, fittings, and specialties.

B. When installing piping adjacent to equipment and machines, allow space for service and maintenance.

C. Connect domestic water piping to exterior water-service piping. Use transition fitting to join dissimilar piping materials.

D. Connect domestic water piping to water-service piping with shutoff valve; extend and connect to the following:

1. Domestic Water Booster Pumps: Cold-water suction and discharge piping.
2. Water Heaters: Cold-water inlet and hot-water outlet piping in sizes indicated, but not smaller than sizes of water heater connections.
3. Plumbing Fixtures: Cold- and hot-water-supply piping in sizes indicated, but not smaller than that required by plumbing code.
4. Equipment: Cold- and hot-water-supply piping as indicated, but not smaller than equipment connections. Provide shutoff valve and union for each connection. Use flanges instead of unions for **NPS 2-1/2 (DN 65)** and larger.

3.17 IDENTIFICATION

A. Identify system components. Comply with requirements for identification materials and installation in Section 220553 "Identification for Plumbing Piping and Equipment."

3.18 CLEANING

A. Clean and disinfect potable domestic water piping as follows:

1. Purge new piping and parts of existing piping that have been altered, extended, or repaired before using.
2. Use purging and disinfecting procedures prescribed by authorities having jurisdiction; if methods are not prescribed, use procedures described in either AWWA C651 or AWWA C652 or follow procedures described below:

    a. Flush piping system with clean, potable water until dirty water does not appear at outlets.
    b. Fill and isolate system in accordance with either of the following:

        1) Fill system or part thereof with water/chlorine solution with at least **50 ppm (50 mg/L)** of chlorine. Isolate with valves and allow to stand for 24 hours.
        2) Fill system or part thereof with water/chlorine solution with at least **200 ppm (200 mg/L)** of chlorine. Isolate and allow to stand for three hours.

    c. Flush system with clean, potable water until no chlorine is in water coming from system after the standing time.
    d. Repeat procedures if biological examination shows contamination.
    e. Submit water samples in sterile bottles to authorities having jurisdiction.

B. Clean non-potable domestic water piping as follows:

1. Purge new piping and parts of existing piping that have been altered, extended, or repaired before using.
2. Use purging procedures prescribed by authorities having jurisdiction or; if methods are not prescribed, follow procedures described below:

a. Flush piping system with clean, potable water until dirty water does not appear at outlets.
b. Submit water samples in sterile bottles to authorities having jurisdiction. Repeat procedures if biological examination shows contamination.

C. Prepare and submit reports of purging and disinfecting activities. Include copies of water-sample approvals from authorities having jurisdiction.

D. Clean interior of domestic water piping system. Remove dirt and debris as work progresses.

3.19 ADJUSTING

A. Perform the following adjustments before operation:

1. Close drain valves, hydrants, and hose bibbs.
2. Open shutoff valves to fully open position.
3. Open throttling valves to proper setting.
4. Adjust balancing valves in hot-water-circulation return piping to provide adequate flow.

a. Manually adjust ball-type balancing valves in hot-water-circulation return piping to provide hot-water flow in each branch.
b. Adjust calibrated balancing valves to flows indicated.

5. Remove plugs used during testing of piping and for temporary sealing of piping during installation.
6. Remove and clean strainer screens. Close drain valves and replace drain plugs.
7. Remove filter cartridges from housings and verify that cartridges are as specified for application where used and are clean and ready for use.
8. Check plumbing specialties and verify proper settings, adjustments, and operation.

3.20 FIELD QUALITY CONTROL

A. Tests and Inspections:

1. Piping Inspections:

a. Do not enclose, cover, or put piping into operation until it has been inspected and approved by authorities having jurisdiction.
b. During installation, notify authorities having jurisdiction at least one day before inspection must be made. Perform tests specified below in presence of authorities having jurisdiction:

1) Roughing-in Inspection: Arrange for inspection of piping before concealing or closing in after installation and before setting fixtures.
2) Final Inspection: Arrange for authorities having jurisdiction to observe tests specified in "Piping Tests" Subparagraph below and to ensure compliance with requirements.

c. Reinspection: If authorities having jurisdiction find that piping will not pass tests or inspections, make required corrections and arrange for reinspection.
d. Reports: Prepare inspection reports and have them signed by authorities having jurisdiction.

2. Piping Tests:

a. Fill domestic water piping. Check components to determine that they are not air bound and that piping is full of water.

b. Test for leaks and defects in new piping and parts of existing piping that have been altered, extended, or repaired. If testing is performed in segments, submit a separate report for each test, complete with diagram of portion of piping tested.
c. Leave new, altered, extended, or replaced domestic water piping uncovered and unconcealed until it has been tested and approved. Expose work that was covered or concealed before it was tested.
d. Cap and subject piping to static water pressure of **50 psig (345 kPa)** above operating pressure, without exceeding pressure rating of piping system materials. Isolate test source and allow it to stand for four hours. Leaks and loss in test pressure constitute defects that must be repaired.

e. Polypropylene (PP-R and PP-RCT) Pipe: Hydrostatic testing and documentation of test results for polypropylene (PP-R and PP-RCT) pipe to be in accordance with manufacturer's written instructions and submitted to manufacturer upon successful completion per warranty requirements.
f. Repair leaks and defects with new materials, and retest piping or portion thereof until satisfactory results are obtained.
g. Prepare reports for tests and for corrective action required.

B. Domestic water piping will be considered defective if it does not pass tests and inspections.

C. Prepare test and inspection reports.

END OF SECTION 22 11 16 00

SECTION 22 11 16 00A - GENERAL-SERVICE COMPRESSED-AIR PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes: Piping and related specialties for general-service compressed-air systems, as follows:

1. Pipes, tubes, and fittings.
2. Joining materials.
3. Valves.
4. Dielectric fittings.
5. Flexible pipe connectors.
6. Specialties.
7. Quick couplings.
8. Hose assemblies.

B. Related Requirements:

1. Section 221519 "General-Service Packaged Air Compressors and Receivers" for general-service air compressors and accessories.

1.2 DEFINITIONS

A. CR: Chlorosulfonated polyethylene synthetic rubber.

B. EPDM: Ethylene-propylene-diene terpolymer rubber.

C. HDPE: High-density polyethylene plastic.

D. High-Pressure, Compressed-Air Piping: System of compressed-air piping and specialties operating at pressures between **150 and 200 psig (1035 and 1380 kPa)**.

E. Low-Pressure, Compressed-Air Piping: System of compressed-air piping and specialties operating at pressures of **150 psig (1035 kPa)** or less.

F. NBR: Nitrile butadiene rubber.

G. PE: Polyethylene plastic.

1.3 ACTION SUBMITTALS

A. Product Data:

1. Plastic pipes, fittings, and valves.
2. Dielectric fittings.
3. Flexible pipe connectors.
4. Safety valves.
5. Pressure regulators. Include rated capacities and operating characteristics.
6. Automatic drain valves.

7. Filters. Include rated capacities and operating characteristics.
8. Lubricators. Include rated capacities and operating characteristics.
9. Quick couplings.
10. Hose assemblies.

1.4 INFORMATIONAL SUBMITTALS

A. Certificates:

1. [**Brazing**][**and**][**welding**] certificates.

B. Field quality-control reports.

C. Qualification Statements: For Installer.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For general-service compressed-air piping specialties to include in emergency, operation, and maintenance manuals.

1.6 QUALITY ASSURANCE

A. Installer Qualifications:

1. Extruded-Tee Outlet Procedure: Qualify operators according to training provided by respective manufacturer, for making branch outlets.
2. Press-Seal Joining Procedure for Copper Tubing: Qualify operators according to training provided by respective manufacturer.
3. Pressure-Seal Joining Procedure for Steel Piping. Qualify operators according to training provided by respective manufacturer.
4. Joining Procedures for Aluminum Piping Systems: Qualify installers according to training provided by respective manufacturer.

B. Brazing: Qualify processes and operators in accordance with ASME Boiler and Pressure Vessel Code: Section IX, "Welding and Brazing Qualifications," or with AWS B2.2, "Standard for Brazing Procedure and Performance Qualification."

C. Welding: Qualify processes and operators in accordance with ASME Boiler and Pressure Vessel Code: Section IX.

1.7 PROJECT CONDITIONS

A. Interruption of Existing Compressed-Air Service: Do not interrupt compressed-air service to facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary compressed-air service according to requirements indicated:

1. Notify [**Architect**][**Construction Manager**][**Owner**] no fewer than [**two**]<**Insert number**> days in advance of proposed interruption of compressed-air service.
2. Do not proceed with interruption of compressed-air service without [**Architect's**][**Construction Manager's**][**Owner's**] written permission.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each product type from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Seismic Performance: Compressed-air piping system to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**]<**Insert requirement**>. See Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

1. The term "withstand" means "the piping system will remain in place without separation of any parts from the device when subjected to the seismic forces specified[**and the piping system will be fully operational after the seismic event**]."
2. Component Importance Factor: [**1.5**][**1.0**].
3. <**Insert requirements for Component Amplification Factor and Component Response Modification Factor**>.

B. ASME Compliance:

1. Comply with ASME B31.1, "Power Piping," for high-pressure, compressed-air piping.
2. Comply with ASME B31.3, "Process Piping," for high- and low-pressure, compressed-air piping.
3. Comply with ASME B31.9, "Building Services Piping," for low-pressure, compressed-air piping.

2.3 PIPES, TUBES, AND FITTINGS

A. Schedule 40, Steel Pipe: ASTM A53/A53M, Type E or S, Grade B, black or hot-dip zinc coated with ends threaded in accordance with ASME B1.20.1.

1. Steel Nipples: ASTM A733, made of ASTM A53/A53M or ASTM A106, Schedule 40, galvanized seamless steel pipe. Include ends matching joining method.
2. Malleable-Iron Fittings: ASME B16.3, Class 150 or 300, threaded.
3. Malleable-Iron Unions: ASME B16.39, Class 150 or 300, threaded.
4. Steel Flanges, Threaded: ASME B16.5, Class 150 or 300, carbon steel, threaded.
5. Wrought-Steel, Butt-Welding Fittings: ASME B16.9, Schedule 40.
6. Steel Flanges: ASME B16.5, Class 150 or 300, carbon steel.
7. Grooved-End Fittings and Couplings, Steel:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Anvil; an ASC Engineered Solution**]
2) [**ASC Engineered Solutions**]
3) [**Star Pipe Products**]
4) [**Victaulic Company**]
5) [**Ward Manufacturing LLC**]
6) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of

the following:

1) [**Anvil; an ASC Engineered Solution**]
2) [**ASC Engineered Solutions**]
3) [**Star Pipe Products**]
4) [**Victaulic Company**]
5) [**Ward Manufacturing LLC**]
6) <**Insert manufacturer's name**>

c. Grooved-End Fittings: ASTM A47/A47M, malleable-iron castings or ASTM A536, ductile-iron castings; with grooves in accordance with AWWA C606 and dimensions matching steel pipe.

d. Grooved-End Couplings: AWWA C606 or UL 213, for steel-pipe dimensions and rated for **300 psig (2070 kPa)** minimum working pressure. Include ferrous housing sections, gasket suitable for compressed air, and bolts and nuts. Provide EDPM gaskets for oil-free compressed air. Provide NBR gaskets if compressed air contains oil or oil vapor.

B. Schedule 5, Steel Pipe: ASTM A135, carbon steel with plain ends and zinc-plated finish.

1. Press-Type, Schedule 5 Steel, Fittings: Listed and labeled by qualified testing agency and FM Global-approved, carbon-steel, pressure-seal housing with O-ring end seals suitable for compressed-air piping and rated for **300 psig (2070 kPa)** minimum working pressure. Provide EDPM seals for oil-free compressed air. Provide NBR seals if compressed air contains oil or oil vapor.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Anvil; an ASC Engineered Solution**]
2) [**Victaulic Company**]
3) [**Viega LLC**]
4) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**Anvil; an ASC Engineered Solution**]
2) [**Victaulic Company**]
3) [**Viega LLC**]
4) <**Insert manufacturer's name**>

C. Copper Tube: [**ASTM B88, Type K or L (ASTM B88M, Type A or B)**] seamless, drawn-temper, water tube.

1. Wrought-Copper Fittings: ASME B16.22, solder-joint pressure type or MSS SP-73, wrought copper with dimensions for brazed joints.
2. Cast-Copper-Alloy Flanges: ASME B16.24, Class 150 or 300.
3. Copper Unions: ASME B16.22 or MSS SP-123.
4. Press-Type, Copper Tube, Fittings, **NPS 2 (DN 50)** and Smaller: Wrought-copper fitting with EPDM O-ring seal in each end.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

1) [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
2) [**NIBCO INC.**]
3) [**Viega LLC**]
4) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
2) [**NIBCO INC.**]
3) [**Viega LLC**]
4) <**Insert manufacturer's name**>

5. Press-Type, Copper Tube, Fittings, **NPS 2-1/2 to NPS 4 (DN 65 to DN 100)**: Bronze fitting with stainless steel grip ring and EPDM O-ring seal in each end.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**NIBCO INC.**]
2) [**Viega LLC**]
3) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**NIBCO INC.**]
2) [**Viega LLC**]
3) <**Insert manufacturer's name**>

6. Extruded-Tee Outlets: Procedure for making branch outlets in copper tube in accordance with ASTM F2014.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**T-DRILL Industries Inc**]
2) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**T-DRILL Industries Inc**]
2) <**Insert manufacturer's name**>

7. Grooved-End Fittings and Couplings, Copper:

    a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

        1) [**Anvil; an ASC Engineered Solution**]
        2) [**ASC Engineered Solutions**]
        3) [**Victaulic Company**]
        4) <**Insert manufacturer's name**>

    b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

        1) [**Anvil; an ASC Engineered Solution**]
        2) [**ASC Engineered Solutions**]
        3) [**Victaulic Company**]
        4) <**Insert manufacturer's name**>

    c. Grooved-End Fittings: ASTM B75/B75M, copper tube or ASTM B584, bronze castings.
    d. Grooved-End Couplings: Copper-tube dimensions and design similar to AWWA C606. Include ferrous housing sections, gasket suitable for compressed air, and bolts and nuts. Provide EDPM gasket for oil-free compressed air. Provide NBR gasket if compressed air contains oil or oil vapor.

D. Transition Couplings for Metal Piping: Metal coupling or other manufactured fitting same size as, with pressure rating at least equal to and ends compatible with, piping to be joined.

E. Aluminum Piping System: Aluminum pipe, Alloy Grade AA 6035-T5, for push-connect bite ring couplings, and roll-groove couplings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Applied System Technologies**]
    b. [**Gardner Denver, an Ingersoll Rand business**]
    c. [**Ingersoll Rand**]
    d. [**SynergAir**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Applied System Technologies**]
    b. [**Gardner Denver, an Ingersoll Rand business**]
    c. [**Ingersoll Rand**]
    d. [**SynergAir**]
    e. <**Insert manufacturer's name**>

3. Pressure and Temperature Range: Aluminum piping and related specialties for general-service

compressed-air systems operating at **220 psig (1517 kPa)** or less, across a temperature range of **minus 4 to plus 176 deg F (minus 20 to plus 80 deg C)**.

4. Tubing, 14 to 273 mm: Aluminum pipe, Alloy Grade AA 6063-T5.
5. Pipe Coating: Powder-coated paint that is certified nontoxic to AAMA 603 and AAMA 605, blue for compressed air.
6. Provide tubing that is quality controlled to comply with tolerances specified by roll-groove or push-to-connect coupling manufacturer. Tubing manufacturer follows ISO 9001:2000 quality standards.
7. Pipe Identification: Decal with maximum working pressure and temperature on each length of pipe.
8. Push-Connect Bite Ring Couplings, 14 to 63 mm: Solid-brass and nickel-plated body, NBR O-ring seal in excess of 36 percent, and AISI Type 304 stainless steel clamping washer.
9. Fittings: Solid brass and nickel plated.
10. Roll-Groove Couplings, 73 to 273 mm: Solid ductile-iron, galvanized, ASTM A536 Grade 65-45-12, NBR standard seals, and fluoroelastomer seals for high-temperature applications.
11. Ball Valves, 20 to 63 mm: NPT ends, or push-connect bite ring ends.
12. Butterfly Valves, 73 to 273 mm: Tube to tube, with two roll-groove end couplings.
13. Flanges, 73 to 273 mm: ASME B16.5, Class 150.

F. Blue ABS Piping System: Made of ASTM D3965, ABS-resin modified to provide shatter-resistant pipe for compressed-air service. Pipe and fittings are light blue and sizes are in millimeters.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**IPEX USA LLC**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**IPEX USA LLC**]
    b. <**Insert manufacturer's name**>

3. Transition Fittings, 20 to 63 mm: Composite union with ABS socket end, CR O-ring, and malleable-iron union nut and threaded end; with construction similar to MSS SP-107, transition union.
4. Transition Fittings, 90 to 110 mm: Flange assembly with ABS flange, CR gasket, and metal flange of material matching piping to be connected.
5. Valves, 20 to 63 mm: ABS union ball valve with socket ends.
6. Valves, 90 to 110 mm: ABS butterfly valve with lever handle.

G. Green ABS Piping System: Made of ASTM D3965, ABS-resin modified to provide shatter-resistant pipe for compressed-air service. Pipe and fittings are dark green with SDR of 9.0 and same OD as ASTM A53/A53M, steel pipe.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**NIBCO INC.**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**NIBCO INC.**]
    b. <**Insert manufacturer's name**>

3. Transition Fittings, **NPS 1/2 to NPS 2 (DN 15 to DN 50)**: Composite union with ABS socket end, CR O-ring, ABS union nut, and brass solder-joint end; with construction similar to MSS SP-107, transition union.
4. Transition Fittings, **NPS 2-1/2 to NPS 4 (DN 65 to DN 100)**: ABS flange, CR gasket, and metal flange of material matching piping to be connected.
5. Valves, **NPS 1/2 to NPS 2 (DN 15 to DN 50)**: Union ball valve with socket ends.
6. Valves, **NPS 2-1/2 to NPS 4 (DN 65 to DN 100)**: Union ball valve with flanged ends. Include safety exhaust feature in "Valve Applications" Article if required.

H. HDPE Piping System: Made of ASTM D1248, HDPE resin to provide shatter-resistant pipe for compressed-air service. Pipe and fittings are dark blue with pipe dimensions about the same OD as ASTM D3035, PE pipe.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Asahi/America**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Asahi/America**]
    b. <**Insert manufacturer's name**>

3. Transition Fittings, **NPS 1/2 to NPS 2 (DN 15 to DN 50)**: HDPE adapter with one socket end and one end with threaded brass insert.
4. Transition Fittings, **NPS 2-1/2 to NPS 4 (DN 65 to DN 100)**: HDPE flange, CR gasket, and metal flange of material matching piping to be connected.
5. Valves, **NPS 1/2 to NPS 3 (DN 15 to DN 80)**: HDPE union ball valve with socket ends.

2.4 JOINING MATERIALS

A. Pipe-Flange Gasket Materials: Suitable for compressed-air piping system contents.

1. ASME B16.21, nonmetallic, flat, asbestos free, **1/8-inch (3.2-mm)** maximum thickness unless thickness or specific material is indicated.

    a. Full-Face Type: For flat-face, Class 125, cast-iron and cast-bronze flanges.
    b. Narrow-Face Type: For raised-face, Class 250, cast-iron and steel flanges.

B. Flange Bolts and Nuts: ASME B18.2.1, carbon steel, unless otherwise indicated.

C. Plastic Pipe-Flange Gasket, Bolts, and Nuts: Type and material recommended by piping system

manufacturer unless otherwise indicated.

D. Solder Filler Metals: ASTM B32, lead-free alloys. Include water-flushable flux in accordance with ASTM B813.

E. Brazing Filler Metals: AWS A5.8/A5.8M, BCuP Series, copper-phosphorus alloys for general-duty brazing, unless otherwise indicated.

F. Welding Filler Metals: Comply with AWS D10.12/D10.12M for welding materials appropriate for wall thickness and chemical analysis of steel pipe being welded.

G. Solvent Cements for Joining Plastic Piping:

1. ABS Piping: ASTM D2235.

2.5 VALVES

A. Metal Ball, Butterfly, Check, and Gate Valves: Comply with requirements in Section 220523 "General-Duty Valves for Plumbing Piping."

2.6 DIELECTRIC FITTINGS

A. General Requirements: Assembly of copper alloy and ferrous materials with separating nonconductive insulating material. Include end connections compatible with pipes to be joined.

B. Dielectric Unions:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Capitol Manufacturing Company**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**HART Industrial Unions, LLC**]
e. [**Jomar Valve**]
f. [**Matco-Norca**]
g. [**Viega LLC**]
h. [**WATTS; A Watts Water Technologies Company**]
i. [**Wilkins**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Capitol Manufacturing Company**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**HART Industrial Unions, LLC**]
e. [**Jomar Valve**]
f. [**Matco-Norca**]
g. [**Viega LLC**]

h. [**WATTS; A Watts Water Technologies Company**]
i. [**Wilkins**]
j. <**Insert manufacturer's name**>

3. Description:

a. Standard: ASSE 1079.
b. Pressure Rating: [**125 psig (860 kPa) minimum at 180 deg F (82 deg C)**][**150 psig (1035 kPa)**][**250 psig (1725 kPa)**].
c. End Connections: Solder-joint copper alloy and threaded ferrous.

C. Dielectric Flanges:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Capitol Manufacturing Company**]
b. [**GF Piping Systems: Georg Fischer LLC**]
c. [**Matco-Norca**]
d. [**Viega LLC**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Wilkins**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Capitol Manufacturing Company**]
b. [**GF Piping Systems: Georg Fischer LLC**]
c. [**Matco-Norca**]
d. [**Viega LLC**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Wilkins**]
g. <**Insert manufacturer's name**>

3. Description:

a. Standard: ASSE 1079.
b. Factory-fabricated, bolted, companion-flange assembly.
c. Pressure Rating: [**125 psig (860 kPa) minimum at 180 deg F (82 deg C)**][**150 psig (1035 kPa)**][**175 psig (1200 kPa)**][**300 psig (2070 kPa)**].
d. End Connections: Solder-joint copper alloy and threaded ferrous; threaded solder-joint copper alloy and threaded ferrous.

D. Dielectric-Flange Insulating Kits:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Advance Products & Systems, LLC**]

b. [**CALPICO, Inc.**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**GPT; a division of EnPRO Industries**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Advance Products & Systems, LLC**]
b. [**CALPICO, Inc.**]
c. [**GF Piping Systems: Georg Fischer LLC**]
d. [**GPT; a division of EnPRO Industries**]
e. <**Insert manufacturer's name**>

3. Description:

a. Nonconducting materials for field assembly of companion flanges.
b. Pressure Rating: [**150 psig (1035 kPa)**]<**Insert pressure**>.
c. Gasket: Neoprene or phenolic.
d. Bolt Sleeves: Phenolic or polyethylene.
e. Washers: Phenolic with steel backing washers.

2.7 FLEXIBLE PIPE CONNECTORS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**ASC Engineered Solutions**]
2. [**Flex-Hose Co., Inc**]
3. [**Flexicraft Industries**]
4. [**Hyspan Precision Products, Inc**]
5. [**Kadant Unaflex, LLC**]
6. [**Mercer Rubber Co**]
7. [**Metraflex Company (The)**]
8. [**Proco Products, Inc**]
9. [**Universal Metal Hose**]
10. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**ASC Engineered Solutions**]
2. [**Flex-Hose Co., Inc**]
3. [**Flexicraft Industries**]
4. [**Hyspan Precision Products, Inc**]
5. [**Kadant Unaflex, LLC**]
6. [**Mercer Rubber Co**]
7. [**Metraflex Company (The)**]
8. [**Proco Products, Inc**]
9. [**Universal Metal Hose**]
10. <**Insert manufacturer's name**>

C. Bronze-Hose Flexible Pipe Connectors: Corrugated-bronze tubing with bronze wire-braid covering and

ends brazed to inner tubing.

1. Working-Pressure Rating: [200 psig (1380 kPa)][250 psig (1725 kPa)] minimum.
2. End Connections, NPS 2 (DN 50) and Smaller: Threaded copper pipe or plain-end copper tube.
3. End Connections, NPS 2-1/2 (DN 65) and Larger: Flanged copper alloy.

D. Stainless Steel-Hose Flexible Pipe Connectors: Corrugated, stainless steel tubing with stainless steel wire-braid covering and ends welded to inner tubing.

1. Working-Pressure Rating: [200 psig (1380 kPa)][250 psig (1725 kPa)] minimum.
2. End Connections, NPS 2 (DN 50) and Smaller: Threaded steel pipe nipple.
3. End Connections, NPS 2-1/2 (DN 65) and Larger: Flanged steel nipple.

2.8 SPECIALTIES

A. Safety Valves: ASME Boiler and Pressure Vessel Code: Section VIII, "Pressure Vessels," construction; National Board certified, labeled, and factory sealed; constructed of bronze body with poppet-type safety valve for compressed-air service.

1. Pressure Settings: Higher than discharge pressure and same or lower than receiver pressure rating.

B. Air-Main Pressure Regulators: Bronze body, direct acting, spring-loaded manual pressure-setting adjustment, and rated for [250 psig (1725 kPa)]<**Insert pressure**> inlet pressure, unless otherwise indicated.

1. Type: Pilot operated.

C. Air-Line Pressure Regulators, Bronze Body: [**Diaphragm**][**or**][**pilot**] operated, bronze body, direct acting, spring-loaded manual pressure-setting adjustment, and rated for [200 psig (1380 kPa)]<**Insert pressure**> minimum inlet pressure, unless otherwise indicated.

D. Air-Line Pressure Regulators, Aluminum Alloy or Plastic Body: Diaphragm operated, aluminum alloy or plastic body, direct acting, spring-loaded manual pressure-setting adjustment, and rated for [200 psig (1380 kPa)]<**Insert pressure**> minimum inlet pressure, unless otherwise indicated.

E. Automatic Drain Valves: Stainless steel body and internal parts, rated for [200 psig (1380 kPa)]<**Insert pressure**> minimum working pressure, capable of automatic discharge of collected condensate.[**Include mounting bracket if wall mounting is indicated.**]

F. Coalescing Filters: Coalescing type with activated carbon capable of removing water and oil aerosols; with color-change dye to indicate when carbon is saturated and warning light to indicate when selected maximum pressure drop has been exceeded.[**Include mounting bracket if wall mounting is indicated.**]

G. Mechanical Filters: Two-stage, mechanical-separation, air-line filters. Equip with deflector plates, resin-impregnated-ribbon filters with edge filtration, and drain cock.[**Include mounting bracket if wall mounting is indicated.**]

H. Air-Line Lubricators: With drip chamber and sight dome for observing oil drop entering airstream; with oil-feed adjustment screw and quick-release collar for easy bowl removal.[**Include mounting bracket if wall mounting is indicated.**]

1. Provide with automatic feed device for supplying oil to lubricator.

2.9 QUICK COUPLINGS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Aeroquip Performance Products; Eaton, Hydraulics Sector**]
2. [**Bowes Manufacturing Inc.**]
3. [**Foster Manufacturing, Inc.**]
4. [**Milton Industries, Inc**]
5. [**Parker (Parker Hannifin)**]
6. [**Rectus Corp**]
7. [**Schrader-Bridgeport/Standard Thomson**]
8. [**TOMCO Products Inc**]
9. [**Tuthill Corporation**]
10. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Aeroquip Performance Products; Eaton, Hydraulics Sector**]
2. [**Bowes Manufacturing Inc.**]
3. [**Foster Manufacturing, Inc.**]
4. [**Milton Industries, Inc**]
5. [**Parker (Parker Hannifin)**]
6. [**Rectus Corp**]
7. [**Schrader-Bridgeport/Standard Thomson**]
8. [**TOMCO Products Inc**]
9. [**Tuthill Corporation**]
10. <**Insert manufacturer's name**>

C. General Requirements for Quick Couplings: Assembly with locking-mechanism feature for quick connection and disconnection of compressed-air hose.

D. Automatic-Shutoff Quick Couplings: Straight-through brass body with O-ring or gasket seal and stainless steel or nickel-plated-steel operating parts.

1. Socket End: With one-way valve and threaded inlet for connection to piping or threaded hose fitting.
2. Plug End: [**Flow-sensor-bleeder, check-valve**][**Straight-through**] type with barbed outlet for attaching hose.

E. Valveless Quick Couplings: Straight-through brass body with stainless steel or nickel-plated-steel operating parts.

1. Socket End: With O-ring or gasket seal, without valve, and with barbed inlet for attaching hose.
2. Plug End: With barbed outlet for attaching hose.

2.10 HOSE ASSEMBLIES

A. Description: Compatible hose, clamps, couplings, and splicers suitable for compressed-air service, of nominal diameter indicated, and rated for [**300 psig (2070 kPa)**]<**Insert pressure**> minimum working

pressure, unless otherwise indicated.

1. Hose: Reinforced [**single-**][**or**][**double**]-wire-braid, CR-covered hose for compressed-air service.
2. Hose Clamps: Stainless steel clamps or bands.
3. Hose Couplings: Two-piece, straight-through, threaded brass or stainless steel O-ring or gasket-seal swivel coupling with barbed ends for connecting two sections of hose.
4. Hose Splicers: One-piece, straight-through brass or stainless steel fitting with barbed ends for connecting two sections of hose.

PART 3 - EXECUTION

3.1 PIPING APPLICATIONS

A. Compressed-Air Piping between Air Compressors and Receivers: Use[**one of**] the following piping materials for each size range:

1. NPS 2 (DN 50) and Smaller, Threaded: Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.
2. NPS 2 (DN 50) and Smaller, Pressure-Sealed: Schedule 5, galvanized-steel pipe; pressure-seal fittings; and press-seal joints.
3. NPS 2 (DN 50) and Smaller, Welded: Schedule 40, black-steel pipe; wrought-steel fittings; and welded joints.
4. NPS 2 (DN 50) and Smaller, Brazed: **Type K or L (Type A or B)**, copper tube; wrought-copper fittings; and brazed joints.
5. 63 mm Outside Tube Diameter and Smaller: Aluminum pipe; solid-brass nickel-plated fittings; and push-connect bite ring couplings.
6. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Threaded: Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.
7. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Grooved-End: Schedule 40, [**black**][**galvanized**]-steel pipe; grooved-end fittings; couplings; and grooved joints.
8. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Welded: Schedule 40, black-steel pipe; wrought-steel fittings; and welded joints.
9. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Brazed: **Type K or L (Type A or B)**, copper tube; wrought-copper fittings; and brazed joints.
10. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Grooved-End, Copper: **Type K or L (Type A or B)**, copper tube; grooved-end copper fittings; couplings; and grooved joints.
11. 73 to 115 mm: Aluminum pipe; and roll-groove couplings.
12. NPS 5 (DN 125) and Larger, Threaded: Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.
13. NPS 5 (DN 125) and Larger, Grooved-End: Schedule 40, [**black**][**galvanized**]-steel pipe; grooved-end fittings; couplings; and grooved joints.
14. NPS 5 (DN 125) and Larger, Welded: Schedule 40, black-steel pipe; wrought-steel fittings; and welded joints.
15. NPS 5 (DN 125) and Larger, Grooved-End, Copper: Grooved-end, **ASTM B88, Type K or L (ASTM B88M, Type A or B)**, copper tube; grooved-end copper fittings; couplings; and grooved joints.
16. 168 mm and Larger: Aluminum pipe; and roll-groove couplings.

B. Low-Pressure Compressed-Air Distribution Piping: Use[**one of**] the following piping materials for each size range:

1. NPS 2 (DN 50) and Smaller, Threaded: Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.

2. NPS 2 (DN 50) and Smaller, Pressure-Sealed, Steel: Schedule 5, galvanized-steel pipe; pressure-seal fittings; and pressure-sealed joints.
3. NPS 2 (DN 50) and Smaller, Brazed or Soldered: **Type K or L (Type A or B)**, copper tube; wrought-copper fittings; and brazed[**or soldered**] joints.
4. NPS 2 (DN 50) and Smaller, Pressure-Sealed, Copper: **Type K or L (Type A or B)**, copper tube; press-type fittings; and pressure-sealed joints.
5. 63 mm and Smaller: Aluminum pipe; solid-brass nickel-plated fittings; and push-connect bit ring couplings.
6. 63 mm and Smaller, Solvent-Fitted, Blue ABS: Pipe and fittings; transition fittings; valves; and solvent-cemented joints.
7. NPS 2 (DN 50) and Smaller, Solvent-Fitted, Green ABS: Pipe and fittings, transition fittings, and valves; and solvent-cemented joints.
8. NPS 2 (DN 50) and Smaller, Heat-Fused: HDPE pipe, fittings, and valves; and heat-fusion joints.
9. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Threaded: Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.
10. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Grooved-End: Schedule 40, [**black**][**galvanized**]-steel pipe; grooved-end fittings; couplings; and grooved joints.
11. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Brazed or Soldered: **Type K or L (Type A or B)**, copper tube; wrought-copper fittings; and brazed[**or soldered**] joints.
12. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Grooved-End, Copper: **Type K or L (Type A or B)**, copper tube; grooved-end copper fittings; couplings; and grooved joints.
13. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Pressure-Sealed: **Type K or L (Type A or B)**, copper tube; press-type fittings; and pressure-sealed joints.
14. 73 to 115 mm: Aluminum pipe; and roll-groove couplings.
15. 90 and 110 mm, Solvent-Fitted, Blue ABS: Pipe and fittings; transition fittings; and solvent-cemented joints. Include butterfly valves and flanged joints.
16. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Solvent-Fitted, Green ABS: Green ABS pipe and fittings; transition fittings; and solvent-cemented joints. Include ball valves and flanged joints.
17. NPS 2-1/2 to NPS 4 (DN 65 to DN 100), Heat-Fused: HDPE pipe and fittings; valves; and heat-fusion joints.
18. NPS 5 and NPS 6 (DN 125 and DN 150): Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.
19. NPS 5 (DN 125) and Larger: Schedule 40, [**black**][**galvanized**]-steel pipe; grooved-end fittings; couplings; and grooved joints.
20. NPS 5 to NPS 8 (DN 125 to DN 200): **Type K or L (Type A or B)**, copper tube; grooved-end copper fittings; couplings; and grooved joints.
21. 169 to 273 mm: Aluminum pipe; and roll-groove couplings.

C. High-Pressure Compressed-Air Distribution Piping: Use[**one of**] the following piping materials for each size range:

1. NPS 2 (DN 50) and Smaller, Threaded: Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.
2. NPS 2 (DN 50) and Smaller, Pressure-Sealed: Schedule 5, galvanized-steel pipe; pressure-seal fittings; and pressure-sealed joints.
3. NPS 2 (DN 50) and Smaller, Welded: Schedule 40, black-steel pipe; wrought-steel fittings; and welded joints.
4. NPS 2 (DN 50) and Smaller, Brazed or Soldered: **Type K or L (Type A or B)**, copper tube; wrought-copper fittings; and brazed[**or soldered**] joints.
5. 63 mm and Smaller: Aluminum pipe; solid-brass nickel-plated fittings; and push-connect bite ring couplings.
6. NPS 2-1/2 to NPS 6 (DN 65 to DN 150), Threaded: Schedule 40, [**black**][**galvanized**]-steel pipe; threaded, malleable-iron fittings; and threaded joints.
7. NPS 2-1/2 to NPS 6 (DN 65 to DN 150), Grooved-End: Schedule 40, [**black**][**galvanized**]-steel pipe; grooved-end fittings; couplings; and grooved joints.
8. NPS 2-1/2 to NPS 6 (DN 65 to DN 150), Welded: Schedule 40, black-steel pipe; wrought-steel

fittings; and welded joints.

9. NPS 2-1/2 to NPS 4 (DN 65 to DN 100): **Type K or L (Type A or B)**, copper tube; wrought-copper fittings; and brazed[**or soldered**] joints.
10. NPS 2-1/2 to NPS 6 (DN 65 to DN 150), Brazed: **Type K or L (Type A or B)**, copper tube; wrought-copper fittings; and brazed joints.
11. NPS 2-1/2 to NPS 6 (DN 65 to DN 150), Grooved-End, Copper: **Type K or L (Type A or B)**, copper tube; grooved-end copper fittings; couplings; and grooved joints.
12. 73 to 168 mm: Aluminum pipe; and roll-groove couplings.
13. NPS 8 (DN 200) and Larger, Grooved: Schedule 40, [**black**][**galvanized**]-steel pipe; grooved-end fittings; couplings; and grooved joints.
14. NPS 8 (DN 200) and Larger, Welded: Schedule 40, black-steel pipe; wrought-steel fittings; and welded joints.
15. NPS 8 (DN 200), Grooved-End: **Type K or L (Type A or B)**, copper tube; grooved-end copper fittings; couplings; and grooved joints.
16. 220 and 274 mm: Aluminum pipe; and roll-groove couplings.

D. Drain Piping: Use[**one of**] the following piping materials:

1. NPS 2 (DN 50) and Smaller: **Type M (Type C)** copper tube; wrought-copper fittings; and brazed or soldered joints.
2. 63 mm and Smaller: Aluminum pipe; solid-brass nickel-plated fittings; and push-connect bite ring couplings.

3.2 VALVE APPLICATIONS

A. Metal General-Duty Valves: Comply with requirements and use valve types specified in "Valve Applications" Article in Section 220523 "General-Duty Valves for Plumbing Piping," according to the following:

1. Low-Pressure Compressed Air: Valve types specified for low-pressure compressed air.
2. High-Pressure Compressed Air: Valve types specified for high-pressure compressed air.
3. Equipment Isolation NPS 2 (DN 50) and Smaller: Safety-exhaust, copper-alloy ball valve with exhaust vent and pressure rating at least as great as piping system operating pressure.
4. Grooved-end valves may be used with grooved-end piping and grooved joints.

B. General-Duty Valves for Aluminum Piping System: Provide valves, made by piping system manufacturer, that are compatible with piping.

1. Ball Valves, 63 mm and Smaller: NPT ends, or push-connect bite ring ends.
2. Butterfly Valves, 73 mm and Larger: Tube to tube, with two roll-groove end couplings.

C. Plastic General-Duty Valves: Provide valves, made by piping manufacturer, that are compatible with piping. Do not use plastic valves between air compressors and receivers.

1. Blue ABS Piping System: Ball and butterfly valves.
2. Green ABS Piping System: Ball valves.
3. HDPE Piping System: Ball valves.

3.3 INSTALLATION OF PIPING, GENERAL

A. Drawing plans, schematics, and diagrams indicate general location and arrangement of compressed-air piping. Indicated locations and arrangements were used to size pipe and calculate friction loss, expansion, air-compressor sizing, and other design considerations. Install piping as indicated unless

deviations to layout are approved on Coordination Drawings.

B. Install piping concealed from view and protected from physical contact by building occupants, unless otherwise indicated and except in equipment rooms and service areas.

C. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless otherwise indicated.

D. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal and to coordinate with other services occupying that space.

E. Where installing piping adjacent to equipment and machines, allow space for service and maintenance.

F. Install air and drain piping with 1 percent slope downward in direction of flow.

G. Install nipples, flanges, unions, transition and special fittings, and valves with pressure ratings same as or higher than system pressure rating unless otherwise indicated.

H. Equipment and Specialty Flanged Connections:

1. Use steel companion flange with gasket for connection to steel pipe.
2. Use cast-copper-alloy companion flange with gasket and brazed[**or soldered**] joint for connection to copper tube. Do not use soldered joints for connection to air compressors or to equipment or machines producing shock or vibration.

I. Extended-tee outlets with brazed branch connection may be used for copper tubing, within extruded-tee connection diameter to run tube diameter ratio for tube type, in accordance with Extruded Tee Connections Sizes and Wall Thickness for Copper Tube (Inches) Table in ASTM F2014.

J. Install eccentric reducers where compressed-air piping is reduced in direction of flow, with bottoms of both pipes and reducer fitting flush.

K. Install branch connections to compressed-air mains from top of main. Provide drain leg and drain trap at end of each main and branch and at low points.

L. Install pressure gauge on discharge piping from each air compressor and on each receiver. Comply with requirements in Section 220500 "Common Work Results for Plumbing."

M. Install piping to permit valve servicing.

N. Install piping free of sags and bends.

O. Install fittings for changes in direction and branch connections.

P. Install seismic restraints on piping. Seismic-restraint devices are specified in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

Q. Install sleeves for piping penetrations of walls, ceilings, and floors. Comply with requirements for sleeves specified in Section 220500 "Common Work Results for Plumbing."

R. Install sleeve seals for piping penetrations of concrete walls and slabs. Comply with requirements for sleeve seals specified in Section 220500 "Common Work Results for Plumbing."

S. Install escutcheons for piping penetrations of walls, ceilings, and floors. Comply with requirements for escutcheons specified in Section 220500 "Common Work Results for Plumbing."

3.4 INSTALLATION OF ALUMINUM PIPING SYSTEMS

A. Install aluminum piping systems in accordance with manufacturer's written instructions, using manufacturer's recommended tools, accessories, and methods.

B. Install branch connections [**NPS 2-1/2 (DN 65)**][**73 mm**] and larger, to compressed-air mains from top of main. Provide drain leg and drain trap at end of each main and branch and at low points.

C. Install branch connections [**NPS 2 (DN 50)**][**63 mm**] and smaller, to compressed-air mains using aluminum piping system reducing outlet tee with water trapping capabilities. Provide drain leg and drain trap at end of each main and branch and at low points.

D. Support aluminum pipe using manufacturer's hangers and supports, designed for use with the system.

E. Allow for expansion and contraction of aluminum piping system.

F. Do not use plastic components or plastic fittings of any kind within pressurized aluminum piping system. This limitation applies to main headers, branches, and drops.

3.5 JOINT CONSTRUCTION

A. Ream ends of pipes and tubes and remove burrs. Bevel plain ends of steel pipe.

B. Remove scale, slag, dirt, and debris from inside and outside of pipe and fittings before assembly.

C. Threaded Joints: Thread pipe with tapered pipe threads in accordance with ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and restore full ID. Join pipe fittings and valves as follows:

1. Apply appropriate tape or thread compound to external pipe threads unless dry seal threading is specified.
2. Damaged Threads: Do not use pipe or pipe fittings with threads that are corroded or damaged. Do not use pipe sections that have cracked or open welds.

D. Welded Joints for Steel Piping: Join in accordance with AWS D10.12/D10.12M.

E. Brazed Joints for Copper Tubing: Join in accordance with AWS's "Brazing Handbook," "Pipe and Tube" Chapter.

F. Soldered Joints: Apply ASTM B813, water-flushable flux, unless otherwise indicated, to tube end. Join in accordance with ASTM B828 or CDA's "Copper Tube Handbook."

G. Extruded-Tee Outlets for Copper Tubing: Form branches in accordance with ASTM F2014, with tools recommended by procedure manufacturer, and using operators qualified in accordance with "Quality Assurance" Article.

H. Flanged Joints: Use asbestos-free, nonmetallic gasket suitable for compressed air. Join flanges with gasket and bolts in accordance with ASME B31.9 for bolting procedure.

I. Grooved Joints: Assemble couplings with housing, gasket, lubricant, and bolts. Join in accordance with AWWA C606 for grooved joints. Do not apply lubricant to prelubricated gaskets.

J. Heat-Fusion Joints for PE Piping: Clean and dry joining surfaces by wiping with clean cloth or paper

towels. Join in accordance with ASTM D2657 for socket-fusion joints.

K. Press-Sealed Joints: Join with tools recommended by fitting manufacturer, using operators qualified in accordance with "Quality Assurance" Article.

L. Solvent-Cemented Joints for ABS Piping: Clean and dry joining surfaces. Join according to the following:

1. Comply with ASTM F402 for safe-handling practice of cleaners, primers, and solvent cements.
2. Join in accordance with ASME B31.9 for solvent-cemented joints and with ASTM D2235 Appendix.

M. Dissimilar Metal Piping Material Joints: Use dielectric fittings.

3.6 INSTALLATION OF VALVES

A. General-Duty Valves: Comply with requirements in Section 220523 "General-Duty Valves for Plumbing Piping."

3.7 INSTALLATION OF DIELECTRIC FITTINGS

A. Install dielectric fittings in piping at connections of dissimilar metal piping and tubing.

B. NPS 2 (DN 50) and Smaller: Use dielectric unions.

C. NPS 2-1/2 to NPS 4 (DN 65 to DN 100): Use dielectric flanges.

D. NPS 5 (DN 125) and Larger: Use dielectric flange kits.

3.8 INSTALLATION OF FLEXIBLE PIPE CONNECTORS

A. Install flexible pipe connectors in discharge piping[**and in inlet air piping from remote air-inlet filter**] of each air compressor.

B. Install bronze-hose flexible pipe connectors in copper compressed-air tubing.

C. Install stainless steel-hose flexible pipe connectors in steel compressed-air piping.

3.9 INSTALLATION OF SPECIALTIES

A. Install safety valves on receivers in quantity and size to relieve at least the capacity of connected air compressors.

B. Install air-main pressure regulators in compressed-air piping at or near air compressors.

C. Install air-line pressure regulators in branch piping to equipment[**and tools**].

D. Install mechanical filters in compressed-air piping at or near air compressors and downstream from coalescing filters.[**Mount on wall at locations indicated.**]

E. Install air-line lubricators in branch piping to machine tools.[**Mount on wall at locations indicated.**]

F. Install quick couplings at piping terminals for hose connections.

G. Install hose assemblies at hose connections.

3.10 PIPING CONNECTIONS

A. Install unions, in piping **NPS 2 (DN 50)** and smaller, adjacent to each valve and at final connection to each piece of equipment and machine.

B. Install flanges, in piping **NPS 2-1/2 (DN 65)** and larger, adjacent to flanged valves and at final connection to each piece of equipment and machine.

3.11 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with requirements for seismic-restraint devices specified in Section 230548 "Vibration and Seismic Controls for HVAC."

B. Comply with requirements in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment" for hangers, supports, and anchor devices.

C. Install hangers for [**copper tubing**][**and**][**steel piping**], with maximum horizontal spacing and minimum rod diameters, to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

D. Install hangers for [**ABS**][**HDPE**][**aluminum**] piping, with maximum horizontal spacing and minimum rod diameters, to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

E. Support horizontal piping within [**12 inches (300 mm)**]<**Insert dimension**> of each fitting and coupling.

F. Support vertical runs of [**copper tubing**][**and**][**steel piping**] to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

G. Support vertical runs of [**ABS**][**HDPE**][**aluminum**] piping to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

H. Individual, Straight, Horizontal Piping Runs:

1. 100 Ft. (30 m) or Less: MSS Type 1, adjustable, steel clevis hangers.
2. Longer Than 100 Ft. (30 m): MSS Type 43, adjustable roller hangers.

I. Multiple, Straight, Horizontal Piping Runs 100 Ft. (30 m) or Longer: MSS Type 44, pipe rolls. Support pipe rolls on trapeze.

J. Base of Vertical Piping: MSS Type 52, spring hangers.

K. Install vinyl-coated hangers for [**ABS**][**HDPE**] piping.

3.12 LABELING AND IDENTIFICATION

A. Install identifying labels and devices for general-service compressed-air piping, valves, and specialties. Comply with requirements in Section 220553 "Identification for Plumbing Piping and Equipment."

3.13 FIELD QUALITY CONTROL

A. Perform field tests and inspections.

B. Tests and Inspections:

1. Piping Leak Tests for Metal Compressed-Air Piping: Test new and modified parts of existing piping. Cap and fill general-service compressed-air piping with oil-free dry air or gaseous nitrogen to pressure of **50 psig (345 kPa)** above system operating pressure, but not less than [**150 psig (1035 kPa)**]<**Insert pressure**>. Isolate test source and let stand for four hours to equalize temperature. Refill system, if required, to test pressure; hold for two hours with no drop in pressure.
2. Piping Leak Tests for Aluminum Compressed-Air Piping: Test new piping system and modified parts of existing piping system. Cap and fill general-service compressed-air piping system to pressure of **15 psig (105 kPa)**, hold pressure for 10 minutes. Repeat until reaching required operating pressure, not to exceed **220 psig (1515 kPa)**. Once desired operating pressure is met, let stand for one hour.
3. Piping Leak Tests for ABS Compressed-Air Piping: Test new and modified parts of existing piping. Cap and fill general-service compressed-air piping with oil-free dry air or gaseous nitrogen, at temperature of **110 deg F (43 deg C)** or less, to pressure of [**40 psig (275 kPa)**]<**Insert pressure**> above system operating pressure, but not less than [**80 psig (550 kPa)**][**100 psig (690 kPa)**]<**Insert pressure**> or more than **120 psig (825 kPa)**. Isolate test source and let stand for four hours to equalize temperature. Refill system, if required, to test pressure; hold for two hours with no drop in pressure.
4. Piping Leak Tests for HDPE Compressed-Air Piping: Test new and modified parts of existing piping. Cap and fill general-service compressed-air piping with oil-free dry air or gaseous nitrogen, at temperature of **100 deg F (38 deg C)** or less, to pressure of [**40 psig (275 kPa)**]<**Insert pressure**> above system operating pressure, but not less than [**100 psig (690 kPa)**][**125 psig (860 kPa)**][**150 psig (1035 kPa)**]<**Insert pressure**> or more than **180 psig (1240 kPa)**. Isolate test source and let stand for four hours to equalize temperature. Refill system, if required, to test pressure; hold for two hours with no drop in pressure.
5. Repair leaks and retest until no leaks exist.
6. Inspect [**filters**][**lubricators**][**and**][**pressure regulators**] for proper operation.

C. Prepare test and inspection reports.

END OF SECTION 22 11 16 00A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 11 16 00B - GAS PIPING FOR LABORATORY AND HEALTHCARE FACILITIES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Pipes, tubes, and fittings.
2. Shape-memory-metal couplings.
3. Corrugated medical tubing (CMT) - copper.
4. Joining materials.
5. Zone valve box assemblies.
6. Ball valves.
7. Check valves.
8. Emergency oxygen connections.
9. Gas safety valves.
10. Pressure regulators.
11. Gas-service connections.
12. Patient-service consoles.
13. Nitrogen pressure-control panels.
14. Ceiling columns.
15. Gas manifolds.
16. Simplex specialty gas manifolds.
17. Duplex specialty gas manifolds.
18. Bulk medical gas storage tanks.
19. Gas cylinder storage racks.

B. Owner-Furnished Material:

1. Patient-service consoles.
2. Ceiling columns.
3. Gas manifolds.
4. Bulk medical gas storage tanks.
5. <**Insert product**>.
6. Owner will furnish gases for [**medical**][**laboratory**] gas concentration testing specified in this Section.

C. Related Requirements:

1. Section 018123 "Facility Seismic and Wind Criteria" for building seismic criteria.
2. Section 115313 "Laboratory Fume Hoods" for gas outlets in laboratory fume hoods.
3. Section 123553.13 "Metal Laboratory Casework" for gas outlets in laboratory fume hoods.
4. Section 123553.16 "Plastic-Laminate-Clad Laboratory Casework" for gas outlets in plastic-laminate-clad laboratory casework.
5. Section 123553.19 "Wood Laboratory Casework" for gas outlets in laboratory casework.
6. Section 123570 "Healthcare Casework" for gas outlets in medical casework.
7. Section 220963 "Medical Gas Alarms" for combined medical air, vacuum, and gas alarms.

1.2 DEFINITIONS

A. CR: Chlorosulfonated polyethylene synthetic rubber.

B. D.I.S.S.: Diameter-Index Safety System.

C. Medical gas piping systems include medical carbon dioxide, medical helium, medical nitrogen, medical nitrous oxide, and medical oxygen <**Insert other medical and combination gases**> for healthcare facility patient care.

D. Laboratory gas piping systems include carbon dioxide, helium, nitrogen, nitrous oxide, and oxygen <**Insert other medical and combination gases**> for laboratories.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings: Include diagrams for power, signal, and control wiring.

1.4 INFORMATIONAL SUBMITTALS

A. Qualification Data: For [**Installer**][**and**][**testing agency**].

B. Seismic Qualification Data: Certificates, for [**gas manifolds**][**and**][**bulk gas storage tanks**], from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

C. Material Certificates: Signed by Installer, certifying that medical gas piping materials comply with requirements in NFPA 99 for positive-pressure medical gas systems.

D. Brazing certificates.

E. Field quality control reports.

F. Source Quality Control Reports:

1. Certificates of Shop Inspection and Data Report for Bulk Gas Storage Tanks: As required by ASME Boiler and Pressure Vessel Code.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For [**medical**][**and**][**specialty**] gas piping specialties to include in emergency, operation, and maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Quick-Coupler Service Connections: Furnish complete noninterchangeable medical gas-pressure outlets and suction inlets.

    a. Medical Carbon Dioxide: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    b. Medical Nitrous Oxide: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    c. Medical Oxygen: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    d. <**Insert medical gas**>. Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    e. Laboratory Carbon Dioxide: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    f. Laboratory Nitrous Oxide: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    g. Laboratory Oxygen: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    h. <**Insert laboratory gas**>. Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.

2. D.I.S.S. Service Connections: Furnish complete medical gas pressure outlets and suction inlets complying with CGA V-5.

    a. Medical Carbon Dioxide D.I.S.S. No. 1080: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    b. Medical Helium D.I.S.S. No. 1060: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    c. Medical Nitrogen D.I.S.S. No. 1120: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    d. Medical Nitrous Oxide D.I.S.S. No. 1040: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    e. Medical Oxygen D.I.S.S. No. 1240: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    f. <**Insert medical gas and D.I.S.S. No.**>. Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    g. Laboratory Carbon Dioxide D.I.S.S. No. 1080: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    h. Laboratory Helium D.I.S.S. No. 1060: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    i. Laboratory Nitrogen D.I.S.S. No. 1120: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    j. Laboratory Nitrous Oxide D.I.S.S. No. 1040: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    k. Laboratory Oxygen D.I.S.S. No. 1240: Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.
    l. <**Insert laboratory gas and D.I.S.S. No.**>. Equal to <**Insert number**> percent of quantity installed, but no fewer than <**Insert number**> units.

1.7 QUALITY ASSURANCE

A. Installer Qualifications:

1. Medical Gas Piping Systems for Healthcare Facilities: In accordance with ASSE Standard #6010[**and NFPA 99**] for medical-gas-system installers.
2. Bulk Medical Gas Systems for Healthcare Facilities: In accordance with ASSE Standard #6015[

and NFPA 99] for bulk-medical-gas-system installers.

3. Shape-Memory-Metal Coupling Joints: An authorized representative who is trained and approved by manufacturer.

B. Testing Agency Qualifications: An independent testing agency, with the experience and capability to conduct the medical gas piping testing indicated, that is[**a member of the Medical Gas Professional Healthcare Organization or is**] an NRTL, and that is acceptable to authorities having jurisdiction.

1. Qualify testing personnel in accordance with ASSE Standard #6020[**and NFPA 99**] for medical-gas-system inspectors and ASSE Standard #6030 for medical-gas-system verifiers.

C. Brazing: Qualify processes and operators in accordance with ASME Boiler and Pressure Vessel Code, Section IX, "Welding and Brazing Qualifications," or AWS B2.2/B2.2M.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

A. [**Medical**][**and**][**laboratory**] carbon dioxide operating at [**50 to 55 psig (345 to 380 kPa)**]<**Insert values**>.

B. [**Medical**][**and**][**laboratory**] helium operating at [**50 to 55 psig (345 to 380 kPa)**]<**Insert values**>.

C. [**Medical**][**and**][**laboratory**] nitrogen operating at [**160 to 185 psig (1100 to 1275 kPa)**][**higher than 200 psig (1380 kPa)**]<**Insert values**>.

D. [**Medical**][**and**][**laboratory**] nitrous oxide operating at [**50 to 55 psig (345 to 380 kPa)**]<**Insert values**>.

E. [**Medical**][**and**][**laboratory**] oxygen operating at [**50 to 55 psig (345 to 380 kPa)**]<**Insert values**>.

F. Specialty <**Insert designation**> operating at [**50 to 55 psig (345 to 380 kPa)**]<**Insert values**>.

2.2 PERFORMANCE REQUIREMENTS

A. Seismic Performance: [**Gas manifolds**][**and**][**bulk gas storage tanks**] are to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**]<**Insert requirement**>.

1. The term "withstand" means "the [**gas manifolds**][**and**][**bulk gas storage tanks**] will remain in place without separation of any parts when subjected to the seismic forces specified[**and the manifolds and tanks will be fully operational after the seismic event**]."
2. Component Importance Factor is [**1.5**][**1.0**].
3. <**Insert requirements for Component Amplification Factor and Component Response Modification Factor**>.

B. Comply with NFPA 55

C. Comply with NFPA 99.

2.3 PIPES, TUBES, AND FITTINGS

A. For all [**medical**][**and**][**laboratory**] gases, all positive-pressure [**medical**][**and**][**laboratory**] gas piping, tubing, and fittings are to have been manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.

1. Each length of tubing is to be delivered plugged or capped by the manufacturer and kept sealed until prepared for installation.
2. Fittings and other components are to be delivered manufacturer sealed and labeled, and kept sealed until prepared for installation.

B. Copper Medical and Laboratory Gas Tube: ASTM B819, [**Type K**][**and**][**Type L**], seamless, drawn temper. Include standard color marking "OXY," "MED," "OXY/MED," "OXY/ACR," or "ACR/MED" in green for Type K tube and blue for Type L tube.

C. Wrought-Copper Fittings: ASME B16.22, solder-joint pressure type.

D. Copper Unions: ASME B16.22 or MSS SP-123, wrought-copper or cast-copper alloy.

E. Cast-Copper-Alloy Flanges: ASME B16.24, Class 150.

1. Pipe-Flange Gasket Materials: ASME B16.21, nonmetallic, flat, asbestos-free, **1/8-inch (3.2-mm)** maximum thickness, full-face type.
2. Flange Bolts and Nuts: ASME B18.2.1 carbon steel.

F. Shape-Memory-Metal Couplings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Aerofit, Inc**]
b. [**CAMERON; A Schlumber Co.**]
c. [**Motion Industries**]
d. [**Smart Tap; Smart Technology, Inc.**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Aerofit, Inc**]
b. [**CAMERON; A Schlumber Co.**]
c. [**Motion Industries**]
d. [**Smart Tap; Smart Technology, Inc.**]
e. <**Insert manufacturer's name**>

3. Description: Cryogenic compression fitting made of nickel-titanium, shape-memory alloy.

G. Corrugated Medical Tubing (CMT) - Copper:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**MediTrac; OmegaFlex Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**MediTrac; OmegaFlex Inc.**]
b. <**Insert manufacturer's name**>

3. Description: Corrugated medical tubing system including corrugated copper-alloy tubing and brass fittings equipped for direct connection to medical gas piping system components.
4. Standards:

a. UL Through-Penetration Ratings: W-L-1604 and C-AJ-1751.
b. UL Listed: MH64301 UL 1365.
c. Seismically qualified in accordance with ICC-ES AC156; testing protocol in accordance with ICC-ESR-4565.
d. NFPA 99.

5. Quality Certification: Certified to ISO 9001 and 13485:2016 Medical Device Standard.
6. Tubing: ASTM B103/B103M, copper alloy UNS C51000, seamless, corrugated flexible medical tubing.
7. Jacket: Low-density polyethylene.
8. Jacket Flame Spread/Smoke Developed Rating: 25/50, in accordance with ASTM E84.
9. Maximum Operating Pressure, Continuous Use: **185 psig (1275 kPa)**.
10. Test Pressure: **647.4 psig (4464 kPa)**, maximum.
11. Safety Factor: 3.5 times maximum operating pressure, in accordance with NFPA 99.
12. Maximum Operating Temperature, Continuous Use: **250 deg F (121 deg C)**.
13. Maximum Exposure Temperature: **1000 deg F (538 deg C)**, in accordance with NFPA 99.
14. Minimum Bend Radius:

a. **6 inches for 1/2-inch tubing (180 mm for 15-mm tubing)**.
b. **8 inches for 3/4-inch tubing (264 mm for 22-mm tubing)**.
c. **10 inches for 1-inch tubing (336 mm for 28-mm tubing)**.
d. **24 inches for 1-1/2-inch tubing (600 mm for 50-mm tubing)**.

15. Fitting: Brass axial swage fittings, NFPA 99 compliant, and cleaned in accordance with CGA G-4.1, including the following components:

a. Adaptor Material: CA360 brass.
b. Anti-Tamper Sleeve Material: 300 series stainless steel.
c. Non-Removable Threaded Axial Swaging Tool Material: CA360 brass.
d. Split Ring Material: Brass, stainless steel.
e. Jacket Lock Material: CA360 brass.
f. Rear Swage Sleeve Material: CA360 brass.
g. Treaded Driver Material: 300 series stainless steel.

2.4 JOINING MATERIALS

A. Brazing Filler Metals: AWS A5.8M/A5.8, BCuP Series, copper-phosphorus alloys.

B. Threaded-Joint Tape: PTFE.

2.5 VALVES

A. General Requirements for Valves: Manufacturer cleaned, purged, and bagged in accordance with CGA G-4.1 for oxygen service.

B. Zone Valve Box Assemblies: Box with medical gas valves, tube extensions, and gauges.

1. Steel Zone Valve Box with Aluminum Cover:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Amico Corporation**]
2) [**BeaconMedaes**]
3) [**CONCOA**]
4) [**Ohio Medical Corporation**]
5) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**Amico Corporation**]
2) [**BeaconMedaes**]
3) [**CONCOA**]
4) [**Ohio Medical Corporation**]
5) <**Insert manufacturer's name**>

c. Description: Formed-steel box with cover, anchors for recessed mounting, holes with grommets in box sides for tubing extension protection, and of size for single or multiple valves with pressure gauges and in sizes required to permit manual operation of valves.[**Medical air and medical vacuum tubing, valves, and gauges may be incorporated in zone valve boxes for medical gases.**]

1) Interior Finish: Factory-applied white enamel.
2) Cover Plate: Aluminum with frangible or removable windows.
3) Valve-Box Windows: Clear or tinted transparent plastic with labeling that includes rooms served, in accordance with NFPA 99.

d. Positive-Pressure Medical Gas Valves, for All Medical Gas Types:

1) Manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.
2) Delivered sealed and labeled and kept sealed until prepared for installation.

2. Steel Zone Valve Box with Stainless Steel Cover:

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1) [**Amico Corporation**]
2) [**BeaconMedaes**]

3) [**Ohio Medical Corporation**]
4) [**Tri-Tech Medical**]
5) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**Amico Corporation**]
2) [**BeaconMedaes**]
3) [**Ohio Medical Corporation**]
4) [**Tri-Tech Medical**]
5) <**Insert manufacturer's name**>

c. Description: Formed-steel box with cover, anchors for recessed mounting, holes with grommets in box sides for tubing extension protection, and of size for single or multiple valves with pressure gauges and in sizes required to permit manual operation of valves.[**Medical air and medical vacuum tubing, valves, and gauges may be incorporated in zone valve boxes for medical gases.**]

1) Interior Finish: Factory-applied white enamel.
2) Cover Plate: Stainless steel with frangible or removable windows.
3) Valve-Box Windows: Clear or tinted transparent plastic with labeling that includes rooms served, in accordance with NFPA 99.

d. Positive-Pressure Medical Gas Valves, for All Medical Gas Types:

1) Manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.
2) Delivered sealed and labeled and kept sealed until prepared for installation.

C. Ball Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Amico Corporation**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**BeaconMedaes**]
d. [**Marwin Valve; Richards Industries**]
e. [**NIBCO INC.**]
f. [**Ohio Medical Corporation**]
g. [**Tri-Tech Medical**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Amico Corporation**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**BeaconMedaes**]
d. [**Marwin Valve; Richards Industries**]

e. [**NIBCO INC.**]
f. [**Ohio Medical Corporation**]
g. [**Tri-Tech Medical**]
h. <**Insert manufacturer's name**>

3. Standard: MSS SP-110.
4. Description: Three-piece body, brass or bronze.
5. Pressure Rating: **300 psig (2070 kPa)** minimum.
6. Ball: Full-port, chrome-plated brass.
7. Seats: PTFE or TFE.
8. Handle: Lever[**type with locking device**].
9. Stem: Blowout proof with PTFE or TFE seal.
10. Ends: [**Manufacturer-installed ASTM B819, copper-tube extensions**][**and**][**manufacturer-installed ASTM B819, copper-tube extensions with pressure gauge on one copper-tube extension**].
11. Positive-Pressure Medical Gas Valves, for All Medical Gas Types:

    a. Manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.
    b. Delivered sealed and labeled and kept sealed until prepared for installation.

D. Check Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Amico Corporation**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**BeaconMedaes**]
    d. [**Marwin Valve; Richards Industries**]
    e. [**NIBCO INC.**]
    f. [**Ohio Medical Corporation**]
    g. [**Tri-Tech Medical**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Amico Corporation**]
    b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    c. [**BeaconMedaes**]
    d. [**Marwin Valve; Richards Industries**]
    e. [**NIBCO INC.**]
    f. [**Ohio Medical Corporation**]
    g. [**Tri-Tech Medical**]
    h. <**Insert manufacturer's name**>

3. Description: In-line pattern, bronze.
4. Pressure Rating: **300 psig (2070 kPa)** minimum.
5. Operation: Spring loaded.
6. Ends: Manufacturer-installed ASTM B819, copper-tube extensions.
7. Positive-Pressure Medical Gas Valves, for All Gas Types:

a. Manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.
b. Delivered sealed and labeled and kept sealed until prepared for installation.

E. Emergency Oxygen Connections: Low-pressure oxygen inlet assembly for connection to building oxygen piping systems.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Amico Corporation**]
b. [**BeaconMedaes**]
c. [**Ohio Medical Corporation**]
d. [**Tri-Tech Medical**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Amico Corporation**]
b. [**BeaconMedaes**]
c. [**Ohio Medical Corporation**]
d. [**Tri-Tech Medical**]
e. <**Insert manufacturer's name**>

3. Enclosure: Weatherproof hinged locking cover with caption similar to "Emergency Low-Pressure Gaseous Oxygen Inlet."
4. Inlet: Manufacturer-installed, **NPS 1 or NPS 1-1/4 (DN 25 or DN 32)**, ASTM B819, copper tubing with **NPS 1 (DN 25)** minimum ball valve.
5. Safety Valve: Bronze-body pressure-relief valve set at **75 or 80 psig (520 or 550 kPa)**.
6. Instrumentation: Pressure gauge.
7. Positive-Pressure Medical Gas Valves, for All Medical Gas Types:

a. Manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.
b. Delivered sealed and labeled and kept sealed until prepared for installation.

F. Gas Safety Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Amico Corporation**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**CEODEUX Meditec**]
d. [**UCSF Health Environment of Care**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**Amico Corporation**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**CEODEUX Meditec**]
d. [**UCSF Health Environment of Care**]
e. <**Insert manufacturer's name**>

3. Bronze body.
4. ASME-construction, poppet, pressure-relief type.
5. Settings to match system requirements.
6. Positive-Pressure Medical Gas Valves, for All Gas Types:

a. Manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.
b. Delivered sealed and labeled and kept sealed until prepared for installation.

G. Pressure Regulators:

1. [**Bronze**][**Stainless steel**] body and trim.
2. Spring-loaded, diaphragm-operated, relieving type.
3. Manual pressure-setting adjustment.
4. Rated for [**250-psig (1725-kPa)**]<**Insert value**> minimum inlet pressure.
5. Capable of controlling delivered gas pressure within **0.5 psig for each 10-psig (5.0 kPa for each 100-kPa)** inlet pressure.
6. Positive-Pressure Medical Gas Valves, for All Gas Types:

a. Valves are to be manufacturer cleaned, purged, and sealed for oxygen service, in accordance with CGA G-4.1.
b. Valves are to be delivered sealed and labeled and kept sealed until prepared for installation.

2.6 GAS-SERVICE CONNECTIONS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Amico Corporation**]
2. [**BeaconMedaes**]
3. [**Ohio Medical Corporation**]
4. [**Tri-Tech Medical**]
5. [**Western Enterprises**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Amico Corporation**]
2. [**BeaconMedaes**]
3. [**Ohio Medical Corporation**]
4. [**Tri-Tech Medical**]
5. [**Western Enterprises**]
6. <**Insert manufacturer's name**>

C. General Requirements for Medical and Laboratory Gas-Service Connections:

1. All positive-pressure gas-service connections, for all gas types, are to be manufacturer cleaned, purged, and sealed as for oxygen service in accordance with CGA G-4.1.
2. Suitable for specific gas pressure and suction service listed.
3. Include roughing-in assemblies, finishing assemblies, and cover plates.
4. Recessed-type units made for concealed piping unless otherwise indicated.

D. Roughing-in Assembly:

1. Steel outlet box for recessed mounting and concealed piping.
2. Brass-body outlet block with secondary check valve that will prevent gas flow when primary valve is removed.
3. Double seals that will prevent gas leakage.
4. ASTM B819, **NPS 3/8 (DN 10)** copper outlet tube brazed to valve with service marking and tube-end dust cap.

E. Finishing Assembly:

1. Brass housing with primary check valve.
2. Double seals that will prevent gas leakage.
3. Cover plate with gas-service label.

F. Quick-Coupler Pressure Service Connections: Outlets for [**carbon dioxide**][**nitrous oxide**][**and**][**oxygen**]<**Insert type of gas**> with noninterchangeable keyed indexing to prevent interchange between services, constructed to permit one-handed connection and removal of equipment, and with positive-locking ring that retains equipment stem in valve during use.

G. D.I.S.S. Pressure Service Connections: Outlets, complying with CGA V-5, with threaded indexing to prevent interchange between services, constructed to permit one-handed connection and removal of equipment.

1. Medical Carbon Dioxide: D.I.S.S. No. 1080.
2. Medical Helium: D.I.S.S. No. 1060.
3. Medical Nitrogen: D.I.S.S. No. 1120.
4. Medical Nitrous Oxide: D.I.S.S. No. 1040.
5. Medical Oxygen: D.I.S.S. No. 1240.
6. <**Insert medical gas**>. <**Insert D.I.S.S. No.**>.

H. Cover Plates: One piece, [**aluminum**][**or**][**stainless steel**] and permanent, color-coded, identifying label matching corresponding service.

2.7 PATIENT-SERVICE CONSOLES

A. Patient-Service Consoles :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Amico Corporation**]
b. [**BeaconMedaes**]
c. [**Tri-Tech Medical**]

d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Amico Corporation**]
   b. [**BeaconMedaes**]
   c. [**Tri-Tech Medical**]
   d. <**Insert manufacturer's name**>

3. Manufacturer cleaned, purged, and sealed, for all medical gas types, for oxygen service in accordance with CGA G-4.1.
4. Standard: UL 60601.
5. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
6. Mounting: [**Recessed**][**Semirecessed**][**Surface**].
7. General Requirements for Patient-Service Consoles: Wall units with service connections. Include labels indicating services as well as the following:

   a. Steel console box or mounting bracket.
   b. Concealed supplies.
   c. Cover: One piece, [**aluminum**][**plastic**][**or**][**stainless steel**] and permanent identifying label.
   d. Medical gas-service connections, as specified in "Gas-Service Connections" Article.

      1) Medical Oxygen: [**One**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1240**] pressure outlet(s).
      2) Medical Air: [**One**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1160**] quick-coupler pressure outlet(s).
      3) Medical Vacuum: [**One**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1220**] suction inlet(s).
      4) Medical Vacuum Bottle Bracket(s): [**One**]<**Insert number**>.

   e. Electrical Service Connections:

      1) General Requirements for Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.
      2) Power Outlets: UL 498, Hospital Grade, 125 V ac, [**single**][**duplex**] receptacle(s)[**; in color selected by Architect**]. Include the following configurations in accordance with NEMA WD 1:

         a) [**One**]<**Insert number**> L5-20R, locking type, 20 A, single or duplex.
         b) [**One**]<**Insert number**> L5-20R, isolated ground, locking type, 20 A, single or duplex.
         c) <**Insert outlet type**>.

      3) Electrical Accessory Outlets: Provide the following configured receptacles in color selected by Architect:

         a) Patient Equipment Ground Jack: [**One**]<**Insert number**>, single pole, 30 A.
         b) Patient Monitoring: [**One**]<**Insert number**>, single, [**five**][**and**][**37**]<**Insert number**> pin.
         c) <**Insert outlet type**>.

4) Outlet Cover Plates: One piece, [**aluminum**][**or**][**stainless steel**] and permanent identifying label.

2.8 NITROGEN PRESSURE-CONTROL PANELS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Allied Healthcare Products Inc.**]
2. [**Amico Corporation**]
3. [**BeaconMedaes**]
4. [**Ohio Medical Corporation**]
5. [**Tri-Tech Medical**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Allied Healthcare Products Inc.**]
2. [**Amico Corporation**]
3. [**BeaconMedaes**]
4. [**Ohio Medical Corporation**]
5. [**Tri-Tech Medical**]
6. <**Insert manufacturer's name**>

C. Description: Steel box and support brackets for recessed roughing-in, with stainless steel or anodized-aluminum cover plate with printed operating instructions.

D. Manifold: Assembly consisting of inlet supply valve, inlet supply pressure gauge, line-pressure control regulator, outlet supply pressure gauge, D.I.S.S. service connection, and piping outlet for remote service connection.

E. Minimum Working Pressure: [**200 psig (1380 kPa)**]<**Insert value**>.

F. Line-Pressure Control Regulator: Self-relieving diaphragm type with precision manual adjustment.

G. Pressure Gauges: **0 to 300 psig (0 to 2070 kPa)**.

H. Service Connection: CGA V-5, D.I.S.S. No. 1120, nitrogen outlet.

I. Before final assembly, provide temporary dust shield and U-tube for testing.

J. Label cover plate "Nitrogen Pressure Control."

K. Manufacturer cleaned, purged, and sealed, for all gas types, for oxygen service in accordance with CGA G-4.1.

2.9 CEILING COLUMNS

A. Ceiling Columns : [**Retractable**][**Stationary**].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Amico Corporation**]
    b. [**BeaconMedaes**]
    c. [**Ohio Medical Corporation**]
    d. [**Tri-Tech Medical**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Amico Corporation**]
    b. [**BeaconMedaes**]
    c. [**Ohio Medical Corporation**]
    d. [**Tri-Tech Medical**]
    e. <**Insert manufacturer's name**>

3. Description:

    a. Manually adjustable, using release and lock handles capable of locking column in all positions from fully retracted to fully extended; [**15-inch- (380-mm-)**]<**Insert dimension**> long, rectangular, counterbalanced, telescoping section with [**two**][**four**]<**Insert number**> double intravenous medication hooks; and [**36-inch- (915-mm-)**]<**Insert dimension**> long fixed column section. Include **0.078-inch- (2.0-mm-)** thick, stainless steel bottom plate with medical gas and electrical service connections as required.
    b. [**44-inch- (1120-mm-)**]<**Insert dimension**> long, rectangular stationary column section with [**two**][**four**]<**Insert number**> double intravenous medication hooks. Include **0.078-inch- (2.0-mm-)** thick, stainless steel bottom plate with medical gas and electrical service connections as required.
    c. Medical Gas-Service Connections: As specified in "Gas-Service Connections" Article. Include labels indicating services.

        1) Medical Carbon Dioxide: [**One**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1080**] pressure outlet(s).
        2) Medical Helium: [**One**]<**Insert number**> D.I.S.S. No. 1060 pressure outlet(s).
        3) Medical Nitrogen: [**One**]<**Insert number**> D.I.S.S. No. 1120 pressure outlet(s).
        4) Medical Nitrous Oxide: [**One**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1040**] pressure outlet(s).
        5) Medical Oxygen: [**Two**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1240**] pressure outlets.
        6) Instrument Air: [**One**]<**Insert number**> D.I.S.S. No. 1160 pressure outlet(s).
        7) Medical Air: [**One**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1160**] pressure outlet(s).
        8) Medical Vacuum: [**Two**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 1220**] suction inlets.
        9) Medical Vacuum Bottle Brackets: [**Two**]<**Insert number**>.
        10) WAGD: [**One**]<**Insert number**>[**quick-coupler**][**D.I.S.S. No. 2220**] suction inlet(s).
        11) <**Insert medical gas**>: <**Insert number and type**>.

    d. Standard: UL 60601.
    e. Manufacturer cleaned, purged, and sealed, for all medical gas type, for oxygen service in accordance with CGA G-4.1.

f. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.
g. Mounting: Ceiling-mounted units.
h. Ceiling-Mounted Plate: Manufacturer's standard plate or roughing-in assembly.
i. Exposed Surfaces: Minimum **0.0375-inch- (0.95-mm-)** thick stainless steel.
j. Servicing: Include access panels or means of removing shroud.
k. Blank cover plates for cutouts not having service connections.
l. ASTM B819, **NPS 3/8 (DN 10)** copper-tube extensions for connection to medical gas systems.
m. Service Connections: Type and number indicated.
n. Dust Covers: For medical gas-service connections.
o. Electrical Service Connections:

1) Power Outlets: UL 498, Hospital Grade, 125 V ac, [**single**][**duplex**] receptacle(s)[**; in color selected by Architect**]. Include the following configurations in accordance with NEMA WD 1:

a) [**One**][**Two**]<**Insert number**> L5-20R, locking type, 20 A, single or duplex.
b) [**One**][**Two**]<**Insert number**> L5-20R, isolated ground, locking type, 20 A, single or duplex.
c) [**One**][**Two**]<**Insert number**> explosion proof, 20 A, two pole, three wire, single; suitable for Class I, Group C hazardous location and interchangeable with receptacles used in nonhazardous areas; flush mounted.
d) [**One**][**Two**]<**Insert number**> 5-20R, straight blade, 20 A, duplex.
e) [**One**][**Two**]<**Insert number**> 5-20R, isolated ground, straight blade, 20 A, duplex.
f) <**Insert outlet type**>.

2) Electrical Accessory Outlets: Provide the following configured receptacles[**in color selected by Architect**]:

a) Patient Equipment Ground Jack: [**One**]<**Insert number**>, single pole, 30 A.
b) Patient Monitoring: [**One**]<**Insert number**>, single, [**five**][**and**][**37**]<**Insert number**> pin.
c) <**Insert outlet type**>.

3) Outlet Cover Plates: One piece, [**aluminum**][**or**][**stainless steel**] and permanent identifying label.

2.10 GAS MANIFOLDS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Acme Cryogenics**]
2. [**Amico Corporation**]
3. [**BeaconMedaes**]
4. [**Ohio Medical Corporation**]
5. [**Tri-Tech Medical**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Acme Cryogenics**]
2. [**Amico Corporation**]
3. [**BeaconMedaes**]
4. [**Ohio Medical Corporation**]
5. [**Tri-Tech Medical**]
6. <**Insert manufacturer's name**>

C. Manufacturer cleaned, purged, and sealed, for all medical gas type, for oxygen service in accordance with CGA G-4.1.

D. Comply with NFPA 99 for high-pressure medical gas cylinders.

E. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

F. Central Control-Panel Unit:

1. Weatherproof cabinet.
2. Supply and delivery pressure gauges.
3. Electrical alarm-system connections and transformer.
4. Indicator lights or devices.
5. Manifold connection.
6. Pressure changeover switch.
7. Line-pressure regulator.
8. Shutoff valves.
9. Safety valve.

G. Manifold and Headers:

1. Duplex, nonferrous-metal header for number of cylinders indicated, divided into two equal banks.
2. Designed for [**2000-psig (13.8-MPa)**]<**Insert value**> minimum inlet pressure, except nitrous oxide manifolds may be designed for [**800 psig (5520 kPa)**]<**Insert value**>, and carbon dioxide manifolds may be designed for [**1500 psig (10.35 MPa)**]<**Insert value**>.
3. Cylinder-bank headers with inlet (pigtail) connections complying with CGA V-1.
4. Individual inlet check valves, shutoff valve, pressure regulator, check valve, and pressure gauge.

H. Operation: Automatic, pressure-switch-activated changeover from one cylinder bank to the other when first bank becomes exhausted, without line-pressure fluctuation or resetting of regulators and without supply interruption by shutoff of either cylinder-bank header.

I. Mounting: [**Wall with mounting brackets for manifold control cabinet and headers**][**Floor with support legs for manifold control cabinet**].

J. Label manifold control unit with permanent label identifying medical gas type and system operating pressure.

K. Laboratory and Medical Carbon Dioxide Manifolds: For [**two**][**four**]<**Insert number**> cylinders and [**55-psig (380-kPa)**]<**Insert value**> line pressure.

L. Laboratory and Medical Helium Manifolds: For [**two**][**four**]<**Insert number**> cylinders and [**55-psig (380-kPa)**]<**Insert value**> line pressure.

M. Laboratory and Medical Nitrogen Manifolds: For [**eight**][**12**]<**Insert number**> cylinders and [**180-psig (1240-kPa)**][**higher than 200-psig (1380-kPa)**]<**Insert value**> line pressure.

N. Laboratory and Medical Nitrous Oxide Manifolds: For [**eight**][**12**]<**Insert number**> cylinders and [**55-**

psig (380-kPa)]<**Insert value**> line pressure, with electric heater or orifice design that will prevent freezing during high demand.

O. Laboratory and Medical Oxygen Manifolds: For [**12**][**20**]<**Insert number**> cylinders and [**55-psig (380-kPa)**]<**Insert value**> line pressure.

P. Laboratory and Medical Gas Cylinders: [**Furnished by Owner**][**Number and type of medical gas cylinders required for complete manifold systems**]<**Insert requirement**>.

2.11 SIMPLEX SPECIALTY GAS MANIFOLDS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Acme Cryogenics**]
2. [**Air Products and Chemicals, Inc.**]
3. [**Airgas; an Air Liquide company**]
4. [**BeaconMedaes**]
5. [**BOC Group, Inc.**]
6. [**CONCOA**]
7. [**GTS-Welco**]
8. [**Linde North America Inc**]
9. [**Matheson Tri-Gas, Inc.**]
10. [**Praxair Technology, Inc.**]
11. [**Spectra Gases, Inc.**]
12. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Acme Cryogenics**]
2. [**Air Products and Chemicals, Inc.**]
3. [**Airgas; an Air Liquide company**]
4. [**BeaconMedaes**]
5. [**BOC Group, Inc.**]
6. [**CONCOA**]
7. [**GTS-Welco**]
8. [**Linde North America Inc**]
9. [**Matheson Tri-Gas, Inc.**]
10. [**Praxair Technology, Inc.**]
11. [**Spectra Gases, Inc.**]
12. <**Insert manufacturer's name**>

C. Manufacturer cleaned, purged, and sealed, for all medical gas type, for oxygen service in accordance with CGA G-4.1.

D. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

E. Control-Panel Unit: Weatherproof cabinet, supply and delivery pressure gauges, electrical alarm-system connections and transformer, indicator lights or devices, manifold connection, line-pressure regulator, shutoff valves, and safety valve.

F. Manifold and Header: Nonferrous-metal header for number of cylinders indicated. Units include design for [**2000-psig (13.8-MPa)**]<**Insert value**> minimum inlet pressure, cylinder-bank header with inlet (pigtail) connections complying with CGA V-1, individual inlet check valves, shutoff valve, pressure regulator, check valve, and pressure gauge.

G. Mounting: [**Wall with mounting brackets for manifold control cabinet and header**][**Floor with support legs for manifold control cabinet**].

H. Label manifold control unit with permanent label identifying specialty gas type and system operating pressure.

I. Manifold: For <**Insert specialty gas**>; one cylinder and [**55-psig (380-kPa)**]<**Insert value**> line pressure, with electric heater or orifice design that will prevent freezing during high demand.

J. Specialty Gas Cylinders: [**Furnished by Owner**][**Number and type of specialty gas cylinders required for complete manifold systems**]<**Insert requirement**>.

2.12 DUPLEX SPECIALTY GAS MANIFOLDS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Acme Cryogenics**]
2. [**Air Liquide America Specialty Gases LLC**]
3. [**Air Products and Chemicals, Inc.**]
4. [**Airgas; an Air Liquide company**]
5. [**BeaconMedaes**]
6. [**BOC Group, Inc.**]
7. [**CONCOA**]
8. [**GTS-Welco**]
9. [**Linde North America Inc**]
10. [**Matheson Tri-Gas, Inc.**]
11. [**Praxair Technology, Inc.**]
12. [**Spectra Gases, Inc.**]
13. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Acme Cryogenics**]
2. [**Air Liquide America Specialty Gases LLC**]
3. [**Air Products and Chemicals, Inc.**]
4. [**Airgas; an Air Liquide company**]
5. [**BeaconMedaes**]
6. [**BOC Group, Inc.**]
7. [**CONCOA**]
8. [**GTS-Welco**]
9. [**Linde North America Inc**]
10. [**Matheson Tri-Gas, Inc.**]
11. [**Praxair Technology, Inc.**]
12. [**Spectra Gases, Inc.**]
13. <**Insert manufacturer's name**>

C. Manufacturer cleaned, purged, and sealed, for all gas types, for oxygen service in accordance with CGA

G-4.1.

D. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

E. Central Control-Panel Unit: Weatherproof cabinet, supply and delivery pressure gauges, electrical alarm-system connections and transformer, indicator lights or devices, manifold connection, line-pressure regulator, shutoff valves, and safety valve.

F. Manifold and Headers: Duplex, nonferrous-metal header for number of cylinders indicated, divided into two equal banks. Units include design for [**2000-psig (13.8-MPa)**]<**Insert value**> minimum inlet pressure, cylinder-bank headers with inlet (pigtail) connections complying with CGA V-1, individual inlet check valves, shutoff valve, pressure regulator, check valve, and pressure gauge.

G. Operation: Automatic, pressure-switch-activated changeover from one cylinder bank to the other when first bank becomes exhausted, without line-pressure fluctuation or resetting of regulators and without supply interruption by shutoff of either cylinder-bank header.

H. Mounting: [**Wall with mounting brackets for manifold control cabinet and headers**][**Floor with support legs for manifold control cabinet**].

I. Label manifold control unit with permanent label identifying specialty gas type and system operating pressure.

J. Manifold: For <**Insert specialty gas**>; two cylinders and [**55-psig (380-kPa)**]<**Insert value**> line pressure, with electric heater or orifice design that will prevent freezing during high demand.

K. Specialty Gas Cylinders: [**Furnished by Owner**][**Number and type of specialty gas cylinders required for complete manifold systems**]<**Insert requirement**>.

2.13 BULK MEDICAL GAS STORAGE TANKS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Acme Cryogenics**]
2. [**Chart Industries**]
3. [**Taylor-Wharton**]
4. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Acme Cryogenics**]
2. [**Chart Industries**]
3. [**Taylor-Wharton**]
4. <**Insert manufacturer's name**>

C. General Requirements for Bulk Medical Gas Storage Tanks:

1. Manufacturer cleaned, purged, and sealed, for all gas types, for oxygen service in accordance with CGA G-4.1.

2. Comply with ASME Boiler and Pressure Vessel Code, Section VIII, "Pressure Vessels," Division 1; and NFPA 99.
3. Include bulk storage tank with connections for alarm system, continuous supply, and reserve supply that will operate only during emergencies.
4. Controls: Include actuating switch for alarm-system connection and means for automatic actuating of reserve supply.
5. Bulk Gas Storage Tanks: Vertical mounted, double-wall construction with inner vessel fabricated in accordance with ASME Boiler and Pressure Vessel Code for unfired pressure vessels and suitable for gas service. Include insulation and vacuum seal between walls. Fabricate outer shell from carbon steel with factory-applied manufacturer's standard protective paint finish suitable for exterior installation. Include the following features, specialties, and components:

    a. Safety Valves: ASME construction with pressure setting to correspond to tank working pressure and as required for component or system being protected.
    b. Pressure Gauges: For tank pressure and facility service-line pressure.
    c. Contents Gauge: High- and low-level indicator with electric signal circuit connection.
    d. Drain Valves: For piping, inner vessel, and outer shell.
    e. Fill Assembly: Fill connection, piping, valves, relief devices, and controls.
    f. Facility Service Assembly: Piping, valves, relief devices, vaporizer, shutoff valve, pressure regulator, line shutoff valve or check valve, and reserve supply connection for connection to building service piping.
    g. Permanent label showing medical gas type, storage-tank capacity, tank pressure rating, vaporizer capacity, and operating instructions.

D. Liquid Oxygen Storage Tank:

1. Comply with NFPA 55 for bulk oxygen storage tanks.
2. Construction: Nickel-steel or stainless steel inner vessel with [**250-psig (1725-kPa)**]<**Insert value**> minimum working pressure.
3. Vaporizer Type: [**Electric**][**Steam**][**Ambient**].
4. Storage-Tank Capacity: [**As indicated**]<**Insert value**>.
5. Vaporizer Capacity: [**As indicated**]<**Insert value**>.

E. Oxygen Reserve Supply: Manifold header for high-pressure cylinders fabricated from copper-tube or brass pipe and fittings and suitable for pressures of up to [**4000 psig (27.6 MPa)**]<**Insert value**>. Include header inlet connections complying with CGA V-1, with individual inlet check valves, header shutoff valve, header pressure regulator, line shutoff valve or check valve, pressure gauge, and inlet connections for <**Insert number**> cylinders indicated.

F. Liquid Nitrous Oxide Storage Tank:

1. Comply with CGA G-8.1 for bulk nitrous oxide storage tanks.
2. Construction: Steel-alloy inner vessel with [**300-psig (2070-kPa)**]<**Insert value**> minimum working pressure.
3. Vaporizer Type: [**Electric**][**Steam**].
4. Storage Tank Capacity: [**As indicated**]<**Insert value**>.
5. Vaporizer Capacity: [**As indicated**]<**Insert value**>.

G. Nitrous Oxide Reserve Supply: Manifold header for high-pressure cylinders fabricated from copper-tube or brass pipe and fittings and suitable for pressures of up to [**4000 psig (27.6 MPa)**]<**Insert value**>. Include header inlet connections complying with CGA V-1, with individual inlet check valves, header shutoff valve, header pressure regulator, line shutoff valve or check valve, pressure gauge, inlet connections for <**Insert number**> cylinders indicated, and electric heater.

2.14 GAS CYLINDER STORAGE RACKS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Airgas; an Air Liquide company**]
2. [**RT Racking Systems**]
3. [**USA Safety**]
4. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Airgas; an Air Liquide company**]
2. [**RT Racking Systems**]
3. [**USA Safety**]
4. <**Insert manufacturer's name**>

C. Wall Storage Racks: Fabricate racks with chain restraints for upright cylinders, as indicated, or provide equivalent manufactured wall racks.

D. Freestanding Storage Racks: Fabricate racks as indicated, or provide equivalent manufactured storage racks.

E. Anchor holes in base to permit securing to the floor with anchor bolts supplied by the manufacturer.

F. Rack Support Tubing: Minimum **2-inch by 2-inch by 1/8-inch (50-mm by 50-mm by 3-mm)** tube steel finished with baked-on exterior grade polyurethane powder paint. All joints wrap-welded and polished.

G. Tank Restraints: Dual minimum **5/16-inch (8-mm)** steel welded link chain, electrically zinc-plated rated for **1900 lb (860 kg)** with minimum **5/16-inch (8-mm)** zinc-plated carabineer hooks rated for minimum **520 lb (235 kg)**.

H. Comply with NFPA 55.

I. Comply with NFPA 99.

J. Comply with OSHPD #OPA-2878-10.

PART 3 - EXECUTION

3.1 PREPARATION

A. Cleaning of Medical Gas Tubing: If manufacturer-cleaned and -capped fittings or tubing is not available or if precleaned fittings or tubing must be recleaned because of exposure, have supplier or separate agency acceptable to authorities having jurisdiction perform the following procedures:

1. Clean medical gas tube and fittings, valves, gauges, and other components of oil, grease, and other readily oxidizable materials as required for oxygen service in accordance with CGA G-4.1.
2. Wash medical gas tubing and components in hot, alkaline-cleaner-water solution of sodium carbonate or trisodium phosphate in proportion of **1 lb (0.453 kg)** of chemical to **3 gal. (11.3 L)** of

water.

a. Scrub to ensure complete cleaning.
b. Rinse with clean, hot water to remove cleaning solution.

3.2 EARTHWORK

A. Comply with requirements in Section 312000 "Earth Moving" for excavating, trenching, and backfilling and for underground warning tapes.

3.3 INSTALLATION OF PIPING

A. General Location and Arrangements: Drawing plans, schematics, and diagrams indicate general location and arrangement of gas piping. Indicated locations and arrangements were used to size pipe and calculate friction loss, expansion, and other design considerations. Install piping as indicated unless deviations to layout are approved on coordination drawings.

B. Comply with NFPA 99 for installation of medical gas piping.

C. Comply with NFPA 55 for installation of laboratory gas piping.

D. Install piping concealed from view and protected from physical contact by building occupants unless otherwise indicated and except in equipment rooms and service areas.

E. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

F. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal, and coordinate with other services occupying that space.

G. Install piping adjacent to equipment and specialties to allow service and maintenance.

H. Install nipples, unions, special fittings, and valves with pressure ratings same as or higher than system pressure rating used in applications specified in "Piping Schedule" Article unless otherwise indicated.

I. Install piping to permit valve servicing.

J. Install piping free of sags and bends.

K. Install fittings for changes in direction and for branch connections.

L. Install medical gas piping to medical gas-service connections specified in this Section, to medical gas-service connections in equipment specified in this Section, and to equipment specified in other Sections requiring medical gas service.

M. Install exterior, buried medical gas piping in protective conduit fabricated with PVC pipe and fittings. Do not extend conduit through foundation wall.

N. Piping Restraint Installation: Install seismic restraints on piping. Comply with requirements for seismic-restraint devices specified in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

O. Install medical gas-service connections recessed in walls. Attach roughing-in assembly to substrate;

attach finishing assembly to roughing-in assembly.

P. Connect gas piping to gas sources and to gas outlets and equipment requiring gas service.

Q. Install unions in copper tubing adjacent to each valve and at final connection to each specialty and piece of equipment.

R. Install sleeves for piping penetrations of walls, ceilings, and floors. Comply with requirements for sleeves specified in Section 220500 "Common Work Results for Plumbing."

S. Install sleeve seals for piping penetrations of concrete walls and slabs. Comply with requirements for sleeve seals specified in Section 220500 "Common Work Results for Plumbing."

T. Install escutcheons for piping penetrations of walls, ceilings, and floors. Comply with requirements for escutcheons specified in Section 220500 "Common Work Results for Plumbing."

U. Prepare tubing and install fittings using tools by product manufacturer.

3.4 INSTALLATION OF VALVES

A. Install shutoff valve at each connection to gas laboratory and healthcare equipment and specialties.

B. Install check valves to maintain correct direction of gas flow from laboratory and healthcare gas supplies.

C. Install valve boxes recessed in wall and anchored to substrate. Single boxes may be used for multiple valves that serve same area or function.

D. Install zone valves and gages in valve boxes. Arrange valves so largest valve is lowest. Rotate valves to angle that prevents closure of cover when valve is in closed position.

E. Install pressure regulators on gas piping where reduced pressure is required.

F. Install emergency oxygen connection with pressure-relief valve and full-size discharge piping to outside, with check valve downstream from pressure-relief valve, and with ball valve and check valve in supply main from bulk oxygen storage tank.

3.5 JOINT CONSTRUCTION

A. Ream ends of pipes and tubes and remove burrs.

B. Remove scale, slag, dirt, and debris from outside of cleaned tubing and fittings before assembly.

C. Threaded Joints: Apply appropriate tape to external pipe threads.

D. Brazed Joints: Join copper tube and fittings in accordance with CDA's "Copper Tube Handbook," Ch. "Brazed Joints." Do not use flux. Continuously purge joint with oil-free, dry nitrogen during brazing.

E. Shape-Memory-Metal Coupling Joints: Join new copper tube to existing tube in accordance with procedures developed by fitting manufacturer for installation of shape-memory-metal coupling joints.

F. Soldered Joints: Apply ASTM B813, water-flushable flux to tube end. Join copper tube and fittings in

accordance with ASTM B828.

G. Extruded-Tee Outlets: Form branches in copper tube in accordance with ASTM F2014, with tools recommended by tube manufacturer.

H. Flanged Joints:

1. Copper Tubing: Install flange on copper tubes. Use pipe-flange gasket between flanges. Join flanges with gasket and bolts in accordance with ASME B31.9 for bolting procedure.
2. PVC Piping: Install PVC flange on PVC pipes. Use pipe-flange gasket between flanges. Join flanges with gasket and bolts in accordance with ASME B31.9 for bolting procedure.

3.6 INSTALLATION OF GAS-SERVICE COMPONENTS

A. Assemble patient-service console with service connections. Install with supplies concealed in walls. Attach console box or mounting bracket to substrate.

B. Install nitrogen pressure-control panels in walls. Attach to substrate.

C. Assemble ceiling columns and install anchored to substrate. Provide structural steel, hanger rods, anchors, and fasteners in addition to components furnished with specialties necessary to fabricate supports.

D. Assemble ceiling-hose assemblies and install anchored to substrate. Provide structural steel, hanger rods, anchors, and fasteners in addition to components furnished with specialties necessary to fabricate supports.

E. Install gas manifolds[**on concrete base**] anchored to substrate.

F. Install gas cylinders and connect to manifold piping.

G. Install gas manifolds with seismic restraints.

H. Install bulk gas storage tanks and reserve supply tanks level on concrete bases. Set tanks and connect gas piping to tanks[**in accordance with applicable requirements in NFPA 55 for bulk oxygen storage systems**]. Install tanks level and plumb, firmly anchored to concrete bases; maintain NFPA 55 and tank manufacturer's recommended clearances. Orient tanks, so controls and devices are accessible for servicing.

I. Install bulk gas storage tanks and reserve supply tanks with seismic restraints.

3.7 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with requirements for seismic-restraint devices specified in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

B. Comply with requirements for hangers, supports, and anchor devices specified in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment."

C. Vertical Piping: MSS Type 8 or Type 42, clamps.

D. Individual, Straight, Horizontal Piping Runs:

1. 100 Feet (30 m) and Less: MSS Type 1, adjustable, steel, clevis hangers.
2. Longer Than 100 Feet (30 m): MSS Type 43, adjustable, roller hangers.

E. Multiple, Straight, Horizontal Piping Runs 100 Feet (30 m) or Longer: MSS Type 44 pipe rolls. Support pipe rolls on trapeze. Comply with requirements in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment" for trapeze hangers.

F. Base of Vertical Piping: MSS Type 52 spring hangers.

G. Install hangers for copper tubing with maximum horizontal spacing and minimum rod diameters to comply with MSS SP-58, NFPA 99, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

H. Support horizontal piping within [**12 inches (300 mm)**]<**Insert dimension**> of each fitting and coupling.

I. Support vertical runs of copper tubing to comply with MSS SP-58, NFPA 99, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

3.8 IDENTIFICATION

A. Install identifying labels and devices for specialty gas piping, valves, and specialties. Comply with requirements in Section 220553 "Identification for Plumbing Piping and Equipment."

B. Install identifying labels and devices for healthcare medical gas piping systems in accordance with NFPA 99. Use the following or similar captions and color-coding for piping products where required by NFPA 99:

1. Carbon Dioxide: Black or white letters on gray background.
2. Helium: White letters on brown background.
3. Nitrogen: White letters on black background.
4. Nitrous Oxide: White letters on blue background.
5. Oxygen: White letters on green background or green letters on white background.

3.9 FIELD QUALITY CONTROL FOR HEALTHCARE FACILITY MEDICAL GAS

A. Testing Agency:

1. Owner will engage a qualified testing agency to perform tests and inspections.
2. Engage a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].

D. Tests and Inspections:

1. Gas Piping Testing Coordination: Perform tests, inspections, verifications, and certification of medical gas piping systems concurrently with tests, inspections, and certification of [**medical compressed-air piping**][**and**][**medical vacuum piping**] systems.
2. Preparation: Perform the following Installer tests in accordance with requirements in NFPA 99 and ASSE Standard #6010:

a. Initial blowdown.
b. Initial pressure test.
c. Cross-connection test.
d. Piping purge test.
e. Standing pressure test for positive-pressure medical gas piping.
f. Standing pressure test for vacuum systems.
g. Repair leaks and retest until no leaks exist.

3. System Verification: Perform the following tests and inspections in accordance with NFPA 99, ASSE Standard #6020, and ASSE Standard #6030:

a. Standing pressure test.
b. [**Individual-pressurization**][**or**][**pressure-differential**] cross-connection test.
c. Valve test.
d. Master and area alarm tests.
e. Piping purge test.
f. Piping particulate test.
g. Piping purity test.
h. Final tie-in test.
i. Operational pressure test.
j. Gas concentration test.
k. Air-purity test.
l. Verify correct labeling of equipment and components.
m. Verify medical gas supply sources.

4. Testing Certification: Certify that specified tests, inspections, and procedures have been performed, and certify report results. Include the following:

a. Inspections performed.
b. Procedures, materials, and gases used.
c. Test methods used.
d. Results of tests.

E. Piping will be considered defective if it does not pass tests and inspections.

F. Prepare test and inspection reports.

3.10 FIELD QUALITY CONTROL FOR LABORATORY FACILITY SPECIALTY GAS

A. Testing Agency:

1. Owner will engage a qualified testing agency to perform tests and inspections.
2. Engage a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].

D. Tests and Inspections:

1. Piping Leak Tests for Specialty Gas Piping: Test new and modified parts of existing piping. Cap and fill specialty gas piping with oil-free, dry nitrogen to pressure of **50 psig (345 kPa)** above system operating pressure, but not less than [**150 psig (1035 kPa)**]<**Insert value**>. Isolate test source and let stand for four hours to equalize temperature. Refill system, if required, to test

pressure; hold for two hours with no drop in pressure.
2. Repair leaks and retest until no leaks exist.
3. Inspect specialty gas regulators for proper operation.

E. Piping will be considered defective if it does not pass tests and inspections.

F. Prepare test and inspection reports.

3.11 PROTECTION

A. Protect tubing from damage.

B. Retain sealing plugs in tubing, fittings, and specialties until installation.

C. Clean tubing not properly sealed, and where sealing is damaged, in accordance with "Preparation" Article.

3.12 DEMONSTRATION

A. [**Engage factory-authorized service representative to train**][**Train**] Owner's maintenance personnel to adjust, operate, and maintain bulk gas storage tanks.

3.13 PIPING SCHEDULE

A. Connect new tubing to existing tubing with memory-metal couplings.

B. Medical Gas Piping except Medical Nitrogen Piping Larger Than NPS 3 (DN 80) and Operating at More Than 185 psig (1275 kPa): Type L, copper tube; wrought-copper fittings; and brazed joints.

C. Medical Nitrogen Piping Larger Than NPS 3 (DN 80) and Operating at More Than 185 psig (1275 kPa): Type K, copper tube; wrought-copper fittings; and brazed joints.

D. Specialty Gas Piping except Specialty Gas Larger Than NPS 3 (DN 80) and Operating at More Than 185 psig (1275 kPa): Type L, copper tube; wrought-copper fittings; and brazed joints.

E. Specialty Gas Piping Larger Than NPS 3 (DN 80) and Operating at More Than 185 psig (1275 kPa): Type K, copper tube; wrought-copper fittings; and brazed joints.

F. Laboratory Gas Piping except Laboratory Nitrogen Piping NPS 3 (DN 80) and Smaller Operating at More Than 185 psig (1275 kPa): Type L, copper tube; wrought-copper fittings; and brazed joints.

G. Laboratory Nitrogen Piping NPS 3 (DN 80) and Smaller to Operate at More Than 185 psig (1275 kPa): Type K, copper tube; wrought-copper fittings; and brazed joints.

H. <**Insert specialty gas**>. Piping except Specialty Gas NPS 3 (DN 80) and Smaller to Operate at More Than 185 psig (1275 kPa): Type L, copper tube; wrought-copper fittings; and brazed joints.

I. <**Insert specialty gas**>. Piping NPS 3 (DN 80) and Smaller to Operate at More Than 185 psig (1275 kPa): Type K, copper tube; wrought-copper fittings; and brazed joints.

3.14 VALVE SCHEDULE

A. Shutoff Valves: Ball valve with manufacturer-installed ASTM B819, copper-tube extensions.

B. Zone Valves: Ball valve with manufacturer-installed ASTM B819, copper-tube extensions with pressure gauge on one copper-tube extension.

END OF SECTION 22 11 16 00B

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 11 16 00C - HYDRONIC PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Copper tube and fittings.
2. Steel pipe and fittings.
3. Stainless steel pipe and fittings.
4. Plastic pipe and fittings.
5. Fiberglass pipe and fittings.
6. Piping joining materials.
7. Transition fittings.
8. Dielectric fittings.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

B. Shop Drawings:

1. Show hydronic piping layouts, sizes and elevations, including connecting equipment, valves, specialty valves, fittings, strainers, air vents, expansion tanks, air/dirt separators/purgers, meters, expansion loops/expansion joints/anchors, and low point drains.
2. Show interface and spatial relationships between piping and equipment.
3. Shop Drawing Scale: [**1/4 inch equals 1 foot (1:50)**] .

C. Delegated Design Submittals:

1. Design calculations and detailed fabrication and assembly of pipe anchors and alignment guides, hangers and supports for multiple pipes, expansion joints and loops, and attachments of the same to the building structure.
2. Locations of pipe anchors, alignment guides, and expansion joints and loops.
3. Locations of and details for penetrations, including sleeves and sleeve seals for exterior walls, floors, basement, and foundation walls.
4. Locations of and details for penetration and firestopping for fire- and smoke-rated wall and floor and ceiling assemblies.

D. Sustainable Design Submittals:

1. Product Data: For adhesives, indicating VOC content.

2. Environmental Product Declaration (EPD): For each product.

3. Health Product Declaration (HPD): For each product.

4. Environmental Product Declaration (EPD): For each product.

5. Health Product Declaration (HPD): For each product.

6. Environmental Product Declaration (EPD): For each product.

7. Environmental Product Declaration (EPD): For each product.

8. Environmental Product Declaration (EPD): For each product.
9. Third-Party Certifications: For each product.
10. Third-Party-Certified Life-Cycle Assessment: For each product.

11. Product Data for Embodied Carbon Emissions: Indicating embodied carbon emissions, defined as GWP/unit times material amount used in Project.

12. Product Data for Cradle-to-Cradle Certification:

    a. Confirming Cradle-to-Cradle certification under Version 3.1, 4, or 4.1 at Bronze level. Submittal must contain inventory assessment completed to at least 0.1 percent (1000 ppm) and certification expiration.

    b. Confirming Cradle-to-Cradle certification under Version 3.1, 4, or 4.1 at Silver level or Material Health Silver Certificate. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and certification expiration.

    c. Confirming Cradle-to-Cradle certification under Version 3.1, 4, or 4.1 at Gold level or Material Health Gold Certificate. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and certification expiration.

13. Product Data for Health Product Declaration Compliance:

    a. Prechecked for LEED HPD with full ingredient inventory to at least 0.1 percent (1000 ppm) and proof of publication in HPD Repository Standard.

    b. HPD prechecked for LEED v4.1, Option 2, confirming that either no GreenScreen LT-1 hazards or no GHS Category 1 hazards are present in installed product. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and HPD expiration.

14. Product Data for Declare Certification:

    a. Confirming Declare certification under Version 2. Submittal must contain inventory assessment completed to at least 0.1 percent (1000 ppm) and certification expiration date.

    b. Confirming Declare certification Third-Party Verified and Red List Free or Red List Approved. Submittal must contain inventory assessment completed to at least 0.01 percent (100 ppm) and certification expiration date.

15. Product Data for Global Green Tag: Product Health Data (PhD) containing inventory assessment completed to at least 0.1 percent (1000 ppm) and certification expiration date.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Piping layout, or BIM model, drawn to scale, indicating the items described in this Section, and coordinated with all building trades.

B. Welding Certificates: For [**steel support**][**and**][**pipe**] welding.

C. Field Quality Control Reports: For specified tests and inspections.

D. Qualification Statements: For Installer.

1.4 QUALITY ASSURANCE

A. Installer Qualifications:

1. Installers of Pressure-Sealed Joints: Installers are to be certified by pressure-seal joint manufacturer as having been trained and qualified to join piping with pressure-seal pipe couplings and fittings.

2. Fiberglass Pipe and Fitting Installers: Installers of RTRF and RTRP are to be certified by manufacturer of pipes and fittings as having been trained and qualified to join fiberglass piping with manufacturer-recommended adhesive.

B. Steel Support Welding: Qualify procedures and personnel in accordance with AWS D1.1/D1.1M.

C. Pipe Welding: Qualify procedures and operators in accordance with ASME Boiler and Pressure Vessel Code: Section IX.

1. Comply with ASME B31.9 for materials, products, and installation.
2. Certify that each welder has passed AWS qualification tests for welding processes involved and that certification is current.

1.5 WARRANTY

A. PP-R and PP-RCT Manufacturer's Warranty: Manufacturer agrees to repair or replace PP-R and PP-RCT pipe and fittings that fail in materials or workmanship within 10 years from date of Substantial Completion.

1. Warranty is to cover labor and material costs of repairing and/or replacing defective materials and repairing any incidental damage caused by failure of the piping system due to defects in materials or manufacturing.
2. Warranty is to be in effect only upon submission by Contractor to manufacturer of valid pressure/leak documentation indicating that the system was tested and passed manufacturer's pressure/leak test and any other manufacturer requirements.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Hydronic piping components and installation are to be capable of withstanding the following minimum working pressures and temperatures unless otherwise indicated:

1. Hot-Water Heating Piping: [**100 psig (689 kPa)**] at [**200 deg F (93 deg C)**][**180 deg F (82 deg C)**].
2. Chilled-Water Piping: [**150 psig (1034 kPa)**] at [**73 deg F (22 deg C)**].
3. Dual-Temperature Heating- and Cooling-Water Piping: [**100 psig (1034 kPa)**] at [**180 deg F (82**

deg C)].
4. Condenser-Water Piping: [150 psig (1034 kPa)] at [73 deg F (66 deg C)].
5. Glycol Cooling-Water Piping: [150 psig (1034 kPa)] at [150 deg F (66 deg C)].
6. Makeup-Water Piping: [80 psig (552 kPa)][150 psig (1034 kPa)] at [73 deg F (22 deg C)][150 deg F (66 deg C)].
7. Condensate-Drain Piping: [150 deg F (66 deg C)][180 deg F (82 deg C)].
8. Air-Vent Piping: [180 deg F (82 deg C)][200 deg F (93 deg C)].
9. Pressure-Relief-Valve-Inlet and -Outlet Piping: Equal to the pressure of the piping system to which it is attached.

2.2 COPPER TUBE AND FITTINGS

A. Drawn-Temper Copper Tube:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Cambridge-Lee Industries, LLC**]
b. [**Cerro Flow Products, LLC**]
c. [**Mueller Streamline Co.; a company of Mueller Industries**]

2. Standard: [**ASTM B88, Type K (ASTM B88M, Type A)**][**and**][**ASTM B88, Type L (ASTM B88M, Type B)**] .

B. Annealed-Temper Copper Tube:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Cambridge-Lee Industries, LLC**]
b. [**Cerro Flow Products, LLC**]
c. [**Mueller Streamline Co.; a company of Mueller Industries**]

2. Standard: [**ASTM B88, Type K (ASTM B88M, Type A)**][**and**][**ASTM B88, Type L (ASTM B88M, Type B)**] .

C. DWV Copper Tube: ASTM B306, Type DWV.

D. Cast-Copper, Solder-Joint Fittings: ASME B16.18 pressure fittings. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

E. Wrought-Copper, Solder-Joint Fittings: ASME B16.22 pressure fittings. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
b. [**Mueller Streamline Co.; a company of Mueller Industries**]
c. [**NIBCO INC.**]

F. Bronze Flanges: ASME B16.24, Class 150, with solder-joint ends. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

G. Cast-Copper Unions: MSS SP-123, cast-copper-alloy, hexagonal-stock body, with ball-and-socket, metal-to-metal seating surfaces and solder-joint or threaded ends. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

H. Wrought-Copper Unions: ASME B16.22. Do not use solder joints on pipe sizes greater than **NPS 4 (DN 100)**.

I. Copper-Tube, Mechanically Formed Tee Fitting: For forming T-branch on copper water tube.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
b. [**T-DRILL Industries Inc**]

2. Description: Tee formed in copper tube in accordance with ASTM F2014.

J. Grooved, Mechanical-Joint, Copper Tube Appurtenances:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**ASC Engineered Solutions**]
c. [**SCI; an ASC Engineered Solution**]
d. [**Shurjoint; a brand of Aalbert Integrated Piping Systems (Aalberts Industries)**]
e. [**Star Pipe Products**]
f. [**Victaulic Company**]

2. Source Limitations: Obtain grooved mechanical-joint copper tube appurtenances from single manufacturer.
3. Grooved-End Copper Fittings: **ASTM B75 (ASTM B75M)** copper tube or ASTM B584 bronze castings.
4. Grooved-End-Tube Couplings: To fit copper-tube dimensions; rigid pattern unless otherwise indicated; gasketed fitting EPDM gasket rated for minimum [**230 deg F (110 deg C)**] for use with ferrous housing, and steel bolts and nuts; **300 psig (2060 kPa)** minimum CWP pressure rating.

K. Copper-Tube, Pressure-Seal-Joint Fittings - Copper or Bronze:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
b. [**Copper Press Brand; Merit Brass Company**]
c. [**Elkhart Products Corporation; a part of Aalberts Integrated Piping Systems**]
d. [**FNW; Ferguson Enterprises, Inc.**]
e. [**Mueller Streamline Co.; a company of Mueller Industries**]
f. [**NIBCO INC.**]
g. [**Victaulic Company**]
h. [**Viega LLC**]

2. Source Limitations: Obtain copper-tube pressure-seal-joint fittings from single manufacturer.
3. Housing: Copper or bronze.
4. O-Rings and Pipe Stops: EPDM.
5. Tools: Manufacturer's special tools.
6. Minimum **200 psig (1370 kPa)** working pressure rating at **250 deg F (121 deg C)**.

2.3 STEEL PIPE AND FITTINGS

A. Steel Pipe: ASTM A53/A53M black steel with plain ends; welded and seamless, Grade B, and schedule number as indicated in Part 3,"Hydronic Piping Applications" Article.

B. Cast-Iron Threaded Fittings: ASME B16.4; Classes 125 and 250 as indicated in Part 3, "Hydronic Piping Applications" Article.

C. Malleable-Iron Threaded Fittings: ASME B16.3, Classes 150 and 300 as indicated in Part 3, "Hydronic Piping Applications" Article.

D. Malleable-Iron Unions: ASME B16.39; Classes 150, 250, and 300 as indicated in Part 3, "Hydronic Piping Applications" Article.

E. Cast-Iron Pipe Flanges and Flanged Fittings: ASME B16.1, Classes 25, 125, and 250; raised ground face, and bolt holes spot faced as indicated in "Hydronic Piping Applications" Article.

F. Wrought-Steel Fittings: ASTM A234/A234M; wall thickness to match adjoining pipe.

G. Cast- and Forged-Steel Flanges and Flanged Fittings: ASME B16.5, including bolts, nuts, and gaskets of the following material group, end connections, and facings:

1. Material Group: 1.1.
2. End Connections: Butt welding.
3. Facings: Raised face.

H. Grooved Mechanical-Joint Fittings and Couplings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]
c. [**ASC Engineered Solutions**]
d. [**GroovJoint**]
e. [**National Fittings, Inc**]
f. [**Nexus Valve, Inc.; Aalberts Hydronic Flow Control**]

g. [**SCI; an ASC Engineered Solution**]
h. [**Star Pipe Products**]
i. [**Victaulic Company**]

2. Source Limitations: Obtain grooved mechanical-joint fittings and couplings from single manufacturer.
3. Joint Fittings: ASTM A536, Grade 65-45-12 ductile iron; ASTM A47/A47M, Grade 32510 malleable iron; ASTM A53/A53M, Type F, E, or S, Grade B fabricated steel; or ASTM A106/A106M, Grade B steel fittings with grooves or shoulders constructed to accept grooved-end couplings; with nuts, bolts, locking pin, locking toggle, or lugs to secure grooved pipe and fittings.
4. Couplings: Ductile- or malleable-iron housing and [**EPDM**][**nitrile**] gasket of central cavity pressure-responsive design; with nuts, bolts, locking pin, locking toggle, or lugs to secure grooved pipe and fittings.

I. Plain-End Mechanical-Joint Couplings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**NormaGroup**]
c. [**Shurjoint; a brand of Aalbert Integrated Piping Systems (Aalberts Industries)**]
d. [**Victaulic Company**]

2. Source Limitations: Obtain plain-end mechanical-joint couplings from single manufacturer.
3. Housing: ASTM A536, Grade 65-45-12 segmented ductile iron or Type 304 stainless steel.
4. Housing coating: [**None**].
5. Gasket: [**EPDM**][**NBR**] .
6. Sealing Mechanism: Double-lip sealing system or carbon steel case-hardened jaws.
7. Bolts, hex nuts, washers, or lock bars based on manufacturer's design.
8. Minimum Pressure Rating: Equal to that of the joined pipes.

J. Steel Pipe Nipples: ASTM A733, made of same materials and wall thicknesses as pipe in which they are installed.

2.4 STAINLESS STEEL PIPE AND FITTINGS

A. Stainless Steel Pipe, Plain Ends: ASTM A312/A312M plain ends, seamless; stainless steel of types and schedules as indicated in Part 3 "Hydronic Piping Applications" Article.

B. Appurtenances for Grooved-End, Stainless Steel Pipe:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**ASC Engineered Solutions**]
c. [**National Fittings, Inc**]
d. [**Nexus Valve, Inc.; Aalberts Hydronic Flow Control**]

e. [**SCI; an ASC Engineered Solution**]
f. [**Shurjoint; a brand of Aalbert Integrated Piping Systems (Aalberts Industries)**]
g. [**Star Pipe Products**]
h. [**Victaulic Company**]

2. Source Limitations: Obtain appurtenances for grooved-end stainless steel pipe from single manufacturer.
3. Fittings for Grooved-End, Stainless Steel Pipe: Stainless steel casting with dimensions matching stainless steel pipe.

4. Mechanical Couplings for Grooved-End, Stainless Steel Pipe:

a. AWWA C606 for stainless steel pipe dimensions.
b. Stainless steel housing sections.
c. Stainless steel bolts and nuts.
d. EPDM gaskets suitable for hot and cold water.
e. Minimum Pressure Rating:

1) NPS 8 (DN 200) and Smaller: [**600 psig (4137 kPa)**].
2) NPS 10 to NPS 12 (DN 250 to DN 300): [**400 psig (2758 kPa)**].
3) NPS 14 to NPS 24 (DN 350 to DN 600): [**250 psig (1725 kPa)**].

C. Stainless Steel Piping, Pressure-Seal-Joint Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Anvil; an ASC Engineered Solution**]
b. [**GroovJoint**]
c. [**Merit Brass Company**]
d. [**SCI; an ASC Engineered Solution**]
e. [**Victaulic Company**]
f. [**Viega LLC**]

2. Source Limitations: Obtain stainless steel piping pressure-seal-joint fittings from single manufacturer.
3. Material: ASTM A312/A312M, Type 316, stainless steel, Schedule 10.
4. Fittings: Type O-Rings and Pipe Stop: EPDM.
5. Tools: Manufacturer's special tool.
6. Minimum **300 psig (2070 kPa)** working-pressure rating at **230 deg F (110 deg C)**.

2.5 PLASTIC PIPE AND FITTINGS

A. CPVC Plastic Pipe: ASTM F441/F441M, with wall thickness as indicated in "Hydronic Piping Applications" Article.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Charlotte Pipe and Foundry Company**]
b. [**IPEX USA LLC**]
c. [**Spears Manufacturing Company**]
d. [**Uponor Inc.**]

2. Source Limitations: Obtain CPVC plastic pipe from single manufacturer.

3. CPVC Socket Fittings: [**ASTM F438 for Schedule 40**][**and**][**ASTM F439 for Schedule 80**] .

4. CPVC Threaded Fittings: ASTM F437, Schedule 80.

5. CPVC Piping System: ASTM D2846/D2846M, SDR, pipe and socket fittings.

6. CPVC Tubing System: ASTM D2846/D2846M, SDR, tube and socket fittings.

B. PVC Plastic Pipe: ASTM D1785, with wall thickness as indicated in "Hydronic Piping Applications" Article.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Charlotte Pipe and Foundry Company**]
b. [**IPEX USA LLC**]
c. [**Spears Manufacturing Company**]

2. Source Limitations: Obtain PVC plastic pipe from single manufacturer.

3. PVC Socket Fittings: [**ASTM D2466 for Schedule 40**][**and**][**ASTM D2467 for Schedule 80**] .

4. PVC Schedule 80 Threaded Fittings: ASTM D2464.

C. Polypropylene (PP-R and PP-RCT) Pipe:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**aquatherm**]
b. [**Asahi/America**]
c. [**IPEX USA LLC**]
d. [**Nupi Americas**]
e. [**Uponor Inc.**]

2. Source Limitations: Obtain polypropylene (PP-R and PP-RCT) pipe from single manufacturer.
3. Description: ASTM F2389; pipe pressure rating to comply with temperature and pressure ratings of code requirements for the applicable service.

a. Polypropylene Fittings: ASTM F2389, socket fusion, butt fusion, electrofusion, or fusion outlet fittings to be used for fusion-welded joints between pipe and fittings.
b. Mechanical fittings and transition fittings to be used where transitions are made to other

piping materials or to valves and appurtenances.

c. Polypropylene pipe is to be unthreaded. Threaded transition fittings in accordance with ASTM F2389 to be used where a threaded connection is required.

D. Smoke and Fire Ratings:

1. Where indicated on Drawings that a plenum-rated piping system is required, the pipe is to be wrapped and/or insulated with fiberglass or mineral wool pipe insulation; field installed.

a. The system is to have a flame-spread classification of less than 25 and smoke-developed rating of less than 50.
b. Pipe, wrap, or insulation as a system to comply with the requirements of CAN/ULC-S102.2, ASTM E84, or UL 2846.
c. For insulation required for thermal and condensation conditions, see Section 230719 "HVAC Piping Insulation."

2.6 FIBERGLASS PIPE AND FITTINGS

A. RTRP: ASTM D2996, filament-wound pipe with tapered bell and spigot ends for adhesive joints.

B. RTRF: Compression or spray-up/contact molded of same material, pressure class, and joining method as pipe.

C. Flanges: ASTM D4024; full-face gaskets suitable for the service, minimum **1/8-inch (3.2-mm)** thick, 60-70 durometer. Provide ASTM A307, Grade B, hex head bolts with washers.

2.7 PIPING JOINING MATERIALS

A. Pipe-Flange Gasket Materials: Suitable for chemical and thermal conditions of piping system contents.

1. ASME B16.21, nonmetallic, flat, asbestos free, **1/8-inch (3.2-mm)** maximum thickness unless otherwise indicated.

a. Full-Face Type: For flat-face, Class 125, cast-iron and cast-bronze flanges.
b. Narrow-Face Type: For raised-face, Class 250, cast-iron and steel flanges.

B. Flange Bolts and Nuts: ASME B18.2.1, carbon steel, unless otherwise indicated.

C. Plastic, Pipe-Flange Gasket, Bolts, and Nuts: Type and material recommended by piping system manufacturer unless otherwise indicated.

D. Solder Filler Metals: ASTM B32, lead-free alloys.

E. Brazing Filler Metals: AWS A5.8/A5.8M, BCuP Series, copper-phosphorus alloys for joining copper with copper; or BAg-1, silver alloy for joining copper with bronze or steel.

F. Flux: ASTM B813, water flushable.

G. Welding Filler Metals: Comply with AWS D10.12M/D10.12 for welding materials appropriate for wall thickness and chemical analysis of steel pipe being welded.

H. Solvent Cements for CPVC Piping: ASTM F493.

1. Product Data: Verify CPVC welding solvent cement has a VOC content of 490 g/L or less.

2. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

3. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the recommended indoor exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

5. Verify adhesive complies with VOC emissions evaluation criteria.

I. Solvent Cements for PVC Piping: ASTM D2564. Include primer in accordance with ASTM F656.

1. Product Data:

   a. Verify PVC welding solvent cement has a VOC content of 510 g/L or less.
   b. Verify adhesive primer has a VOC content of 550 g/L or less.

2. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

3. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the recommended indoor exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

5. Verify adhesive complies with VOC emissions evaluation criteria.

6. Product Data: Verify adhesive primer complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

7. Product Data: Verify adhesive primer complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

8. Product Data: Verify adhesive primer complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended

exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

J. Fiberglass Pipe Adhesive: As furnished or recommended by pipe manufacturer.

1. Verify fiberglass adhesive has a VOC content of 80 g/L or less when calculated in accordance with 40 CFR 59, Subpart D (EPA Method 24).

2. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

3. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the recommended indoor exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

5. Verify adhesive complies with VOC emissions evaluation criteria.

2.8 TRANSITION FITTINGS

A. General Requirements:

1. Same size as pipes to be joined.
2. Pressure rating at least equal to pipes to be joined.
3. End connections compatible with pipes to be joined.

B. Fitting-Type Transition Couplings: Manufactured piping coupling or specified piping system fitting.

C. Plastic-to-Metal Transition Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Charlotte Pipe and Foundry Company**]
b. [**IPEX USA LLC**]
c. [**Uponor Inc.**]
d. [**Viega LLC**]

2. Source Limitations: Obtain plastic-to-metal transition fittings from single manufacturer.
3. Description: [**CPVC**][**PVC**] one-piece fitting with manufacturer's Schedule 80 equivalent dimensions.

a. End Connections: One end with threaded brass insert and one solvent-cement-socket [**or threaded**] end.

4. One-piece fitting with one threaded brass or copper insert and one solvent-cement-joint end of material and wall thickness to match plastic pipe material.

D. Plastic-to-Metal Transition Unions:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**aquatherm**]
   b. [**Charlotte Pipe and Foundry Company**]
   c. [**IPEX USA LLC**]
   d. [**NIBCO INC.**]
   e. [**Spears Manufacturing Company**]

2. Source Limitations: Obtain plastic-to-metal transition unions from single manufacturer.
3. Brass or copper end and solvent-cement-joint end of union to match pipe in size and material.
4. Description: [**CPVC**][**PVC**] four-part union.

   a. Threaded End: Brass [**or stainless steel**] .
   b. End Connections: Solvent-cement-joint [**or threaded**] plastic end.
   c. Gasket: Rubber O-ring.
   d. Union nut.

2.9 DIELECTRIC FITTINGS

A. General Requirements: Assembly of copper alloy and ferrous materials with separating nonconductive insulating material. Include end connections compatible with pipes to be joined.

B. Dielectric Unions:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**A.Y. McDonald Mfg. Co.**]
   b. [**Capitol Manufacturing Company**]
   c. [**GF Piping Systems**]
   d. [**HART Industrial Unions, LLC**]
   e. [**Jomar Valve**]
   f. [**Matco-Norca**]
   g. [**WATTS; A Watts Water Technologies Company**]
   h. [**Wilkins**]
   i. [**Zurn; Zurn Elkay**]

2. Source Limitations: Obtain dielectric unions from single manufacturer.
3. Standard: ASSE 1079.

4. Pressure Rating: [**125 psig (860 kPa) minimum at 180 deg F (82 deg C)**][**150 psig (1035 kPa)**][**250 psig (1725 kPa)**].
5. End Connections: Solder-joint copper alloy and threaded ferrous. Solder joints are not to be used

on pipe sizes greater than NPS 4 (DN 100).

C. Dielectric Flanges:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**ASC Engineered Solutions**]
   b. [**GF Piping Systems**]
   c. [**WATTS; A Watts Water Technologies Company**]
   d. [**Wilkins**]
   e. [**Zurn; Zurn Elkay**]

2. Source Limitations: Obtain dielectric flanges from single manufacturer.
3. Standard: ASSE 1079.
4. Description: Factory-fabricated, bolted, companion-flange assembly.
5. Pressure Rating: [**125 psig (860 kPa) minimum at 180 deg F (82 deg C)**][**150 psig (1035 kPa)**][**175 psig (1200 kPa)**][**300 psig (2070 kPa)**].
6. End Connections: Solder-joint copper alloy and threaded ferrous; threaded solder-joint copper alloy and threaded ferrous.

D. Dielectric-Flange Insulating Kits:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Advance Products & Systems, LLC**]
   b. [**CALPICO, Inc.**]
   c. [**GF Piping Systems**]
   d. [**GPT Industries, LLC.**]

2. Source Limitations: Obtain dielectric-flange insulating kits from single manufacturer.
3. Description: Nonconducting materials for field assembly of companion flanges.
4. Pressure Rating: [**150 psig (1035 kPa)**].
5. Gasket: Neoprene or phenolic.
6. Bolt Sleeves: Phenolic or polyethylene.
7. Washers: Phenolic with steel backing washers.

E. Dielectric Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Anvil; an ASC Engineered Solution**]
   b. [**Apollo Valves; a brand of Aalberts Integrated Piping Systems (Aalberts Industries)**]

c. [**Elster Perfection; Honeywell**]
d. [**GPT Industries, LLC.**]
e. [**Matco-Norca**]
f. [**Precision Plumbing Products**]
g. [**Sioux Chief Manufacturing Company, Inc.**]
h. [**Victaulic Company**]

2. Source Limitations: Obtain dielectric nipples from single manufacturer.
3. Standard: IAPMO PS 66.
4. Description: Electroplated steel nipple, complying with ASTM F1545.

5. Pressure Rating: Minimum [**300 psig (2070 kPa) at 225 deg F (107 deg C)**].
6. End Connections: Male threaded or grooved.
7. Lining: Inert and noncorrosive, propylene.

PART 3 - EXECUTION

3.1 HYDRONIC PIPING APPLICATIONS

A. Hot-Water Heating Piping, Aboveground, NPS 2 (DN 50) and Smaller, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [**Type K (Type A)**][**Type L (Type B)**], wrought-copper fittings; and [**soldered**][**brazed**][**pressure-seal**][**grooved mechanical**][**mechanically formed tee**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B; [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250, cast-iron**][**Class 300, malleable-iron**] fittings; and [**threaded**][**grooved mechanical**] joints.
3. Stainless Steel Pipe, Plain Ends:

    a. Schedule 5, [**Type 304**]; [**Type 316**]; stainless steel pressure-seal fittings; and pressure-seal joints.
    b. [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive joints.

B. Hot-Water Heating Piping, Aboveground, NPS 2-1/2 (DN 65) and Larger, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [**Type K (Type A)**][**Type L (Type B)**]; wrought-copper fittings; and [**soldered**][**brazed**][**grooved mechanical**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B; fittings and joints as follows:

    a. [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250 cast-iron**][**Class 300 malleable-iron**] fittings; welded joints, cast-iron flanges, flange-fittings, and flanged joints.
    b. Grooved mechanical joint coupling and fittings; and grooved mechanical joints.
    c. Plain-end mechanical joint couplings and fittings; and plain-end mechanical joints.

3. Stainless Steel Pipe, Plain Ends: [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.

C. Chilled-Water Piping, Aboveground, NPS 2 (DN 50) and Smaller, to be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)]; wrought-copper fittings; and [**soldered**][**brazed**][**pressure-seal**][**grooved mechanical**][**mechanically formed tee**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B; [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250, cast-iron**][**Class 300, malleable-iron**] fittings; and [**threaded**][**grooved mechanical**] joints.
3. Stainless Steel Pipe, Plain Ends:

    a. Schedule 5, [**Type 304**]; [**Type 316**]; stainless steel pressure-seal fittings; and pressure-seal joints.
    b. [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.
6. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.

D. Chilled-Water Piping, Aboveground, NPS 2-1/2 (DN 65) and Larger, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)]; wrought-copper fittings; and [**soldered**][**brazed**][**grooved mechanical**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B; [**wrought-steel fittings and wrought-cast or forged-steel flanges and flange fittings; and welded and flanged joints**][**grooved mechanical joint coupling and fittings; and grooved mechanical joints**][**plain-end mechanical joint coupling and fittings; and plain-end mechanical joints**] .
3. Stainless Steel Pipe, Plain Ends: [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved, mechanical joints.
4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.
6. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.

E. Dual-Temperature Heating- and Cooling-Water Piping, Aboveground, NPS 2 (DN 50) and Smaller, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)]; wrought-copper fittings; and [**soldered**][**brazed**][**pressure-seal**][**grooved mechanical**][**mechanically formed tee**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B; [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250, cast-iron**][**Class 300, malleable-iron**] fittings; and [**threaded**][**grooved mechanical**] joints.
3. Stainless Steel Pipe, Plain Ends:

    a. Schedule 5, [**Type 304**]; [**Type 316**] stainless steel pressure-seal couplings and fittings; and pressure-seal joints.
    b. [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.
6. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.

F. Dual-Temperature Heating and Cooling-Water Piping, Aboveground, NPS 2-1/2 (DN 65) and Larger, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)]; wrought-copper fittings; and

[**soldered**][**brazed**][**grooved mechanical**] joints.

2. Steel Pipe: [**Schedule 40**], Grade B; fittings and joints as follows:

    a. [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250 cast-iron**][**Class 300 malleable-iron**] fittings; welded joints, cast-iron flanges and flange-fittings; and flanged joints.
    b. Grooved mechanical joint coupling and fittings; and grooved mechanical joints.
    c. Plain-end mechanical joint couplings and fittings; and plain-end mechanical joints.

3. Stainless Steel Pipe, Plain Ends: [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.

G. Condenser-Water Piping, Aboveground, NPS 2 (DN 50) and Smaller, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [**Type K (Type A)**][**Type L (Type B)**], drawn-temper copper tubing, wrought-copper fittings, and [**soldered**][**brazed**][**pressure-seal**][**grooved mechanical**][**mechanically formed tee**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B, steel pipe; [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250 cast-iron**][**Class 300 malleable-iron**] , fittings; and [**threaded**][**grooved mechanical**] joints.
3. Stainless Steel Pipe, Plain Ends:

    a. Schedule 5, [**Type 304**]; [**Type 316**], stainless steel pressure-seal couplings and fittings; and pressure-seal joints.
    b. [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.
6. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive joints.

H. Condenser-Water Piping, Aboveground, NPS 2-1/2 (DN 65) and Larger, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [**Type K (Type A)**][**Type L (Type B)**]; wrought-copper fittings; and [**soldered**][**brazed**][**grooved mechanical**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B; fittings and joints as follows:

    a. [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250 cast-iron**][**Class 300 malleable-iron**] fittings; welded joints, cast-iron flanges and flange-fittings; and flanged joints.
    b. Grooved, mechanical joint coupling and fittings; and grooved mechanical joints.
    c. Plain-end mechanical joint coupling and fittings; and plain-end mechanical joints.

3. Stainless Steel Pipe, Plain Ends: [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
5. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.
6. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] piping and fittings with heat fusion joints.

I. Glycol Cooling-Water Piping, Aboveground, NPS 2 (DN 50) and Smaller, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)]; wrought-copper fittings; and [**soldered**][**brazed**][**pressure-seal**][**grooved mechanical**][**mechanically formed tee**] joints.
2. Steel Pipe: [**Schedule 40**]; [**Class 125, cast-iron**][**Class 150, malleable-iron**][**Class 250, cast-iron**][**Class 300, malleable-iron**] fittings; and threaded joints.
3. Stainless Steel Pipe, Plain Ends:

    a. Schedule 5, [**Type 304**]; [**Type 316**], stainless steel pressure-seal couplings and fittings; and pressure-seal joints.
    b. [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

4. CPVC Plastic Pipe: [**Schedule 40**], CPVC plastic pipe and fittings and solvent-welded joints.
5. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.
6. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.

J. Glycol Cooling-Water Piping, Aboveground, NPS 2-1/2 (DN 65) and Larger, to Be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)]; wrought-copper fittings; and [**soldered**][**brazed**][**grooved mechanical**] joints.
2. Steel Pipe: [**Schedule 40**], Grade B; [**wrought-steel fittings and wrought-cast or forged-steel flanges and flange fittings; and welded and flanged joints**][**grooved, mechanical joint coupling and fittings; and grooved mechanical joints**][**plain-end mechanical joint coupling and fittings; and plain-end mechanical joints**] .
3. Stainless Steel Pipe, Plain Ends: [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.
4. CPVC Plastic Pipe.
5. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive or flanged joints.
6. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.

K. Makeup-Water Piping Installed Aboveground to Be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)]; wrought-copper fittings; and [**soldered**][**brazed**][**pressure-seal**][**mechanical grooved**][**mechanically formed tee**] joints.
2. Stainless Steel Pipe:

    a. Schedule 5, [**Type 304**]; [**Type 316**], stainless steel pressure-seal couplings and fittings; and pressure-seal joints.
    b. [**Schedule 10**][**Schedule 40**], [**Type 304**]; [**Type 304**], grooved mechanical joint coupling and fittings; and grooved mechanical joints.

3. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
4. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.
5. Fiberglass Pipe and Fittings: RTRP and RTRF with adhesive joints.

L. Condensate-Drain Piping Installed Aboveground to Be Any of the Following:

1. Drawn-Temper Copper Tube: [Type K (Type A)][Type L (Type B)][**Type DWV**]; wrought-copper fittings; and [**soldered**][**brazed**][**pressure-seal**][**grooved mechanical**][**mechanically formed tee**] joints.
2. Stainless Steel Pipe, Plain Ends: Schedule 5, [**Type 304**]; [**Type 316**], stainless steel pressure-seal couplings and fittings; and pressure-seal joints.

3. CPVC Plastic Pipe: [**Schedule 40**]; CPVC plastic fittings; and solvent-welded joints.
4. Polypropylene (PP-R and PP-RCT) Pipe: [**PP-R**][**PP-RCP**] plastic piping and fittings with heat fusion joints.

M. Air-Vent Piping:

1. Inlet: Same as service where installed with metal-to-plastic transition fittings for plastic piping systems, in accordance with piping manufacturer's written instructions.
2. Outlet: **Type K (Type A)**, annealed-temper copper tubing with soldered or flared joints.

N. Pressure-Relief-Valve-Inlet and -Outlet Piping for Hot-Water Piping: Same materials and joining methods as for piping specified for the service in which safety valve is installed, with metal-to-plastic transition fittings for plastic piping systems, in accordance with piping manufacturer's written instructions.

3.2 INSTALLATION OF HYDRONIC PIPING

A. Requirements in this article apply to all piping materials, except where more specific requirements are specified in various pipe and fittings installation articles below.

B. Drawing plans, schematics, and diagrams indicate general location and arrangement of piping systems. Indicated locations and arrangements are used to size pipe and calculate friction loss, expansion, and other design considerations. Install piping as indicated unless deviations to layout are approved on coordination drawings.

C. Install piping in concealed locations unless otherwise indicated and except in equipment rooms and service areas.

D. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

E. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal.

F. Install piping to permit valve servicing.

G. Install piping at indicated slopes.

H. Install piping free of sags and bends.

I. Install fittings for changes in direction and branch connections.

J. Install piping to allow application of insulation.

K. Select system components with pressure rating equal to or greater than system operating pressure.

L. Install groups of pipes parallel to each other, spaced to permit applying insulation and servicing of valves.

M. Install drains, consisting of a tee fitting, **NPS 3/4 (DN 20)** ball valve, and short **NPS 3/4 (DN 20)** threaded nipple with cap, at low points in piping system mains and elsewhere as required for system drainage.

N. Install hydronic closed-loop piping at a uniform grade of 0.2 percent upward in direction of flow.

O. Install cooling coil condensate-drain piping at a minimum one percent downward slope, **1/8 inch per foot (10.4 mm per m)** horizontal run or as required by code whichever is more stringent.

P. Reduce pipe sizes using eccentric reducer fitting installed with level side up.

Q. Install branch connections to mains using [**mechanically formed**] tee fittings in main pipe, with the branch connected to the bottom of the main pipe. For up-feed risers, connect the branch to the top of the main pipe.

R. Install valves in accordance with Section 230523 "General-Duty Valves for HVAC Piping."

S. Install air vents and pressure-relief valves in accordance with Section 232116 "Hydronic Piping Specialties."

T. Install unions in piping, [**NPS 2 (DN 50)**] and smaller, adjacent to valves, at final connections of equipment, and elsewhere as indicated.

U. Install flanges in piping, [**NPS 2-1/2 (DN 65)**] and larger, at final connections of equipment and elsewhere as indicated.

V. Install shutoff valve immediately upstream of each dielectric fitting.

W. Comply with requirements in Section 230500 "Common Work Results for HVAC" for installation of expansion loops, expansion joints, anchors, and pipe alignment guides.

X. Comply with requirements in Section 230553 "Identification for HVAC Piping and Equipment" for identifying piping.

Y. Install sleeves for piping penetrations of walls, ceilings, and floors. Comply with requirements for sleeves specified in Section 230500 "Common Work Results for HVAC."

Z. Install sleeve seals for piping penetrations of concrete walls and slabs. Comply with requirements for sleeve seals specified in Section 230500 "Common Work Results for HVAC."

AA. Install escutcheons for piping penetrations of walls, ceilings, and floors. Comply with requirements for escutcheons specified in Section 230500 "Common Work Results for HVAC."

BB. Joint Construction, General:

1. Ream ends of pipes and tubes and remove burrs. Bevel plain ends of steel pipe.
2. Remove scale, slag, dirt, and debris from inside and outside of pipe and fittings before assembly.

3.3 INSTALLATION OF COPPER TUBE AND FITTINGS

A. Joint Construction:

1. Soldered Joints: Apply ASTM B813, water-flushable flux, unless otherwise indicated, to tube end. Construct joints in accordance with ASTM B828 or CDA's "Copper Tube Handbook," using lead-free solder alloy complying with ASTM B32.
2. Brazed Joints: Construct joints in accordance with AWS's "Brazing Handbook," "Pipe and Tube" chapter, using copper-phosphorus brazing filler metal complying with AWS A5.8/A5.8M.

3. Grooved Joints: Assemble joints with coupling and gasket, lubricant, and bolts. Cut or roll grooves

in ends of pipe based on pipe and coupling manufacturer's written instructions for pipe wall thickness. Use grooved-end fittings and rigid, grooved-end-pipe couplings

4. Mechanically Formed Tee Fittings: Use manufacturer-recommended tools, procedure, and brazed joints.

5. Pressure-Seal Joints: Use manufacturer-recommended tools and procedure. Leave insertion marks on pipe after assembly.

3.4 INSTALLATION OF STEEL PIPE AND FITTINGS

A. Joint Construction:

1. Threaded Joints: Thread pipe with tapered pipe threads in accordance with ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and restore full ID. Join pipe fittings and valves as follows:

   a. Apply appropriate tape or thread compound to external pipe threads unless dry seal threading is specified.
   b. Damaged Threads: Do not use pipe or pipe fittings with threads that are corroded or damaged. Do not use pipe sections that have cracked or open welds.

2. Welded Joints: Construct joints in accordance with AWS D10.12M/D10.12, using qualified processes and welding operators in accordance with "Quality Assurance" Article.
3. Flanged Joints: Select appropriate gasket material, size, type, and thickness for service application. Install gasket concentrically positioned. Use suitable lubricants on bolt threads.

4. Grooved Joints: Assemble joints with coupling and gasket, lubricant, and bolts. Cut or roll grooves in ends of pipe based on pipe and coupling manufacturer's written instructions for pipe wall thickness. Use grooved-end fittings and rigid, grooved-end-pipe couplings

5. Plain-End Mechanical-Coupled Joints: Prepare, assemble, and test joints in accordance with manufacturer's written installation instructions

3.5 INSTALLATION OF STAINLESS STEEL PIPE AND FITTINGS

A. Joint Construction:

1. Grooved Joints: Assemble joints with coupling and gasket, lubricant, and bolts. Cut or roll grooves in ends of pipe based on pipe and coupling manufacturer's written instructions for pipe wall thickness. Use grooved-end fittings and rigid, grooved-end-pipe couplings.

2. Pressure-Seal Joints: Use manufacturer-recommended tools and procedure. Leave insertion marks on pipe after assembly.

3.6 INSTALLATION OF PLASTIC PIPE AND FITTINGS

A. Plastic Piping Solvent-Cemented Joints: Clean and dry joining surfaces. Join pipe and fittings in accordance with the following:

1. Comply with ASTM F402 for safe-handling practice of cleaners, primers, and solvent cements.
2. CPVC Piping: Join in accordance with ASTM D2846/D2846M Appendix.

3. PVC Pressure Piping: Join ASTM D1785 schedule number, PVC pipe, and PVC socket fittings in accordance with ASTM D2672. Join other-than-schedule-number PVC pipe and socket fittings in accordance with ASTM D2855.
4. PVC Nonpressure Piping: Join in accordance with ASTM D2855.

3.7 INSTALLATION OF FIBERGLASS PIPE AND FITTINGS

A. Joint Construction:

1. Flanged Joints: Select appropriate gasket material, size, type, and thickness for service application. Install gasket concentrically positioned. Use suitable lubricants on bolt threads.
2. Fiberglass-Bonded Joints: Prepare pipe ends and fittings, apply adhesive, and join in accordance with pipe manufacturer's written instructions.

3.8 INSTALLATION OF DIELECTRIC FITTINGS

A. Install dielectric fittings in piping at connections of dissimilar metal piping and tubing.

1. Dielectric Unions: For [**NPS 2 (DN 50) and smaller**][**NPS 2-1/2 to NPS 4 (DN 65 to DN 100)**] .
2. Dielectric Flanges: For **NPS 2-1/2 to NPS 4 (DN 65 to DN 100)**.
3. Dielectric-Flange Insulating Kits: For [**NPS 2-1/2 to NPS 4 (DN 65 to DN 100)**][**NPS 5 (DN 125) and larger**] .

3.9 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with requirements for seismic-restraint devices specified in Section 230548 "Vibration and Seismic Controls for HVAC."

B. Comply with requirements in Section 230529 "Hangers and Supports for HVAC Piping and Equipment" for hangers, supports, and anchor devices.

C. Metal Tube or Pipe:

1. Install hangers for with maximum horizontal spacing and minimum rod diameters, to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.
2. Support vertical runs of metal tube or pipe to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

D. Plastic Pipe:

1. Install hangers for plastic piping, with maximum horizontal spacing and minimum rod diameters, to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.
2. Support vertical runs of plastic piping to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

E. Fiberglass Pipe:

1. Install hangers for fiberglass piping, with maximum horizontal spacing and minimum rod diameters, to comply with manufacturer's written instructions, locally enforced codes, and

authorities having jurisdiction requirements, whichever are most stringent.

2. Support vertical runs of fiberglass piping to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

F. Support horizontal piping within [**12 inches (300 mm)**] of each fitting and coupling.

3.10 TERMINAL EQUIPMENT CONNECTIONS

A. Sizes for supply and return piping connections are to be the same as or larger than equipment connections.

B. Install control valves in accessible locations close to connected equipment.

C. Install bypass piping with globe valve around control valve. If parallel control valves are installed, only one bypass is required.

D. Install ports for pressure gauges and thermometers at coil inlet and outlet connections. Comply with requirements in Section 230500 "Common Work Results for HVAC."

3.11 IDENTIFICATION

A. Identify system components. Comply with requirements for identification materials and installation in Section 230553 "Identification for HVAC Piping and Equipment."

3.12 SYSTEM STARTUP

A. System Startup Preparation: Perform the following before operating the system:

1. Open manual valves fully.
2. Inspect pumps for proper rotation.
3. Set makeup pressure-reducing valves for required system pressure.
4. Inspect air vents at high points of system and determine if all are installed and operating freely (automatic type), or bleed air completely (manual type).
5. Set temperature controls so all coils are calling for full flow.
6. Inspect and set operating temperatures of hydronic equipment, such as boilers, chillers, cooling towers, to specified values.
7. Verify lubrication of motors and bearings.

3.13 FIELD QUALITY CONTROL

A. Test Preparation: Prepare hydronic piping in accordance with ASME B31.9 and as follows:

1. Leave joints, including welds, uninsulated and exposed for examination during test.
2. Provide temporary restraints for expansion joints that cannot sustain reactions due to test pressure. If temporary restraints are impractical, isolate expansion joints from testing.
3. Flush hydronic piping systems with clean water; then remove and clean or replace strainer screens.
4. Isolate equipment from piping. If a valve is used to isolate equipment, its closure is to be capable of sealing against test pressure without damage to valve. Install blinds in flanged joints to isolate equipment.
5. Install pressure-relief valve, set at a pressure no more than one-third higher than test pressure, to

protect against damage by expanding liquid or other source of overpressure during test.

B. Piping Tests: Perform the following tests on hydronic piping:

1. Use ambient-temperature water as a testing medium unless there is risk of damage due to freezing. Another liquid that is safe for workers and compatible with piping may be used.
2. While filling system, use vents installed at high points of system to release air. Use drains installed at low points for complete draining of test liquid.
3. Isolate expansion tanks and determine that hydronic system is full of water.
4. Subject piping system to hydrostatic test pressure that is not less than 1.5 times the system's working pressure. Test pressure is not to exceed maximum pressure for any vessel, pump, valve, or other component in system under test. Verify that stress due to pressure at bottom of vertical runs does not exceed 90 percent of specified minimum yield strength or 1.7 times the "SE" value in Appendix A in ASME B31.9.
5. After hydrostatic test pressure has been applied for at least 10 minutes, examine piping, joints, and connections for leakage. Eliminate leaks by tightening, repairing, or replacing components, and repeat hydrostatic test until there are no leaks.
6. Prepare written report of testing.

END OF SECTION 22 11 16 00C

SECTION 22 11 16 00D - STEAM AND CONDENSATE PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Steel pipe and fittings.
2. Stainless steel pipe and fittings.
3. Fiberglass pipe and fittings.
4. Joining materials.

B. Related Requirements:

1. Section 232216 "Steam and Condensate Heating Piping Specialties" for strainers, flash tanks, special-duty valves, steam traps, thermostatic air vents and vacuum breakers, and steam and condensate meters.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings:

1. Show steam and steam condensate piping layouts, sizes, elevations, and piping slopes, including connecting equipment, valves, special-duty valves, fittings, strainers, air vents and vacuum breakers, flash tanks, steam pressure reducing valves, steam traps, steam meters, steam condensate meters, and expansion loops/expansion joints/anchors.
2. Show interface and spatial relationships between piping and equipment.
3. Shop Drawing Scale: [**1/4 inch equals 1 foot (1:50)**]<**Insert value**>.

C. Sustainable Design Submittals:

1. Product Data: For adhesives, mastics, and sealants, indicating VOC content.
2. Laboratory Test Reports: For adhesives and sealants, indicating compliance with requirements for low-emitting materials.
3. Environmental Product Declaration (EPD): For each product.
4. Health Product Declaration (HPD): For each product.
5. Environmental Product Declaration (EPD): For each product.
6. Health Product Declaration (HPD): For each product.
7. Environmental Product Declaration (EPD): For each product.
8. Environmental Product Declaration (EPD): For each product.
9. Environmental Product Declaration (EPD): For each product.
10. Third-Party Certifications: For each product.
11. Third-Party-Certified Life-Cycle Assessment: For each product.

D. Delegated Design Submittals:

1. Design calculations and detailed fabrication and assembly of pipe anchors and alignment guides, hangers and supports for multiple pipes, expansion joints and loops, and attachments of the

same to the building structure.
2. Locations of pipe anchors and alignment guides and expansion joints and loops.
3. Locations of and details for penetrations, including sleeves and sleeve seals for exterior walls, floors, basement, and foundation walls.
4. Locations of and details for penetration and firestopping for fire- and smoke-rated wall and floor and ceiling assemblies.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Piping layout, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Suspended ceiling components.
2. Other building services.
3. Structural members.

B. Qualification Data: For Installer.

C. Welding certificates.

D. Field quality control reports.

1.4 QUALITY ASSURANCE

A. Installer Qualifications:

1. Fiberglass Pipe and Fitting Installers: Installers of fiberglass pipe and fittings to be certified by the manufacturer of pipes and fittings as having been trained and qualified to join fiberglass piping with manufacturer-recommended adhesive.

B. Steel Support Welding: Qualify procedures and personnel in accordance with AWS D1.1/D1.1M, "Structural Welding Code - Steel."

C. Pipe Welding: Qualify procedures and operators in accordance with the following:

1. ASME Compliance: Comply with [**ASME B31.1, "Power Piping,"**][**and**][**ASME B31.9, "Building Services Piping,"**] for materials, products, and installation.
2. Certify that each welder has passed AWS qualification tests for welding processes involved and that certification is current.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Components and installation to be capable of withstanding the following minimum working pressures and temperatures unless otherwise indicated:

1. HP Steam Piping: <**Insert psig (kPa)**>.
2. LP Steam Piping: <**Insert psig (kPa)**>.
3. LP Clean Steam Piping: <**Insert psig (kPa)**>.

4. Condensate Piping: <**Insert psig (kPa)**> at [**250 deg F (121 deg C)**]<**Insert temperature**>.
5. Clean Steam Condensate Piping: <**Insert psig (kPa)**> at [**250 deg F (121 deg C)**]<**Insert temperature**>.
6. Makeup-Water Piping: [**80 psig (552 kPa)**][**150 psig (1034 kPa)**]<**Insert value**> at [**150 deg F (66 deg C)**]<**Insert temperature**>.
7. Blowdown-Drain Piping: Equal to pressure of the piping system to which it is attached.
8. Air-Vent and Vacuum-Breaker Piping: Equal to pressure of the piping system to which it is attached.
9. Safety-Valve-Inlet and -Outlet Piping: Equal to pressure of the piping system to which it is attached.

2.2 STEEL PIPE AND FITTINGS

A. Steel Pipe: ASTM A53/A53M, black steel, plain ends, welded and seamless, Grade B, and Schedule as indicated in piping applications articles.

B. Cast-Iron Threaded Fittings: ASME B16.4; Classes 125, 150, and 300 as indicated in piping applications articles.

C. Malleable-Iron Threaded Fittings: ASME B16.3; Classes 150 and 300 as indicated in piping applications articles.

D. Malleable-Iron Unions: ASME B16.39; Classes 150, 250, and 300 as indicated in piping applications articles.

E. Cast-Iron Threaded Flanges and Flanged Fittings: ASME B16.1, Classes 125 and 250 as indicated in piping applications articles; raised ground face, and bolt holes spot faced.

F. Wrought-Steel Fittings: ASTM A234/A234M, wall thickness to match adjoining pipe.

G. Wrought-Steel Flanges and Flanged Fittings: ASME B16.5, including bolts, nuts, and gaskets of the following material group, end connections, and facings:

1. Material Group: 1.1.
2. End Connections: Butt welding.
3. Facings: Raised face.

H. Steel Pipe Nipples: ASTM A733, made of ASTM A53/A53M, black steel of same Type, Grade, and Schedule as pipe in which installed.

2.3 STAINLESS STEEL PIPE AND FITTINGS

A. Stainless Steel Pipe: ASTM A312/A312M, plain ends, seamless; stainless steel of types and schedules as indicated in piping application articles.

B. Stainless Steel Socket Weld Fittings: Stainless steel, wrought or forged, of types and classes as indicated in piping application articles.

C. Stainless Steel Flanges and Flanged Fittings: ASME B16.5, Class 150, wrought, raised face weld neck, including gaskets, bolts, and nuts of material to match pipe.

2.4 FIBERGLASS PIPE AND FITTINGS

A. Reinforced Thermosetting Resin Pressure Pipe (RTRP): ASTM D2996, Type 1, Grade 1, Class F, filament-wound pipe with tapered bell and spigot ends for adhesive joints.

B. Glass-Fiber-Reinforced Thermosetting-Resin: ASTM D5685, Type 2 or Type 5, Grade 1, Class F, compression or spray-up/contact molded fittings of same material, pressure class, and joining method as pipe.

C. Flanges: ASTM D4024, Type 1, Grade 1, full-face gaskets suitable for the service, minimum **1/8 inch (3.2 mm)** thick, 60-70 durometer. ASTM A307, Grade B, hex head bolts with washers.

2.5 JOINING MATERIALS

A. Pipe-Flange Gasket Materials: Suitable for chemical and thermal conditions of piping system contents.

1. ASME B16.21, nonmetallic, flat, asbestos free, **1/8-inch (3.2-mm)** maximum thickness unless otherwise indicated.

a. Full-Face Type: For flat-face flanges.
b. Narrow-Face Type: For raised-face flanges.

B. Flange Bolts and Nuts: ASME B18.2.1, carbon steel or stainless steel of type to match pipe unless otherwise indicated.

C. Welding Filler Metals: Comply with AWS D10.12M/D10.12 for welding materials appropriate for wall thickness and chemical analysis of steel pipe being welded.

D. Welding Materials: Comply with Section II, Part C, of ASME Boiler and Pressure Vessel Code for welding materials appropriate for wall thickness and for chemical analysis of pipe being welded.

E. Fiberglass Pipe Adhesive: As furnished or recommended by pipe manufacturer.

1. Verify fiberglass adhesive has a VOC content of 80 g/L or less when calculated in accordance with 40 CFR 59, Subpart D (EPA Method 24).
2. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

PART 3 - EXECUTION

3.1 LP STEAM PIPING APPLICATIONS

A. LP Steam Piping, [**NPS 2 (DN 50) and Smaller**]<**Insert pipe size range**>: [**Schedule 40**][**Schedule 80**], Type S, Grade B, steel pipe; Class 125 cast-iron fittings; and threaded joints.

B. LP Steam Piping, [**NPS 2-1/2 through NPS 12 (DN 65 through DN 300)**]<**Insert pipe size range**>: [**Schedule 40**][**Schedule 80**], Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.

C. LP Steam Piping, [**NPS 14 through NPS 18 (DN 350 through DN 450)**]<**Insert pipe size range**>: Schedule 30, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.

D. LP Steam Piping, [**NPS 20 (DN 500) and Larger**]<**Insert pipe size range**>: Schedule 20, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.

E. Condensate piping above grade, [**NPS 2 (DN 50)**]<**Insert pipe size range**> and smaller, to be[**either of**] the following:

1. Schedule 80, Type S, Grade B, steel pipe; Class 125 cast-iron fittings; and threaded joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

F. Condensate piping above grade, [**NPS 2-1/2 (DN 65)**]<**Insert pipe size range**> and larger, to be[**either of**] the following:

1. Schedule 80, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

G. Condensate piping below grade, [**NPS 2 (DN 50)**]<**Insert pipe size range**> and smaller, to be[**either of**] the following:

1. Schedule 80, Type S, Grade B, steel pipe; Class 125 cast-iron fittings; and threaded joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

H. Condensate piping below grade, [**NPS 2-1/2 (DN 65)**]<**Insert pipe size range**> and larger, to be[**either of**] the following:

1. Schedule 80, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

I. LP Clean Steam Piping:

1. LP clean steam piping above grade, [**NPS 2 (DN 50)**]<**Insert pipe size range**> and smaller, to be the following:

a. [**Schedule 40**][**Schedule 80**], [**Type 304**][**Type 316**] stainless steel pipe; [**wrought**][**or**][**forged**], [**Class 2000**][**Class 3000**]<**Insert class**>, same type stainless steel socket weld fittings.

2. LP clean steam piping above grade, [**NPS 2-1/2 (DN 65)**]<**Insert pipe size range**> and larger, to be the following:

    a. [**Schedule 40**][**Schedule 80**], [**Type 304**][**Type 316**] stainless steel pipe; same type stainless steel flanges and wrought stainless steel flanged fittings.

J. Clean Steam Condensate Piping:

1. Clean steam condensate piping above grade, [**NPS 2 (DN 50)**]<**Insert pipe size range**> and smaller, to be the following:

    a. [**Schedule 40**][**Schedule 80**], [**Type 304**][**Type 316**] stainless steel pipe; [**wrought**][**or**][**forged**][**Class 2000**][**Class 3000**]<**Insert class**> same type stainless steel socket weld fittings.

2. Clean steam condensate piping above grade, [**NPS 2-1/2 (DN 65)**]<**Insert pipe size range**> and larger, to be the following:

    a. [**Schedule 40**][**Schedule 80**], [**Type 304**][**Type 316**] stainless steel pipe; same type stainless steel flanges and wrought stainless steel flanged fittings.

3.2 HP STEAM PIPING APPLICATIONS

A. HP Steam Piping, [**NPS 2 (DN 50) and Smaller**]<**Insert pipe size range**>: [**Schedule 40**][**Schedule 80**], Type S, Grade B, steel pipe; Class 125 cast-iron fittings; and threaded joints.

B. HP Steam Piping, [**NPS 2-1/2 through NPS 12 (DN 65 through DN 300)**]<**Insert pipe size range**>: [**Schedule 40**][**Schedule 80**], Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.

C. HP Steam Piping, [**NPS 14 through NPS 18 (DN 350 through DN 450)**]<**Insert pipe size range**>: Schedule 30, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.

D. HP Steam Piping, [**NPS 20 (DN 500) and Larger**]<**Insert pipe size range**>: Schedule 20, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.

E. Condensate piping above grade, [**NPS 2 (DN 50)**]<**Insert pipe size range**> and smaller, to be[**either of**] the following:

1. Schedule 80, Type S, Grade B, steel pipe; Class 125 cast-iron fittings; and threaded joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

F. Condensate piping above grade, [**NPS 2-1/2 (DN 65)**]<**Insert pipe size range**> and larger, to be[**either of**] the following:

1. Schedule 80, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

G. Condensate piping below grade, [**NPS 2 (DN 50)**]<**Insert pipe size range**> and smaller, to be[**either of**] the following:

1. Schedule 80, Type S, Grade B, steel pipe; Class 125 cast-iron fittings; and threaded joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

H. Condensate piping below grade, [**NPS 2-1/2 (DN 65)**]<**Insert pipe size range**> and larger, to be[**either of**] the following:

1. Schedule 80, Type E, Grade B, steel pipe; Class 150 wrought-steel fittings, flanges, and flange fittings; and welded and flanged joints.
2. RTRP and Glass-Fiber-Reinforced Thermosetting-Resin pipe with adhesive or flanged joints.

3.3 ANCILLARY PIPING APPLICATIONS

A. Blowdown-Drain Piping: Same materials and joining methods as for piping specified for the service in which blowdown drain is installed.

B. Vacuum-Breaker Piping: Outlet, same as service where installed.

C. Safety-Valve-Inlet and -Outlet Piping: Same materials and joining methods as for piping specified for the service in which safety valve is installed.

3.4 INSTALLATION OF PIPING

A. Drawing plans, schematics, and diagrams indicate general location and arrangement of piping systems. Install piping as indicated unless deviations to layout are approved on Coordination Drawings.

B. Install piping in concealed locations unless otherwise indicated and except in equipment rooms and service areas.

C. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless otherwise indicated.

D. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal.

E. Install piping to permit valve servicing.

F. Install piping free of sags and bends.

G. Install fittings for changes in direction and branch connections.

H. Install piping to allow application of insulation.

I. Select system components with pressure rating equal to or greater than system operating pressure.

J. Install groups of pipes parallel to each other, spaced to permit applying insulation and servicing of valves.

K. Install drains, consisting of a tee fitting, **NPS 3/4 (DN 20)** full port-ball valve, and short **NPS 3/4 (DN 20)** threaded nipple with cap, at low points in piping system mains and elsewhere as required for system drainage.

L. Install steam supply piping at a minimum uniform grade of 0.2 percent downward in direction of steam flow.

M. Install condensate return piping at a minimum uniform grade of 0.4 percent downward in direction of condensate flow.

N. Reduce pipe sizes using eccentric reducer fitting installed with level side down.

O. Install branch connections to mains using[**mechanically formed**] tee fittings in main pipe, with the branch connected to top of main pipe.

P. Install valves in accordance with Section 230523 "General-Duty Valves for HVAC Piping" or other Sections as needed.

Q. Install unions in piping, [**NPS 2 (DN 50)**]<**Insert pipe size**> and smaller, adjacent to valves, at final connections of equipment, and elsewhere as indicated.

R. Install flanges in piping, [**NPS 2-1/2 (DN 65)**]<**Insert pipe size**> and larger, at final connections of equipment and elsewhere as indicated.

S. Install shutoff valve immediately upstream of each dielectric fitting.

T. Install strainers on supply side of control valves, pressure-reducing valves, traps, and elsewhere as indicated. Install **NPS 3/4 (DN 20)** nipple and full port ball valve in blowdown connection of strainers **NPS 2 (DN 50)** and larger. Match size of strainer blowoff connection for strainers smaller than **NPS 2 (DN 50)**.

U. Comply with requirements in Section 230500 "Common Work Results for HVAC" for installation of expansion loops, expansion joints, anchors, and pipe alignment guides.

V. Comply with requirements in Section 230553 "Identification for HVAC Piping and Equipment" for identifying piping.

W. Install drip legs at low points and natural drainage points such as ends of mains, bottoms of risers, and ahead of pressure regulators, and control valves.

1. On straight runs with no natural drainage points, install drip legs at intervals not exceeding [**300 ft. (90 m)**]<**Insert distance**>.
2. Size drip legs same size as main. In steam mains **NPS 6 (DN 150)** and larger, drip leg size can be reduced, but to no less than **NPS 4 (DN 100)**.

X. Install sleeves for piping penetrations of walls, ceilings, and floors. Comply with requirements for sleeves specified in Section 230500 "Common Work Results for HVAC."

Y. Install sleeve seals for piping penetrations of concrete walls and slabs. Comply with requirements for sleeve seals specified in Section 230500 "Common Work Results for HVAC."

Z. Install escutcheons for piping penetrations of walls, ceilings, and floors. Comply with requirements for escutcheons specified in Section 230500 "Common Work Results for HVAC."

3.5 INSTALLATION OF STEAM AND CONDENSATE PIPING SPECIALTIES

A. Comply with requirements in Section 232216 "Steam and Condensate Heating Piping Specialties" for installation requirements for strainers, flash tanks, special-duty valves, steam traps, thermostatic air vents and vacuum breakers, and steam and condensate meters.

3.6 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with requirements for seismic restraints in Section 230548 "Vibration and Seismic Controls for HVAC."

B. Comply with requirements in Section 230529 "Hangers and Supports for HVAC Piping and Equipment" for installation of hangers, supports, and anchor devices.

C. Install the following pipe attachments:

1. Adjustable steel clevis hangers for individual horizontal piping less than **20 ft.** **(6 m)** long.
2. Adjustable roller hangers and spring hangers for individual horizontal piping **20 ft.** **(6 m)** or longer.
3. Pipe Roller: MSS SP-58, Type 44 for multiple horizontal piping **20 ft.** **(6 m)** or longer, supported on a trapeze.
4. Spring hangers to support vertical runs.

D. Install hangers for steel steam supply piping and steel steam condensate piping, with maximum horizontal spacing and minimum rod diameters, to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

E. Install hangers for fiberglass piping, with maximum horizontal spacing and minimum rod diameters, to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

F. Support horizontal piping within [**12 inches** **(300 mm)**]<**Insert dimension**> of each fitting.

G. Support vertical runs of steel steam supply piping and steel steam condensate piping to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

H. Support vertical runs of fiberglass piping to comply with manufacturer's written instructions, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

3.7 PIPE JOINT CONSTRUCTION

A. Ream ends of pipes and remove burrs. Bevel plain ends of steel pipe.

B. Remove scale, slag, dirt, and debris from inside and outside of pipe and fittings before assembly.

C. Threaded Joints: Thread pipe with tapered pipe threads in accordance with ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and restore full ID. Join pipe fittings and valves as follows:

1. Apply appropriate tape or thread compound to external pipe threads unless dry seal threading is specified.
2. Damaged Threads: Do not use pipe or pipe fittings with threads that are corroded or damaged. Do not use pipe sections that have cracked or open welds.

D. Welded Joints: Construct joints in accordance with AWS D10.12M/D10.12, using qualified processes and welding operators in accordance with "Quality Assurance" Article.

E. Flanged Joints: Select appropriate gasket material, size, type, and thickness for service application. Install gasket concentrically positioned. Use suitable lubricants on bolt threads.

F. Fiberglass Bonded Joints: Prepare pipe ends and fittings, apply adhesive, and join in accordance with pipe manufacturer's written instructions.

3.8 TERMINAL EQUIPMENT CONNECTIONS

A. Size for supply and return piping connections to be the same as or larger than equipment connections.

B. Install traps and control valves in accessible locations close to connected equipment.

C. Install bypass piping with globe valve around control valve. If parallel control valves are installed, only one bypass is required.

D. Install vacuum breakers downstream from control valve, close to coil inlet connection.

E. Install a drip leg at coil outlet.

3.9 FIELD QUALITY CONTROL

A. Prepare steam and condensate piping in accordance with [**ASME B31.1, "Power Piping,"**][**and**][**ASME B31.9, "Building Services Piping,"**] and as follows:

1. Leave joints, including welds, uninsulated and exposed for examination during test.
2. Provide temporary restraints for expansion joints that cannot sustain reactions due to test pressure. If temporary restraints are impractical, isolate expansion joints from testing.
3. Flush system with clean water. Clean strainers.
4. Isolate equipment from piping. If a valve is used to isolate equipment, its closure to be capable of sealing against test pressure without damage to valve. Install blinds in flanged joints to isolate equipment.

B. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

C. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

D. Perform the following tests and inspections[**with the assistance of a factory-authorized service representative**]:

1. Use ambient temperature water as a testing medium unless there is risk of damage due to freezing. Another liquid that is safe for workers and compatible with piping may be used.
2. Subject piping system to hydrostatic test pressure that is not less than 1.5 times the working pressure. Test pressure will not exceed maximum pressure for any vessel, pump, valve, or other component in system under test. Verify that stress due to pressure at bottom of vertical runs does not exceed 90 percent of specified minimum yield strength.
3. After hydrostatic test pressure has been applied for at least 10 minutes, examine piping, joints, and connections for leakage. Eliminate leaks by tightening, repairing, or replacing components, and repeat hydrostatic test until there are no leaks.

E. Prepare test and inspection reports.

END OF SECTION 22 11 16 00D

SECTION 22 11 16 00E - REFRIGERANT PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Copper tube and fittings.
2. Steel pipe and fittings.
3. Valves and specialties.
4. Refrigerants.

1.2 ACTION SUBMITTALS

A. Product Data: For each specified system and assembly, including components and accessories.

1. Submit data for each type of refrigerant piping, fitting, valve, piping specialty, and refrigerant.

B. Shop Drawings:

1. Show piping size and piping layout, including oil traps, double risers, specialties, and pipe and tube sizes to accommodate, at a minimum, equipment provided, elevation difference between compressor and evaporator, and length of piping to ensure proper operation and compliance with warranties of connected equipment.
2. Show interface and spatial relationships between piping and equipment.
3. Shop Drawing Scale: [**1/4 inch equals 1 ft. (1:50)**]<**Insert value**> .

C. Delegated Design Submittals: For refrigerant piping design, including sizing and layout, oil traps, double risers, specialties, and pipe and tube sizes to accommodate, at a minimum, equipment provided, elevation difference between compressor and evaporator, and length of piping to ensure proper operation and compliance with warranties of connected equipment.

D. Sustainable Design Submittals:

1. Refrigerant: Product Data for refrigerants, indicating compliance with refrigerant management practices.
2. Product Data: For refrigerants, indicating compliance with refrigerant management practices.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Provide plans, piping schematics, and details, or Building Information Model (BIM), drawn to scale, showing the items described in this Section and coordinated with all building trades.

B. Welding Certificates: For each welder performing shop or field welding on Project.

C. Field Quality Control Reports: For each specified field quality-control test and inspection.

D. Delegated Design Engineer Qualification Statement: For refrigerant piping design.

1.4 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For refrigerant valves and piping specialties.

1.5 QUALITY ASSURANCE

A. Welding Qualifications: Qualify procedures and personnel in accordance with ASME Boiler and Pressure Vessel Code: Section IX, "Welding, Brazing, and Fusing Qualifications."

B. Delegated Design Engineer Qualifications: A professional engineer who is legally qualified to practice in [**state**]<**Insert jurisdiction**> where Project is located and who is experienced in providing engineering services of the type indicated.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Store piping with end caps in place to ensure that piping interior and exterior are clean when installed.

B. Prepare valves and specialties for shipping as follows:

1. Protect internal parts against rust and corrosion.
2. Protect threads and other end connections.

C. Use precautions during storage as follows:

1. Maintain valve and specialty end protection.
2. Store valves and specialties indoors and maintain at higher-than-ambient-dew-point temperature. If outdoor storage is necessary, store valves off the ground in watertight enclosures.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," for refrigerant piping size and layout, including oil traps, double risers, specialties, and pipe and tube sizes to accommodate, as a minimum, equipment provided, elevation difference between compressor and evaporator, and length of piping to ensure proper operation and compliance with warranties of connected equipment.

B. Comply with ASHRAE 15 and ASHRAE 34.

C. Comply with ASME B31.5.

D. Test Pressure for Refrigerant R-32:

1. Suction Tubing for Refrigeration and Air-Conditioning Applications Other than Heat Pumps: [**300 psig (2068 kPa)**]<**Insert pressure**> .
2. Suction Tubing for Heat-Pump Applications: [**535 psig (3689 kPa)**]<**Insert pressure**> .
3. Hot-Gas and Liquid Tubing: [**535 psig (3689 kPa)**]<**Insert pressure**> .

E. Test Pressure for Refrigerant R-454B:

1. Suction Tubing for Refrigeration and Air-Conditioning Applications Other than Heat Pumps: [**300 psig (2068 kPa)**]<**Insert pressure**> .
2. Suction Tubing for Heat-Pump Applications: [**535 psig (3689 kPa)**]<**Insert pressure**> .
3. Hot-Gas and Liquid Tubing: [**535 psig (3689 kPa)**]<**Insert pressure**> .

2.2 COPPER TUBE AND FITTINGS

A. Copper Tube, for Refrigerant Piping: [**ASTM B280, Type ACR,**][**drawn-temper**][**and**][**annealed-temper**]<**Insert ASTM standard and type**> .

B. Wrought-Copper Fittings, Brazed Joint: ASME B16.50.

C. Wrought-Copper Unions: ASME B16.22.

D. Brazing Filler Metals: AWS A5.8M/A5.8.

E. Flexible Connectors:

1. Body: Tin-bronze bellows with woven, flexible, tinned-bronze-wire-reinforced protective jacket.
2. End Connections: Socket ends.
3. Offset Performance: Capable of minimum **3/4-inch (20-mm)** misalignment in minimum **7-inch-(180-mm-)** long assembly.
4. Working Pressure Rating: Factory test at minimum [**500 psig (3450 kPa)**]<**Insert pressure rating**> .
5. Maximum Operating Temperature: [**250 deg F (121 deg C)**]<**Insert temperature**> .

F. Copper-Tube, Pressure-Seal-Joint Fittings for Refrigerant Piping:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Conex Bänninger; a part of IBP Group LLC**]
    b. [**Mueller Streamline Co.; a company of Mueller Industries**]
    c. [**Parker Hannifin; Sporlan Division**]
    d. [**RLS LLC**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Conex Bänninger; a part of IBP Group LLC**]
    b. [**Mueller Streamline Co.; a company of Mueller Industries**]
    c. [**Parker Hannifin; Sporlan Division**]
    d. [**RLS LLC**]
    e. <**Insert manufacturer's name**>

3. Standard: UL 207; certified by UL for field installation. Certification as a UL-recognized component alone is unacceptable.
4. Housing: Copper.
5. O-Rings: [**HNBR**]<**Insert material type**> compatible with specific refrigerant.
6. Tools: Manufacturer's approved special tools.
7. Minimum Rated Pressure: [**700 psig (48 bar)**]<**Insert pressure**> .

2.3 STEEL PIPE AND FITTINGS

A. Steel Pipe: ASTM A53/A53M, black steel with plain ends; type, grade, and pipe schedule as selected in "Piping Application Schedules" Article.

B. Wrought-Steel Fittings: ASTM A234/A234M, for welded joints.

C. Steel Flanges and Flanged Fittings: ASME B16.5 steel, including bolts, nuts, gaskets, bevel-welded end connection, and raised face.

D. Welding Filler Metals: Comply with AWS D10.12M/D10.12 and ASME Boiler and Pressure Vessel Code for welding materials appropriate for wall thickness and chemical analysis of steel pipe being welded.

E. Flanged Unions:

1. Body: Forged-steel flanges for **NPS 1 to NPS 1-1/2 (DN 25 to DN 40)** and ductile iron for **NPS 2 to NPS 3 (DN 50 to DN 80)**. Factory apply rust-resistant finish.
2. Gasket: Fiber asbestos free.
3. Fasteners: Four plated-steel bolts, with silicon bronze nuts. Factory apply rust-resistant finish.
4. Offset Performance: Capable of minimum **3/4-inch (20-mm)** misalignment in minimum **7-inch-(180-mm-)** long assembly.
5. Pressure Rating: Factory test at minimum [**400 psig (2760 kPa)**]<**Insert pressure**> .
6. Maximum Operating Temperature: **330 deg F (165 deg C)**.

F. Flexible Connectors:

1. Body: Stainless steel bellows with woven, flexible, stainless steel-wire-reinforced protective jacket.
2. End Connections:

a. NPS 2 (DN 50) and Smaller: With threaded-end connections.
b. NPS 2-1/2 (DN 65) and Larger: With flanged-end connections.

3. Offset Performance: Capable of minimum **3/4-inch (20-mm)** misalignment in minimum **7-inch-(180-mm-)** long assembly.
4. Pressure Rating: Factory test at minimum [**500 psig (3450 kPa)**]<**Insert pressure**> .
5. Maximum Operating Temperature: [**250 deg F (121 deg C)**]<**Insert temperature**> .

2.4 Copper-Tube, Solder Fittings for Refrigerant

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. <**Insert manufacturer's name**>

2.5 VALVES AND SPECIALTIES

A. Diaphragm Packless Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following] :

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

3. Body and Bonnet: Forged brass or cast bronze; globe design with straight-through or angle pattern.
4. Diaphragm: Phosphor bronze and stainless steel with stainless steel spring.
5. Operator: Rising stem and hand wheel.
6. Seat: Nylon.
7. End Connections: Socket, union, or flanged.
8. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
9. Maximum Operating Temperature: [**240 deg F (116 deg C)**]<**Insert temperature**> .

B. Packed-Angle Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

3. Body and Bonnet: Forged brass or cast bronze.
4. Packing: Molded stem, back seating, and replaceable under pressure.
5. Operator: Rising stem.
6. Seat: Nonrotating, self-aligning polytetrafluoroethylene.
7. Seal Cap: Forged-brass or valox hex cap.
8. End Connections: Socket, union, threaded, or flanged.
9. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
10. Maximum Operating Temperature: [**275 deg F (135 deg C)**]<**Insert temperature**> .

C. Check Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Danfoss, Inc.**]
    c. [**Henry Technologies Inc.; The Henry Group**]
    d. [**Parker (Parker Hannifin)**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**Danfoss, Inc.**]
    c. [**Henry Technologies Inc.; The Henry Group**]
    d. [**Parker (Parker Hannifin)**]
    e. <**Insert manufacturer's name**>

3. Body: Ductile iron, forged brass, or cast bronze; globe pattern.
4. Bonnet: Bolted ductile iron, forged brass, or cast bronze; or brass hex plug.
5. Piston: Removable polytetrafluoroethylene seat.
6. Closing Spring: Stainless steel.
7. Manual Opening Stem: Seal cap, plated-steel stem, and graphite seal.
8. End Connections: Socket, union, threaded, or flanged.
9. Maximum Opening Pressure: **0.50 psig (3.4 kPa)**.
10. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
11. Maximum Operating Temperature: [**275 deg F (135 deg C)**]<**Insert temperature**> .

D. Service Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**JB Industries**]
    d. [**Parker (Parker Hannifin)**]
    e. [**RectorSeal HVAC; a CSW Industrials Company**]
    f. [**Refrigeration Sales, Inc.**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**JB Industries**]
    d. [**Parker (Parker Hannifin)**]
    e. [**RectorSeal HVAC; a CSW Industrials Company**]

f. [**Refrigeration Sales, Inc.**]
g. <**Insert manufacturer's name**>

3. Body: Forged brass with brass cap, including key end to remove core.
4. Core: Removable ball-type check valve with stainless steel spring.
5. Seat: Polytetrafluoroethylene.
6. End Connections: Copper spring.
7. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
8. Maximum Operating Temperature: [**275 deg F (135 deg C)**]<**Insert temperature**> .

E. Refrigerant Locking Caps:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**C & D Valve, LLC**]
b. [**JB Industries**]
c. [**RectorSeal HVAC; a CSW Industrials Company**]
d. [**Refrigeration Sales, Inc.**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**C & D Valve, LLC**]
b. [**JB Industries**]
c. [**RectorSeal HVAC; a CSW Industrials Company**]
d. [**Refrigeration Sales, Inc.**]
e. <**Insert manufacturer's name**>

3. Description: Locking-type, tamper-resistant, threaded caps to protect refrigerant-charging ports from unauthorized refrigerant access and leakage.
4. Material: Brass, with protective shroud or sleeve.
5. Refrigerant Identification: [**Color-coded, refrigerant specific based on AHRI Guideline N**][**or**][**Universal**] design.
6. Special Tool: For installing and unlocking.

F. Solenoid Valves: Comply with **AHRI 760 I-P (AHRI 761 SI)** and UL 429; listed and labeled by an NRTL.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

3. Body and Bonnet: Plated steel.
4. Solenoid Tube, Plunger, Closing Spring, and Seat Orifice: Stainless steel.
5. Seat: Polytetrafluoroethylene.
6. End Connections: Threaded.
7. Electrical: Molded, watertight coil in ANSI/NEMA 250 enclosure of type required by location with **1/2-inch (16-mm)** conduit adapter, and [**24**][**115**][**208**] V ac coil.
8. Working Pressure Rating: [**400 psig (2760 kPa)**]<**Insert pressure**> .
9. Maximum Operating Temperature: [**240 deg F (116 deg C)**]<**Insert temperature**> .

G. Safety Relief Valves: Comply with ASME Boiler and Pressure Vessel Code; listed and labeled by an NRTL.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

3. Body and Bonnet: Ductile iron and steel, with neoprene O-ring seal.
4. Piston, Closing Spring, and Seat Insert: Stainless steel.
5. Seat: Polytetrafluoroethylene.
6. End Connections: Threaded.
7. Working Pressure Rating: [**400 psig (2760 kPa)**]<**Insert pressure**> .
8. Maximum Operating Temperature: [**240 deg F (116 deg C)**]<**Insert temperature**> .

H. Thermostatic Expansion Valves: Comply with **AHRI 750 I-P (AHRI 751 SI)**.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Danfoss, Inc.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker Hannifin; Sporlan Division**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker Hannifin; Sporlan Division**]
    d. <**Insert manufacturer's name**>

3. Body, Bonnet, and Seal Cap: Forged brass or steel.
4. Diaphragm, Piston, Closing Spring, and Seat Insert: Stainless steel.
5. Packing and Gaskets: Non-asbestos.
6. Capillary and Bulb: Copper tubing filled with refrigerant charge.
7. Suction Temperature: [**40 deg F (4.4 deg C)**]<**Insert temperature**> .
8. Superheat: [**Adjustable**][**Nonadjustable**] .
9. Design: Reverse-flow option (for heat-pump applications).
10. End Connections: Socket, flare, or threaded union.
11. Working Pressure Rating: [**700 psig (4820 kPa)**][**450 psig (3100 kPa)**]<**Insert value**> .

I. Hot-Gas Bypass Valves: Comply with UL 429; listed and labeled by an NRTL.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

3. Body, Bonnet, and Seal Cap: Ductile iron or steel.
4. Diaphragm, Piston, Closing Spring, and Seat Insert: Stainless steel.
5. Packing and Gaskets: Non-asbestos.
6. Solenoid Tube, Plunger, Closing Spring, and Seat Orifice: Stainless steel.
7. Seat: Polytetrafluoroethylene.
8. Equalizer: [**Internal**][**External**] .
9. Electrical: Molded, watertight coil in ANSI/NEMA 250 enclosure of type required by location with **1/2-inch (16-GRC)** conduit adapter and [**24**][**115**][**208**] V ac coil.
10. End Connections: Socket.
11. Set Pressure: <**Insert psig (kPa)**> .
12. Throttling Range: Maximum **5 psig (34 kPa)**.
13. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
14. Maximum Operating Temperature: [**240 deg F (116 deg C)**]<**Insert temperature**> .

J. Straight-Type Strainers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

3. Body: Welded steel with corrosion-resistant coating.
4. Screen: 100-mesh stainless steel.
5. End Connections: Socket or flare.
6. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
7. Maximum Operating Temperature: [**275 deg F (135 deg C)**]<**Insert temperature**> .

K. Angle-Type Strainers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

3. Body: Forged brass or cast bronze.
4. Drain Plug: Brass hex plug.
5. Screen: 100-mesh monel.
6. End Connections: Socket or flare.
7. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
8. Maximum Operating Temperature: [**275 deg F (135 deg C)**]<**Insert temperature**> .

L. Moisture/Liquid Indicators:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. [**RLS LLC**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. [**RLS LLC**]
    e. <**Insert manufacturer's name**>

3. Body: Forged brass.
4. Window: Replaceable, clear, fused glass window with indicating element protected by filter screen.
5. Indicator: Color-coded to show moisture content in parts per million (ppm).
6. Minimum Moisture Indicator Sensitivity: Indicate moisture above 60 ppm.
7. End Connections: Socket or flare.
8. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
9. Maximum Operating Temperature: [**240 deg F (116 deg C)**]<**Insert temperature**> .

M. Replaceable-Core Filter Dryers: Comply with **AHRI 730 I-P (AHRI 731 SI)**.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

3. Body and Cover: Painted-steel shell with ductile-iron cover, stainless steel screws, and neoprene gaskets.
4. Filter Media: 10 micron, pleated with integral end rings; stainless steel support.
5. Desiccant Media: Activated [**alumina**][**charcoal**] .
6. Design: Reverse flow (for heat-pump applications).

7. End Connections: Socket.
8. Access Ports: NPS 1/4 (DN 8) connections at entering and leaving sides for pressure differential measurement.
9. Maximum Pressure Loss: [2 psig (14 kPa)]<**Insert value**> .
10. Rated Flow: <**Insert** tons (kW)> .
11. Working Pressure Rating: [500 psig (3450 kPa)]<**Insert pressure**> .
12. Maximum Operating Temperature: [240 deg F (116 deg C)]<**Insert temperature**> .

N. Permanent Filter Dryers: Comply with AHRI 730 I-P (AHRI 731 SI).

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. [**RLS LLC**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. [**RLS LLC**]
    e. <**Insert manufacturer's name**>

3. Body and Cover: Painted-steel shell.
4. Filter Media: 10 micron, pleated with integral end rings; stainless steel support.
5. Desiccant Media: Activated [**alumina**][**charcoal**] .
6. Design: Reverse flow (for heat-pump applications).
7. End Connections: Socket.
8. Access Ports: NPS 1/4 (DN 8) connections at entering and leaving sides for pressure differential measurement.
9. Maximum Pressure Loss: [2 psig (14 kPa)]<**Insert value**> .
10. Rated Flow: <**Insert** tons (kW)> .
11. Working Pressure Rating: [500 psig (3450 kPa)]<**Insert pressure**> .
12. Maximum Operating Temperature: [240 deg F (116 deg C)]<**Insert temperature**> .

O. Mufflers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Danfoss, Inc.**]
    b. [**Emerson Climate Technologies; Emerson Electric Co.**]
    c. [**Henry Technologies Inc.; The Henry Group**]
    d. [**Parker Hannifin; Sporlan Division**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Danfoss, Inc.**]
    b. [**Emerson Climate Technologies; Emerson Electric Co.**]
    c. [**Henry Technologies Inc.; The Henry Group**]
    d. [**Parker Hannifin; Sporlan Division**]
    e. <**Insert manufacturer's name**>

3. Body: Welded steel with corrosion-resistant coating.
4. End Connections: Socket or flare.
5. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
6. Maximum Operating Temperature: [**275 deg F (135 deg C)**]<**Insert temperature**> .

P. Receivers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Henry Technologies Inc.; The Henry Group**]
    b. [**Parker Hannifin; Sporlan Division**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Henry Technologies Inc.; The Henry Group**]
    b. [**Parker Hannifin; Sporlan Division**]
    c. <**Insert manufacturer's name**>

3. Comply with ASME Boiler and Pressure Vessel Code; listed and labeled by an NRTL.
4. Comply with UL 207; listed and labeled by an NRTL.
5. Body: Welded steel with corrosion-resistant coating.
6. Tappings: Inlet, outlet, liquid-level indicator, and safety-relief valve.
7. End Connections: Socket or threaded.
8. Working Pressure Rating: [**450 psig (3100 kPa)**]<**Insert pressure**> .
9. Maximum Operating Temperature: [**250 deg F (121 deg C)**]<**Insert temperature**> .

Q. Liquid Accumulators:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Emerson Climate Technologies; Emerson Electric Co.**]
    b. [**Henry Technologies Inc.; The Henry Group**]
    c. [**Parker (Parker Hannifin)**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**Emerson Climate Technologies; Emerson Electric Co.**]
b. [**Henry Technologies Inc.; The Henry Group**]
c. [**Parker (Parker Hannifin)**]
d. <**Insert manufacturer's name**>

3. Body: Welded steel with corrosion-resistant coating.
4. End Connections: Socket or threaded.
5. Working Pressure Rating: [**500 psig (3450 kPa)**]<**Insert pressure**> .
6. Maximum Operating Temperature: [**275 deg F (135 deg C)**]<**Insert temperature**> .

2.6 REFRIGERANTS

A. R-32, ASHRAE 34: Difluoromethane.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Arkema Inc.**]
b. [**Honeywell International Inc.**]
c. [**Mexichem Fluor, Inc. (Koura)**]
d. [**The Chemours Company**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Arkema Inc.**]
b. [**Honeywell International Inc.**]
c. [**Mexichem Fluor, Inc. (Koura)**]
d. [**The Chemours Company**]
e. <**Insert manufacturer's name**>

B. R-454B, ASHRAE 34: R-32 (68.9 percent by mass) and R-1234yf (31.1 percent by mass).

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Arkema Inc.**]
b. [**Honeywell International Inc.**]
c. [**Mexichem Fluor, Inc. (Koura)**]
d. [**The Chemours Company**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Arkema Inc.**]
b. [**Honeywell International Inc.**]
c. [**Mexichem Fluor, Inc. (Koura)**]
d. [**The Chemours Company**]
e. <**Insert manufacturer's name**>

PART 3 - EXECUTION

3.1 PIPING APPLICATION SCHEDULES

A. Refrigerant: [**R-454B**][**R-32**]<**Insert refrigerant**> .

B. Suction, Hot-Gas, and Liquid Tubing for Conventional Air-Conditioning (Cooling-Only) Applications, NPS 1-1/2 (DN 40) and Smaller, Annealed-Temper: Copper, Type ACR, annealed-temper tubing and [**wrought-copper fittings with brazed joints**][**ACR copper fittings with pressure-seal joints**] .

C. Suction, Hot-Gas, and Liquid Tubing for Conventional Air-Conditioning (Cooling-Only) Applications, NPS 4 (DN 100) and Smaller, Drawn-Temper: Copper, Type ACR drawn-temper tubing and wrought-copper fittings with brazed joints.

D. Suction, Hot-Gas, and Liquid Tubing for Conventional Air-Conditioning (Cooling-Only) Applications, NPS 2 to NPS 4 (DN 50 to DN 100), Drawn-Temper: Copper, Type ACR drawn-temper tubing and wrought-copper fittings with brazed joints.

E. Safety-Relief-Valve Discharge Tubing for Conventional Air-Conditioning (Cooling-Only) Applications, Copper: Type ACR, [**drawn-temper**][**or**][**annealed-temper**] tubing and wrought-copper fittings with brazed joints.

F. Safety-Relief-Valve Discharge Piping for Conventional Air-Conditioning (Cooling-Only) Applications, Steel: Schedule 40, black steel and wrought-steel fittings with welded joints.

G. Suction, Hot-Gas, and Liquid Tubing for Heat-Pump Applications, NPS 1-1/2 (DN 40) and Smaller, Annealed-Temper: Copper, Type ACR, annealed-temper tubing and [**wrought-copper fittings with brazed joints**][**ACR copper fittings with pressure-seal joints**] .

H. Suction, Hot-Gas, and Liquid Tubing for Heat-Pump Applications, NPS 4 (DN 100) and Smaller, Drawn-Temper: Copper, Type ACR, drawn-temper tubing and wrought-copper fittings with brazed joints.

I. Suction, Hot-Gas, and Liquid Tubing for Heat-Pump Applications, NPS 2 to NPS 4 (DN 50 to DN 100), Drawn-Temper: Copper, Type ACR, drawn-temper tubing and wrought-copper fittings with brazed joints.

J. Safety-Relief-Valve Discharge Tubing for Heat-Pump Applications, Copper: Type ACR, [**drawn-temper**][**or**][**annealed-temper**] tubing and wrought-copper fittings with brazed joints.

K. Safety-Relief-Valve Discharge Piping for Heat-Pump Applications, Steel: Schedule 40, black steel and wrought-steel fittings with welded joints.

L. Refrigerant Tubing for Variable Refrigerant Flow System Applications:

1. Copper Tube: ASTM B280, Type ACR.
2. Wrought-Copper Fittings, Brazed Joints: ASME B16.50.
3. Brazing Filler Metals: AWS A5.8/A5.8M.

M. Safety-Relief-Valve Discharge Tubing for VRF Applications, Copper: Type ACR, [**drawn-temper**][**or**][**annealed-temper**] tubing and wrought-copper fittings with brazed joints.

N. Safety-Relief-Valve Discharge Piping for VRF Applications, Steel: Schedule 40, black steel and wrought-steel fittings with welded joints.

3.2 INSTALLATION OF VALVES AND SPECIALTIES

A. Install [**diaphragm packless**][**packed-angle**] valves in suction and discharge lines of compressor.

B. Install service valves for gauge taps at inlet and outlet of hot-gas bypass valves and strainers if they are not an integral part of valves and strainers.

C. Install a check valve at the compressor discharge and a liquid accumulator at the compressor suction connection.

D. Except as otherwise indicated, install [**diaphragm packless**][**packed-angle**] valves on inlet and outlet side of filter dryers.

E. Install a full-size, three-valve bypass around filter dryers.

F. Install solenoid valves upstream from each expansion valve and hot-gas bypass valve. Install solenoid valves in horizontal lines with coil at top.

G. Install thermostatic expansion valves as close as possible to distributors on evaporators.

1. Install valve so diaphragm case is warmer than bulb.
2. Secure bulb to clean, straight, horizontal section of suction line using two bulb straps. Do not mount bulb in a trap or at bottom of the line.
3. If external equalizer lines are required, make connection where it will reflect suction-line pressure at bulb location.

H. Install safety-relief valves where required by ASME Boiler and Pressure Vessel Code. Pipe safety-relief-valve discharge line to outside in accordance with ASHRAE 15.

I. Install moisture/liquid indicators in liquid line at the inlet of the thermostatic expansion valve or at the inlet of the evaporator coil capillary tube.

J. Strainers: Install strainers upstream from and adjacent to the following unless they are furnished as an integral assembly for the device being protected:

1. Solenoid valves.
2. Thermostatic expansion valves.
3. Hot-gas bypass valves.
4. Compressor.

K. Install filter dryers in liquid line between compressor and thermostatic expansion valve [**, and in the suction line at the compressor**] .

L. Install receivers sized to accommodate pump-down charge.

M. Install flexible connectors at compressors.

N. Provide refrigerant locking caps on refrigerant charging ports that are located outdoors unless otherwise protected from unauthorized access by a means acceptable to authority having jurisdiction.

3.3 INSTALLATION OF REFRIGERANT PIPING, GENERAL

A. Requirements in this article apply to all piping materials, except where more specific requirements are specified in various pipe and fittings installation articles below.

B. Drawing plans, schematics, and diagrams indicate general location and arrangement of piping systems; indicated locations and arrangements were used to size pipe and calculate friction loss, expansion, pump sizing, and other design considerations. Install piping as indicated unless deviations to layout are approved on Shop Drawings.

C. Install refrigerant piping in accordance with ASHRAE 15.

D. Install piping in concealed locations unless otherwise indicated and except in equipment rooms and service areas.

E. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

F. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal.

G. Install piping adjacent to machines to allow service and maintenance.

H. Install piping free of sags and bends.

I. Install fittings for changes in direction and branch connections.

J. Select system components with pressure rating equal to or greater than system operating pressure.

K. See Section 230923 "Direct Digital Control (DDC) System for HVAC" and Section 230993.11 "Sequence of Operations for HVAC DDC" for solenoid valve controllers, control wiring, and sequence of operation.

L. Install piping as short and direct as possible, with a minimum number of joints, elbows, and fittings.

M. Arrange piping to allow inspection and service of refrigeration equipment. Install valves and specialties in accessible locations to allow for service and inspection. Install access doors or panels as specified in Section 083113 "Access Doors and Frames" if valves or equipment requiring maintenance is concealed behind finished surfaces.

N. Install refrigerant piping in protective conduit where installed belowground.

O. Install refrigerant piping in rigid or flexible conduit in locations where exposed to potential mechanical injury.

P. Slope refrigerant piping as follows:

1. Install horizontal hot-gas discharge piping with a uniform slope downward away from compressor.
2. Install horizontal suction lines with a uniform slope downward to compressor.
3. Install traps and double risers to entrain oil in vertical runs.
4. Liquid lines may be installed level.

Q. Install piping with adequate clearance between pipe and adjacent walls and hangers or between pipes for insulation installation.

R. Identify refrigerant piping and valves in accordance with Section 230553 "Identification for HVAC Piping and Equipment."

S. Install sleeves for piping penetrations of walls, ceilings, and floors. Comply with requirements for sleeves specified in Section 230500 "Common Work Results for HVAC."

T. Install sleeve seals for piping penetrations of concrete walls and slabs. Comply with requirements for sleeve seals specified in Section 230500 "Common Work Results for HVAC."

U. Install escutcheons for piping penetrations of walls, ceilings, and floors. Comply with requirements for escutcheons specified in Section 230500 "Common Work Results for HVAC."

3.4 INSTALLATION OF COPPER TUBE AND FITTINGS

A. When brazing copper tubing, remove solenoid-valve coils and sight glasses; also remove valve stems, seats, packing, and accessible internal parts of refrigerant specialties. Do not apply heat near expansion-valve bulb.

B. Joint Construction:

1. Ream ends of tubes and remove burrs.
2. Remove scale, slag, dirt, and debris from inside and outside of tube and fittings before assembly.
3. Brazed Joints: Construct joints in accordance with AWS BRH, "Brazing Handbook," Ch. 35, "Pipe and Tubing."

    a. Use Type BCuP (copper-phosphorus) alloy for joining copper socket fittings with copper pipe.
    b. Use Type BAg (cadmium-free silver) alloy for joining copper with bronze or steel.

4. Copper-tube, Pressure-Seal-Joint Fittings: Construct joints in accordance with manufacturer's written instructions.

3.5 INSTALLATION OF STEEL PIPE AND FITTINGS

A. Pre-Installation Cleaning: Before installation of steel refrigerant piping, clean pipe and fittings using the following procedures:

1. Shot blast the interior of piping.
2. Remove coarse particles of dirt and dust by drawing a clean, lintless cloth through tubing by means of a wire or electrician's tape.
3. Draw a clean, lintless cloth saturated with trichloroethylene through the tube or pipe. Continue this procedure until cloth is not discolored by dirt.
4. Draw a clean, lintless cloth, saturated with compressor oil, squeezed dry, through the tube or pipe to remove remaining lint. Inspect tube or pipe visually for remaining dirt and lint.
5. Finally, draw a clean, dry, lintless cloth through the tube or pipe.
6. Safety-relief-valve discharge piping is not required to be cleaned but is required to be open to allow unrestricted flow.

B. Joint Construction:

1. Ream ends of pipes and remove burrs. Bevel plain ends of steel pipe.
2. Remove scale, slag, dirt, and debris from inside and outside of pipe and fittings before assembly.
3. Fill pipe and fittings with an inert gas (nitrogen or carbon dioxide), during brazing or welding, to prevent scale formation.
4. Threaded Joints: Thread steel pipe with tapered pipe threads in accordance with ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and to restore full ID. Join pipe fittings and valves as follows:

    a. Apply appropriate tape or thread compound to external pipe threads unless dry-seal threading is specified.
    b. Damaged Threads: Do not use pipe or pipe fittings with threads that are corroded or damaged. Do not use pipe sections that have cracked or open welds.

5. Steel pipe can be threaded, but threaded joints must be seal brazed or seal welded.
6. Welded Joints: Construct joints in accordance with AWS D10.12M/D10.12.
7. Flanged Joints: Select appropriate gasket material, size, type, and thickness for service application. Install gasket concentrically positioned. Use suitable lubricants on bolt threads.

3.6 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with requirements for seismic restraints in Section 230548 "Vibration and Seismic Controls for HVAC."

B. Comply with Section 230529 "Hangers and Supports for HVAC Piping and Equipment" for hangers, supports, and anchor devices.

C. Piping Attachments: Install the following pipe attachments:

1. Adjustable steel clevis hangers for individual horizontal runs less than **20 ft. (6 m)** long.
2. Roller hangers and spring hangers for individual horizontal runs **20 ft. (6 m)** or longer.
3. Pipe Roller: MSS SP-58, Type 44 for multiple horizontal piping **20 ft. (6 m)** or longer, supported on a trapeze.
4. Spring hangers to support vertical runs.
5. Copper-clad hangers and supports for hangers and supports in direct contact with copper tube.

D. Install hangers for metal tubing and piping, with maximum horizontal spacing and minimum rod diameters, to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

E. Support horizontal piping within [**12 inches (300 mm)**]<**Insert dimension**> of each fitting.

F. Support vertical runs of metal tubing and piping to comply with MSS SP-58, locally enforced codes, and authorities having jurisdiction requirements, whichever are most stringent.

3.7 FIELD QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Perform tests and inspections.

C. Tests and Inspections:

1. Comply with ASME B31.5, Chapter VI.
2. Test refrigerant piping, specialties, and receivers. Isolate compressor, condenser, evaporator, and safety devices from test pressure if they are not rated above the test pressure.
3. Test high- and low-pressure side piping of each system separately at not less than the pressures indicated in "Performance Requirements" Article.

    a. Fill system with nitrogen to the required test pressure.
    b. System must maintain test pressure at the manifold gauge throughout duration of test.
    c. Test joints and fittings with electronic leak detector or by brushing a small amount of soap and glycerin solution over joints.
    d. Remake leaking joints using new materials, and retest until satisfactory results are achieved.

4. Prepare test and inspection reports.

3.8 SYSTEM CHARGING

A. Procedures: Charge system using the following procedures:

1. Install core in filter dryers after leak test but before evacuation.
2. Evacuate entire refrigerant system with a vacuum pump to **500 micrometers (67 Pa)**. If vacuum holds for 12 hours, system is ready for charging.
3. Break vacuum with refrigerant gas, allowing pressure to build up to **2 psig (14 kPa)**.
4. Charge system with a new filter-dryer core in charging line.

3.9 ADJUSTING

A. Adjust thermostatic expansion valve to obtain proper evaporator superheat.

B. Adjust high- and low-pressure switch settings to avoid short cycling in response to fluctuating suction pressure.

C. Adjust set-point temperature of air-conditioning or chilled-water controllers to the system design temperature.

D. Adjustments: Perform the following adjustments before operating the refrigeration system, in accordance with manufacturer's written instructions:

1. Open shutoff valves in condenser water circuit.
2. Verify that compressor oil level is correct.
3. Open compressor suction and discharge valves.
4. Open refrigerant valves but not bypass valves that are used for other purposes.
5. Check open compressor-motor alignment and verify lubrication for motors and bearings.

E. Replace core of replaceable filter dryer after system has been adjusted and after design flow rates and pressures are established.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 11 19 00 - DOMESTIC WATER PIPING SPECIALTIES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Vacuum breakers.
2. Backflow preventers.
3. Water pressure-reducing valves.
4. Automatic water shutoff valve systems.
5. Balancing valves.
6. Temperature-actuated, water mixing valves.
7. Strainers for domestic water piping.
8. Outlet boxes.
9. Hose stations.
10. Hose bibbs.
11. Wall hydrants.
12. Ground hydrants.
13. Post hydrants.
14. Roof hydrants.
15. Drain valves.
16. Water-hammer arresters.
17. Trap-seal primer device.
18. Trap-seal primer systems.
19. Flexible connectors.
20. Water meters.

B. Related Requirements:

1. Section 220500 "Common Work Results for Plumbing."
2. Section 221116 "Domestic Water Piping" for water meters.
3. Section 223200 "Domestic Water Filtration Equipment" for water filters in domestic water piping.
4. Section 224300 "Healthcare Plumbing Fixtures" for thermostatic mixing valves for sitz baths, thermostatic mixing-valve assemblies for hydrotherapy equipment, and outlet boxes for dialysis equipment.
5. Section 224500 "Emergency Plumbing Fixtures" for water tempering equipment.
6. Section 224700 "Drinking Fountains and Water Coolers."
7. Section 230923.18 "Leak Detection Instruments" for leak detection devices related to HVAC applications.
8. Section 331415 "Site Water Distribution Piping" for fire water-service backflow prevention devices.

1.2 DEFINITIONS

A. AMI: Advanced Metering Infrastructure.

B. AMR: Automatic Meter Reading.

C. FKM: A family of fluoroelastomer materials defined by ASTM D1418.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings: For domestic water piping specialties.

1. Include diagrams for power, signal, and control wiring.

1.4 INFORMATIONAL SUBMITTALS

A. Test and inspection reports.

B. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For domestic water piping specialties to include in emergency, operation, and maintenance manuals.

PART 2 - PRODUCTS

2.1 GENERAL REQUIREMENTS FOR PIPING SPECIALTIES

A. Domestic water piping specialties intended to convey or dispense water for human consumption are to comply with the SDWA, requirements of authorities having jurisdiction, and NSF 61 and NSF 372, or to be certified in compliance with NSF 61 and NSF 372 by an American National Standards Institute (ANSI)-accredited third-party certification body that the weighted average lead content at wetted surfaces is less than or equal to 0.25 percent.

2.2 PERFORMANCE REQUIREMENTS

A. Minimum Working Pressure for Domestic Water Piping Specialties: [**125 psig (860 kPa)**]<**Insert value**> unless otherwise indicated.

2.3 VACUUM BREAKERS

A. Pipe-Applied, Atmospheric-Type Vacuum Breakers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Cash Acme Plumbing Products; an RWC brand**]
c. [**FEBCO; A WATTS Brand**]
d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]

f. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
b. **[Cash Acme Plumbing Products; an RWC brand]**
c. **[FEBCO; A WATTS Brand]**
d. **[WATTS; A Watts Water Technologies Company]**
e. **[Zurn Industries, LLC]**
f. **<Insert manufacturer's name>**

3. Standard: ASSE 1001.
4. Size: **NPS 1/4 to NPS 3 (DN 8 to DN 80)**, as required to match connected piping.
5. Body: Bronze.
6. Inlet and Outlet Connections: Threaded.
7. Finish: **[Rough bronze][Chrome plated]**.

B. Hose-Connection Vacuum Breakers:

1. Manufacturers: Subject to compliance with requirements, **[provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]**:

a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
b. **[Cash Acme Plumbing Products; an RWC brand]**
c. **[Champion-Arrowhead]**
d. **[Jay R. Smith Mfg Co; a division of Morris Group International]**
e. **[MIFAB, Inc]**
f. **[WATTS; A Watts Water Technologies Company]**
g. **[Woodford Manufacturing Company]**
h. **[Zurn Industries, LLC]**
i. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

a. **[Apollo Valves; a part of Aalberts Integrated Piping Systems]**
b. **[Cash Acme Plumbing Products; an RWC brand]**
c. **[Champion-Arrowhead]**
d. **[Jay R. Smith Mfg Co; a division of Morris Group International]**
e. **[MIFAB, Inc]**
f. **[WATTS; A Watts Water Technologies Company]**
g. **[Woodford Manufacturing Company]**
h. **[Zurn Industries, LLC]**
i. **<Insert manufacturer's name>**

3. Standard: ASSE 1011.
4. Body: Bronze, nonremovable, with manual drain.
5. Outlet Connection: Garden-hose threaded complying with ASME B1.20.7.
6. Finish: **[Chrome or nickel plated][Rough bronze]**.

C. Pressure Vacuum Breakers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**FEBCO; A WATTS Brand**]
    c. [**WATTS; A Watts Water Technologies Company**]
    d. [**Zurn Industries, LLC**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**FEBCO; A WATTS Brand**]
    c. [**WATTS; A Watts Water Technologies Company**]
    d. [**Zurn Industries, LLC**]
    e. <**Insert manufacturer's name**>

3. Standard: ASSE 1020.
4. Operation: Continuous-pressure applications.
5. Pressure Loss: [**5 psig (35 kPa)**]<**Insert value**> maximum, through middle third of flow range.
6. Size: <**Insert NPS (DN)**>.
7. Design Flow Rate: <**Insert gpm (L/s)**>.
8. Selected Unit Flow Range Limits: <**Insert gpm (L/s)**>.
9. Pressure Loss at Design Flow Rate: <**Insert psig (kPa)**>.
10. Accessories:

    a. Valves: Ball type, on inlet and outlet.

D. Laboratory-Faucet Vacuum Breakers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. [**Zurn Industries, LLC**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. [**Zurn Industries, LLC**]
    d. <**Insert manufacturer's name**>

3. Standard: ASSE 1035.
4. Size: **NPS 1/4 or NPS 3/8 (DN 8 or DN 10)** matching faucet size.

5. Body: Bronze.
6. End Connections: Threaded.
7. Finish: Chrome plated.

E. Spill-Resistant Vacuum Breakers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   b. [**WATTS; A Watts Water Technologies Company**]
   c. [**Zurn Industries, LLC**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   b. [**WATTS; A Watts Water Technologies Company**]
   c. [**Zurn Industries, LLC**]
   d. <**Insert manufacturer's name**>

3. Standard: ASSE 1056.
4. Operation: Continuous-pressure applications.
5. Size: [**NPS 3/8 (DN 10)**][**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**][**NPS 1 (DN 25)**].
6. Accessories:

   a. Valves: Ball type, on inlet and outlet.

2.4 BACKFLOW PREVENTERS

A. Intermediate Atmospheric-Vent Backflow Preventers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   b. [**Caleffi North America**]
   c. [**Cash Acme Plumbing Products; an RWC brand**]
   d. [**WATTS; A Watts Water Technologies Company**]
   e. [**Zurn Industries, LLC**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
   b. [**Caleffi North America**]
   c. [**Cash Acme Plumbing Products; an RWC brand**]

d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]
f. <**Insert manufacturer's name**>

3. Standard: ASSE 1012.
4. Operation: Continuous-pressure applications.
5. Size: [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**].
6. Body: Bronze.
7. End Connections: [**Union, solder**][**Solder**] joint.
8. Finish: [**Rough bronze**]<**Insert finish**>.

B. Reduced-Pressure-Principle Backflow Preventers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Ames Fire & Waterworks; A Watts Water Technologies Company**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Caleffi North America**]
d. [**FEBCO; A WATTS Brand**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Zurn Industries, LLC**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ames Fire & Waterworks; A Watts Water Technologies Company**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Caleffi North America**]
d. [**FEBCO; A WATTS Brand**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Zurn Industries, LLC**]
g. <**Insert manufacturer's name**>

3. Standard: ASSE 1013.
4. Operation: Continuous-pressure applications.
5. Pressure Loss: [**12 psig (83 kPa)**]<**Insert value**> maximum, through middle third of flow range.
6. Size: <**Insert NPS (DN)**>.
7. Design Flow Rate: <**Insert gpm (L/s)**>.
8. Selected Unit Flow Range Limits: <**Insert gpm (L/s)**>.
9. Pressure Loss at Design Flow Rate: <**Insert psig (kPa)**> for sizes **NPS 2 (DN 50)** and smaller; <**Insert psig (kPa)**> for **NPS 2-1/2 (DN 65)** and larger.
10. Body: [**Bronze**][**cast silicon copper alloy**][**or**][**stainless steel**] for **NPS 2 (DN 50)** and smaller; [**ductile or cast iron with interior lining that complies with AWWA C550 or that is FDA approved**][**or**][**stainless steel**] for **NPS 2-1/2 (DN 65)** and larger.
11. End Connections: Threaded for **NPS 2 (DN 50)** and smaller; [**flanged**]<**Insert type**> for **NPS 2-1/2 (DN 65)** and larger.
12. Configuration: Designed for [**horizontal, straight-through**][**vertical-inlet, horizontal-center-section, and vertical-outlet**][**vertical**]<**Insert configuration**> flow.
13. Accessories:

a. Valves NPS 2 (DN 50) and Smaller: Ball type with threaded ends on inlet and outlet.
b. Valves NPS 2-1/2 (DN 65) and Larger: Outside-screw and yoke-gate type with flanged ends on inlet and outlet.
c. Air-Gap Fitting: ASME A112.1.2, matching backflow-preventer connection.

C. Double-Check, Backflow-Prevention Assemblies:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Ames Fire & Waterworks; A Watts Water Technologies Company**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**FEBCO; A WATTS Brand**]
d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ames Fire & Waterworks; A Watts Water Technologies Company**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**FEBCO; A WATTS Brand**]
d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]
f. <**Insert manufacturer's name**>

3. Standard: ASSE 1015.
4. Operation: Continuous-pressure applications unless otherwise indicated.
5. Pressure Loss: [**5 psig (35 kPa)**]<**Insert value**> maximum, through middle third of flow range.
6. Size: <**Insert NPS (DN)**>.
7. Design Flow Rate: <**Insert gpm (L/s)**>.
8. Selected Unit Flow Range Limits: <**Insert gpm (L/s)**>.
9. Pressure Loss at Design Flow Rate: <**Insert psig (kPa)**> for sizes **NPS 2 (DN 50)** and smaller; <**Insert psig (kPa)**> for **NPS 2-1/2 (DN 65)** and larger.
10. Body: [**Bronze**][**cast silicon copper alloy**][**or**][**stainless steel**] for **NPS 2 (DN 50)** and smaller; [**ductile or cast iron with interior lining that complies with AWWA C550 or that is FDA approved**][**or**][**stainless steel**] for **NPS 2-1/2 (DN 65)** and larger.
11. End Connections: Threaded for **NPS 2 (DN 50)** and smaller; [**flanged**]<**Insert type**> for **NPS 2-1/2 (DN 65)** and larger.
12. Configuration: Designed for [**horizontal, straight-through**]<**Insert configuration**> flow.
13. Accessories:

a. Valves NPS 2 (DN 50) and Smaller: Ball type with threaded ends on inlet and outlet.
b. Valves NPS 2-1/2 (DN 65) and Larger: Outside-screw and yoke-gate type with flanged ends on inlet and outlet.

D. Beverage-Dispensing-Equipment Backflow Preventers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**WATTS; A Watts Water Technologies Company**]
c. [**Zurn Industries, LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**WATTS; A Watts Water Technologies Company**]
c. [**Zurn Industries, LLC**]
d. <**Insert manufacturer's name**>

3. Standard: ASSE 1022.
4. Operation: Continuous-pressure applications.
5. Size: **NPS 1/4 or NPS 3/8 (DN 8 or DN 10)**.
6. Body: [**Stainless steel or non-metallic**]<**Insert material**>.
7. End Connections: Threaded or flare.

E. Dual-Check-Valve Backflow Preventers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cash Acme Plumbing Products; an RWC brand**]
d. [**Flomatic Valves; Flomatic Corporation**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Zurn Industries, LLC**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**A.Y. McDonald Mfg. Co.**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**Cash Acme Plumbing Products; an RWC brand**]
d. [**Flomatic Valves; Flomatic Corporation**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Zurn Industries, LLC**]
g. <**Insert manufacturer's name**>

3. Standard: ASSE 1024.
4. Operation: Continuous-pressure applications.
5. Size: [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**][**NPS 1 (DN 25)**][**NPS 1-1/4 (DN 32)**].
6. Body: Bronze with union inlet.

F. Carbonated-Beverage-Dispenser, Dual-Check-Valve Backflow Preventers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**WATTS; A Watts Water Technologies Company**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**WATTS; A Watts Water Technologies Company**]
b. <**Insert manufacturer's name**>

3. Standard: ASSE 1032.
4. Operation: Continuous-pressure applications.
5. Size: **NPS 1/4 or NPS 3/8 (DN 8 or DN 10)**.
6. Body: Stainless steel.
7. End Connections: Threaded or flare.

G. Hose-Connection Backflow Preventers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**WATTS; A Watts Water Technologies Company**]
c. [**Woodford Manufacturing Company**]
d. [**Zurn Industries, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**WATTS; A Watts Water Technologies Company**]
c. [**Woodford Manufacturing Company**]
d. [**Zurn Industries, LLC**]
e. <**Insert manufacturer's name**>

3. Standard: ASSE 1052.
4. Operation: Up to **10-ft. head of water (30-kPa)** back pressure.
5. Inlet Size: **NPS 3/4 (DN 20)**.
6. Outlet Size: Garden-hose thread complying with ASME B1.20.7.
7. Capacity: At least **3-gpm (0.19-L/s)** flow.

H. Backflow-Preventer Test Kits:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Ames Fire & Waterworks; A Watts Water Technologies Company**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**FEBCO; A WATTS Brand**]
d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Ames Fire & Waterworks; A Watts Water Technologies Company**]
b. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
c. [**FEBCO; A WATTS Brand**]
d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]
f. <**Insert manufacturer's name**>

3. Description: Factory calibrated, with gauges, fittings, hoses, and carrying case with test-procedure instructions.

2.5 WATER PRESSURE-REDUCING VALVES

A. Water Regulators:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Caleffi North America**]
c. [**Cash Acme Plumbing Products; an RWC brand**]
d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Caleffi North America**]
c. [**Cash Acme Plumbing Products; an RWC brand**]
d. [**WATTS; A Watts Water Technologies Company**]
e. [**Zurn Industries, LLC**]
f. <**Insert manufacturer's name**>

3. Standard: ASSE 1003.
4. Pressure Rating: Initial working pressure of **150 psig (1035 kPa)**.
5. Size: <**Insert NPS (DN)**>.
6. Design Flow Rate: <**Insert gpm (L/s)**>.
7. Design Inlet Pressure: <**Insert psig (kPa)**>.
8. Design Outlet Pressure Setting: <**Insert psig (kPa)**>.

9. Body: Bronze[**with chrome-plated finish**] for **NPS 2 (DN 50)** and smaller; [**bronze**][**cast iron with interior lining that complies with AWWA C550 or that is FDA approved**] for **NPS 2-1/2 and NPS 3 (DN 65 and DN 80)**.
10. Valves for Booster Heater Water Supply: Include integral bypass.
11. End Connections: Threaded or solder for **NPS 2 (DN 50)** and smaller; flanged or solder for **NPS 2-1/2 and NPS 3 (DN 65 and DN 80)**.

B. Water-Control Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**CLA-VAL**]
    c. [**Flomatic Valves; Flomatic Corporation**]
    d. [**IMI Hydronic Engineering Inc**]
    e. [**OCV Control Valves**]
    f. [**WATTS; A Watts Water Technologies Company**]
    g. [**Zurn Industries, LLC**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    b. [**CLA-VAL**]
    c. [**Flomatic Valves; Flomatic Corporation**]
    d. [**IMI Hydronic Engineering Inc**]
    e. [**OCV Control Valves**]
    f. [**WATTS; A Watts Water Technologies Company**]
    g. [**Zurn Industries, LLC**]
    h. <**Insert manufacturer's name**>

3. Description: Pilot-operated, diaphragm-type, single-seated, main water-control valve.
4. Pressure Rating: Initial working pressure of **150 psig (1035 kPa)** minimum with AWWA C550 or FDA-approved, interior epoxy coating. Include small pilot-control valve, restrictor device, specialty fittings, and sensor piping.
5. Main Valve Body: Cast- or ductile-iron body with AWWA C550 or FDA-approved, interior epoxy coating; or stainless steel body.

    a. Size: <**Insert NPS (DN)**>.
    b. Pattern: [**Angle**][**Globe**]-valve design.
    c. Trim: Stainless steel.

6. Design Flow: <**Insert gpm (L/s)**>.
7. Design Inlet Pressure: <**Insert psig (kPa)**>.
8. Design Outlet Pressure Setting: <**Insert psig (kPa)**>.
9. End Connections: Threaded for **NPS 2 (DN 50)** and smaller; [**flanged**]<**Insert type**> for **NPS 2-1/2 (DN 65)** and larger.

2.6 AUTOMATIC WATER SHUTOFF VALVE SYSTEMS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**FloLogic, Inc.**]
2. [**OnSite PRO Inc**]
3. [**QMI Manufacturing Inc.**]
4. [**RectorSeal Plumbing; A CSW Industrials Company**]
5. [**Reliance Detection Technologies**]
6. [**WaterCop**]
7. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**FloLogic, Inc.**]
2. [**OnSite PRO Inc**]
3. [**QMI Manufacturing Inc.**]
4. [**RectorSeal Plumbing; A CSW Industrials Company**]
5. [**Reliance Detection Technologies**]
6. [**WaterCop**]
7. <**Insert manufacturer's name**>

C. Shutoff Control Ball Valves and Actuators <**Insert drawing designation if any**>:

1. Size: [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**][**NPS 1 (DN 25)**][**NPS 1-1/4 (DN 32)**][**NPS 1-1/2 (DN 40)**][**NPS 2 (DN 50)**]<**Insert pipe size**>.
2. Design Flow Rate: <**Insert gpm (L/s)**>.
3. Design Inlet Pressure: <**Insert psig (kPa)**>.
4. Control Valve: Two-piece, full-port brass ball valve, MSS SP-110.
    a. End Connections: Threaded, female.
    b. Fittings: One **3/8-by-1/2-inch (9.5-by-12.7-mm)** male compression and one **3/8-by-1/2-inch (9.5-by-12.7-mm)** female compression.
    c. Seats: PTFE.
    d. O-Rings: FKM.
    e. Stem: Low-lead brass. Blowout proof.
    f. CWP Rating: [**600 psig (4140 kPa)**]<**Insert value**>.
5. Manual-override control turn-knob for emergency operation of valve.
6. Valve Actuator: Motor operated, with or without gears, electric and electronic. Capable of closing valve against inlet pressure. Direct mount, fails closed.
    a. Power Supply: [**Battery**][**120 V ac**][**120 V ac step-down transformer**][**with cord and plug**].
    b. Manual Intervention: Allowed.
    c. Position Indicator: Standard.
7. Actuator Enclosure: Suitable for ambient conditions encountered by application.
8. Wireless Leak Detection System:
    a. Sensor-Water Flow Type: Pipe-mounted to detect water flow.
    b. Sensor-Rope Type: Absorbent water sensing rope constructed from twisted metal

conductor wires insulated from one another and surrounded by polyethylene mesh braid jacket to detect water presence.

c. Wireless Signal Range: **100 ft. (30.5 m)** minimum between sensors and receiver.
d. Self-monitoring enabled system; faults for lost communication between receiver and sensor(s).
e. Onboard Battery Backup: 48 hours of protection.[**Valve to close prior to backup failure.**]
f. LED Indicators: Wireless signal strength, communication loss, water fault, low-temperature fault, and low battery.
g. FCC-Approved Wireless Communication System: Between sensors, repeaters, and receivers.
h. Output Contacts: Interface with home security or BAS, cellular text notification service, or auto dialer accessories.
i. Wireless Signal Repeater: Boosts signal performance between wireless sensors and receiver.

1) Push-button pairing and unpairing, into and out of the network.
2) Visual indication of wireless signal strength, low battery, and lost communication.
3) Standard wall outlet, 120 V ac, power.
4) Battery Backup: Two (2) AA batteries for battery backup to maintain system integrity during a power outage.

j. Wireless Water Switch: Allows manual override or wireless system functionality and closes the valve to shut off water flow.
k. Hard-Wired Water Switch: Allows manual override or wireless system functionality and closes the valve to shut off water flow.

9. Wired Leak Detection System:

a. Power Supply: Class II transformer with cord and plug, 120 V ac, UL listed.
b. Power Cord Length: [**12 ft. (3.66 m)**]<**Insert dimension**>.
c. Control Panel: LED power and LED valves indicator.
d. Alarms: Audible alarm[**, with external output**].
e. Output Contacts: Interface with home security or BAS, cellular text notification service, or auto dialer accessories.
f. Wired Sensors:

1) Quantity Per Receiver: [**One**][**Two**][**Three**][**Four**][**Five**][**Six**].

g. Cable Length: [**8 ft. (2.44 m)**][**25 ft. (7.62 m)**][**50 ft. (15.2 m)**][**100 ft. (30.5 m)**]<**Insert dimension**>.
h. Cable Adder: [**10 ft. (3 m)**][**25 ft. (7.62 m)**][**50 ft. (15.2 m)**][**100 ft. (30.5 m)**]<**Insert dimension**> in length.

D. Shutoff Control Butterfly Valve and Actuator <**Insert drawing designation if any**>:

1. Size: [**NPS 2-1/2 (DN 65)**][**NPS 3 (DN 80)**][**NPS 4 (DN 100)**]<**Insert pipe size**>.
2. Compliance: MSS SP-67.
3. Full-port, epoxy-coated, ductile-iron lug body.
4. Seat: EPDM, **minus 30 deg F to plus 250 deg F (minus 34 deg C to plus 121 deg C)**.
5. Face-to-Face Flange: ASME B16.5 flanges.
6. Disc Design: Floating stainless steel dual shaft.
7. Disc Material: Coated ductile iron.
8. Locating Pin: Carbon steel.
9. Bushings: PTFE.
10. O-Rings: EPDM.
11. Ten-position stop.

12. Manual-override control turn-knob for emergency operation of valve.
13. Valve Actuator: Motor operated, with or without gears, electric and electronic. Capable of closing valve against inlet pressure. Direct mount, fails closed.

    a. Power Supply: [**Battery**][**120 V ac**][**120 V ac step-down transformer**][**with cord and plug**].
    b. Manual Intervention: Allowed.
    c. Position Indicator: Standard.

14. Actuator Enclosure: Suitable for ambient conditions encountered by application.
15. Wireless Leak Detection System:

    a. Sensor-Water Flow Type: Pipe-mounted to detect water flow.
    b. Sensor-Rope Type: Absorbent water sensing rope constructed from twisted metal conductor wires insulated from one another and surrounded by polyethylene mesh braid jacket to detect water presence.
    c. Wireless Signal Range: **100 ft. (30.5 m)** minimum between sensors and receiver.
    d. Self-monitoring enabled system; faults for lost communication between receiver and sensor(s).
    e. Onboard Battery Backup: 48 hours of protection.[**Valve to close prior to backup failure.**]
    f. LED Indicators: Wireless signal strength, communication loss, water fault, low-temperature fault, and low battery.
    g. FCC-Approved Wireless Communication System: Between sensors, repeaters, and receivers.
    h. Output Contacts: Interface with home security or BAS, cellular text notification service, or auto dialer accessories.
    i. Wireless Signal Repeater: Boosts signal performance between wireless sensors and receiver.

        1) Push-button pairing and unpairing, into and out of the network.
        2) Visual indication of wireless signal strength, low battery, and lost communication.
        3) Standard wall outlet, 120 V ac, power.
        4) Battery Backup: Two (2) AA batteries for battery backup to maintain system integrity during a power outage.

    j. Wireless Water Switch: Allows manual override or wireless system functionality and closes the valve to shut off water flow.
    k. Hard-Wired Water Switch: Allows manual override or wireless system functionality and closes the valve to shut off water flow.

16. Wired Leak Detection System:

    a. Power Supply: Class II transformer with cord and plug, 120 V ac, UL listed.
    b. Power Cord Length: [**12 ft. (3.66 m)**]<**Insert dimension**>.
    c. Control Panel: LED power and LED valves indicator.
    d. Alarms: Audible alarm[**, with external output**].
    e. Output Contacts: Interface with home security or BAS, cellular text notification service, or auto dialer accessories.
    f. Wired Sensors:

        1) Quantity Per Receiver: [**One**][**Two**][**Three**][**Four**][**Five**][**Six**].

    g. Cable Length: [**8 ft. (2.44 m)**][**25 ft. (7.62 m)**][**50 ft. (15.2 m)**][**100 ft. (30.5 m)**]<**Insert dimension**>.
    h. Cable Adder: [**10 ft. (3 m)**][**25 ft. (7.62 m)**][**50 ft. (15.2 m)**][**100 ft. (30.5 m)**]<**Insert**

dimension> in length.

E. Clothes Washer Shutoff Control Valve and Actuator <**Insert drawing designation if any**>:

1. Brass or stainless steel ball valve.
2. End Connections: Male hose connections, **NPS 3/4 (DN 20)**.
3. Pressure Rating: **400 psi (2758 kPa)** at **32 to 150 deg F (0 to 65.6 deg C)**.
4. Valve Actuator:

    a. Enclosure: Suitable for ambient conditions encountered by application.
    b. Power Supply: [**Battery**][**120 V ac**][**120 V ac step-down transformer**][**with cord and plug**].
    c. Position Indicator: Standard.

5. Wired Leak Detection System:

    a. Water sensor with minimum **6-ft. (1.8-m)** length of wire.
    b. 120 V ac step-down transformer with cord and plug.
    c. LED operation and leak notification.
    d. Audible alarm.
    e. Power failure or manual disconnection of power causes valves to close.

F. Accessories:

1. Electrical Plug Interrupter: Plugs into standard 120 V ac wall outlet.
2. Gas Flow Interrupter: ECO connector with female spade connectors. Factory prewired, **8 ft. (2.44 m)**.
3. Gas Interface Cable: Interface cable with male and female connectors.
4. Step-Down Transformer: [**120**][**208**][**240**] V ac to 24 V ac with mounting plate, **12-ft. (3.66-m)** plenum wire to power, and **8-ft. (2.44-m)** plenum wire to sensor.
5. Liquid Level Sensors: Monitor fluid levels in addition to detecting plumbing leaks.
6. Auto Dialer: Send and receive automatic alerts when a fault condition occurs. Standard output contacts trigger up to nine predetermined telephone number calls.

    a. Prerecord message for future playback.
    b. 10-second recordable message.
    c. Built-in tamper switch.
    d. DC adaptor with battery backup.
    e. Programmable as a silent (dialer only) or audible (siren and dialer) alarm.
    f. Easy "Stop Call Sequence" - push "#" on phone to acknowledge the alarm and stop the dialing sequence.

7. Cellular Text Notification System:

    a. Event SMS text notification to up to three cell phones.
    b. Battery Backup: Four (4) AA batteries.
    c. **12-ft. (3.66-m)** interface cable to leak detection system.
    d. Customized messaging.
    e. <**Insert wireless network service provider**>.

2.7 BALANCING VALVES

A. Copper-Alloy Calibrated Balancing Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Bell & Gossett; a Xylem brand**]
b. [**IMI Hydronic Engineering Inc**]
c. [**Nexus Valve, Inc.; Aalberts Hydronic Flow Control**]
d. [**NIBCO INC.**]
e. [**WATTS; A Watts Water Technologies Company**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bell & Gossett; a Xylem brand**]
b. [**IMI Hydronic Engineering Inc**]
c. [**Nexus Valve, Inc.; Aalberts Hydronic Flow Control**]
d. [**NIBCO INC.**]
e. [**WATTS; A Watts Water Technologies Company**]
f. <**Insert manufacturer's name**>

3. Type: [**Ball**][**or**][**Y-pattern globe**] valve with two readout ports and memory-setting indicator.
4. Body: [**Brass**][**or**][**bronze**].
5. Size: Same as connected piping, but not larger than **NPS 2 (DN 50)**.
6. Accessories: Meter hoses, fittings, valves, differential pressure meter, and carrying case.

B. Memory-Stop Balancing Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Caleffi North America**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Milwaukee Valve Company**]
g. [**NIBCO INC.**]
h. [**Red-White Valve Corp.**]
i. [**Stockham; a Crane Co. brand**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
b. [**Caleffi North America**]
c. [**Crane Fluid Systems; Crane Co.**]
d. [**Hammond Valve**]
e. [**Jenkins Valves; a Crane Co. brand**]
f. [**Milwaukee Valve Company**]

g. [**NIBCO INC.**]
h. [**Red-White Valve Corp.**]
i. [**Stockham; a Crane Co. brand**]
j. <**Insert manufacturer's name**>

3. Standard: MSS SP-110 for two-piece, copper-alloy ball valves.
4. Pressure Rating: **400-psig (2760-kPa)** minimum CWP.
5. Size: **NPS 2 (DN 50)** or smaller.
6. Body: Copper alloy.
7. Port: Standard or full port.
8. Ball: Chrome-plated brass or stainless steel.
9. Seats and Seals: Replaceable.
10. End Connections: Solder joint or threaded.
11. Handle: Vinyl-covered steel with memory-setting device.

C. Automatic Flow Control Balancing Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Controls; a Division of Morris Group International**]
b. [**Caleffi North America**]
c. [**IMI Hydronic Engineering Inc**]
d. [**ThermOmegaTech**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Controls; a Division of Morris Group International**]
b. [**Caleffi North America**]
c. [**IMI Hydronic Engineering Inc**]
d. [**ThermOmegaTech**]
e. <**Insert manufacturer's name**>

3. Flow Regulation: Plus or minus 5 percent over 95 percent of the working range.
4. Pressure Rating: **200 psig (1380 kPa)**.
5. Size: **NPS 2 (DN 50)** or smaller.
6. Body: Stainless steel or brass.
7. Flow Cartridge: Stainless steel or antiscale polymer.
8. End Connections: Threaded or solder joint.

2.8 TEMPERATURE-ACTUATED, WATER MIXING VALVES

A. Water-Temperature Limiting Devices:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Controls; a Division of Morris Group International**]

b. [**Acorn Engineering Company; a Division of Morris Group International**]
c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
d. [**Cash Acme Plumbing Products; an RWC brand**]
e. [**POWERS; A Watts Water Technologies Company**]
f. [**Symmons Industries, Inc**]
g. [**Taco Comfort Solutions**]
h. [**WATTS; A Watts Water Technologies Company**]
i. [**Zurn Industries, LLC**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Controls; a Division of Morris Group International**]
b. [**Acorn Engineering Company; a Division of Morris Group International**]
c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
d. [**Cash Acme Plumbing Products; an RWC brand**]
e. [**POWERS; A Watts Water Technologies Company**]
f. [**Symmons Industries, Inc**]
g. [**Taco Comfort Solutions**]
h. [**WATTS; A Watts Water Technologies Company**]
i. [**Zurn Industries, LLC**]
j. <**Insert manufacturer's name**>

3. Standard: ASSE 1070.
4. Pressure Rating: **125 psig (860 kPa)**.
5. Type: Thermostatically controlled, water mixing valve.
6. Material: Bronze body with corrosion-resistant interior components.
7. Connections: Threaded[**union**] inlets and outlet.
8. Accessories: Check stops on hot- and cold-water supplies, and adjustable, temperature-control handle.
9. Tempered-Water Setting: <**Insert deg F (deg C)**>.
10. Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.
11. Valve Finish: [**Chrome plated**][**Rough bronze**].

B. Primary, Thermostatic, Water Mixing Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Controls; a Division of Morris Group International**]
b. [**Acorn Engineering Company; a Division of Morris Group International**]
c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
d. [**Caleffi North America**]
e. [**Cash Acme Plumbing Products; an RWC brand**]
f. [**Lawler Manufacturing Company, Inc**]
g. [**POWERS; A Watts Water Technologies Company**]
h. [**Symmons Industries, Inc**]
i. [**WATTS; A Watts Water Technologies Company**]
j. [**Zurn Industries, LLC**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Controls; a Division of Morris Group International**]
    b. [**Acorn Engineering Company; a Division of Morris Group International**]
    c. [**Apollo Valves; a part of Aalberts Integrated Piping Systems**]
    d. [**Caleffi North America**]
    e. [**Cash Acme Plumbing Products; an RWC brand**]
    f. [**Lawler Manufacturing Company, Inc**]
    g. [**POWERS; A Watts Water Technologies Company**]
    h. [**Symmons Industries, Inc**]
    i. [**WATTS; A Watts Water Technologies Company**]
    j. [**Zurn Industries, LLC**]
    k. <**Insert manufacturer's name**>

3. Standard: ASSE 1017.
4. Pressure Rating: **125 psig (860 kPa)** minimum unless otherwise indicated.
5. Type: [**Exposed-mounted**][**Cabinet-type**], thermostatically controlled, water mixing valve.
6. Material: Bronze body with corrosion-resistant interior components.
7. Connections: Threaded[**union**] inlets and outlet.
8. Accessories: Manual temperature control, check stops on hot- and cold-water supplies, and adjustable, temperature-control handle.
9. Tempered-Water Setting: <**Insert deg F (deg C)**>.
10. Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.
11. Selected Valve Flow Rate at 45-psig (310-kPa) Pressure Drop: <**Insert gpm (L/s)**>.
12. Pressure Drop at Design Flow Rate: <**Insert psig (kPa)**>.
13. Valve Finish: [**Chrome plated**][**Polished, chrome plated**][**Rough bronze**].
14. Piping Finish: [**Chrome plated**][**Copper**].
15. Cabinet: Factory fabricated, stainless steel, for [**recessed**][**surface**] mounting and with hinged, stainless steel door.

C. Primary, Electronic, Water Mixing Valve Assemblies:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Controls; a Division of Morris Group International**]
    b. [**Acorn Engineering Company; a Division of Morris Group International**]
    c. [**Caleffi North America**]
    d. [**Leonard Valve Company**]
    e. [**POWERS; A Watts Water Technologies Company**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Controls; a Division of Morris Group International**]
    b. [**Acorn Engineering Company; a Division of Morris Group International**]
    c. [**Caleffi North America**]
    d. [**Leonard Valve Company**]
    e. [**POWERS; A Watts Water Technologies Company**]
    f. <**Insert manufacturer's name**>

3. Standard: ASSE 1017.
4. Pressure Rating: **125 psig (860 kPa)** minimum unless otherwise indicated.
5. Type: Exposed, electronically controlled, water mixing valve.
6. Material: Bronze body with corrosion-resistant interior components.
7. Connections: Threaded or solder joint inlets and outlet.
8. Accessories: Manual temperature override control, check stops on hot- and cold-water supplies, and automatic hot- and cold-water shutoff upon inlet supply failure.
9. Tempered-Water Setting: <**Insert deg F (deg C)**>.
10. Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.
11. Selected Valve Flow Rate at 45-psig (310-kPa) Pressure Drop: <**Insert gpm (L/s)**>.
12. Pressure Drop at Design Flow Rate: <**Insert psig (kPa)**>.
13. Valve Finish: Bronze.
14. Digital temperature control and monitoring module.

    a. Controls temperature within plus or minus **2 deg F (1 deg C)**.
    b. User programmable at module or through BAS.
    c. ASHRAE 188 compliance.
    d. Local and remote monitoring.
    e. [**BACNet**][**Modbus**][**Metasys**][**Ethernet**] protocol language(s).
    f. [**115**][**230**] V ac, 60 Hz.
    g. Battery backup.

D. Manifold, Thermostatic, Water Mixing Valve Assemblies:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Engineering Company; a Division of Morris Group International**]
    b. [**POWERS; A Watts Water Technologies Company**]
    c. [**Symmons Industries, Inc**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Engineering Company; a Division of Morris Group International**]
    b. [**POWERS; A Watts Water Technologies Company**]
    c. [**Symmons Industries, Inc**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. <**Insert manufacturer's name**>

3. Description: Factory-fabricated, [**cabinet-type**][**exposed-mounted**], thermostatically controlled, water mixing valve assembly in [**two**][**three**]-valve parallel arrangement.
4. Large-Flow Parallel: Thermostatic, water mixing valve and downstream-pressure regulator with pressure gauges on inlet and outlet.
5. Intermediate-Flow Parallel: Thermostatic, water mixing valve and downstream-pressure regulator with pressure gauges on inlet and outlet.
6. Small-Flow Parallel: Thermostatic, water mixing valve.
7. Thermostatic Mixing Valves: Comply with ASSE 1017. Include check stops on hot- and cold-water inlets and shutoff valve on outlet.
8. Water Regulator(s): Comply with ASSE 1003. Include pressure gauge on inlet and outlet.

9. Pressure Rating: **125 psig (860 kPa)** minimum unless otherwise indicated.
10. Cabinet: Factory fabricated, stainless steel, for [**recessed**][**surface**] mounting and with hinged, stainless steel door.
11. Selected Large-Flow, Tempered-Water Valve Size: <**Insert size**>.
12. Tempered-Water Setting: <**Insert deg F (deg C)**>.
13. Unit Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.
14. Unit Minimum Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.
15. Selected Unit Flow Rate at **45-psig (310-kPa)** Pressure Drop: <**Insert gpm (L/s)**>.
16. Unit Pressure Drop at Design Flow Rate: <**Insert psig (kPa)**>.
17. Unit Tempered-Water Outlet Size: <**Insert NPS (DN)**> end connection.
18. Unit Hot- and Cold-Water Inlet Size: <**Insert NPS (DN)**> end connections.
19. Thermostatic Mixing Valve and Water Regulator Finish: [**Chrome plated**][**Polished, chrome plated**][**Rough bronze**].
20. Piping Finish: [**Chrome plated**][**Copper**].

E. Photographic-Process, Thermostatic, Water Mixing Valve Assemblies:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**POWERS; A Watts Water Technologies Company**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**POWERS; A Watts Water Technologies Company**]
    b. [**WATTS; A Watts Water Technologies Company**]
    c. <**Insert manufacturer's name**>

3. Standard: ASSE 1017, thermostatically controlled, water mixing valve made for precise, process-water temperature control.
4. Pressure Rating: **125 psig (860 kPa)** minimum unless otherwise indicated.
5. Material: Bronze body with corrosion-resistant interior components.
6. Connections: Threaded inlets and outlet.
7. Accessories: Manual temperature control, check stops on hot- and cold-water supplies, thermometer, shutoff valve, and adjustable, temperature-control handle.
8. Cabinet: Factory fabricated, stainless steel, for surface mounting; with controls and thermometer mounted on front.
9. Tempered-Water Setting: <**Insert deg F (deg C)**>.
10. Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.
11. Tempered-Water Outlet Size: <**Insert NPS (DN)**> end connection.
12. Hot- and Cold-Water Inlet Size: <**Insert NPS (DN)**> end connections.

F. Individual-Fixture, Water Tempering Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Controls; a Division of Morris Group International**]

b. [**Acorn Engineering Company; a Division of Morris Group International**]
c. [**Caleffi North America**]
d. [**Lawler Manufacturing Company, Inc**]
e. [**POWERS; A Watts Water Technologies Company**]
f. [**Zurn Industries, LLC**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Controls; a Division of Morris Group International**]
b. [**Acorn Engineering Company; a Division of Morris Group International**]
c. [**Caleffi North America**]
d. [**Lawler Manufacturing Company, Inc**]
e. [**POWERS; A Watts Water Technologies Company**]
f. [**Zurn Industries, LLC**]
g. <**Insert manufacturer's name**>

3. Standard: ASSE 1016, thermostatically controlled, water tempering valve.
4. Pressure Rating: **125 psig (860 kPa)** minimum unless otherwise indicated.
5. Material: Bronze body with corrosion-resistant interior components.
6. Temperature Control: Adjustable.
7. Connections: Threaded inlets and outlet.
8. Finish: Chrome plated.
9. Tempered-Water Setting: <**Insert deg F (deg C)**>.
10. Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.

G. Primary Water Tempering Valves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acorn Controls; a Division of Morris Group International**]
b. [**Heat-Timer Corporation**]
c. [**Holby Valve Inc.**]
d. [**WATTS; A Watts Water Technologies Company**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acorn Controls; a Division of Morris Group International**]
b. [**Heat-Timer Corporation**]
c. [**Holby Valve Inc.**]
d. [**WATTS; A Watts Water Technologies Company**]
e. <**Insert manufacturer's name**>

3. Standard: ASSE 1017, thermostatically controlled, water tempering valve, listed as tempering valve.
4. Pressure Rating: **125 psig (860 kPa)** minimum unless otherwise indicated.
5. Material: Bronze body.

6. Temperature Control: Manual.
7. Connections: Threaded inlets and outlet.
8. Selected Primary Water Tempering Valve Size: <**Insert size**>.
9. Tempered-Water Setting: <**Insert deg F (deg C)**>.
10. Tempered-Water Design Flow Rate: <**Insert gpm (L/s)**>.
11. Pressure Drop at Design Flow Rate: <**Insert psig (kPa)**>.
12. Tempered-Water Outlet Size: <**Insert NPS (DN)**> end connection.
13. Cold-Water Inlet Size: <**Insert NPS (DN)**> end connection.
14. Hot-Water Inlet Size: <**Insert NPS (DN)**> end connection.
15. Valve Finish: [**Rough bronze**]<**Insert finish**>.

2.9 STRAINERS FOR DOMESTIC WATER PIPING

A. Y-Pattern Strainers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Caleffi North America**]
    b. [**Keckley Company**]
    c. [**Titan Flow Control, Inc.**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. [**Zurn Industries, LLC**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Caleffi North America**]
    b. [**Keckley Company**]
    c. [**Titan Flow Control, Inc.**]
    d. [**WATTS; A Watts Water Technologies Company**]
    e. [**Zurn Industries, LLC**]
    f. <**Insert manufacturer's name**>

3. Pressure Rating: **125 psig (860 kPa)** minimum unless otherwise indicated.
4. Body: Bronze for **NPS 2 (DN 50)** and smaller; cast iron[**with interior lining that complies with AWWA C550 or that is FDA approved, epoxy coated and**] for **NPS 2-1/2 (DN 65)** and larger.
5. End Connections: Threaded for **NPS 2 (DN 50)** and smaller; flanged for **NPS 2-1/2 (DN 65)** and larger.
6. Screen: Stainless steel with round perforations unless otherwise indicated.
7. Perforation Size:

    a. Strainers NPS 2 (DN 50) and Smaller: [**0.020 inch (0.51 mm)**][**0.033 inch (0.84 mm)**][**0.062 inch (1.57 mm)**]<**Insert dimension**>.
    b. Strainers NPS 2-1/2 to NPS 4 (DN 65 to DN 100): [**0.045 inch (1.14 mm)**][**0.062 inch (1.57 mm)**][**0.125 inch (3.18 mm)**]<**Insert dimension**>.
    c. Strainers NPS 5 (DN 125) and Larger: [**0.10 inch (2.54 mm)**][**0.125 inch (3.18 mm)**][**0.25 inch (6.35 mm)**]<**Insert dimension**>.

8. Drain: [**Pipe plug**][**Factory-installed, hose-end drain valve**].

2.10 OUTLET BOXES

A. Clothes Washer Outlet Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Acorn Engineering Company; a Division of Morris Group International**]
    b. [**Guy Gray, IPS Corporation**]
    c. [**LSP Products Group**]
    d. [**Oatey Co.**]
    e. [**Sioux Chief Manufacturing Company, Inc.**]
    f. [**Symmons Industries, Inc**]
    g. [**Water-Tite, IPS Corporation**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Acorn Engineering Company; a Division of Morris Group International**]
    b. [**Guy Gray, IPS Corporation**]
    c. [**LSP Products Group**]
    d. [**Oatey Co.**]
    e. [**Sioux Chief Manufacturing Company, Inc.**]
    f. [**Symmons Industries, Inc**]
    g. [**Water-Tite, IPS Corporation**]
    h. <**Insert manufacturer's name**>

3. Mounting: Recessed.[**Fire rated.**]
4. Material and Finish: [**Enameled-steel or epoxy-painted-steel**][**Enameled-steel, epoxy-painted-steel, or plastic**][**Plastic**][**Stainless steel**] box and faceplate.
5. Faucet: Combination valved fitting or separate hot- and cold-water valved fittings complying with ASME A112.18.1. Include garden-hose thread complying with ASME B1.20.7 on outlets.
6. Drain Outlet Connection: [**NPS 1-1/2 (DN 40)**][**NPS 2 (DN 50)**].
7. Accessory: Water hammer arresters.
8. Supply Shutoff Fittings: **NPS 1/2 (DN 15)** gate, globe, or ball valves and **NPS 1/2 (DN 15)** copper, water tubing.
9. Drain: [**NPS 1-1/2 (DN 40)**][**NPS 2 (DN 50)**] standpipe and P-trap for direct waste connection to drainage piping.
10. Inlet Hoses: Two **60-inch- (1500-mm-)** long, rubber, household clothes washer inlet hoses with female, garden-hose-thread couplings. Include rubber washers.
11. Drain Hose: One **48-inch- (1200-mm-)** long, rubber, household clothes washer drain hose with hooked end.

B. Icemaker Outlet Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Guy Gray, IPS Corporation**]

b. [**LSP Products Group**]
c. [**Oatey Co.**]
d. [**Sioux Chief Manufacturing Company, Inc.**]
e. [**Water-Tite, IPS Corporation**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Guy Gray, IPS Corporation**]
b. [**LSP Products Group**]
c. [**Oatey Co.**]
d. [**Sioux Chief Manufacturing Company, Inc.**]
e. [**Water-Tite, IPS Corporation**]
f. <**Insert manufacturer's name**>

3. Mounting: Recessed.[**Fire rated.**]
4. Material and Finish: [**Enameled-steel or epoxy-painted-steel**][**Enameled-steel, epoxy-painted-steel, or plastic**][**Plastic**][**Stainless steel**] box and faceplate.
5. Faucet: Valved fitting complying with ASME A112.18.1. Include **NPS 1/2 (DN 15)** or smaller copper tube outlet.
6. Accessory: Water hammer arrestor.
7. Supply Shutoff Fitting: **NPS 1/2 (DN 15)** gate, globe, or ball valve and **NPS 1/2 (DN 15)** copper, water tubing.

2.11 HOSE STATIONS

A. Single-Temperature-Water Hose Stations:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ARCHON Industries, Inc**]
b. [**Armstrong International, Inc**]
c. [**DynaFluid Ltd.**]
d. [**Strahman Valves, Inc**]
e. [**T&S Brass and Bronze Works, Inc.**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARCHON Industries, Inc**]
b. [**Armstrong International, Inc**]
c. [**DynaFluid Ltd.**]
d. [**Strahman Valves, Inc**]
e. [**T&S Brass and Bronze Works, Inc.**]
f. <**Insert manufacturer's name**>

3. Standard: ASME A112.18.1.
4. Cabinet: Stainless steel enclosure with exposed valve handle, hose connection, and hose rack.

Include thermometer in front.

5. Hose-Rack Material: Stainless steel.
6. Body Material: Bronze[**with stainless steel wetted parts**].
7. Body Finish: Rough bronze[**, chrome plated**].
8. Mounting: [**Wall, with reinforcement**][**Floor, with stainless steel pedestal**].
9. Supply Fittings: [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**] gate, globe, or ball valve and check valve and [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**] copper, water tubing. Omit check valve if check stop is included with fitting.
10. Hose: Manufacturer's standard, for service fluid, temperature, and pressure; [**25 ft. (7.6 m)**][**50 ft. (15 m)**]<**Insert dimension**> long.
11. Nozzle: With hand-squeeze, on-off control.
12. Vacuum Breaker:

    a. Integral or factory-installed, nonremovable, manual-drain-type, hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052.
    b. Garden-hose thread complying with ASME B1.20.7 on outlet.

B. Hot- and Cold-Water Hose Stations:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ARCHON Industries, Inc**]
    b. [**Armstrong International, Inc**]
    c. [**Cooney Brothers, Inc**]
    d. [**DynaFluid Ltd.**]
    e. [**Strahman Valves, Inc**]
    f. [**T&S Brass and Bronze Works, Inc.**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ARCHON Industries, Inc**]
    b. [**Armstrong International, Inc**]
    c. [**Cooney Brothers, Inc**]
    d. [**DynaFluid Ltd.**]
    e. [**Strahman Valves, Inc**]
    f. [**T&S Brass and Bronze Works, Inc.**]
    g. <**Insert manufacturer's name**>

3. Standard: ASME A112.18.1.
4. Faucet Type: [**Blending**][**Thermostatic mixing**] valve.
5. Cabinet: Stainless steel enclosure with exposed valve handles, hose connection, and hose rack. Include thermometer in front.
6. Hose-Rack Material: Stainless steel.
7. Body Material: Bronze[**with stainless steel wetted parts**].
8. Body Finish: Rough bronze[**or chrome plated**].
9. Mounting: [**Wall, with reinforcement**][**Floor, with stainless steel pedestal**].
10. Supply Fittings: Two [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**] gate, globe, or ball valves and check valves and [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**] copper, water tubing. Omit check valves if check stops are included with fitting.

11. Hose: Manufacturer's standard, for service fluid, temperature, and pressure; [**25 ft. (7.6 m)**][**50 ft. (15 m)**]<**Insert dimension**> long.
12. Nozzle: With hand-squeeze, on-off control.
13. Vacuum Breaker: Integral or factory-installed, nonremovable, manual-drain-type, hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052; and garden-hose thread complying with ASME B1.20.7 on outlet.

C. Cold-Water and Steam Hose Stations:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ARCHON Industries, Inc**]
    b. [**Armstrong International, Inc**]
    c. [**DynaFluid Ltd.**]
    d. [**Strahman Valves, Inc**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ARCHON Industries, Inc**]
    b. [**Armstrong International, Inc**]
    c. [**DynaFluid Ltd.**]
    d. [**Strahman Valves, Inc**]
    e. <**Insert manufacturer's name**>

3. Standard: ASME A112.18.1.
4. Faucet Type: [**Blending**][**Thermostatic mixing**] valve.
5. Cabinet: Stainless steel enclosure with exposed valve handles, hose connection, and hose rack. Include thermometer in front.
6. Hose-Rack Material: Stainless steel.
7. Body Material: Bronze[**with stainless steel wetted parts**].
8. Body Finish: Rough bronze[**or chrome plated**].
9. Mounting: [**Wall, with reinforcement**][**Floor, with stainless steel pedestal**].
10. Supply Fittings: Two [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**] gate, globe, or ball valves and check valves and [**NPS 1/2 (DN 15)**][**NPS 3/4 (DN 20)**] copper, water tubing. Omit check valves if check stops are included with fitting.
11. Hose: Manufacturer's standard, for service fluid, temperature, and pressure; [**25 ft. (7.6 m)**][**50 ft. (15 m)**]<**Insert dimension**> long.
12. Nozzle: With hand-squeeze, on-off control.
13. Vacuum Breaker:

    a. Integral or factory-installed, nonremovable, manual-drain-type, hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052.
    b. Garden-hose thread complying with ASME B1.20.7 on outlet.

2.12 HOSE BIBBS

A. Hose Bibbs:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]
c. [**MIFAB, Inc**]
d. [**Prier Products, Inc.**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Woodford Manufacturing Company**]
g. [**Zurn Industries, LLC**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]
c. [**MIFAB, Inc**]
d. [**Prier Products, Inc.**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Woodford Manufacturing Company**]
g. [**Zurn Industries, LLC**]
h. <**Insert manufacturer's name**>

3. Standard: ASME A112.18.1 for sediment faucets.
4. Body Material: Bronze.
5. Seat: Bronze, replaceable.
6. Supply Connections: **NPS 1/2 or NPS 3/4 (DN 15 or DN 20)** threaded or solder-joint inlet.
7. Outlet Connection: Garden-hose thread complying with ASME B1.20.7.
8. Pressure Rating: **125 psig (860 kPa)**.
9. Vacuum Breaker: Integral[**or field-installation,**] nonremovable, drainable, hose-connection vacuum breaker complying with ASSE 1011.
10. Finish for Equipment Rooms: Rough bronze, or chrome or nickel plated.
11. Finish for Service Areas: [**Rough bronze**][**Chrome or nickel plated**].
12. Finish for Finished Rooms: Chrome or nickel plated.
13. Operation for Equipment Rooms: Wheel handle or operating key.
14. Operation for Service Areas: [**Wheel handle**][**Operating key**].
15. Operation for Finished Rooms: [**Wheel handle**][**Operating key**].
16. Include operating key with each operating-key hose bibb.
17. Include[**integral**] wall flange with each chrome- or nickel-plated hose bibb.

2.13 WALL HYDRANTS

A. Nonfreeze Wall Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]

c. [**MIFAB, Inc**]
d. [**Murdock Manufacturing; A Division of Morris Group International**]
e. [**Prier Products, Inc.**]
f. [**WATTS; A Watts Water Technologies Company**]
g. [**Woodford Manufacturing Company**]
h. [**Zurn Industries, LLC**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]
c. [**MIFAB, Inc**]
d. [**Murdock Manufacturing; A Division of Morris Group International**]
e. [**Prier Products, Inc.**]
f. [**WATTS; A Watts Water Technologies Company**]
g. [**Woodford Manufacturing Company**]
h. [**Zurn Industries, LLC**]
i. <**Insert manufacturer's name**>

3. Standard: ASME A112.21.3M for [**concealed**][**exposed**]-outlet, self-draining wall hydrants.
4. Pressure Rating: **125 psig (860 kPa)**.
5. Operation: Loose key.
6. Casing and Operating Rod: Of length required to match wall thickness. Include wall clamp.
7. Inlet: **NPS 3/4 or NPS 1 (DN 20 or DN 25)**.
8. Outlet, Concealed: With integral vacuum breaker and garden-hose thread complying with ASME B1.20.7.
9. Box: Deep, flush mounted with cover.
10. Box and Cover Finish: [**Polished nickel bronze**][**Rough bronze**]<**Insert finish**>.
11. Outlet, Exposed: With integral vacuum breaker and garden-hose thread complying with ASME B1.20.7.
12. Nozzle and Wall-Plate Finish: [**Polished nickel bronze**][**Rough bronze**][**Chrome plated**]<**Insert finish**>.
13. Operating Keys(s): [**One**][**Two**] with each wall hydrant.

B. Nonfreeze, Hot- and Cold-Water Wall Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]
c. [**MIFAB, Inc**]
d. [**Murdock Manufacturing; A Division of Morris Group International**]
e. [**Prier Products, Inc.**]
f. [**WATTS; A Watts Water Technologies Company**]
g. [**Woodford Manufacturing Company**]
h. [**Zurn Industries, LLC**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]
c. [**MIFAB, Inc**]
d. [**Murdock Manufacturing; A Division of Morris Group International**]
e. [**Prier Products, Inc.**]
f. [**WATTS; A Watts Water Technologies Company**]
g. [**Woodford Manufacturing Company**]
h. [**Zurn Industries, LLC**]
i. <**Insert manufacturer's name**>

3. Standard: ASME A112.21.3M for [**concealed**][**exposed**]-outlet, self-draining wall hydrants.
4. Pressure Rating: **125 psig (860 kPa)**.
5. Operation: Loose key.
6. Casing and Operating Rods: Of length required to match wall thickness. Include wall clamps.
7. Inlet: **NPS 3/4 or NPS 1 (DN 20 or DN 25)**.
8. Outlet: Concealed.
9. Box: Deep, flush mounted with cover.
10. Box and Cover Finish: [**Polished nickel bronze**][**Chrome plated**]<**Insert finish**>.
11. Vacuum Breaker:

a. Nonremovable, manual-drain-type, hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052.
b. Garden-hose thread complying with ASME B1.20.7 on outlet.

12. Operating Key(s): [**One**][**Two**] with each wall hydrant.

C. Moderate-Climate Wall Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**MIFAB, Inc**]
c. [**Murdock Manufacturing; A Division of Morris Group International**]
d. [**Prier Products, Inc.**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Woodford Manufacturing Company**]
g. [**Zurn Industries, LLC**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**MIFAB, Inc**]
c. [**Murdock Manufacturing; A Division of Morris Group International**]
d. [**Prier Products, Inc.**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Woodford Manufacturing Company**]
g. [**Zurn Industries, LLC**]

h. <**Insert manufacturer's name**>

3. Standard: ASME A112.21.3M for [**concealed**][**exposed**]-outlet, self-draining wall hydrants.
4. Pressure Rating: **125 psig (860 kPa)**.
5. Operation: Loose key.
6. Inlet: **NPS 3/4 or NPS 1 (DN 20 or DN 25)**.
7. Outlet, Concealed:

   a. With integral vacuum breaker or nonremovable hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052.
   b. Garden-hose thread complying with ASME B1.20.7.

8. Box: Deep, flush mounted with cover.
9. Box and Cover Finish: [**Polished nickel bronze**][**Chrome plated**]<**Insert finish**>.
10. Outlet, Exposed:

    a. With integral vacuum breaker or nonremovable hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052.
    b. Garden-hose thread complying with ASME B1.20.7.

11. Nozzle and Wall-Plate Finish: [**Polished nickel bronze**][**Rough bronze**]<**Insert finish**>.
12. Operating Key(s): [**One**][**Two**] with each wall hydrant.

D. Nonfreeze Vacuum Breaker Wall Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**A.Y. McDonald Mfg. Co.**]
   b. [**Champion-Arrowhead**]
   c. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
   d. [**Prier Products, Inc.**]
   e. [**WATTS; A Watts Water Technologies Company**]
   f. [**Woodford Manufacturing Company**]
   g. [**Zurn Industries, LLC**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**A.Y. McDonald Mfg. Co.**]
   b. [**Champion-Arrowhead**]
   c. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
   d. [**Prier Products, Inc.**]
   e. [**WATTS; A Watts Water Technologies Company**]
   f. [**Woodford Manufacturing Company**]
   g. [**Zurn Industries, LLC**]
   h. <**Insert manufacturer's name**>

3. Standard: ASSE 1019, Type A or Type B.
4. Type: Automatic draining with integral air-inlet valve.
5. Classification: [**Type A, for automatic draining with hose removed or**]Type B, for automatic draining with hose removed or with hose attached and nozzle closed.

6. Pressure Rating: **125 psig (860 kPa)**.
7. Operation: [**Loose key**][**or**][**wheel handle**].
8. Casing and Operating Rod: Of length required to match wall thickness. Include wall clamp.
9. Inlet: **NPS 1/2 or NPS 3/4 (DN 15 or DN 20)**.
10. Outlet: Exposed with garden-hose thread complying with ASME B1.20.7.

2.14 GROUND HYDRANTS

A. Nonfreeze Ground Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
    b. [**Josam Company**]
    c. [**MIFAB, Inc**]
    d. [**Murdock Manufacturing; A Division of Morris Group International**]
    e. [**Prier Products, Inc.**]
    f. [**WATTS; A Watts Water Technologies Company**]
    g. [**Woodford Manufacturing Company**]
    h. [**Zurn Industries, LLC**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
    b. [**Josam Company**]
    c. [**MIFAB, Inc**]
    d. [**Murdock Manufacturing; A Division of Morris Group International**]
    e. [**Prier Products, Inc.**]
    f. [**WATTS; A Watts Water Technologies Company**]
    g. [**Woodford Manufacturing Company**]
    h. [**Zurn Industries, LLC**]
    i. <**Insert manufacturer's name**>

3. Standard: ASME A112.21.3M.
4. Type: Nonfreeze, concealed-outlet ground hydrant with box.
5. Operation: Loose key.
6. Casing and Operating Rod: Of at least length required for burial of valve below frost line.
7. Inlet: [**NPS 3/4 (DN 20)**]<**Insert pipe size**>.
8. Outlet: Garden-hose thread complying with ASME B1.20.7.
9. Drain: Designed with hole to drain into ground when shut off.
10. Box: [**Standard**][**Deep**] pattern with cover.
11. Box and Cover Finish: [**Rough**][**Polished nickel**]<**Insert finish**> bronze.
12. Operating Key(s): [**One**][**Two**] with each ground hydrant.
13. Vacuum Breaker: ASSE 1011.

2.15 POST HYDRANTS

A. Nonfreeze, Draining-Type Post Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
   b. [**Josam Company**]
   c. [**MIFAB, Inc**]
   d. [**Murdock Manufacturing; A Division of Morris Group International**]
   e. [**Prier Products, Inc.**]
   f. [**WATTS; A Watts Water Technologies Company**]
   g. [**Woodford Manufacturing Company**]
   h. [**Zurn Industries, LLC**]
   i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
   b. [**Josam Company**]
   c. [**MIFAB, Inc**]
   d. [**Murdock Manufacturing; A Division of Morris Group International**]
   e. [**Prier Products, Inc.**]
   f. [**WATTS; A Watts Water Technologies Company**]
   g. [**Woodford Manufacturing Company**]
   h. [**Zurn Industries, LLC**]
   i. <**Insert manufacturer's name**>

3. Standard: ASME A112.21.3M.
4. Type: Nonfreeze, exposed-outlet post hydrant.
5. Operation: Loose key.
6. Casing and Operating Rod: Of at least length required for burial of valve below frost line.
7. Casing: Bronze with casing guard.
8. Inlet: [**NPS 3/4 (DN 20)**]<**Insert pipe size**>.
9. Outlet: Garden-hose thread complying with ASME B1.20.7.
10. Drain: Designed with hole to drain into ground when shut off.
11. Vacuum Breaker:

    a. Nonremovable, drainable, hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052.
    b. Garden-hose thread complying with ASME B1.20.7 on outlet.

12. Operating Key(s): [**One**][**Two**] with each loose-key-operation wall hydrant.

B. Nonfreeze Sanitary Yard Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Hoeptner Products**]
b. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
c. [**Murdock Manufacturing; A Division of Morris Group International**]
d. [**Woodford Manufacturing Company**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Hoeptner Products**]
b. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
c. [**Murdock Manufacturing; A Division of Morris Group International**]
d. [**Woodford Manufacturing Company**]
e. <**Insert manufacturer's name**>

3. Standard: ASSE 1057.
4. Operation: Wheel handle or lever.
5. Head: Cast iron or brass, with pail hook.
6. Inlet: **NPS 3/4 or NPS 1 (DN 20 or DN 25)** threaded.
7. Length: As required for burial of valve and canister below frost line.
8. Canister: [**Stainless steel**]<**Insert material**>.
9. Vacuum Breaker:

a. Removable hose-connection backflow preventer complying with ASSE 1052.
b. Garden-hose thread complying with ASME B1.20.7 on outlet for field installation.

2.16 ROOF HYDRANTS

A. Nonfreeze, Draining-Type Roof Hydrants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**MIFAB, Inc**]
c. [**Murdock Manufacturing; A Division of Morris Group International**]
d. [**Prier Products, Inc.**]
e. [**WATTS; A Watts Water Technologies Company**]
f. [**Woodford Manufacturing Company**]
g. [**Zurn Industries, LLC**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**MIFAB, Inc**]
c. [**Murdock Manufacturing; A Division of Morris Group International**]
d. [**Prier Products, Inc.**]
e. [**WATTS; A Watts Water Technologies Company**]

f. [**Woodford Manufacturing Company**]
g. [**Zurn Industries, LLC**]
h. <**Insert manufacturer's name**>

3. Standard: ASME A112.21.3M.
4. Type: Nonfreeze, exposed-outlet roof hydrant with coated cast-iron head and lift handle with lock option. Provide with deck flange and under deck clamp.
5. Casing and Operating Rod: Bronze interior parts, galvanized-steel casing, and bronze valve housing designed with hole to drain.
6. Inlet: [**NPS 3/4 (DN 20)**]<**Insert pipe size**>.
7. Outlet: Garden-hose thread complying with ASME B1.20.7.
8. Vacuum Breaker:

a. Nonremovable, drainable, hose-connection vacuum breaker complying with ASSE 1011 or backflow preventer complying with ASSE 1052.
b. Garden-hose thread complying with ASME B1.20.7 on outlet.

2.17 DRAIN VALVES

A. Ball-Valve-Type, Hose-End Drain Valves <**Insert drawing designation if any**>:

1. Standard: MSS SP-110 for standard-port, two-piece ball valves.
2. Pressure Rating: **400-psig (2760-kPa)** minimum CWP.
3. Size: **NPS 3/4 (DN 20)**.
4. Body: Copper alloy.
5. Ball: Chrome-plated brass.
6. Seats and Seals: Replaceable.
7. Handle: Vinyl-covered steel.
8. Inlet: Threaded or solder joint.
9. Outlet: Threaded, short nipple with garden-hose thread complying with ASME B1.20.7 and cap with brass chain.

B. Gate-Valve-Type, Hose-End Drain Valves <**Insert drawing designation if any**>:

1. Standard: MSS SP-80 for gate valves.
2. Pressure Rating: Class 125.
3. Size: **NPS 3/4 (DN 20)**.
4. Body: ASTM B62 bronze.
5. Inlet: **NPS 3/4 (DN 20)** threaded or solder joint.
6. Outlet: Garden-hose thread complying with ASME B1.20.7 and cap with brass chain.

C. Stop-and-Waste Drain Valves <**Insert drawing designation if any**>:

1. Standard: MSS SP-110 for ball valves or MSS SP-80 for gate valves.
2. Pressure Rating: **200-psig (1380-kPa)** minimum CWP or Class 125.
3. Size: **NPS 3/4 (DN 20)**.
4. Body: Copper alloy or ASTM B62 bronze.
5. Drain: **NPS 1/8 (DN 6)** side outlet with cap.

2.18 WATER-HAMMER ARRESTERS

A. Water-Hammer Arresters:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**AMTROL, Inc.**]
b. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
c. [**Josam Company**]
d. [**MIFAB, Inc**]
e. [**Precision Plumbing Products**]
f. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
g. [**Sioux Chief Manufacturing Company, Inc.**]
h. [**WATTS; A Watts Water Technologies Company**]
i. [**Zurn Industries, LLC**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**AMTROL, Inc.**]
b. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
c. [**Josam Company**]
d. [**MIFAB, Inc**]
e. [**Precision Plumbing Products**]
f. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
g. [**Sioux Chief Manufacturing Company, Inc.**]
h. [**WATTS; A Watts Water Technologies Company**]
i. [**Zurn Industries, LLC**]
j. <**Insert manufacturer's name**>

3. Standard: ASSE 1010 or PDI-WH 201.
4. Type: [**Metal bellows**][**Piston**][**Diaphragm**].
5. Size: ASSE 1010, Sizes AA and A through F, or PDI-WH 201, Sizes A through F.

2.19 TRAP-SEAL PRIMER DEVICE

A. Supply-Type, Trap-Seal Primer Device:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]
c. [**MIFAB, Inc**]
d. [**Precision Plumbing Products**]
e. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
f. [**Sioux Chief Manufacturing Company, Inc.**]
g. [**WATTS; A Watts Water Technologies Company**]
h. [**Zurn Industries, LLC**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**Josam Company**]
c. [**MIFAB, Inc**]
d. [**Precision Plumbing Products**]
e. [**ProFlo; a Ferguson Enterprises, Inc. brand**]
f. [**Sioux Chief Manufacturing Company, Inc.**]
g. [**WATTS; A Watts Water Technologies Company**]
h. [**Zurn Industries, LLC**]
i. <**Insert manufacturer's name**>

3. Standard: ASSE 1018.
4. Pressure Rating: **125 psig (860 kPa)** minimum.
5. Body: Bronze.
6. Inlet and Outlet Connections: **NPS 1/2 (DN 15)** threaded, union, or solder joint.
7. Gravity Drain Outlet Connection: **NPS 1/2 (DN 15)** threaded or solder joint.
8. Finish: Chrome plated, or rough bronze for units used with pipe or tube that is not chrome finished.

B. Drainage-Type, Trap-Seal Primer Device:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**MIFAB, Inc**]
c. [**Precision Plumbing Products**]
d. [**Zurn Industries, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Jay R. Smith Mfg Co; a division of Morris Group International**]
b. [**MIFAB, Inc**]
c. [**Precision Plumbing Products**]
d. [**Zurn Industries, LLC**]
e. <**Insert manufacturer's name**>

3. Standard: ASSE 1044, lavatory P-trap with **NPS 3/8 (DN 10)** minimum, trap makeup connection.
4. Size: **NPS 1-1/4 (DN 32)** minimum.
5. Material: Chrome-plated, cast brass.

2.20 TRAP-SEAL PRIMER SYSTEMS

A. Trap-Seal Primer Systems:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Precision Plumbing Products**]
b. [**Sioux Chief Manufacturing Company, Inc.**]
c. [**Zurn Industries, LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Precision Plumbing Products**]
b. [**Sioux Chief Manufacturing Company, Inc.**]
c. [**Zurn Industries, LLC**]
d. <**Insert manufacturer's name**>

3. Standard: ASSE 1044.
4. Inlet Size: **NPS 3/4, ASTM B88, Type L (DN 20, ASTM B88M, Type B)**; copper, water tubing.
5. Cabinet: [**Recessed**][**Surface**]-mounted steel box with stainless steel cover.
6. Electric Controls: 24-hour timer, solenoid valve, and manual switch for 120 V ac power.

a. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

7. Vacuum Breaker: ASSE 1001.
8. Number Outlets: [**Four**][**Six**][**Eight**]<**Insert number**>.
9. Size Outlets: [**NPS 1/2 (DN 15)**][**NPS 5/8 (DN 18)**].

2.21 FLEXIBLE CONNECTORS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Flex-Hose Co., Inc**]
2. [**Mason Industries, Inc.**]
3. [**Metraflex Company (The)**]
4. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Flex-Hose Co., Inc**]
2. [**Mason Industries, Inc.**]
3. [**Metraflex Company (The)**]
4. <**Insert manufacturer's name**>

C. Bronze-Hose Flexible Connectors: Corrugated-bronze tubing with bronze wire-braid covering and ends brazed to inner tubing.

1. Working-Pressure Rating: Minimum [**200 psig (1380 kPa)**][**250 psig (1725 kPa)**].
2. End Connections NPS 2 (DN 50) and Smaller: Threaded copper pipe or plain-end copper tube.
3. End Connections NPS 2-1/2 (DN 65) and Larger: Flanged copper alloy.

D. Stainless Steel-Hose Flexible Connectors: Corrugated-stainless steel tubing with stainless steel wire-braid covering and ends welded to inner tubing.

1. Working-Pressure Rating: Minimum [**200 psig (1380 kPa)**][**250 psig (1725 kPa)**].
2. End Connections NPS 2 (DN 50) and Smaller: Threaded steel-pipe nipple.
3. End Connections NPS 2-1/2 (DN 65) and Larger: Flanged steel nipple.

2.22 WATER METERS

A. Displacement-Type Water Meters:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Badger Meter, Inc.**]
b. [**Carlon Meter**]
c. [**Master Meter, Inc**]
d. [**Mueller Systems, LLC; a subsidiary of Mueller Water Products, Inc.**]
e. [**Neptune Technology Group Inc.**]
f. [**Niagara Meters**]
g. [**Sensus; a Xylem brand**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Badger Meter, Inc.**]
b. [**Carlon Meter**]
c. [**Master Meter, Inc**]
d. [**Mueller Systems, LLC; a subsidiary of Mueller Water Products, Inc.**]
e. [**Neptune Technology Group Inc.**]
f. [**Niagara Meters**]
g. [**Sensus; a Xylem brand**]
h. <**Insert manufacturer's name**>

3. Standard: AWWA C700.
4. Pressure Rating: **150-psig (1035-kPa)** working pressure.
5. Body Design: Nutating disc; totalization meter.
6. Registration: In **gallons (liters)** or **cubic feet (cubic meters)** as required by utility company.

a. Remote Registration System: Encoder type complying with AWWA C707; modified with signal-transmitting assembly, low-voltage connecting wiring, and remote register assembly as required by utility company.

1) System to be capable of transmitting data using AMR/AMI technology.

7. Case: [**Bronze**][**Stainless steel**].
8. End Connections: Threaded or flanged.

B. Turbine-Type Water Meters:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Badger Meter, Inc.**]
b. [**Carlon Meter**]
c. [**Mueller Systems, LLC; a subsidiary of Mueller Water Products, Inc.**]
d. [**Neptune Technology Group Inc.**]
e. [**Niagara Meters**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Badger Meter, Inc.**]
b. [**Carlon Meter**]
c. [**Mueller Systems, LLC; a subsidiary of Mueller Water Products, Inc.**]
d. [**Neptune Technology Group Inc.**]
e. [**Niagara Meters**]
f. <**Insert manufacturer's name**>

3. Standard: AWWA C701.
4. Pressure Rating: [**150 psig (1035 kPa)**]<**Insert value**> working pressure.
5. Body Design: Turbine; totalization meter.
6. Registration: In **gallons (liters)** or **cubic feet (cubic meters)** as required by utility company.

a. Remote Registration System: Encoder type complying with AWWA C707; modified with signal-transmitting assembly, low-voltage connecting wiring, and remote register assembly as required by utility company.

1) System to be capable of transmitting data using AMR/AMI technology.

7. Case: [**Bronze**][**Epoxy-coated cast iron**].
8. End Connections: Threaded or flanged.

C. Compound-Type Water Meters:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Badger Meter, Inc.**]
b. [**Mueller Systems, LLC; a subsidiary of Mueller Water Products, Inc.**]
c. [**Neptune Technology Group Inc.**]
d. [**Sensus; a Xylem brand**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Badger Meter, Inc.**]
b. [**Mueller Systems, LLC; a subsidiary of Mueller Water Products, Inc.**]

c. [**Neptune Technology Group Inc.**]
d. [**Sensus; a Xylem brand**]
e. <**Insert manufacturer's name**>

3. Standard: AWWA C702.
4. Pressure Rating: **150-psig (1035-kPa)** working pressure.
5. Body Design: With integral mainline and bypass meters; totalization meter.
6. Registration: In **gallons (liters)** or **cubic feet (cubic meters)** as required by utility company.

a. Remote Registration System: Encoder type complying with AWWA C707; modified with signal-transmitting assembly, low-voltage connecting wiring, and remote register assembly as required by utility company.

1) System to be capable of transmitting data using AMR/AMI technology.

7. Case: [**Bronze**][**Coated ductile iron**].
8. End Connections: Flanged.

D. Ultrasonic-Type Water Meters:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Badger Meter, Inc.**]
b. [**Master Meter, Inc**]
c. [**Neptune Technology Group Inc.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Badger Meter, Inc.**]
b. [**Master Meter, Inc**]
c. [**Neptune Technology Group Inc.**]
d. <**Insert manufacturer's name**>

3. Standard: Applicable portions of AWWA C700.
4. Pressure Rating: [**150 psig (1035 kPa)**]<**Insert value**> working pressure.
5. Body Design: Ultrasonic open flow tube; totalization meter.
6. Registration: In **gallons (liters)** or **cubic feet (cubic meters)** as required by utility company.

a. Remote Registration System: Encoder type complying with AWWA C707; modified with signal-transmitting assembly, low-voltage connecting wiring, and remote register assembly as required by utility company.

1) System to be capable of transmitting data using AMR/AMI technology.

7. Case: [**Bronze**][**Stainless steel**][**Engineered polymer**][**Epoxy-coated ductile iron**].
8. End Connections: Threaded or flanged.

PART 3 - EXECUTION

3.1 INSTALLATION OF PIPING SPECIALTIES

A. Backflow Preventers: Install in each water supply to mechanical equipment and systems and to other equipment and water systems that may be sources of contamination. Comply with authorities having jurisdiction.

1. Locate backflow preventers in same room as connected equipment or system.
2. Install drain for backflow preventers with atmospheric-vent drain connection with air-gap fitting, fixed air-gap fitting, or equivalent positive pipe separation of at least two pipe diameters in drain piping and pipe-to-floor drain. Locate air-gap device attached to or under backflow preventer. Simple air breaks are unacceptable for this application.
3. Do not install bypass piping around backflow preventers.

B. Water Regulators: Install with inlet and outlet shutoff valves[**and bypass with memory-stop balancing valve**]. Install pressure gauges on inlet and outlet.

C. Water Control Valves: Install with inlet and outlet shutoff valves[**and bypass with globe valve**]. Install pressure gauges on inlet and outlet.

D. Automatic Water Shutoff Valves: Test for signal strength before valve installation. Install automatic shutoff valve downstream from main domestic water shutoff valve. Install valve controller in an accessible location with sensors in areas where water is likely to accumulate.

E. Balancing Valves: Install in locations where they can easily be adjusted. Set at indicated design flow rates.

F. Temperature-Actuated, Water Mixing Valves: Install with check stops or shutoff valves on inlets and with shutoff valve on outlet.

1. Install cabinet-type units recessed in or surface mounted on wall as specified.

G. Y-Pattern Strainers: For water, install on supply side of each [**control valve**][**water pressure-reducing valve**][**solenoid valve**][**and**][**pump**].

H. Outlet Boxes: Install boxes recessed in wall or surface mounted on wall. Install **1-1/2-by-3-1/2-inch (38-by-89-mm)** fire-retardant-treated-wood blocking, wall reinforcement between studs. Comply with requirements for fire-retardant-treated-wood blocking in Section 061000 "Rough Carpentry."

I. Hose Stations: Install with check stops or shutoff valves on inlets and with thermometer on outlet.

1. Install cabinet-type units recessed in or surface mounted on wall as specified. Install **1-1/2-by-3-1/2-inch (38-by-89-mm)** fire-retardant-treated-wood blocking, wall reinforcement between studs. Comply with requirements for fire-retardant-treated-wood blocking in Section 061000 "Rough Carpentry."

J. Ground Hydrants: Install with [**1 cu. yd. (0.75 cu. m)**]<**Insert dimension**> of crushed gravel around drain hole. Set ground hydrants with box flush with grade.

K. Nonfreeze, Draining-Type Post Hydrants: Install with [**1 cu. yd. (0.75 cu. m)**]<**Insert dimension**> of crushed gravel around drain hole. Set post hydrants in concrete paving or in [**1 cu. ft. (0.03 cu. m)**]<**Insert dimension**> of concrete block at grade.

L. Nonfreeze, Nondraining-Type Post Hydrants: Set in concrete or pavement.

M. Nonfreeze, Sanitary Yard Hydrants: Set with riser pipe in concrete or pavement. Do not encase canister in concrete.

N. Nonfreeze, Draining-Type Roof Hydrants: Install with drain connection piped to nearest floor drain or to the exterior.

O. Water-Hammer Arresters: Install in water piping in accordance with PDI-WH 201.

P. Supply-Type, Trap-Seal Primer Device: Install with outlet piping pitched down toward drain trap a minimum of 1 percent, and connect to floor-drain body, trap, or inlet fitting. Adjust valve for proper flow.

Q. Drainage-Type, Trap-Seal Primer Device: Install as lavatory trap with outlet piping pitched down toward drain trap a minimum of 1 percent, and connect to floor-drain body, trap, or inlet fitting.

R. Trap-Seal Primer Systems: Install with outlet piping pitched down toward drain trap a minimum of 1 percent, and connect to floor-drain body, trap, or inlet fitting. Adjust system for proper flow.

3.2 PIPING CONNECTIONS

A. Drawings indicate general arrangement of piping, fittings, and specialties.

B. When installing piping specialties adjacent to equipment and machines, allow space for service and maintenance.

3.3 ELECTRICAL CONNECTIONS

A. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Install electrical devices furnished by manufacturer, but not factory mounted, in accordance with NFPA 70 and NECA 1.

3.4 CONTROL CONNECTIONS

A. Connect control wiring in accordance with Section 260523 "Control-Voltage Electrical Power Cables."

3.5 IDENTIFICATION

A. Plastic Labels for Equipment: Install engraved plastic-laminate equipment nameplate or sign on or near each of the following:

1. Vacuum breakers.
2. Backflow preventers.
3. Water pressure-reducing valves.
4. Automatic water shutoff valve systems.
5. Balancing valves.
6. Temperature-actuated, water mixing valves.

7. Outlet boxes.
8. Hose stations.
9. Wall hydrants.
10. Ground hydrants.
11. Post hydrants.
12. Roof hydrants.
13. Trap-seal primer device.
14. Trap-seal primer systems.
15. Water meters.

B. Distinguish among multiple units, inform operator of operational requirements, indicate safety and emergency precautions, and warn of hazards and improper operations, in addition to identifying unit. Nameplates and signs are specified in Section 220553 "Identification for Plumbing Piping and Equipment."

3.6 ADJUSTING

A. Set field-adjustable pressure set points of water pressure-reducing valves.

B. Set field-adjustable flow set points of balancing valves.

C. Set field-adjustable temperature set points of temperature-actuated, water mixing valves.

D. Adjust each [**pressure vacuum breaker**][**reduced-pressure-principle backflow preventer**][**double-check, backflow-prevention assembly**][**and**][**double-check, detector-assembly backflow preventer**]<**Insert type**> in accordance with manufacturer's written instructions, authorities having jurisdiction and the device's reference standard.

3.7 FIELD QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform the following tests and inspections[**with the assistance of a factory-authorized service representative**].

1. Test each [**pressure vacuum breaker**][**reduced-pressure-principle backflow preventer**][**double-check, backflow-prevention assembly**][**and**][**double-check, detector-assembly backflow preventer**]<**Insert type**> according to authorities having jurisdiction and the device's reference standard.
2. Leak Test: After installation, charge system and test for leaks. Repair leaks and retest until no leaks exist.
3. Operational Test: After electrical circuitry has been energized, start units to confirm unit operation.
4. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

D. Domestic water piping specialties will be considered defective if they do not pass tests and inspections.

E. Prepare test and inspection reports.

END OF SECTION 22 11 19 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 11 19 00A - ELECTRONIC AIR CLEANERS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Electronic air cleaners.
2. Fan section.
3. Cabinet.
4. Filter gauges.

B. Related Requirements:

1. Section 233119 "HVAC Casings" for customized housings used for particulate air filters.
2. Section 233416 "Centrifugal HVAC Fans" for customized fan and filter units.
3. Section 234133 "High-Efficiency Particulate Air Filtration" for high-efficiency particulate air filters used in combination with particulate air filters.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product. Include dimensions; operating characteristics; required clearances and access; rated flow capacity, including initial and final pressure drop at rated airflow; efficiency and test method; fire classification; furnished specialties; and accessories for each model indicated.

B. Sustainable Design Submittals:

1. Product data showing compliance with ASHRAE 62.1.

C. Shop Drawings: For each electronic air cleaner.

1. Include plans, elevations, sections, details, and attachments to other work.
2. Show filter assembly, dimensions, materials, and methods of assembly of components.
3. Include setting drawings, templates, and requirements for installing anchor bolts and anchorages.
4. Include diagrams for power, signal, and control wiring.

1.3 INFORMATIONAL SUBMITTALS

A. Seismic Qualification Data: Certificates, for filters, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

B. Product Test Reports: For each filter, for tests performed by [**manufacturer and witnessed by a**

qualified testing agency][**a qualified testing agency**].

C. Field quality-control reports.

1.4 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For each type of filter and housing to include in emergency, operation, and maintenance manuals.

1.5 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Provide [**one**]<**Insert number**> complete set(s) of prefilters for each filter bank.
2. Provide detergent for [**one**][**two**]<**Insert number**> refill(s).
3. Provide [**one**]<**Insert number**> container(s) of red oil for inclined manometer filter gauge.

1.6 QUALITY ASSURANCE

A. Testing Agency Qualifications: An NRTL.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Seismic Performance: Filters shall withstand the effects of earthquake motions determined according to [**ASCE/SEI 7**]<**Insert requirement**>.

1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified[**and the unit will be fully operational after the seismic event**]."
2. Component Importance Factor: [**1.5**][**1.0**].
3. <**Insert requirements for Component Amplification Factor and Component Response Modification Factor**>.

B. ASHRAE Compliance:

1. Comply with applicable requirements in ASHRAE 62.1, Section 4 - "Outdoor Air Quality"; Section 5 - "Systems and Equipment"; and Section 7 - "Construction and Startup."
2. Comply with ASHRAE 52.2 for MERV for methods of testing and rating air-filter units.

C. Comply with AHRI 850.

D. Comply with [**NFPA 90A**][**NFPA 90B**].

E. Comply with UL 867.

F. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a

qualified testing agency, and marked for intended location and application.

2.2 CAPACITIES AND CHARACTERISTICS

A. Drawing Tag. No.: <**Insert number**>.

B. Face Size: [**48 by 24 inches (1152 by 600 mm)**]<**Insert dimensions**> nominal.

C. Number of Cleaner Units: <**Insert number**>.

D. Unit Depth: <**Insert dimensions**> nominal.

E. Frame Access Location: [**Front**][**back**][**or**][**side**].

F. System Airflow: <**Insert number**> **cfm (L/s)**.

G. Maximum or Rated Face Velocity: [**500 fpm (2.5 m/s)**]<**Insert number**>.

H. Power Pack:

1. Volts: [**120**][**208**][**230**][**460**]<**Insert number**> V.
2. Phase: [**Single**][**Three**].
3. Hertz: 60 Hz.
4. Full-Load Amperes: <**Insert number**> A.
5. Minimum Circuit Ampacity: <**Insert number**> A.

I. Maximum Overcurrent Protection Device: <**Insert number**> A.

J. Efficiency: <**Insert number**> percent on particles <**Insert number**> microns and larger at **500 fpm (2.5 m/s)**.

K. Initial Resistance: [**0.25-inch wg (63 Pa)**]<**Insert number**>.

L. Prefilter Type: Integral tracks to accommodate [**1-inch- (25-mm-)**][**2-inch- (50-mm-)**][**4-inch- (100-mm-)**] thick, disposable[**or washable**] filters.

1. Prefilter Face Size: <**Insert width by height**>.
2. Number of Prefilters, Wide by High: <**Insert number wide by number high**>.
3. Minimum Efficiency Reporting Value (MERV) and Average Arrestance: MERV [**4**]<**Insert number**>, with "Composite Average Particle Size Efficiency and Arrestance, Percent in Size Range, Micrometers" according to ASHRAE 52.2.
4. Minimum Efficiency Reporting Value: MERV [**6**]<**Insert number**>, with "Composite Average Particle Size Efficiency, Percent in Size Range, Micrometers" according to ASHRAE 52.2.

M. Final Filter Type: Integral tracks to accommodate [**12-inch (300-mm)**][**18-inch (450-mm)**][**24-inch (600-mm)**]<**Insert dimension**> disposable filters.

1. Final-Filter Face Size: <**Insert width by height**>.
2. Number of Final Filters, Wide by High: <**Insert number wide by number high**>.
3. Minimum Efficiency Reporting Value: MERV [**6**]<**Insert number**>, with "Composite Average Particle Size Efficiency, Percent in Size Range, Micrometers" according to ASHRAE 52.2.

N. Fan Motor Electrical Characteristics:

1. Horsepower: <**Insert number**> hp.
2. Volts: [**120**][**208**][**230**][**460**]<**Insert number**> V.
3. Phase: [**Single**][**3**].
4. Hertz: 60 Hz.
5. Full-Load Amperes: <**Insert number**> A.
6. Minimum Circuit Ampacity: <**Insert number**> A.
7. Maximum Overcurrent Protection Device: <**Insert number**> A.

O. Cleaning System: [**Manual**][**or**][**automatic**].

P. Reservoir Tank: [**30 gal. (114 L)**][**50 gal. (190 L)**].

Q. Connections:

1. Water Supply: <**Insert number**> **NPS (DN)**.
2. Drain: <**Insert number**> **NPS (DN)**.

2.3 ELECTRONIC AIR CLEANERS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Air Quality Engineering, Inc.**]
2. [**CosaTron, a division of CRS Industries, Inc.**]
3. [**Trion, Inc.**]
4. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Air Quality Engineering, Inc.**]
2. [**CosaTron, a division of CRS Industries, Inc.**]
3. [**Trion, Inc.**]
4. <**Insert manufacturer's name**>

C. Description: Factory-fabricated, electronic air cleaner operating by electrostatic precipitation principles.

D. Prefilter Media: [**Four**][**Six**] alternate layers of [**galvanized-steel**][**aluminum**][**stainless-steel**], flat and herringbone-crimp screen.

E. Prefilter: Comply with requirements in Section 234100 "Particulate Air Filtration" for [**flat**][**pleated**][**ring**] panel. Size and airflow capacity shall match those of electronic air cleaners.

1. Depth: [**1 inch (25 mm)**][**2 inches (50 mm)**][**4 inches (100 mm)**]<**Insert dimension**>.
2. Comply with UL 900.

F. Final Filter: Comply with requirements in Section 234100 "Particulate Air Filtration" for [**supported bag**][**unsupported bag**][**rigid-cell box**][**V-bank cell**][**self-supported pocket**]. Size and airflow capacity shall match those of electronic air cleaners.

1. Depth: [**12 inches (300 mm)**][**18 inches (450 mm)**][**24 inches (600 mm)**]<**Insert dimension**>.
2. Comply with UL 900.

G. Collection Cells: Aluminum, independently supported and nested.

1. Ionizing Section: Alternately spaced grounded struts and charged ionizing wires.
2. Collecting Section: Alternately grounded and charged plates, with insulators located out of airstream.

H. Power Pack: Self-contained, prewired rectifying unit to convert power, as [**scheduled on Drawings**][**identified in "Capacities and Characteristics" Article**], to approximately 12,000 V dc for ionizer and 6000 V dc for collector; include overload protection, on-off switch, pilot light showing operating status, and access door interlock. Alternatively provide high-voltage and high-frequency-grid excitation technology power pack and system.

I. Safety Accessories: Manual-reset safety switches and warning lights for filter plenum access doors, signal lights and safety switching upstream and downstream from unit within duct, and enameled high-voltage warning signs.

J. Collection Section Cleaning System:

1. Detergent Reservoir Tank: [**30 gal. (110 L)**][**55 gal. (200 L)**]<**Insert capacity**> with pump, motor, solenoid valve, level sensor, backflow preventer, wye-strainer, and ball valve.
2. Detergent.
3. Dispensing System: Motor-driven oscillating copper manifolds with brass spray nozzles on each side of the collector.

K. Controls: Programmable logic controller in remotely mounted, NEMA 250, Type 12 enclosure; with integral time clock and manual override.

1. Contacts for enable-disable control by building automation system.

L. Finish of Interior Surfaces: Surfaces in contact with the airstream shall comply with ASHRAE 62.1.

2.4 FAN SECTION

A. Fan: [**Forward curved, belt driven**]<**Insert fan and drive type**>.

B. Motor:

1. Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."
2. Type: [**Permanent-split capacitor with SCR for speed adjustment**][**Electronically commutated motor**]<**Insert type**>.
3. Fan-Motor Assembly Isolation: Rubber isolators.
4. Enclosure: Totally enclosed, fan cooled, and [**explosion proof**][**dust-ignition proof**]<**Insert type**>.
5. Enclosure Materials: [**Cast iron**][**Cast aluminum**][**Rolled steel**]<**Insert type**>.
6. Motor Bearings: Sealed ball, <**Insert special requirements**>.
7. Unusual Service Conditions:

    a. Ambient Temperature: <**Insert number**> **deg F (deg C)**.
    b. Altitude: <**Insert number**> **feet (m)** above sea level.
    c. High humidity.
    d. <**Insert conditions**>.

8. Efficiency: Premium efficient.
9. NEMA Design: <**Insert designation**>.

10. Service Factor: <**Insert value**>.
11. Motor Speed: [**Single speed**][**Multispeed**][**Infinitely adjustable with electronic controls**].

2.5 CABINET

A. Description: Minimum <**Insert number**> **gauge (mm)** galvanized steel with <**Insert type**> finish for suspended, wall, frame, or duct mounting.

2.6 FILTER GAUGES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Dwyer Instruments, Inc**]
2. [**Parker Hannifin Corporation; HVAC Filtration Division**]
3. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Dwyer Instruments, Inc**]
2. [**Parker Hannifin Corporation; HVAC Filtration Division**]
3. <**Insert manufacturer's name**>

C. Description: Diaphragm type, with dial and pointer in metal case, vent valves, black figures on white background, and front recalibration adjustment.

1. Diameter: [**4-1/2 inches (115 mm)**][**2 inches (50 mm)**].
2. Scale Range for Filter Media Having a Recommended Final Resistance of 0.5-Inch wg (125 Pa) or Less: **0- to 0.5-inch wg (0 to 125 Pa)**.
3. Scale Range for Filter Media Having a Recommended Final Resistance of 0.5- to 1.0-Inch wg (125 to 250 Pa) or Less: **0- to 1.0-inch wg (0 to 250 Pa)**.
4. Scale Range for Filter Media Having a Recommended Final Resistance of 1.0- to 2.0-Inch wg (250 to 500 Pa) or Less: **0- to 2.0-inch wg (0 to 500 Pa)**.

D. Manometer-Type Filter Gauge: Molded plastic, with epoxy-coated aluminum scale, logarithmic-curve tube gauge, with integral leveling indicator, graduated to read from **0- to 3.0-inch wg (0 to 750 Pa)**, and accurate within 3 percent of full-scale range.

E. Accessories: Static-pressure tips, tubing, gauge connections, and mounting bracket.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine electronic air cleaners and conditions for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Position each electronic air cleaner unit with clearance for normal service and maintenance. Anchor electronic air cleaners to substrate.

B. Do not operate fan system until electronic air cleaners and associated prefilters and final filters (temporary or permanent) are in place. Replace temporary filters used during construction and testing with new, clean filters.

C. Operate electronic air cleaners for 24 hours as part of startup before units are put into operation.

D. Install filter-gauge, static-pressure taps upstream and downstream from filters. Install filter gauges on filter banks with separate static-pressure taps upstream and downstream from filters. Mount filter gauges on outside of filter housing or filter plenum in an accessible position. Adjust and level inclined gauges.

E. Install and connect water-supply and drainage piping.

F. Coordinate electronic air cleaner and associated prefilter and final filter installations with duct and air-handling-unit installations.

3.3 CONTROL CONNECTIONS

A. Install control and electrical power wiring to field-mounted control devices.

B. Connect control wiring between pressure sensors and [**DDC system**]<**Insert system description**>.

C. Connect control wiring between controlled devices.

D. Connect control wiring according to Section 260523 "Control-Voltage Electrical Power Cables."

3.4 FIELD QUALITY CONTROL

A. Testing Agency:

1. Owner will engage a qualified testing agency to perform tests and inspections.
2. Engage a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].

D. Tests and Inspections: Test for leakage of unfiltered air while system is operating.

E. Electronic air cleaner and associated filters will be considered defective if they do not pass tests and inspections.

F. Prepare test and inspection reports.

3.5 CLEANING

A. After completing system installation and testing, adjusting, and balancing air-handling and air-distribution systems, clean electronic air filter housings and install new prefilter and final-filter media.

3.6 PROTECTION

A. Protect installed products and accessories from damage during construction.

END OF SECTION 22 11 19 00A

Task	Specification	Specification Description
22 11 19 00	07 63 00 00	Common Work Results for Fire Suppression
22 11 19 00	22 05 00 00	Common Work Results for Plumbing
22 11 19 00	07 63 00 00a	Common Work Results for HVAC
22 11 19 00	22 11 16 00d	Steam And Condensate Piping

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 11 23 13 - DOMESTIC-WATER PACKAGED BOOSTER PUMPS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Constant-speed packaged booster pump, simplex.
2. Constant-speed packaged booster pump, multiplex.
3. Variable-speed packaged booster pump, simplex.
4. Variable-speed packaged booster pump, multiplex.

B. Related Requirements:

1. Section 221123.21 "Inline, Domestic-Water Pumps" for domestic-water circulation pumps.
2. Section 221223.11 "Facility Indoor Potable-Water Storage Tanks" for separate hydropneumatic domestic-water tanks for multiplex booster pumps.

1.2 DEFINITIONS

A. Domestic-water packaged booster pump assembly: Factory fabricated, assembled, and tested assembly of booster pumps, connecting piping, valves, controls, and electrical components mounted on a base.

B. PID: Proportional Integral Derivative.

C. VFC: Variable-frequency controller.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

1. Construction details, material descriptions, and dimensions of individual components and profiles.
2. Rated capacities, operating characteristics, electrical characteristics, and furnished specialties and accessories.

B. Shop Drawings: For packaged booster pumps.

1. Shop Drawing Scale: [**1/4 inch per foot (1:50)**].
2. Include plans, elevations, sections, and [**mounting**][**attachment**] details.
3. Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
4. Wiring Diagrams: For power, signal, and control wiring.

C. Delegated Design Submittals: Comply with performance requirements and design criteria, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

1. Detail fabrication and assembly of seismic restraints.
2. Design Calculations: Provide design calculations for selecting vibration isolators [**and seismic**

restraints] and for designing vibration isolation bases.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Plans and details, drawn to scale, on which domestic-water packaged booster pump assembly is shown and coordinated with other installations, using input from installers of the items involved.

B. Seismic Qualification Certificates: For booster pumps, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

C. Source Limitation Reports: For factory testing of equipment.

D. Field Quality Control Reports: For specified tests and inspections.

E. Qualification Statements: For testing agency and factory-authorized service representative.

F. Delegated Design Engineer Qualifications: For domestic-water packaged booster pump assembly restraint and anchor design.

G. Sample Warranty: For specified special warranties.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For packaged booster pumps.

1. Indicate the actual installed items by marking the submittals with an arrow or box.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials [**, from the same production run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1.7 QUALITY ASSURANCE

A. Installer Qualifications: Authorized service representative who is trained and approved by manufacturer to perform [**manufacturer's field services**][**and**][**startup services**][**and**][**demonstration services**] .

B. Testing Agency Qualifications: An independent agency qualified to perform specified field tests.

C. Delegated Design Engineer Qualifications: A professional engineer who is legally qualified to practice in [**state**] where Project is located and who is experienced in providing engineering services of the type

indicated.

1.8 COORDINATION

A. Coordinate sizes and locations of concrete bases with actual equipment provided.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Comply with manufacturer's written instructions for delivery, storage and handling.

1.10 WARRANTY

A. Special Warranty: [**Manufacturer agrees**][**Installer agrees**][**Manufacturer and Installer agree**] to repair or replace packaged booster pump components that fail in materials or workmanship within specified warranty period.

1. Warranty Period: [**One**] year(s) from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Domestic-water packaged booster pumps intended to convey or dispense water for human consumption are to comply with the U.S. Safe Drinking Water Act, with requirements of authorities having jurisdiction, and with NSF/ANSI 61 and NSF/ANSI/CAN 372, or be certified in compliance with NSF/ANSI 61 and NSF/ANSI/CAN 372 by an ANSI-accredited third-party certification body, in that the weighted average lead content at wetted surfaces is less than or equal to 0.25 percent.

B. Seismic Performance: Domestic-water packaged booster pumps are to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**]. See Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

1. The term "withstand" means that "the unit will remain in place without separation of any parts from the device when subjected to the seismic forces specified [**and the unit will be fully operational after the seismic event**] ."

2. Component Importance Factor: [**1.5**][**1.0**] .

C. Delegated Design: Design restraints and anchors for domestic-water packaged booster pump assembly, including comprehensive engineering analysis by a qualified professional engineer, using performance requirements and design criteria indicated.

D. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and application.

2.2 CONSTANT-SPEED PACKAGED BOOSTER PUMP

A. Constant-Speed Packaged Booster Pump, Simplex:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Advanced Mechanical Technologies**]
   b. [**Canariis Corporation**]
   c. [**Delta P Carver**]
   d. [**Metropolitan Industries, Inc**]
   e. [**Thrush Co. Inc.**]
   f. [**TIGERFLOW Systems, Inc.**]

2. Source Limitations: Obtain constant-speed packaged booster pumps from single manufacturer.
3. Description: Simplex, constant-speed factory-assembled and -tested, fluid-handling system for domestic water, with pump, piping, valves, specialties, and controls, and mounted on base.

   a. Booster pump to be listed and labeled as a packaged pumping system by a testing agency acceptable to authorities having jurisdiction.

4. Standards:

   a. ASME Compliance: Comply with ASME B31.9 for piping.
   b. UL 508, "Industrial Control Equipment."
   c. UL 508A, "Industrial Control Panels."
   d. UL 778, "Motor-Operated Water Pumps."
   e. UL 1995, "Heating and Cooling Equipment."

5. Pump:

   a. Type: End suction as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for end-suction, close-coupled, single-stage, overhung-impeller, centrifugal pump.
   b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
   c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
   d. Shaft and Shaft Sleeve: Steel shaft, with copper-alloy shaft sleeve and deflector.
   e. Seal: Mechanical.
   f. Orientation: Mounted [**horizontally**][**vertically**] .

6. Motor: Single speed, with [**grease-lubricated**][**pre-greased, permanently shielded**] , ball-bearings, and directly mounted to pump casing. Select motor that will not overload through full range of pump performance curve.
7. Piping: [**Copper tube and copper fittings**][**Stainless steel pipe and fittings**][**Stainless steel pipe and fitting headers and copper tube and copper fittings between headers and pump**][**Galvanized-steel pipe and cast-iron fittings**] .
8. Valves:

   a. Shutoff Valves NPS 2 (DN 50) and Smaller: [**Gate valve**][**two-piece, full-port ball valve**] , in pump suction and discharge piping.
   b. Shutoff Valves NPS 2-1/2 (DN 65) and Larger: [**Gate valve**][**lug-type butterfly valve**] , in pump suction and discharge piping.

c. Check Valve NPS 2 (DN 50) and Smaller: [**Silent**][**swing**] type in pump discharge piping.
d. Check Valve NPS 2-1/2 (DN 65) and Larger: Silent type in pump discharge piping.
e. Control Valve with Separate Check Valve: Adjustable, automatic, [**pilot-operated**][**direct-acting**] , pressure-reducing type in pump discharge piping.

f. Control Valve: Combination adjustable, automatic, [**pilot-operated**][**direct-acting**] pressure-reducing-and-check type in pump discharge piping.
g. Thermal-Relief Valve: Temperature-and-pressure relief type in pump discharge piping.

9. Dielectric Fittings: With insulating material to isolate joined dissimilar metals.
10. Hydropneumatic Tank: Precharged [**, ASME-construction,**] diaphragm or bladder tank made of materials complying with NSF/ANSI 61 and NSF/ANSI/CAN 372.
11. Control Panel: Factory installed and connected as an integral part of booster pump; automatic for single-pump, constant-speed operation, with load control and protection functions.

a. Control Logic: [**Electromechanical system with switches, relays**][**Solid-state system with transducers, programmable microprocessor**] , and other devices in the controller.

b. Motor Controller, General Purpose: NEMA ICS 2, general-purpose, Class A, full-voltage, combination-magnetic type with undervoltage release feature, motor-circuit-protector-type disconnect, and short-circuit protective device.

1) Control Voltage: [**24**][**120**] V ac, with integral control-power transformer.

c. Motor Controller, Solid State: NEMA ICS 2, solid-state, reduced-voltage type.

1) Control Voltage: [**24**][**120**] V ac, with integral control-power transformer.

d. Enclosure: NEMA 250, [**Type 1**][**Type 3R**][**Type 4**][**Type 12**].
e. Motor Overload Protection: Overload relay in each phase.
f. Starting Devices: Hand-off-automatic selector switch in cover of control panel, plus pilot device for automatic control.

g. Pump Operation: [**Current-**][**pressure-**] sensing method.

1) Time Delay: Controls pump on-off operation; adjustable from [**1 to 300**] seconds.

h. Instrumentation: Suction and discharge pressure gauges.
i. Light: Running light for pump.
j. Thermal-bleed cutoff.
k. [**Low-suction-pressure**][**Water-storage-tank, low-level**] cutout.

l. High-suction-pressure cutout.
m. Low-discharge-pressure cutout.
n. High-discharge-pressure cutout.
o. Direct Digital Control (DDC) System for HVAC: Provide auxiliary contacts for interface to [**BACnet**][**LonWorks**] DDC system. DDC systems are specified in Section 230923 "Direct Digital Control (DDC) System for HVAC." Include the following:

1) On-off status of pump.
2) Alarm status.

12. Base: Structural steel.

13. Capacities and Characteristics:

a. Minimum Pressure Rating: [125 psig (860 kPa)][150 psig (1035 kPa)].
b. Electrical Characteristics:

1) Volts: [**120**][**240**][**277**][**480**] V.
2) Phases: [**Single**][**Three**] .
3) Hertz: [**60**] Hz.

c. Hydropneumatic Tank:

1) Pressure Rating: [125 psig (860 kPa)][150 psig (1035 kPa)][250 psig (1725 kPa)].

B. Constant-Speed Packaged Booster Pump, Multiplex:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Advanced Mechanical Technologies**]
b. [**Canariis Corporation**]
c. [**Metropolitan Industries, Inc**]
d. [**SyncroFlo, Inc.**]
e. [**Thrush Co. Inc.**]
f. [**TIGERFLOW Systems, Inc.**]

2. Source Limitations: Obtain constant-speed packaged booster pumps from single manufacturer.
3. Description: Multiplex, constant-speed factory-assembled and -tested, fluid-handling system for domestic water, with pumps, piping, valves, specialties, and controls, and mounted on base.

a. Booster pump to be listed and labeled as a packaged pumping system by a testing agency acceptable to authorities having jurisdiction.

4. Standards:

a. ASME Compliance: Comply with ASME B31.9 for piping.
b. UL 508, "Industrial Control Equipment."
c. UL 508A, "Industrial Control Panels."
d. UL 778, "Motor-Operated Water Pumps."
e. UL 1995, "Heating and Cooling Equipment."

5. Pumps, End Suction, Close Coupled:

a. Type: End suction as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for end-suction, close-coupled, single-stage, overhung-impeller, centrifugal pump.
b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
d. Shaft and Shaft Sleeve: Steel shaft, with copper-alloy shaft sleeve and deflector.
e. Seal: Mechanical.
f. Orientation: Mounted [**horizontally**][**vertically**] .

6. Pumps, End Suction, Frame Mounted, Separately Coupled:

a. Type: End suction as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for end-suction,

frame-mounted, separately coupled, single-stage, overhung-impeller, centrifugal pump. [**Include back-pullout design.**]
b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
d. Shaft and Shaft Sleeve: Stainless steel [**or steel**] shaft, with copper-alloy shaft sleeve and deflector.
e. Seal: Mechanical.
f. Bearing: [**Grease-lubricated**][**pre-greased, permanently shielded**] ball type.
g. Coupling: Flexible, with metal guard.

7. Pumps, In Line, Single Stage:

a. Type: In line, single stage as defined in ANSI/HI 14.1-14.2 and HI 14.3 for in-line, close-coupled, single-stage, overhung-impeller, centrifugal pump.
b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
d. Shaft and Shaft Sleeve: Stainless steel [**or steel**] shaft, with copper-alloy shaft sleeve.
e. Seal: Mechanical.
f. Bearing: [**Grease-lubricated**][**pre-greased, permanently shielded**] ball type.

8. Pumps, Vertical, Multistage:

a. Type: Vertical, multistage as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for in-line, separately coupled, multistage, overhung-impeller, centrifugal pump.
b. Casing: Cast-iron or steel base and stainless steel chamber.
c. Impeller: Closed, stainless steel; statically and dynamically balanced and keyed to shaft.
d. Shaft: Stainless steel.
e. Seal: Mechanical.
f. Bearing: Water-lubricated sleeve type.

9. Pumps, Vertical, Turbine, Can:

a. Type: Vertical turbine, can, as defined in ANSI/HI 14.1-14.2 for in-line, barrel or can, lineshaft, vertical turbine pump.
b. Impeller: Closed, stainless steel; statically and dynamically balanced and keyed to shaft.
c. Bowls: [**Epoxy-coated cast iron**][**Cast iron**].
d. Shaft: Stainless steel.
e. Seals: Mechanical and stuffing-box types.
f. Bearings: Water-lubricated bushing type.

10. Motors: Single speed, with [**grease-lubricated**][**pre-greased, permanently shielded**] , ball-bearings. Select motors that will not overload through full range of pump performance curve.
11. Piping: [**Copper tube and copper fittings**][**Stainless steel pipe and fittings**][**Stainless steel pipe and fitting headers and copper tube and copper fittings between headers and pump**][**Galvanized-steel pipe and cast-iron fittings**] .
12. Valves:

a. Shutoff Valves NPS 2 (DN 50) and Smaller: [**Gate valve**][**two-piece, full-port ball valve**] , in each pump's suction and discharge piping.
b. Shutoff Valves NPS 2-1/2 (DN 65) and Larger: [**Gate valve**][**lug-type butterfly valve**] , in each pump's suction and discharge piping [**and in inlet and outlet headers**] .
c. Check Valves NPS 2 (DN 50) and Smaller: [**Silent**][**swing**] type in each pump's discharge piping.
d. Check Valves NPS 2-1/2 (DN 65) and Larger: Silent type in each pump's discharge piping.

e. Control Valves with Separate Check Valve: Adjustable, automatic, [**pilot-operated**][**direct-acting**] , pressure-reducing type in each pump's discharge piping.

f. Control Valves: Combination adjustable, automatic, [**pilot-operated**][**direct-acting**] pressure-reducing-and-check type in each pump's discharge piping.

g. Thermal-Relief Valve: Temperature-and-pressure relief type in pump's discharge header piping.

13. Dielectric Fittings: With insulating material to isolate joined dissimilar metals.

14. Control Panel: Factory installed and connected as an integral part of booster pump; automatic for multiple-pump, constant-speed operation, with load control and protection functions.

a. Control Logic: [**Electromechanical system with switches, relays**][**Solid-state system with transducers, programmable microprocessor**] , and other devices in the controller.

b. Motor Controller, General Purpose: NEMA ICS 2, general-purpose, Class A, full-voltage, combination-magnetic type with undervoltage release feature, motor-circuit-protector-type disconnect, and short-circuit protective device.

1) Control Voltage: [**24**][**120**] V ac, with integral control-power transformer.

c. Motor Controller, Solid State: NEMA ICS 2, solid-state, reduced-voltage type.

1) Control Voltage: [**24**][**120**] V ac, with integral control-power transformer.

d. Enclosure: NEMA 250, [**Type 1**][**Type 3R**][**Type 4**][**Type 12**].

e. Motor Overload Protection: Overload relay in each phase.

f. Starting Devices: Hand-off-automatic selector switch for each pump in cover of control panel, plus pilot device for automatic control.

1) Duplex, Automatic, Alternating Starter: Switches lead pump to lag main pump and to two-pump operation.
2) Triplex, Sequence (Lead-Lag-Lag) Starter: Switches lead pump to one lag main pump and to three-pump operation.

g. Pump Operation and Sequencing: [**Current-**][**pressure-**] sensing method.

1) Time Delay: Controls pump on-off operation; adjustable from [**1 to 300**] seconds.

h. Instrumentation: Suction and discharge pressure gauges.

i. Lights: Running light for each pump.

j. Alarm Signal Device: Sounds alarm when backup pumps are operating.

1) Time Delay: Controls alarm operation; adjustable from [**1 to 300**] seconds, with [**automatic**][**manual**] reset.

k. Thermal-bleed cutoff.

l. [**Low-suction-pressure**][**Water-storage-tank, low-level**] cutout.

m. High-suction-pressure cutout.

n. Low-discharge-pressure cutout.

o. High-discharge-pressure cutout.

p. Direct Digital Control (DDC) System for HVAC: Provide auxiliary contacts for interface to [**BACnet**][**LonWorks**] DDC system. DDC systems are specified in Section 230923 "Direct-Digital Control (DDC) System for HVAC." Include the following:

1) On-off status of each pump.
2) Alarm status.

15. Base: Structural steel.

16. Capacities and Characteristics:

a. Minimum Pressure Rating: [**150 psig (1035 kPa)**][**250 psig (1725 kPa)**].

1) Electrical Characteristics:

a) Volts: [**120**][**240**][**277**][**480**] V.
b) Phases: [**Single**][**Three**] .
c) Hertz: [**60**] Hz.

b. Lag Pumps: Each of [**two**].

1) Electrical Characteristics:

a) Volts: [**120**][**240**][**277**][**480**] V.
b) Phases: [**Single**][**Three**] .
c) Hertz: [**60**] Hz.

2.3 VARIABLE-SPEED PACKAGED BOOSTER PUMP

A. Variable-Speed Packaged Booster Pump, Simplex:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Advanced Mechanical Technologies**]
b. [**Canariis Corporation**]
c. [**Delta P Carver**]
d. [**QuantumFlo, Inc.**]
e. [**Taco Comfort Solutions**]
f. [**TIGERFLOW Systems, Inc.**]
g. [**Xylem**]

2. Source Limitations: Obtain variable-speed packaged booster pumps from single manufacturer.
3. Description: Simplex, variable-speed factory-assembled and -tested, fluid-handling system for domestic water, with pump, piping, valves, specialties, and controls, and mounted on base.

a. Booster pump to be listed and labeled as a packaged pumping system by a testing agency acceptable to authorities having jurisdiction.

4. Standards:

a. ASME Compliance: Comply with ASME B31.9 for piping.
b. UL 508, "Industrial Control Equipment."
c. UL 508A, "Industrial Control Panels."
d. UL 778, "Motor-Operated Water Pumps."

e. UL 1995, "Heating and Cooling Equipment."

5. Pump:

   a. Type: End suction as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for end-suction, close-coupled, single-stage, overhung-impeller, centrifugal pump.
   b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
   c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
   d. Shaft and Shaft Sleeve: Steel shaft, with copper-alloy shaft sleeve and deflector.
   e. Seal: Mechanical.
   f. Orientation: Mounted [**horizontally**][**vertically**] .

6. Motor: Single speed, with [**grease-lubricated**][**pre-greased, permanently shielded**] , ball-bearings, and directly mounted to pump casing. Select motor that will not overload through full range of pump performance curve.
7. Piping: [**Copper tube and copper fittings**][**Stainless steel pipe and fittings**][**Stainless steel pipe and fitting headers and copper tube and copper fittings between headers and pump**][**Galvanized-steel pipe and cast-iron fittings**] .
8. Valves:

   a. Shutoff Valves NPS 2 (DN 50) and Smaller: [**Gate valve**][**two-piece, full-port ball valve**] , in pump suction and discharge piping.
   b. Shutoff Valves NPS 2-1/2 (DN 65) and Larger: [**Gate valve**][**lug-type butterfly valve**] , in pump suction and discharge piping.
   c. Check Valve NPS 2 (DN 50) and Smaller: [**Silent**][**swing**] type in pump discharge piping.
   d. Check Valve NPS 2-1/2 (DN 65) and Larger: Silent type in pump discharge piping.
   e. Thermal-Relief Valve: Temperature-and-pressure relief type in pump discharge piping.

9. Dielectric Fittings: With insulating material to isolate joined dissimilar metals.
10. Hydropneumatic Tank: Precharged [**, ASME-construction,**] diaphragm or bladder tank made of materials complying with NSF/ANSI 61 and NSF/ANSI/CAN 372.

11. VFC Specified in Other Section: Comply with Section 262923 "Variable-Frequency Motor Controllers."
12. VFC: Serving each pump in pump array.

    a. Manufactured Units: Pulse-width modulated; [**constant torque**][**and**][**variable torque**] for [**Design A and Design B**][**inverter-duty**] motors.
    b. Output Rating: Three phase; 10 to [**60 Hz, with voltage proportional to frequency throughout voltage range**][**66 Hz, with torque constant as speed changes**] ; maximum voltage equals input voltage.
    c. Unit Operating Requirements:

       1) Internal Adjustability:

          a) Minimum Speed: 5 to 25 percent of maximum rpm.
          b) Maximum Speed: 80 to 100 percent of maximum rpm.
          c) Acceleration: [**0.1 to 999.9**] seconds.
          d) Deceleration: [**0.1 to 999.9**] seconds.
          e) Current Limit: 30 to minimum of 150 percent of maximum rating.

       2) Self-Protection and Reliability Features:

          a) Surge suppression.

b) Loss of input signal protection.
c) Under- and overvoltage trips.
d) VFC and motor overload/overtemperature protection.
e) Critical frequency rejection.
f) Loss-of-phase protection.
g) Reverse-phase protection.
h) Motor-overtemperature fault.

3) Bidirectional autospeed search.
4) Torque boost.
5) Motor temperature compensation at slow speeds.

a) Panel-mounted operator station.
b) Historical logging information and displays.
c) Digital indicating devices.

6) Control Signal Interface: Electric.
7) PID control interface.
8) DDC System for HVAC Protocols for Network Communications: [**ASHRAE 135**].

d. Line Conditioning:

1) Input line conditioning.
2) Output filtering.
3) EMI/RFI filtering.

e. Bypass Systems:

1) Bypass Mode: [**Manual operation only**][**Field-selectable automatic or manual**] .
2) Bypass Controller:

a) Two-contactor style, with bypass and output isolating contactors [**and isolating switch**] .
b) Three-contactor style, with bypass and input and output isolating contactors [**and isolating switch**] .

3) Bypass Contactor Configuration: [**Full-voltage (across the line)**][**Reduced-voltage (autotransformer)**] type.

f. Instrumentation: Suction and discharge pressure gauges.
g. Light: Running light for pump.
h. Thermal-bleed cutoff.
i. [**Low-suction-pressure**][**Water-storage-tank, low-level**] cutout.

j. High-suction-pressure cutout.
k. Low-discharge-pressure cutout.
l. High-discharge-pressure cutout.
m. Direct Digital Control (DDC) System for HVAC: Provide auxiliary contacts for interface to [**BACnet**][**LonWorks**] DDC system. DDC systems are specified in Section 230923 "Direct Digital Control (DDC) System for HVAC." Include the following:

1) On-off status of each pump.
2) Alarm status.

13. Base: Structural steel.

14. Capacities and Characteristics:

    a. Minimum Pressure Rating: [**125 psig (860 kPa)**][**150 psig (1035 kPa)**].
    b. Electrical Characteristics:

        1) Volts: [**120**][**240**][**277**][**480**] V.
        2) Phases: [**Single**][**Three**] .
        3) Hertz: [**60**] Hz.

    c. Hydropneumatic Tank:

        1) Pressure Rating: [**125 psig (860 kPa)**][**150 psig (1035 kPa)**][**250 psig (1725 kPa)**].

B. Variable-Speed Packaged Booster Pump, Multiplex:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Advanced Mechanical Technologies**]
    b. [**Armstrong Fluid Technology**]
    c. [**Canariis Corporation**]
    d. [**Delta P Carver**]
    e. [**Flo Fab Inc**]
    f. [**GRUNDFOS CBS Inc.**]
    g. [**Patterson Pump Company; a Gorman-Rupp company**]
    h. [**QuantumFlo, Inc.**]
    i. [**SyncroFlo, Inc.**]
    j. [**Taco Comfort Solutions**]
    k. [**Thrush Co. Inc.**]
    l. [**TIGERFLOW Systems, Inc.**]
    m. [**Xylem**]

2. Source Limitations: Obtain variable-speed packaged booster pumps from single manufacturer.
3. Description: Multiplex, variable-speed factory-assembled and -tested, fluid-handling system for domestic water, with pump, piping, valves, specialties, and controls, and mounted on base.

    a. Booster pump to be listed and labeled as a packaged pumping system by a testing agency acceptable to authorities having jurisdiction.

4. Standards:

    a. ASME Compliance: Comply with ASME B31.9 for piping.
    b. UL 508, "Industrial Control Equipment."
    c. UL 508A, "Industrial Control Panels."
    d. UL 778, "Motor-Operated Water Pumps."
    e. UL 1995, "Heating and Cooling Equipment."

5. Pumps, End Suction, Close Coupled:

    a. Type: End suction as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for end-suction, close-coupled, single-stage, overhung-impeller, centrifugal pump.

b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
d. Shaft and Shaft Sleeve: Steel shaft, with copper-alloy shaft sleeve and deflector.
e. Seal: Mechanical.
f. Orientation: Mounted [**horizontally**][**vertically**] .

6. Pumps, End Suction, Frame Mounted, Separately Coupled:

a. Type: End suction as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for end-suction, frame-mounted, separately coupled, single-stage, overhung-impeller, centrifugal pump. [**Include back-pullout design.**]
b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
d. Shaft and Shaft Sleeve: Stainless steel [**or steel**] shaft, with copper-alloy shaft sleeve and deflector.
e. Seal: Mechanical.
f. Bearing: [**Grease-lubricated**][**pre-greased, permanently shielded**] ball type.
g. Coupling: Flexible, with metal guard.

7. Pumps, In Line, Single Stage:

a. Type: In line, single stage as defined in ANSI/HI 14.1-14.2 and ANSI/HI 14.3 for in-line, close-coupled, single stage overhung-impeller, centrifugal pump.
b. Casing: Radially split; [**bronze**][**cast iron**][**stainless steel**] .
c. Impeller: Closed, [**ASTM B584 cast bronze**][**stainless steel**]; statically and dynamically balanced and keyed to shaft.
d. Shaft and Shaft Sleeve: Stainless steel [**or steel**] shaft, with copper-alloy shaft sleeve.
e. Seal: Mechanical.
f. Bearing: [**Grease-lubricated**][**pre-greased, permanently shielded**] ball type.

8. Pumps, Vertical, Multistage:

a. Type: Vertical, multistage as defined in ANSI/HI 14.1-14.2 and ANSIHI 14.3 for in-line, multistage, separately coupled, overhung-impeller, centrifugal pump.
b. Casing: Cast-iron or steel base and stainless steel chamber.
c. Impeller: Closed, stainless steel; statically and dynamically balanced and keyed to shaft.
d. Shaft: Stainless steel.
e. Seal: Mechanical.
f. Bearing: Water-lubricated sleeve type.

9. Pumps, Vertical, Turbine, Can:

a. Type: Vertical turbine, can, as defined in ANSI/HI 14.1-14.2 for in-line, barrel or can, lineshaft, vertical pump.
b. Impeller: Closed, stainless steel; statically and dynamically balanced and keyed to shaft.
c. Bowls: [**Epoxy-coated cast iron**][**Cast iron**].
d. Shaft: Stainless steel.
e. Seals: Mechanical and stuffing-box types.
f. Bearings: Water-lubricated bushing type.

10. Motors: Single speed, with [**grease-lubricated**][**pre-greased, permanently shielded**] , ball-bearings. Select motors that will not overload through full range of pump performance curve.
11. Piping: [**Copper tube and copper fittings**][**Stainless steel pipe and fittings**][**Stainless steel pipe and fitting headers and copper tube and copper fittings between headers and**

pump][**Galvanized-steel pipe and cast-iron fittings**] .

12. Valves:

    a. Shutoff Valves NPS 2 (DN 50) and Smaller: [**Gate valve**][**two-piece, full-port ball valve**] , in each pump's suction and discharge piping.
    b. Shutoff Valves NPS 2-1/2 (DN 65) and Larger: [**Gate valve**][**lug-type butterfly valve**] , in each pump's suction and discharge piping [**and in inlet and outlet headers**] .
    c. Check Valves NPS 2 (DN 50) and Smaller: [**Silent**][**swing**] type in each pump's discharge piping.
    d. Check Valves NPS 2-1/2 (DN 65) and Larger: Silent type in each pump's discharge piping.
    e. Thermal-Relief Valve: Temperature-and-pressure relief type in pump's discharge header piping.

13. Dielectric Fittings: With insulating material to isolate joined dissimilar metals.

14. VFC Specified in Other Section: Comply with Section 262923 "Variable-Frequency Motor Controllers."
15. VFC: Serving each pump in pump array.

    a. Manufactured Units: Pulse-width modulated; [**constant torque**][**and**][**variable torque**] for [**Design A and Design B**][**inverter-duty**] motors.
    b. Output Rating: Three phase; 10 to [**60 Hz, with voltage proportional to frequency throughout voltage range**][**66 Hz, with torque constant as speed changes**] ; maximum voltage equals input voltage.
    c. Unit Operating Requirements:

        1) Internal Adjustability:

            a) Minimum Speed: 5 to 25 percent of maximum rpm.
            b) Maximum Speed: 80 to 100 percent of maximum rpm.
            c) Acceleration: [**0.1 to 999.9**] seconds.
            d) Deceleration: [**0.1 to 999.9**] seconds.
            e) Current Limit: 30 to minimum of 150 percent of maximum rating.

        2) Self-Protection and Reliability Features:

            a) Surge suppression.
            b) Loss of input signal protection.
            c) Under- and overvoltage trips.
            d) VFC and motor overload/overtemperature protection.
            e) Critical frequency rejection.
            f) Loss-of-phase protection.
            g) Reverse-phase protection.
            h) Motor-overtemperature fault.

        3) Bidirectional autospeed search.
        4) Torque boost.
        5) Motor temperature compensation at slow speeds.

            a) Panel-mounted operator station.
            b) Historical logging information and displays.
            c) Digital indicating devices.

        6) Control Signal Interface: Electric.
        7) PID control interface.

8) DDC System for HVAC Protocols for Network Communications: [**ASHRAE 135**].

d. Line Conditioning:

1) Input line conditioning.
2) Output filtering.
3) EMI/RFI filtering.

e. Bypass Systems:

1) Bypass Mode: [**Manual operation only**][**Field-selectable automatic or manual**] .
2) Bypass Controller:

a) Two-contactor style, with bypass and output isolating contactors [**and isolating switch**] .
b) Three-contactor style, with bypass and input and output isolating contactors [**and isolating switch**] .

3) Bypass Contactor Configuration: [**Full-voltage (across the line)**][**Reduced-voltage (autotransformer)**] type.

f. Instrumentation: Suction and discharge pressure gauges.
g. Lights: Running light for each pump.
h. Alarm Signal Device: Sounds alarm when backup pumps are operating.

1) Time Delay: Controls alarm operation; adjustable from [**1 to 300**] seconds, with [**automatic**][**manual**] reset.

i. Thermal-bleed cutoff.
j. [**Low-suction-pressure**][**Water-storage-tank, low-level**] cutout.

k. High-suction-pressure cutout.
l. Low-discharge-pressure cutout.
m. High-discharge-pressure cutout.
n. Direct Digital Control (DDC) System for HVAC: Provide auxiliary contacts for interface to [**BACnet**][**LonWorks**] DDC system. DDC systems are specified in Section 230923 "Direct Digital Control (DDC) System for HVAC." Include the following:

1) On-off status of each pump.
2) Alarm status.

16. Base: Structural steel.

17. Capacities and Characteristics:

a. Minimum Pressure Rating: [**150 psig (1035 kPa)**][**250 psig (1725 kPa)**].
b. Lead Pump:

1) Electrical Characteristics:

a) Volts: [**120**][**240**][**277**][**480**] V.
b) Phases: [**Single**][**Three**] .
c) Hertz: [**60**] Hz.

c. Lag Pumps: Each of [**two**].

1) Electrical Characteristics:

a) Volts: [**120**][**240**][**277**][**480**] V.
b) Phases: [**Single**][**Three**] .
c) Hertz: [**60**] Hz.

2.4 MOTORS

A. Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors.

1. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
2. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in NFPA 70.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of packaged booster pumps.

B. Examine roughing-in for booster pumps to verify actual locations of piping connections before booster-pump installation.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION OF DOMESTIC-WATER PACKAGED BOOSTER PUMPS

A. Install packaged booster pumps on cast-in-place concrete equipment base(s). Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."

B. Comply with requirements for vibration isolation and seismic-control devices specified in Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."

C. Comply with requirements for vibration isolation devices specified in Section 220548.13 "Vibration Controls for Plumbing Piping and Equipment."

D. Support connected domestic-water piping so weight of piping is not supported by packaged booster pumps.

3.3 PIPING CONNECTIONS

A. Comply with requirements for piping specified in Section 221116 "Domestic Water Piping." Drawings indicate general arrangement of piping, fittings, and specialties.

B. Connect domestic-water piping to packaged booster pumps. Install suction and discharge pipe equal to

or greater than size of system suction and discharge [**headers**][**piping**] .

1. Install shutoff valves on piping connections to packaged booster-pump suction and discharge [**headers**][**piping**] . Install ball, butterfly, or gate valves same size as suction and discharge [**headers**][**piping**] . Comply with requirements for general-duty valves specified in Section 220523 "General-Duty Valves for Plumbing Piping."
2. Install union, flanged, or grooved-joint connections on suction and discharge [**headers**][**piping**] at connection to domestic-water piping. Comply with requirements for unions and flanges specified in Section 221116 "Domestic Water Piping."
3. Install valved bypass, same size as and between piping, at connections to packaged booster-pump suction and discharge [**headers**][**piping**] . Comply with requirements for domestic-water piping specified in Section 221116 "Domestic Water Piping."
4. Install flexible connectors, same size as piping, on piping connections to packaged booster-pump suction and discharge [**headers**][**piping**] . Comply with requirements for flexible connectors specified in Section 221116 "Domestic Water Piping."
5. Where installing piping adjacent to packaged booster pumps, allow space for service and maintenance.

C. Install pressure gauges on feedwater-inlet and treated water outlet piping. Comply with requirements for pressure gauges specified in Section 220500 "Common Work Results for Plumbing."

1. Exception: Packaged booster pumps with factory-installed pressure gauges.

3.4 ELECTRICAL CONNECTIONS

A. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Install electrical devices furnished by manufacturer, but not factory mounted, in accordance with NFPA 70 and NECA 1.

D. Furnish and install raceways. Comply with requirements in Section 260533.13 "Conduits for Electrical Systems" and Section 260533.16 "Boxes and Covers for Electrical Systems."

E. Furnish and install circuit breakers. Comply with requirements in Section 262816 "Enclosed Switches and Circuit Breakers."

3.5 CONTROL CONNECTIONS

A. Install control and electrical power wiring to field-mounted control devices.

B. Connect control wiring in accordance with Section 260523 "Control-Voltage Electrical Power Cables."

3.6 IDENTIFICATION

A. Identify system components. Comply with requirements for identification specified in Section 220553 "Identification for Plumbing Piping and Equipment."

B. Install nameplate for each electrical connection, indicating electrical equipment designation and circuit number feeding connection.

1. Nameplate is to be laminated acrylic or melamine plastic signs, as specified in Section 260553 "Identification for Electrical Systems."
2. Nameplate is to be laminated acrylic or melamine plastic signs with a black background and engraved white letters at least **1/2 inch (13 mm)** high.

3.7 FIELD QUALITY CONTROL

A. Testing Agency: [**the Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Tests and Inspections: Perform tests and inspections [**with the assistance of a factory-authorized service representative**] .

1. Perform visual and mechanical inspection.
2. Leak Test: After installation, charge booster pump and test for leaks. Repair leaks and retest until no leaks exist.
3. Operational Test: After electrical circuitry has been energized, start booster pumps to confirm proper motor rotation and booster-pump operation.
4. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

5. Pumps and controls will be considered defective if they do not pass tests and inspections.

D. Prepare test and inspection reports.

3.8 STARTUP SERVICE

A. [**Engage a factory-authorized service representative to perform**][**Perform**] startup service.

1. Complete installation and startup checks in accordance with manufacturer's written instructions.

3.9 ADJUSTING

A. Adjust booster pumps to function smoothly, and lubricate as recommended by manufacturer.

B. Adjust pressure set points.

C. Occupancy Adjustments: When requested within [**12**] months of date of Substantial Completion, provide on-site assistance in adjusting booster pump to suit actual occupied conditions. Provide up to [**two**] visits to Project during other-than-normal occupancy hours for this purpose.

3.10 DEMONSTRATION

A. [**Engage a factory-authorized service representative to train**][**Train**] the Owner’s maintenance personnel to adjust, operate, and maintain booster pumps.

END OF SECTION 22 11 23 13

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 11 23 23 - INLINE, DOMESTIC-WATER PUMPS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Centrifugal pumps, in-line, sealless.
2. Centrifugal pumps, horizontally mounted, in-line, separately coupled.
3. Centrifugal pumps, horizontally mounted, in-line, close-coupled.
4. Centrifugal pumps, vertically mounted, in-line, close-coupled.

B. Related Requirements:

1. Section 221123.13 "Domestic-Water Packaged Booster Pumps" for booster systems.
2. Section 331113 "Potable Water Supply Wells" for well pumps.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

1. Include construction materials, rated capacities, certified performance curves with operating points plotted on curves, operating characteristics, electrical characteristics, and furnished specialties and accessories.

B. Sustainable Design Submittals:

1. Product Data: For pump controls.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Detail pumps and adjacent equipment. Show support locations, type of support, weight on each support, required clearances, and other details, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Structural members to which pumps will be attached.
2. Size and location of initial access modules for acoustical tile.

B. Seismic Qualification Data: Certificates, for inline, domestic-water pumps, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

C. Field Quality Control Reports: For specified tests and inspections.

D. Qualification Statements: For testing agency and factory-authorized service representative.

1.4 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For inline, domestic-water pumps to include in operation and maintenance manuals.

1.5 QUALITY ASSURANCE

A. Installer Qualifications: Authorized service representative who is trained and approved by manufacturer to perform [**manufacturer's field services**][**and**][**startup services**] .

B. Testing Agency Qualifications: An independent agency qualified to perform specified field tests.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Retain shipping flange protective covers and protective coatings during storage.

B. Protect bearings and couplings against damage.

C. Comply with pump manufacturer's written instructions for handling.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

B. UL Compliance: UL 778 for motor-operated water pumps.

C. Drinking Water System Components - Health Effects and Drinking Water System Components - Lead Content Compliance: NSF/ANSI 61 and NSF/ANSI/CAN 372.

D. Seismic Performance: Inline, domestic-water pumps to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**].

1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified [**and the unit will be fully operational after the seismic event**] ."

2. Component Importance Factor: [**1.5**][**1.0**] .

2.2 CENTRIFUGAL PUMPS

A. Centrifugal Pumps, In-Line, Sealless:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Flo Fab Inc**]
b. [**GRUNDFOS CBS Inc.**]
c. [**Taco Comfort Solutions**]
d. [**WILO USA LLC - WILO Canada Inc.**]

2. Description: Factory-assembled and -tested, in-line, close-coupled, canned-motor, sealless, overhung-impeller centrifugal pumps.

3. Capacities and Characteristics:

a. Pump Control: [**Pressure switch**][**Thermostat**][**Timer**] .
b. Electrical Characteristics:

1) Volts: [**120**] V.
2) Phase: [**Single**] phase.
3) Hertz: [**60**] Hz.

4. Pump Construction:

a. Pump and Motor Assembly: Hermetically sealed, replaceable-cartridge type with motor and impeller on common shaft and designed for installation with pump and motor shaft horizontal.
b. Minimum Working Pressure: [**125 psig (860 kPa)**].
c. Maximum Continuous Operating Temperature: [**220 deg F (104 deg C)**].
d. Casing: [**Cast iron**][**Bronze**][**Stainless steel**] , with threaded or companion-flange connections.
e. Impeller: [**Plastic**][**composite**][**stainless steel**] .
f. Motor: [**Single**][**Three**] speed.

B. Centrifugal Pumps, Horizontally Mounted, In-Line, Separately Coupled:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Bell & Gossett; a Xylem brand**]
b. [**MEPCO, LLC.**]
c. [**Taco Comfort Solutions**]
d. [**Thrush Co. Inc.**]

2. Description: Factory-assembled and -tested, in-line, single-stage, separately coupled, overhung-impeller centrifugal pumps designed for installation with pump and motor shafts mounted horizontal.

3. Capacities and Characteristics:

a. Pump Control: [**Pressure switch**][**Thermostat**][**Timer**] .
b. Electrical Characteristics:

1) Volts: [**120**][**240**] V.
2) Phases: [**Single**][**Three**] phase.
3) Hertz: [**60**] Hz.

4. Pump Construction:

a. Casing:

1) Radially split [**bronze**][**cast iron**][**stainless steel**] with threaded companion-flange connections for pumps with **NPS 2 (DN 50)** pipe connections and flanged connections for pumps with **NPS 2-1/2 (DN 65)** pipe connections.
2) Built to permit servicing of pump internals without disturbing the casing or the suction and discharge piping.
3) Gauge port tappings at suction and discharge nozzles.

b. Impeller: [**Bronze**][**stainless steel**] , statically and dynamically balanced, closed, and keyed to shaft.
c. Shaft and Shaft Sleeve: Steel shaft, with copper-alloy shaft sleeve.
d. Shaft Coupling: Flexible, capable of absorbing torsional vibration and shaft misalignment.
e. Seal: Mechanical, with [**carbon-steel rotating ring, stainless-steel spring, ceramic seat, and rubber bellows and gasket**].
f. Bearings: [**Grease-lubricated**][**permanently lubricated**] ball type.
g. Minimum Working Pressure: [**125 psig (860 kPa)**][**175 psig (1200 kPa)**].
h. Continuous Operating Temperature: [**200 deg F (93 deg C)**].

5. Motor: Single speed, with permanently lubricated ball bearings; and [**resiliently**][**rigidly**] mounted to pump casing.

C. Centrifugal Pumps, Horizontally Mounted, In-Line, Close-Coupled:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Alyan Pump Company**]
b. [**Bell & Gossett; a Xylem brand**]
c. [**MEPCO, LLC.**]
d. [**Pentair Aurora; Pentair Pump Group**]
e. [**Taco Comfort Solutions**]
f. [**Thrush Co. Inc.**]

2. Description: Factory-assembled and -tested, in-line, single-stage, close-coupled, overhung-impeller centrifugal pumps designed for installation with pump and motor shaft mounted horizontal.

3. Capacities and Characteristics:

a. Pump Control: [**Pressure switch**][**Thermostat**][**Timer**] .
b. Electrical Characteristics:

1) Volts: [**120**][**240**] V.
2) Phases: [**Single**][**Three**] phase.
3) Hertz: [**60**] Hz.

4. Pump Construction:

   a. Casing:

      1) Radially split [**bronze**][**brass**][**cast iron**] with threaded companion-flange connections for pumps with **NPS 2 (DN 50)** pipe connections and flanged connections for pumps with **NPS 2-1/2 (DN 65)** pipe connections.
      2) Built to permit servicing of pump internals without disturbing the casing or the suction and discharge piping.
      3) Gauge port tappings at suction and discharge nozzles.

   b. Impeller: [**Bronze**][**brass**] , statically and dynamically balanced, closed, and keyed to shaft.
   c. Shaft and Shaft Sleeve: Steel shaft with deflector, with copper-alloy shaft sleeve. Include water slinger on shaft between motor and seal.
   d. Shaft Coupling: Flexible, capable of absorbing torsional vibration and shaft misalignment.
   e. Seal: Mechanical, with [**carbon-steel rotating ring, stainless-steel spring, ceramic seat, and rubber bellows and gasket**].
   f. Bearings: [**Grease-lubricated**][**permanently lubricated**] ball type.
   g. Minimum Working Pressure: [**175 psig (1200 kPa)**].
   h. Continuous Operating Temperature: [**225 deg F (107 deg C)**].

5. Motor: Single speed, with grease-lubricated ball bearings; [**resiliently**][**rigidly**] mounted to pump casing.

D. Centrifugal Pumps, Vertically Mounted, In-Line, Close-Coupled:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Alyan Pump Company**]
   b. [**Armstrong Fluid Technology**]
   c. [**Bell & Gossett; a Xylem brand**]
   d. [**Flo Fab Inc**]
   e. [**GRUNDFOS CBS Inc.**]
   f. [**MEPCO, LLC.**]
   g. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
   h. [**Pentair Aurora; Pentair Pump Group**]
   i. [**Taco Comfort Solutions**]
   j. [**Thrush Co. Inc.**]
   k. [**Weinman Division**]

2. Description: Factory-assembled and -tested, in-line, single-stage, close-coupled, overhung-impeller centrifugal pumps designed for installation with pump and motor shaft mounted vertically.

3. Capacities and Characteristics:

   a. Casing Material: [**Bronze**][**Cast iron**] .
   b. Impeller Material: [**ASTM B584, cast bronze**][**ASTM B584, cast bronze or stainless steel**][**Stainless steel**] .
   c. Minimum Operating Pressure: **175 psig (1200 kPa)**.
   d. Maximum Continuous Operating Temperature: **225 deg F (107 deg C)**.
   e. Pump Control: [**Pressure switch**][**Thermostat**][**Timer**] .
   f. Electrical Characteristics:

1) Volts: [**120**][**240**] V.
2) Phases: [**Single**][**Three**] phase.
3) Hertz: [**60**] Hz.

4. Pump Construction:

a. Casing: Radially split [**bronze**][**cast or ductile iron**] , with wear rings and threaded companion-flange connections for pumps with **NPS 2 (DN 50)** pipe connections and flanged connections for pumps with **NPS 2-1/2 (DN 65)** pipe connections. [**Include pump manufacturer's base attachment for mounting pump on concrete base.**]
b. Impeller: [**Bronze**][**brass**][**stainless steel**] , statically and dynamically balanced, closed, and keyed to shaft.
c. Shaft and Shaft Sleeve: [**Steel**][**stainless-steel**] shaft, with copper-alloy shaft sleeve.
d. Shaft Coupling: Flexible or rigid type if pump is provided with coupling.
e. Seal: Mechanical, with carbon-steel rotating ring, stainless-steel spring, ceramic seat, and rubber bellows and gasket. Include water slinger on shaft between motor and seal.
f. Bearings: Oil-lubricated; bronze-journal or ball type.
g. Minimum Working Pressure: [**175 psig (1200 kPa)**].
h. Continuous Operating Temperature: [**225 deg F (107 deg C)**].

5. Motor: Single speed, with grease-lubricated ball bearings; rigidly mounted to pump casing.

2.3 MOTORS

A. Comply with NEMA designation, temperature rating, service factor, enclosure type, and efficiency requirements for motors specified in Section 220500 "Common Work Results for Plumbing."

1. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.

2.4 CONTROLS

A. Pressure Switches: Electric, adjustable for control of [**water-supply**] pump.

1. Type: Water-immersion pressure sensor, for installation in piping.
2. Enclosure: NEMA 250, [**Type 4X**].
3. Operation of Pump: On or off.
4. Transformer: Provide if required.
5. Power Requirement: [**24 V ac**][**120 V ac**].

B. Thermostats: Electric; adjustable for control of [**hot-water circulation**] pump.

1. Type: Water-immersion temperature sensor, for installation in piping.
2. Range: [**50 to 125 deg F (10 to 52 deg C)**][**65 to 200 deg F (18 to 93 deg C)**][**100 to 240 deg F (38 to 116 deg C)**].
3. Enclosure: NEMA 250, [**Type 4X**].
4. Operation of Pump: On or off.
5. Transformer: Provide if required.
6. Power Requirement: [**24 V ac**][**120 V ac**].
7. Settings: Start pump at [**105 deg F (41 deg C)**][**110 deg F (43 deg C)**][**115 deg F (46 deg C)**] and stop pump at [**120 deg F (49 deg C)**][**125 deg F (52 deg C)**].

C. Timers: Electric, for control of [**hot-water circulation**] pump.

1. Type: Programmable, [**seven-day**] clock with manual override on-off switch.
2. Enclosure: NEMA 250, [**Type 1**], suitable for wall mounting.
3. Operation of Pump: On or off.
4. Transformer: Provide if required.
5. Power Requirement: [**24 V ac**][**120 V ac**].
6. Programmable Sequence of Operation: [**Up to two on-off cycles each day for seven days**].

D. Time-Delay Relays: Electric, for control of hot-water circulation pump between water heater and connected hot-water storage tank.

1. Type: Adjustable time-delay relay.
2. Range: Up to five minutes.
3. Setting: Five minutes.
4. Enclosure: NEMA 250, [**Type 4X**].
5. Operation of Pump: On or off.
6. Transformer: Provide if required.
7. Power Requirement: [**24 V ac**][**120 V ac**].
8. Programmable Sequence of Operation: Limit pump operation to periods of burner operation, plus maximum five minutes after the burner stops.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine roughing-in for domestic-water-piping system to verify actual locations of piping connections before pump installation.

3.2 INSTALLATION OF CENTRIFUGAL PUMPS

A. Comply with ANSI/HI 14.1-14.2.

B. Mount pumps in orientation complying with manufacturer's written instructions.

C. Pump Mounting:

1. Install vertically mounted, in-line, close-coupled centrifugal pumps with cast-iron base mounted on concrete base using vibration isolation type and deflection as specified in [**Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."**][**Section 220548.13 "Vibration Controls for Plumbing Piping and Equipment."**] Comply with requirements for concrete base specified in Section 033000 "Cast-in-Place Concrete."
2. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on **18-inch (450-mm)** centers around the full perimeter of concrete base.
3. For supported equipment, install epoxy-coated anchor bolts that extend through concrete base and anchor into structural concrete floor.
4. Place and secure anchorage devices. Use setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
5. Install anchor bolts to elevations required for proper attachment to supported equipment.

D. Install continuous-thread hanger rods and vibration isolation of size required to support pump weight.

1. Comply with requirements for vibration isolation devices specified in [**Section 220548 "Vibration and Seismic Controls for Plumbing Piping and Equipment."**][**Section 220548.13 "Vibration Controls for Plumbing Piping and Equipment."**] Fabricate brackets or supports as required.

2. Comply with requirements for hangers and supports specified in Section 220529 "Hangers and Supports for Plumbing Piping and Equipment."

E. Install pressure switches in water-supply piping.

F. Install thermostats in hot-water return piping.

G. Install timers [**on wall in engineer's office**].

H. Install time-delay relays in piping between water heaters and hot-water storage tanks.

3.3 PIPING CONNECTIONS

A. Comply with requirements for piping specified in Section 221116 "Domestic Water Piping." Drawings indicate general arrangement of piping, fittings, and specialties.

B. Where installing piping adjacent to inline, domestic-water pumps, allow space for service and maintenance.

C. Connect domestic-water piping to pumps. Install suction and discharge piping equal to or greater than size of pump nozzles.

1. Install flexible connectors adjacent to pumps in suction and discharge piping of the following pumps:

a. Horizontally mounted, in-line, separately coupled centrifugal pumps.
b. Horizontally mounted, in-line, close-coupled centrifugal pumps.
c. Vertically mounted, in-line, close-coupled centrifugal pumps.
d. Comply with requirements for flexible connectors specified in Section 221116 "Domestic Water Piping."

D. Install shutoff valve and strainer on suction side of each pump, and check, shutoff, and throttling valves on discharge side of each pump. Install valves same size as connected piping. Comply with requirements for strainers specified in Section 221119 "Domestic Water Piping Specialties." Comply with requirements for valves specified in Section 220523 "General-Duty Valves for Plumbing Piping."

1. Install pressure gauge [**and snubber**] at suction of each pump and pressure gauge [**and snubber**] at discharge of each pump. Install at integral pressure-gauge tappings where provided or install pressure-gauge connectors in suction and discharge piping around pumps. Comply with requirements for pressure gauges and snubbers specified in Section 220500 "Common Work Results for Plumbing."

3.4 INSTALLATION OF CONTROLS

A. Install control and electrical power wiring to field-mounted control devices.

B. Connect control wiring between temperature controllers and devices.

C. Interlock pump between water heater and hot-water storage tank with water heater burner and time-delay relay.

3.5 IDENTIFICATION

A. Identify system components. Comply with requirements for identification specified in Section 220553 "Identification for Plumbing Piping and Equipment" for identification of pumps.

3.6 FIELD QUALITY CONTROL

A. Testing Agency: [**the Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

1. the Owner will engage a qualified testing agency to perform tests and inspections.

2. Engage a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections [**with the assistance of a factory-authorized service representative**] .

D. Tests and Inspections: Inspect pipe, fittings, strainers, and valves, randomly selected by Architect, by removing field-applied jacket and insulation in layers in reverse order of their installation, as directed by the Owner.

1. Extent of inspection is limited to [**three**] locations of straight pipe, [**three**] locations of threaded fittings, [**three**] locations of welded fittings, [**two**] locations of threaded strainers, [**two**] locations of welded strainers, [**three**] locations of threaded valves, and [**three**] locations of flanged valves for each pipe service defined in "Piping Insulation Schedule, General" Article.

2. Inline, domestic-water pump will be considered defective if it does not pass tests and inspections.

E. Prepare test and inspection reports.

3.7 STARTUP SERVICE

A. [**Engage a factory-authorized service representative to perform**][**Perform**] startup service.

1. Complete installation and startup checks in accordance with manufacturer's written instructions.
2. Check piping connections for tightness.
3. Clean strainers on suction piping.
4. Set [**pressure switches,**][**thermostats,**][**timers,**][**and**][**time-delay relays**] for automatic starting and stopping operation of pumps.
5. Perform the following startup checks for each pump before starting:

    a. Verify bearing lubrication.
    b. Verify that pump is free to rotate by hand and that pump for handling hot liquid is free to rotate with pump hot and cold. If pump is bound or drags, do not operate until cause of trouble is determined and corrected.
    c. Verify that pump is rotating in the correct direction.

6. Prime pump by opening suction valves and closing drains, and prepare pump for operation.
7. Start motor.
8. Open discharge valve slowly.
9. Adjust temperature settings on thermostats.

10. Adjust timer settings.

3.8 ADJUSTING

A. Adjust inline, domestic-water pumps to function smoothly, and lubricate as recommended in writing by manufacturer.

B. Adjust initial temperature set points.

C. Set field-adjustable switches and circuit-breaker trip ranges as indicated.

END OF SECTION 22 11 23 23

SECTION 22 11 23 23A - HYDRONIC PUMPS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Close-coupled, in-line centrifugal pumps.
2. Close-coupled, end-suction centrifugal pumps.
3. Separately coupled, horizontally mounted, in-line centrifugal pumps.
4. Separately coupled, vertically mounted, in-line centrifugal pumps.
5. Separately coupled, base-mounted, end-suction centrifugal pumps.
6. Separately coupled, base-mounted, double-suction centrifugal pumps.
7. Separately coupled, vertically mounted, double-suction centrifugal pumps.
8. Separately coupled, vertically mounted, turbine centrifugal pumps.
9. Wet-rotor pumps.
10. Automatic condensate pump units.

1.2 DEFINITIONS

A. ECM: Electronically commutated motor.

B. EPDM: Ethylene propylene diene monomer.

C. EPR: Ethylene propylene rubber.

D. FKM: Fluoroelastomer polymer.

E. HI: Hydraulic Institute.

F. NBR: Nitrile rubber or Buna-N.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of pump.

1. Include certified performance curves and rated capacities, operating characteristics, furnished specialties, final impeller dimensions, and accessories for each type of product indicated.
2. Indicate pump's operating point on curves.

B. Shop Drawings: For each pump.

1. Show pump layout and connections.
2. Include setting drawings with templates for installing foundation and anchor bolts and other anchorages.
3. Include diagrams for power, signal, and control wiring.

C. Delegated Design Submittals: For each pump.

1. Design calculations and vibration isolation base details, signed and sealed by a qualified professional engineer.

    a. Design Calculations: Calculate requirements for selecting vibration isolators[**and seismic restraints**] and for designing vibration isolation bases.
    b. Vibration Isolation Base Details: Detail fabrication, including anchorages and attachments to structure and to supported equipment. Include adjustable motor bases, rails, and frames for equipment mounting.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Plans, or BIM model, drawn to scale, showing the items described in this Section, and coordinated with all building trades.

B. Seismic Qualification Data: Certificates for pumps, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

C. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For pumps to include in emergency, operation, and maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Mechanical Seals: [**One**]<**Insert number**> mechanical seal(s) for each pump.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

B. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design vibration isolation[**and seismic restraints**].

C. Seismic Performance: Pumps shall withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**]<**Insert requirement**>.

1. The term "withstand" means "the unit will remain in place without separation of any parts from the device when subjected to the seismic forces specified[**and the unit will be fully operational after the seismic event**]."
2. Component Importance Factor: [**1.5**][**1.0**].
3. <**Insert requirements for Component Amplification Factor and Component Response Modification Factor**>.

2.2 CLOSE-COUPLED, IN-LINE CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Crane Pumps & Systems**]
5. [**Flowserve Corporation**]
6. [**GRUNDFOS CBS Inc.**]
7. [**ITT Corporation**]
8. [**Mepco, LLC**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Patterson Pump Company; a Gorman-Rupp company**]
11. [**Peerless Pump Company**]
12. [**Taco Comfort Solutions**]
13. [**Thrush Co. Inc.**]
14. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Crane Pumps & Systems**]
5. [**Flowserve Corporation**]
6. [**GRUNDFOS CBS Inc.**]
7. [**ITT Corporation**]
8. [**Mepco, LLC**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Patterson Pump Company; a Gorman-Rupp company**]
11. [**Peerless Pump Company**]
12. [**Taco Comfort Solutions**]
13. [**Thrush Co. Inc.**]
14. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, centrifugal, overhung-impeller, close-coupled, in-line pump as defined in HI 1.1-1.2 and HI 1.3; designed for installation with pump and motor shafts mounted horizontally or vertically.

E. Pump Construction:

1. Casing: Radially split, cast iron, with threaded gauge tappings at inlet and outlet[**, replaceable**

bronze wear rings,] and threaded [**companion-flange**][**union-end**] connections.

2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced, keyed to shaft, and secured with a locking cap screw. For constant-speed pumps, trim impeller to match specified performance.
3. Pump Shaft Sleeve: [**Bronze**][**Type 304 stainless steel**].
4. Pump Stub Shaft: [**Type 304**][**Type 316**] stainless steel.
5. Seal: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a stainless steel spring, and [**NBR**][**EPDM**][**FKM**]<**Insert material**> rubber bellows and gasket. Include water slinger on shaft between motor and seal.
6. Seal Flushing: Flush, cool, and lubricate pump seal by directing pump discharge water to flow over the seal.

F. Shaft Coupling: Rigid, axially-split spacer coupling to allow service of pump seal without disturbing pump or motor.

G. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure : [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

H. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**175 psig (1204 kPa)**][**250 psig (1720 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**250 deg F (120 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.
7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

    a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
    b. Phase: [**Single**][**Three**].
    c. Hertz: 60 Hz.
    d. Full-Load Amperes: <**Insert value**> A.
    e. Minimum Circuit Ampacity: <**Insert value**> A.
    f. Maximum Overcurrent Protection: <**Insert value**> A.

2.3 CLOSE-COUPLED, END-SUCTION CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Buffalo Pumps, Inc**]
5. [**Crane Pumps & Systems**]
6. [**Flowserve Corporation**]
7. [**GRUNDFOS CBS Inc.**]
8. [**ITT Corporation**]
9. [**Lancaster Pump**]
10. [**Mepco, LLC**]
11. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
12. [**Patterson Pump Company; a Gorman-Rupp company**]
13. [**Peerless Pump Company**]
14. [**Scot Pump; a division of Ardox Corporation**]
15. [**Taco Comfort Solutions**]
16. [**Thrush Co. Inc.**]
17. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Buffalo Pumps, Inc**]
5. [**Crane Pumps & Systems**]
6. [**Flowserve Corporation**]
7. [**GRUNDFOS CBS Inc.**]
8. [**ITT Corporation**]
9. [**Lancaster Pump**]
10. [**Mepco, LLC**]
11. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
12. [**Patterson Pump Company; a Gorman-Rupp company**]
13. [**Peerless Pump Company**]
14. [**Scot Pump; a division of Ardox Corporation**]
15. [**Taco Comfort Solutions**]
16. [**Thrush Co. Inc.**]
17. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, centrifugal, overhung-impeller, close-coupled, end-suction pump as defined in HI 1.1-1.2 and HI 1.3; designed for installation with pump and motor shafts mounted horizontally.

E. Pump Construction:

1. Casing: Radially split, cast iron, with[**replaceable bronze wear rings,**] drain plug at bottom and air vent at top of volute, threaded gauge tappings at inlet and outlet, and [**threaded companion-flange**][**flanged**] connections.
2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced, keyed to shaft, and secured with a locking cap screw. For constant-speed pumps, trim impeller to match specified performance.
3. Pump Shaft Sleeve: [**Bronze**][**Type 304 stainless steel**].
4. Pump Stub Shaft: [**Type 304**][**Type 316**] stainless steel.
5. Seal: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a

stainless steel spring, and [**NBR**][**EPDM**][**FKM**] bellows and gasket. Include water slinger on shaft between motor and seal.

F. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure: [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

G. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**175 psig (1204 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**250 deg F (120 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.
7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
b. Phase: [**Single**][**Three**].
c. Hertz: 60 Hz.
d. Full-Load Amperes: <**Insert value**> A.
e. Minimum Circuit Ampacity: <**Insert value**> A.
f. Maximum Overcurrent Protection: <**Insert value**> A.

2.4 SEPARATELY COUPLED, HORIZONTALLY MOUNTED, IN-LINE CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Armstrong Fluid Technology**]
2. [**Aurora Pump; Pentair Ltd.**]
3. [**Flowserve Corporation**]
4. [**ITT Corporation**]
5. [**Mepco, LLC**]
6. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
7. [**Scot Pump; a division of Ardox Corporation**]
8. [**Taco Comfort Solutions**]
9. [**Thrush Co. Inc.**]
10. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's**

name; product name or designation> or comparable product by one of the following:

1. [**Armstrong Fluid Technology**]
2. [**Aurora Pump; Pentair Ltd.**]
3. [**Flowserve Corporation**]
4. [**ITT Corporation**]
5. [**Mepco, LLC**]
6. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
7. [**Scot Pump; a division of Ardox Corporation**]
8. [**Taco Comfort Solutions**]
9. [**Thrush Co. Inc.**]
10. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, centrifugal, overhung-impeller, separately coupled, in-line pump as defined in HI 1.1-1.2 and HI 1.3; designed for installation with pump and motor shafts mounted horizontally.

E. Pump Construction:

1. Casing: Radially split, cast iron, with threaded gauge tappings at inlet and outlet, and threaded [**companion-flange**][**union-end**] connections.
2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced, and keyed to shaft. For pumps that are not frequency-drive controlled, trim impeller to match specified performance.
3. Pump Shaft: [**Carbon steel, with copper-alloy shaft sleeve**][**Type 304 stainless steel**][**Type 316 stainless steel**].
4. Seal: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a stainless steel spring, and [**NBR**][**EPDM**][**FKM**]<**Insert material**> bellows and gasket.
5. Pump Bearings: [**Permanently lubricated ball bearings**][**Grease lubricated ball bearings**].

F. Shaft Coupling: [**Molded-rubber insert with interlocking spider**][**Interlocking frame with interconnecting springs**] capable of absorbing vibration.

G. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure Type: [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

H. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**175 psig (1204 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**250 deg F (120 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.

7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

    a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
    b. Phase: [**Single**][**Three**].
    c. Hertz: 60 Hz.
    d. Full-Load Amperes: <**Insert value**> A.
    e. Minimum Circuit Ampacity: <**Insert value**> A.
    f. Maximum Overcurrent Protection: <**Insert value**> A.

2.5 SEPARATELY COUPLED, VERTICALLY MOUNTED, IN-LINE CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Armstrong Fluid Technology**]
2. [**Aurora Pump; Pentair Ltd.**]
3. [**Crane Pumps & Systems**]
4. [**Flowserve Corporation**]
5. [**ITT Corporation**]
6. [**Mepco, LLC**]
7. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
8. [**Patterson Pump Company; a Gorman-Rupp company**]
9. [**Peerless Pump Company**]
10. [**Taco Comfort Solutions**]
11. [**Thrush Co. Inc.**]
12. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Armstrong Fluid Technology**]
2. [**Aurora Pump; Pentair Ltd.**]
3. [**Crane Pumps & Systems**]
4. [**Flowserve Corporation**]
5. [**ITT Corporation**]
6. [**Mepco, LLC**]
7. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
8. [**Patterson Pump Company; a Gorman-Rupp company**]
9. [**Peerless Pump Company**]
10. [**Taco Comfort Solutions**]
11. [**Thrush Co. Inc.**]
12. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, centrifugal, overhung-impeller, separately coupled, in-line pump as defined in HI 1.1-1.2 and HI 1.3; designed for installation with pump and motor shafts mounted vertically.

E. Pump Construction:

1. Casing: Radially split, cast iron, with threaded gauge tappings at inlet and outlet[**, replaceable bronze wear rings,**] and threaded [**companion-flange**][**union-end**] connections.
2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced, keyed to shaft, and secured with a locking cap screw. For pumps that are not frequency-drive controlled, trim impeller to match specified performance.
3. Pump Shaft: [**Carbon steel, with copper-alloy shaft sleeve**][**Type 304 stainless steel**][**Type 316 stainless steel**].
4. Seal: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a stainless steel spring, and [**NBR**][**EPDM**][**FKM**]<**Insert material**> bellows and gasket.

F. Shaft Coupling: [**Molded-rubber insert with interlocking spider**][**Interlocking frame with interconnecting springs**] capable of absorbing vibration.

G. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure: [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

H. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**175 psig (1204 kPa)**][**250 psig (1720 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**250 deg F (120 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.
7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

    a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
    b. Phase: [**Single**][**Three**].
    c. Hertz: 60 Hz.
    d. Full-Load Amperes: <**Insert value**> A.
    e. Minimum Circuit Ampacity: <**Insert value**> A.
    f. Maximum Overcurrent Protection: <**Insert value**> A.

2.6 SEPARATELY COUPLED, BASE-MOUNTED, END-SUCTION CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]

4. [**Buffalo Pumps, Inc**]
5. [**Crane Pumps & Systems**]
6. [**Flowserve Corporation**]
7. [**ITT Corporation**]
8. [**Mepco, LLC**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Peerless Pump Company**]
11. [**Scot Pump; a division of Ardox Corporation**]
12. [**Taco Comfort Solutions**]
13. [**Thrush Co. Inc.**]
14. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Buffalo Pumps, Inc**]
5. [**Crane Pumps & Systems**]
6. [**Flowserve Corporation**]
7. [**ITT Corporation**]
8. [**Mepco, LLC**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Peerless Pump Company**]
11. [**Scot Pump; a division of Ardox Corporation**]
12. [**Taco Comfort Solutions**]
13. [**Thrush Co. Inc.**]
14. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, centrifugal, overhung-impeller, separately coupled, end-suction pump with flexible shaft coupling as defined in HI 1.1-1.2 and HI 1.3; designed for base mounting, with pump and motor shafts horizontal.

E. Pump Construction:

1. Casing: Radially split, cast iron, with[**replaceable bronze wear rings,**] threaded gauge tappings at inlet and outlet, drain plug at bottom and air vent at top of volute, and [**threaded companion-flange**][**flanged**] connections.[**Provide integral mount on volute to support the casing, and provide attached piping to allow removal and replacement of impeller without disconnecting piping or requiring realignment of pump and motor shaft.**]
2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced, keyed to shaft, and secured with a locking cap screw. For pumps that are not frequency-drive controlled, trim impeller to match specified performance.
3. Pump Shaft: [**Carbon steel, with copper-alloy shaft sleeve**][**Type 304 stainless steel**][**Type 316 stainless steel**].
4. Seal, Mechanical Type: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a stainless steel spring, and [**NBR**][**EPDM**][**FKM**]<**Insert material**> bellows and gasket.
5. Seal, Packing Type: Packing seal consisting of stuffing box with a minimum of four rings of graphite-impregnated braided yarn with bronze lantern ring between center two graphite rings, and bronze packing gland.
6. Pump Bearings: Grease-lubricated ball bearings in cast-iron housing with grease fittings.

F. Shaft Coupling: Molded-rubber insert and interlocking spider capable of absorbing vibration. [**Couplings shall be drop-out type to allow disassembly and removal without removing pump shaft or motor**][**EPDM coupling sleeve for variable-speed applications**].

G. Coupling Guard: Dual rated; ANSI B15.1, Section 8; OSHA 1910.219 approved; steel; removable; attached to mounting frame.

H. Mounting Frame: Welded-steel frame and cross members, factory fabricated from ASTM A36/A36M channels and angles. Fabricate to mount pump casing, coupling guard, and motor.

I. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure: [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

J. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**175 psig (1204 kPa)**][**250 psig (1720 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**250 deg F (120 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.
7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
b. Phase: [**Single**][**Three**].
c. Hertz: 60 Hz.
d. Full-Load Amperes: <**Insert value**> A.
e. Minimum Circuit Ampacity: <**Insert value**> A.
f. Maximum Overcurrent Protection: <**Insert value**> A.

2.7 SEPARATELY COUPLED, BASE-MOUNTED, DOUBLE-SUCTION CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Buffalo Pumps, Inc**]
5. [**Crane Pumps & Systems**]
6. [**Flowserve Corporation**]

7. [**GRUNDFOS CBS Inc.**]
8. [**ITT Corporation**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Patterson Pump Company; a Gorman-Rupp company**]
11. [**Peerless Pump Company**]
12. [**Scot Pump; a division of Ardox Corporation**]
13. [**Taco Comfort Solutions**]
14. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Buffalo Pumps, Inc**]
5. [**Crane Pumps & Systems**]
6. [**Flowserve Corporation**]
7. [**GRUNDFOS CBS Inc.**]
8. [**ITT Corporation**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Patterson Pump Company; a Gorman-Rupp company**]
11. [**Peerless Pump Company**]
12. [**Scot Pump; a division of Ardox Corporation**]
13. [**Taco Comfort Solutions**]
14. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, centrifugal, impeller-between-bearings, separately coupled, double-suction pump as defined in HI 1.1-1.2 and HI 1.3; designed for base mounting, with pump and motor shafts horizontal.

E. Pump Construction:

1. Casing: [**Radially**][**Horizontally**] split, cast iron, with[**replaceable bronze wear rings,**] threaded gauge tappings at inlet and outlet, drain plug at bottom and air vent at top of volute, and ASME B16.1, [**Class 125**][**Class 250**] flanges.[**Casing supports shall allow removal and replacement of impeller without disconnecting piping.**]
2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced, and keyed to shaft. For pumps that are not frequency-drive controlled, trim impeller to match specified performance.
3. Pump Shaft: [**Type 304**][**Type 316**] stainless steel.
4. Seal, Mechanical Type: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a stainless steel spring, and [**NBR**][**EPDM**][**FKM**]<**Insert material**> bellows and gasket.
5. Seal, Packing Type: Packing seal consisting of stuffing box with a minimum of four rings of graphite-impregnated braided yarn with bronze lantern ring between center two graphite rings, and bronze packing gland.
6. Pump Bearings: Grease-lubricated ball bearings in cast-iron housing with grease fittings.

F. Shaft Coupling: Molded-rubber insert and interlocking spider capable of absorbing vibration. [**Couplings shall be drop-out type to allow disassembly and removal without removing pump shaft or motor**][**EPDM coupling sleeve for variable-speed applications**].

G. Coupling Guard: Dual rated; ANSI B15.1, Section 8; OSHA 1910.219 approved; steel; removable; attached to mounting frame.

H. Mounting Frame: Welded-steel frame and cross members, factory fabricated from ASTM A36/A36M channels and angles. Fabricate to mount pump casing, coupling guard, and motor.

I. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure: [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

J. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**175 psig (1204 kPa)**][**250 psig (1720 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**250 deg F (120 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.
7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
b. Phase: [**Single**][**Three**].
c. Hertz: 60 Hz.
d. Full-Load Amperes: <**Insert value**> A.
e. Minimum Circuit Ampacity: <**Insert value**> A.
f. Maximum Overcurrent Protection: <**Insert value**> A.

2.8 SEPARATELY COUPLED, VERTICALLY MOUNTED, DOUBLE-SUCTION CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Buffalo Pumps, Inc**]
5. [**Flowserve Corporation**]
6. [**GRUNDFOS CBS Inc.**]
7. [**ITT Corporation**]
8. [**Mepco, LLC**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Peerless Pump Company**]
11. [**Pentair Water Commercial Pool and Aquatics**]
12. [**Taco Comfort Solutions**]
13. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [**American-Marsh Pumps**]
2. [**Armstrong Fluid Technology**]
3. [**Aurora Pump; Pentair Ltd.**]
4. [**Buffalo Pumps, Inc**]
5. [**Flowserve Corporation**]
6. [**GRUNDFOS CBS Inc.**]
7. [**ITT Corporation**]
8. [**Mepco, LLC**]
9. [**PACO Pumps; Grundfos Pumps Corporation, USA**]
10. [**Peerless Pump Company**]
11. [**Pentair Water Commercial Pool and Aquatics**]
12. [**Taco Comfort Solutions**]
13. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, centrifugal, impeller-between-bearings, separately coupled, double-suction pump as defined in HI 1.1-1.2 and HI 1.3; designed for installation with pump and motor shafts mounted vertically.

E. Pump Construction:

1. Casing: Radially split, cast iron, with[**replaceable bronze wear rings,**] threaded gauge tappings at inlet and outlet, drain plug at bottom of volute, mounting support, and ASME B16.1, [**Class 125**][**Class 250**] flanges.
2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced, and keyed to shaft. For pumps that are not frequency-drive controlled, trim impeller to match specified performance.
3. Pump Shaft: [**Type 304 stainless steel**][**Type 316 stainless steel**]<**Insert material**>.
4. Seal, Mechanical Type: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a stainless steel spring, and [**NBR**][**EPDM**][**FKM**]<**Insert material**> bellows and gasket.
5. Seal, Packing Type: Packing seal consisting of stuffing box with a minimum of four rings of graphite-impregnated braided yarn with bronze lantern ring between center two graphite rings, and bronze packing gland.
6. Pump Bearings: Grease-lubricated ball bearings in cast-iron housing with grease fittings.

F. Shaft Coupling: Molded-rubber insert and interlocking spider capable of absorbing vibration.

G. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure: [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

H. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**175 psig (1204 kPa)**][**250 psig (1720 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**250 deg F (120 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.
7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

    a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
    b. Phase: [**Single**][**Three**].
    c. Hertz: 60 Hz.
    d. Full-Load Amperes: <**Insert value**> A.
    e. Minimum Circuit Ampacity: <**Insert value**> A.
    f. Maximum Overcurrent Protection: <**Insert value**> A.

2.9 SEPARATELY COUPLED, VERTICALLY MOUNTED, TURBINE CENTRIFUGAL PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American-Marsh Pumps**]
2. [**Flowserve Corporation**]
3. [**Peerless Pump Company**]
4. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American-Marsh Pumps**]
2. [**Flowserve Corporation**]
3. [**Peerless Pump Company**]
4. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, [**single-stage**][**multistage**], centrifugal, impeller-between-bearings, end-suction pump as defined in HI 2.1-2.2 and HI 2.3; designed for installation with pump and motor shafts mounted vertically and projecting into a sump.

E. Pump Construction:

1. Pump Bowl: Cast iron, with [**cone**][**basket**] strainer[**, replaceable bronze wear ring,**] and suction bell.[**Water passages of intermediate bowls shall be coated with porcelain enamel.**]
2. Impeller: ASTM B584, cast bronze; statically and dynamically balanced and keyed to shaft. For pumps that are not frequency-drive controlled, trim impeller to match specified performance.
3. Pump Shaft: [**Carbon**][**Type 304 stainless**][**Type 316 stainless**] steel sized in accordance with manufacturer's written instructions.
4. Pump Bearings: Water-lubricated bronze and rubber sleeve bearings in cast-iron housing.
5. Pump Column: ASTM A53/A53M, Grade B steel pipe.
6. Seal, Mechanical Type: Mechanical seal consisting of carbon rotating ring against a ceramic seat held by a stainless steel spring, and [**NBR**][**EPDM**][**FKM**] bellows and gasket. Include water

slinger on shaft between motor and seal.

7. Seal, Packing Type: Packing seal consisting of stuffing box with a minimum of four rings of graphite-impregnated braided yarn with bronze lantern ring between center two graphite rings, and bronze packing gland.

F. Shaft Coupling: Keyed with locking collets.

G. Discharge Head: ASME B16.1, [**Class 125**][**Class 250**] discharge flange with threaded gauge tapping. Top of discharge head shall have a registered fit to accurately locate the driver.

H. Motor: Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

1. Enclosure: [**Totally enclosed, fan cooled**]<**Insert enclosure type**>.
2. NEMA Premium Efficient motors as defined in NEMA MG 1.
3. Motor Sizes: Minimum size as indicated. If not indicated, large enough so driven load will not require motor to operate in service factor range above 1.0.
4. Controllers, Electrical Devices, and Wiring: Comply with requirements for electrical devices and connections specified in electrical Sections.
5. [**Single**][**Variable**]-speed motor.
6. Provide integral pump motor variable-speed controller.
7. <**Insert unique motor characteristics**>.

I. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Minimum Static Head: <**Insert feet (kPa)**>.
4. Maximum Operating Pressure: [**175 psig (1204 kPa)**]<**Insert value**>.
5. Maximum Continuous Operating Temperature: [**200 deg F (93 deg C)**]<**Insert temperature**>.
6. Outlet Size: <**Insert NPS (DN)**>.
7. Impeller Size: <**Insert inches (mm)**>.
8. Motor Speed: <**Insert rpm**>.
9. Motor Horsepower: <**Insert value**>.
10. Electrical Characteristics:

a. Volts: [**120**][**240**][**208**][**460**]<**Insert value**> V.
b. Phase: [**Single**][**Three**].
c. Hertz: 60 Hz.
d. Full-Load Amperes: <**Insert value**> A.
e. Minimum Circuit Ampacity: <**Insert value**> A.
f. Maximum Overcurrent Protection: <**Insert value**> A.

2.10 WET-ROTOR PUMPS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Armstrong Fluid Technology**]
2. [**Flowserve Corporation**]
3. [**GRUNDFOS CBS Inc.**]
4. [**ITT Corporation**]
5. [**Taco Comfort Solutions**]

6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Armstrong Fluid Technology**]
2. [**Flowserve Corporation**]
3. [**GRUNDFOS CBS Inc.**]
4. [**ITT Corporation**]
5. [**Taco Comfort Solutions**]
6. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pumps from single source from single manufacturer.

D. Description: Factory-assembled and -tested, wet-rotor pump. Pump and motor to form an integral unit with bearings lubricated by the pumped liquid.

E. Pump Construction:

1. Body: [**100 percent lead-free bronze**][**Type 304 stainless steel**][**Cast iron**].
2. Impeller: [**Polypropylene**][**Noryl**][**Type 304 stainless steel**].
3. Pump Shaft: [**Ceramic**][**Type 304 stainless steel**][**Type 316 stainless steel**].
4. Bearings. Double-sintered carbon.

F. Motor: [**Single**][**Three**][**Variable**] speed.

1. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by an NRTL, and marked for intended location and use.
2. Comply with NEMA designation, temperature rating, service factor, and efficiency requirements for motors specified in Section 230500 "Common Work Results for HVAC."

    a. Efficiency: Premium Efficiency.
    b. NEMA Design: <**Insert designation**>.
    c. Service Factor: <**Insert value**>.

3. Integral pump motor variable-speed control.
4. ECM.

G. Capacities and Characteristics:

1. Capacity: <**Insert gpm (L/s)**>.
2. Total Dynamic Head: <**Insert feet (kPa)**>.
3. Maximum Operating Pressure: [**150 psig (1132 kPa)**]<**Insert value**>.
4. Maximum Continuous Operating Temperature: [**225 deg F (107 deg C)**][**230 deg F (111 deg C)**]<**Insert temperature**>.
5. Inlet and Outlet Size: <**Insert NPS (DN)**>.
6. Impeller Size: <**Insert inches (mm)**>.
7. Motor Speed: <**Insert rpm**>.
8. Motor Horsepower: <**Insert value**>.
9. Electrical Characteristics:

    a. Volts: [**120**]<**Insert value**> V.
    b. Phase: [**Single**][**Three**].
    c. Hertz: 60 Hz.
    d. Full-Load Amperes: <**Insert value**> A.
    e. Minimum Circuit Ampacity: <**Insert value**> A.

f. Maximum Overcurrent Protection: <**Insert value**> A.

2.11 AUTOMATIC CONDENSATE PUMP UNITS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Beckett Corporation**]
2. [**Crane Pumps & Systems**]
3. [**GRUNDFOS CBS Inc.**]
4. [**Hartell Pumps; Milton Roy**]
5. [**Little Giant; a brand of Franklin Electric Co., Inc.**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Beckett Corporation**]
2. [**Crane Pumps & Systems**]
3. [**GRUNDFOS CBS Inc.**]
4. [**Hartell Pumps; Milton Roy**]
5. [**Little Giant; a brand of Franklin Electric Co., Inc.**]
6. <**Insert manufacturer's name**>

C. Source Limitations: Obtain pump units from single source from single manufacturer.

D. Description: Packaged units with corrosion-resistant pump, [**aluminum**][**plastic**] tank with cover, and automatic controls. Collects and removes condensate from fan coil units, air handling units, condensing boilers, and similar components. Include factory- or field-installed check valve and **72-inch- (1800-mm-)** minimum, electrical power cord with plug.

E. Capacities and Characteristics:

1. Tank Capacity: <**Insert gal (L)**>.
2. Pump Capacity: <**Insert gpm (L/s)**>.
3. Maximum Lift: <**Insert feet (m)**>.
4. Motor Horsepower: <**Insert value**>.
5. Electrical Characteristics:

a. Volts: [**120**]<**Insert value**> V.
b. Phase: Single.
c. Hertz: 60 Hz.
d. Full-Load Amperes: <**Insert value**> A.
e. Minimum Circuit Ampacity: <**Insert value**> A.
f. Maximum Overcurrent Protection: <**Insert value**> A.

2.12 PUMP SPECIALTY FITTINGS

A. Suction Diffuser:

1. Angle pattern.
2. [**175-psig (1204-kPa)**][**300-psig (2060-kPa)**] pressure rating, [**cast**][**ductile**]-iron body and end

cap, pump-inlet fitting.

3. Bronze 16-mesh wire startup and [**bronze**][**Type 304 stainless steel**] permanent strainers with **3/16-inch (4.8-mm) perforations and 51 percent open area)**.
4. [**Bronze**][**Carbon steel**][**Type 304 stainless steel**] straightening vanes.
5. Drain plug.
6. Factory-fabricated support.

B. Triple-Duty Valve:

1. Angle or straight pattern.
2. [**175-psig (1204-kPa)**][**300-psig (2060-kPa)**] pressure rating, [**cast**][**ductile**]-iron body, pump-discharge fitting.
3. Valve with multi-turn stem and memory stop to allow valve to be returned to its original position after shutoff.
4. Brass valve disc with EPDM rubber seat.
5. Type 304 stainless steel valve stem.
6. Drain plug and bronze-fitted shutoff, balancing, and check valve features.
7. Brass gauge ports with integral check valve and orifice for flow measurement.

2.13 INTEGRAL PUMP MOTOR VARIABLE-SPEED CONTROLLERS

A. Where specified or scheduled, provide pumps with an integral pump motor speed controller.

1. Motor: Operates as constant- or variable-speed pump with speed regulated by an integrated variable-speed drive.
2. Integrated Pump Controller: Supports direct communication with the building management system (BMS) with built-in support for the following protocols: [**Modbus RTU**][**BACnet MS/TP**][**Metasys N2**].
3. Commissioning and pump set up access to pump controls via the following:

    a. A web interface (data exchange).
    b. A user interface located on the face of speed controller to adjust modes and mode values.
    c. An electronic display that reads real-time mode set values, flow, head, speed, and power and that locks out unauthorized adjustment of pump.

4. Provide electronics with "Auto" as factory default but slope of the proportional curve will automatically match the required system curve, constant pressure control (delta-p/c), variable differential pressure control (delta-p/v), constant curve duty (uncontrolled pump), and rpm regulation. RPM (speed) regulation can be accomplished by the following:

    a. Manual (via user interface or HTML).
    b. Remote via 0 to 10 V dc.
    c. Data protocol communications with the BMS.

5. Pump Electronics: Standard with multiple digital inputs and one external digital output to be available for additional mechanical room control and pump status monitoring.
6. Controller: Mounted on or adjacent to the motor. Provide enclosure rated to UL Type 12.
7. Electronically Protected Pumps: Rated for continuous duty and with built-in startup circuit. Provide overcurrent, line surge and current limit protection, thermal monitoring, heat sink status and over temperature protection.
8. Pump capable of being monitored continuously via integrated Internet link.
9. Integrated pump controller system to have the following features:

    a. Controller software shall be capable of sensorless control in variable-volume systems without need for pump-mounted (internal/external) or remotely mounted differential

pressure sensor.

b. Integrated Pump Controller Sensorless Control: Operates under Quadratic Pressure Control (QPC) to ensure that head reduction with reducing flow conforms to quadratic control curve.

c. Controller:

1) Minimum head of 40 percent of design duty head.
2) User-adjustable control mode settings and minimum/maximum head set points using built-in programming interface.

d. Controller Integrated Control Software:

1) Capable of controlling pump performance for non-overloading power at every point of operation.
2) Capable of maintaining flow rate data.

2.14 ELECTRONICALLY COMMUTATED MOTOR (ECM)

A. Provide pumps so they are specified or scheduled with ECM.

1. Synchronous, constant torque, ECM with permanent magnet rotor. Rotor magnets to be time-stable, nontoxic ceramic magnets (Sr-Fe).
2. Driven by a frequency converter with an integrated power factor correction filter. Conventional induction motors will not be acceptable.
3. Each motor with an integrated variable-frequency drive, tested as one unit by manufacturer.
4. Motor speed adjustable over full range from 0 rpm to maximum scheduled speed.
5. Variable motor speed to be controlled by a 0- to 10 V-dc or 4- to 20-mA input.
6. Integrated motor protection verified by UL to protect the pump against over-/undervoltage, overtemperature of motor and/or electronics, overcurrent, locked rotor, and dry run (no-load condition).

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine equipment foundations and anchor-bolt locations for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Examine roughing-in for piping systems to verify actual locations of piping connections before pump installation.

C. Examine foundations and inertia bases for suitable conditions where pumps will be installed.

D. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PUMP INSTALLATION

A. Comply with [**HI 1.4**][**and**][**HI 2.4**].

B. Install pumps to provide access for periodic maintenance including removing motors, impellers,

couplings, and accessories.

C. Independently support pumps and piping so weight of piping is not supported by pumps and weight of pumps is not supported by piping.

D. Automatic Condensate Pump Units: Install units for collecting condensate and extend to open drain.

E. Equipment Mounting:

1. Install base-mounted pumps on cast-in-place concrete equipment bases. Comply with requirements for equipment bases and foundations specified in Section 033000 "Cast-in-Place Concrete."
2. Comply with requirements for vibration isolation and seismic-control devices specified in Section 230548 "Vibration and Seismic Controls for HVAC."
3. Comply with requirements for vibration isolation devices specified in Section 230548.13 "Vibration Controls for HVAC."

F. Equipment Mounting for In-Line Pumps Suspended from Structure: Install in-line pumps with continuous-thread hanger rods and [**elastomeric hangers**][**spring hangers**][**spring hangers with vertical-limit stop**] of size required to support weight of in-line pumps.

1. Comply with requirements for seismic-restraint devices specified in Section 230548 "Vibration and Seismic Controls for HVAC."
2. Comply with requirements for hangers and supports specified in Section 230529 "Hangers and Supports for HVAC Piping and Equipment."

3.3 ALIGNMENT

A. Engage a factory-authorized service representative to perform alignment service.

B. Perform alignment service. When required by manufacturer to maintain warranty coverage, engage a factory-authorized service representative to perform it.

C. Comply with requirements in HI standards for alignment of pump and motor shaft. Add shims to the motor feet and bolt motor to base frame. Do not use grout between motor feet and base frame.

D. Comply with pump and coupling manufacturers' written instructions.

E. After alignment is correct, tighten foundation bolts evenly but not too firmly. Completely fill baseplate with nonshrink, nonmetallic grout while metal blocks and shims or wedges are in place. After grout has cured, fully tighten foundation bolts.

3.4 PIPING CONNECTIONS

A. Comply with requirements for piping specified in Section 232213 "Steam and Condensate Heating Piping" and Section 232216 "Steam and Condensate Piping Specialties." Drawings indicate general arrangement of piping, fittings, and specialties.

B. Where installing piping adjacent to pump, allow space for service and maintenance.

C. Connect piping to pumps. Install valves that are same size as piping connected to pumps.

D. Install suction and discharge pipe sizes equal to or greater than diameter of pump nozzles.

E. Install [**check, shutoff, and throttling valves**][**check valve and throttling valve with memory stop**][**triple-duty valve**] on discharge side of pumps.

F. Install [**Y-type strainer**][**suction diffuser**] and shutoff valve on suction side of pumps.

1. Use startup strainer for initial system startup. Install permanent strainer element before turnover of system to Owner.

G. Install flexible connectors on suction and discharge sides of base-mounted pumps between pump casing and valves.

H. Install pressure gauges on pump suction and discharge or at integral pressure-gauge tapping, or install single gauge with multiple-input selector valve.

I. Install check valve on each condensate pump unit discharge unless unit has a factory-installed check valve.

3.5 ELECTRICAL CONNECTIONS

A. Connect wiring in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Install electrical devices furnished by manufacturer, but not factory mounted, in accordance with NFPA 70 and NECA 1.

D. Install nameplate for each electrical connection, indicating electrical equipment designation and circuit number feeding connection.

1. Nameplate shall be laminated acrylic or melamine plastic signs, as specified in Section 260553 "Identification for Electrical Systems."
2. Nameplate shall be laminated acrylic or melamine plastic signs with a black background and engraved white letters at least **1/2 inch (13 mm)** high.

3.6 CONTROL CONNECTIONS

A. Install control and electrical power wiring to field-mounted control devices.

B. Connect control wiring in accordance with Section 260523 "Control-Voltage Electrical Power Cables."

3.7 STARTUP SERVICE

A. [**Engage a factory-authorized service representative to perform**][**Perform**] startup service.

1. Complete installation and startup checks in accordance with manufacturer's written instructions.
2. Check piping connections for tightness.
3. Clean strainers on suction piping. Use startup strainer for initial startup.
4. Perform the following startup checks for each pump before starting:

a. Verify bearing lubrication.

b. Verify that pump is free to rotate by hand and that pump for handling hot liquid is free to rotate with pump hot and cold. If pump is bound or drags, do not operate until cause of trouble is determined and corrected.
c. Verify that pump is rotating in correct direction.

5. Prime pump by opening suction valves and closing drains, and prepare pump for operation.
6. Start motor.
7. Open discharge valve slowly.

3.8 FIELD QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Manufacturer's Field Service: Engage a factory-authorized service representative to test and inspect components, assemblies, and equipment installations, including connections.

C. Perform tests and inspections[**with the assistance of a factory-authorized service representative**].

D. Hydronic pumps will be considered defective if they do not pass tests and inspections.

E. Prepare test and inspection reports.

3.9 DEMONSTRATION

A. [**Engage a factory-authorized service representative to train**][**Train**] Owner's maintenance personnel to adjust, operate, and maintain hydronic pumps.

END OF SECTION 22 11 23 23A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 22 13 00 00 - FACILITY GRAY-WATER STORAGE TANKS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Steel, pressure, water storage tank.
2. Steel, nonpressure, water storage tank.
3. Insulated, steel, water storage tanks.
4. Plastic, pressure, water storage tank.
5. Plastic, nonpressure, water storage tanks.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for gray-water storage tanks.
2. Include rated capacities, operating characteristics, [**electrical characteristics,**]and furnished specialties and accessories.

B. Shop Drawings:

1. Include plans, elevations, sections, and [**mounting**][**attachment**] details.
2. Include details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Detail fabrication and assembly of <**Insert portion of Work**>.
4. Include diagrams for power, signal, and control wiring.

C. Delegated-Design Submittal: For facility gray-water storage tanks.

1. Include design calculations for selecting vibration isolators[**and seismic restraints**] and for designing vibration isolation bases.

1.3 INFORMATIONAL SUBMITTALS

A. Qualification Data: For [**manufacturer**][**fabricator**].

B. Seismic Qualification Certificates: For gray-water storage tanks, accessories, and components, from manufacturer.

1. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
2. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
3. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.

C. Welding certificates.

1.4 CLOSEOUT SUBMITTALS

A. Maintenance Data: For gray-water storage tanks to include in maintenance manuals.

1.5 QUALITY ASSURANCE

A. Fabricator Qualifications: Employ a qualified structural engineer to prepare calculations, Shop Drawings, and other structural data for fabrication and erection of surface water-storage tanks.

1. Engineering Responsibility: Preparation of data for surface water-storage tanks, accessories, specified appurtenances, and concrete supports and foundations, including Shop Drawings, based on testing and engineering analysis of manufacturer's standard units in assemblies similar to those indicated for this Project.

B. Welding Qualifications: Qualify procedures and personnel according to the following:

1. AWS D1.1/D1.1M, "Structural Welding Code - Steel."
2. AWS D1.3/D1.3M, "Structural Welding Code - Sheet Steel."
3. AWS D1.4/D1.4M, "Structural Welding Code - Reinforced Steel."

C. Pipe and Pressure-Vessel Welding Qualifications: Qualify procedures and operators according to ASME Boiler and Pressure Vessel Code.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design facility gray-water storage tanks.

B. Structural Performance: Surface water-storage tank, including structural reinforcement and foundation, shall be capable of withstanding the effects of dead and live gravity loads and winds of [**100 mph (161 km/h)**]<**Insert value**>.

C. Seismic Performance: Surface water-storage tank, including structural reinforcement and foundation, withstand the effects of earthquake motions determined according to [**ASCE/SEI 7**]<**Insert requirement**>.

1. The term "withstand" means "the unit will remain in place without separation of any parts when subjected to the seismic forces specified and the unit will be fully operational after the seismic event."
2. Component Importance Factor: [**1.5**][**1.0**].

D. Thermal Movements: Surface water-storage tank, including structural reinforcement and foundation, shall allow for thermal movements from ambient and surface temperature changes by preventing buckling, opening of joints, overstressing of components, failure of connections, and other detrimental effects. Base engineering calculations on surface temperatures of materials due to both solar heat gain and nighttime-sky heat loss.

1. Temperature Change: [**120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces**]<**Insert temperature change**>.

E. Comply with AWWA D100, "Welded Steel Tanks for Water Storage," and with AWWA M42, "Steel Water-Storage Tanks."

F. Comply with AWWA D110, "Wire- and Strand-Wound, Circular, Prestressed Concrete Water Tanks."

G. Comply with AWWA D110, "Wire- and Strand-Wound, Circular, Prestressed Concrete Water Tanks."

H. Comply with AWWA D115, "Tendon-Prestressed Concrete Water Tanks."

I. Comply with AWWA D120, "Thermosetting Fiberglass-Reinforced Plastic Tanks."

2.2 STEEL, PRESSURE, WATER STORAGE TANKS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**A. O. Smith Corporation**]
2. [**Adamson Global Technology**]
3. [**Aldrich Company, Inc. (The)**]
4. [**Bradford White Corporation**]
5. [**Cemline Corporation**]
6. [**Flo Fab Inc**]
7. [**Green Boiler Technologies**]
8. [**GSW Water Heating**]
9. [**HESCO Bastion Ltd.**]
10. [**Lochinvar, LLC**]
11. [**Precision Boilers**]
12. [**PVI; A WATTS Brand**]
13. [**RBI**]
14. [**RECO USA**]
15. [**State Industries**]
16. [**Weben-Jarco, Inc**]
17. [**Wendland Manufacturing Corp.**]
18. [**Wessels Company**]
19. [**Wood, John Co**]
20. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**A. O. Smith Corporation**]
2. [**Adamson Global Technology**]
3. [**Aldrich Company, Inc. (The)**]
4. [**Bradford White Corporation**]
5. [**Cemline Corporation**]
6. [**Flo Fab Inc**]
7. [**Green Boiler Technologies**]
8. [**GSW Water Heating**]
9. [**HESCO Bastion Ltd.**]
10. [**Lochinvar, LLC**]
11. [**Precision Boilers**]

12. [**PVI; A WATTS Brand**]
13. [**RBI**]
14. [**RECO USA**]
15. [**State Industries**]
16. [**Weben-Jarco, Inc**]
17. [**Wendland Manufacturing Corp.**]
18. [**Wessels Company**]
19. [**Wood, John Co**]
20. <**Insert manufacturer's name**>

C. Description: Steel, [**horizontal**][**vertical**], pressure-rated tank with cylindrical sidewalls.

D. Fabricate supports and attachments to tank with reinforcement strong enough to resist tank movement during seismic event when tank supports are anchored to building structure.

E. Construction: [**ASME code, steel**][**Steel**], constructed with nontoxic welded joints, for [**125-psig (860-kPa)**][**150-psig (1035-kPa)**]<**Insert value**> working pressure.

F. Manhole: Watertight, for tank more than [**36 inches (915 mm)**]<**Insert dimension**> in diameter; same pressure rating as tank.

G. Tappings: Factory-fabricated[**stainless**] steel, welded to tank[**before testing and labeling**].
