1. When ambient and substrate temperature conditions are outside limits permitted by joint-sealant manufacturer[**or are below 40 deg F (5 deg C)**].
2. When joint substrates are wet.
3. Where joint widths are less than those allowed by joint-sealant manufacturer for applications indicated.

4. Where contaminants capable of interfering with adhesion have not yet been removed from joint substrates.

1.10 WARRANTY

A. Special Installer's Warranty: Installer agrees to repair or replace joint sealants that do not comply with performance and other requirements specified in this Section within specified warranty period.

1. Warranty Period: [**Two**] years from date of Substantial Completion.

B. Special Manufacturer's Warranty: Manufacturer agrees to furnish joint sealants to repair or replace those joint sealants that do not comply with performance and other requirements specified in this Section within specified warranty period.

1. Warranty Period: [**Five**] years from date of Substantial Completion.

C. Special warranties specified in this article exclude deterioration or failure of joint sealants from the following:

1. Movement of the structure caused by stresses on the sealant exceeding sealant manufacturer's written specifications for sealant elongation and compression.
2. Disintegration of joint substrates from causes exceeding design specifications.
3. Mechanical damage caused by individuals, tools, or other outside agents.
4. Changes in sealant appearance caused by accumulation of dirt or other atmospheric contaminants.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain joint sealants from single manufacturer[**for each sealant type**].

2.2 JOINT SEALANTS, GENERAL

A. Compatibility: Provide joint sealants, backings, and other related materials that are compatible with one another and with joint substrates under conditions of service and application, as demonstrated by joint-sealant manufacturer, based on testing and field experience.

B. Colors of Exposed Joint Sealants: [**As indicated by manufacturer's designations**][**Match Architect's samples**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.3 SILICONE JOINT SEALANTS

A. Silicone, S, NS, 100/50, NT: Single-component, nonsag, plus 100 percent and minus 50 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 100/50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Adfast**]
b. [**GE Construction Sealants; Momentive Performance Materials Inc.**]
c. [**Sika Corporation - Building Components**]

B. Silicone, S, NS, 50, NT: Single-component, nonsag, plus 50 percent and minus 50 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adfast**]
b. [**GE Construction Sealants; Momentive Performance Materials Inc.**]
c. [**Pecora Corporation**]
d. [**Sika Corporation - Building Components**]
e. [**The Dow Chemical Company**]

C. Silicone, S, NS, 35, NT: Single-component, nonsag, plus 35 percent and minus 35 percent movement capability. nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 35, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adfast**]
b. [**GE Construction Sealants; Momentive Performance Materials Inc.**]
c. [**Premier Building Solutions**]
d. [**Sika Corporation - Building Components**]
e. [**The Dow Chemical Company**]

D. Silicone, S, NS, 25, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**GE Construction Sealants; Momentive Performance Materials Inc.**]
b. [**Pecora Corporation**]
c. [**Permathane; a Holcim brand**]
d. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
e. [**Sherwin-Williams Company (The)**]
f. [**Sika Corporation - Building Components**]
g. [**The Dow Chemical Company**]

E. Silicone, Acid Curing, S, NS, 25, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, acid-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adfast**]
b. [**Bostik; Arkema**]
c. [**Everkem Diversified Products, Inc.**]
d. [**Pecora Corporation**]
e. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
f. [**PPG Paints; PPG Industries, Inc.**]
g. [**Premier Building Solutions**]
h. [**Sika Corporation - Building Components**]
i. [**The Dow Chemical Company**]

F. Silicone, S, NS, 100/50, T, NT: Single-component, nonsag, plus 100 percent and minus 50 percent movement capability, traffic- and nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 100/50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Pecora Corporation**]
b. [**The Dow Chemical Company**]

G. Silicone, S, NS, 50, T, NT: Single-component, nonsag, plus 50 percent and minus 50 percent movement capability, traffic- and nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Soudal Accumetric**]
b. [**The Dow Chemical Company**]

H. Silicone, S, NS, 25, T, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Pecora Corporation**]
b. [**Sika Corporation - Building Components**]

I. Silicone, S, P, 100/50, T, NT: Single-component, pourable, plus 100 percent and minus 50 percent movement capability traffic- and nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade P, Class 100/50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Pecora Corporation**]

J. Silicone, M, P, 100/50, T, NT: Multicomponent, pourable, plus 100 percent and minus 50 percent movement capability, traffic- and nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type M, Grade P, Class 100/50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**The Dow Chemical Company**]

2.4 NONSTAINING SILICONE JOINT SEALANTS

A. Nonstaining Joint Sealants: No staining of substrates when tested in accordance with ASTM C1248.

B. Silicone, Nonstaining, S, NS, 100/50, NT: Nonstaining, single-component, nonsag, plus 100 percent and minus 50 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 100/50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adfast**]
b. [**Pecora Corporation**]
c. [**Sika Corporation - Building Components**]
d. [**Tremco Incorporated**]

C. Silicone, Nonstaining, S, NS, 50, NT: Nonstaining, single-component, nonsag, plus 50 percent and minus 50 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Adfast**]
b. [**GE Construction Sealants; Momentive Performance Materials Inc.**]
c. [**Pecora Corporation**]
d. [**Sika Corporation - Building Components**]
e. [**Soudal Accumetric**]
f. [**The Dow Chemical Company**]
g. [**Tremco Incorporated**]

D. Silicone, Nonstaining, S, NS, 100/50, T, NT: Nonstaining, single-component, nonsag, plus 100 percent and minus 50 percent movement capability, traffic- and nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 100/50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**The Dow Chemical Company**]

E. Silicone, Nonstaining, M, NS, 50, NT: Nonstaining, multicomponent, nonsag, plus 50 percent and minus 50 percent movement capability, nontraffic-use, neutral-curing silicone joint sealant; ASTM C920, Type M, Grade NS, Class 50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Tremco Incorporated**]

2.5 URETHANE JOINT SEALANTS

A. Urethane, S, NS, 25, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adfast**]
b. [**Bostik; Arkema**]
c. [**Everkem Diversified Products, Inc.**]
d. [**Master Builders Solutions**]
e. [**Pecora Corporation**]
f. [**Permathane; a Holcim brand**]
g. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
h. [**PPG Paints; PPG Industries, Inc.**]

i. [**Sherwin-Williams Company (The)**]
j. [**Sika Corporation - Building Components**]
k. [**Tower Sealants, Inc.**]
l. [**Tremco Incorporated**]

B. Urethane, S, NS, 100/50, T, NT: Single-component, nonsag, plus 100 percent and minus 50 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 100/50, Uses T and NT.

C. Urethane, S, NS, 25, T, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**LymTal International, Inc.**]
b. [**Master Builders Solutions**]

D. Urethane, S, P, 35, T, NT: Single-component, pourable, plus 35 percent and minus 35 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade P, Class 35, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bostik; Arkema**]

E. Urethane, S, P, 25, T, NT: Single-component, pourable, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade P, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Master Builders Solutions**]
b. [**Pecora Corporation**]
c. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
d. [**Sherwin-Williams Company (The)**]

F. Urethane, M, NS, 50, NT: Multicomponent, nonsag, plus 50 percent and minus 50 percent movement capability nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade NS, Class 50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Pecora Corporation**]

G. Urethane, M, NS, 25, NT: Multicomponent, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Master Builders Solutions**]
b. [**Sherwin-Williams Company (The)**]

H. Urethane, M, NS, 50, T, NT: Multicomponent, nonsag, plus 50 percent and minus 50 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade NS, Class 50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Tremco Incorporated**]

I. Urethane, M, NS, 25, T, NT: Multicomponent, nonsag, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade NS, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bostik; Arkema**]
b. [**LymTal International, Inc.**]
c. [**Master Builders Solutions**]
d. [**Pecora Corporation**]

J. Urethane, M, P, 50, T, NT: Multicomponent, pourable, plus 50 percent and minus 50 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade P, Class 50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**LymTal International, Inc.**]

K. Urethane, M, P, 25, T, NT: Multicomponent, pourable, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade P, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Bostik; Arkema**]
b. [**LymTal International, Inc.**]
c. [**Master Builders Solutions**]
d. [**Pecora Corporation**]
e. [**Sherwin-Williams Company (The)**]
f. [**Tremco Incorporated**]

2.6 IMMERSIBLE JOINT SEALANTS

A. Immersible Joint Sealants: Suitable for immersion in liquids; ASTM C1247, [**Class 1**][**Class 2**]; tested in deionized water unless otherwise indicated.

B. Urethane, Immersible, S, NS, 100/50, NT, I: Immersible, single-component, nonsag, plus 100 percent and minus 50 percent movement capability, nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 100/50, Uses NT and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Tremco Incorporated**]

C. Urethane, Immersible, S, NS, 35, NT, I: Immersible, single-component, nonsag, plus 35 percent and minus 35 percent movement capability, nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 35, Uses NT and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Master Builders Solutions**]

D. Urethane, Immersible, S, NS, 50, T, NT, I: Immersible, single-component, nonsag, plus 50 percent and minus 50 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 50, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Tremco Incorporated**]

E. Urethane, Immersible, S, NS, 35, T, NT, I: Immersible, single-component, nonsag, plus 35 percent and minus 35 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 35, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Master Builders Solutions**]

F. Urethane, Immersible, S, NS, 25, T, NT, I: Immersible, single-component, nonsag, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade NS, Class 25, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Master Builders Solutions**]
b. [**Pecora Corporation**]
c. [**Tremco Incorporated**]

G. Urethane, Immersible, S, P, 50, T, NT, I: Immersible, single-component, pourable, plus 50 percent and minus 50 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade P, Class 50, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Tremco Incorporated**]

H. Urethane, Immersible, S, P, 25, T, NT, I: Immersible, single-component, pourable, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type S, Grade P, Class 25, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Tremco Incorporated**]
b. [**W. R. Meadows, Inc**]

I. Polysulfide, Immersible, M, NS, 25, NT, I: Immersible, multicomponent, nonsag, plus 25 percent and

minus 25 percent movement capability, nontraffic-use, polysulfide joint sealant; ASTM C920, Type M, Grade NS, Class 25, Uses NT and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]

J. Urethane, Immersible, M, NS, 50, T, NT, I: Immersible, multicomponent, nonsag, plus 50 percent and minus 50 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade NS, Class 50, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**LymTal International, Inc.**]
    b. [**Tremco Incorporated**]

K. Urethane, Immersible, M, NS, 25, T, NT, I: Immersible, multicomponent, nonsag, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade NS, Class 25, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Master Builders Solutions**]

L. Polysulfide, Immersible, M, NS, 25, T, NT, I: Immersible, multicomponent, nonsag, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, polysulfide joint sealant; ASTM C920, Type M, Grade NS, Class 25, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Pecora Corporation**]

M. Urethane, Immersible, M, P, 25, T, NT, I: Immersible, multicomponent, pourable, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, urethane joint sealant; ASTM C920, Type M, Grade P, Class 25, Uses T, NT, and I.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**LymTal International, Inc.**]
b. [**Master Builders Solutions**]

2.7 SILANE-MODIFIED POLYMER JOINT SEALANTS

A. Silane-Modified Polymer, S, NS, 50, NT: Single-component, nonsag, plus 50 percent and minus 50 percent movement capability, nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adfast**]
b. [**GE Construction Sealants; Momentive Performance Materials Inc.**]
c. [**Master Builders Solutions**]
d. [**Pecora Corporation**]
e. [**Premier Building Solutions**]
f. [**Sherwin-Williams Company (The)**]
g. [**Sika Corporation - Building Components**]
h. [**Soudal Accumetric**]

B. Silane-Modified Polymer, S, NS, 35, NT: Single-component, nonsag, plus 35 percent and minus 35 percent movement capability, nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 35, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Master Builders Solutions**]
b. [**Premier Building Solutions**]
c. [**Sika Corporation - Building Components**]
d. [**Tremco Incorporated**]

C. Silane-Modified Polymer, S, NS, 25, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Everkem Diversified Products, Inc.**]
b. [**Franklin International**]
c. [**Permathane; a Holcim brand**]
d. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
e. [**Sika Corporation - Building Components**]

D. Silane-Modified Polymer, S, NS, 100/50, T, NT: Single-component, nonsag, plus 100 percent and minus 50 percent movement capability, traffic- and nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 100, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Soudal Accumetric**]
    b. [**Sto Corp.**]

E. Silane-Modified Polymer, S, NS, 50, T, NT: Single-component, nonsag, plus 50 percent and minus 50 percent movement capability, traffic- and nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 50, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Franklin International**]
    b. [**Soudal Accumetric**]

F. Silane-Modified Polymer, S, NS, 35, T, NT: Single-component, nonsag, plus 35 percent and minus 35 percent movement capability, traffic- and nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 35, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Soudal Accumetric**]

G. Silane-Modified Polymer, S, NS, 25, T, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Soudal Accumetric**]

H. Silane-Modified Polymer, S, P, 25, T, NT: Single-component, pourable, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade P, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Franklin International**]
    b. [**Premier Building Solutions**]
    c. [**Soudal Accumetric**]

2.8 MILDEW-RESISTANT JOINT SEALANTS

A. Mildew-Resistant Joint Sealants: Formulated for prolonged exposure to humidity with fungicide to prevent mold and mildew growth.

B. Silicone, Mildew Resistant, Acid Curing, S, NS, 25, NT: Mildew-resistant, single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, acid-curing silicone joint sealant; ASTM C920, Type S, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Adfast**]
    b. [**GE Construction Sealants; Momentive Performance Materials Inc.**]
    c. [**Pecora Corporation**]
    d. [**PPG Paints; PPG Industries, Inc.**]
    e. [**Sika Corporation - Building Components**]
    f. [**Soudal Accumetric**]
    g. [**The Dow Chemical Company**]
    h. [**Tremco Incorporated**]

C. Silane-Modified Polymer, Mildew Resistant, S, NS, 50, NT: Mildew-resistant, single-component, nonsag, plus 50 percent and minus 50 percent movement capability, nontraffic-use, [**silyl-terminated polyether**][**silyl-terminated polyurethane**][**polyurea**] joint sealant; ASTM C920, Type S, Grade NS, Class 50, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Master Builders Solutions**]

2.9 POLYSULFIDE JOINT SEALANTS

A. Polysulfide, S, NS, 25, NT: Single-component, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, polysulfide joint sealant; ASTM C920, Type S, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**W. R. Meadows, Inc**]

B. Polysulfide, M, NS, 25, T, NT: Multicomponent, nonsag, plus 25 percent and minus 25 percent movement capability, nontraffic-use, polysulfide joint sealant; ASTM C920, Type M, Grade NS, Class 25, Use NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**W. R. Meadows, Inc**]

C. Polysulfide, M, P, 25, T, NT: Multicomponent, pourable, plus 25 percent and minus 25 percent movement capability, traffic- and nontraffic-use, polysulfide joint sealant; ASTM C920, Type M, Grade P, Class 25, Uses T and NT.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**W. R. Meadows, Inc**]

2.10 BUTYL JOINT SEALANTS

A. Butyl-Rubber-Based Joint Sealants: ASTM C1311.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Bostik; Arkema**]
    b. [**Everkem Diversified Products, Inc.**]
    c. [**GSSI Sealants**]
    d. [**Pecora Corporation**]
    e. [**Sika Corporation - Building Components**]

2.11 LATEX JOINT SEALANTS

A. Acrylic Latex: Acrylic latex or siliconized acrylic latex, ASTM C834, Type OP, Grade NF.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Adfast**]
b. [**Everkem Diversified Products, Inc.**]
c. [**Franklin International**]
d. [**Pecora Corporation**]
e. [**PPG Paints; PPG Industries, Inc.**]
f. [**Sherwin-Williams Company (The)**]
g. [**Tremco Incorporated**]

2.12 JOINT-SEALANT BACKING

A. Sealant Backing Material: Nonstaining; compatible with joint substrates, sealants, primers, and other joint fillers; and approved for applications indicated by sealant manufacturer based on field experience and laboratory testing.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adfast**]
b. [**Alcot Plastics Ltd.**]
c. [**Construction Foam Products; a division of Nomaco, Inc.**]
d. [**Master Builders Solutions**]

B. Cylindrical Sealant Backings: ASTM C1330, [**Type C (closed-cell material with a surface skin)**][**Type O (open-cell material)**][**Type B (bicellular material with a surface skin)**][**or any of the preceding types, as approved in writing by joint-sealant manufacturer for joint application indicated**], and of size and density to control sealant depth and otherwise contribute to producing optimum sealant performance.

C. Bond-Breaker Tape: Polyethylene tape or other plastic tape recommended by sealant manufacturer for preventing sealant from adhering to rigid, inflexible joint-filler materials or joint surfaces at back of joint. Provide self-adhesive tape where applicable.

2.13 MISCELLANEOUS MATERIALS

A. Primer: Material recommended by joint-sealant manufacturer where required for adhesion of sealant to joint substrates indicated, as determined from preconstruction joint-sealant-substrate tests and field tests.

B. Cleaners for Nonporous Surfaces: Chemical cleaners acceptable to manufacturers of sealants and sealant backing materials, free of oily residues or other substances capable of staining or harming joint substrates and adjacent nonporous surfaces in any way, and formulated to promote optimum adhesion of sealants to joint substrates.

C. Masking Tape: Nonstaining, nonabsorbent material compatible with joint sealants and surfaces adjacent to joints.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine joints indicated to receive joint sealants, with Installer present, for compliance with requirements for joint configuration, installation tolerances, and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealants to comply with joint-sealant manufacturer's written instructions and the following requirements:

1. Remove all foreign material from joint substrates that could interfere with adhesion of joint sealant, including dust, paints (except for permanent, protective coatings tested and approved for sealant adhesion and compatibility by sealant manufacturer), old joint sealants, oil, grease, waterproofing, water repellents, water, surface dirt, and frost.
2. Clean porous joint substrate surfaces by brushing, grinding, mechanical abrading, or a combination of these methods to produce a clean, sound substrate capable of developing optimum bond with joint sealants. Remove loose particles remaining after cleaning operations above by vacuuming or blowing out joints with oil-free compressed air. Porous joint substrates include the following:

    a. Concrete.
    b. Masonry.
    c. Unglazed surfaces of ceramic tile.
    d. Exterior insulation and finish systems.

3. Remove laitance and form-release agents from concrete.
4. Clean nonporous joint substrate surfaces with chemical cleaners or other means that do not stain, harm substrates, or leave residues capable of interfering with adhesion of joint sealants. Nonporous joint substrates include the following:

    a. Metal.
    b. Glass.
    c. Porcelain enamel.
    d. Glazed surfaces of ceramic tile.

B. Joint Priming: Prime joint substrates where recommended by joint-sealant manufacturer or as indicated by preconstruction joint-sealant-substrate tests or prior experience. Apply primer to comply with joint-sealant manufacturer's written instructions. Confine primers to areas of joint-sealant bond; do not allow spillage or migration onto adjoining surfaces.

C. Masking Tape: Use masking tape where required to prevent contact of sealant or primer with adjoining surfaces that otherwise would be permanently stained or damaged by such contact or by cleaning methods required to remove sealant smears. Remove tape immediately after tooling without disturbing joint seal.

3.3 INSTALLATION OF JOINT SEALANTS

A. General: Comply with joint-sealant manufacturer's written installation instructions for products and applications indicated, unless more stringent requirements apply.

B. Sealant Installation Standard: Comply with recommendations in ASTM C1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

C. Install sealant backings of type indicated to support sealants during application and at position required to produce cross-sectional shapes and depths of installed sealants relative to joint widths that allow optimum sealant movement capability.

1. Do not leave gaps between ends of sealant backings.
2. Do not stretch, twist, puncture, or tear sealant backings.
3. Remove absorbent sealant backings that have become wet before sealant application, and replace them with dry materials.

D. Install bond-breaker tape behind sealants where sealant backings are not used between sealants and backs of joints.

E. Install sealants using proven techniques that comply with the following and at the same time backings are installed:

1. Place sealants so they directly contact and fully wet joint substrates.
2. Completely fill recesses in each joint configuration.
3. Produce uniform, cross-sectional shapes and depths relative to joint widths that allow optimum sealant movement capability.

F. Tooling of Nonsag Sealants: Immediately after sealant application and before skinning or curing begins, tool sealants in accordance with requirements specified in subparagraphs below to form smooth, uniform beads of configuration indicated; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint.

1. Remove excess sealant from surfaces adjacent to joints.
2. Use tooling agents that are approved in writing by sealant manufacturer and that do not discolor sealants or adjacent surfaces.
3. Provide concave joint profile in accordance with Figure 8A in ASTM C1193 unless otherwise indicated.
4. Provide flush joint profile at [**locations indicated on Drawings**] in accordance with Figure 8B in ASTM C1193.
5. Provide recessed joint configuration of recess depth and at [**locations indicated on Drawings**] in accordance with Figure 8C in ASTM C1193.

    a. Use masking tape to protect surfaces adjacent to recessed tooled joints.

3.4 FIELD QUALITY CONTROL

A. Testing Agency: [**the Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Tests and Inspections:

1. Field-Adhesion Testing: Field test joint-sealant adhesion to joint substrates as follows:

a. Extent of Testing: Test completed and cured sealant joints as follows:

1) Perform [**10**] tests for the first [**1000 ft. (300 m)**] of joint length for each kind of sealant and joint substrate.
2) Perform one test for each [**1000 ft. (300 m)**] of joint length thereafter or one test per each floor per elevation.

b. Test Method: Test joint sealants in accordance with Method A, Tail Procedure, in ASTM C1521.

1) For joints with dissimilar substrates, verify adhesion to each substrate separately; extend cut along one side, verifying adhesion to opposite side. Repeat procedure for opposite side.

c. Inspect tested joints and report on the following:

1) Whether sealants filled joint cavities and are free of voids.
2) Whether sealant dimensions and configurations comply with specified requirements.
3) Whether sealants in joints connected to pulled-out portion failed to adhere to joint substrates or tore cohesively. Include data on pull distance used to test each kind of product and joint substrate. Compare these results to determine if adhesion complies with sealant manufacturer's field-adhesion hand-pull test criteria.

d. Record test results in a field-adhesion-test log. Include dates when sealants were installed, names of persons who installed sealants, test dates, test locations, whether joints were primed, adhesion results and percent elongations, sealant material, sealant configuration, and sealant dimensions.

e. Repair sealants pulled from test area by applying new sealants following same procedures used originally to seal joints. Ensure that original sealant surfaces are clean and that new sealant contacts original sealant.

2. Evaluation of Field-Adhesion-Test Results: Sealants not evidencing adhesive failure from testing or noncompliance with other indicated requirements will be considered satisfactory. Remove sealants that fail to adhere to joint substrates during testing or to comply with other requirements. Retest failed applications until test results prove sealants comply with indicated requirements.

C. Prepare test and inspection reports.

3.5 CLEANING

A. Clean off excess sealant or sealant smears adjacent to joints as the Work progresses by methods and with cleaning materials approved in writing by manufacturers of joint sealants and of products in which joints occur.

3.6 PROTECTION

A. Protect joint sealants during and after curing period from contact with contaminating substances and from damage resulting from construction operations or other causes so sealants are without deterioration or damage at time of Substantial Completion. If, despite such protection, damage or deterioration occurs, cut out, remove, and repair damaged or deteriorated joint sealants immediately so installations with repaired areas are indistinguishable from original work.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 07 92 19 00 - ACOUSTICAL JOINT SEALANTS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes: Acoustical joint sealants.

B. Related Requirements:

1. Section 079200 "Joint Sealants" for elastomeric, latex, and butyl-rubber-based joint sealants for nonacoustical applications.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Samples for Initial Selection: Manufacturer's color charts consisting of strips of cured sealants, showing full range of available colors for each product exposed to view.

C. Samples for Verification: For each type and color of acoustical joint sealant required.

1. Size: **1/2-inch- (13-mm-)** wide sealant joints formed between two **6-inch- (150-mm-)** long strips of material matching the appearance of exposed surfaces adjacent to joint sealants.

D. Acoustical Joint-Sealant Schedule: Include the following information:

1. Joint-sealant application, joint location, and designation.
2. Joint-sealant manufacturer and product name.
3. Joint-sealant formulation.
4. Joint-sealant color.

E. Sustainable Design Submittals:

1. Product Data: For sealants, indicating VOC content.
2. Laboratory Test Reports: For sealants, indicating compliance with requirements for low-emitting materials.

1.3 INFORMATIONAL SUBMITTALS

A. Test and Evaluation Reports:

1. Product Test Reports: For each type of acoustical joint sealant, for tests performed by [**qualified testing agency**][**manufacturer and witnessed by a qualified testing agency**].

B. Sample warranties.

1.4 CLOSEOUT SUBMITTALS

A. Warranty Documentation:

1. Manufacturers' special warranties.
2. Installer's special warranties.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained between **40 and 95 deg F (4 and 35 deg C)**.

1. Maintain containers in clean condition, free of foreign materials and residue.
2. Remove rags and waste from storage areas daily.

1.6 FIELD CONDITIONS

A. Apply coatings only when temperature of surfaces to be coated and ambient air temperatures are between [**35 and 100 deg F (2 and 38 deg C)**][**60 and 90 deg F (16 and 32 deg C)**].[**Warm surfaces to be coated to 70 deg F (21 deg C) to enhance drying.**]

1.7 WARRANTY

A. Installer's Special Warranty: Installer agrees to repair or replace acoustical joint sealants that do not comply with performance and other requirements specified in this Section within specified warranty period.

1. Warranty Period: [**Two**] years from date of Substantial Completion.

B. Manufacturer's Special Warranty: Manufacturer agrees to furnish acoustical joint sealants to repair or replace those joint sealants that do not comply with performance and other requirements specified in this Section within specified warranty period.

PART 2 - PRODUCTS

2.1 ACOUSTICAL JOINT SEALANTS

A. Acoustical joint-sealant products that effectively reduce airborne sound transmission through perimeter joints and openings in building construction, as demonstrated by testing representative assemblies in accordance with ASTM E90.

1. Sealant shall have a VOC content of 250 g/L or less.
2. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

4. Sealant shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde shall not exceed 9 mcg/cu. m.

B. Acoustical Sealant for Exposed and Concealed Joints: Manufacturer's standard nonsag, paintable, nonstaining latex acoustical sealant complying with ASTM C834.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**DAP Products Inc.**]
b. [**Everkem Diversified Products, Inc.**]
c. [**Franklin International**]
d. [**Grabber Construction Products, Inc.**]
e. [**Hilti, Inc.**]
f. [**OSI Sealants; Henkel Corporation**]
g. [**Pecora Corporation**]
h. [**Specified Technologies Inc.**]

2. Colors of Exposed Acoustical Joint Sealants: [**As indicated by manufacturer's designations**][**Match Architect's samples**][**As selected by Architect from manufacturer's full range of colors**], as directed by the Owner.

C. Acoustical Sealant for Concealed Joints: Manufacturer's standard nonsag, nondrying, nonhardening, nonskinning, nonstaining, gunnable, synthetic-rubber acoustical sealant.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**OSI Sealants; Henkel Corporation**]
b. [**Pecora Corporation**]
c. [**Tremco Incorporated**]
d. [**USG Corporation**]

2.2 MISCELLANEOUS MATERIALS

A. Primer: Material recommended by acoustical joint-sealant manufacturer where required for adhesion of sealant to joint substrates.

B. Cleaners for Nonporous Surfaces: Chemical cleaners acceptable to manufacturers of sealants and sealant backing materials, free of oily residues or other substances capable of staining or harming joint substrates and adjacent nonporous surfaces in any way, and formulated to promote optimum adhesion of sealants to joint substrates.

C. Masking Tape: Nonstaining, nonabsorbent material compatible with joint sealants and surfaces adjacent to joints.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine joints indicated to receive acoustical joint sealants, with Installer present, for compliance with requirements for joint configuration, installation tolerances, and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Surface Cleaning of Joints: Clean out joints immediately before installing acoustical joint sealants to comply with joint-sealant manufacturer's written instructions.

B. Joint Priming: Prime joint substrates where recommended by acoustical joint-sealant manufacturer. Apply primer to comply with joint-sealant manufacturer's written instructions. Confine primers to areas of joint-sealant bond; do not allow spillage or migration onto adjoining surfaces.

C. Masking Tape: Use masking tape where required to prevent contact of sealant or primer with adjoining surfaces that otherwise would be permanently stained or damaged by such contact or by cleaning methods required to remove sealant smears. Remove tape immediately after tooling without disturbing joint seal.

3.3 INSTALLATION OF ACOUSTICAL JOINT SEALANTS

A. Comply with acoustical joint-sealant manufacturer's written installation instructions unless more stringent requirements apply.

B. STC-Rated Assemblies: Seal construction at perimeters, behind control joints, and at openings and penetrations with a continuous bead of acoustical joint sealant. Install acoustical joint sealants at both faces of partitions, at perimeters, and through penetrations. Comply with ASTM C919, ASTM C1193, and manufacturer's written instructions for closing off sound-flanking paths around or through assemblies, including sealing partitions to underside of floor slabs above acoustical ceilings.

C. Acoustical Ceiling Areas: Apply acoustical joint sealant at perimeter edge moldings of acoustical ceiling areas in a continuous ribbon concealed on back of vertical legs of moldings before they are installed.

3.4 CLEANING

A. Clean off excess sealant or sealant smears adjacent to joints as the Work progresses by methods and with cleaning materials approved in writing by manufacturers of acoustical joint sealants and of products in which joints occur.

3.5 PROTECTION

A. Protect acoustical joint sealants during and after curing period from contact with contaminating substances and from damage resulting from construction operations or other causes so sealants are without deterioration or damage at time of Substantial Completion. If, despite such protection, damage

or deterioration occurs, cut out, remove, and repair damaged or deteriorated acoustical joint sealants immediately so installations with repaired areas are indistinguishable from original work.

SECTION 07 95 13 00 - PARKING DECK EXPANSION JOINT COVER ASSEMBLIES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Parking deck expansion joint covers.

B. Related Requirements:

1. Section 079100 "Preformed Joint Seals" for preformed foam and extruded-silicone joint seals.

1.2 ACTION SUBMITTALS

A. Product Data: Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for expansion joint cover assemblies.

1. Parking deck expansion joint covers.

B. Shop Drawings: For each expansion joint cover assembly.

1. Include plans, elevations, sections, details, splices, block-out requirement, attachments to other work, and line diagrams showing entire route of each expansion joint.
2. Where expansion joint cover assemblies change planes, provide isometric or clearly detailed drawing depicting how components interconnect.

C. Samples: For each expansion joint cover assembly and for each color and texture specified, full width by **6 inches (150 mm)** long in size.

D. Samples for Initial Selection: For each type of exposed finish.

1. Include manufacturer's color charts showing the full range of colors and finishes available for each exposed metal and elastomeric seal material.

E. Samples for Verification: For each type of expansion joint cover assembly, full width by **6 inches (150 mm)** long in size.

F. Expansion Joint Cover Assembly Schedule: Prepared by or under the supervision of the supplier. Include the following information in tabular form:

1. Manufacturer and model number for each expansion joint cover assembly.
2. Expansion joint cover assembly location cross-referenced to Drawings.
3. Nominal, minimum, and maximum joint width.
4. Movement direction.
5. Materials, colors, and finishes.
6. Product options.
7. Fire-resistance ratings.

1.3 INFORMATIONAL SUBMITTALS

A. Product Test Reports: For each fire-resistance-rated expansion joint cover assembly, for tests performed by [**manufacturer and witnessed by a qualified testing agency**][**a qualified testing agency**].

1.4 QUALITY ASSURANCE

A. Mockups: Build mockups to demonstrate aesthetic effects and to set quality standards for materials and execution.

1. Build mockup of typical expansion joint cover assembly as shown on Drawings.
2. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

PART 2 - PRODUCTS

2.1 ASSEMBLY DESCRIPTION

A. Furnish units in longest practicable lengths to minimize field splicing.

B. Include factory-fabricated closure materials and transition pieces, T-joints, corners, curbs, cross-connections, and other accessories as required to provide continuous expansion joint cover assemblies.

2.2 PERFORMANCE REQUIREMENTS

A. Seismic Performance: Expansion joint cover assemblies shall withstand the effects of earthquake motions determined according to [**ASCE/SEI 7**].

B. Fire-Resistance Ratings: Provide expansion joint cover assemblies with fire barriers identical to those of systems tested for fire resistance according to UL 2079 or ASTM E1966 by a qualified testing agency.

C. Expansion Joint Design Criteria :

1. Type of Movement: [**Thermal**][**Wind sway**].

a. Nominal Joint Width: [**As indicated on Drawings**].
b. Minimum Joint Width: [**As indicated on Drawings**].
c. Maximum Joint Width: [**As indicated on Drawings**].

2. Seismic Movement: As indicated on Drawings.

2.3 PARKING DECK EXPANSION JOINT COVERS

A. Metal-Plate Parking Deck Joint Cover : Assembly consisting of metal cover plate in continuous contact with metal frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**LymTal International, Inc.**]
f. [**MM Systems Corporation**]
g. [**Nystrom, Inc.**]
h. [**Watson Bowman Acme Corp.**]
i. [**Willseal LLC, part of Tremco CPG**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Installation: [**Surface mounted**][**Recessed**][**No bump**].
4. Load Capacity:

   a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
   b. Concentrated Load: [**2000 lb (907 kg)**].
   c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
6. Cover-Plate Design: [**Plain**][**Serrated**][**Abrasive covered**].
7. Exposed Metal:

   a. Aluminum: [**Mill**][**Manufacturer's standard**].
   b. Stainless steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].

B. T-Joint Parking Deck Joint Cover : Assembly consisting of factory-formed polyurethane block with tapered edges over steel plate. Provide manufacturer's standard, liquid-applied nosing sealant for preformed voids at tapered edges.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Balco; a CSW Industrials Company**]
   b. [**Erie Metal Specialties, Inc.**]
   c. [**LymTal International, Inc.**]
   d. [**MM Systems Corporation**]
   e. [**Watson Bowman Acme Corp.**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Load Capacity:

   a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
   b. Concentrated Load: [**2000 lb (907 kg)**].
   c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Exposed Metal:

a. Aluminum: [**Mill**][**Manufacturer's standard**].
b. Stainless steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].

6. Polyurethane Block:

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

C. Compression-Seal Parking Deck Joint Cover : Complying with ASTM E1612/E1612M. Elastomeric seal designed to always stay in compression. Install using manufacturer's recommended lubricant adhesive.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**D.S. Brown; a Gibraltar Industries company**]
e. [**Erie Metal Specialties, Inc.**]
f. [**inpro Corporation**]
g. [**LymTal International, Inc.**]
h. [**MM Systems Corporation**]
i. [**Nystrom, Inc.**]
j. [**Watson Bowman Acme Corp.**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Load Capacity:

a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
b. Concentrated Load: [**2000 lb (907 kg)**].
c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Seal: Preformed elastomeric extrusion.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

D. Precompressed Foam Parking Deck Expansion Joint Seals : Manufacturer's precompressed, self-expanding foam joint seal manufactured from urethane or EVA (ethylene vinyl acetate) foam, impregnated with a nondrying, water-repellent agent, and coated with traffic-grade silicone wearing surface. Factory produce in precompressed sizes in roll or stick form to fit joint widths based on design criteria indicated, with factory- or field-applied adhesive for bonding to substrates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Balco; a CSW Industrials Company**]
b. [**EMSEAL; a Sika Company**]

c. [**Willseal LLC, part of Tremco CPG**]

2. Design Criteria:

   a. Nominal Joint Width: [**As indicated on Drawings**].
   b. Minimum Joint Width: [**As indicated on Drawings**].
   c. Maximum Joint Width: [**As indicated on Drawings**].

3. Application: Slab to slab.
4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Joint Seal Color: [**Gray**][**As indicated by manufacturer's designations**].

E. Epoxy-Bonded-Seal Parking Deck Joint Covers : Elastomeric seal, epoxy-bonded to sides of joint gap. Install using manufacturer's recommended epoxy adhesive.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
   b. [**Balco; a CSW Industrials Company**]
   c. [**Construction Specialties, Inc.**]
   d. [**D.S. Brown; a Gibraltar Industries company**]
   e. [**Erie Metal Specialties, Inc.**]
   f. [**LymTal International, Inc.**]
   g. [**MM Systems Corporation**]
   h. [**Watson Bowman Acme Corp.**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Load Capacity:

   a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
   b. Concentrated Load: [**2000 lb (907 kg)**].
   c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Seal: Preformed elastomeric extrusion.

   a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

F. Strip-Seal Parking Deck Joint Covers : Complying with ASTM E1783/E1783M. Assembly consisting of elastomeric seal mechanically locked into a metal frame or edge rails cast into slab edges.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**D.S. Brown; a Gibraltar Industries company**]
   b. [**Erie Metal Specialties, Inc.**]

c. [**inpro Corporation**]
d. [**LymTal International, Inc.**]
e. [**Watson Bowman Acme Corp.**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Load Capacity:

a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
b. Concentrated Load: [**2000 lb (907 kg)**].
c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Seal: Preformed elastomeric extrusion.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

G. Winged-Seal Parking Deck Joint Covers : Winged elastomeric seal grouted into block outs without mechanical attachment. Fully grout block out with manufacturer's elastomeric concrete.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**D.S. Brown; a Gibraltar Industries company**]
e. [**EMSEAL; a Sika Company**]
f. [**Erie Metal Specialties, Inc.**]
g. [**inpro Corporation**]
h. [**LymTal International, Inc.**]
i. [**MM Systems Corporation**]
j. [**Watson Bowman Acme Corp.**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Load Capacity:

a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
b. Concentrated Load: [**2000 lb (907 kg)**].
c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Seal: Preformed elastomeric extrusion.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

H. Bolt-In Parking Deck Joint Cover : Assembly consisting of winged elastomeric seal locked into slab-edge block outs by metal frames bolted to slab. Fully grout block outs with elastomeric concrete.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
    b. [**Balco; a CSW Industrials Company**]
    c. [**LymTal International, Inc.**]
    d. [**MM Systems Corporation**]
    e. [**Watson Bowman Acme Corp.**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Load Capacity:

    a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
    b. Concentrated Load: [**2000 lb (907 kg)**].
    c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Seal: Preformed elastomeric extrusion.

    a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

I. Split-Slab Membrane Parking Deck Joint Cover : Designed for use with slabs to receive toppings. Assembly consisting of elastomeric winged seals locked into metal edge rails, with flashing for hot-splicing into deck waterproofing. Provide stainless steel retaining caps for edge rails.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Balco; a CSW Industrials Company**]
    b. [**Construction Specialties, Inc.**]
    c. [**EMSEAL; a Sika Company**]
    d. [**Erie Metal Specialties, Inc.**]
    e. [**LymTal International, Inc.**]
    f. [**MM Systems Corporation**]
    g. [**Watson Bowman Acme Corp.**]

2. Application: [**Slab to slab**][**Slab to wall**].
3. Load Capacity:

    a. Uniform Load: [**200 lb/sq. ft. (976 kg/sq. m)**].
    b. Concentrated Load: [**2000 lb (907 kg)**].
    c. Maximum Deflection: [**0.125 inch (3.2 mm)**].

4. Height: [**To match adjacent topping materials**].
5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
6. Exposed Metal:

a. Stainless steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].

7. Seal: Preformed elastomeric extrusion.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.4 MATERIALS

A. Aluminum: **ASTM B221 (ASTM B221M)**, Alloy 6063-T5 for extrusions; **ASTM B209 (ASTM B209M)**, Alloy 6061-T6 for sheet and plate.

1. Apply manufacturer's standard protective coating on aluminum surfaces to be placed in contact with cementitious materials.

B. Stainless Steel: ASTM A240/A240M or ASTM A666, Type 304 for plates, sheet, and strips.

C. Elastomeric Seals: Manufacturer's standard preformed elastomeric membranes or extrusions to be installed in metal frames.

D. Elastomeric Concrete: Modified epoxy or polyurethane extended into a prepackaged aggregate blend, specifically designed for bonding to concrete substrates.

E. Fire Barriers: Any material or material combination, when fire tested after cycling, designated to resist the passage of flame and hot gases through a movement joint and to comply with performance criteria for required fire-resistance rating.

F. Moisture Barrier: Manufacturer's standard, flexible elastomeric material.

G. Nonmetallic, Shrinkage-Resistant Grout: ASTM C1107/C1107M, factory-packaged, nonmetallic aggregate grout, noncorrosive, nonstaining, mixed with water to consistency suitable for application and a 30-minute working time.

2.5 STAINLESS STEEL FINISHES

A. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.

B. Polished Finishes: Grind and polish surfaces to produce uniform finish, free of cross scratches.

1. Run grain of directional finishes with long dimension of each piece.
2. When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.
3. Directional Satin Finish: No. 4.

C. Bright, Cold-Rolled, Unpolished Finish: No. 2B.

2.6 ACCESSORIES

A. Moisture Barriers: Manufacturer's standard continuous, waterproof membrane within joint and attached to substrate on sides of joint.

1. Provide where indicated on Drawings.

B. Manufacturer's stainless steel attachment devices. Include anchors, clips, fasteners, set screws, spacers, and other accessories compatible with material in contact, as indicated or required for complete installations.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine surfaces where expansion joint cover assemblies will be installed for installation tolerances and other conditions affecting performance of the Work.

B. Notify Architect where discrepancies occur that will affect proper expansion joint cover assembly installation and performance, as directed by the Owner.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Prepare substrates according to expansion joint cover assembly manufacturer's written instructions.

B. Coordinate and furnish anchorages, setting drawings, and instructions for installing expansion joint cover assemblies. Provide fasteners of metal, type, and size to suit type of construction indicated and to provide for secure attachment of expansion joint cover assemblies.

C. Cast-In Frames: Coordinate and furnish frames to be cast into concrete.

3.3 INSTALLATION

A. Comply with manufacturer's written instructions for storing, handling, and installing expansion joint cover assemblies and materials unless more stringent requirements are indicated.

B. Metal Frames: Perform cutting, drilling, and fitting required to install expansion joint cover assemblies.

1. Repair or grout block out as required for continuous frame support, using nonmetallic, shrinkage-resistant grout.
2. Install frames in continuous contact with adjacent surfaces.
    a. Shimming is not permitted.
3. Install in true alignment and proper relationship to joints and adjoining finished surfaces measured from established lines and levels.
4. Adjust for differences between actual structural gap and nominal design gap due to ambient temperature at time of installation.
5. Cut and fit ends to accommodate thermal expansion and contraction of metal without buckling of frames.
6. Locate anchors at interval recommended by manufacturer, but not less than **3 inches (75 mm)** from each end and not more than **24 inches (600 mm)** o.c.

C. Seals: Install elastomeric seals and membranes in frames to comply with manufacturer's written

instructions. Install with minimum number of end joints.

1. Provide in continuous lengths for straight sections.
2. Seal transitions. Vulcanize or heat-weld field-spliced joints as recommended by manufacturer.
3. Installation: Mechanically lock seals into frames or adhere to frames with adhesive or pressure-sensitive tape as recommended by manufacturer.

D. Compression Seals: Apply adhesive or lubricant adhesive as recommended by manufacturer before installing compression seals.

E. Precompressed Foam Parking Deck Expansion Joint Seals:

1. Install each length of seal immediately after removing protective wrapping.
2. Firmly secure compressed joint seals to joint gap side to obtain full bond using exposed pressure-sensitive adhesive or field-applied adhesive as recommended by manufacturer.
3. Do not pull or stretch material. Produce seal continuity at splices, ends, turns, and intersections of joints.
4. For applications at low ambient temperatures, heat foam joint seal material in compliance with manufacturer's written instructions.

F. Epoxy-Bonded Seals: Pressurize seal for time period and to pressure recommended by manufacturer. Do not overpressurize.

G. Install with hairline mitered corners where expansion joint cover assemblies change direction or abut other materials.

H. Terminate exposed ends of expansion joint cover assemblies with field- or factory-fabricated termination devices.

I. Elastomeric Concrete: Install according to manufacturer's written application instructions.

J. Fire-Resistance-Rated Assemblies: Coordinate installation of expansion joint cover assembly materials and associated work, so complete assemblies comply with performance requirements.

1. Fire Barriers: Install fire barriers to provide continuous, uninterrupted fire resistance throughout length of joint, including transitions and field splices.

K. Moisture Barrier Drainage: If indicated, provide drainage fittings and connect to drains.

3.4 PROTECTION

A. Do not remove protective covering until finish work in adjacent areas is complete. When protective covering is removed, clean exposed metal surfaces to comply with manufacturer's written instructions.

B. Protect the installation from damage by work of other Sections. Where necessary due to heavy construction traffic, remove and properly store cover plates or seals, and install temporary protection over expansion joint cover assemblies. Reinstall cover plates or seals prior to Substantial Completion.

END OF SECTION 07 95 13 00

SECTION 07 95 13 13 - INTERIOR EXPANSION JOINT COVER ASSEMBLIES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Floor expansion joint covers.
2. Wall expansion joint covers.
3. Ceiling expansion joint covers.

1.2 ACTION SUBMITTALS

A. Product Data: Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for expansion joint cover assemblies.

1. Floor expansion joint covers.
2. Wall expansion joint covers.
3. Ceiling expansion joint covers.

B. Shop Drawings: For each expansion joint cover assembly.

1. Include plans, elevations, sections, details, splices, block-out requirement, attachments to other work, and line diagrams showing entire route of each expansion joint.
2. Where expansion joint cover assemblies change planes, provide isometric or clearly detailed drawing depicting how components interconnect.

C. Samples: For each expansion joint cover assembly and for each color and texture specified, full width by **6 inches (150 mm)** long in size.

D. Samples for Initial Selection: For each type of exposed finish.

1. Include manufacturer's color charts showing the full range of colors and finishes available for each exposed metal and elastomeric-seal material.

E. Samples for Verification: For each type of expansion joint cover assembly, full width by **6 inches (150 mm)** long in size.

F. Expansion Joint Cover Assembly Schedule: Prepared by or under the supervision of the supplier. Include the following information in tabular form:

1. Manufacturer and model number for each expansion joint cover assembly.
2. Expansion joint cover assembly location cross-referenced to Drawings.
3. Nominal, minimum, and maximum joint width.
4. Movement direction.
5. Materials, colors, and finishes.
6. Product options.
7. Fire-resistance ratings.

1.3 INFORMATIONAL SUBMITTALS

A. Product Test Reports: For each fire-resistance-rated expansion joint cover assembly, for tests performed by [**manufacturer and witnessed by a qualified testing agency**][**a qualified testing agency**].

1.4 MOCKUPS

A. Build mockups to demonstrate aesthetic effects and to set quality standards for materials and execution.

1. Build mockup of typical expansion joint cover assembly as shown on Drawings.
2. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

PART 2 - PRODUCTS

2.1 ASSEMBLY DESCRIPTION

A. Furnish units in longest practicable lengths to minimize field splicing.

B. Include factory-fabricated closure materials and transition pieces, T-joints, corners, curbs, cross-connections, and other accessories as required to provide continuous expansion joint cover assemblies.

2.2 PERFORMANCE REQUIREMENTS

A. Seismic Performance: Expansion joint cover assemblies to withstand the effects of earthquake motions determined according to [**ASCE/SEI 7**].

B. Fire-Resistance Ratings: Provide expansion joint cover assemblies with fire barriers identical to those of systems tested for fire resistance according to [**UL 2079**][**or**][**ASTM E1966**] by a qualified testing agency.

1. Hose Stream Test: Wall-to-wall and wall-to-ceiling assemblies to be subjected to hose stream testing.

C. Expansion Joint Design Criteria :

1. Type of Movement: [**Thermal**][**Wind sway**].

a. Nominal Joint Width: [**As indicated on Drawings**].
b. Minimum Joint Width: [**As indicated on Drawings**].
c. Maximum Joint Width: [**As indicated on Drawings**].

2. Seismic Movement:

a. Joint Movement: As indicated on Drawings.

2.3 FLOOR EXPANSION JOINT COVERS

A. Metal-Plate Floor Joint Cover : Metal cover plate fixed on one side of joint gap and free to slide on other.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**Erie Metal Specialties, Inc.**]
e. [**inpro Corporation**]
f. [**MM Systems Corporation**]
g. [**Nystrom, Inc.**]
h. [**Watson Bowman Acme Corp.**]

2. Application: [**Floor to floor**][**Floor to wall**].
3. Installation: Surface mounted.
4. Load Capacity:

a. Uniform Load: [**50 lb/sq. ft. (244 kg/sq. m)**].
b. Concentrated Load: [**300 lb (136 kg)**].
c. Maximum Deflection: [**0.0625 inch (1.6 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
6. Cover-Plate Design: [**Plain**][**Serrated**][**Abrasive covered**].
7. Exposed Metal:

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

B. Center-Plate Floor Joint Cover : Assembly consisting of center plate that slides over metal frames fixed to sides of joint gaps.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]

f. [**Nystrom, Inc.**]
g. [**Watson Bowman Acme Corp.**]

2. Application: [**Floor to floor**][**Floor to wall**].
3. Installation: [**Surface mounted**][**Recessed**][**No bump**].
4. Load Capacity:

   a. Uniform Load: [**50 lb/sq. ft. (244 kg/sq. m)**].
   b. Concentrated Load: [**300 lb (136 kg)**].
   c. Maximum Deflection: [**0.0625 inch (1.6 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
6. Cover-Plate Design: [**Plain**][**Serrated**][**Abrasive covered**].
7. Exposed Metal:

   a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

      1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

   b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
   c. Bronze: [**Mill**][**Manufacturer's standard**].
   d. Brass: [**Mill**][**Manufacturer's standard**].

C. Glide-Plate Floor Joint Cover : Assembly consisting of center plate that slides in and out of slots in metal frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
   b. [**Balco; a CSW Industrials Company**]
   c. [**Construction Specialties, Inc.**]
   d. [**Erie Metal Specialties, Inc.**]
   e. [**inpro Corporation**]
   f. [**MM Systems Corporation**]
   g. [**Nystrom, Inc.**]
   h. [**Watson Bowman Acme Corp.**]

2. Application: [**Floor to floor**][**Floor to wall**].
3. Installation: Recessed.
4. Load Capacity:

   a. Uniform Load: [**50 lb/sq. ft. (244 kg/sq. m)**].
   b. Concentrated Load: [**300 lb (136 kg)**].
   c. Maximum Deflection: [**0.0625 inch (1.6 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent**

construction][**1 hour**][**2 hours**].

6. Exposed Metal:

    a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

        1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

    b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
    c. Bronze: [**Mill**][**Manufacturer's standard**].
    d. Brass: [**Mill**][**Manufacturer's standard**].

D. Hidden-Sightline Floor Joint Cover : Sliding leaf-spring and metal frame assembly designed to accept field-applied finish materials on visible surfaces for minimum frame exposure.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Balco; a CSW Industrials Company**]
    b. [**Construction Specialties, Inc.**]
    c. [**inpro Corporation**]
    d. [**MM Systems Corporation**]
    e. [**Nystrom, Inc.**]
    f. [**Watson Bowman Acme Corp.**]

2. Application: [**Floor to floor**][**Floor to wall**].
3. Installation: Recessed.
4. Load Capacity:

    a. Uniform Load: [**50 lb/sq. ft. (244 kg/sq. m)**].
    b. Concentrated Load: [**300 lb (136 kg)**].
    c. Maximum Deflection: [**0.0625 inch (1.6 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].

E. Seismic-Pan Floor Joint Cover : Seismic pan assembly with sloped sides allowing extension of unit above floor plane during joint contraction, and equipped with springs to return unit back into alignment during joint expansion. Provide manufacturer's recommended sealant at pan edge.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
    b. [**Balco; a CSW Industrials Company**]
    c. [**Construction Specialties, Inc.**]
    d. [**inpro Corporation**]
    e. [**Nystrom, Inc.**]
    f. [**Watson Bowman Acme Corp.**]

2. Application: [**Floor to floor**][**Floor to wall**].
3. Installation: Recessed.
4. Load Capacity:

    a. Uniform Load: [**50 lb/sq. ft. (244 kg/sq. m)**].
    b. Concentrated Load: [**300 lb (136 kg)**].
    c. Maximum Deflection: [**0.0625 inch (1.6 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
6. Pan Recess Depth: [**As required to accommodate adjacent flooring**][**1 inch (25 mm)**][**1-1/2 inch (38 mm)**].

F. Elastomeric-Seal Floor Joint Cover : Assembly consisting of elastomeric seal anchored to frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
    b. [**Balco; a CSW Industrials Company**]
    c. [**Construction Specialties, Inc.**]
    d. [**EMSEAL; a Sika Company**]
    e. [**Erie Metal Specialties, Inc.**]
    f. [**inpro Corporation**]
    g. [**MM Systems Corporation**]
    h. [**Nystrom, Inc.**]
    i. [**Watson Bowman Acme Corp.**]

2. Application: [**Floor to floor**][**Floor to wall**].
3. Installation: [**Surface mounted**][**Recessed**].
4. Load Capacity:

    a. Uniform Load: [**50 lb/sq. ft. (244 kg/sq. m)**].
    b. Concentrated Load: [**300 lb (136 kg)**].
    c. Maximum Deflection: [**0.0625 inch (1.6 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
6. Exposed Metal:

    a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

        1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

    b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
    c. Bronze: [**Mill**][**Manufacturer's standard**].

d. Brass: [**Mill**][**Manufacturer's standard**].

7. Seal: Preformed elastomeric membrane or extrusion.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

G. Dual-Elastomeric-Seal Floor Joint Cover: Assembly consisting of dual-elastomeric seals and center plate anchored to frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]
f. [**Nystrom, Inc.**]
g. [**Watson Bowman Acme Corp.**]

2. Application: [**Floor to floor**][**Floor to wall**].
3. Installation: Recessed.
4. Load Capacity:

a. Uniform Load: [**50 lb/sq. ft. (244 kg/sq. m)**].
b. Concentrated Load: [**300 lb (136 kg)**].
c. Maximum Deflection: [**0.0625 inch (1.6 mm)**].

5. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
6. Center-Plate Design: [**Plain**][**Serrated**][**Recessed to accept field-applied finish materials**].

a. Center-Plate Recess Depth: [**As required to accommodate adjacent flooring**][**1/8 inch (3 mm)**][**3/8 inch (10 mm)**].

7. Exposed Metal:

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

8. Seal: Preformed elastomeric membranes or extrusions.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.4 WALL EXPANSION JOINT COVERS

A. Metal-Plate Wall Joint Cover : Metal cover plate fixed on one side of joint gap and free to slide on other.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**Erie Metal Specialties, Inc.**]
e. [**inpro Corporation**]
f. [**MM Systems Corporation**]
g. [**Nystrom, Inc.**]
h. [**Watson Bowman Acme Corp.**]

2. Application: [**Wall to wall**][**Wall to corner**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Exposed Metal:

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

B. Center-Plate Wall Joint Cover : Assembly consisting of center plate that slides over gaskets in metal frames fixed to sides of joint gaps.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]
f. [**Nystrom, Inc.**]
g. [**Watson Bowman Acme Corp.**]

2. Application: [**Wall to wall**][**Wall to corner**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].

4. Exposed Metal:

    a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

        1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

    b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
    c. Bronze: [**Mill**][**Manufacturer's standard**].
    d. Brass: [**Mill**][**Manufacturer's standard**].

C. Glide-Plate Wall Joint Cover : Assembly consisting of center plate that slides in and out of slots in metal frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
    b. [**Balco; a CSW Industrials Company**]
    c. [**Construction Specialties, Inc.**]
    d. [**Erie Metal Specialties, Inc.**]
    e. [**inpro Corporation**]
    f. [**MM Systems Corporation**]
    g. [**Nystrom, Inc.**]
    h. [**Watson Bowman Acme Corp.**]

2. Application: [**Wall to wall**][**Wall to corner**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Exposed Metal:

    a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

        1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

    b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
    c. Bronze: [**Mill**][**Manufacturer's standard**].
    d. Brass: [**Mill**][**Manufacturer's standard**].

D. Elastomeric-Seal Wall Joint Cover : Assembly consisting of elastomeric seal anchored to frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]

b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**Erie Metal Specialties, Inc.**]
e. [**inpro Corporation**]
f. [**MM Systems Corporation**]
g. [**Nystrom, Inc.**]
h. [**Watson Bowman Acme Corp.**]

2. Application: [**Wall to wall**][**Wall to corner**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Exposed Metal:

   a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

      1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

   b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
   c. Bronze: [**Mill**][**Manufacturer's standard**].
   d. Brass: [**Mill**][**Manufacturer's standard**].

5. Seal: Preformed elastomeric membranes or extrusions.

   a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

E. Dual-Elastomeric-Seal Wall Joint Cover: Assembly consisting of dual-elastomeric seals and center plate anchored to frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
   b. [**Balco; a CSW Industrials Company**]
   c. [**Construction Specialties, Inc.**]
   d. [**inpro Corporation**]
   e. [**MM Systems Corporation**]
   f. [**Nystrom, Inc.**]
   g. [**Watson Bowman Acme Corp.**]

2. Application: [**Wall to wall**][**Wall to corner**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Center-Plate Design: [**Plain**][**Recessed to accept gypsum board**][**Recessed to accept wall tile**].
5. Exposed Metal:

   a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class**

I][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

6. Seal: Preformed elastomeric membranes or extrusions.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.5 CEILING EXPANSION JOINT COVERS

A. Metal-Plate Ceiling Joint Cover : Metal cover plate fixed on one side of joint gap and free to slide on other.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]
f. [**Nystrom, Inc.**]

2. Application: [**Ceiling to ceiling**][**Wall to ceiling**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Exposed Metal:

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

B. Center-Plate Ceiling Joint Cover : Assembly consisting of center plate that slides over gasket in metal frames fixed to sides of joint gaps.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**Nystrom, Inc.**]
f. [**Watson Bowman Acme Corp.**]

2. Application: [**Ceiling to ceiling**][**Wall to ceiling**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Exposed Metal:

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

C. Glide-Plate Ceiling Joint Cover : Assembly consisting of center plate that slides in and out of slots in metal frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]
f. [**Nystrom, Inc.**]
g. [**Watson Bowman Acme Corp.**]

2. Application: [**Ceiling to ceiling**][**Wall to ceiling**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Exposed Metal:

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

D. Elastomeric-Seal Ceiling Joint Cover : Assembly consisting of elastomeric seal anchored to frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**Erie Metal Specialties, Inc.**]
e. [**inpro Corporation**]
f. [**MM Systems Corporation**]
g. [**Nystrom, Inc.**]
h. [**Watson Bowman Acme Corp.**]

2. Application: [**Ceiling to ceiling**][**Wall to ceiling**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

4. Seal: Preformed elastomeric membranes or extrusions.

a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

E. Dual-Elastomeric-Seal Ceiling Joint Cover: Assembly consisting of dual-elastomeric seals and center plate anchored to frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]

2. Application: [**Wall to wall**][**Wall to corner**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Center-Plate Design: [**Plain**][**Recessed to accept gypsum board**][**Recessed to accept wall tile**].
5. Exposed Metal:

    a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

        1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

    b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
    c. Bronze: [**Mill**][**Manufacturer's standard**].
    d. Brass: [**Mill**][**Manufacturer's standard**].

6. Seal: Preformed elastomeric membranes or extrusions.

    a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

F. Elastomeric-Seal Acoustical Ceiling Joint Cover : Elastomeric-seal assembly designed for use in acoustical ceilings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
    b. [**Balco; a CSW Industrials Company**]
    c. [**Construction Specialties, Inc.**]
    d. [**Erie Metal Specialties, Inc.**]
    e. [**inpro Corporation**]
    f. [**Nystrom, Inc.**]
    g. [**Watson Bowman Acme Corp.**]

2. Application: [**Ceiling to ceiling**][**Wall to ceiling**].
3. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
4. Exposed Metal:

    a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

        1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**].

    b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
    c. Bronze: [**Mill**][**Manufacturer's standard**].
    d. Brass: [**Mill**][**Manufacturer's standard**].

5. Seal: Preformed elastomeric membranes or extrusions.

   a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

2.6 MATERIALS

A. Aluminum: **ASTM B221 (ASTM B221M)**, Alloy 6063-T5 for extrusions; **ASTM B209 (ASTM B209M)**, Alloy 6061-T6 for sheet and plate.

   1. Apply manufacturer's standard protective coating on aluminum surfaces to be placed in contact with cementitious materials.

B. Stainless Steel: ASTM A240/A240M or ASTM A666, Type 304 for plates, sheet, and strips.

C. Brass: ASTM B36/B36M, UNS Alloy C26000 for half hard sheet and coil.

D. Bronze: ASTM B455, Alloy C38500 for extrusions; Alloy C23000 red brass for plates.

E. Elastomeric Seals: Manufacturer's standard preformed elastomeric membranes or extrusions to be installed in metal frames.

F. Fire Barriers: Any material or material combination, when fire tested after cycling, designated to resist the passage of flame and hot gases through a movement joint and to comply with performance criteria for required fire-resistance rating.

G. Moisture Barrier: Manufacturer's standard, flexible elastomeric material.

H. Nonmetallic, Shrinkage-Resistant Grout: ASTM C1107/C1107M, factory-packaged, nonmetallic aggregate grout, noncorrosive, nonstaining, mixed with water to consistency suitable for application and a 30-minute working time.

2.7 ALUMINUM FINISHES

A. Mill finish.

B. Clear Anodic Finish: AAMA 611, [**AA-M12C22A41, Class I, 0.018 mm**][**AA-M12C22A31, Class II, 0.010 mm**] or thicker.

C. Color Anodic Finish: AAMA 611, [**AA-M12C22A42/A44, Class I, 0.018 mm**][**AA-M12C22A32/A34, Class II, 0.010 mm**] or thicker.

2.8 STAINLESS STEEL FINISHES

A. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.

B. Polished Finishes: Grind and polish surfaces to produce uniform finish, free of cross scratches.

   1. Run grain of directional finishes with long dimension of each piece.
   2. When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.
   3. Directional Satin Finish: No. 4.

C. Bright, Cold-Rolled, Unpolished Finish: No. 2B.

2.9 COPPER-ALLOY FINISHES

A. Buffed Finish: M21 (Mechanical Finish: buffed, smooth specular).

B. Medium-Satin Finish: M32 (Mechanical Finish: directionally textured, medium satin).

2.10 ACCESSORIES

A. Moisture Barriers: Manufacturer's standard continuous, waterproof membrane within joint and attached to substrate on sides of joint.

1. Provide where indicated on Drawings.

B. Manufacturer's [**standard**][**stainless steel**] attachment devices. Include anchors, clips, fasteners, set screws, spacers, and other accessories compatible with material in contact, as indicated or required for complete installations.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine surfaces where expansion joint cover assemblies will be installed for installation tolerances and other conditions affecting performance of the Work.

B. Notify Architect where discrepancies occur that will affect proper expansion joint cover assembly installation and performance, as directed by the Owner.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Prepare substrates according to expansion joint cover assembly manufacturer's written instructions.

B. Coordinate and furnish anchorages, setting drawings, and instructions for installing expansion joint cover assemblies. Provide fasteners of metal, type, and size to suit type of construction indicated and to provide for secure attachment of expansion joint cover assemblies.

3.3 INSTALLATION

A. Comply with manufacturer's written instructions for storing, handling, and installing expansion joint cover assemblies and materials unless more stringent requirements are indicated.

B. Metal Frames: Perform cutting, drilling, and fitting required to install expansion joint cover assemblies.

1. Repair or grout block out as required for continuous frame support using nonmetallic, shrinkage-resistant grout.

2. Install frames in continuous contact with adjacent surfaces.

   a. Shimming is not permitted.

3. Install in true alignment and proper relationship to joints and adjoining finished surfaces measured from established lines and levels.
4. Adjust for differences between actual structural gap and nominal design gap due to ambient temperature at time of installation.
5. Cut and fit ends to accommodate thermal expansion and contraction of metal without buckling of frames.
6. Locate anchors at interval recommended by manufacturer, but not less than **3 inches (75 mm)** from each end and not more than **24 inches (600 mm)** o.c.

C. Seals: Install elastomeric seals and membranes in frames to comply with manufacturer's written instructions. Install with minimum number of end joints.

1. Provide in continuous lengths for straight sections.
2. Seal transitions. Vulcanize or heat-weld field-spliced joints as recommended by manufacturer.
3. Installation: Mechanically lock seals into frames or adhere to frames with adhesive or pressure-sensitive tape as recommended by manufacturer.

D. Install with hairline mitered corners where expansion joint cover assemblies change direction or abut other materials.

E. Terminate exposed ends of expansion joint cover assemblies with field- or factory-fabricated termination devices.

F. Fire-Resistance-Rated Assemblies: Coordinate installation of expansion joint cover assembly materials and associated work so complete assemblies comply with performance requirements.

1. Fire Barriers: Install fire barriers to provide continuous, uninterrupted fire resistance throughout length of joint, including transitions and field splices.

G. Moisture Barrier Drainage: If indicated, provide drainage fittings and connect to drains.

3.4 PROTECTION

A. Do not remove protective covering until finish work in adjacent areas is complete. When protective covering is removed, clean exposed metal surfaces to comply with manufacturer's written instructions.

B. Protect the installation from damage by work of other Sections. Where necessary due to heavy construction traffic, remove and properly store cover plates or seals and install temporary protection over expansion joint cover assemblies. Reinstall cover plates or seals prior to Substantial Completion.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 07 95 13 16 - EXTERIOR EXPANSION JOINT COVER ASSEMBLIES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Exterior expansion joint covers.

B. Related Requirements:

1. Section 077129 "Manufactured Roof Expansion Joints" for factory-fabricated roof expansion joint cover assemblies.
2. Section 079100 "Preformed Joint Seals" for preformed foam and extruded-silicone joint seals.
3. Section 079513.19 "Parking Deck Expansion Joint Cover Assemblies" for expansion joint cover assemblies subject to vehicular traffic.

1.2 ACTION SUBMITTALS

A. Product Data: Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for expansion joint cover assemblies.

1. Exterior expansion joint covers.

B. Shop Drawings: For each expansion joint cover assembly.

1. Include plans, elevations, sections, details, splices, block-out requirement, attachments to other work, and line diagrams showing entire route of each expansion joint.
2. Where expansion joint cover assemblies change planes, provide isometric or clearly detailed drawing depicting how components interconnect.

C. Samples: For each exposed expansion joint cover assembly and for each color and texture specified, full width by **6 inches (150 mm)** long in size.

D. Samples for Initial Selection: For each type of exposed finish.

1. Include manufacturer's color charts showing the full range of colors and finishes available for each exposed metal and elastomeric seal material.

E. Samples for Verification: For each type of expansion joint cover assembly, full width by **6 inches (150 mm)** long in size.

F. Expansion Joint Cover Assembly Schedule: Prepared by or under the supervision of the supplier. Include the following information in tabular form:

1. Manufacturer and model number for each expansion joint cover assembly.
2. Expansion joint cover assembly location cross-referenced to Drawings.
3. Nominal, minimum, and maximum joint width.
4. Movement direction.
5. Materials, colors, and finishes.

6. Product options.
7. Fire-resistance ratings.

1.3 INFORMATIONAL SUBMITTALS

A. Product Test Reports: For each fire-resistance-rated expansion joint cover assembly, for tests performed by [**manufacturer and witnessed by a qualified testing agency**][**a qualified testing agency**].

1.4 MOCKUPS

A. Build mockups to demonstrate aesthetic effects and to set quality standards for materials and execution.

1. Build mockup of typical expansion joint cover assembly as shown on Drawings.
2. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

PART 2 - PRODUCTS

2.1 ASSEMBLY DESCRIPTION

A. Furnish units in longest practicable lengths to minimize field splicing.

B. Include factory-fabricated closure materials and transition pieces, T-joints, corners, curbs, cross-connections, and other accessories as required to provide continuous expansion joint cover assemblies.

2.2 PERFORMANCE REQUIREMENTS

A. Seismic Performance: Expansion joint cover assemblies shall withstand the effects of earthquake motions determined according to [**ASCE/SEI 7**].

B. Fire-Resistance Ratings: Provide expansion joint cover assemblies with fire barriers identical to those of systems tested for fire resistance according to [**UL 2079**][**ASTM E1966**] by a qualified testing agency.

1. Hose Stream Test: Wall-to-wall and wall-to-soffit assemblies shall be subjected to hose stream testing.

C. Expansion Joint Design Criteria :

1. Type of Movement: [**Thermal**][**Wind sway**].

a. Nominal Joint Width: [**As indicated on Drawings**].
b. Minimum Joint Width: [**As indicated on Drawings**].
c. Maximum Joint Width: [**As indicated on Drawings**].

2. Seismic Movement:

a. Joint Movement: As indicated on Drawings.

2.3 EXTERIOR EXPANSION JOINT COVERS

A. Exterior Metal-Plate Joint Cover : Assembly consisting of sliding metal cover plate in continuous contact with gaskets mounted on metal frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]
f. [**Nystrom, Inc.**]
g. [**Watson Bowman Acme Corp.**]

2. Application: [**Wall to wall**][**Wall to soffit**][**Soffit to soffit**].
3. Installation: Surface mounted.
4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent construction**][**1 hour**][**2 hours**].
5. Exposed Metal:

a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
c. Bronze: [**Mill**][**Manufacturer's standard**].
d. Brass: [**Mill**][**Manufacturer's standard**].

B. Exterior Elastomeric-Seal Joint Cover : Assembly consisting of elastomeric seal anchored to surface-mounted frames fixed to sides of joint gap.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Architectural Art Manufacturing; a division of Pittcon Architectural Metals, LLC**]
b. [**Balco; a CSW Industrials Company**]
c. [**Construction Specialties, Inc.**]
d. [**inpro Corporation**]
e. [**MM Systems Corporation**]
f. [**Nystrom, Inc.**]
g. [**Watson Bowman Acme Corp.**]

2. Application: [**Wall to wall**][**Wall to soffit**][**Soffit to soffit**].
3. Installation: [**Surface-mounted**][**Recessed**].
4. Fire-Resistance Rating: Not less than [**that indicated on Drawings**][**that of adjacent**

construction][**1 hour**][**2 hours**].

5. Exposed Metal:

   a. Aluminum: [**Mill**][**Clear anodic, Class I**][**Clear anodic, Class II**][**Color anodic, Class I**][**Color anodic, Class II**][**Manufacturer's standard**].

      1) Color: [**Light bronze**][**Dark bronze**][**Match Architect's sample**][**As selected by Architect from full range of industry colors and color densities**], as directed by the Owner.

   b. Stainless Steel: [**No. 2B**][**No. 4**][**Manufacturer's standard**].
   c. Bronze: [**Mill**][**Manufacturer's standard**].
   d. Brass: [**Mill**][**Manufacturer's standard**].

6. Seal: Preformed elastomeric membrane or extrusion.

   a. Color: [**Black**][**Gray**][**As selected by Architect from manufacturer's full range**], as directed by the Owner.

C. Preformed Foam Joint Seals: Manufacturer's standard joint seal manufactured from urethane or EVA (ethylene vinyl acetate) foam with minimum density of **10 lb/cu. ft. (160 kg/cu. m)** and impregnated with a nondrying, water-repellent agent. Factory produce in precompressed sizes in roll or stick form to fit joint widths based on design criteria indicated, with factory- or field-applied adhesive for bonding to substrates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Balco; a CSW Industrials Company**]
   b. [**EMSEAL; a Sika Company**]
   c. [**LymTal International, Inc.**]
   d. [**MM Systems Corporation**]
   e. [**Nystrom, Inc.**]
   f. [**Pecora Corporation**]
   g. [**Schul International Company, LLC**]
   h. [**Watson Bowman Acme Corp.**]
   i. [**Willseal LLC, part of Tremco CPG**]

2. Design Criteria:

   a. Nominal Joint Width: [**As indicated on Drawings**].
   b. Minimum Joint Width: [**As indicated on Drawings**].
   c. Maximum Joint Width: [**As indicated on Drawings**].

3. Joint Seal Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from full range of industry colors**], as directed by the Owner.

2.4 MATERIALS

A. Aluminum: **ASTM B221 (ASTM B221M)**, Alloy 6063-T5 for extrusions; **ASTM B209 (ASTM B209M)**,

Alloy 6061-T6 for sheet and plate.

1. Apply manufacturer's standard protective coating on aluminum surfaces to be placed in contact with cementitious materials.

B. Stainless Steel: ASTM A240/A240M or ASTM A666, Type 304 for plates, sheet, and strips.

C. Brass: ASTM B36/B36M, UNS Alloy C26000 for half hard sheet and coil.

D. Bronze: ASTM B455, Alloy C38500 for extrusions; Alloy C23000 red brass for plates.

E. Elastomeric Seals: Manufacturer's standard preformed elastomeric membranes or extrusions to be installed in metal frames.

F. Fire Barriers: Any material or material combination, when fire tested after cycling, designated to resist the passage of flame and hot gases through a movement joint and to comply with performance criteria for required fire-resistance rating.

G. Moisture Barrier: Manufacturer's standard, flexible elastomeric material.

2.5 ALUMINUM FINISHES

A. Mill finish.

B. Clear Anodic Finish: AAMA 611, [**AA-M12C22A41, Class I, 0.018 mm**][**AA-M12C22A31, Class II, 0.010 mm**] or thicker.

C. Color Anodic Finish: AAMA 611, [**AA-M12C22A42/A44, Class I, 0.018 mm**][**AA-M12C22A32/A34, Class II, 0.010 mm**] or thicker.

2.6 STAINLESS STEEL FINISHES

A. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.

B. Polished Finishes: Grind and polish surfaces to produce uniform finish, free of cross scratches.

1. Run grain of directional finishes with long dimension of each piece.
2. When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.
3. Directional Satin Finish: No. 4.

C. Bright, Cold-Rolled, Unpolished Finish: No. 2B.

2.7 COPPER-ALLOY FINISHES

A. Buffed Finish: M21 (Mechanical Finish: buffed, smooth specular).

B. Medium-Satin Finish: M32 (Mechanical Finish: directionally textured, medium satin).

2.8 ACCESSORIES

A. Moisture Barriers: Manufacturer's standard continuous, waterproof membrane within joint and attached to substrate on sides of joint.

1. Provide where indicated on Drawings.

B. Manufacturer's [**standard**][**stainless steel**] attachment devices. Include anchors, clips, fasteners, set screws, spacers, and other accessories compatible with material in contact, as indicated or required for complete installations.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine surfaces where expansion joint cover assemblies will be installed for installation tolerances and other conditions affecting performance of the Work.

B. Notify Architect where discrepancies occur that will affect proper expansion joint cover assembly installation and performance, as directed by the Owner.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Prepare substrates according to expansion joint cover assembly manufacturer's written instructions.

B. Coordinate and furnish anchorages, setting drawings, and instructions for installing expansion joint cover assemblies. Provide fasteners of metal, type, and size to suit type of construction indicated and to provide for secure attachment of expansion joint cover assemblies.

3.3 INSTALLATION

A. Comply with manufacturer's written instructions for storing, handling, and installing expansion joint cover assemblies and materials unless more stringent requirements are indicated.

B. Metal Frames: Perform cutting, drilling, and fitting required to install expansion joint cover assemblies.

1. Install in true alignment and proper relationship to joints and adjoining finished surfaces measured from established lines and levels.
2. Adjust for differences between actual structural gap and nominal design gap due to ambient temperature at time of installation.
3. Cut and fit ends to accommodate thermal expansion and contraction of metal without buckling of frames.
4. Install frames in continuous contact with adjacent surfaces.

a. Shimming is not permitted.

5. Locate anchors at interval recommended by manufacturer, but not less than **3 inches (75 mm)** from each end and not more than **24 inches (600 mm)** o.c.

C. Elastomeric Seals: Install elastomeric seals and membranes in frames to comply with manufacturer's written instructions. Install with minimum number of end joints.

1. Provide in continuous lengths for straight sections.
2. Seal transitions. Vulcanize or heat-weld field-spliced joints as recommended by manufacturer.
3. Mechanically lock seals into frames or adhere to frames with adhesive or pressure-sensitive tape as recommended by manufacturer.

D. Preformed Foam Joint Seals: Install in compliance with manufacturer's written instructions. Install with minimum number of end joints.

1. Install each length of seal immediately after removing protective wrapping.
2. Firmly secure compressed joint seals to joint gap side to obtain full bond using exposed pressure-sensitive adhesive or field-applied adhesive as recommended by manufacturer.
3. Do not pull or stretch material. Produce seal continuity at splices, ends, turns, and intersections of joints.
4. For applications at low ambient temperatures, heat foam joint seal material in compliance with manufacturer's written instructions.

E. Install with hairline mitered corners where expansion joint cover assemblies change direction or abut other materials.

F. Terminate exposed ends of expansion joint cover assemblies with field- or factory-fabricated termination devices.

G. Fire-Resistance-Rated Assemblies: Coordinate installation of expansion joint cover assembly materials and associated work so complete assemblies comply with performance requirements.

1. Fire Barriers: Install fire barriers to provide continuous, uninterrupted fire resistance throughout length of joint, including transitions and field splices.

H. Moisture Barrier Drainage: If indicated, provide drainage fitting and connect to drains.

3.4 CONNECTIONS

A. Transition to Roof Expansion Joint Covers: Coordinate installation of exterior wall and soffit expansion joint covers with roof expansion joint covers specified in Section 077129 "Manufactured Roof Expansion Joints."[**Install factory-fabricated units at transition between exterior walls and soffits and roof expansion joint cover assemblies.**]

3.5 PROTECTION

A. Do not remove protective covering until finish work in adjacent areas is complete. When protective covering is removed, clean exposed metal surfaces to comply with manufacturer's written instructions.

B. Protect the installation from damage by work of other Sections.

SECTION 09 01 20 00 - GYPSUM BOARD RENOVATION

GENERAL

Description Of Work

1. This specification covers the furnishing and installation of materials for gypsum board renovation. Products shall be as directed by the Owner. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.

Submittals

2. Quality Assurance/Control Submittals
   a. Certificates: Manufacturer's written certification that gypsum products meet or exceed specified requirements.

Quality Assurance

3. Regulatory Requirements:
   a. Gypsum Board Partitions: Listed and labeled for fire-protective ratings as indicated or scheduled.
   b. Gypsum Board Floor/Ceilings and Roof/Ceiling Assemblies: Listed and labeled for fire protective ratings as indicated or scheduled.
   c. Fire-Rated Assemblies: Comply with UL 05, FM P8016, or GA 600 for required fire-rated assembly.

Delivery, Storage, And Handling

4. Storage and Protection: Store wallboard off ground to protect it from weather and damage due to moisture damage.
   a. Wallboard: Dry, free of warpage, and have bundling tape intact immediately prior to use.

Project Conditions

5. Environmental Requirements: Comply with Detailed Scope of Work.
   a. During gypsum-panel application and finishing, maintain indoor temperatures within range of 13 degrees C (55 degrees F) to 21 degrees C (70 degrees F). Provide adequate ventilation to carry off excess moisture.
6. Existing Conditions: See Division 1 Section “Summary of Work”. Do not interfere with use of occupied buildings or portions of buildings. Maintain free and safe passage to and from occupied areas.
7. Protection: Protect grounds, plantings, buildings and any other facilities or property from damage caused by construction operations.

Scheduling And Sequencing

8. Scheduling and Completion: Comply with Detailed Scope of Work.

PRODUCTS

Materials

9. Materials for Patching, Extending, and Matching:

a. Provide same products or types of construction as in existing structure, as needed to patch, extend, or match existing work.
   1) Generally, Contract Documents will not define products present in existing construction. Determine products by Inspection and any necessary testing.
   2) Patching, extending, and matching of existing work and systems shall result in a complete, finished system.
b. Presence of product, finish, or type of construction requires that patching, extending, or matching be performed as necessary to make work complete and consistent.

Metals

10. Partition Metals: ASTM C 645, galvanized steel:
    a. Interior Steel Studs: Minimum 0.46 mm (25 gage), provide sizes and gages to match existing or as indicated.
       1) Provide minimum of 0.84 mm (20 gage) studs both sides of hollow metal frames.
    b. Steel Stud Runners: Match studs. Provide long leg runners for slip joint at structure above to allow for deflection.
    c. Furring Channels: Hat-shaped furring channels, minimum 0.46 mm (25 gage).
    d. Resilient Furring Channels: Manufacturer's standard product designed to reduce sound transmission by resilient attachment of gypsum board, 13 mm (1/2 inch) deep.
    e. Sheet-Metal Reinforcement (Alternate to Wood Blocking): 1.52 mm (16 gage) minimum.
11. Suspended Coiling Metals:
    a. Runner Channels: ASTM C 754 cold-rolled steel channels with rust-inhibitive finish.
       1) 50 mm (2 Inches) deep, 88 kg per 100 m (590 pounds per 1,000 LF).
       2) 38 mm (1-1/2 inch) deep, 70 kg per 100 m (475 pounds per 1,000 LF).
       3) 19 mm (3/4 Inch) deep, 45 kg per 100 m (300 pounds per 1,000 LF).
    b. Furring Channels: Hat-shaped galvanized-steel furring channels, minimum 0.46 mm (25 gage).
    c. Steel Studs: Galvanized steel as specified above, minimum 0.46 mm (25 gage).
    d. Wire for Hangers and Ties: ASTM A 641, Class 1 zinc coating, soft temper.
       1) Hanger Wire: Minimum 4.1 mm (8 gage).
       2) Tie Wire: 6 mm (16 gage).

Gypsum Board And Related Materials

12. Gypsum Board: GA216 and ASTM C 36
    a. Size: 12.7 mm and 15.9 mm (1/2 inch and 5/8 inch) thick to match existing, as indicated or scheduled. Provide boards 1 200 mm (48 inches) wide by length required to minimize cross joints.
    b. Regular Tapered-edge gypsum panels.
       1) Provide Type X gypsum panels at fire-rated assemblies.
    c. Water-Resistant: ASTM C 630, paintable, tapered-edge gypsum panels.
       1) Provide Type X water-resistant gypsum panels at fire-rated assemblies.
13. Cementitious Backer Units (CBU): ANSI A118.9, nailable/screwable backer board composed of stable Portland cement, aggregates, and reinforcements with ability to remain unaffected by prolonged exposure to moisture, 12.7 mm (112 inch) thick.
14. Fasteners:
    a. Screws: ASTM C 1002, drywall screws, corrosion resistant. Provide types as recommended by manufacturer for each application.
       1) Wallboard to Metal Framing: Minimum 25 mm (1 inch), Type S.
       2) Wall board to Wood Framing: Minimum 32 mm (1-1/4 inch) Type W bugle head.

3) Wall board to Wallboard: Type G.
b. Nails: ASTM C 514.

15. Accessories: GA 216 and ASTM C 1047, galvanized steel.
    a. Comer Bead: GA 216 Type CB-114 x 114.
    b. Metal Trim (Casing Beads): GA 216 Type L, in depth to match gypsum-board thickness.
    c. Control Joint: V-shaped control joint.
    d. Adhesive: ASTM C 557 multi-purpose adhesive.
16. Finishing Materials: ASTM C 475.
    a. Joint Tape: Provide type as recommended by panel manufacturer.
    b. Joint Treatment: Joint compound, adhesive, water, and fasteners.
17. Sound-Isolation Materials:
    a. Sound Insulation: ASTM C 665, Type I (unfaced) mineral fiber blankets, 3.7 to 4.9 kg per sq m (3/4 to 1 PCF), thickness as indicated, scheduled, or required by fire-rated assembly.
    b. Acoustical Sealant:
        1) Concealed: ASTM C 919 nondrying, non-hardening, and non-skinning; non-bleeding; and non-staining.
        2) Exposed: ASTM C 919 non-oxidizing and skinning; permanently elastic; and paintable.
    c. Ductwork Penetrations Packing: Low-density fiberglass.

EXECUTION

Examination

18. Units, Spaces, and Areas to be Renovated: Comply with Detailed Scope of Work.
    a. Existing Conditions: Before beginning installation, examine substrates and framing to receive gypsum board for defects or conditions adversely affecting quality and execution of installation.

Preparation

19. Dust Protection: Comply with Detailed Scope of Work.
20. Building Occupation: Carry out demolition and renovation work to cause as little inconvenience to occupants as possible. See Detailed Scope of Work.
21. Protection: Comply with Detailed Scope of Work.
    a. Protection: Provide drapes and drop cloths necessary to protect walls, floors, ductwork and piping, electrical work, etc. during drywall finishing operations.
22. Selective Demolition: Comply with Detailed Scope of Work.

Laying Out Work

23. Discrepancies: Verity dimensions and elevations indicated in layout of existing work.
    a. Prior to commencing work, carefully compare and check Drawings (if any) for discrepancies in locations or elevations of work to be executed.
    b. Refer discrepancies among Drawings (if any), Specifications, and existing conditions to the Owner or adjustment before work affected is performed.
        1) Failure to make such notification shall place responsibility on Contractor to carry out work in satisfactory, workmanlike mariner.
    c. Contractor: Responsible for location and elevation of construction indicated by Construction Documents.

Performance

24. Patching: Patch and extend existing work using skilled mechanics capable of matching existing quality of workmanship.
    a. Quality of Patched or Extended Work: Not less than specified for new work. If similar new work is not specified, equal to existing work.
25. Damaged Surfaces: Comply with Detailed Scope of Work.
26. Transitions from Existing to New Work: Comply with Detailed Scope of Work.

Erection Of Drywall Stud Partitions

27. Reference Standard: Erect steel framing in accordance with ASTM C 754.
28. Layouts: Align partition studs accurately according to partition layout.
29. Anchoring: Anchor runner channels to concrete slabs with concrete stub nails or power-driven anchors at 600 mm (24 inches) OC. Anchor runner channels to coiling grid, where applicable, with stove bolts. Where studs extend above ceiling system, install headers where required to receive runners.
30. Studs: Position studs vertically in runners. Where studs are located adjacent to openings or partition intersections and comers. anchor studs to runners with manufacturer's metal lock fastener or with 13 mm (1/2 inch) Type S pan-head screws.
    a. Space studs at 400 mm (16 Inches) and 600 mm (24 inches) OC as indicated or scheduled.
        1) Cementitious Backer Units (CBU): Space studs at maximum of 400 mm (16 inches) OC.
        2) Limiting Heights: Comply with ASTM C 754 for transverse load of 240 Pa (5 lb-force/SF) without exceeding either allowable stress or deflection of L/240. Comers and Intersections: Locate studs no more than 50 mm (2 inches) from abutting partitions, comers, etc.
    b. Openings: Locate studs not more than 50 mm (2 inches) from opening frames. Anchor studs to frame anchor clips by bolt or screw attachment. Install headers over openings as recommended by the manufacturer.
        1) Solid-Core Wood Doors and Hollow Metal Doors: Provide two full-height studs at jambs fastened together back to back.
        2) Fire-Rated Openings: Comply with GA 219.
31. Bracing: Provide diagonal bracing at head of studs that terminate above the ceiling level. Bracing shall consist of metal studs bent to V-shape and extending at 45 degrees from partition head to structure above. Locate bracing 1 200 mm (48 inches) maximum OC.
32. Wood Blocking or Metal Reinforcement:
    a. Wood Blocking: See Division 6 Section "Rough Carpentry."
    b. Install metal reinforcement of size required for support of toilet and bath accessories, hardware, cabinets, shelving, counters, and other wall-mounted items.
    c. Set true to line, level, or plumb well-secured in stud wall and flush with back of drywall or other wall finish.
    d. Coordinate exact locations with other sections.

Miscellaneous Framing And Furring

33. General: Provide necessary framing and furring for special framing at recesses, offsets, specialty Items, and at wall-mounted casework, shelving, and equipment.
34. Furring Channels: Install furring channels over back-up material. Position channels vertically at 600 mm (24 inches) OC. Use power-activated fasteners or stub nails at 600 mm (24 Inches) OC along alternating flanges. Shim channels level as required.
    a. Cementitious Backer Units (CBU): Space furring at maximum of 400 mm (16 inches) OC.

35. Resilient Furring Channels: Screw-attach In accordance with manufacturer's recommendations.
    a. Spacing: 600 mm (24 inches) OC for framing at 16 inches OC and 400 mm (16 inches) OC for framing at 24 Inches OC.

Ceiling Grillage Erection

36. Reference Standard: Erect steel framing In accordance with ASTM C 754.
37. Hangers: Install wire hangers spaced not over 1 200 mm (48 inches) OC in direction of 38 mm (1-1/2 inch) main runner channels and within 150 mm (6 inches) of ends of main runners or interruptions of ceiling continuity. Hang from structure above.
38. Runners: Place main runners not over 1 200 mm (48 inches) OC. Provide, position, and level hangers with hangers saddle-tied along runners. Space furring channels at 600 mm (24 inches) OC at right angles to runner channels and secure with furring channel clips.
39. Reinforcement: At light troffers or other openings, reinforce grillage with 19 mm (314 inch) cold-rolled channels wired atop and parallel to main runner channels.
    a. Provide lateral seismic bracing as required by code.
40. Special Shapes: Provide necessary framing and suspension for off sets, verticals, etc.

Insulation

41. Sound Insulation: Place sound Insulation blankets in partitions tight within spaces, around cut openings. behind and around electrical and mechanical items within partitions, and tight to items passing through partitions.
    a. Ductwork Penetrations: Provide one-inch wide clearance around ductwork and pack with fiberglass ready for joint sealers.

Installation Of Gypsum Drywall

42. Reference Standards: Apply and finish gypsum board in accordance with GA 216 and ASTM C 840.
43. Partition Gypsum Board Layout: Apply gypsum wallboard panels vertically with abutting ends and edges occurring over stud flanges or furring.
    a. Joints on Opposite Sides of Partitions: Stagger; joints shall not occur over same stud.
    b. Two Layer Construction: Stagger Joints between layers.
44. Ceiling Gypsum Board: Apply gypsum board of maximum practical length with long dimensions at right angles to furring channels. End and edge joints shall occur over furring channels with end joints staggered. Properly support gypsum board around cutouts and openings.
45. Fasteners: Apply board to studs or furring with drywall screws spaced 300 mm (12 inches) OC in field of board and 200 mm (8 inches) OC staggered along abutting edges.
46. Water-Resistant: Apply gypsum wallboard manufacturer's recommended sealant to raw cut edges and screw heads.
47. Cementitious Backer Units (CBU): Install in accordance with ANSI A108.11 and manufacturer's recommendations.
48. Accessories:
    a. Comer Bead: Apply as recommended by manufacturer at exposed outer corners.
    b. Trim (Casing Beads): Apply as recomrnended by manufacturer, where gypsum board abuts other materials, and as indicated.
    c. Control Joints: Comply with GA 216.
        1) Walls: Install at not more than 9 m (30 feet) OC.
        2) Ceilings: Install at not more than 15 m (50 feet) OC and where framing changes direction.
        3) Coordinate locations with the Owner.
49. Access Panels: Securely install access panels furnished under other sections. Set plumb and square to align with finish surface.

50. Acoustical Sealant: Seal perimeter and penetrations on both sides of sound-rated partitions and partitions with sound-attenuation blankets with minimum of single 6 mm (1/4 inch) bead of sealant
    a. Locations:
        1) Seal around gypsum-board perimeter in angle formed by gypsum-board panels and abutting dissimilar materials.
        2) Seal intersections of gypsum board with dissimilar materials.
        3) Seal pipe. conduit, ductwork, penetrations, etc.
        4) Seal around cutouts for lights, cabinets, pipes, ductwork, electrical boxes, etc.
        5) Seal gypsum board panel terminations in door and window frames.
        6) Seal control-joint locations before installing control Joints to panels.
    b. Installation: Comply with ASTM C 919 and requirements of indicated sound-rated assembly. Provide number and positions of beads to comply with sound rating of assembly.
51. Tolerances: Gypsum-board surface plane within plus or minus 3 mm in 3 000 mm (1/8 inch in 10 feet).
52. Finishing: Finish in accordance with GA 214.
    a. Concealed Locations (Not Exposed to View in Rooms): Level 1
    b. Beneath Tile: Level 2.
    c. Other Finished Areas: Level 4. Finish joints, trim, and fastener dimples. Sand smooth.
    d. Cementitious Backer Units (CBU): Treat joints in accordance with ANSI A108.11 and manufacturer's recommendations.

END OF SECTION 09 01 20 00

SECTION 09 01 20 91 - PLASTER RESTORATION

GENERAL

Description Of Work

1. This specification covers the furnishing and installation of materials for lath and plaster renovation. Products shall be as directed by the Owner. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.

Quality Assurance

2. Regulatory Requirements:
   a. Plaster Partitions: Listed and labeled for fire-protective ratings as indicated or scheduled.
   b. Plaster Floor/Ceilings and Roof/Ceiling Assemblies: Listed and labeled for fire-protective ratings as indicated or scheduled.
   c. Fire Rated Assemblies: Comply with UL 05, FM P8016, or GA 600 for required fire-rated assembly.

Submittals

3. Product Data: Submit in accordance with Detailed Scope of Work. Include each type of plaster material, metal lath. and lathing accessories to be installed.

Delivery, Storage, And Handling

4. General:
   a. Plastering Materials: Deliver in original unopened containers and store off ground and under cover.
   b. Metal Lath and Accessories: Protect from rusting during storage.
   c. Rusted or Water Damaged Materials: Subject to rejection before or after installation.

Project Conditions

5. Environmental Requirements: Comply with Detailed Scope of Work.
   a. Cold-Weather Protection: Do not apply plaster if ambient temperature is less than 4 degrees C (40 degrees F) or more than 26 degrees C (80 degrees F). Maintain this temperature range in all areas 7 days prior to application, during application, and for 7 days after plaster is set.
   b. Hot-Weather Protection: Protect plaster against uneven or excessive evaporation during dry, hot weather and from strong blasts of dry air, either natural or artificial.
   c. Ventilation: Ventilate building spaces as required to remove water in excess of that required for hydration of plaster. Begin ventilation immediately after plaster is applied and continue until it sets.
6. Existing Conditions: See Division 1 Section “Summary of Work”. Do not interfere with use of occupied buildings or portions of buildings. Maintain free and safe passage to and from occupied areas.
7. Protection: Protect grounds, plantings, buildings, and any other facilities or property from damage caused by construction operations.

Scheduling And Sequencing

8. Scheduling and Completion: Comply with Detailed Scope of Work.
   a. Sequence plaster application with installation and protection of other work so that neither will be damaged by installation of other.

PRODUCTS

Materials

9. Materials for Patching, Extending, and Matching:
    a. Provide same products or types of construction as existing structure, as needed to patch, extend, or match existing work.
        1) Generally, Contract Documents will not define products or standards of workmanship present in existing construction. Determine products by inspection and any necessary testing, and workmanship by use of existing as sample of comparison.
        2) Patching, extending, and matching of existing work and systems shall result in complete, finished system.
    b. Presence of product, finish, or type of construction, requires that patching, extending, or matching shall be performed as necessary to make work complete and consistent.
10. Partition Metals: ASTM C 645, galvanized steel:
    a. Interior Steel Studs: Minimum 0.46 mm (25 gage), provide sizes and gages to match existing, or as indicated.
        1) Provide minimum of 0.84 mm (20 gage) studs both sides of hollow metal frames.
    b. Steel Stud Runners: Match studs. Provide long leg runners for slip joint at structure above to allow for deflection.
    c. Furring Channels: Hat-shaped furring channels, minimum 0.46 mm (25 gage).
    d. Sheet Metal Reinforcement (Alternate to Wood Blocking): 1.52 mm (16 gage) minimum.
11. Suspended Ceiling Metals:
    a. Main Runners (Primary Members): ASTM C 754 cold-rolled steel channels with rust-inhibitive finish.
        1) 50 mm (2 inches) deep, 88 kg per 100 m (590 pounds per 1,000 LF).
        2) 38 mm (1-1/2 inch) deep, 70 kg per 100 m (475 pounds per 1,000 LF).
        3) 19 mm (3/4 inch) deep, 45 kg per 100 m (300 pounds per 1,000 LF).
    b. Cross Furring (Furring Channels): Hat-shaped galvanized steel furring channels, minimum 0.46 mm (25 gage).
    c. Wire for Hangers and Ties: ASTM A 641, Class 1 zinc coating, soft temper.
        1) Hanger Wire: Minimum 4.1 mm (8 gage).
        2) Tie Wire: 6 mm (16 gage).
12. Lath:
    a. Metal Lath: ASTM C 847, galvanized expanded metal.
        1) Weight: In compliance with ASTM C 841 for conditions and spacing of supports.
    b. Gypsum Lath: ASTM C 37, plain. Provide Type X at fire-rated assemblies.
        1) Thickness: As indicated or specified and in compliance with ASTM C 841 for conditions and spacing of supports.
13. Fasteners:
    a. Screws: ASTM C 1002, corrosion-resistant. Provide types as recommended by manufacturer for each application.
        1) To Metal Framing: Minimum 25 mm (1 inch), Type S.
        2) To Wood Framing: Minimum 32 mm (1-1/4 inch), Type W bugle head.
14. Accessories: ASTM C 841, galvanized steel.
    a. Comer Beads: Small nose with expanded flanges, unless otherwise indicated.
    b. Casing Beads: Square-edged style. with short or expanded flanges to suit kinds of plaster bases indicated.
    c. Control Joints: Prefabricated folded pair of non-perforated screeds in M-shaped configuration, with expanded or perforated flanges.
        1) Provide removable protective tape on plaster face of control joints.
    d. Cornerite: Galvanized expanded metal lath in accordance with ASTM C 841.
15. Gypsum Plaster Materials: ASTM C 28.
    a. Base Coat Plasters: One of following:
        1) Gypsum ready-mixed plaster with mill-mixed perlite aggregate.
        2) Gypsum wood-fibered plaster, ASTM C 28, Type N.
    b. Finish Coat Plasters: One of following:

1) Gypsum ready-mixed finished plaster, manufacturers standard mill-mixed gauged interior finish.
2) Gypsum Gauging Plaster: ASTM C 28, Type G.

c. Quicklime: ASTM C 5.
d. Sand: ASTM C 35.
e. Finishing Hydrated Limes: ASTM C 206, Type S, special hydrated lime for finishing purposes.
f. Bonding Compound for Gypsum Plaster: ASTM C 631.
g. Water: Clean and free from injurious amounts of oils, acids, alkalis, salts, organic materials, or substances that may be deleterious to plaster or metals in contact with plaster.

16. Sound-Isolation Materials:
    a. Sound Insulation: ASTM C 665, Type I (unfaced) mineral-fiber blankets, 12 to 16 kg per cu m (0.75 to 1 PCF), thickness as indicated or scheduled, or required by fire-rated assembly.
    b. Acoustical Sealant:
        1) Concealed: ASTM C 919 nondrying, non-hardening, non-skinning, non-bleeding, and non-staining.
        2) Exposed: ASTM C 919 non-oxidizing and skinning, permanently elastic, and paintable.
    c. Ductwork Penetrations Packing: Low-density fiberglass.
17. Gypsum Plaster Mixes: As recommended by manufacturer:
    a. Scratch Coat:
        1) Over Metal Lath: Gypsum wood-fibered plaster, neat or with job-mixed sand.
        2) Over Gypsum Lath: Gypsum neat plaster with job-mixed sand.
        3) Over Unit Masonry: Gypsum wood-fibered plaster, neat or with job-mixed sand.
    b. Brown Coat:
        1) Over Metal Lath: Gypsum wood-fibered plaster, with job-mixed sand.
        2) Over Gypsum Lath: Gypsum neat plaster with job-mixed sand.
        3) Over Unit Masonry: Gypsum wood-fibered plaster with job-mixed sand.
    c. Finish Coat: Proportion materials for finish coats to comply with ASTM C 842 for each type of finish coat and texture indicated.
        1) Gypsum Gauging Plaster 1 part plaster and 2 parts lime.
            a) Over lightweight aggregate base coats, add 15 L (1/2 cubic foot) of perlite fines or 23 kg (50 pounds) of No. 1 white silica sand per 45 kg (100 pounds) of plaster.
        2) Gypsum Ready-mixed Finish Plaster Neat.
    d. Mechanically mix cementitious and aggregate materials for plasters to comply with applicable referenced application standard and with recommendations of plaster manufacturer.

EXECUTION

Examination

18. Units, Spaces, and Areas to be renovated: Comply with Detailed Scope of Work.
    a. Verify that surfaces to receive rough carpentry are prepared to required grades and dimensions.

Preparation

19. Dust Protection: Comply with Detailed Scope of Work.
20. Building Occupation: Carry out demolition and renovation work to cause as little inconvenience to occupants as possible. See Detailed Scope of Work.
21. Protection: Comply with Detailed Scope of Work.
    a. Protection: Provide drapes and drop cloths necessary to protect walls, floors, ductwork and piping, electrical work, etc. during plastering operations.
22. Selective Demolition: Comply with Detailed Scope of Work.

23. Surface Preparation: Clean projections, dust, loose particles, grease, bond breakers, and foreign matter from surfaces to receive plaster.
    a. Do not apply plaster directly to surfaces (1) of masonry or concrete that have been coated with bituminous compound or other waterproofing agents, or (2) that have been painted or previously plastered.
    b. Before plaster work is started, wet masonry and concrete surfaces thoroughly with fine fog spray of clean water to produce uniformly moist surface.
    c. Do not apply plaster to surfaces containing frost.

Laying-Out Work

24. Discrepancies: Verify dimensions and elevations indicated in layout of existing work.
    a. Prior to commencing work, carefully compare and check Drawings (if any) for discrepancies in locations or elevations of work to be executed.
    b. Refer discrepancies among Drawings (if any), Specifications, and existing conditions to the Owner for adjustment before work affected is performed.
        1) Failure to make such notification shall place responsibility on Contractor to carry out work in satisfactory, workmanlike manner.
25. Contractor: Responsible for location and elevation of construction contemplated by Construction Documents.

Performance

26. Patching: Patch and extend existing work using skilled mechanics who are capable of matching existing quality of workmanship.
    a. Quality of Patched or Extended Work: Not less than specified for new work. If similar new work is not specified, equal to existing work.
27. Damaged Surfaces: Comply with Detailed Scope of Work.
28. Transitions from Existing to New Work: Comply with Detailed Scope of Work.
29. Isolation: Where lathing and metal support system abuts building structure horizontally and where partition/wall work abuts overhead structure, isolate work from structural movement sufficiently to prevent transfer of loads to work from building structure. Install slip or cushion-type joints to absorb deflections but maintain lateral support.
    a. Frame both sides of control and expansion joints independently, and do not bridge joints with furring and lathing or accessories.

Installation Of Suspended Steel Framing

30. General: Construct ceilings of lath and plaster on suspended steel framing system in accordance with manufacturer's recommendations and Reference Standards.
31. Hanger Installation: Attach hangers to structure above ceiling to comply with NAAMM ML/SFA 920.
32. Ceiling Suspension System Components: Install In sizes and at spacings indicated but not in smaller sizes or greater spacings than those required by ASTM C 841 and NAAMM ML/SFA 920.
    a. Wire Hangers: Space and install wire hangers In accordance with ASTM C 841 and within 150 mm (6 inches) of channel ends, unless closer spacing indicated or required for fire-resistance rated assembly.
    b. Main Runners (Primary Members): Space and install channels in accordance with ASTM C 841, unless closer spacing indicated or required for fire-resistance rated assembly.
    c. Cross Furring (Furring Channels): Space and install furring channels in accordance with ASTM C 841, unless closer spacing indicated or required for fire-resistance rated assembly.
33. Framing Around Openings: Frame channels and lath on suspended soffits and ceilings and at furring to receive electric lights, etc. as indicated or as necessary to complete work. Furnish and install in furring, plaster rings or access panels furnished under other sections.

Installation Of Steel Stud Partitions

34. General: Install steel stud partition support systems in accordance with manufacturer's recommendations and Reference Standards.
35. Steel Stud Systems: Comply with ASTM C 754.
    a. To Receive Metal Lath: Space studs in accordance with ASTM C 841 and NAAMM ML/SFA 920.
    b. To Receive Gypsum Lath: Space studs in accordance with ASTM C 841.
36. Extend partition support systems to finish ceilings and attach to ceiling suspension members, unless otherwise indicated.

Metal Furring

37. General: Install in accordance with ASTM C 841 and NAAMM ML/SFA 920.
    a. Install supplementary framing, blocking, and bracing at terminations in work and for support of fixtures, equipment services, heavy trim, grab bars, bath accessories, furnishings, and similar work to comply with manufacturer’s recommendations.
38. Metal Furring to Receive Gypsum Lath: Space furring channels in accordance with ASTM C 841.
39. Metal Furring Systems:
    a. To Receive Metal Lath: Space furring in accordance with ASTM C 841 and NAAMM ML/SFA 920.
    b. To Receive Gypsum Lath: Space furring in accordance with ASTM C 841.
40. Isolation: Where lathing and metal support system abuts building structure horizontally and where partition/wall work abuts overhead structure, isolate work from structural movement sufficiently to prevent transfer of loads to work from building structure. Install slip or cushion-type joints to absorb deflections but maintain lateral support.
    a. Frame both sides of control and expansion joints independently, and do not bridge joints with furring and lathing or accessories.

Installation Of Suspended Steel Framing

41. General: Construct ceilings of lath and plaster on suspended steel framing system in accordance with manufacturer’s recommendations and Reference Standards.
42. Hanger Installation: Attach hangers to structure above ceiling to comply with NAAMM ML/SFA 920.
43. Ceiling Suspension System Components: Install In sizes and at spacings indicated but not in smaller sizes or greater spacings than those required by ASTM C 841 and NAAMM ML/SFA 920.
    a. Wire Hangers: Space and install wire hangers in accordance with ASTM C 841 and within 150 mm (6 inches) of channel ends, unless closer spacing indicated or required for fire-resistance rated assembly.
    b. Main Runners (Primary Members): Space and install channels in accordance with ASTM C 841, unless closer spacing indicated or required for fire-resistance rated assembly.
    c. Cross Furring (Furring Channels): Space and install furring channels in accordance with ASTM C 841, unless closer spacing indicated or required for fire-resistance rated assembly.
44. Framing Around Openings: Frame channels and lath on suspended soffits and ceilings and at furring to receive electric lights, etc. as indicated or as necessary to complete work. Furnish and install in furring, plaster rings or access panels furnished under other sections.

Installation Of Steel Stud Partitions

45. General: Install steel stud partition support systems in accordance with manufacturer's recommendations and Reference Standards.
46. Steel Stud Systems: Comply with ASTM C 754.
    a. To Receive Metal Lath: Space studs in accordance with ASTM C 841 and NAAMM ML/SFA 920.
    b. To Receive Gypsum Lath: Space studs in accordance with ASTM C 841.
47. Extend partition support systems to finish ceilings and attach to ceiling suspension members, unless otherwise indicated.

Metal Furring

48. General: Install in accordance with ASTM C 841 and NAAMM ML/SFA 920.
    a. Install supplementary framing, blocking, and bracing at terminations in work and for support of fixtures, equipment services, heavy trim, grab bars, bath accessories, furnishings, and similar work to comply with manufacturer's recommendations.
49. Metal Furring to Receive Gypsum Lath: Space furring channels in accordance with ASTM C 841.
50. Metal Furring Systems:
    a. To Receive Metal Lath: Space furring in accordance with ASTM C 841 and NAAMM ML/SFA 920.
    b. To Receive Gypsum Lath: Space furring in accordance with ASTM C 841.

Lathing

51. Metal Lathing: Install in accordance with ASTM C 841 and NAAMM ML/SFA 920.
    a. At Metal Framing: Attach metal lath to furring channels with long dimension of sheet at right angles to furring channels with gage wire ties spaced not over 150 mm (6 inches) apart.
    b. At Wood Framing: Nail metal lath to wood framing with long dimension of sheet at right angles to framing member.
    c. Place ties where sides of sheets laps at supports and at side laps of sheets between supports. Lap metal lath not less than 13 mm (112 inch) at sides of sheets and 25 mm (1 inch) at ends of sheets.
    d. Suspended and Furred Ceilings: Use 1.8 kg/sq m (3.4 pounds/SY) minimum weight diamond mesh lath.
    e. Ceramic Tile Setting Beds: Use 1.8 kg/sq m (3.4 pounds/SY) minimum weight diamond mesh lath.
52. Gypsum Lath: Install in accordance with ASTM C 841.
    a. Wood Framing and Furrlng: Install lath as follows:
        1) With screws to comply with lath manufacturer's directions.
        2) With nails.
        3) Provide floating angle construction.
    b. Suspended and Furred Ceilings: Install lath to furring members with clips.
    c. Vertical Metal Framing and Furring: Install lath as follows:
        1) With screws.
        2) With clips, supplemented by screws where required by lath manufacturer.
        3) Where sound-rated partitions are indicated, attach lath with resilient clips.

Installation Of Accessories

53. Accessories: Install as required to repair area of work to match existing. Install in accordance with ASTM C 841. Miter or cope accessories at comers; Install with tight joints and in alignment. Attach accessories securely to plaster bases to hold accessories In place and alignment during plastering.
54. Interior Corners: Apply cornerite.
55. Corner Beads: Install corner beads tightly secured to lath at exposed exterior corners.
56. Casing Beads: Install at terminations of plaster work, except where plaster passes behind and is concealed by other work and where metal screeds, bases, or metal frames act as casing beads.
57. Control Joints: Install at locations indicated or, if not indicated, at spacings and locations required by Reference Standards. Coordinate specific locations with the Owner.
58. Access Panels: Provide access panels as required for maintenance of concealed plumbing work in coordination with Division 15 Section "Plumbing." Tiled Areas: Coordinate with Division 9 Section "Ceramic Tile."
59. Sound-Rated Plaster Work: Where sound-rated plaster work is indicated by STC ratings or other notation:
    a. Acoustical Sealant: Seal work at perimeters, control joints, openings, and penetrations with continuous bead of acoustical sealant. Comply with ASTM C 919 and plastering manufacturer's recommendations for location of sealant beads.

b. Sound Insulation: Install insulation blankets within stud cavities of sound-rated partition assemblies where incated.

Plastering

60. Plastering: Comply with ASTM C 842 in thickness to match existing.
    a. Preparation: Remove loose, fractured, or separated plaster to face of substrate. repairing lath at substrate to ensure repair area bounded by solid and sound existing plaster construction.
        1) Prepare monolithic surfaces for bonded base coats and use bonding compound to comply with Reference Standards for conditioning of monolithic surfaces.
    b. Grout hollow metal frames, bases, and similar work with base-mat plaster material, and prior to lathing where necessary. Except where full grouting is indicated or required for fire-resistance rating, grout at least 150 mm (6 inches) at each jamb anchor dip.
    c. Plaster flush with metal frames and other built-in metal items or accessories that act as plaster ground, unless otherwise indicated. Where plaster is not terminated at metal by casing beads, cut base coat free from metal before plaster sets and groove finish coat at junctures with metal.
61. Preparation: Check metal grounds, comer beads, screeds, and other accessories carefully for alignment before starting plaster application. Check expansion and control joints and supporting metal structures to ensure that expansion and control joints can move unrestrained.
62. Plaster: Apply In accordance with ASTM C 842 in thickness to match existing:
    a. Use three-coat work over following plaster bases:
        1) Metal lath.
        2) Gypsum lath attached to ceiling supports by clips.
        3) Gypsum lath attached to ceiling supports spaced over 400 mm (16 inches) OC.
        4) Gypsum lath, 9.5 mm (3/8 inch) thick, with separate vapor retarder behind.
    b. Use two-coat work over following bases.
        1) Gypsum lath except for installations requiring three-coat work.
        2) Unit masonry.
        3) Concrete, cast-in-place or precast when surface condition complies with ASTM C 842 for plaster bonded to solid base.
    c. First Coat: Apply first coat of plaster with such force to secure good key.
    d. Finish Coats: Apply troweled finish coats unless otherwise indicated.
63. Workmanship: Perform work true to line, straight, and plumb.
    a. Finished Surfaces: Free from waves, dents, bumps, cracks, pits. checks, streaks, catfaces, blisters, or other defects. Cutout and property replace defective areas.
    b. Execute work to avoid any irregularity occurring at point or place where one section is joined to another.
    c. Arises and Angles: True and sharp.
64. Tolerances: Plaster surface plane within plus/minus 3 mm in 3 000 mm (1/8 inch in 10 feet).

Integrating Existing Work

65. Protection: Comply with Detailed Scope of Work.

Adjustments

66. Partition Removal: Comply with Detailed Scope of Work.

Dust Control

67. Dust: Comply with Detailed Scope of Work.

Patching And Cleaning

68. Cutting and Patching: Do necessary cutting, patching, and repairing and pointing up of plastering after other work is in place to restore defective areas. Repair or replace work to eliminate blisters, buckles, excessive crazing and check-cracking, dry outs, efflorescence, sweat-outs, and similar defects and where bond to substrate has failed.
    a. Sand smooth-troweled finishes lightly to remove trowel marks and arises.

69. Cleaning: As rapidly as plastering is completed in each space, clean up rubbish, utensils, and surplus material, sweep floor and leave in neat condition for work of others.
    a. When general plastering is concluded, remove plastering rubbish, equipment, and surplus materials from premises.
    b. Clean surfaces splattered with plaster.

END OF SECTION 09 01 20 91

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 01 30 91 - CERAMIC TILING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Quarry tiles.
2. Pressed floor tiles.
3. Porcelain tiles.
4. Ceramic mosaic tiles.
5. Glazed wall tiles.
6. Thresholds.
7. Tile backing panels.
8. Waterproof membranes.
9. Crack isolation membranes.
10. Setting materials.
11. Grout materials.
12. Metal flooring transitions.
13. Metal edge trim.

B. Related Requirements:

1. [**Section 071326 "Self-Adhering Sheet Waterproofing"**][**Section 071353 "Elastomeric Sheet Waterproofing"**][**Section 071354 "Thermoplastic Sheet Waterproofing"**][**Section 071413 "Hot Fluid-Applied Rubberized Asphalt Waterproofing"**][**Section 071416 "Cold Fluid-Applied Waterproofing"**] for waterproofing under thickset mortar beds.
2. Section 079200 "Joint Sealants" for sealing of movement joints in tile surfaces.
3. Section 092400 "Cement Plastering" for scratch coat for thickset mortar setting-bed installations.
4. Section 092613 "Gypsum Veneer Plastering" for cementitious backer units.
5. Section 092900 "Gypsum Board" for tile backing panels.
6. Section 093023 "Glass Tiling."
7. Section 093033 "Stone Tiling."
8. Section 096340 "Stone Flooring" for stone thresholds.

1.2 DEFINITIONS

A. General: Definitions in ANSI A108 series of tile installation standards and in ANSI A137.1 apply to Work of this Section unless otherwise specified.

B. Face Size: Actual tile size, excluding spacer lugs.

C. Large Format Tile: Tile with at least one edge **15 inches (381 mm)** or longer.

D. Module Size: Actual tile size plus joint width indicated.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference [**at Project site**][**by web conference**]<**Insert**

location> .

1. Review requirements in ANSI A108.01 for substrates and for preparation by other trades.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

B. Shop Drawings: Show locations, plans, and elevations, of each type of tile and tile pattern. Show widths, details, and locations of movement joints in tile substrates and finished tile surfaces. [**Show thresholds.**]

C. Samples for Initial Selection: For tile, grout, and accessories involving color selection or shade variation.

D. Samples for Verification:

1. Full-size units of each type and composition of tile and for each color and finish required. [**For ceramic mosaic tile in color blend patterns, provide full sheets of each color blend.**][**For tile with aesthetic classification V3 or V4, provide 12 tiles from same production run.**]
2. Assembled samples mounted on a rigid panel, with grouted joints, for each type and composition of tile and for each color and finish required. Make samples at least [**12 inches (300 mm) square**][**36 inches (900 mm) square**]<**Insert size**> , but not fewer than four tiles. Use grout of type and in color or colors approved for completed Work.
3. Full-size units of each type of trim and accessory [**for each color and finish required**] .
4. Stone thresholds in **6-inch (152-mm)** lengths.
5. Metal flooring transitions **6-inch (152-mm)** lengths.

E. Sustainable Design Submittals:

1. Environmental Product Declaration (EPD): For each product.
2. Health Product Declaration (HPD): For each product.
3. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
4. Environmental Product Declaration (EPD): For each product.
5. Health Product Declaration (HPD): For each product.
6. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
7. Environmental Product Declaration (EPD): For each product.
8. Environmental Product Declaration (EPD): For each product.
9. Environmental Product Declaration (EPD): For each product.
10. Third-Party Certifications: For each product.
11. Third-Party-Certified Life-Cycle Assessment: For each product.
12. Product Data: For adhesives, indicating VOC content.
13. Laboratory Test Reports: For sealers, indicating compliance with requirements for low-emitting materials.

1.5 INFORMATIONAL SUBMITTALS

A. Master Grade Certificates: For each shipment, type, and composition of tile, signed by tile manufacturer and Installer.

B. Product Certificates: For each type of product, including product use classification.

C. Product Test Reports:

1. Tile-setting and -grouting products.
2. Certified porcelain tile.

D. Slip-Resistance Test Reports: For each type of floor tile, from a qualified independent testing agency.

E. Field Quality Control Reports: Water test reports of membrane in wet areas.

F. Qualification Statements: For Installer.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials, from the same production run, to Owner that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Tile and Trim Units: Furnish quantity of full-size units equal to [**3**][**5**]<**Insert number**> percent of amount installed for each type, composition, color, pattern, and size specified.
2. Grout: Furnish quantity of grout equal to 3 percent of amount installed for each type, composition, and color indicated for Project.

1.7 QUALITY ASSURANCE

A. Installer Qualifications:

1. Installer is [**a Five-Star member of the National Tile Contractors Association**][**or**][**a Trowel of Excellence member of the Tile Contractors' Association of America**] .
2. Installer's supervisor for Project holds the International Masonry Institute's Supervisor Certification.
3. Installer employs only [**Ceramic Tile Education Foundation Certified Installers**][**or**][**installers recognized by the U.S. Department of Labor as Journeyman Tile Layers**] for Project.
4. Installer employs at least one installer for Project that has completed the Advanced Certification for Tile Installers (ACT) certification for installation of [**mud floors**][**mud walls**][**membranes**][**shower receptors**][**and**][**large format tile**] .

1.8 MOCKUPS

A. Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.

1. Build mockup of [**each type of**] floor tile installation.
2. Build mockup of [**each type of**] wall tile installation.
3. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
4. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Deliver and store packaged materials in original containers with seals unbroken and labels intact until time of use. Comply with requirements in ANSI A137.1 for labeling tile packages.

B. Store tile and cementitious materials on elevated platforms, under cover, and in a dry location.

C. Store aggregates where grading and other required characteristics can be maintained and contamination can be avoided.

D. Store liquid materials in unopened containers and protected from freezing.

1.10 FIELD CONDITIONS

A. Environmental Limitations: Do not install tile until construction in spaces is complete and ambient temperature and humidity conditions are maintained at the levels indicated in referenced standards and manufacturer's written instructions.

1.11 WARRANTY

A. System Warranty: Manufacturer's non-prorated comprehensive warranty that agrees to repair and replace defective installation areas, material, and labor that fail under normal usage within specified warranty period.

1. Warranty Period: [**Five years**][**10 years**][**25 years**][**Lifetime**] from date of Product Purchase.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Tile: Obtain [**tile of each type and color or finish**][**tile of each type**][**tile of each color or finish**][**tile**] from single source or producer.

1. Obtain tile of each type and color or finish from same production run and of consistent quality in appearance and physical properties for each contiguous area.

B. Tiling System: Obtain system products from single manufacturer and each aggregate from single source or producer.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ARDEX Americas**]
b. [**Custom Building Products**]
c. [**Laticrete International, Inc.**]
d. [**MAPEI Corporation**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]

b. [**Custom Building Products**]
c. [**Laticrete International, Inc.**]
d. [**MAPEI Corporation**]
e. <**Insert manufacturer's name**>

3. Obtain setting and grouting materials, except for unmodified portland cement and aggregate, from single manufacturer.
4. Obtain underlayment from manufacturer of setting and grouting materials.
5. Obtain waterproof membrane, crack isolation, and other required membranes from manufacturer of setting and grouting materials.
6. Obtain joint sealants from manufacturer of setting and grouting materials.

C. Accessory Products: Obtain each of the following products specified in this Section from a single manufacturer:

1. Stone thresholds.
2. Backer units.

2.2 CERAMIC TILE SYSTEM, GENERAL

A. ANSI Ceramic Tile Standard: Provide tile that complies with ANSI A137.1 for types, compositions, and other characteristics indicated.

1. Provide tile complying with Standard Grade requirements [**unless otherwise indicated**] .

B. ANSI Standards for Tile Installation Materials: Provide materials complying with ANSI A108.02, ANSI standards referenced in other Part 2 articles, ANSI standards referenced by TCNA installation methods specified in tile installation schedules, and other requirements specified.

C. Factory Blending: For tile exhibiting color variations within ranges, blend tile in factory and package so tile units taken from one package show same range in colors as those taken from other packages and match approved Samples.

D. Mounting: For factory-mounted tile, provide back- or edge-mounted tile assemblies as standard with manufacturer unless otherwise indicated.

1. Where tile is indicated for installation [**in swimming pools**][**on exteriors**][**or**][**in wet areas**] , do not use back- or edge-mounted tile assemblies unless tile manufacturer specifies in writing that this type of mounting is suitable for installation indicated and has a record of successful in-service performance.

E. Factory-Applied Temporary Protective Coating: Where indicated under tile type, protect exposed surfaces of tile against adherence of mortar and grout by precoating with continuous film of petroleum paraffin wax, applied hot. Do not coat unexposed tile surfaces.

2.3 QUARRY TILES

A. Quarry Tile :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Olean; a brand of Dal-Tile Corporation**]
b. [**Daltile; a brand of Dal-Tile Corporation**]
c. [**Elgin Butler Company**]
d. [**Florida Tile, Inc.**]
e. [**Interceramic**]
f. [**Metropolitan Ceramics**]
g. [**Quarry Tile Company.**]
h. [**Summitville Tiles, Inc.**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Olean; a brand of Dal-Tile Corporation**]
b. [**Daltile; a brand of Dal-Tile Corporation**]
c. [**Elgin Butler Company**]
d. [**Florida Tile, Inc.**]
e. [**Interceramic**]
f. [**Metropolitan Ceramics**]
g. [**Quarry Tile Company.**]
h. [**Summitville Tiles, Inc.**]
i. <**Insert manufacturer's name**>

3. Type: [**Unglazed**][**Glazed**][**Chemical resistant**] .
4. Face Size: [**3 by 3 inches (76 by 76 mm)**][**4 by 4 inches (102 by 102 mm)**][**6 by 3 inches (152 by 76 mm)**][**6 by 6 inches (152 by 152 mm)**][**8 by 3-7/8 inches (200 by 98 mm)**][**8 by 8 inches (200 by 200 mm)**]<**Insert dimensions**> .
5. Thickness: [**3/8 inch (9.5 mm)**][**1/2 inch (12.7 mm)**][**3/4 inch (19 mm)**] .
6. Wearing Surface: [**Nonabrasive, smooth**][**Abrasive aggregate embedded in surface**]<**Insert description**> .
7. Product Use Classification: [**Interior, Dry (ID)**][**Interior, Wet (IW)**][**Interior, Wet Plus (IW+)**][**Exterior, Wet (EW)**][**Oil/Greases (O/G)**] .
8. Physical Properties: Chemical resistant when tested with indicated chemicals in accordance with ASTM C650.

a. Chemical Reagent: <**Insert chemical reagent**> .

9. Tile Color and Pattern: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color and pattern**> .
10. Grout Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color**> .
11. Precoat with temporary protective coating.
12. Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable [**and matching characteristics of adjoining flat tile**] . Provide shapes as follows, selected from manufacturer's standard shapes:

a. Base: Coved [**with surface bullnose top edge**] , face size [**6 by 6 inches (152 by 152 mm)**][**8 by 3-7/8 inches (200 by 98 mm)**]<**Insert dimensions**> .
b. Wainscot Cap: Surface bullnose, face size [**6 by 6 inches (152 by 152 mm)**][**8 by 3-7/8 inches (200 by 98 mm)**]<**Insert dimensions**> .
c. Wainscot Cap for Flush Conditions: Regular flat tile for conditions where tile wainscot is shown flush with wall surface above it, same size as adjoining flat tile.

2.4 PRESSED FLOOR TILES

A. Pressed Floor Tile :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Olean; a brand of Dal-Tile Corporation**]
   b. [**Daltile; a brand of Dal-Tile Corporation**]
   c. [**Florim USA**]
   d. [**Interceramic**]
   e. [**Marazzi USA; a brand of Dal-Tile Corporation**]
   f. [**Vitromex USA, Inc.**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Olean; a brand of Dal-Tile Corporation**]
   b. [**Daltile; a brand of Dal-Tile Corporation**]
   c. [**Florim USA**]
   d. [**Interceramic**]
   e. [**Marazzi USA; a brand of Dal-Tile Corporation**]
   f. [**Vitromex USA, Inc.**]
   g. <**Insert manufacturer's name**>

3. Type: [**Unglazed**][**Glazed**][**Chemical resistant**] .
4. Face Size: [**3 by 3 inches (76 by 76 mm)**][**4 by 4 inches (102 by 102 mm)**][**6 by 6 inches (152 by 152 mm)**][**7-3/4 by 3-7/8 inches (197 by 98 mm)**][**7-7/8 by 7-7/8 inches (200 by 200 mm)**][**11-13/16 by 11-13/16 inches (300 by 300 mm)**]<**Insert dimensions**> .
5. Face Size Variation: [**Calibrated or rectified**][**Rectified**] .
6. Thickness: [**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**][**1/2 inch (12.7 mm)**] .
7. Product Use Classification: [**Interior, Dry (ID)**][**Interior, Wet (IW)**][**Interior, Wet Plus (IW+)**][**Exterior, Wet (EW)**][**Oil/Greases (O/G)**] .
8. Physical Properties: Chemical resistant when tested with indicated chemicals in accordance with ASTM C650.

   a. Chemical Reagent: <**Insert chemical reagent**> .

9. Tile Color and Pattern: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color and pattern**> .
10. Grout Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color**> .
11. Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable [**and matching characteristics of adjoining flat tile**] . Provide shapes as follows, selected from manufacturer's standard shapes:

    a. Base: Coved, module size [**same as adjoining flat tile**]<**Insert size**> .
    b. Base Cap for Portland Cement Mortar Installations: Bead (bullnose), module size [**same as adjoining flat tile**]<**Insert size**> .
    c. Base Cap for Thinset Mortar Installations: Surface bullnose, module size [**same as adjoining flat tile**]<**Insert size**> .

d. Wainscot Cap for Portland Cement Mortar Installations: Bead (bullnose), module size [**same as adjoining flat tile**]<**Insert size**> .
e. Wainscot Cap for Thinset Mortar Installations: Surface bullnose, module size [**same as adjoining flat tile**]<**Insert size**> .
f. Wainscot Cap for Flush Conditions: Regular flat tile for conditions where tile wainscot is shown flush with wall surface above it; same size as adjoining flat tile.
g. External Corners for Portland Cement Mortar Installations: Bead (bullnose), module size [**same as adjoining flat tile**]<**Insert size**> .
h. External Corners for Thinset Mortar Installations: Surface bullnose, module size [**same as adjoining flat tile**]<**Insert size**> .
i. Internal Corners:

1) Coved, module size [**same as adjoining flat tile**]<**Insert size**> .
2) Field-butted square corners. For coved base and cap, use angle pieces designed to fit with stretcher shapes.

j. Tapered Transition Tile: Shape designed to effect transition between thickness of tile floor and adjoining floor finishes of different thickness, tapered to provide reduction in thickness from **1/2 to 1/4 inch (12.7 to 6.4 mm)** across nominal **4-inch (102-mm)** dimension.

2.5 PORCELAIN TILES

A. Porcelain Tile :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Olean; a brand of Dal-Tile Corporation**]
b. [**Crossville, Inc.**]
c. [**Daltile; a brand of Dal-Tile Corporation**]
d. [**Florida Tile, Inc.**]
e. [**Florim USA**]
f. [**Interceramic**]
g. [**Iris Ceramics U.S., a division of Stonepeak Ceramics, Inc.**]
h. [**Marazzi USA; a brand of Dal-Tile Corporation**]
i. [**Portobello America, Inc.**]
j. [**Vitromex USA, Inc.**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Olean; a brand of Dal-Tile Corporation**]
b. [**Crossville, Inc.**]
c. [**Daltile; a brand of Dal-Tile Corporation**]
d. [**Florida Tile, Inc.**]
e. [**Florim USA**]
f. [**Interceramic**]
g. [**Iris Ceramics U.S., a division of Stonepeak Ceramics, Inc.**]
h. [**Marazzi USA; a brand of Dal-Tile Corporation**]
i. [**Portobello America, Inc.**]

j. [**Vitromex USA, Inc.**]
k. <**Insert manufacturer's name**>

3. Type: [**Unglazed**][**Glazed**][**Chemical resistant**] .
4. Certification: Tile certified by the Porcelain Tile Certification Agency.
5. Face Size: [**3 by 3 inches (76 by 76 mm)**][**4 by 4 inches (102 by 102 mm)**][**6 by 6 inches (152 by 152 mm)**][**7-3/4 by 3-7/8 inches (197 by 98 mm)**][**7-7/8 by 7-7/8 inches (200 by 200 mm)**][**11-13/16 by 11-13/16 inches (300 by 300 mm)**]<**Insert dimensions**> .
6. Face Size Variation: Rectified.
7. Thickness: [**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**][**1/2 inch (12.7 mm)**] .
8. Product Use Classification: [**Interior, Dry (ID)**][**Interior, Wet (IW)**][**Interior, Wet Plus (IW+)**][**Exterior, Wet (EW)**][**Oil/Greases (O/G)**] .
9. Physical Properties: Chemical resistant when tested with indicated chemicals in accordance with ASTM C650.

   a. Chemical Reagent: <**Insert chemical reagent**> .

10. Tile Color, Glaze, and Pattern: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color, glaze, and pattern**> .
11. Grout Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color**> .
12. Precoat with temporary protective coating.
13. Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable [**and matching characteristics of adjoining flat tile**] . Provide shapes as follows, selected from manufacturer's standard shapes:

    a. Base Cap: Surface bullnose, module size [**same as adjoining flat tile**]<**Insert size**> .
    b. Wainscot Cap: Surface bullnose, module size [**same as adjoining flat tile**]<**Insert size**> .
    c. Wainscot Cap for Flush Conditions: Regular flat tile for conditions where tile wainscot is shown flush with wall surface above it; same size as adjoining flat tile.
    d. External Corners: Surface bullnose, module size [**same as adjoining flat tile**]<**Insert size**> .
    e. Internal Corners: Field-butted square corners.
    f. Tapered Transition Tile: Shape designed to effect transition between thickness of tile floor and adjoining floor finishes of different thickness, tapered to provide reduction in thickness from **1/2 to 1/4 inch (12.7 to 6.4 mm)** across nominal **4-inch (102-mm)** dimension.

2.6 CERAMIC MOSAIC TILES

A. Ceramic Mosaic Tile :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Olean; a brand of Dal-Tile Corporation**]
   b. [**Crossville, Inc.**]
   c. [**Daltile; a brand of Dal-Tile Corporation**]
   d. [**Jeffrey Court Inc.**]
   e. [**Marazzi USA; a brand of Dal-Tile Corporation**]
   f. [**Portobello America, Inc.**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Olean; a brand of Dal-Tile Corporation**]
    b. [**Crossville, Inc.**]
    c. [**Daltile; a brand of Dal-Tile Corporation**]
    d. [**Jeffrey Court Inc.**]
    e. [**Marazzi USA; a brand of Dal-Tile Corporation**]
    f. [**Portobello America, Inc.**]
    g. <**Insert manufacturer's name**>

3. Type: [**Unglazed**][**Glazed**][**Chemical resistant**] .
4. Certification: Porcelain tile certified by the Porcelain Tile Certification Agency.
5. Module Face Size: [**1 by 1 inch (25.4 by 25.4 mm)**][**1 by 2 inches (25.4 by 50.8 mm)**][**2 by 2 inches (50.8 by 50.8 mm)**]<**Insert dimensions**> .
6. Thickness: **1/4 inch (6.4 mm)**.
7. Face: [**Plain**][**Pattern of design indicated,**] with cushion edges.
8. Surface: [**Smooth, without**][**Slip resistant, with**] abrasive admixture.
9. Product Use Classification: [**Interior, Dry (ID)**][**Interior, Wet (IW)**][**Interior, Wet Plus (IW+)**][**Exterior, Wet (EW)**][**Oil/Greases (O/G)**] .
10. Physical Properties: Chemical resistant when tested with indicated chemicals in accordance with ASTM C650.

    a. Chemical Reagent: <**Insert chemical reagent**> .

11. Tile Color and Pattern: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color and pattern**> .
12. Grout Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color**> .
13. Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable [**and matching characteristics of adjoining flat tile**] . Provide shapes as follows, selected from manufacturer's standard shapes:

    a. Base: Coved, module size [**1 by 1 inch (25.4 by 25.4 mm)**][**2 by 1 inch (50.8 by 25.4 mm)**]<**Insert dimensions**> .
    b. Base Cap for Portland Cement Mortar Installations: Bead (bullnose), module size [**1 by 1 inch (25.4 by 25.4 mm)**][**2 by 1 inch (50.8 by 25.4 mm)**]<**Insert dimensions**> .
    c. Base Cap for Thinset Mortar Installations: Surface bullnose, module size [**1 by 1 inch (25.4 by 25.4 mm)**][**2 by 1 inch (50.8 by 25.4 mm)**][**2 by 2 inches (50.8 by 50.8 mm)**]<**Insert dimensions**> .
    d. Wainscot Cap for Portland Cement Mortar Installations: Bead (bullnose), module size [**1 by 1 inch (25.4 by 25.4 mm)**][**2 by 1 inch (50.8 by 25.4 mm)**]<**Insert dimensions**> .
    e. Wainscot Cap for Thinset Mortar Installations: Surface bullnose, module size [**1 by 1 inch (25.4 by 25.4 mm)**][**2 by 1 inch (50.8 by 25.4 mm)**][**2 by 2 inches (50.8 by 50.8 mm)**]<**Insert dimensions**> .
    f. Wainscot Cap for Flush Conditions: Regular flat tile for conditions where tile wainscot is shown flush with wall surface above it; same size as adjoining flat tile.
    g. External Corners for Portland Cement Mortar Installations: Bead (bullnose), module size [**1 by 1 inch (25.4 by 25.4 mm)**][**2 by 1 inch (50.8 by 25.4 mm)**]<**Insert dimensions**> .
    h. External Corners for Thinset Mortar Installations: Surface bullnose, module size [**1 by 1 inch (25.4 by 25.4 mm)**][**2 by 1 inch (50.8 by 25.4 mm)**][**2 by 2 inches (50.8 by 50.8 mm)**]<**Insert dimensions**> .
    i. Internal Corners:

1) Coved: Module size [1 by 1 inch (25.4 by 25.4 mm)][2 by 1 inch (50.8 by 25.4 mm)]<**Insert dimensions**> .
2) Field-butted square corners. For coved base and cap, use angle pieces designed to fit with stretcher shapes.

j. Tapered Transition Tile: Shape designed to effect transition between thickness of tile floor and adjoining floor finishes of different thickness, tapered to provide reduction in thickness from 1/2 to 1/4 inch (12.7 to 6.4 mm) across nominal 4-inch (102-mm) dimension.

2.7 GLAZED WALL TILES

A. Glazed Wall Tile :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Olean; a brand of Dal-Tile Corporation**]
   b. [**Crossville, Inc.**]
   c. [**Daltile; a brand of Dal-Tile Corporation**]
   d. [**Interceramic**]
   e. [**Jeffrey Court Inc.**]
   f. [**Marazzi USA; a brand of Dal-Tile Corporation**]
   g. [**Vitromex USA, Inc.**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Olean; a brand of Dal-Tile Corporation**]
   b. [**Crossville, Inc.**]
   c. [**Daltile; a brand of Dal-Tile Corporation**]
   d. [**Interceramic**]
   e. [**Jeffrey Court Inc.**]
   f. [**Marazzi USA; a brand of Dal-Tile Corporation**]
   g. [**Vitromex USA, Inc.**]
   h. <**Insert manufacturer's name**>

3. Module Face Size: [4-1/4 by 4-1/4 inches (108 by 108 mm)][6 by 4-1/4 inches (152 by 108 mm)][6 by 6 inches (152 by 152 mm)]<**Insert dimensions**> .
4. Face Size Variation: Rectified.
5. Thickness: 5/16 inch (8 mm).
6. Tile Color and Pattern: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color and pattern**> .
7. Grout Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color**> .
8. Mounting: [**Loose tiles**][**Factory, back mounted**][**Pregrouted sheets of tile, factory assembled and grouted with manufacturer's standard white silicone rubber**] .
9. Trim Units: Coordinated with sizes and coursing of adjoining flat tile where applicable [**and matching characteristics of adjoining flat tile**] . Provide shapes as follows, selected from manufacturer's standard shapes:

a. Base for Portland Cement Mortar Installations: Coved, module size [**4-1/4 by 4-1/4 inches (108 by 108 mm)**][**6 by 6 inches (152 by 152 mm)**][**6 by 3-3/4 inches (152 by 95 mm)**]<**Insert dimensions**> .
b. Base for Thinset Mortar Installations: Straight, module size [**4-1/4 by 4-1/4 inches (108 by 108 mm)**][**6 by 6 inches (152 by 152 mm)**][**6 by 2 inches (152 by 50.8 mm)**]<**Insert dimensions**> .
c. Wainscot Cap for Portland Cement Mortar Installations: Bullnose cap, module size [**4-1/4 by 4-1/4 inches (108 by 108 mm)**][**6 by 6 inches (152 by 152 mm)**][**6 by 2 inches (152 by 50.8 mm)**]<**Insert dimensions**> .
d. Wainscot Cap for Thinset Mortar Installations: Surface bullnose, module size [**4-1/4 by 4-1/4 inches (108 by 108 mm)**][**6 by 6 inches (152 by 152 mm)**][**6 by 2 inches (152 by 50.8 mm)**]<**Insert dimensions**> .
e. Wainscot Cap for Flush Conditions: Regular flat tile for conditions where tile wainscot is shown flush with wall surface above it; same size as adjoining flat tile.
f. External Corners for Portland Cement Mortar Installations: Bullnose shape with radius of at least **3/4 inch (19 mm)** unless otherwise indicated.
g. External Corners for Thinset Mortar Installations: Surface bullnose; same size as adjoining flat tile.
h. Internal Corners: Field-butted square corners. For coved base and cap, use angle pieces designed to fit with stretcher shapes.

B. Accessories: Provide vitreous china accessories of type and size indicated; suitable for installing by same method as used for adjoining wall tile.

1. One soap holder [**with grab handle**] for each shower and tub indicated.
2. One paper holder at each water closet.
3. Color and Finish: [**Match adjoining glazed wall tile**][**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**][**White, bright glaze**]<**Insert color and finish**> .

2.8 THRESHOLDS

A. General: Fabricate to sizes and profiles indicated or required to provide transition between adjacent floor finishes.

1. Profile: Bevel edges at 1:2 slope, with lower edge of bevel aligned with or up to **1/16 inch (1.5 mm)** above adjacent floor surface. Finish bevel to match top surface of threshold. Limit height of threshold to **1/2 inch (12.7 mm)** or less above adjacent floor surface.

B. Granite Thresholds: ASTM C615/C615M.

1. Finish: [**Polished**][**Honed**]<**Insert finish**> .
2. Description:

a. Uniform, [**fine**][**medium**] -grained, [**white**][**gray**][**black**]<**Insert color**> stone without veining.
b. Match Architect's sample.
c. <**Insert name of variety**> provided by <**Insert producer, distributor, or importer**> .

C. Marble Thresholds: ASTM C503/C503M.

1. Finish: Honed.
2. Minimum Abrasion Resistance: [**10**][**12**] in accordance with ASTM C1353/C1353M or ASTM C241/C241M.

3. Description:

    a. Uniform, fine- to medium-grained white stone with gray veining.
    b. Match Architect's sample.
    c. <**Insert name of variety**> provided by <**Insert producer, distributor, or importer**> .

D. Slate Thresholds: ASTM C629/C629M, with fine, even grain.

1. Finish: Honed.
2. Classification: [**I Exterior**][**II Interior**] .
3. Description:

    a. Uniform, [**black**][**blue-black**][**gray**][**blue-gray**][**green**]<**Insert color**> stone [**and unfading**] .
    b. Match Architect's sample.
    c. <**Insert name of variety**> provided by <**Insert producer, distributor, or importer**> .

E. Solid-Surface Thresholds: Homogeneous-filled plastic resin complying with ISFA-02-01.

1. Type: Provide [**Standard**][**Special Purpose**] type.
2. Colors and Patterns: [**As indicated by manufacturer's designations**][**Match Architect's samples**][**As selected by Architect from manufacturer's full range**] .

2.9 TILE BACKING PANELS

A. Water-Resistant Gypsum Backing Board: ASTM C1396/C1396M, with manufacturer's standard edges.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**American Gypsum**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Georgia-Pacific Gypsum LLC**]
    d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
    e. [**PABCO Gypsum**]
    f. [**Panel Rey**]
    g. [**USG Corporation**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Gypsum**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Georgia-Pacific Gypsum LLC**]
    d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
    e. [**PABCO Gypsum**]
    f. [**Panel Rey**]
    g. [**USG Corporation**]
    h. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**5/8 inch (15.9 mm), Type**

X][**Type C as required by fire-resistance-rated assembly indicated on Drawings**] .

B. Glass-Mat, Water-Resistant Gypsum Panel: ASTM C1658/C1658M, with fiberglass mat partially or completely embedded into the core.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Georgia-Pacific Gypsum LLC**]
   c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   d. [**PABCO Gypsum**]
   e. [**Panel Rey**]
   f. [**USG Corporation**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Georgia-Pacific Gypsum LLC**]
   c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   d. [**PABCO Gypsum**]
   e. [**Panel Rey**]
   f. [**USG Corporation**]
   g. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**1/2 inch (12.7 mm), Type C**][**5/8 inch (15.9 mm), Type X**][**5/8 inch (15.9 mm), abuse resistant**] .
4. Long Edges: Tapered.
5. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.

C. Coated Glass-Mat, Water-Resistant Gypsum Backing Panel: ASTM C1178/C1178M, with a water-resistant coating on one surface, and manufacturer's standard edges.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Georgia-Pacific Gypsum LLC**]
   c. [**USG Corporation**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**CertainTeed; SAINT-GOBAIN**]
   b. [**Georgia-Pacific Gypsum LLC**]
   c. [**USG Corporation**]

d. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**5/8 inch (15.9 mm), Type X**] .
4. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.

D. Cementitious Backer Units: ANSI A118.9 and ASTM C1288 or ASTM C1325, with manufacturer's standard edges in maximum lengths available to minimize end-to-end butt joints.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**C-Cure**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Custom Building Products**]
d. [**FinPan, Inc.**]
e. [**James Hardie Building Products, Inc.**]
f. [**PermaBASE Building Products, LLC provided by National Gypsum Company**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**C-Cure**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Custom Building Products**]
d. [**FinPan, Inc.**]
e. [**James Hardie Building Products, Inc.**]
f. [**PermaBASE Building Products, LLC provided by National Gypsum Company**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

3. Thickness: [**1/4 inch (6.4 mm)**][**1/2 inch (12.7 mm)**][**5/8 inch (15.9 mm)**][**As indicated on Drawings**] .
4. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.

E. Joint Treatment Materials for Tile Backing Panels: Comply with ASTM C475/C475M requirements.

1. Mold-Resistant Joint Compound: Use mold-resistant formulations with mold-resistant panel products.
2. Joint Tape: As recommended in writing by panel manufacturer.
3. Joint Compound for Tile Backing Panels: [**Use setting-type taping compound and setting-type, sandable topping compound**][**As recommended in writing by tile backing panel manufacturer**] .

2.10 WATERPROOF MEMBRANES

A. General: Manufacturer's standard product [**, selected from the following,**] that complies with ANSI A118.10 [**and ANSI A118.12**] and is recommended in writing by manufacturer for application indicated. Include reinforcement and accessories recommended in writing by manufacturer.

B. Waterproof Membrane, Sheet: Polyethylene sheet faced on one or both sides with polyester fabric.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**ARDEX Americas**]
   b. [**Blanke Corporation**]
   c. [**Laticrete International, Inc.**]
   d. [**MAPEI Corporation**]
   e. [**Noble Company (The)**]
   f. [**Schluter Systems L.P.**]
   g. [**Schonox HPS North America, Inc.**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ARDEX Americas**]
   b. [**Blanke Corporation**]
   c. [**Laticrete International, Inc.**]
   d. [**MAPEI Corporation**]
   e. [**Noble Company (The)**]
   f. [**Schluter Systems L.P.**]
   g. [**Schonox HPS North America, Inc.**]
   h. <**Insert manufacturer's name**>

3. Nominal Thickness: [**0.02 inch (0.5 mm)**][**0.03 inch (0.8 mm)**][**0.008 inch (0.2 mm)**]<**Insert thickness**> .

C. Waterproof Membrane, Fluid Applied: Liquid-latex rubber or elastomeric polymer.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**ARDEX Americas**]
   b. [**Boiardi Products Corporation; a QEP company**]
   c. [**Bostik; Arkema**]
   d. [**C-Cure**]
   e. [**Custom Building Products**]
   f. [**H.B. Fuller Construction Products Inc. / TEC**]
   g. [**Laticrete International, Inc.**]
   h. [**MAPEI Corporation**]
   i. [**National Applied Construction Products, Inc.**]
   j. [**Noble Company (The)**]
   k. [**Parex, a Sika brand**]
   l. [**Proflex USA**]
   m. [**Schonox HPS North America, Inc.**]
   n. [**Sika Corporation**]
   o. [**Southern Grouts & Mortars, Inc**]
   p. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ARDEX Americas**]
    b. [**Boiardi Products Corporation; a QEP company**]
    c. [**Bostik; Arkema**]
    d. [**C-Cure**]
    e. [**Custom Building Products**]
    f. [**H.B. Fuller Construction Products Inc. / TEC**]
    g. [**Laticrete International, Inc.**]
    h. [**MAPEI Corporation**]
    i. [**National Applied Construction Products, Inc.**]
    j. [**Noble Company (The)**]
    k. [**Parex, a Sika brand**]
    l. [**Proflex USA**]
    m. [**Schonox HPS North America, Inc.**]
    n. [**Sika Corporation**]
    o. [**Southern Grouts & Mortars, Inc**]
    p. <**Insert manufacturer's name**>

3. Reinforcement: [**Continuous fabric reinforcement**][**None**] .

2.11 CRACK ISOLATION MEMBRANES

A. General: Manufacturer's standard product [**, selected from the following,**] that complies with ANSI A118.12 for [**standard performance**][**high performance**] and is recommended in writing by manufacturer for application indicated. Include reinforcement and accessories recommended in writing by manufacturer.

B. Crack Isolation Membrane, Polyethylene Sheet: Polyethylene faced on both sides with polyester fabric.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Custom Building Products**]
    b. [**Laticrete International, Inc.**]
    c. [**MAPEI Corporation**]
    d. [**Noble Company (The)**]
    e. [**Proflex USA**]
    f. [**Schluter Systems L.P.**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Custom Building Products**]
    b. [**Laticrete International, Inc.**]
    c. [**MAPEI Corporation**]
    d. [**Noble Company (The)**]
    e. [**Proflex USA**]
    f. [**Schluter Systems L.P.**]

g. **<Insert manufacturer's name>**

C. Crack Isolation Membrane, Asphaltic Sheet: Self-adhering, modified-asphalt sheet.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Boiardi Products Corporation; a QEP company**]
   b. [**Custom Building Products**]
   c. [**Laticrete International, Inc.**]
   d. [**MAPEI Corporation**]
   e. [**National Applied Construction Products, Inc.**]
   f. [**Sika Corporation**]
   g. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

   a. [**Boiardi Products Corporation; a QEP company**]
   b. [**Custom Building Products**]
   c. [**Laticrete International, Inc.**]
   d. [**MAPEI Corporation**]
   e. [**National Applied Construction Products, Inc.**]
   f. [**Sika Corporation**]
   g. **<Insert manufacturer's name>**

3. Facing: [**Fabric reinforcement**][**None**] .

D. Crack Isolation Membrane, Fluid Applied: Liquid-latex rubber or elastomeric polymer.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Bostik; Arkema**]
   b. [**C-Cure**]
   c. [**Custom Building Products**]
   d. [**H.B. Fuller Construction Products Inc. / TEC**]
   e. [**Jamo Inc**]
   f. [**Laticrete International, Inc.**]
   g. [**MAPEI Corporation**]
   h. [**Parex, a Sika brand**]
   i. [**Siena Tile & Stone Installation Products; Omega Products International**]
   j. [**Sika Corporation**]
   k. [**Southern Grouts & Mortars, Inc**]
   l. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

a. [**Bostik; Arkema**]
b. [**C-Cure**]
c. [**Custom Building Products**]
d. [**H.B. Fuller Construction Products Inc. / TEC**]
e. [**Jamo Inc**]
f. [**Laticrete International, Inc.**]
g. [**MAPEI Corporation**]
h. [**Parex, a Sika brand**]
i. [**Siena Tile & Stone Installation Products; Omega Products International**]
j. [**Sika Corporation**]
k. [**Southern Grouts & Mortars, Inc**]
l. <**Insert manufacturer's name**>

3. Reinforcement: [**Continuous fabric reinforcement**][**None**] .

2.12 SETTING MATERIALS

A. Portland Cement Mortar (Thickset) Installation Materials: ANSI A108.02.

1. Cleavage Membrane: Installer's option of material that complies with ANSI A108.02, paragraph 3.8.
2. Reinforcing Wire Fabric: Galvanized, welded-wire fabric, **2 by 2 inches (50.8 by 50.8 mm)** by **0.062-inch (1.57-mm)** diameter; comply with ASTM A1064/A1064M except for minimum wire size.
3. Expanded Metal Lath: Diamond-mesh lath complying with ASTM C847.

a. Base Metal and Finish for Interior Applications: Uncoated or zinc-coated (galvanized) steel sheet, with uncoated steel sheet painted after fabrication into lath.
b. Base Metal and Finish for Exterior Applications: Zinc-coated (galvanized) steel sheet.
c. Configuration over Studs and Furring: Flat.
d. Configuration over Solid Surfaces: Self-furring.
e. Weight: [**2.5 lb/sq. yd. (1.4 kg/sq. m)**][**3.4 lb/sq. yd. (1.8 kg/sq. m)**] .

4. Latex Additive: [**Manufacturer's standard**][**acrylic resin**][**or**][**styrene-butadiene-rubber**] water emulsion, serving as replacement for part or all of gaging water, of type specifically recommended in writing by latex-additive manufacturer for use with field-mixed portland cement and aggregate mortar bed.

B. Standard Dry-Set Mortar (Thinset): ANSI A118.1.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ARDEX Americas**]
b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Proflex USA**]

k. [**Siena Tile & Stone Installation Products; Omega Products International**]
l. [**Southern Grouts & Mortars, Inc**]
m. [**Summitville Tiles, Inc.**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]
b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Proflex USA**]
k. [**Siena Tile & Stone Installation Products; Omega Products International**]
l. [**Southern Grouts & Mortars, Inc**]
m. [**Summitville Tiles, Inc.**]
n. <**Insert manufacturer's name**>

3. For wall applications, provide mortar that complies with requirements for nonsagging mortar in addition to other requirements in ANSI A118.1.

C. Modified Dry-Set Mortar (Thinset): ANSI A118.4.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ARDEX Americas**]
b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Proflex USA**]
k. [**Schluter Systems L.P.**]
l. [**Siena Tile & Stone Installation Products; Omega Products International**]
m. [**Southern Grouts & Mortars, Inc**]
n. [**Summitville Tiles, Inc.**]
o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]

b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Proflex USA**]
k. [**Schluter Systems L.P.**]
l. [**Siena Tile & Stone Installation Products; Omega Products International**]
m. [**Southern Grouts & Mortars, Inc**]
n. [**Summitville Tiles, Inc.**]
o. <**Insert manufacturer's name**>

3. Dry-Mortar Mix with Additive: Provide prepackaged, dry-mortar mix containing dry, redispersible, [**vinyl acetate**][**or**][**acrylic**] additive to which only water must be added at Project site.
4. Dry-Mortar Mix with Liquid-Latex Additive: Provide prepackaged, dry-mortar mix combined with [**acrylic resin**][**or**][**styrene-butadiene-rubber**] liquid-latex additive at Project site.
5. For wall applications, provide mortar that complies with requirements for nonsagging mortar in addition to other requirements in ANSI A118.4.

D. Improved Modified Dry-Set Mortar (Thinset): ANSI A118.15.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ARDEX Americas**]
b. [**Custom Building Products**]
c. [**H.B. Fuller Construction Products Inc. / TEC**]
d. [**Laticrete International, Inc.**]
e. [**MAPEI Corporation**]
f. [**Parex, a Sika brand**]
g. [**Proflex USA**]
h. [**Siena Tile & Stone Installation Products; Omega Products International**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]
b. [**Custom Building Products**]
c. [**H.B. Fuller Construction Products Inc. / TEC**]
d. [**Laticrete International, Inc.**]
e. [**MAPEI Corporation**]
f. [**Parex, a Sika brand**]
g. [**Proflex USA**]
h. [**Siena Tile & Stone Installation Products; Omega Products International**]
i. <**Insert manufacturer's name**>

3. Dry-Mortar Mix with Additive: Provide prepackaged, dry-mortar mix containing dry, redispersible, [**vinyl acetate**][**or**][**acrylic**] additive to which only water must be added at Project site.
4. Dry-Mortar Mix with Liquid-Latex Additive: Provide prepackaged, dry-mortar mix combined with

[**acrylic resin**][**or**][**styrene-butadiene-rubber**] liquid-latex additive at Project site.

5. For wall applications, provide mortar that complies with requirements for nonsagging mortar in addition to other requirements in ANSI A118.15.

E. EGP (Exterior Glue Plywood) Latex-Portland Cement Mortar (Thinset): ANSI A118.11.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**ARDEX Americas**]
   b. [**C-Cure**]
   c. [**Custom Building Products**]
   d. [**H.B. Fuller Construction Products Inc. / TEC**]
   e. [**Laticrete International, Inc.**]
   f. [**MAPEI Corporation**]
   g. [**Parex, a Sika brand**]
   h. [**Proflex USA**]
   i. [**Southern Grouts & Mortars, Inc**]
   j. [**Summitville Tiles, Inc.**]
   k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ARDEX Americas**]
   b. [**C-Cure**]
   c. [**Custom Building Products**]
   d. [**H.B. Fuller Construction Products Inc. / TEC**]
   e. [**Laticrete International, Inc.**]
   f. [**MAPEI Corporation**]
   g. [**Parex, a Sika brand**]
   h. [**Proflex USA**]
   i. [**Southern Grouts & Mortars, Inc**]
   j. [**Summitville Tiles, Inc.**]
   k. <**Insert manufacturer's name**>

3. Dry-Mortar Mix with Additive: Provide prepackaged, dry-mortar mix containing dry, redispersible, [**vinyl acetate**][**or**][**acrylic additive**] to which only water must be added at Project site.
4. Dry-Mortar Mix with Liquid-Latex Additive: Provide prepackaged, dry-mortar mix combined with [**acrylic resin**][**or**][**styrene-butadiene-rubber**] liquid-latex additive at Project site.

F. Water-Cleanable, Tile-Setting Epoxy: ANSI A118.3.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**ARDEX Americas**]
   b. [**Atlas Minerals & Chemicals, Inc**]
   c. [**Bostik; Arkema**]
   d. [**C-Cure**]

e. [**Custom Building Products**]
f. [**Laticrete International, Inc.**]
g. [**MAPEI Corporation**]
h. [**Parex, a Sika brand**]
i. [**Southern Grouts & Mortars, Inc**]
j. [**Summitville Tiles, Inc.**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]
b. [**Atlas Minerals & Chemicals, Inc**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**Laticrete International, Inc.**]
g. [**MAPEI Corporation**]
h. [**Parex, a Sika brand**]
i. [**Southern Grouts & Mortars, Inc**]
j. [**Summitville Tiles, Inc.**]
k. <**Insert manufacturer's name**>

3. Verify adhesives have a VOC content of [**65**]<**Insert number**> g/L or less.
4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
6. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.
7. Provide product capable of withstanding continuous and intermittent exposure to temperatures of up to **140 and 212 deg F (60 and 100 deg C)**, respectively, and certified by manufacturer for intended use.

G. Organic Adhesive: ANSI A136.1, Type [**I**][**II**] .

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ARDEX Americas**]
b. [**Bostik; Arkema**]
c. [**C-Cure**]
d. [**Custom Building Products**]
e. [**H.B. Fuller Construction Products Inc. / TEC**]
f. [**Laticrete International, Inc.**]
g. [**MAPEI Corporation**]
h. [**Parex, a Sika brand**]

i. [**Siena Tile & Stone Installation Products; Omega Products International**]
j. [**Southern Grouts & Mortars, Inc**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]
b. [**Bostik; Arkema**]
c. [**C-Cure**]
d. [**Custom Building Products**]
e. [**H.B. Fuller Construction Products Inc. / TEC**]
f. [**Laticrete International, Inc.**]
g. [**MAPEI Corporation**]
h. [**Parex, a Sika brand**]
i. [**Siena Tile & Stone Installation Products; Omega Products International**]
j. [**Southern Grouts & Mortars, Inc**]
k. <**Insert manufacturer's name**>

3. Verify adhesives have a VOC content of [**65**]<**Insert number**> g/L or less.
4. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
6. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

H. Chemical-Resistant Furan Mortar: ANSI A118.5.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Atlas Minerals & Chemicals, Inc**]
b. [**Sauereisen**]
c. [**Summitville Tiles, Inc.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Atlas Minerals & Chemicals, Inc**]
b. [**Sauereisen**]
c. [**Summitville Tiles, Inc.**]
d. <**Insert manufacturer's name**>

3. Filler Material: [**Carbon**][**Silica**]<**Insert material**> .

2.13 GROUT MATERIALS

A. Sand-Portland Cement Grout: ANSI A108.10, consisting of white or gray cement and white or colored aggregate as required to produce color indicated.

B. Standard Cement Grout: ANSI A118.6.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ARDEX Americas**]
b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Sakrete; CRH Americas, Oldcastle APG**]
k. [**Siena Tile & Stone Installation Products; Omega Products International**]
l. [**Sika Corporation**]
m. [**Southern Grouts & Mortars, Inc**]
n. [**Summitville Tiles, Inc.**]
o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]
b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Sakrete; CRH Americas, Oldcastle APG**]
k. [**Siena Tile & Stone Installation Products; Omega Products International**]
l. [**Sika Corporation**]
m. [**Southern Grouts & Mortars, Inc**]
n. [**Summitville Tiles, Inc.**]
o. <**Insert manufacturer's name**>

C. High-Performance Tile Grout: ANSI A118.7.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following] :

a. [**ARDEX Americas**]
b. [**Bostik; Arkema**]
c. [**Custom Building Products**]
d. [**H.B. Fuller Construction Products Inc. / TEC**]
e. [**Laticrete International, Inc.**]
f. [**MAPEI Corporation**]
g. [**Parex, a Sika brand**]
h. [**Proflex USA**]
i. [**Southern Grouts & Mortars, Inc**]
j. [**Summitville Tiles, Inc.**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ARDEX Americas**]
b. [**Bostik; Arkema**]
c. [**Custom Building Products**]
d. [**H.B. Fuller Construction Products Inc. / TEC**]
e. [**Laticrete International, Inc.**]
f. [**MAPEI Corporation**]
g. [**Parex, a Sika brand**]
h. [**Proflex USA**]
i. [**Southern Grouts & Mortars, Inc**]
j. [**Summitville Tiles, Inc.**]
k. <**Insert manufacturer's name**>

3. Polymer Type: [**Dry, redispersible form, prepackaged with other dry ingredients**][**Liquid-latex form for addition to prepackaged dry-grout mix**] .

D. Water-Cleanable Epoxy Grout: ANSI A118.3.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ARDEX Americas**]
b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Sika Corporation**]
k. [**Southern Grouts & Mortars, Inc**]
l. [**Summitville Tiles, Inc.**]
m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**ARDEX Americas**]
b. [**Boiardi Products Corporation; a QEP company**]
c. [**Bostik; Arkema**]
d. [**C-Cure**]
e. [**Custom Building Products**]
f. [**H.B. Fuller Construction Products Inc. / TEC**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]
i. [**Parex, a Sika brand**]
j. [**Sika Corporation**]
k. [**Southern Grouts & Mortars, Inc**]
l. [**Summitville Tiles, Inc.**]
m. <**Insert manufacturer's name**>

3. Maximum VOC Content: 65 g/L or less.
4. Provide product capable of withstanding continuous and intermittent exposure to temperatures of up to **140 and 212 deg F (60 and 100 deg C)**, respectively, and certified by manufacturer for intended use.

E. Chemical-Resistant Furan Grout: ANSI A118.5, with carbon filler.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Atlas Minerals & Chemicals, Inc**]
b. [**Sauereisen**]
c. [**Summitville Tiles, Inc.**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Atlas Minerals & Chemicals, Inc**]
b. [**Sauereisen**]
c. [**Summitville Tiles, Inc.**]
d. <**Insert manufacturer's name**>

F. Grout for Pregrouted Tile Sheets: Same product used in factory to pregrout tile sheets.

2.14 MISCELLANEOUS MATERIALS

A. Trowelable Underlayments and Patching Compounds: Latex-modified, portland cement-based formulation provided or approved by manufacturer of tile-setting and adhesive materials for installations indicated.

B. Vapor-Retarder Membrane: Polyethylene sheeting, ASTM D4397, **4.0 mils (0.1 mm)** thick.

C. Metal Flooring Transitions: Profile designed specifically for flooring applications; height to match tile and setting-bed thickness.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Blanke Corporation**]
    b. [**Dural USA, Inc.**]
    c. [**Profilitec Corp.**]
    d. [**Progress Profiles America Inc.**]
    e. [**Schluter Systems L.P.**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Blanke Corporation**]
    b. [**Dural USA, Inc.**]
    c. [**Profilitec Corp.**]
    d. [**Progress Profiles America Inc.**]
    e. [**Schluter Systems L.P.**]
    f. <**Insert manufacturer's name**>

3. Profile: [**L-shaped**][**Square**]<**Insert profile**> .
4. Material and Finish: Metallic or combination of metal and PVC or neoprene base; [**chrome-plated brass**][**polished chrome anodized aluminum**][**polished nickel anodized aluminum**][**color-coated aluminum**][**half-hard brass**][**white zinc alloy**]<**Insert finish**> exposed-edge material.

    a. Color: [**Brown**][**White**][**Gray**]<**Insert color**> .

D. Metal Edge Trim: Profile designed for wall terminations and edge protection.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Blanke Corporation**]
    b. [**Dural USA, Inc.**]
    c. [**Profilitec Corp.**]
    d. [**Progress Profiles America Inc.**]
    e. [**Schluter Systems L.P.**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Blanke Corporation**]
    b. [**Dural USA, Inc.**]
    c. [**Profilitec Corp.**]
    d. [**Progress Profiles America Inc.**]
    e. [**Schluter Systems L.P.**]
    f. <**Insert manufacturer's name**>

3. Profile: [**L-shaped**][**Square**][**Beveled**]<**Insert profile**> .
4. Terminations: [**End caps**][**Inside corners**][**Outside corners**] matching edge-protection profile.
5. Material and Finish: [**Chrome-plated brass**][**Polished chrome anodized aluminum**][**Polished nickel anodized aluminum**][**Color-coated aluminum**]<**Insert finish**> exposed-edge material.

    a. Color: [**Brown**][**White**][**Gray**]<**Insert color**> .

E. Temporary Protective Coating: Formulated to protect exposed surfaces of tile against adherence of mortar and grout; compatible with tile, mortar, and grout products and easily removable after grouting is completed without damaging grout or tile.

F. Tile Cleaner: A neutral cleaner capable of removing soil and residue without harming tile and grout surfaces, specifically approved for materials and installations indicated by tile and grout manufacturers.

G. Grout Sealer: Grout manufacturer's standard product for sealing grout joints that does not change color or appearance of grout.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions where tile will be installed, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

1. Verify that substrates for setting tile are firm; dry; clean; free of coatings that are incompatible with tile-setting materials, including curing compounds and other substances that contain soap, wax, oil, or silicone; and comply with flatness tolerances required by ANSI A108.01 for installations indicated.
2. Verify that concrete substrates for tile floors installed with [**adhesives**][**bonded mortar bed**][**or**][**thinset mortar**] comply with surface finish requirements in ANSI A108.01 for installations indicated.

    a. Verify that surfaces that received a steel trowel finish have been mechanically scarified.
    b. Verify that protrusions, bumps, and ridges have been removed by sanding or grinding.

3. Verify that installation of grounds, anchors, recessed frames, electrical and mechanical units of work, and similar items located in or behind tile has been completed.
4. Verify that joints and cracks in tile substrates are coordinated with tile joint locations; if not coordinated, adjust joint locations in consultation with Architect.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Remove coatings, including curing compounds or other coatings, that are incompatible with tile-setting materials.

B. Fill cracks, holes, and depressions in concrete substrates for tile floors installed with [**adhesives**][**or**][**thinset mortar**] with trowelable leveling and patching compound specifically recommended in writing by tile-setting material manufacturer.

C. Where indicated, prepare substrates to receive waterproof membrane by applying a reinforced mortar bed that complies with ANSI A108.1 and is sloped **1/4 inch per foot (1:50)** toward drains.

D. Blending: For tile exhibiting color variations, verify that tile has been factory blended and packaged so tile units taken from one package show same range of colors as those taken from other packages and match approved Samples. If not factory blended, either return to manufacturer or blend tiles at Project site before installing.

E. Substrate Flatness:

1. For tile shorter than **15 inches (381 mm)**, confirm that structure or substrate is limited to variation of **1/4 inch in 10 ft. (6.4 mm in 3 m)** from the required plane, and no more than **1/16 inch in 12 inches (1.5 mm in 300 mm)** when measured from tile surface high points.
2. For large format tile, tile with at least one edge **15 inches (381 mm)** or longer, confirm that structure or substrate is limited to **1/8 inch in 10 ft. (3 mm in 3 m)** from the required plane, and no more than **1/16 inch in 24 inches (1.5 mm in 609 mm)** when measured from tile surface high points.

F. Field-Applied Temporary Protective Coating: If indicated under tile type or needed to prevent grout from staining or adhering to exposed tile surfaces, precoat them with continuous film of temporary protective coating, taking care not to coat unexposed tile surfaces.

3.3 INSTALLATION OF CERAMIC TILE SYSTEM, GENERAL

A. Tile Backing Panels: Install backing panels and treat joints in accordance with ANSI A108.11 and manufacturer's written instructions for type of application indicated.

B. Waterproof Membranes: Install waterproof membrane to comply with ANSI A108.13 and manufacturer's written instructions to produce waterproof membrane of uniform thickness that is bonded securely to substrate.

1. Allow waterproof membrane to cure and verify by testing that it is watertight before installing tile or setting materials over it.

C. Crack Isolation Membranes: Install crack isolation membrane to comply with ANSI A108.17 and manufacturer's written instructions to produce membrane of uniform thickness that is bonded securely to substrate.

1. Allow crack isolation membrane to cure before installing tile or setting materials over it.

D. Setting and Grout Materials: Mix mortars and grouts to comply with referenced standards and mortar and grout manufacturers' written instructions.

1. Add materials, water, and additives in accurate proportions.
2. Obtain and use type of mixing equipment, mixer speeds, mixing containers, mixing time, and other procedures to produce mortars and grouts of uniform quality with optimum performance characteristics for installations indicated.

E. Install tile in accordance with TCNA's "Handbook for Ceramic, Glass, and Stone Tile Installation" for TCNA installation methods specified in tile installation schedules. Comply with parts of ANSI A108 series that are referenced in TCNA installation methods and specified in tile installation schedules, and apply to types of setting and grouting materials used.

1. For the following installations, follow procedures in ANSI A108 series of tile installation standards

for providing 95 percent mortar coverage:

a. Exterior tile floors and walls.
b. Tile floors in wet areas.
c. Tile swimming pool decks.
d. Tile floors in laundries.
e. Tile floors consisting of tiles **8 by 8 inches (200 by 200 mm)** or larger.
f. Tile floors consisting of rib-backed tiles.

2. Extend tile work into recesses and under or behind equipment and fixtures to form complete covering without interruptions unless otherwise indicated. Terminate work neatly at obstructions, edges, and corners without disrupting pattern or joint alignments.
3. Accurately form intersections and returns. Perform cutting and drilling of tile without marring visible surfaces. Carefully grind cut edges of tile abutting trim, finish, or built-in items for straight aligned joints. Fit tile closely to electrical outlets, piping, fixtures, and other penetrations so plates, collars, or covers overlap tile.
4. Provide manufacturer's standard trim shapes where necessary to eliminate exposed tile edges.
5. Where accent tile differs in thickness from field tile, vary setting-bed thickness so that tiles are flush.
6. Jointing Pattern: Lay tile in grid pattern unless otherwise indicated. Lay out tile work and center tile fields in both directions in each space or on each wall area. Lay out tile work to minimize use of pieces that are less than half of a tile. Provide uniform joint widths unless otherwise indicated.

   a. For tile mounted in sheets, make joints between tile sheets same width as joints within tile sheets, so joints between sheets are not apparent in finished Work.
   b. Where adjoining tiles on floor, base, walls, or trim are specified or indicated to be same size, align joints.
   c. Where tiles are specified or indicated to be whole integer multiples of adjoining tiles on floor, base, walls, or trim, align joints unless otherwise indicated.

7. Lay out tile wainscots to dimensions indicated or to next full tile beyond dimensions indicated.

F. Movement Joints: Provide movement joints and other sealant-filled joints, including control, contraction, and isolation joints, where indicated on Drawings. Form joints during installation of setting materials, mortar beds, and tile. Keep joints free of dirt, debris, and setting materials prior to filling with sealants. Do not saw-cut joints after installing tiles.

1. Where joints occur in concrete substrates, locate joints in tile surfaces directly above them.

G. Thresholds: Install stone and solid surface thresholds in same type of setting bed as adjacent floor unless otherwise indicated.

1. At locations where mortar bed (thickset) would otherwise be exposed above adjacent floor finishes, set thresholds in [**modified dry-set mortar (thinset)**][**improved modified dry-set mortar (thinset)**] .
2. Do not extend [**cleavage membrane**][**waterproof membrane**][**or**][**crack isolation membrane**] under thresholds set in [**standard dry-set mortar (thinset)**][**modified dry-set mortar (thinset)**][**or**][**improved modified dry-set mortar (thinset)**] . Fill joints between such thresholds and adjoining tile set on [**cleavage membrane**][**waterproof membrane**][**or**][**crack isolation membrane**] with elastomeric sealant.

H. Metal Flooring Transitions: Install [**at locations indicated**][**where exposed edge of tile flooring meets carpet, wood, or other flooring that finishes flush with top of tile**][**where exposed edge of tile flooring meets carpet, wood, or other flooring that finishes flush with or below top of tile and no threshold is indicated**] .

I. Metal Wall Trim: Install at locations indicated on Drawings.

J. Grout Sealer: Apply grout sealer to [**cementitious**] grout joints [**in tile floors**] in accordance with manufacturer's written instructions. As soon as sealer has penetrated grout joints, remove excess sealer and sealer from tile faces by wiping with soft cloth.

3.4 FIELD QUALITY CONTROL

A. Water Test:

1. Test of waterproofing membrane in showers and similar areas to be performed by Installation Contractor before setting tile.

    a. Perform test after 24 hours of waterproof membrane installation.
    b. Insert test plug in drain or waste line.
    c. Fill shower base with water, high enough that the membrane-to-drain connection and floor-to-wall transition can be evaluated, and mark wall.
    d. Check for leaks after 24 hours.

2. Test to be witnessed by [**Architect**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**> .

B. Nonconforming Work:

1. Waterproof membrane will be considered defective if water level has dropped.
2. Remove and replace defective components and retest.

3.5 ADJUSTING

A. Remove and replace tile that is damaged or that does not match adjoining tile. Provide new matching units, installed as specified and in a manner to eliminate evidence of replacement.

3.6 CLEANING

A. On completion of placement and grouting, clean all ceramic tile surfaces so they are free of foreign matter.

1. Remove grout residue from tile as soon as possible.
2. Clean grout smears and haze from tile in accordance with tile and grout manufacturer's written instructions. Use only cleaners recommended in writing by tile and grout manufacturers and only after determining that cleaners are safe to use by testing on samples of tile and other surfaces to be cleaned. Protect metal surfaces and plumbing fixtures from effects of cleaning. Flush surfaces with clean water before and after cleaning.

3.7 PROTECTION

A. Protect installed tile work with kraft paper or other heavy covering during construction period to prevent staining, damage, and wear. If recommended in writing by tile manufacturer, apply coat of neutral protective cleaner to completed tile walls and floors.

B. Prohibit foot and wheel traffic from tiled floors for at least seven days after grouting is completed.

C. Before final inspection, remove protective coverings and rinse neutral protective cleaner from tile surfaces.

3.8 EXTERIOR CERAMIC TILE INSTALLATION SCHEDULE

A. Exterior Floor Installations:

1. TCNA F101: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed (thickset) [**bonded to concrete**][**over waterproof membrane on concrete**][**over waterproof membrane on concrete where indicated and bonded to concrete where membrane is not indicated**] .

    a. Location: .
    b. Ceramic Tile Type: <**Insert tile-type designation**> .
    c. Bond Coat for Cured-Bed Method: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
    d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**] .

        1) Type: [**Sanded**][**Unsanded**] .

    e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid applied**][**Fabric reinforced, fluid applied**] .
    f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    g. Movement Joints: Types located on Drawings.

2. TCNA F102: Thinset mortar [**on concrete**][**over waterproof membrane on concrete**][**over waterproof membrane on concrete where indicated and on concrete where membrane is not indicated**][**over crack isolation membrane on concrete**][**over crack isolation membrane on concrete where indicated and on concrete where membrane is not indicated**] .

    a. Location: .
    b. Ceramic Tile Type: <**Insert tile-type designation**> .
    c. Mortar: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
    d. Grout: [**Standard cement grout**][**High-performance tile grout**] .

        1) Type: [**Sanded**][**Unsanded**] .

    e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
    f. Crack Isolation Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Asphaltic sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
    g. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    h. Movement Joints: Types located on Drawings.

B. Exterior Roof/Deck Floor Installations:

1. TCNA F103: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed

(thickset) [**over waterproof membrane on concrete**][**over waterproof membrane on concrete where indicated and on concrete where membrane is not indicated**] over drainage material on roof membrane.

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Bond Coat for Cured-Bed Method: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
g. Movement Joints: Types located on Drawings.

2. TCNA F104: Thinset mortar [**on concrete**][**over waterproof membrane on concrete**][**over waterproof membrane on concrete where indicated and on concrete where membrane is not indicated**][**over crack isolation membrane on concrete**][**over crack isolation membrane on concrete where indicated and on concrete where membrane is not indicated**] .

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Thinset Mortar: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Standard cement grout**][**High-performance tile grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Crack Isolation Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Asphaltic sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
g. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
h. Movement Joints: Types located on Drawings.

C. Exterior Wall Installations, Masonry or Concrete:

1. TCNA W201: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed (thickset) installed on metal lath [**over waterproof membrane**][**over water-resistant barrier**][**over vapor-retarder membrane**] .

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Bond Coat for Cured-Bed Method: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset**] .
d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Weather Barrier: Compliant with local code requirements [**and**][**specified in Division 07**] .
g. Vapor-Retarder Membrane: Compliant with local code requirements [**and**][**specified in Division 07**] .
h. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
i. Movement Joints: Types located on Drawings.

2. TCNA W202E: Thinset mortar [**over waterproof membrane**][**over water-resistive barrier**][**over vapor retarder membrane**] .

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset**] .
d. Grout: [**Standard cement grout**][**High-performance tile grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Weather Barrier: Compliant with local code requirements [**and**][**specified in Division 07**] .
g. Vapor-Retarder Membrane: Compliant with local code requirements [**and**][**specified in Division 07**] .
h. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
i. Movement Joints: Types located on Drawings.

D. Exterior Wall Installations, Wood or Metal Studs:

1. TCNA W244E: Thinset mortar [**over waterproof membrane on cementitious backer units**][**on cementitious backer units over vapor-retarder membrane**][**on cementitious backer units over water-resistive barrier**] .

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Standard cement grout**][**High-performance tile grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Weather Barrier: Compliant with local code requirements [**and**][**specified in Division 07**] .
g. Vapor-Retarder Membrane: Compliant with local code requirements [**and**][**specified in Division 07**] .
h. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
i. Movement Joints: Types located on Drawings.

3.9 INTERIOR CERAMIC TILE INSTALLATION SCHEDULE

A. Interior Floor Installations, Concrete Subfloor:

1. TCNA F111: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed (thickset) installed over cleavage membrane.

   a. Location: .
   b. Ceramic Tile Type: <**Insert tile-type designation**> .
   c. Bond Coat for Cured-Bed Method: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
   d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**] .

      1) Type: [**Sanded**][**Unsanded**] .

   e. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
   f. Movement Joints: Types located on Drawings.

2. TCNA F125-Full: Thinset mortar on crack isolation membrane.

   a. Location: .
   b. Ceramic Tile Type: <**Insert tile-type designation**> .
   c. Mortar: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
   d. Grout: [**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

      1) Type: [**Sanded**][**Unsanded**] .

   e. Crack Isolation Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Asphaltic sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
   f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
   g. Movement Joints: Types located on Drawings.

B. Interior Floor Installations, Wood Subfloor:

1. TCNA F141: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed (thickset) installed over cleavage membrane [**over waterproof membrane**] .

   a. Location: .
   b. Ceramic Tile Type: <**Insert tile-type designation**> .
   c. Bond Coat for Cured-Bed Method: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
   d. Grout: [**Sand-portland cement**][**Standard cement grout**][**High-performance sanded cement**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

      1) Type: [**Sanded**][**Unsanded**] .

   e. Waterproof Membrane: [**As recommended in writing by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .

f. Joint Width: [1/8 inch (3.2 mm)][3/16 inch (4.76 mm)][1/4 inch (6.4 mm)][3/8 inch (9.5 mm)]<**Insert width**> .
g. Movement Joints: Types located on Drawings.

2. TCNA F142: Organic adhesive on plywood underlayment.

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

d. Joint Width: [1/8 inch (3.2 mm)][3/16 inch (4.76 mm)][1/4 inch (6.4 mm)][3/8 inch (9.5 mm)]<**Insert width**> .
e. Movement Joints: Types located on Drawings.

C. Interior Radiant Heat Floor Installations, Concrete Subfloor:

1. TCNA RH110: Thinset mortar [**on crack isolation membrane**] ; hydronic piping installed in concrete.

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Crack Isolation Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Asphaltic sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Joint Width: [1/8 inch (3.2 mm)][3/16 inch (4.76 mm)][1/4 inch (6.4 mm)][3/8 inch (9.5 mm)]<**Insert width**> .
g. Movement Joints: Types located on Drawings.

2. TCNA RH115: Thinset mortar; electric radiant system encapsulated in thinset mortar.

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Joint Width: [1/8 inch (3.2 mm)][3/16 inch (4.76 mm)][1/4 inch (6.4 mm)][3/8 inch (9.5 mm)]<**Insert width**> .
f. Movement Joints: Types located on Drawings.

D. Interior Radiant Heat Floor Installations, Wood Subfloor:

1. TCNA RH130: Thinset mortar on exterior-glue plywood; electric radiant system encapsulated in

thinset mortar.

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**EGP (exterior glue plywood) latex-portland cement mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
f. Movement Joints: Types located on Drawings.

2. TCNA RH141: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed (thickset) installed over cleavage membrane [**and waterproof membrane**] with hydronic piping installed in mortar bed.

a. Location: .
b. Ceramic Tile Type: <**Insert stone tile-type designation**> .
c. Bond Coat for Cured-Bed Method: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
g. Movement Joints: Types located on Drawings.

E. Interior Wall Installations, Masonry or Concrete:

1. TCNA W202I: Thinset mortar [**over waterproof membrane**] .

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**][**Water-cleanable, tile-setting epoxy**] .
d. Grout: [**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
g. Movement Joints: Types located on Drawings.

2. TCNA W211: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed (thickset) bonded to substrate [**over waterproof membrane**] .

    a. Location: .
    b. Ceramic Tile Type: <**Insert tile-type designation**> .
    c. Bond Coat for Cured-Bed Method: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
    d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

        1) Type: [**Sanded**][**Unsanded**] .

    e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
    f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    g. Movement Joints: Types located on Drawings.

F. Interior Wall Installations, Wood or Metal Studs or Furring:

1. TCNA W242: Organic adhesive on gypsum board.

    a. Location: .
    b. Ceramic Tile Type: <**Insert tile-type designation**> .
    c. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

        1) Type: [**Sanded**][**Unsanded**] .

    d. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    e. Movement Joints: Types located on Drawings.

2. TCNA W245: Thinset mortar on glass-mat, water-resistant gypsum backer board [**over waterproof membrane**] .

    a. Location: .
    b. Ceramic Tile Type: <**Insert tile-type designation**> .
    c. Mortar: [**Standard dry-set mortar**][**Modified dry-set mortar**][**Improved modified dry-set mortar**] .
    d. Grout: [**Sand-portland cement grout**][**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

        1) Type: [**Sanded**][**Unsanded**] .

    e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
    f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    g. Movement Joints: Types located on Drawings.

G. Bathtub Wall Installations with No Shower Head, Wood or Metal Studs or Furring:

1. TCNA B413: [**Thinset mortar**][**Organic adhesive**] on [**water-resistant gypsum**][**coated glass-**

mat, water-resistant gypsum] backer board.

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Thinset Mortar: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Sand-portland cement grout**][**Standard sanded cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
f. Movement Joints: Types located on Drawings.

H. Bathtub/Shower Wall Installations:

1. TCNA B419: Thinset mortar [**over waterproof membrane**] on coated glass-mat, water-resistant gypsum backer board.

a. Location: .
b. Ceramic Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Standard cement grout**][**High-performance tile grout**][**Water-cleanable epoxy grout**] .

1) Type: [**Sanded**][**Unsanded**] .

e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
g. Movement Joints: Types located on Drawings.

3.10 CHEMICAL-RESISTANT TILE INSTALLATION SCHEDULE

A. Interior Floor Installations, Concrete:

1. TCNA F115: Thinset mortar [**over crack isolation membrane**] .

a. Location: .
b. Chemical-Resistant Tile Type: <**Insert tile-type designation**> .
c. Mortar: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset)**] .
d. Grout: [**Water-cleanable epoxy grout**][**Chemical-resistant furan grout**] .
e. Crack Isolation Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Asphaltic sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
g. Movement Joints: Types located on Drawings.

2. TCNA F131: Water-cleanable, tile-setting epoxy.

    a. Location: .
    b. Chemical-Resistant Tile Type: <**Insert tile-type designation**> .
    c. Grout: Water-cleanable epoxy grout.
    d. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    e. Movement Joints: Types located on Drawings.

B. Interior Wall Installations, Masonry or Concrete:

1. TCNA W211: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . Cement mortar bed (thickset) bonded to substrate [**over waterproof membrane**] .

    a. Location: .
    b. Chemical-Resistant Tile Type: <**Insert tile-type designation**> .
    c. Bond Coat for Cured-Bed Method: [**Dry-set**][**Latex-**] portland cement mortar.
    d. Grout: Water-cleanable epoxy.
    e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
    f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    g. Movement Joints: Types located on Drawings.

C. Interior Wall Installations, Solid Backing:

1. TCNA W222: Method [**ANSI A108.1A**][**ANSI A108.1B**][**ANSI A108.1C**] . One-coat cement mortar bed (thickset) installed [**over cleavage membrane**][**over waterproof membrane**] on solid backing.

    a. Location: .
    b. Chemical-Resistant Tile Type: <**Insert tile-type designation**> .
    c. Bond Coat for Cured-Bed Method: [**Standard dry-set mortar (thinset)**][**Modified dry-set mortar (thinset)**][**Improved modified dry-set mortar (thinset**] .
    d. Grout: Water-cleanable epoxy grout.
    e. Waterproof Membrane: [**As recommended by setting material manufacturer**][**Polyethylene sheet**][**Fluid-applied membrane**][**Fabric-reinforced, fluid-applied membrane**] .
    f. Joint Width: [**1/8 inch (3.2 mm)**][**3/16 inch (4.76 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**]<**Insert width**> .
    g. Movement Joints: Types located on Drawings.

END OF SECTION 09 01 30 91

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 01 60 91 - POLISHED CONCRETE FINISHING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Stain materials.
2. Liquid floor treatments.
3. Polished concrete surface finish requirements.

B. Related Requirements:

1. Section 033000 "Cast-in-Place Concrete" for new concrete designed for polished concrete finishing, including concrete materials, mixture design, placement procedures, initial finishing, and curing.

1.2 DEFINITIONS

A. Aggregate Exposure Class: Visual observation of polished floor aggregate surface exposure area after grinding and polishing operations. Aggregate exposure class ranges are A, B, and C.

B. Design Reference Sample: Sample designated by Architect in the Contract Documents that reflects acceptable surface quality and appearance of polished concrete.

C. Distinctness of Image (DOI): The distinctness (clarity) of images reflected by the glossy coating surface appearance of the polished concrete finish appearance levels. The transmission of this reflection is measured in accordance with ASTM D5767.

D. Haze: The cloudiness or milky appearance of images from objects produced by reflection in a polished concrete surface. The measurement of this appearance is defined in accordance with ASTM D4039. The test method reading is put into a calculation resulting in a Haze Index value.

E. Specular Gloss: A reflectance value determined by a single measurement of gloss from shining a known amount of light at a surface within a specific angle of illumination in accordance with ASTM D523.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1. Before submitting design mixtures, review concrete design mixture and examine procedures for ensuring quality of concrete materials. Require representatives of each entity directly concerned with polished concrete to attend, including the following:

a. Contractor's superintendent.
b. Independent testing agency responsible for concrete design mixtures.
c. Ready-mix concrete manufacturer.
d. Cast-in-place concrete subcontractor.
e. Polished concrete finishing subcontractor.

f. Architect.
g. The Owner.

2. Review [**concrete slab design for compressive strength, flatness and levelness,**][**cold- and hot-weather concreting procedures,**][**curing procedures,**][**sequencing,**][**construction joints,**][**concrete repair procedures,**][**concrete finishing,**] polished concrete appearance and aggregate exposure requirements, polished concrete mockups, and protection of polished concrete.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Sustainable Design Submittals:

1. Laboratory Test Reports: For [**stains**][**and**][**liquid floor treatments**], indicating compliance with requirements for low-emitting materials.

C. Polishing Schedule: Submit plan showing polished concrete surfaces and schedule of polishing operations for each area of polished concrete before start of polishing operations. Include locations of all joints, including construction joints.

D. Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type of product requiring color selection.

E. Samples for Verification: Actual sample of finished products for each type of exposed color.

1.5 QUALITY ASSURANCE

A. Installer Qualifications:

1. An installer experienced in performing polished concrete finishing with a minimum of five previous projects similar in material, design, and extent to that indicated for this Project.
2. Trained and certified by manufacturer of polished concrete system materials.
3. Concrete Polishing Craftsman of the Concrete Polishing Council.

B. Polished Concrete Standards: Comply with ACI 310.1.

1.6 MOCKUPS

A. Build mockups [**10 by 10 ft (3.05 by 3.05 m)**]to verify selections made under Sample submittals and to demonstrate typical joints, surface finish, tolerances, and standard of workmanship. Build mockups to comply with the following requirements, using materials indicated for the completed Work:

1. Build mockups in the location of the Work and of the size indicated or, if not indicated, as directed by the Owner for [**newly placed**][**existing**] concrete.
2. Demonstrate surface preparation, [**coloring,**][**pattern,**][**curing,**] tested aggregate exposure, tested polish appearance, sealing and protecting of polished concrete.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.
4. Remove rejected mockups.

1.7 FIELD CONDITIONS

A. Traffic Control: Maintain access for vehicular and pedestrian traffic as needed for other construction activities.

B. Ambient Conditions: Ensure installation location and Project ambient conditions comply with manufacturers written instructions.

PART 2 - PRODUCTS

2.1 STAIN MATERIALS

A. Reactive Stain: Acidic-based stain with wetting agents and high-grade, UV-stable metallic salts that react with calcium hydroxide in cured concrete to produce permanent, variegated, or translucent color effects.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Americrete, Inc.**]
b. [**Artcrete, Inc**]
c. [**Bomanite Co**]
d. [**Bon Tool Co.**]
e. [**Brickform; a division of Solomon Colors**]
f. [**Butterfield Color, Inc.**]
g. [**Decosup Inc.**]
h. [**EPMAR Corporation; a Quaker Houghton company**]
i. [**H&C Decorative Concrete Products; a brand of Sherwin-Williams Co.**]
j. [**QC Construction Products**]
k. [**Scofield, a Business Unit of Sika Corporation**]
l. [**Specialty Concrete Products, Inc**]
m. [**Stampcrete International, Ltd**]
n. [**Super Stone, Inc.**]
o. [**SureCrete Design Products, a Fenix Group SPC Company**]

B. Penetrating Stain: Coloring agents used to add consistent color to polished concrete surfaces without coloring the aggregates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Americrete, Inc.**]
b. [**AmeriPolish**]
c. [**Bomanite Co**]
d. [**Bon Tool Co.**]
e. [**Brickform; a division of Solomon Colors**]
f. [**Butterfield Color, Inc.**]
g. [**Duckback Products**]

h. [**H&C Decorative Concrete Products; a brand of Sherwin-Williams Co.**]
i. [**Scofield, a Business Unit of Sika Corporation**]
j. [**Super Stone, Inc.**]

C. VOC Content: For field applications[**that are inside the weatherproofing system**], verify paints and coatings comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Primers, Sealers, and Undercoaters: 100 g/L.
2. Clear Wood Finishes, Varnishes: 275 g/L.
3. Clear Wood Finishes, Lacquers: 275 g/L.
4. Shellacs, Clear: 730 g/L.
5. Stains: 100 g/L.

D. Low-Emitting Materials: For field applications that are inside the weatherproofing system, verify 90 percent of paints and coatings comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

E. Material Emissions and Pollutant Control: Verify not less than 85 percent of field-applied paints and coatings that are inside the weatherproofing system comply with the following:

1. Low-Emitting Materials: Verify VOC emissions comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

F. VOC Emissions: For field applications inside the building, verify wall paints contain no more than half of the chronic REL of VOCs when tested in accordance with the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify the building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

2.2 LIQUID FLOOR TREATMENTS

A. Penetrating Liquid Floor Treatments for Polished Concrete Finish: Clear liquid materials for the applications of cleaning solutions, densifiers, and sealers that strengthen or protect polished concrete surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Advanced Floor Products**]
b. [**AmeriPolish**]
c. [**ARDEX Americas**]
d. [**AWRC Corporation**]
e. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
f. [**H&C Decorative Concrete Products; a brand of Sherwin-Williams Co.**]
g. [**Laticrete International, Inc.**]
h. [**MAPEI Corporation**]

i. [**Moxie International**]
j. [**NewLook International, Inc.**]
k. [**Nox-Crete Products Group**]
l. [**PROSOCO, Inc**]
m. [**QuestMark**]
n. [**Vexcon Chemicals Inc.**]

2. Verify products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.
4. Verify products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

2.3 POLISHED CONCRETE SURFACE FINISH REQUIREMENTS

A. Aggregate Exposure Class: [**Class A Cement Fines 85 to 95 percent fines; 5 to 15 percent fine aggregate**][**Class B Fine Aggregate 85 to 95 percent fine aggregate; 5 to 15 percent blend of fines and coarse aggregate**][**Class C Coarse Aggregate 10 to 20 percent cement fines and fine aggregates**].

B. Polish Concrete Appearance Levels: [**Level 1: Flat (Ground) up to 100-grit polish; DOI 0 to 9; Haze Reading less than 10**][**Level 2: Satin (Honed) up to 200- to 400-grit polish; DOI 10 to 39; Haze Reading less than 10; Reflective Sheen: Low to medium**][**Level 3: Polished (Polished Gloss up to 400- to 800-grit polish; DOI 40 to 69; Haze Reading less than 10; Reflective Sheen: Medium to high**][**Level 4: Highly Polished (Very High Gloss) 800-grit and higher polish; DOI 70 to 100; Haze Reading less than 10; Reflective Sheen: High to highest**][**Match design reference sample**].

C. Slip Resistance: Minimum Dynamic Coefficient of Friction (DCOF) of 0.42. Provide required slip resistance based on final gloss level and determined by the Concrete Polishing Council.

2.4 ACCESSORIES

A. Repair Materials: As recommended in writing by manufacturer to repair and fill cracks, and repair surfaces compatible with polishing materials.

B. Water: Potable.

C. Cleaning Agents: As recommended in writing by manufacturer.

2.5 POLISHING EQUIPMENT

A. Equipment and Supplies: Provide equipment and supplies, not limited to, the concrete grinding and concrete polisher equipment, tooling and polishing diamonds for the polished concrete finishing Work.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify that concrete substrates are acceptable for grinding, polishing and product installation as recommended by manufacturer.

B. Do not begin Work until unsatisfactory conditions have been addressed and corrected.

3.2 PREPARATION

A. Verify that concrete substrate preparation is in accordance with manufacturer's written instructions.

B. Clean surfaces free of dust, dirt and other contaminates incompatible with liquids applied products and polishing.

C. Clean and seal cracks as recommended by manufacturer.

D. Prepare, clean and fill joints with joint filler as recommended in writing by manufacturer.

E. Clean surface completely of any dust with cleaning solution as recommended in writing by manufacturer.

3.3 APPLICATION

A. Machine grind floor surfaces progressively to receive aggregate and polish appearance levels indicated to match approved mockup.

B. Scoring: Score decorative jointing in concrete surfaces **1/16 inch (1.6 mm)** deep with diamond blades to match pattern indicated. Rinse until water is clear. Score [**after**][**before**] staining.

1. Joint Width: [**3/8 inch (10 mm)**].

C. Apply penetrating stain densifier treatment for polished concrete in polishing sequence and in accordance with manufacturer's written instructions, allowing recommended drying time between successive coats.

D. Apply reactive color stain for polished concrete in polishing sequence and in accordance with manufacturer's written instructions.

E. Apply color dyes for polished concrete in polishing sequence and in accordance with manufacturer's written instructions.

F. Apply sealers to polished concrete in polishing sequence and in accordance with manufacturers' written instructions.

G. Continue progressively polishing to aggregate and polish appearance levels to match approved mockup for final finish appearance.

H. Visually inspect to remove defects and repolish areas that are defective. Repolish those areas that do not meet specified aggregate and polish levels per approved mockup.

I. Complete edges of floor finish that adjoins surrounding floor areas in a sharp and clean manner.

J. Neutralize and clean polished floor surfaces.

3.4 FIELD QUALITY CONTROL

A. Testing Agency: [**the Owner**][**Engage**] a qualified testing and inspecting agency to perform tests at three random locations for areas up to **100 sq. ft. (465 sq. m)** and inspections and to submit reports.

B. Measure polish specular gloss level, DOI, and haze as specified; repolish if required to achieve Project requirements.

C. Verify aggregate exposure as specified. Machine surfaces if required to achieve Project requirements.

D. Verify compliance of slip resistance to comply with specified slip-resistance rating.

E. Prepare test and inspection reports.

3.5 CLEANING AND PROTECTION

A. Control and dispose of waste products produced by grinding and polishing operations.

B. Protect installed polished concrete surfaces from damage during construction in accordance with manufacturer's written instructions.

END OF SECTION 09 01 60 91

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 01 60 91A - PORTLAND CEMENT TERRAZZO FLOORING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Poured-in-place portland cement terrazzo flooring.
2. Poured-in-place rustic terrazzo flooring.
3. Precast terrazzo units.

B. Related Requirements:

1. Section 079200 "Joint Sealants" for sealants installed with terrazzo.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1. Review methods and procedures related to terrazzo including, but not limited to, the following:

a. Inspect and discuss condition of substrate and other preparatory work performed by other trades.
b. Review and finalize construction schedule and verify availability of materials, Installer's personnel, equipment, and facilities needed to make progress and avoid delays.
c. Review special terrazzo designs and patterns.
d. Review procedures for coping with unfavorable forecasted weather conditions.
e. <**Insert agenda items**>.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
2. Product Data: For adhesives, indicating VOC content.
3. Laboratory Test Reports: For adhesives, indicating compliance with requirements for low-emitting materials.
4. Laboratory Test Reports: For sealers, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings: Include terrazzo installation requirements. Include plans, sections, component details, and relationship to other work. Show layout of the following:

1. Divider strips.
2. Control-joint strips.
3. Expansion-joint strips.

4. Accessory strips.
5. Abrasive strips.
6. Stair treads, risers, and landings.
7. Precast terrazzo jointing and edge configurations.
8. Terrazzo patterns.
9. <**Insert requirements**>.

D. Samples: For each exposed product and for each color and texture specified, [**6 inches (150 mm)**]<**Insert dimension**> in size.

E. Samples for Initial Selection: NTMA's "Terrazzo Color Palette" showing the full range of colors and patterns available for each terrazzo type.

F. Samples for Verification: For each type, material, color, and pattern of terrazzo and accessory required showing the full range of color, texture, and pattern variations expected. Label each terrazzo Sample to identify manufacturer's matrix color and aggregate types, sizes, and proportions. Prepare Samples of same thickness and from same material to be used for the Work, in sizes indicated below:

1. Terrazzo: [**6-inch- (150-mm-)**]<**Insert dimension**> square Samples.
2. Precast Terrazzo: [**6-inch- (150-mm-)**]<**Insert dimension**> square Samples.
3. Accessories: [**6-inch- (150-mm-)**]<**Insert dimension**> long Samples of each exposed strip item required.

1.4 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer.

B. Material Certificates: For each type of terrazzo material or product.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Data: For terrazzo to include in maintenance manuals.

1.6 QUALITY ASSURANCE

A. Installer Qualifications: An installer who is a contractor member of NTMA.

B. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.

1. Build mockups for each type of terrazzo including accessories.

   a. Size: Minimum **100 sq. ft. (9 sq. m)** of typical poured-in-place flooring condition for each color and pattern [**in locations indicated**][**in locations directed by Architect**]<**Insert location requirements**>.
   b. Include [**base**][**first three stair treads**]<**Insert item**>.

2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to Project site in supplier's original wrappings and containers, labeled with source's or manufacturer's name, material or product brand name, and lot number if any.

B. Store materials in their original, undamaged packages and containers, inside a well-ventilated area protected from weather, moisture, soiling, extreme temperatures, and humidity.

1.8 FIELD CONDITIONS

A. Environmental Limitations: Maintain interior ambient temperature above **50 deg F (10 deg C)** for 48 hours before and during terrazzo installation.

B. Weather Limitations: Proceed with rustic terrazzo installation only when forecasted weather conditions permit work to be performed according to NTMA's written recommendations and when temperatures remain above **45 deg F (7.2 deg C)**.

C. Field Measurements: Verify actual dimensions of construction contiguous with precast terrazzo by field measurements before fabrication.

D. Provide permanent interior lighting or, if permanent lighting is not in place, simulate permanent lighting conditions during terrazzo installation.

E. Close spaces to traffic during terrazzo installation and for not less than 24 hours after installation unless manufacturer recommends a longer period.

F. Control and collect water and dust produced by portland cement terrazzo grinding operations. Protect adjacent construction from detrimental effects of grinding operations.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Source Limitations for Aggregates: Obtain each color, grade, type, and variety of granular materials from single source with resources to provide materials of consistent quality in appearance and physical properties.

2.2 PERFORMANCE REQUIREMENTS

A. NTMA Standards: Comply with NTMA's written recommendations for terrazzo type indicated unless more stringent requirements are specified.

2.3 PORTLAND CEMENT TERRAZZO

A. Portland Cement Terrazzo System <**Insert designation**>: [**Sand cushion**][**Bonded**][**Monolithic**].

1. Underbed Thickness: [**As indicated on Drawings**]<**Insert dimension**>.
2. Terrazzo Topping Thickness: [**As indicated on Drawings**]<**Insert dimension**>.

B. Materials:

1. Portland Cement: ASTM C150/C150M, Type 1.

    a. Color for Terrazzo Matrix: [**As required by mix indicated**]<**Insert requirements**>.

2. Water: Potable.
3. Sand: ASTM C33/C33M.
4. Aggregates: Comply with NTMA gradation standards for mix indicated and contain no deleterious or foreign matter.

    a. Abrasion and Impact Resistance: Less than 40 percent loss per ASTM C131/C131M[**and ASTM C535 for large-size coarse aggregates**].
    b. 24-Hour Absorption Rate: Less than 0.75 percent.
    c. Dust Content: Less than 1.0 percent by weight.

5. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert value**> percent.
6. Matrix Pigments: Pure mineral or synthetic pigments, alkali resistant, durable under exposure to sunlight, and compatible with terrazzo matrix.
7. Underbed Bonding Agent: Neat portland cement paste.
8. Topping Bonding Agent: Neat portland cement paste, or epoxy or acrylic bonding agents formulated for use with monolithic terrazzo.
9. Underbed Reinforcement: Galvanized welded-wire reinforcement, wire **2 by 2 inches (51 by 51 mm)** by **0.062 inch (1.57 mm)** in diameter, complying with ASTM A1064/A1064M, except for minimum wire size.
10. Isolation Membrane: Polyethylene sheeting, ASTM D2103, Type 13300, **4 mils (0.1 mm)** thick; or unperforated asphalt felt, ASTM D226/D226M, Type I (No. 15).

C. Mixes:

1. Underbed Mix: One part portland cement to four parts sand and sufficient water to provide workability at as low a slump as possible.
2. Terrazzo Topping Mix: One **94-lb (42.6-kg)** bag of portland cement per [**200 lb (90.7 kg)**]<**Insert value**> of aggregate, matrix pigment if required by mix color, and sufficient water to produce a workable mix.

    a. Mix Color and Pattern: [**As selected by Architect from NTMA's "Terrazzo Color Palette" CI Series**][**As selected by Architect from NTMA's "Terrazzo Color Palette" CII Series**][**As selected by Architect from NTMA's "Terrazzo Color Palette" CIII Series**][**Match Architect's sample**][**Match existing**]<**Insert NTMA designation or custom mix**>.

2.4 RUSTIC TERRAZZO

A. Rustic Terrazzo System <**Insert designation**>: [**Bonded**][**Monolithic**].

1. Underbed Thickness: [**As indicated on Drawings**]<**Insert dimension**>.
2. Terrazzo Topping Thickness: [**As indicated on Drawings**]<**Insert dimension**>.

B. Materials:

1. Portland Cement: ASTM C150/C150M, Type 1.

    a. Color for Terrazzo Matrix: [**As required by mix indicated**]<**Insert requirements**>.

2. Water: Potable.
3. Sand: ASTM C33/C33M.
4. Aggregates: As required for mix indicated, in sizes comply with NTMA gradation standards, with maximum 24-hour absorption rate of 0.25 percent, and containing no deleterious or foreign matter.
5. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert value**> percent.
6. Matrix Pigments: Pure mineral or synthetic pigments, alkali resistant, durable under exposure to sunlight and weather, and compatible with matrix binder.
7. Air-Entraining Admixture: ASTM C260/C260M.
8. Underbed Bonding Agent: Neat portland cement paste.
9. Topping Bonding Agent: Neat portland cement paste, or epoxy or acrylic bonding agents formulated for use with topping indicated.

C. Mixes:

1. Underbed Mix: One part portland cement to four parts sand and sufficient water to provide workability at as low a slump as possible and air entrainment agent to produce 6 percent plus or minus 1 percent air content at point of delivery.
2. Terrazzo Topping Mix: One **94-lb (42.6-kg)** bag of portland cement per [**200 lb (90.7 kg)**]<**Insert value**> of aggregate, matrix pigment if required by mix color, and sufficient water to produce a workable mix.

    a. Mix Color and Pattern: [**As selected by Architect from NTMA's "Terrazzo Color Palette" CI Series**][**As selected by Architect from NTMA's "Terrazzo Color Palette" CII Series**][**As selected by Architect from NTMA's "Terrazzo Color Palette" CIII Series**][**Match Architect's sample**][**Match existing**]<**Insert NTMA designation or custom mix**>.

2.5 PRECAST TERRAZZO

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Precast Terrazzo Enterprises, Inc**]
2. [**Romoco Precast Terrazzo Products; a subsidiary of Roman Mosaic & Tile Company**]
3. [**Wausau Tile, Inc.**]
4. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Precast Terrazzo Enterprises, Inc**]
2. [**Romoco Precast Terrazzo Products; a subsidiary of Roman Mosaic & Tile Company**]
3. [**Wausau Tile, Inc.**]
4. <**Insert manufacturer's name**>

C. Precast Terrazzo Base <**Insert designation**>: Minimum **3/4-inch- (19-mm-)** thick, reinforced, portland cement terrazzo units cast in maximum lengths possible, but not less than **36 inches (900 mm)**. Comply with NTMA's written recommendations for fabricating precast terrazzo base units in sizes and profiles indicated.

1. Type: [**As indicated**][**Coved with minimum 3/4-inch (19-mm) radius**][**Straight**][**Splayed**]<**Insert requirements**>.

2. Top Edge: [**Straight, unfinished**][**Beveled with polished top surface**][**Radius edge with polished top surface**]<**Insert requirements**>.
3. Metal Toe Strip: [**Zinc**][**Brass**].
4. Outside Corner Units: With finished returned edges at outside corner.
5. Color, Pattern, and Finish: [**As selected by Architect from full range of industry colors**][**Match Architect's sample**][**Match adjacent poured-in-place terrazzo flooring**]<**Insert requirements**>.

D. Precast Terrazzo Units <**Insert designation**>: Minimum [**2-inch- (51-mm-)**]<**Insert dimension**> thick, reinforced, portland cement terrazzo units. Comply with NTMA's written recommendations for fabricating precast terrazzo units in sizes and profiles indicated. Reinforce units as required by unit sizes, profiles, and thicknesses and as recommended by manufacturer. Finish exposed-to-view edges and reveals to match face finish. Ease exposed edges to **1/8-inch (3.2-mm)** radius.

1. Color, Pattern, and Finish: [**As selected by Architect from full range of industry colors**][**Match Architect's sample**][**Match adjacent poured-in-place terrazzo flooring**]<**Insert requirements**>.

2.6 STRIP MATERIALS

A. Standard Divider Strips: One-piece, flat-type strips for grouting into sawed joints prepared in substrate.

1. Material: [**As indicated**][**White-zinc alloy**][**Brass**]<**Insert requirements**>.
2. Depth: [**As indicated**][**3/4 inch (19 mm)**][**1-1/4 inches (32 mm)**][**2 inches (51 mm)**]<**Insert dimension**>.
3. Width: [**As indicated**][**0.05 inch (1.27 mm)**][**1/8 inch (3.2 mm)**][**1/4 inch (6.4 mm)**]<**Insert dimension**>.

B. Heavy-Top Divider Strips: One-piece, flat-type strips for grouting into sawed joints prepared in substrate.

1. Base-Section Material: [**As indicated**][**White-zinc alloy**][**Galvanized steel**]<**Insert requirements**>.
2. Top-Section Material: [**As indicated**][**White-zinc alloy**][**Brass**][**Plastic, in color selected from full range of industry colors**]<**Insert requirements**>.
3. Depth: [**As indicated**][**3/4 inch (19 mm)**][**1-1/4 inches (32 mm)**][**2 inches (51 mm)**]<**Insert dimension**>.
4. Top-Section Width: [**As indicated**][**1/8 inch (3.2 mm)**][**1/4 inch (6.4 mm)**][**1/2 inch (12.7 mm)**]<**Insert dimension**>.

C. Heavy-Top Angle Divider Strips: One-piece, L-type angle strips with anchoring device and in depth required for topping thickness indicated.

1. Material: [**As indicated**][**White-zinc alloy**][**Brass**][**Plastic, in color selected from full range of industry colors**]<**Insert requirements**>.
2. Top-Section Width: [**As indicated**][**1/8 inch (3.2 mm)**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**][**1/2 inch (12.7 mm)**]<**Insert dimension**>.

D. Control-Joint Strips: Separate, double L-type angles, positioned back to back, that match material and color of divider strips and in depth required for topping thickness indicated.

E. Expansion-Joint Strips: [**Brass**][**Plastic strips in color selected from full range of industry colors**], with removable zip-strip top for installing sealant.

1. Width: [**As indicated**][**Minimum 1/2 inch (12.7 mm)**]<**Insert dimension**>.

F. Accessory Strips: Match divider-strip width, material, and color unless otherwise indicated. Use the following types of accessory strips as required to provide a complete installation:

1. Base-bead strips for exposed top edge of terrazzo base.
2. Edge-bead strips for exposed edges of terrazzo.
3. Nosings for terrazzo stair treads and landings.
4. <**Insert requirements**>.

G. Abrasive Strips: [**Three-line**][**Two-line**][**One-line**][**Abrasive nosing strip and two-line**]<**Insert requirements**> abrasive inserts at nosings. Silicon carbide or aluminum oxide, or combination of both, in epoxy-resin binder and set in channel.

1. Width: [**1/2 inch (12.7 mm)**]<**Insert dimension**>.
2. Depth: As required by terrazzo thickness.
3. Length: [**4 inches (100 mm) less than stair width**][**As indicated**]<**Insert dimension**>.
4. Color: [**As selected by Architect from full range of industry colors**]<**Insert requirements**>.

2.7 MISCELLANEOUS ACCESSORIES

A. Strip Adhesive: Recommended by manufacturer for this use.

1. Adhesives shall have a VOC content of [**70**]<**Insert value**> g/L or less.
2. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
4. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
5. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
6. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit or 33 mcg/cu. m and that of acetaldehyde shall not exceed 9 mcg/cu. m.

B. Anchoring Devices:

1. Strips: Provide mechanical anchoring devices or adhesives for strip materials as recommended by manufacturer and as required for secure attachment to substrate.
2. Precast Terrazzo: Provide mechanical anchoring devices as recommended by fabricator for proper anchorage and support of units for conditions of installation and support.

C. Moisture-Retaining Cover: ASTM C171, polyethylene film or white burlap-polyethylene sheet.

D. Isolation and Expansion-Joint Material: Closed-cell polyethylene foam, nonabsorbent to liquid water and gas, and non-outgassing in unruptured state; butyl rubber; rubber; or cork; [**in width indicated**][**minimum 1/2 inch (12.7 mm) wide**]<**Insert dimension**>.

E. Portland Cement Terrazzo Cleaner: Chemically neutral cleaner with pH factor between 7 and 10 that is

biodegradable, phosphate free, and recommended by cleaner manufacturer for use on terrazzo type indicated.

F. Rustic Terrazzo Cleaner: Solution of 1 part muriatic acid and 10 parts water.

G. Sealer: Slip- and stain-resistant, penetrating-type sealer that is chemically neutral; does not affect terrazzo color or physical properties; is recommended by sealer manufacturer; and complies with NTMA's written recommendations for terrazzo type indicated.

1. Surface Friction: Not less than 0.6 according to ASTM D2047.
2. Acid-Base Properties: With pH factor between 7 and 10.
3. Products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
4. Products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.
6. Products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
7. Products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
8. Rustic Terrazzo: Use solvent acrylic-type sealer.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and areas, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions, including levelness tolerances, have been corrected.

3.2 PREPARATION

A. Clean substrates of substances, including oil, grease, and curing compounds, that might impair terrazzo bond. Provide clean, dry, and neutral substrate for terrazzo application.

1. Roughen concrete substrates before installing terrazzo system according to NTMA's written recommendations.

B. Protect other work from water and dust generated by grinding operations. Control water and dust to comply with environmental protection regulations.

1. Erect and maintain temporary enclosures and other suitable methods to limit water damage and dust migration and to ensure adequate ambient temperatures and ventilation conditions during

installation.

3.3 INSTALLATION, GENERAL

A. Comply with NTMA's written recommendations for terrazzo and accessory installation.

B. Installation Tolerance: Limit variation in terrazzo surface from level to [**1/4 inch in 10 feet (6.4 mm in 3 m)**]<**Insert dimensions**>; noncumulative.

C. Rustic Terrazzo: Install isolation and expansion material where abutting adjacent construction and directly above substrate expansion joints.

D. Underbed:

1. Comply with NTMA's written recommendations for underbed installation.
2. Sand-Cushion Portland Cement Terrazzo:

a. Cover entire surface to receive terrazzo with dusting of sand.
b. Install isolation membrane over sand, overlapping ends and edges a minimum of **3 inches (75 mm)**.
c. Install welded-wire reinforcement, overlapping at edges and ends at least two squares.[**Stop mesh a minimum of 1 inch (25 mm) short of expansion joints.**]

3. Bonded [**Portland Cement**][**Rustic**] Terrazzo:

a. Saturate structural concrete substrate with water, and slush and broom with underbed bonding agent.

4. Place underbed and screed to elevation indicated below finished floor elevation.

E. Strip Materials:

1. Divider and Control-Joint Strips:

a. Locate divider strips [**directly over breaks and control joints in concrete slabs**][**in locations indicated**]<**Insert requirements**>.
b. Install control-joint strips [**back to back and directly above concrete-slab control joints**][**in locations indicated**]<**Insert requirements**>.

1) Install control-joint strips with [**1/4-inch (6.4-mm)**]<**Insert dimension**> gap between strips, and install sealant in gap.

c. Install strips in adhesive setting bed without voids below strips, or mechanically anchor strips as required to attach strips to substrate, as recommended by strip manufacturer.

2. Expansion-Joint Strips: Form expansion joints using divider strips and install directly above concrete-slab expansion joints.
3. Accessory Strips: Install as required to provide a complete installation.
4. Abrasive Strips: Install with surface of abrasive strip positioned [**1/16 inch (1.6 mm)**]<**Insert dimension**> higher than terrazzo surface.

3.4 POURED-IN-PLACE TERRAZZO INSTALLATION

A. Underbed Preparation:

1. Sand-Cushion Portland Cement Terrazzo: Saturate underbed with water to produce a cement slurry.
2. Bonded [**Portland Cement**][**Rustic**] Terrazzo: Dampen underbed with water.

B. Monolithic [**Portland Cement**][**Rustic**] Terrazzo: Apply topping bonding agent on concrete substrate.

C. Place terrazzo mixture in panels formed by divider strips and trowel mixture to top of strips. Seed additional aggregates in matrix to uniformly distribute granular material and produce a surface with a minimum of 70 percent aggregate exposure. Roll and compact surface until excess cement and water have been extracted.

1. Portland Cement Terrazzo: Trowel to a dense, uniform, flat surface disclosing lines of divider strips.

D. Portland Cement Terrazzo Stairs: Install and finish stairs at the same time that adjacent flooring is installed.

E. Portland Cement Terrazzo Base: Install and finish base at the same time that adjacent flooring is installed.

F. Portland Cement Terrazzo Finishing: Cover terrazzo topping with moisture-retaining cover and cure until topping develops sufficient strength to prevent lifting or pulling of aggregate during grinding.

1. Rough Grinding: Grind with 24-grit or finer stones or with comparable diamond plates.
2. Grouting: After rough grinding, clean terrazzo topping with water and rinse away residue. Remove excess rinse water, apply matrix mix to grout surface, and fill voids. After grouting, cover surface with moisture-retaining cover to cure grout until ready for fine grinding.
3. Fine Grinding and Polishing: Delay fine grinding until heavy trade work is complete and construction traffic through area is restricted. Grind with [**80**][**120**]-grit stones or with comparable diamond abrasives until grout is removed from surface.

G. Rustic Terrazzo Finishing: Expose aggregate by hosing or other means recommended in writing by NTMA. Cure the terrazzo topping by flooding with water or covering with moisture-retaining cover.

3.5 PRECAST TERRAZZO INSTALLATION

A. Install precast terrazzo units using method recommended in writing by NTMA and manufacturer unless otherwise indicated.

B. Do not install units that are chipped, cracked, discolored, or improperly finished.

C. Seal joints between units with [**cement grout matching precast terrazzo matrix**][**joint sealant**]<**Insert requirements**>.

3.6 REPAIR

A. Cut out and replace terrazzo areas that evidence lack of bond with substrate or underbed, including areas that emit a "hollow" sound if tapped. Cut out terrazzo areas in panels defined by strips and

replace to match adjacent terrazzo, or repair panels according to NTMA's written recommendations, as approved by Architect.

3.7 CLEANING AND PROTECTION

A. Terrazzo Cleaning:

1. Remove grinding dust from installation and adjacent areas.
2. Wash surfaces with cleaner immediately after final cleaning of terrazzo flooring according to both NTMA's and manufacturer's written recommendations and manufacturer's written instructions; rinse surfaces with water and allow them to dry thoroughly.

B. Rustic Terrazzo Cleaning: Clean surfaces with rustic terrazzo cleaner. Legally contain and dispose of runoff from cleaning operations. Rinse surfaces with water and allow them to dry thoroughly.

C. Sealing:

1. Seal surfaces according to NTMA's written recommendations.
2. Apply sealer according to sealer manufacturer's written instructions.

D. Protection: Provide final protection and maintain conditions, in a manner acceptable to Installer, that ensure that terrazzo is without damage or deterioration at time of Substantial Completion.

END OF SECTION 09 01 60 91A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 01 60 91B - TILE CARPETING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Carpet tiles.

B. Related Requirements:

1. Section 024119 "Selective Demolition" for removing existing floor coverings.
2. [**Section 096513 "Resilient Base and Accessories"**][**Section 096519 "Resilient Tile Flooring"**] for resilient wall base and accessories installed with carpet tile.
3. Section 096816 "Sheet Carpeting" for carpet roll goods.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference [**at Project site**][**by web conference**]<**Insert location**> .

1. Review methods and procedures related to carpet tile installation including, but not limited to, the following:

a. Review delivery, storage, and handling procedures.
b. Review ambient conditions and ventilation procedures.
c. Review subfloor preparation procedures.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

1. Include manufacturer's written data on physical characteristics, durability, and fade resistance.
2. Include manufacturer's written installation recommendations for each type of substrate.

B. Shop Drawings: For carpet tile installation, showing the following:

1. Columns, doorways, enclosing walls or partitions, built-in cabinets, and locations where cutouts are required in carpet tiles.
2. Carpet tile type, color, and dye lot.
3. Type of subfloor.
4. Type of installation.
5. Pattern of installation.
6. Pattern type, location, and direction.
7. Pile direction.
8. Type, color, and location of insets and borders.
9. Type, color, and location of edge, transition, and other accessory strips.
10. Transition details to other flooring materials.

C. Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type of carpet tile.

1. Include Samples of exposed edge, transition, and other accessory stripping involving color or finish selection.

D. Samples for Verification: Actual Sample of finished products for each of the following products and for each color and texture required. Label each Sample with manufacturer's name, material description, color, pattern, and designation indicated on Drawings and in schedules.

1. Carpet Tile: Full-size Sample.
2. Exposed Edge, Transition, and Other Accessory Stripping: **12-inch- (300-mm-)** long Samples.

E. Product Schedule: For carpet tile. Use same designations indicated on Drawings.

F. Sustainable Design Submittals:

1. Product Data: For adhesives, indicating VOC content.
2. Health Product Declaration (HPD): Provide product's Material Health Certificate or Cradle to Cradle certification.
3. Declare, Action Submittals: Provide product's Declare product label, designated as "Red List Free," Declare, or Living Building Challenge (LBC) compliant to 0.1 percent.
4. Environmental Product Declaration (EPD): For each product.
5. Health Product Declaration (HPD): For each product.
6. Environmental Product Declaration (EPD): For each product.
7. Health Product Declaration (HPD): For each product.
8. Environmental Product Declaration (EPD): For each product.
9. Environmental Product Declaration (EPD): For each product.
10. Environmental Product Declaration (EPD): For each product.
11. Third-Party Certifications: For each product.
12. Third-Party-Certified Life-Cycle Assessment: For each product.
13. Facts, Action Submittals: Provide product's Facts - NSF/ANSI 336, "Sustainability Assessment for Commercial Furnishings Fabric," certification.
14. Health Product Declaration (HPD): For each product.
15. Health Product Declaration (HPD): Provide HPD.
16. Life-Cycle Impact-Reduction Action Plan, Action Submittals: Provide product-specific, Life-Cycle Assessment (LCA) complying with EN 15804 or ISO 21930.
17. Supply Chain Optimization: For each product, provide documentation demonstrating that manufacturer practices comply with supply chain optimization requirements.
18. Supply Chain Optimization: For each product, provide documentation demonstrating that manufacturer practices comply with supply chain optimization requirements.

1.4 INFORMATIONAL SUBMITTALS

A. Product Test Reports: For carpet tile, for tests performed by a qualified testing agency.

B. Qualification Statements: For Installer.

C. Sample Warranties: For carpet tile.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Data: For carpet tiles. Include the following:

1. Methods for maintaining carpet tile, including cleaning and stain-removal products and procedures and manufacturer's recommended maintenance schedule.
2. Precautions for cleaning materials and methods that could be detrimental to carpet tile.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials, from the same production run, to Owner that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Carpet Tile: Full-size units equal to [**5**]<**Insert number**> percent of amount installed for each type indicated, but no fewer than 10 full-size units.

1.7 QUALITY ASSURANCE

A. Installer Qualifications: An authorized representative who is certified by the International Certified Floorcovering Installers Association at the [**Commercial II**][**Master II**]<**Insert description**> certification level.

1.8 MOCKUPS

A. Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for fabrication and installation.

1. Build mockups [**as indicated on Drawings**]<**Insert mockup requirements**> .
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Comply with CRI 104.

1.10 FIELD CONDITIONS

A. Comply with CRI 104 for temperature, humidity, and ventilation limitations.

B. Environmental Limitations: Do not deliver or install carpet tiles until spaces are enclosed and weathertight, wet-work in spaces is complete and dry, and ambient temperature and humidity conditions are maintained at levels planned for building occupants during the remainder of the construction period.

C. Do not install carpet tiles over concrete slabs until slabs have cured and are sufficiently dry to bond with adhesive and concrete slabs have pH range recommended in writing by carpet tile manufacturer.

D. Where demountable partitions or other items are indicated for installation on top of carpet tiles, install carpet tiles before installing these items.

1.11 WARRANTY

A. Special Warranty for Carpet Tiles: Manufacturer agrees to repair or replace components of carpet tile installation that fail in materials or workmanship within specified warranty period.

1. Warranty does not include deterioration or failure of carpet tile due to unusual traffic, failure of substrate, vandalism, or abuse.
2. Failures include, but are not limited to, the following:

a. More than 10 percent loss of face fiber, edge raveling, snags, and runs.
b. Loss of tuft-bind strength.
c. Excess static discharge.
d. Delamination.
e. Dimensional instability.

3. Warranty Period: [**10**][**15**]<**Insert number**> years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 CARPET TILES

A. Carpet Tile :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Bentley Mills, Inc.**]
b. [**Engineered Floors**]
c. [**Interface, Inc.**]
d. [**J&J Flooring Group LLC**]
e. [**Mannington Commercial; a business unit of Mannington Mills, Inc.**]
f. [**Mohawk Group**]
g. [**Shaw Industries Group, Inc.; Berkshire Hathaway Company**]
h. [**StaticSmart; Julie Industries**]
i. [**Tarkett USA**]
j. [**van Gelder, Inc**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Bentley Mills, Inc.**]
b. [**Engineered Floors**]
c. [**Interface, Inc.**]
d. [**J&J Flooring Group LLC**]
e. [**Mannington Commercial; a business unit of Mannington Mills, Inc.**]
f. [**Mohawk Group**]
g. [**Shaw Industries Group, Inc.; Berkshire Hathaway Company**]
h. [**StaticSmart; Julie Industries**]
i. [**Tarkett USA**]

j. [**van Gelder, Inc**]
k. <**Insert manufacturer's name**>

3. Color: [**As indicated by manufacturer's designations**][**Match Architect's samples**][**As selected by Architect from manufacturer's full range**]<**Insert color**> .
4. Pattern: [**Match Architect's samples**]<**Insert pattern**> .
5. Fiber Content: [**100 percent nylon 6,6**][**100 percent nylon 6**][**100 percent polypropylene**][**100 percent wool**][**80 percent wool; 20 percent nylon 6,6**][**80 percent wool; 20 percent nylon 6**]<**Insert percentage**> .
6. Fiber Type: <**Insert proprietary fiber type**> .
7. Pile Characteristic: [**Level-loop**][**Cut**][**Cut-and-loop**]<**Insert construction**> pile.
8. Yarn Twist: <**Insert TPI (TPCM)**> .
9. Yarn Count: <**Insert count**> .
10. Density: <**Insert oz./cu. yd. (g/cu. cm)**> .
11. Pile Thickness: <**Insert inches (mm)**> for finished carpet tile [**in accordance with ASTM D6859**] .
12. Stitches: <**Insert stitches per inch (mm)**> .
13. Gauge: <**Insert ends per inch (mm)**> .
14. Surface Pile Weight: <**Insert oz./sq. yd. (g/sq. m)**> .
15. Total Weight: <**Insert oz./sq. yd. (g/sq. m)**> for finished carpet tile.
16. Primary Backing/Backcoating: [**Manufacturer's standard composite materials**]<**Insert specific primary backing materials; consult manufacturers**> .
17. Secondary Backing: [**Manufacturer's standard material**]<**Insert specific secondary backing material**> .
18. Backing System: <**Insert proprietary name**> .
19. Size: [**18 by 18 inches (457 by 457 mm)**][**24 by 24 inches (610 by 610 mm)**][**18 by 36 inches (457 by 914 mm)**][**36 by 36 inches (914 by 914 mm)**]<**Insert dimensions**> .
20. Applied Treatments:

    a. Soil-Resistance Treatment: [**Manufacturer's standard treatment**]<**Insert treatment**> .
    b. Antimicrobial Treatment: [**Manufacturer's standard treatment**]<**Insert treatment**> that protects carpet tiles as follows:

        1) Antimicrobial Activity: Not less than 2 mm halo of inhibition for gram-positive bacteria, not less than 1 mm halo of inhibition for gram-negative bacteria, and no fungal growth, in accordance with AATCC 174.

21. Sustainable Design Requirements:

    a. Sustainable Product Certification: [**Silver**][**Gold**][**Platinum**] level certification in accordance with NSF/ANSI 140.
    b. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
    c. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.
    d. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
    e. Extended Producer Responsibility: Provide documentation of manufacturer participation in an extended producer responsibility program.
    f. Life-Cycle Analysis: Provide documentation indicating product contribution to reduction in global warming potential, depletion of the stratospheric ozone layer, acidification of land and water sources, eutrophication, formation of tropospheric ozone, and depletion of

nonrenewable energy resources.

g. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.

22. Performance Characteristics:

a. Texture Appearance Retention Rating (TARR): [**Moderate traffic, 2.5**][**Heavy traffic, 3.0**][**Severe traffic, 3.5**]<**Insert number**> minimum in accordance with ASTM D7330.
b. Critical Radiant Flux Classification: Not less than [**0.45 W/sq. cm**][**0.22 W/sq. cm**] in accordance with NFPA 253.
c. Dry Breaking Strength: Not less than **100 lbf (445 N)** in accordance with ASTM D2646.
d. Tuft Bind: Not less than [**3 lbf (13 N)**][**5 lbf (22 N)**][**6.2 lbf (28 N)**][**8 lbf (36 N)**][**10 lbf (45 N)**]<**Insert value**> in accordance with ASTM D1335.
e. Delamination: Not less than [**3.5 lbf/in. (0.6 N/mm)**][**4 lbf/in. (0.7 N/mm)**]<**Insert value**> in accordance with ASTM D3936.
f. Dimensional Tolerance: Within **1/32 inch (0.8 mm)** of specified size dimensions, as determined by physical measurement.
g. Noise Reduction Coefficient (NRC): <**Insert NRC**> in accordance with ASTM C423.
h. Colorfastness to Crocking: Not less than 4, wet and dry, in accordance with AATCC 165.
i. Colorfastness to Light: Not less than 4 after [**40**][**60**]<**Insert number**> AFU (AATCC fading units) in accordance with AATCC 16.3 Option 3.
j. Electrostatic Propensity: Less than [**3.5**][**2**]<**Insert number**> kV in accordance with AATCC 134.

2.2 ACCESSORIES

A. Trowelable Leveling and Patching Compounds: Latex-modified, hydraulic-cement-based formulation provided or recommended in writing by carpet tile manufacturer.

B. Adhesives: Water-resistant, mildew-resistant, nonstaining, pressure-sensitive types to suit products and subfloor conditions indicated, that comply with flammability requirements for installed carpet tile, and that are recommended in writing by carpet tile manufacturer for releasable installation.

C. Metal Edge/Transition Strips: Extruded aluminum with [**mill**]<**Insert finish**> finish of profile and width shown, of height required to protect exposed edge of carpet, and of maximum lengths to minimize running joints.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for maximum moisture content, alkalinity range, installation tolerances, and other conditions affecting carpet tile performance.

B. Examine carpet tile for type, color, pattern, and potential defects.

C. Concrete Slabs: Verify that finishes comply with requirements specified in Section 033000 "Cast-in-Place Concrete" and that surfaces are free of cracks, ridges, depressions, scale, and foreign deposits.

1. Moisture Testing: Perform tests so that each test area does not exceed [**200 sq. ft. (20 sq. m)**][**1000 sq. ft. (100 sq. m)**]<**Insert area**> , and perform no fewer than three tests in

each installation area and with test areas evenly spaced in installation areas.

a. Anhydrous Calcium Chloride Test: ASTM F1869. Proceed with installation only after substrates have maximum moisture-vapor-emission rate of [**3 lb of water/1000 sq. ft. (1.36 kg of water/100 sq. m)**]<**Insert emission**> in 24 hours.
b. Relative Humidity Test: Using in situ probes, ASTM F2170. Proceed with installation only after substrates have a maximum [**75**]<**Insert number**> percent relative humidity level measurement.
c. Perform additional moisture tests recommended in writing by adhesive and carpet tile manufacturers. Proceed with installation only after substrates pass testing.

D. Wood Subfloors: Verify the following:

1. Underlayment over subfloor complies with requirements specified in Section 061600 "Sheathing."
2. Underlayment surface is free of irregularities and substances that may interfere with adhesive bond or show through surface.

E. Metal Subfloors: Verify the following:

1. Underlayment surface is free of irregularities and substances that may interfere with adhesive bond or show through surface.

F. Painted Subfloors: Perform bond test recommended in writing by adhesive manufacturer. Verify the following:

1. Underlayment surface is flat, smooth, evenly planed, tightly jointed, and free of irregularities, gaps greater than [**1/8 inch (3 mm)**]<**Insert dimension**> , protrusions more than **1/32 inch (0.8 mm)**, and substances that may interfere with adhesive bond or show through surface.

G. Access Flooring Systems: Verify the following:

1. Access floor substrate is compatible with carpet tile and adhesive if any.

H. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. General: Comply with CRI 104 and with carpet tile manufacturer's written installation instructions for preparing substrates.

B. Trowelable Leving and Patching Compounds: Use trowelable leveling and patching compounds in accordance with manufacturer's written instructions, to fill cracks, holes, depressions, and protrusions in substrates. Fill or level cracks, holes and depressions **1/8 inch (3 mm)** wide or wider, and protrusions more than **1/32 inch (0.8 mm)** unless more stringent requirements are required by manufacturer's written instructions.

C. Concrete Substrates: Remove coatings, including curing compounds, and other substances that are incompatible with adhesives and that contain soap, wax, oil, or silicone, without using solvents. Use mechanical methods recommended in writing by adhesive and carpet tile manufacturers.

D. Metal Substrates: Clean grease, oil, soil and rust, and prime if recommended in writing by adhesive manufacturer. Rough sand painted metal surfaces and remove loose paint. Sand aluminum surfaces, to remove metal oxides, immediately before applying adhesive.

E. Broom and vacuum clean substrates to be covered immediately before installing carpet tile.

3.3 INSTALLATION OF CARPET TILES

A. General: Comply with CRI 104, Section 10, "Carpet Tile," and with carpet tile manufacturer's written installation instructions.

B. Installation Method: [**As recommended in writing by carpet tile manufacturer**][**Glue down; install every tile with full-spread, releasable, pressure-sensitive adhesive**][**Partial glue down; install periodic tiles with releasable, pressure-sensitive adhesive**][**Free lay; install carpet tiles without adhesive**] .

C. Maintain dye-lot integrity. Do not mix dye lots in same area.

D. Maintain pile-direction patterns [**indicated on Drawings**][**recommended in writing by carpet tile manufacturer**] .

E. Cut and fit carpet tile to butt tightly to vertical surfaces, permanent fixtures, and built-in furniture including cabinets, pipes, outlets, edgings, thresholds, and nosings. Bind or seal cut edges as recommended in writing by carpet tile manufacturer.

F. Extend carpet tile into toe spaces, door reveals, closets, open-bottomed obstructions, removable flanges, alcoves, and similar openings.

G. Maintain reference markers, holes, and openings that are in place or marked for future cutting by repeating on carpet tile as marked on subfloor. Use nonpermanent, nonstaining marking device.

H. Install pattern parallel to walls and borders.

I. Access Flooring: Stagger joints of carpet tiles so carpet tile grid is offset from access flooring panel grid. Do not fill seams of access flooring panels with carpet adhesive; keep seams free of adhesive.

3.4 CLEANING

A. Perform cleaning operations immediately after installing carpet tile as follows:

1. Remove excess adhesive and other surface blemishes using cleaner recommended in writing by carpet tile manufacturer.
2. Remove yarns that protrude from carpet tile surface.
3. Vacuum carpet tile using commercial machine with face-beater element.

3.5 PROTECTION

A. Protect installed carpet tile to comply with CRI 104, Section 13.7.

B. Protect carpet tile against damage from construction operations and placement of equipment and fixtures during the remainder of construction period. Use protection methods indicated or recommended in writing by carpet tile manufacturer.

END OF SECTION 09 01 60 91B

SECTION 09 01 60 91C - SHEET CARPETING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Tufted carpet.
2. Woven carpet.
3. Carpet cushion.

B. Related Requirements:

1. Section 024119 "Selective Demolition" for removing existing floor coverings.
2. [**Section 096513 "Resilient Base and Accessories"**][**Section 096519 "Resilient Tile Flooring"**] for resilient wall base and accessories installed with carpet.
3. Section 096813 "Tile Carpeting" for modular carpet tiles.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1. Review methods and procedures related to carpet installation including, but not limited to, the following:

a. Review delivery, storage, and handling procedures.
b. Review ambient conditions and ventilation procedures.
c. Review subfloor preparation procedures.
d. <**Insert agenda items**>.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include manufacturer's written data on physical characteristics, durability, and fade resistance.
2. Include manufacturer's written installation recommendations for each type of substrate.

B. Shop Drawings: For carpet installation, showing the following:

1. Columns, doorways, enclosing walls or partitions, built-in cabinets, and locations where cutouts are required in carpet.
2. Carpet type, color, and dye lot.
3. Locations where dye lot changes occur.
4. Seam locations, types, and methods.
5. Type of subfloor.
6. Type of installation.
7. Pattern type, repeat size, location, direction, and starting point.
8. Pile direction.
9. Type, color, and location of insets and borders.

10. Type, color, and location of edge, transition, and other accessory strips.
11. Transition details to other flooring materials.
12. Type of carpet cushion.

C. Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type of product.

1. Include Samples of exposed edge, transition, and other accessory stripping involving color or finish selection.

D. Samples for Verification: Actual sample of finished products for each of the following products and for each color and texture required. Label each Sample with manufacturer's name, material description, color, pattern, and designation indicated on Drawings and in schedules.

1. Carpet: **12-inch- (300-mm-)** square Sample.
2. Exposed Edge, Transition, and Other Accessory Stripping: **12-inch- (300-mm-)** long Samples.
3. Carpet Cushion: **6-inch- (150-mm-)** square Sample.
4. Carpet Seam: **6-inch (150-mm)** Sample.
5. Mitered Carpet-Border Seam: **12-inch- (300-mm-)** square Sample. Show carpet pattern alignment.

E. Product Schedule: For carpet[**and carpet cushion**]. Use same designations indicated on Drawings.

F. Sustainable Design Submittals:

1. Product Data: For adhesives, indicating VOC content.
2. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.
4. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Health Product Declaration (HPD): Provide product's Material Health Certificate or Cradle to Cradle certification.
6. Declare, Action Submittals: Provide product's Declare product label, designated as "Red List Free," Declare or Living Building Challenge (LBC) compliant to 0.1 percent.
7. Environmental Product Declaration: For each product.
8. Health Product Declaration: For each product.
9. Environmental Product Declaration: For each product.
10. Environmental Product Declaration: For each product.
11. Environmental Product Declaration: For each product.
12. Third-Party Certifications: For each product.
13. Third-Party Certified Life Cycle Assessment: For each product.
14. Facts, Action Submittals: Provide product's Facts - NSF/ANSI 336, "Sustainability Assessment for Commercial Furnishings Fabric," certification.
15. Health Product Declaration (HPD): For each product.
16. Health Product Declaration (HPD): Provide HPD.

1.4 INFORMATIONAL SUBMITTALS

A. Product Test Reports: For carpet[**and carpet cushion**], for tests performed by a qualified testing agency.

B. Qualification Statements: For Installer.

C. Sample Warranties: For sheet carpeting.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Data: For carpet. Include the following:

1. Methods for maintaining carpet, including cleaning and stain-removal products and procedures and manufacturer's recommended maintenance schedule.
2. Precautions for cleaning materials and methods that could be detrimental to carpet[**and carpet cushion**].

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials, from the same production run, to Owner that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Carpet: Full-width rolls equal to [**5**]<**Insert number**> percent of amount installed for each type indicated, but not less than **10 sq. yd.** **(8.3 sq. m)**.

1.7 QUALITY ASSURANCE

A. Installer Qualifications: An authorized representative who is certified by the International Certified Floorcovering Installers Association at the [**Commercial II**][**Master II**]<**Insert description**> certification level.

1.8 MOCKUPS

A. Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for fabrication and installation.

1. Build mockups [**as indicated on Drawings**]<**Insert mockup requirements**>.
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Comply with CRI 104.

B. Deliver carpet in original mill protective covering with mill register numbers and tags attached.

1.10 FIELD CONDITIONS

A. Comply with CRI 104 for temperature, humidity, and ventilation limitations.

B. Environmental Limitations: Do not deliver or install carpet[**and carpet cushion**] until spaces are enclosed and weathertight, wet-work in spaces is complete and dry, and ambient temperature and humidity conditions are maintained at levels planned for building occupants during the remainder of the construction period.

C. Do not install carpet[**and carpet cushion**] over concrete slabs until slabs have cured, are sufficiently dry to bond with adhesive, and have pH range recommended in writing by carpet manufacturer.

D. Where demountable partitions or other items are indicated for installation on top of carpet, install carpet before installing these items.

1.11 WARRANTY

A. Special Warranty for Carpet: Manufacturer agrees to repair or replace components of carpet installation that fail in materials or workmanship within specified warranty period.

1. Warranty does not include deterioration or failure of carpet due to unusual traffic, failure of substrate, vandalism, or abuse.
2. Failures include, but are not limited to, the following:

    a. More than 10 percent loss of face fiber, edge raveling, snags, and runs.
    b. Loss of tuft-bind strength.
    c. Excess static discharge.
    d. Delamination.

3. Warranty Period: [**10**][**15**]<**Insert number**> years from date of Substantial Completion.

B. Special Warranty for Carpet Cushion: Manufacturer agrees to repair or replace components of carpet cushion installation that fail in materials or workmanship within specified warranty period.

1. Warranty includes removal and replacement of carpet and accessories required by replacement of carpet cushion.
2. Warranty does not include deterioration or failure of carpet cushion due to unusual traffic, failure of substrate, vandalism, or abuse.
3. Failure includes, but is not limited to, permanent indentation or compression.
4. Warranty Period: [**10**]<**Insert number**> years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 TUFTED CARPET

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Beaulieu International Group**]
2. [**Bentley Mills, Inc.**]

3. [**Couristan, Inc.**]
4. [**Interface, Inc.**]
5. [**J&J Flooring Group LLC**]
6. [**Mannington Commercial; a business unit of Mannington Mills, Inc.**]
7. [**Mohawk Carpet, LLC; The Mohawk Group**]
8. [**Shaw Industries Group, Inc.; Berkshire Hathaway Company**]
9. [**Tarkett USA**]
10. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Beaulieu International Group**]
2. [**Bentley Mills, Inc.**]
3. [**Couristan, Inc.**]
4. [**Interface, Inc.**]
5. [**J&J Flooring Group LLC**]
6. [**Mannington Commercial; a business unit of Mannington Mills, Inc.**]
7. [**Mohawk Carpet, LLC; The Mohawk Group**]
8. [**Shaw Industries Group, Inc.; Berkshire Hathaway Company**]
9. [**Tarkett USA**]
10. <**Insert manufacturer's name**>

C. Color: [**As indicated by manufacturer's designations**][**Match Architect's samples**][**As selected by Architect from manufacturer's full range**]<**Insert color**>.

D. Pattern: [**Match Architect's samples**]<**Insert pattern**>.

E. Fiber Content: [**100 percent nylon 6,6**][**100 percent nylon 6**][**100 percent polypropylene**]<**Insert fiber and content by percentage**>.

F. Fiber Type: <**Insert proprietary fiber type**>.

G. Pile Characteristic: [**Level-loop**][**Cut**][**Cut-and-loop**][**Multilevel-loop**][**Level tip shear**][**Random shear**][**Frieze**][**Sculptured**]<**Insert characteristic**> pile.

H. Yarn Twist: <**Insert twist in TPI (TPCM)**>.

I. Yarn Count: <**Insert yarn count**>.

J. Density: <**Insert oz./cu. yd. (g/cu. cm)**>.

K. Pile Thickness: <**Insert inches (mm)**> for finished carpet[**in accordance with ASTM D6859**].

L. Stitches: <**Insert stitches per inch (mm)**>.

M. Gage: <**Insert gage in ends per inch (mm)**>.

N. Face Weight: <**Insert oz./sq. yd. (g/sq. m)**>.

O. Total Weight: <**Insert oz./sq. yd. (g/sq. m)**> for finished carpet.

P. Primary Backing: [**Manufacturer's standard material**][**Woven polypropylene**][**Nonwoven, polypropylene or polyester**]<**Insert specific primary backing material**>.

Q. Secondary Backing: [**Manufacturer's standard material**][**Woven polypropylene**][**Nonwoven, polypropylene or polyester**][**Woven jute**][**Fiberglass**]<**Insert specific secondary backing material**>.

R. Backcoating: [**Manufacturer's standard material**][**SBR latex**]<**Insert backcoating; consult manufacturers**>.

S. Backing System: <**Insert proprietary name**>.

T. Roll Width: [**12 ft. (3.7 m)**][**6 ft. (1.8 m)**][**13.5 ft. (4.1 m)**][**15 ft. (4.6 m)**]<**Insert dimension**>.

U. Applied Treatments:

1. Applied Soil-Resistance Treatment: [**Manufacturer's standard material**]<**Insert treatment**>.
2. Antimicrobial Treatment: [**Manufacturer's standard material**]<**Insert treatment**>.

    a. Antimicrobial Activity: Not less than 2 mm halo of inhibition for gram-positive bacteria, not less than 1 mm halo of inhibition for gram-negative bacteria, and no fungal growth, in accordance with AATCC 174.

V. Sustainable Design Requirements:

1. Sustainable Product Certification: [**Silver**][**Gold**][**Platinum**] level certification in accordance with NSF/ANSI 140.
2. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.
4. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Verify Adhesives have a VOC content of [**50**]<**Insert number**> g/L or less.
6. Extended Producer Responsibility: Provide documentation of manufacturer participation in an extended producer responsibility program.
7. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.

W. Performance Characteristics:

1. Texture Appearance Retention Rating (TARR): [**Moderate traffic, 2.5**][**Heavy traffic, 3.0**][**Severe traffic, 3.5**]<**Insert number**> minimum in accordance with ASTM D7330.
2. Critical Radiant Flux Classification: Not less than [**0.45 W/sq. cm**][**0.22 W/sq. cm**] in accordance with NFPA 253.
3. Dry Breaking Strength: Not less than **100 lbf (445 N)** in accordance with ASTM D2646.
4. Tuft Bind: Not less than [**3 lbf (13 N)**][**5 lbf (22 N)**][**6.2 lbf (28 N)**][**8 lbf (36 N)**][**10 lbf (45 N)**]<**Insert value**> in accordance with ASTM D1335.
5. Delamination: Not less than [**2.5 lbf/in. (0.4 N/mm)**][**3.5 lbf/in. (0.6 N/mm)**][**4 lbf/in. (0.7 N/mm)**]<**Insert value**> in accordance with ASTM D3936.
6. Noise Reduction Coefficient (NRC): <**Insert NRC**> in accordance with ASTM C423.
7. Colorfastness to Crocking: Not less than 4, wet and dry, in accordance with AATCC 165.
8. Colorfastness to Light: Not less than 4 after [**40**][**60**]<**Insert number**> AFU (AATCC fading units) in accordance with AATCC 16.3 Option 3.

9. Electrostatic Propensity: Less than [**3.5**][**2**]<**Insert number**> kV in accordance with AATCC 134.

2.2 WOVEN CARPET

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Axminster Carpets**]
2. [**Bentley Mills, Inc.**]
3. [**Bloomsburg Carpet Industries, Inc.**]
4. [**Couristan, Inc.**]
5. [**Langhorne Carpet Company**]
6. [**Mohawk Carpet, LLC; The Mohawk Group**]
7. [**Prestige Mills, Inc.**]
8. [**Stanton Carpet Corporation**]
9. [**Tarkett USA**]
10. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Axminster Carpets**]
2. [**Bentley Mills, Inc.**]
3. [**Bloomsburg Carpet Industries, Inc.**]
4. [**Couristan, Inc.**]
5. [**Langhorne Carpet Company**]
6. [**Mohawk Carpet, LLC; The Mohawk Group**]
7. [**Prestige Mills, Inc.**]
8. [**Stanton Carpet Corporation**]
9. [**Tarkett USA**]
10. <**Insert manufacturer's name**>

C. Color: [**As indicated by manufacturer's designations**][**Match Architect's samples**][**As selected by Architect from manufacturer's full range**]<**Insert color**>.

D. Pattern: [**Match Architect's samples**]<**Insert pattern**>.

E. Fiber Content: [**100 percent wool**][**80 percent wool; 20 percent nylon 6,6**][**80 percent wool; 20 percent nylon 6**]<**Insert fiber and content by percentage**>.

F. Face Construction: [**Axminster**][**Wilton**][**Velvet**]<**Insert construction**>.

G. Pile Characteristic: [**Level-loop**][**Cut**][**Cut-and-loop**] pile.

H. Yarn Twist: <**Insert twist in TPI (TPCM)**>.

I. Yarn Count: <**Insert yarn count**>.

J. Density: <**Insert oz./cu. yd. (g/cu. cm)**>.

K. Pile Thickness: <**Insert inches (mm)**> for finished carpet[**in accordance with ASTM D6859**].

L. Rows: <**Insert number of lengthwise tufts per inch (mm)**>.

M. Pitch: <**Insert number of rows in 27 inches (686 mm)**>.

N. Face Weight: <**Insert oz./sq. yd. (g/sq. m)**>.

O. Total Weight: <**Insert oz./sq. yd. (g/sq. m)**> for finished carpet.

P. Backing: [**Manufacturer's standard.**][**As follows:**]

1. Chain Warp: <**Insert material**>.
2. Stuffer Warp: <**Insert material**>.
3. Shot or Fill Weft: <**Insert material**>.
4. Backcoating: <**Insert backcoating**>.

Q. Applied Treatments:

1. Applied Soil-Resistance Treatment: [**Manufacturer's standard material**]<**Insert treatment**>.
2. Antimicrobial Treatment: [**Manufacturer's standard material**]<**Insert treatment**>.

a. Antimicrobial Activity: Not less than 2 mm halo of inhibition for gram-positive bacteria, not less than 1 mm halo of inhibition for gram-negative bacteria, and no fungal growth, in accordance with AATCC 174.

R. Sustainable Design Requirements:

1. Sustainable Product Certification: [**Silver**][**Gold**][**Platinum**] level certification in accordance with NSF/ANSI 140.
2. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.
4. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
5. Extended Producer Responsibility: Provide documentation of manufacturer participation in an extended producer responsibility program.
6. Life-Cycle Analysis: Provide documentation indicating product contribution to reduction in global warming potential, depletion of the stratospheric ozone layer, acidification of land and water sources, eutrophication, formation of tropospheric ozone, and depletion of nonrenewable energy resources.
7. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.

S. Performance Characteristics:

1. Texture Appearance Retention Rating (TARR): [**Moderate traffic, 2.5**][**Heavy traffic, 3.0**][**Severe traffic, 3.5**]<**Insert number**> minimum in accordance with ASTM D7330.
2. Critical Radiant Flux Classification: Not less than [**0.45 W/sq. cm**][**0.22 W/sq. cm**] in accordance with NFPA 253.
3. Dry Breaking Strength: Not less than **100 lbf (445 N)** in accordance with ASTM D2646.
4. Noise Reduction Coefficient (NRC): <**Insert NRC**> in accordance with ASTM C423.
5. Colorfastness to Crocking: Not less than 4, wet and dry, in accordance with AATCC 165.
6. Colorfastness to Light: Not less than 4 after [**40**][**60**]<**Insert number**> AFU (AATCC fading units)

in accordance with AATCC 16.3 Option 3.

7. Electrostatic Propensity: Less than [**3.5**][**2**]<**Insert number**> kV in accordance with AATCC 134.

2.3 CARPET CUSHION

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Carpenter Co.**]
2. [**Dalton Foam; Barnhardt Manufacturing Company**]
3. [**Dura Undercushions Ltd.**]
4. [**Foam Products Corporation**]
5. [**TredMOR by SCI; Leggett & Platt, Inc.**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Carpenter Co.**]
2. [**Dalton Foam; Barnhardt Manufacturing Company**]
3. [**Dura Undercushions Ltd.**]
4. [**Foam Products Corporation**]
5. [**TredMOR by SCI; Leggett & Platt, Inc.**]
6. <**Insert manufacturer's name**>

C. Traffic Classification: Carpet Cushion Council's [**Class I, moderate**][**Class II, heavy**][**Class III, extra-heavy**] traffic.

D. Fiber Cushion: [**Rubberized hair, mothproofed and sterilized**][**Rubberized jute, mothproofed and sterilized**][**Synthetic**][**Resinated, recycled textile**].

1. Weight: <**Insert oz./sq. yd. (g/sq. m)**>.
2. Thickness: <**Insert inches (mm)**> plus 5 percent maximum.
3. Density: <**Insert lb/cu. ft. (kg/cu. m)**>.

E. Rubber Cushion: [**Flat**][**Rippled waffle**][**Textured flat**][**Reinforced**].

1. Weight: <**Insert oz./sq. yd. (g/sq. m)**>.
2. Thickness: <**Insert inches (mm)**> plus 5 percent maximum.
3. Compression Resistance: <**Insert lb/sq. in. (kg/sq. mm)**> at [**25**][**65**] percent in accordance with ASTM D3676.
4. Density: <**Insert lb/cu. ft. (kg/cu. m)**>.

F. Polyurethane-Foam Cushion: [**Grafted prime**][**Densified**][**Bonded**][**Mechanically frothed**].

1. Compression Force Deflection at 65 Percent: <**Insert lb/sq. in. (kg/sq. mm) of polymer density**> in accordance with ASTM D3574.
2. Thickness: <**Insert inches (mm)**>.
3. Density: <**Insert lb/cu. ft. (kg/cu. m)**>.

G. Performance Characteristics:

1. Critical Radiant Flux Classification: Not less than [**0.45 W/sq. cm**][**0.22 W/sq. cm**] in accordance with NFPA 253.

2. Noise Reduction Coefficient (NRC): <**Insert NRC**> in accordance with ASTM C423.

H. Sustainable Design Requirements:

1. Sustainable Product Certification: [**Silver**][**Gold**][**Platinum**] level certification in accordance with NSF/ANSI 140.
2. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.
4. Verify flooring products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

2.4 INSTALLATION ACCESSORIES

A. Trowelable Leveling and Patching Compounds: Latex-modified, hydraulic-cement-based formulation provided or recommended in writing by [**carpet**][**carpet cushion**] manufacturer.

B. Adhesives: Water-resistant, mildew-resistant, nonstaining types to suit products and subfloor conditions indicated, that comply with flammability requirements for installed carpet and that are recommended in writing or provided by [**carpet manufacturer**][**carpet and carpet cushion manufacturers**].

C. Tackless Carpet Stripping: Water-resistant plywood, in strips as required to match cushion thickness and that comply with CRI 104.

D. Seam Adhesive: Hot-melt adhesive tape or similar product recommended in writing by carpet manufacturer for sealing and taping seams and butting cut edges at backing to form secure seams and to prevent pile loss at seams.

E. Metal Edge/Transition Strips: Extruded aluminum with [**mill**]<**Insert finish**> finish of profile and width shown, of height required to protect exposed edge of carpet, and of maximum lengths to minimize running joints.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for maximum moisture content, alkalinity range, installation tolerances, and other conditions affecting carpet performance.

B. Examine carpet for type, color, pattern, and potential defects.

C. Concrete Slabs: Verify that finishes comply with requirements specified in Section 033000 "Cast-in-Place Concrete" and that surfaces are free of cracks, ridges, depressions, scale, and foreign deposits.

1. Moisture Testing: Perform tests so that each test area does not exceed [**200 sq. ft.**

(20 sq. m)][1000 sq. ft. (100 sq. m)]<**Insert area**>, and perform no fewer than three tests in each installation area and with test areas evenly spaced in installation areas.

a. Anhydrous Calcium Chloride Test: ASTM F1869. Proceed with installation only after substrates have maximum moisture-vapor-emission rate of [**3 lb of water/1000 sq. ft. (1.36 kg of water/100 sq. m)**]<**Insert emission**> in 24 hours.
b. Relative Humidity Test: Using in situ probes, ASTM F2170. Proceed with installation only after substrates have a maximum [**75**]<**Insert number**> percent relative humidity level measurement.
c. Perform additional moisture tests recommended in writing by [**adhesive and carpet**][**adhesive, carpet cushion, and carpet**] manufacturers. Proceed with installation only after substrates pass testing.

D. Wood Subfloors: Verify the following:

1. Underlayment over subfloor complies with requirements specified in Section 061600 "Sheathing."
2. Underlayment surface is free of irregularities and substances that may interfere with adhesive bond or show through surface.

E. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. General: Comply with CRI 104 and with carpet manufacturer's written installation instructions for preparing substrates.

B. Use trowelable leveling and patching compounds, in accordance with manufacturer's written instructions, to fill cracks, holes, depressions, and protrusions in substrates. Fill or level cracks, holes and depressions **1/8 inch (3 mm)** wide or wider, and protrusions more than **1/32 inch (0.8 mm)**, unless more stringent requirements are required by manufacturer's written instructions.

C. Concrete Substrates: Remove coatings, including curing compounds, and other substances that are incompatible with adhesives and that contain soap, wax, oil, or silicone, without using solvents. Use mechanical methods recommended in writing by [**adhesive and carpet**][**adhesive, carpet, and carpet cushion**] manufacturers.

D. Broom and vacuum clean substrates to be covered immediately before installing carpet.

3.3 INSTALLATION

A. Comply with CRI 104 and [**carpet manufacturer's**][**carpet and carpet cushion manufacturers'**] written installation instructions for the following:

1. Direct-glue-down installation.
2. Double-glue-down installation.
3. Carpet with attached-cushion installation.
4. Preapplied adhesive installation.
5. Hook-and-loop installation.
6. Stretch-in installation.
7. Stair installation.

B. Comply with carpet manufacturer's written instructions and Shop Drawings for seam locations and direction of carpet; maintain uniformity of carpet direction and lay of pile. At doorways, center seams under the door in closed position.

1. Stretch-in Carpet Installation: Install carpet cushion seams at 90-degree angle with carpet seams.

C. Install [**pattern parallel to walls and borders**][**as indicated on Drawings**]<**Insert requirements**>.

D. Install borders with mitered corner seams.

E. Do not bridge building expansion joints with carpet.

F. Cut and fit carpet to butt tightly to vertical surfaces, permanent fixtures, and built-in furniture including cabinets, pipes, outlets, edgings, thresholds, and nosings. Bind or seal cut edges as recommended in writing by carpet manufacturer.

G. Extend carpet into toe spaces, door reveals, closets, open-bottomed obstructions, removable flanges, alcoves, and similar openings.

H. Maintain reference markers, holes, and openings that are in place or marked for future cutting by repeating on carpet as marked on subfloor. Use nonpermanent, nonstaining marking device.

3.4 CLEANING AND PROTECTION

A. Perform the following operations immediately after installing carpet:

1. Remove excess adhesive, seam sealer, and other surface blemishes using cleaner recommended in writing by carpet manufacturer.
2. Remove yarns that protrude from carpet surface.
3. Vacuum carpet using commercial machine with face-beater element.

B. Protect installed carpet to comply with CRI 104, Section 13.7.

C. Protect carpet against damage from construction operations and placement of equipment and fixtures during the remainder of construction period. Use protection methods indicated or recommended in writing by carpet manufacturer [**and carpet cushion manufacturer**][**and carpet adhesive manufacturer**][**and carpet cushion and adhesive manufacturers**].

END OF SECTION 09 01 60 91C

Task	Specification	Specification Description
09 01 60 91	01 22 00 00	No Specification Required
09 01 60 91	07 92 00 00	Joint Sealants

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 01 90 52 - MAINTENANCE OF CAST-IN-PLACE CONCRETE

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Bonding agents.
2. Patching mortar.
3. Preplaced concrete materials.
4. Joint filler.
5. Epoxy crack-injection materials.
6. Corrosion-inhibiting materials.
7. Polymer-overlay materials.
8. Polymer-sealer materials.
9. Composite reinforcement materials.

1.2 ALLOWANCES

A. Allowances for maintenance of cast-in-place concrete are specified in Section 012100 "Allowances."

B. Field quality-control testing is part of testing and inspecting allowance.

1.3 UNIT PRICES

A. Work of this Section is affected by unit prices specified in Section 012200 "Unit Prices."

1. Unit prices apply to authorized work covered by [**quantity allowances**][**estimated quantities**].
2. Unit prices apply to authorized additions to and deletions from the Work as authorized by Change Orders.

B. General: Unit prices include the cost of preparing existing construction to receive the Work indicated[**and costs of field quality control required for units of Work completed**].

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**].

1. Review methods and procedures related to concrete work, including, but not limited to, the following:

a. Verify concrete-maintenance specialist's personnel, equipment, and facilities needed to make progress and avoid delays.
b. Concrete restoration specialist.
c. Materials, material application, sequencing, tolerances, and required clearances.
d. Shoring and bracing.
e. Quality-control program.
f. Coordination with building occupants.

1.5 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.

a. Include construction details, material descriptions, chemical composition, physical properties, test data, and mixing, preparation, project application types consisting of horizontal, vertical or overhead locations and application instructions.

B. Shop Drawings:

1. Shoring and Bracing: Provide Drawings or documentation to ensure that structure and temporary supports withstand the anticipated loads during construction and the effect of demolition on the capacity of the structure. Submit design calculations, sealed by an engineer licensed in state of Project, for shoring and bracing where required by the extent of structural repairs or removal of deteriorated concrete and subsequent replacement.

C. Samples: Cured Samples for each exposed product and for each color and texture specified, [**in manufacturer's standard size appropriate for each type of work**].

D. Samples for Initial Selection: Cured Samples for each exposed product and for each color and texture.

1. Include sets of patching-material Samples in the form of briquettes, at least [**3 inches (75 mm) long by 1-1/2 inches (38 mm) wide**] representative of the range of concrete colors on the building. Document each Sample with product, mix, and/or other information necessary to replicate it.
2. Include sets of Samples for epoxy crack-injection adhesive and capping adhesive in the form of injection-treated, whole, dense concrete block or brick units representative of the range of required adhesive colors.
3. Include sets of polymer-overlay Samples in the form of treated cementitious tiles at least [**4 inches (100 mm) long by 4 inches (100 mm) wide**] representative of the range of required colors and textures.
4. Include sets of polymer-sealer Samples in the form of treated cementitious tiles at least [**4 inches (100 mm) long by 4 inches (100 mm) wide**] representative of the range of required colors and textures.
5. Have each set of Samples contain a close color range of at least [**three**][**six**] Samples of different mixes of materials that match the variations in existing, adjacent concrete when cured and dry.

E. Samples for Verification: Cured Samples for each exposed product and for each color and texture specified.

1. Include Samples of each required type, color, and texture of patching material in the form of patches in drilled holes or sawed joints in sample concrete representative of the range of concrete colors on the building.
2. Include Samples of epoxy crack-injection adhesive in the form of injection-treated, whole, dense concrete block or brick units representative of the range of required adhesive colors.
3. Include Samples of each required type, color, and texture of polymer-overlay material in the form of cementitious tiles at least [**8 inches (200 mm) long by 8 inches (200 mm) wide**].
4. Include Samples of each required type, color, and texture of polymer-sealer material in the form of cementitious tiles at least [**8 inches (200 mm) long by 8 inches (200 mm) wide**].

1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For [**concrete-maintenance specialist**][**and**][**manufacturers**].

B. Material Certificates: For each type of [**portland cement**][**aggregate**] supplied for mixing or adding to products at Project site.

C. Product Test Reports: For each [**manufactured bonding agent**][**cementitious patching mortar**][**joint filler**][**crack-injection adhesive**][**polymer overlay**][**polymer sealer**][**and**][**composite structural reinforcement**], for tests performed by manufacturer and witnessed by a qualified testing agency.

D. Field quality-control reports.

E. Quality-Control Program: Submit before work begins.

1.7 QUALITY ASSURANCE

A. Manufacturer Qualifications: Each [**manufactured bonding-agent**][**packaged patching-mortar**][**joint-filler**][**crack-injection-adhesive**][**corrosion-inhibiting-treatment**][**polymer-overlay**][**polymer-sealer**][**and**][**composite-structural-reinforcement**] manufacturer must employ factory-authorized service representatives who are available for consultation and Project-site inspection and on-site assistance.

B. Concrete-Maintenance Specialist Qualifications: Engage an experienced concrete-maintenance firm that employs installers and supervisors who are trained and approved by manufacturer to apply [**packaged patching-mortar**][**crack-injection adhesive**][**corrosion-inhibiting treatments**][**polymer overlays**][**polymer sealers**][**and**][**composite structural reinforcement**] when performing the Work of this Section. Firm must have completed work similar in material, design, and extent to that indicated for this Project with a record of successful in-service performance. Experience in only installing or patching new concrete is insufficient experience for concrete-maintenance work.

1. Field Supervision: Concrete-maintenance specialist firm must maintain experienced full-time supervisors on Project site during times that concrete-maintenance work is in progress.

C. Quality-Control Program: Prepare a written plan for concrete maintenance to systematically demonstrate the ability of personnel to properly perform maintenance work, including each phase or process, protection of surrounding materials during operations, and control of debris and runoff during the Work. Describe in detail materials, methods, equipment, and sequence of operations to be used for each phase of the Work.

D. Ready-Mixed Concrete Manufacturer Qualifications: A firm experienced in manufacturing ready-mixed concrete products and that complies with ASTM C94/C94M requirements for production facilities and equipment.

1.8 MOCKUPS

A. Build mockups to demonstrate aesthetic effects and to set quality standards for materials and execution.

1. Concrete Removal and Patching Mockup: Remove and repair an [**approximately 50 sq. ft. (4.6 sq. m)**][**approximately 100 sq. in. (645 sq. cm)**] area of [**deteriorated concrete deck**][**deteriorated concrete wall**].
2. Floor Joint Repair Mockup: Cut out and reinstall joints in two separate areas [**, each approximately 48 inches (1200 mm) long**][**as indicated on Drawings**].
3. Epoxy Crack Injection Mockup: Perform epoxy crack-injection material in two separate areas [**,**

each approximately 48 inches (1200 mm) long][as indicated on Drawings].

4. Polymer-Overlay Mockup: Apply an [**approximately 50 sq. ft. (4.6 sq. m)**] area of polymer overlay.
5. Polymer Sealer Mockup: Apply an [**approximately 50 sq. ft. (4.6 sq. m)**] area of polymer sealer.
6. Composite Structural-Reinforcement Mockup: Apply composite structural reinforcement [**a minimum of 48 inches (1200 mm) long][as indicated on Drawings**].
7. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
8. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Comply with manufacturer's written instructions for minimum and maximum temperature requirements and other conditions for storage.

B. Store cementitious materials off the ground, under cover, and in a dry location.

C. Store aggregates covered and in a dry location; maintain grading and other required characteristics and prevent contamination.

1.10 FIELD CONDITIONS

A. Environmental Limitations for Epoxies: Do not apply when air and substrate temperatures are outside limits permitted by manufacturer. During hot weather, cool epoxy components before mixing, store mixed products in shade, and cool unused mixed products to retard setting. Do not apply to wet substrates unless approved by manufacturer.

1. Use only Class A epoxies when substrate temperatures are below or are expected to go below **40 deg F (5 deg C)** within eight hours.
2. Use only Class A or B epoxies when substrate temperatures are below or are expected to go below **60 deg F (16 deg C)** within eight hours.
3. Use only Class C epoxies when substrate temperatures are above and are expected to stay above **60 deg F (16 deg C)** for eight hours.

B. Cold-Weather Requirements for Cementitious Materials:

1. Do not apply unless concrete surface and air temperatures are above **40 deg F (5 deg C)** and will remain so for at least 48 hours after completion of Work.
2. Comply with the following procedures:

    a. When air temperature is below **40 deg F (5 deg C)**, heat patching-material ingredients and existing concrete to produce temperatures between **40 and 90 deg F (5 and 32 deg C)**.
    b. When mean daily air temperature is between **25 and 40 deg F (minus 4 and plus 5 deg C)**, cover completed Work with weather-resistant insulating blankets for 48 hours after repair or provide enclosure and heat to maintain temperatures above **32 deg F (0 deg C)** within the enclosure for 48 hours after repair.
    c. When mean daily air temperature is below **25 deg F (minus 4 deg C)**, provide enclosure and heat to maintain temperatures above **32 deg F (0 deg C)** within the enclosure for 48 hours after repair.

C. Hot-Weather Requirements for Cementitious Materials: Protect repair work when temperature and humidity conditions produce excessive evaporation of water from patching materials. Provide artificial

shade and wind breaks, and use cooled materials as required. Do not apply to substrates with temperatures of **90 deg F (32 deg C)** and above.

D. Environmental Limitations for High-Molecular-Weight Methacrylate Sealers: Do not apply when concrete surface temperature is below **55 deg F (13 deg C)** or above [**75 deg F (24 deg C)**][**90 deg F (32 deg C)**]. Apply only to [**dry substrates**][**substrates that have been dry for at least 72 hours**].

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. For repair products, obtain each color, grade, finish, type, and variety of product from single source and from single manufacturer with resources to provide products of consistent quality in appearance and physical properties.

2.2 BONDING AGENTS

A. Epoxy-Modified, Cementitious Bonding and Anticorrosion Agent: Manufactured product that consists of water-insensitive epoxy adhesive, portland cement, and water-based solution of corrosion-inhibiting chemicals that forms a protective film on steel reinforcement.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ARDEX Americas**]
    b. [**Dayton Superior Corporation**]
    c. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
    d. [**Kaufman Products, Inc**]
    e. [**MAPEI Corporation**]
    f. [**Master Builders Solutions**]
    g. [**Sika Corporation**]
    h. [**SpecChem, LLC**]
    i. [**Sto Corp.**]

B. Epoxy Bonding Agent: ASTM C881/C881M [**Type II**][**Type V**] bonding system, free of VOCs.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Abatron, Inc**]
    b. [**ChemCo Systems, Inc.**]
    c. [**Dayton Superior Corporation**]
    d. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
    e. [**Kaufman Products, Inc**]
    f. [**MAPEI Corporation**]
    g. [**Master Builders Solutions**]
    h. [**Sika Corporation**]

i. [**Sto Corp.**]
j. [**US SPEC, Division of US MIX Company**]
k. [**Xypex Chemical Corporation**]

C. Latex Bonding Agent, Redispersible: Type I, ASTM C1059/C1059M[**for use at nonstructural and interior locations unless otherwise indicated**].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Dayton Superior Corporation**]
b. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
c. [**Kaufman Products, Inc**]
d. [**US SPEC, Division of US MIX Company**]
e. [**W. R. Meadows, Inc**]

D. Latex Bonding Agent, Nonredispersible: Type II, ASTM C1059/C1059M[**for use at structural and exterior locations and where indicated**].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ChemMasters, Inc**]
b. [**Dayton Superior Corporation**]
c. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
d. [**Kaufman Products, Inc**]
e. [**MAPEI Corporation**]
f. [**US SPEC, Division of US MIX Company**]
g. [**W. R. Meadows, Inc**]

E. Mortar Scrub Coat: Mix consisting of 1 part portland cement and 1 part fine aggregate complying with ASTM C144, except 100 percent passing a **No. 16 (1.18-mm)** sieve.

2.3 PATCHING MORTAR

A. Patching Mortar Requirements:

1. Only use patching mortars that are recommended by manufacturer for each applicable horizontal, vertical, or overhead use orientation.
2. Color and Aggregate Texture: Provide patching mortar and aggregates of colors and sizes necessary to produce patching mortar[**where indicated**] that matches existing, adjacent, and exposed concrete. Blend several aggregates if necessary to achieve suitable matches.
3. Coarse Aggregate for Patching Mortar: ASTM C33/C33M, Size No. 8, Class 5S washed aggregate. Add to patching-mortar mix only as permitted by patching-mortar manufacturer.

B. Job-Mixed Patching Mortar : 1 part portland cement and 2-1/2 parts fine aggregate complying with ASTM C144, except 100 percent passing a **No. 16 (1.18-mm)** sieve.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**CGM, Incorporated**]
b. [**ChemMasters, Inc**]
c. [**Dayton Superior Corporation**]
d. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
e. [**Kaufman Products, Inc**]
f. [**KOSTER American Corporation**]
g. [**MAPEI Corporation**]
h. [**Master Builders Solutions**]
i. [**Sika Corporation**]
j. [**Simpson Strong-Tie Co., Inc.**]
k. [**Sto Corp.**]
l. [**Tnemec Company, Inc.**]
m. [**US SPEC, Division of US MIX Company**]
n. [**W. R. Meadows, Inc**]

C. Cementitious Patching Mortar : Packaged, dry mix for repair of concrete.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**CGM, Incorporated**]
b. [**ChemMasters, Inc**]
c. [**Dayton Superior Corporation**]
d. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
e. [**Kaufman Products, Inc**]
f. [**KOSTER American Corporation**]
g. [**MAPEI Corporation**]
h. [**Master Builders Solutions**]
i. [**Schonox HPS North America, Inc.**]
j. [**Sika Corporation**]
k. [**Simpson Strong-Tie Co., Inc.**]
l. [**Sto Corp.**]
m. [**Tnemec Company, Inc.**]
n. [**United Gilsonite Laboratories (UGL)**]
o. [**US SPEC, Division of US MIX Company**]
p. [**W. R. Meadows, Inc**]
q. [**Xypex Chemical Corporation**]

2. Compressive Strength: Not less than [**4000 psi (27.6 MPa)**][**5000 psi (34.5 MPa)**][**6000 psi (41.4 MPa)**] at [**28 days**] when tested in accordance with ASTM C109/C109M.

D. Rapid-Strengthening, Cementitious Patching Mortar : [**ASTM C928/C928M**] packaged, dry mix for repair of concrete.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ARDEX Americas**]
    b. [**CGM, Incorporated**]
    c. [**ChemMasters, Inc**]
    d. [**Dayton Superior Corporation**]
    e. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
    f. [**Kaufman Products, Inc**]
    g. [**MAPEI Corporation**]
    h. [**Master Builders Solutions**]
    i. [**Schonox HPS North America, Inc.**]
    j. [**Sika Corporation**]
    k. [**Simpson Strong-Tie Co., Inc.**]
    l. [**Sto Corp.**]
    m. [**US SPEC, Division of US MIX Company**]
    n. [**W. R. Meadows, Inc**]

2. Compressive Strength: Not less than [**1000 psi (7.0 MPa)**][**2000 psi (13.8 MPa)**][**3000 psi (21.0 MPa)**][**4000 psi (27.6 MPa)**] within [**three**] hours when tested in accordance with ASTM C109/C109M.

E. Polymer-Modified, Cementitious Patching Mortar : Packaged, dry mix for repair of concrete and that contains a[**nonredispersible**] latex additive as either a dry powder or a separate liquid that is added during mixing.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**AQUAFIN, Inc**]
    b. [**ARDEX Americas**]
    c. [**CGM, Incorporated**]
    d. [**ChemMasters, Inc**]
    e. [**Cortec Corporation**]
    f. [**Dayton Superior Corporation**]
    g. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
    h. [**Kaufman Products, Inc**]
    i. [**MAPEI Corporation**]
    j. [**Master Builders Solutions**]
    k. [**Schonox HPS North America, Inc.**]
    l. [**Sika Corporation**]
    m. [**Simpson Strong-Tie Co., Inc.**]
    n. [**Sto Corp.**]
    o. [**United Gilsonite Laboratories (UGL)**]
    p. [**US SPEC, Division of US MIX Company**]
    q. [**Uzin Utz North America, Inc.**]
    r. [**W. R. Meadows, Inc**]

2. Compressive Strength: Not less than [**4000 psi (27.6 MPa)**][**5000 psi (34.5 MPa)**][**6000 psi (41.4 MPa)**] at [**28 days**] when tested in accordance with ASTM C109/C109M.

F. Polymer-Modified, Silica-Fume-Enhanced, Cementitious Patching Mortar : Packaged, dry mix for repair of concrete and that contains silica fume complying with ASTM C1240 and a[**nonredispersible**] latex additive as either a dry powder or a separate liquid that is added during mixing.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**AQUAFIN, Inc**]
b. [**CGM, Incorporated**]
c. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
d. [**MAPEI Corporation**]
e. [**Master Builders Solutions**]
f. [**Sika Corporation**]
g. [**Simpson Strong-Tie Co., Inc.**]
h. [**Sto Corp.**]
i. [**W. R. Meadows, Inc**]

2. Compressive Strength: Not less than [**4000 psi (27.6 MPa)**][**5000 psi (34.5 MPa)**][**6000 psi (41.4 MPa)**] at [**28 days**] when tested in accordance with ASTM C109/C109M.

2.4 PREPLACED CONCRETE MATERIALS

A. Preplaced Aggregate: Washed aggregate, ASTM C33/C33M, Class 5S, with [**95 to 100 percent passing a 1-1/2-inch (38-mm) sieve, 40 to 80 percent passing a 1-inch (25-mm) sieve, 20 to 45 percent passing a 3/4-inch (19-mm) sieve, zero to 10 percent passing a 1/2-inch (12.7-mm) sieve, and zero to 2 percent passing a 3/8-inch (9.5-mm) sieve**][**100 percent passing a 1-1/2-inch (38-mm) sieve, 95 to 100 percent passing a 1-inch (25-mm) sieve, 40 to 80 percent passing a 3/4-inch (19-mm) sieve, zero to 15 percent passing a 1/2-inch (12.7-mm) sieve, and zero to 2 percent passing a 3/8-inch (9.5-mm) sieve**].

B. Fine Aggregate for Grout: Fine aggregate in accordance with ASTM C33/C33M, but with 100 percent passing a **No. 8 (2.36-mm)** sieve, 95 to 100 percent passing a **No. 16 (1.18-mm)** sieve, 55 to 80 percent passing a **No. 30 (0.6-mm)** sieve, 30 to 55 percent passing a **No. 50 (0.3-mm)** sieve, 10 to 30 percent passing a **No. 100 (0.15-mm)** sieve, zero to 10 percent passing a **No. 200 (0.075-mm)** sieve, and having a fineness modulus of 1.30 to 2.10.

C. Grout Fluidifier for Grout: ASTM C937.

D. Pozzolans for Grout: ASTM C618.

2.5 JOINT FILLER

A. Epoxy Joint Filler: Two-component, semirigid, 100 percent solids, epoxy resin with a Shore A durometer hardness of at least 80 in accordance with ASTM D2240.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**SIMIRON Inc.**]
b. [**Abatron, Inc**]
c. [**ChemCo Systems, Inc.**]
d. [**Dayton Superior Corporation**]
e. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
f. [**Kaufman Products, Inc**]
g. [**MAPEI Corporation**]
h. [**Master Builders Solutions**]
i. [**Metzger/McGuire**]
j. [**Sika Corporation**]

B. Polyurea Joint Filler: Two-component, semirigid, 100 percent solids, polyurea resin with a Shore A durometer hardness of at least 80 in accordance with ASTM D2240.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**SIMIRON Inc.**]
b. [**ARDEX Americas**]
c. [**ASTC Global, Inc.**]
d. [**ChemCo Systems, Inc.**]
e. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
f. [**HTS Chemical; Hi-Tech Systems**]
g. [**Kaufman Products, Inc**]
h. [**Master Builders Solutions**]
i. [**Metzger/McGuire**]
j. [**SpecChem, LLC**]
k. [**US SPEC, Division of US MIX Company**]

C. Color: [**As indicated by manufacturer's designations**][**Matching existing joint filler**][**As selected by Architect from full range of industry colors**].

2.6 EPOXY CRACK-INJECTION MATERIALS

A. Epoxy Crack-Injection Adhesive: ASTM C881/C881M, bonding system [**Type I,**][**Type IV,**][**Type IV at structural locations and where indicated, Type I at other locations;**] free of VOCs.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Abatron, Inc**]
b. [**ChemCo Systems, Inc.**]
c. [**Dayton Superior Corporation**]
d. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]

e. [**Fyfe Co. LLC**]
f. [**Kaufman Products, Inc**]
g. [**MAPEI Corporation**]
h. [**Master Builders Solutions**]
i. [**Sika Corporation**]
j. [**Sto Corp.**]
k. [**US SPEC, Division of US MIX Company**]
l. [**W. R. Meadows, Inc**]

2. Capping Adhesive: Product manufactured for use with crack-injection adhesive by same manufacturer.
3. Color: Provide epoxy crack-injection adhesive and capping adhesive [**as indicated by manufacturer's designations**][**that blend with existing, adjacent concrete and do not stain concrete surface**][**As selected by Architect from full range of industry colors**].

2.7 CORROSION-INHIBITING MATERIALS

A. Corrosion-Inhibiting Treatment: Waterborne solution of alkaline corrosion-inhibiting chemicals for concrete-surface application that penetrates concrete by diffusion and forms a protective film on steel reinforcement.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ARDEX Americas**]
b. [**Cortec Corporation**]
c. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
d. [**MAPEI Corporation**]
e. [**Master Builders Solutions**]
f. [**Sika Corporation**]

2.8 POLYMER-OVERLAY MATERIALS

A. Polymer Overlay: Epoxy adhesive complying with ASTM C881/C881M, bonding system Type III, with surface-applied aggregate for skid resistance; free of VOCs.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ChemCo Systems, Inc.**]
b. [**Dayton Superior Corporation**]
c. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
d. [**Kaufman Products, Inc**]
e. [**MAPEI Corporation**]
f. [**Master Builders Solutions**]
g. [**Sika Corporation**]
h. [**Sto Corp.**]

i. [**US SPEC, Division of US MIX Company**]

2. Aggregate: ACI 503.3, oven-dried, washed silica sand.
3. Color and Texture: [**As indicated by manufacturer's designations**][**Matching existing**][**As selected by Architect from full range of industry colors**].

2.9 POLYMER-SEALER MATERIALS

A. Epoxy Polymer Sealer: Low-viscosity epoxy, penetrating sealer and crack filler recommended by manufacturer for penetrating and sealing cracks in exterior concrete traffic surfaces; [**free of VOCs**][**VOC content 100 g/L or less**][**VOC content 400 g/L or less**].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ChemCo Systems, Inc.**]
b. [**Dayton Superior Corporation**]
c. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
d. [**MAPEI Corporation**]
e. [**Master Builders Solutions**]
f. [**Sika Corporation**]

2. Color: [**As indicated by manufacturer's designations**][**As selected by Architect from full range of industry colors**].

B. Methacrylate Polymer Sealer: Low-viscosity, high-molecular-weight methacrylate, penetrating sealer and crack filler recommended by manufacturer for penetrating and sealing cracks in exterior concrete traffic surfaces; [**free of VOCs**][**VOC content 100 g/L or less**][**VOC content 400 g/L or less**].

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**SIMIRON Inc.**]
b. [**Kwik Bond Polymers**]
c. [**Master Builders Solutions**]
d. [**Sika Corporation**]
e. [**Transpo Industries, Inc.**]

2. Color: [**As indicated by manufacturer's designations**][**As selected by Architect from full range of industry colors**].

2.10 COMPOSITE REINFORCEMENT MATERIALS

A. Composite Structural Reinforcement: Manufacturer's system consisting of [**carbon-fiber**][**or**][**glass-fiber**] reinforcement in the form of [**tow sheet with field-applied saturant**][**or**][**preimpregnated sheet**]

and epoxy primers, fillers, adhesives, saturants, and topcoats, designed for use as externally bonded structural reinforcement for concrete.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Fyfe Co. LLC**]
    b. [**MAPEI Corporation**]
    c. [**Master Builders Solutions**]
    d. [**Schonox HPS North America, Inc.**]
    e. [**Sika Corporation**]

2.11 MISCELLANEOUS MATERIALS

A. Curing Materials: For ready-mixed concrete or packaged repair materials.

B. Formwork Materials: Form-facing materials must comply with **ACI 301 (ACI 301M)** requirements.

C. Water: Potable.

D. Cleaning Agent: Commercial muriatic acid solution.

2.12 MIXES

A. General: Mix products, in clean containers, in accordance with manufacturer's written instructions.

1. Do not add water, thinners, or additives unless recommended by manufacturer.
2. When practical, use manufacturer's premeasured packages to ensure that materials are mixed in proper proportions. When premeasured packages are not used, measure ingredients using graduated measuring containers; do not estimate quantities or use shovel or trowel as unit of measure.
3. Do not mix more materials than can be used within time limits recommended by manufacturer. Discard materials that have begun to set.

B. Mortar Scrub Coat: Mix dry ingredients with enough water to provide consistency of thick cream.

C. Dry-Pack Mortar: Mix required type(s) of patching-mortar dry ingredients with just enough liquid to form damp cohesive mixture that can be squeezed by hand into a ball but is not plastic.

D. Concrete Materials: Comply with [**Section 033000 "Cast-in-Place Concrete."**][**Section 033300 "Architectural Concrete."**]

E. Concrete Mixture Materials: Ready mixed.

1. ACI Publications: Comply with **ACI 301 (ACI 301M)** unless modified by requirements in the Contract Documents.
2. Portland Cement: ASTM C150/C150M, Type I, II, or III unless otherwise indicated.
3. Fly Ash: ASTM C618, Class C or F.
4. Slag Cement: ASTM C989/C989M, Grade 100 or 120.
5. Silica Fume: ASTM C1240 amorphous silica.

6. Aggregates: ASTM C330/C330M, nominal maximum aggregate size, gradation and types appropriate for the dimension of the repair area and project application.
7. Air-Entraining Admixture: ASTM C260/C260M.
8. Chemical Admixtures: Certified and as recommended by manufacturer for project applications to be compatible with other admixtures that do not contribute water-soluble chloride ions exceeding those permitted in hardened concrete. Do not use calcium chloride or admixtures containing calcium chloride.

F. Repair Underlayment:

1. Cement-based, polymer-modified, self-leveling product that can be applied in thicknesses from **1/8 inch** and that can be feathered at edges to match adjacent floor elevations.
2. Compressive Strength: Not less than [**4100 psi (29 MPa)**] at 28 days when tested in accordance with ASTM C109/C109M.

G. Repair Overlayment:

1. Cement-based, polymer-modified, self-leveling product that can be applied in thicknesses from **1/4 inch (6 mm)** and that can be filled in over a scarified surface to match adjacent floor elevations.
2. Compressive Strength: Not less than [**5000 psi (34.5 MPa)**] at 28 days when tested in accordance with ASTM C109/C109M.

H. Grout for Use with Preplaced Aggregate: Proportion in accordance with ASTM C938. Add grout fluidifier to mixing water followed by portland cement, pozzolan, and fine aggregate.

PART 3 - EXECUTION

3.1 CONCRETE MAINTENANCE

A. Have concrete-maintenance work performed only by qualified concrete-maintenance specialist.

B. Comply with manufacturers' written instructions for surface preparation and product application.

3.2 EXAMINATION

A. Notify Architect seven days in advance of dates when areas of deteriorated or delaminated concrete and deteriorated reinforcing bars will be located.

B. Locate areas of deteriorated or delaminated concrete using hammer or chain-drag sounding and mark boundaries. Mark areas for removal by simplifying and squaring off boundaries. At columns and walls, make boundaries level and plumb unless otherwise indicated.

C. Pachometer Testing: Locate at least three reinforcing bars using a pachometer, and drill test holes to determine depth of cover. Calibrate pachometer using depth of cover measurements, and verify depth of cover in removal areas using pachometer.

D. Perform surveys as the Work progresses to detect hazards resulting from concrete-maintenance work.

3.3 PREPARATION

A. Ensure that supervisory personnel are on-site and on duty when concrete-maintenance work begins and during its progress.

B. Protect persons, motor vehicles, surrounding surfaces of building being repaired, building site, plants, and surrounding buildings from harm resulting from concrete-maintenance work.

1. Comply with each product manufacturer's written instructions for protections and precautions. Protect against adverse effects of products and procedures on people and adjacent materials, components, and vegetation.
2. Use only proven protection methods appropriate to each area and surface being protected.
3. Provide temporary barricades, barriers, and directional signage to exclude public from areas where concrete-maintenance work is being performed.
4. Erect temporary protective covers over walkways and at points of pedestrian and vehicular entrance and exit that must remain in service during course of concrete-maintenance work.
5. Contain dust and debris generated by concrete-maintenance work and prevent it from reaching the public or adjacent surfaces.
6. Use water-mist sprinkling and other wet methods to control dust only with adequate, approved procedures and equipment that ensure that such water will not create a hazard or adversely affect other building areas or materials.
7. Protect floors and other surfaces along haul routes from damage, wear, and staining.
8. Provide supplemental sound-control treatment to isolate removal and dismantling work from other areas of the building.
9. Protect adjacent surfaces and equipment by covering them with heavy polyethylene film and waterproof masking tape[**or a liquid-strippable masking agent**]. If practical, remove items, store, and reinstall after potentially damaging operations are complete.
10. Neutralize and collect alkaline and acid wastes for disposal off Owner's property.
11. Dispose of debris and runoff from operations by legal means and in a manner that prevents soil erosion, undermining of paving and foundations, damage to landscaping, and water penetration into building interiors.

C. Existing Drains: Prior to the start of concrete-maintenance work in an area, test drainage system to ensure that it is functioning properly. Notify Architect immediately of inadequate drainage or blockage. Do not begin concrete-maintenance work in an area until the drainage system is in working order.

1. Prevent solids, such as aggregate or mortar residue, from entering the drainage system. Clean out drains and drain lines that become sluggish or blocked by sand or other materials resulting from concrete-maintenance work.
2. Protect drains from pollutants. Block drains or filter out sediments, allowing only clean water to pass.

D. Preparation for Concrete Removal: Examine construction to be repaired to determine best methods to safely and effectively perform concrete-maintenance work. Examine adjacent work to determine what protective measures will be necessary. Make explorations, probes, and inquiries as necessary to determine condition of construction to be removed in the course of repair.

1. Verify that affected utilities have been disconnected and capped.
2. Inventory and record the condition of items to be removed for reinstallation or salvage.
3. Provide and maintain shoring, bracing, and temporary structural supports as required to preserve stability and prevent unexpected or uncontrolled movement, settlement, or collapse of construction being demolished and construction and finishes to remain. Strengthen or add new supports when required during progress of removal work.

E. Reinforcing-Bar Preparation: Remove loose and flaking rust from exposed reinforcing bars by [**high-pressure water cleaning**][**abrasive blast cleaning**][**needle scaling**][**or**][**wire brushing**] until only

tightly adhered light rust remains.

1. Where section loss of reinforcing bar is more than 25 percent, or 20 percent in two or more adjacent bars, cut bars and remove and replace as indicated on Drawings.
2. Remove additional concrete as necessary to provide at least **3/4-inch (19-mm)** clearance at existing and replacement bars.
3. Splice replacement bars to existing bars in accordance with **ACI 318 (ACI 318M)** by lapping, welding, or using mechanical couplings.

F. Preparation of Floor Joints for Repair: Saw-cut joints full width to edges and depth of spalls, but not less than [**3/4 inch (19 mm)**][**1 inch (25 mm)**][**2 inches (50 mm)**] deep. Clean out debris and loose concrete; vacuum or blow clear with compressed air.

G. Surface Preparation for Corrosion-Inhibiting Treatment: Clean concrete to remove dirt, oils, films, and other materials detrimental to treatment application.

1. Use [**low-pressure water cleaning**][**detergent scrubbing**][**or**][**sand blasting**].
2. Allow surface to dry before applying corrosion-inhibiting treatment.

H. Surface Preparation for Overlays:

1. Remove delaminated material and deteriorated concrete surface material.
2. Roughen surface of concrete to produce a surface profile matching CSP [**3**][**4**][**5**][**6**][**7**][**8**][**9**] in accordance with ICRI 310.2.
3. Use [**sand blasting**][**shot blasting**][**scarifying**][**needle scaling**][**high-pressure water jetting**][**scabbling**][**flame blasting**][**or**][**milling**].
4. Sweep and vacuum roughened surface to remove debris[**followed by low-pressure water cleaning**].

I. Acidic Surface Preparation for Sealers: Acid etch surface of concrete to produce a surface profile matching CSP 1 in accordance with ICRI 310.2.[**Prepare surface for acid etching by detergent scrubbing to remove oils and films that may prevent acid penetration.**]

1. Remove excess acid solution, reaction products, and debris by squeegeeing or vacuuming.
2. Scrub surface with an alkaline detergent, rinse, and squeegee or vacuum.
3. Check acidity of surface with pH test paper and continue rinsing until pH is acceptable in accordance with sealer manufacturer's written instructions.
4. When pH is acceptable in accordance with sealer manufacturer's written instructions and surface is clean, vacuum dry.

J. Nonacidic Surface Preparation for Sealers: Clean concrete to remove dirt, oils, films, and other materials detrimental to sealer application.

1. Use [**shot blasting**][**low-pressure water cleaning**][**or**][**detergent scrubbing**].

K. Surface Preparation for Composite Structural Reinforcement: Clean concrete where reinforcement and epoxy patching mortar is to be placed by [**low-pressure water cleaning**][**or**][**detergent scrubbing**] to remove dirt, oils, films, and other materials detrimental to epoxy patching mortar.

1. Roughen surface of concrete by sand blasting.
2. Remove delaminated material and deteriorated concrete surface material.
3. Sweep and vacuum roughened surface to remove debris[**followed by low-pressure water cleaning**].

3.4 REMOVAL OF CONCRETE

A. Do not overload structural elements with debris.

B. Saw-cut perimeter of areas indicated for removal to a depth of at least [1/2 inch (13 mm)]. Make cuts perpendicular to concrete surfaces and no deeper than cover on reinforcement.

C. Remove deteriorated and delaminated concrete by breaking up and dislodging from reinforcement.

D. Remove additional concrete if necessary to provide a depth of removal of at least [1/2 inch (13 mm)] over entire removal area.

E. Where half or more of the perimeter of reinforcing bar is exposed, bond between reinforcing bar and surrounding concrete is broken, or reinforcing bar is corroded, remove concrete from entire perimeter of bar and to provide at least 3/4-inch (19-mm) clearance around bar.

F. Test areas where concrete has been removed by tapping with hammer, and remove additional concrete until unsound and disbonded concrete is completely removed.

G. Provide surfaces with a fractured profile of at least 1/8 inch (3 mm) that are approximately perpendicular or parallel to original concrete surfaces. At columns and walls, make top and bottom surfaces level unless otherwise directed.

H. Thoroughly clean removal areas of loose concrete, dust, and debris.

3.5 APPLICATION OF BONDING AGENTS

A. Epoxy-Modified, Cementitious Bonding and Anticorrosion System: Apply to reinforcing bars [**and concrete**]by stiff brush or hopper spray in accordance with manufacturer's written instructions. Apply to reinforcing bars in two coats, allowing first coat to dry two to three hours before applying second coat. Allow to dry before placing patching mortar or concrete.

B. Epoxy Bonding System: Apply to reinforcing bars[**and concrete**] by brush, roller, or spray in accordance with manufacturer's written instructions, leaving no pinholes or other uncoated areas.[**Apply to reinforcing bars in at least two coats, allowing first coat to dry before applying second coat.**] Place patching mortar or concrete while epoxy is still tacky. If epoxy dries, recoat before placing patching mortar or concrete.

C. Latex Bonding Agent, Type I: Apply to concrete by brush roller or spray. Allow to dry before placing patching mortar or concrete.

D. Latex Bonding Agent, Type II: Mix with portland cement and scrub into concrete surface in accordance with manufacturer's written instructions. Place patching mortar or concrete while bonding agent is still wet. If bonding agent dries, recoat before placing patching mortar or concrete.

E. Mortar Scrub Coat for Job-Mixed Patching Mortar and Concrete: Dampen repair area and surrounding concrete 6 inches (150 mm) beyond repair area. Remove standing water and apply scrub coat with a brush, scrubbing it into surface and thoroughly coating repair area. If scrub coat dries, recoat before placing patching mortar or concrete.

F. Slurry Coat for Cementitious Patching Mortar: Wet substrate thoroughly and then remove standing water. Scrub a slurry of neat patching mortar[**mixed with latex bonding agent**] into substrate, filling pores and voids.

3.6 INSTALLATION OF PATCHING MORTAR

A. Place patching mortar as specified in this article unless otherwise recommended in writing by manufacturer[**or where dry-pack mortar is indicated**].

1. Provide forms where necessary to confine patch to required shape.
2. Wet substrate and forms thoroughly and then remove standing water.

B. Pretreatment: Apply specified [**bonding agent**][**mortar scrub coat**][**slurry coat**][**bonding agent and slurry coat**].

C. General Placement: Place patching mortar by troweling toward edges of patch to force intimate contact with edge surfaces. For large patches, fill edges first and then work toward center, always troweling toward edges of patch. At fully exposed reinforcing bars, force patching mortar to fill space behind bars by compacting with trowel from sides of bars.

D. Vertical Patching: Place material in lifts of not more than [**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**2 inches (50 mm)**][**3 inches (76 mm)**] or less than [**1/8 inch (3 mm)**][**1/4 inch (6 mm)**]. Do not feather edge.

E. Overhead Patching: Place material in lifts of not more than [**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**2 inches (50 mm)**] or less than [**1/8 inch (3 mm)**][**1/4 inch (6 mm)**]. Do not feather edge.

F. Consolidation: After each lift is placed, consolidate material and screed surface.

G. Multiple Lifts: Where multiple lifts are used, score surface of lifts to provide a rough surface for placing subsequent lifts. Allow each lift to reach final set before placing subsequent lifts.

H. Finishing: Allow surfaces of lifts that are to remain exposed to become firm and then finish to a [**smooth surface with a wood or sponge float**][**rough surface with a broom or burlap drag**][**surface matching adjacent concrete**].

I. Curing: Wet-cure cementitious patching materials, including polymer-modified cementitious patching materials, for not less than seven days by water-fog spray or water-saturated absorptive cover.

3.7 INSTALLATION OF DRY-PACK MORTAR

A. Use dry-pack mortar for deep cavities[**and where indicated**]. Place as specified in this article unless otherwise recommended in writing by manufacturer.

1. Provide forms where necessary to confine patch to required shape.
2. Wet substrate and forms thoroughly and then remove standing water.

B. Pretreatment: Apply specified [**bonding agent**][**mortar scrub coat**][**slurry coat**][**bonding agent and slurry coat**].

C. Place dry-pack mortar into cavity by hand, and compact tightly into place. Do not place more material at a time than can be properly compacted. Continue placing and compacting until patch is approximately level with surrounding surface.

D. After cavity is filled and patch is compacted, trowel surface to match profile and finish of surrounding concrete. A thin coat of patching mortar may be troweled into the surface of patch to help obtain required finish.

E. Wet-cure patch for not less than seven days by water-fog spray or water-saturated absorptive cover.

3.8 CONCRETE PLACEMENT

A. Place concrete in accordance with [**Section 033000 "Cast-in-Place Concrete"**][**Section 033300 "Architectural Concrete"**] and as specified in this article.

B. Epoxy-Modified Pretreatment: Apply [**epoxy-modified, cementitious bonding and anticorrosion agent**][**epoxy bonding agent**] to reinforcement[**and concrete substrate**].

C. Latex Pretreatment: Apply [**latex bonding agent**][**Type I latex bonding agent**][**mortar scrub coat**] to concrete substrate.

D. Standard Placement: Place concrete by form-and-pump method unless otherwise indicated.

1. Use vibrators to consolidate concrete as it is placed.
2. At unformed surfaces, screed concrete to produce a surface that when finished with patching mortar will match required profile and surrounding concrete.

E. Form-and-Pump Placement: Place concrete by form-and-pump method where indicated.

1. Design and construct forms to resist pumping pressure in addition to weight of wet concrete. Seal joints and seams in forms and where forms abut existing concrete.
2. Pump concrete into place from bottom to top, releasing air from forms as concrete is introduced. When formed space is full, close air vents and pressurize to **14 psi (96 kPa)**.

F. Wet-cure concrete for not less than seven days by leaving forms in place or keeping surfaces continuously wet by water-fog spray or water-saturated absorptive cover.

G. Fill placement cavities with dry-pack mortar and repair voids with patching mortar. Finish to match surrounding concrete.

3.9 GROUTING PREPLACED AGGREGATE CONCRETE

A. Use grouted preplaced aggregate concrete [**where indicated**][**for column and wall repairs**]. Place as specified in this article.

B. Design and construct forms to resist pumping pressure in addition to weight of wet grout. Seal joints and seams in forms and where forms abut existing concrete.

C. Apply [**epoxy-modified cementitious bonding and anticorrosion agent**][**epoxy bonding agent**] to reinforcement[**and concrete substrate**].

D. Place aggregate in forms, consolidating aggregate in lifts as it is placed. Pack aggregate into upper areas of forms to achieve intimate contact with concrete surfaces.

E. Fill forms with water to thoroughly dampen aggregate and substrates. Drain water from forms before placing grout.

F. Pump grout into place at bottom of preplaced aggregate, forcing grout upward. Release air from forms at top as grout is introduced. When formed space is full and grout flows from air vents, close vents and pressurize to **14 psi (96 kPa)**.

G. Wet-cure concrete for not less than seven days by leaving forms in place or keeping surfaces continuously wet by water-fog spray or water-saturated absorptive cover.

H. Repair voids with patching mortar and finish to match surrounding concrete.

3.10 FLOOR-JOINT REPAIR

A. Cut out deteriorated concrete [**and reconstruct sides of joint with patching mortar**] as indicated on Drawings. Install joint filler in nonmoving floor joints where indicated and as specified in this article.

B. Depth: Install joint filler to a depth of at least [**3/4 inch (19 mm)**][**1 inch (25 mm)**][**2 inches (50 mm)**]. Use fine silica sand no more than **1/4 inch (6 mm)** deep to close base of joint. Do not use sealant backer rods or compressible fillers below joint filler.

C. Top Surface: Install joint filler so that when cured, it is flush at top surface of adjacent concrete. If necessary, overfill joint and remove excess when filler has cured.

3.11 APPLICATION OF EPOXY CRACK-INJECTION MATERIALS

A. Clean cracks with oil-free compressed air or low-pressure water to remove loose particles.

B. Clean areas to receive capping adhesive of oil, dirt, and other substances that would interfere with bond.

C. Place injection ports as recommended by epoxy manufacturer, spacing no farther apart than thickness of member being injected. Seal injection ports in place with capping adhesive.

D. Seal cracks at exposed surfaces with a ribbon of capping adhesive at least **1/4 inch (6 mm)** thick by **1 inch (25 mm)** wider than crack.

E. Inject cracks wider than **0.003 inch (0.075 mm)** to a depth of **8 inches (200 mm)**.

F. Inject epoxy adhesive, beginning at widest part of crack and working toward narrower parts. Inject adhesive into ports to refusal, capping adjacent ports when they extrude epoxy. Cap injected ports and inject through adjacent ports until crack is filled.

G. After epoxy adhesive has set, remove injection ports and grind surfaces smooth.

3.12 APPLICATION OF CORROSION-INHIBITING MATERIALS

A. Apply corrosion-inhibiting treatment to [**surfaces indicated on Drawings, from wall to wall or curb to curb and from joint to joint in the perpendicular direction**].

B. Apply by brush, roller, or airless spray in two coats at manufacturer's recommended application rate. Remove film of excess treatment by high-pressure washing before patching treated concrete[**or applying a sealer or overlay**].

3.13 APPLICATION OF POLYMER-OVERLAY MATERIALS

A. Apply polymer overlay in accordance with ACI 503.3.

B. Apply to traffic-bearing surfaces, including parking areas and walks.

3.14 APPLICATION OF POLYMER-SEALER MATERIALS

A. Apply polymer sealer by brush, roller, or airless spray at manufacturer's recommended application rate.

B. Apply to traffic-bearing surfaces, including parking areas and walks.

3.15 INSTALLATION OF COMPOSITE REINFORCEMENT MATERIALS

A. Fiber Tow Sheet and Saturant: Unless otherwise recommended by manufacturer, install as follows:

1. Apply epoxy primer using brush or short nap roller to prepared concrete surfaces in areas where composite structural reinforcement will be applied.
2. After primer has set, patch surface defects with epoxy filler and allow to set before beginning reinforcement application.
3. Apply epoxy saturant to [**fiber tow sheet**][**or**][**primed and patched surface**] using roller. Apply fiber tow sheet to primed and patched surface while saturant is still wet, using pressure roller to remove air pockets. Remove paper backing from fiber tow sheet and apply additional epoxy to fully saturate tow sheet.
4. Apply additional layers using same procedure, fully saturating each layer with epoxy.
5. After saturant has cured, apply protective topcoat by [**brush**][**roller**][**or**][**spray**].

B. Preimpregnated Fiber Sheet: Unless otherwise recommended by manufacturer, install as follows:

1. Patch surface defects with epoxy mortar and allow to set before beginning reinforcement application.
2. Apply epoxy adhesive to a thickness of **1/16 inch (1.6 mm)** to prepared concrete surfaces.
3. Clean fiber sheet with acetone or other suitable solvent and apply epoxy adhesive to a thickness of **1/16 inch (1.6 mm)**.
4. Apply adhesive-coated fiber sheet to adhesive-coated concrete and roll with a hard rubber roller until fiber sheet is fully embedded in adhesive, air pockets are removed, and adhesive is forced out from beneath fiber sheet at edges.
5. Apply additional layers using same procedure.

3.16 FIELD QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

B. Tests and Inspections:

1. Packaged, Cementitious Patching-Mortar Application: randomly selected sets of samples for each type of mortar required, tested in accordance with ASTM C928/C928M.
2. Job-Mixed Patching-Mortar Application: As directed by the Owner, randomly selected sets of samples for each type of mortar required, tested for compressive strength in accordance with ASTM C109/C109M.
3. Concrete: As specified in [**Section 033000 "Cast-in-Place Concrete."**][**Section 033300 "Architectural Concrete."**]
4. Grout for Preplaced Aggregate: Tested for compressive strength in accordance with ASTM C942/C942M.

    a. Testing Frequency: One sample for each **25 cu. yd. (19 cu. m)** of grout or fraction thereof,

but not less than one sample for each day's work.

5. Joint Filler: Core-drilled samples to verify proper installation.

   a. Testing Frequency: One sample for each **100 ft. (30 m)** of joint filled.
   b. Where samples are taken, refill holes with joint filler.

6. Epoxy Crack-Injection Materials: Core-drilled samples to verify proper installation.

   a. Testing Frequency: [**Three samples from mockup and**]one sample for each **100 ft. (30 m)** of crack injected.
   b. Where samples are taken, refill holes with epoxy mortar.

7. Product will be considered defective if it does not pass tests and inspections.

C. Manufacturers Field Service: Engage manufacturers' factory-authorized service representatives for consultation and Project-site inspection and to provide on-site assistance when requested by Architect.

1. Have manufacturers' factory-authorized service representatives perform the following number of Project-site inspections to observe progress and quality of the Work, distributed over the period of product installation, regardless of on-site assistance requested by Architect:

   a. Bonding-Agent and Packaged Patching-Mortar Installation: [**Three**] inspections.
   b. Joint-Filler Installation: [**Two**] inspections.
   c. Crack-Injection-Adhesive Preparation and Installation: [**Four**] inspections.
   d. Corrosion-Inhibiting Treatment Installation: [**Two**] inspections.
   e. Polymer-Overlay Installation: [**Two**] inspections.
   f. Polymer Sealer: [**Two**] inspections.
   g. Composite-Structural Reinforcement: [**Three**] inspections.

D. Prepare test and inspection reports.

3.17 CONCRETE MAINTENANCE SCHEDULE

A. Garage Level 1 Entrance Ramp: Perform the following as indicated on Drawings:

1. Removal of deteriorated concrete and subsequent replacement and patching.
2. Floor-joint repair.
3. Epoxy crack-injection materials.
4. Corrosion-inhibiting materials.
5. Polymer-overlay materials.
6. Polymer-sealer materials.
7. Composite reinforcement on underside of slab.

B. Elevated Warehouse Floors: Perform the following as indicated on Drawings:

1. Removal of deteriorated concrete and subsequent replacement and patching.
2. Floor-joint repair.
3. Epoxy crack-injection materials.
4. Corrosion-inhibiting materials.
5. Polymer-overlay materials.
6. Polymer-sealer materials.
7. Composite reinforcement on underside of slab.

C. Concrete Walls and Floor in Salt Dome: Perform the following as indicated on Drawings:

1. Removal of deteriorated concrete and subsequent replacement and patching.
2. Floor-joint repair.
3. Epoxy crack-injection materials.
4. Corrosion-inhibiting materials.
5. Polymer-overlay materials.
6. Polymer-sealer materials.
7. Composite reinforcement of columns.

END OF SECTION 09 01 90 52

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 01 90 52A - MAINTENANCE REPAINTING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Preparatory cleaning materials.
2. Paint removers.
3. Paint materials.
4. Patching materials.

B. Related Requirements:

1. Section 013516 "Alteration Project Procedures" for general remodeling, renovation, repair, and maintenance requirements.
2. Section 040110 "Masonry Cleaning" for cleaning and removing paint from masonry.
3. Section 050170.51 "Decorative Metal Cleaning" for cleaning and removing paint from decorative metal.
4. [**Section 099113 "Exterior Painting," Section 099123 "Interior Painting," Section 099300 "Staining and Transparent Finishing," and Section 099600 "High-Performance Coatings"**][**Section 099114 "Exterior Painting (MPI Standards)," Section 099124 "Interior Painting (MPI Standards)," Section 099301 "Staining and Transparent Finishing (MPI Standards)," and Section 099601 "High-Performance Coatings (MPI Standards)"**] for Paint materials and systems for new construction.
5. Section 099423 "Gilding" for oil gilding.

1.2 ALLOWANCES

A. Allowances for maintenance repainting are specified in Section 012100 "Allowances."

1.3 UNIT PRICES

A. Work of this Section is affected by unit prices specified in Section 012200 "Unit Prices."

1. Unit prices apply to authorized work covered by [**quantity allowances**][**estimated quantities**] .
2. Unit prices apply to authorized additions to and deletions from Work as authorized by Change Orders.

1.4 DEFINITIONS

A. DSD: Degree of surface deterioration.

B. Gloss Level G1: Not more than 5 units at 60 degrees and 10 units at 85 degrees, in accordance with ASTM D523.

C. Gloss Level G2: Not more than 10 units at 60 degrees and 10 to 35 units at 85 degrees, in accordance with ASTM D523.

D. Gloss Level G3: 10 to 25 units at 60 degrees and 10 to 35 units at 85 degrees, in accordance with ASTM D523.

E. Gloss Level G4: 20 to 35 units at 60 degrees and not less than 35 units at 85 degrees, in accordance with ASTM D523.

F. Gloss Level G5: 35 to 70 units at 60 degrees, in accordance with ASTM D523.

G. Gloss Level G6: 70 to 85 units at 60 degrees, in accordance with ASTM D523.

H. Gloss Level G7: More than 85 units at 60 degrees, in accordance with ASTM D523.

I. Low-Pressure Spray: [**100 to 400 psi (690 to 2750 kPa); 4 to 6 gpm (0.25 to 0.4 L/s)**]<**Insert range of values**> .

J. Medium-Pressure Spray: [**400 to 800 psi (2750 to 5510 kPa); 4 to 6 gpm (0.25 to 0.4 L/s)**]<**Insert range of values**> .

1.5 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference [**at Project site**][**by web conference**]<**Insert location**> .

1.6 SEQUENCING

A. Perform maintenance repainting in the following sequence, which includes Work specified in this and other Sections.

1. Dismantle existing surface-mounted objects and hardware except items indicated to remain in place. Tag items with location identification and protect from damage.
2. Verify that temporary protections have been installed.
3. Examine condition of surfaces to be painted.
4. Remove existing paint to the degree required for each substrate and surface condition of existing paint.
5. Apply paint system.
6. Reinstall dismantled surface-mounted objects and hardware unless otherwise indicated.

1.7 ACTION SUBMITTALS

A. Product Data: For each specified system and assembly, including components and accessories.

1. Include recommendations for product application and use.
2. Include test data substantiating that products comply with requirements.

B. Samples: For each type of paint system and each pattern, color, and gloss; [**in sizes indicated below**][**minimum 6 inches (150 mm) long in least dimension, but not less than whole pattern**] .

1. Include stepped Samples defining each separate coat, including fillers and primers. Resubmit until each required sheen, color, and texture is achieved.
2. For each painted color being matched to a standardized color-coding system, include the color chips from the color-coding-system company with Samples.

3. Include a list of materials for each coat of each Sample.
4. Label each Sample for location and application.
5. Sample Size:

    a. Painted Surfaces: [**4-by-8-inch (100-by-200-mm)**]<**Insert dimensions**> Samples for each color and material, on hardboard.
    b. Stained or Natural Wood: [**12-by-12-inch (300-by-300-mm)**]<**Insert dimensions**> Samples of natural- or stained-wood finish, on representative <**Insert required species of wood**> surfaces.

C. Product List: For each paint product indicated, include the following:

1. Cross-reference to paint system and locations of application areas. Use same designations indicated on Drawings and in schedules.
2. Printout of current "MPI Approved Products List" for each MPI-product category specified in paint systems, with the proposed product highlighted.
3. VOC content.

D. Sustainable Design Submittals:

1. Product Data: For paints and coatings, indicating VOC content.

1.8 INFORMATIONAL SUBMITTALS

A. Color Matching Certificate: For computer-matched colors.

B. Preconstruction Test Reports: For cleaning materials, [**paint removers**][**and**][**paint coatings and systems**] .

1.9 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra paint materials, from the same production run, that match products applied and that are packaged with protective covering for storage and identified with labels describing contents, including material, finish, source, and location on building.

1. Quantity: Furnish Owner with an additional [**3**][**5**][**7**]<**Insert number**> percent, but not less than **1 gal. (3.8 L)** or one case, as appropriate, of each material and color applied.

1.10 QUALITY ASSURANCE

A. Color Matching: Custom computer-match paint colors [**as indicated in a color schedule on Drawings**]<**Insert requirements**> .

1.11 MOCKUPS

A. Prepare mockups of maintenance repainting processes for each type of coating system and substrate indicated and each color and finish required to demonstrate aesthetic effects and to set quality standards for materials and execution. Duplicate appearance of approved Sample submittals.

1. Locate mockups [**on existing surfaces where directed by Architect**][**in locations that enable viewing under same conditions as the completed Work**]<**Insert requirement**> .

2. Surface-Preparation Mockups: On existing surfaces using applicable specified methods of cleaning and other surface preparation, provide mockup sample of at least [**100 sq. ft. (9 sq. m)**]<**Insert dimension**> .
3. Coating Mockups: [**Two**]<**Insert number**> surfaces of at least [**100 sq. ft. (9 sq. m)**]<**Insert dimension**> to represent surfaces and conditions for application of each type of coating system under same conditions as the completed Work.
4. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
5. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.12 PRECONSTRUCTION TESTING

A. Preconstruction Testing Service: Engage a qualified testing agency to perform preconstruction testing of cleaning materials, [**paint removers**][**and**][**compatibility of paint coatings and systems**] for each [**indicated**] type of painted surface.

1. Use test areas as indicated and representative of proposed materials and existing construction.
2. Propose changes to materials and methods to suit Project.

1.13 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than **45 deg F (7 deg C)**.

1. Maintain containers in clean condition, free of foreign materials and residue.
2. Remove rags and waste daily.

1.14 FIELD CONDITIONS

A. Weather Limitations: Proceed with maintenance repainting only when existing and forecasted weather conditions are within the environmental limits set by each manufacturer's written instructions and specified requirements.

B. Apply paints only when temperature of surfaces to be painted and ambient air temperatures are between **50 and 95 deg F (10 and 35 deg C)**.

C. Do not apply paint in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures less than **5 deg F (3 deg C)** above the dew point; or to damp or wet surfaces.

1. Painting may continue during inclement weather if surfaces and areas to be painted are enclosed and heated within temperature limits specified by manufacturer for surface preparation and during paint application and drying periods.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each paint product from single source from single manufacturer.

2.2 PREPARATORY CLEANING MATERIALS

A. Water: Potable.

B. Hot Water: Water heated to a temperature of **140 to 160 deg F (60 to 71 deg C)**.

C. Detergent Solution: Solution prepared by mixing **2 cups (0.5 L)** of tetrasodium pyrophosphate (TSPP), **1/2 cup (125 mL)** of laundry detergent that contains no ammonia, **5 quarts (5 L)** of 5 percent sodium hypochlorite bleach, and **15 quarts (15 L)** of warm water for every **5 gal. (20 L)** of solution required.

D. Mildewcide: Commercial proprietary mildewcide or a job-mixed solution prepared by mixing **1/3 cup (80 mL)** of household detergent that contains no ammonia, **1 quart (1 L)** of 5 percent sodium hypochlorite bleach, and **3 quarts (3 L)** of warm water.

E. Abrasives for Ferrous Metal Cleaning: Aluminum oxide paper, emery paper, fine steel wool, steel scrapers, and steel-wire brushes of various sizes.

F. Rust Remover: Manufacturer's standard phosphoric acid-based gel formulation, also called "naval jelly," for removing corrosion from iron and steel.

2.3 PAINT REMOVERS

A. Paint Removers, General: Manufacturer's standard formulation for removing paint from masonry, stone, wood, plaster, or metal as required to suit Project.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Building Restoration Products, Inc.**]
b. [**Cathedral Stone Products, Inc.**]
c. [**Diedrich Technologies, Inc.; a Hohmann & Barnard company**]
d. [**Dumond Chemicals, Inc**]
e. [**EaCo Chem, Inc.**]
f. [**PROSOCO, Inc**]
g. [**Shore Corporation**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Building Restoration Products, Inc.**]
b. [**Cathedral Stone Products, Inc.**]
c. [**Diedrich Technologies, Inc.; a Hohmann & Barnard company**]
d. [**Dumond Chemicals, Inc**]
e. [**EaCo Chem, Inc.**]
f. [**PROSOCO, Inc**]
g. [**Shore Corporation**]
h. <**Insert manufacturer's name**>

B. Alkaline Paste Paint Remover: Manufacturer's standard alkaline paste or gel formulation; containing no methylene chloride.

C. Covered or Skin-Forming Alkaline Paint Remover: Manufacturer's standard covered or skin-forming alkaline paste or gel formulation; containing no methylene chloride.

D. Solvent-Type Paste Paint Remover: Manufacturer's standard water-rinsable, solvent-type paste or gel formulation.

E. Low-Odor, Solvent-Type Paste Paint Remover: Manufacturer's standard low-odor, water-rinsable, solvent-type paste, gel, or foamed emulsion formulation; containing no methanol or methylene chloride.

F. Covered, Solvent-Type Paste Paint Remover: Manufacturer's standard, low-odor, covered, water-rinsable, solvent-type paste or gel formulation; containing no methanol or methylene chloride.

2.4 PAINT MATERIALS, GENERAL

A. Material Compatibility:

1. Provide materials for use within each paint system that are compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
2. For each coat in a paint system, provide products recommended in writing by manufacturers of topcoat for use in paint system and on substrate indicated.

B. Colors: [**As selected by Architect from manufacturer's full range**][**Match Architect's samples**][**As indicated in a color schedule on Drawings**]<**Insert requirements**> .

C. MPI Standards: Provide products complying with MPI standards indicated in applicable maintenance repainting schedule articles and listed in the "MPI Approved Products List."

D. Transition Coat: Paint manufacturer's recommended coating for use where a residual existing coating is incompatible with the paint system.

E. VOC Content: For field applications [**that are inside the weatherproofing system**] , verify paints and coatings comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Flat Paints and Coatings: 50 g/L.
2. Nonflat Paints and Coatings: 50 g/L.
3. Dry-Fog Coatings: 150 g/L.
4. Primers, Sealers, and Undercoaters: 100 g/L.
5. Rust-Preventive Coatings: 100 g/L.
6. Zinc-Rich Industrial Maintenance Primers: 100 g/L.
7. Pretreatment Wash Primers: 420 g/L.
8. Clear Wood Finishes, Varnishes: 275 g/L.
9. Clear Wood Finishes, Lacquers: 275 g/L.
10. Floor Coatings: 50 g/L.
11. Shellacs, Clear: 730 g/L.
12. Shellacs, Pigmented: 550 g/L.
13. Stains: 100 g/L.

F. Low-Emitting Materials: For field applications that are inside the weatherproofing system, verify 90 percent of paints and coatings comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

G. Material Emissions and Pollutant Control: Verify not less than 85 percent of field-applied paints and coatings that are inside the weatherproofing system comply with one of the following:

1. Low-Emitting Materials: Verify VOC emissions comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
2. Verify VOC content does not exceed limits of authorities having jurisdiction and the following:

a. Flat Coatings: 50 g/L.
b. Nonflat Coatings: 100 g/L.
c. Nonflat - High-Gloss Coatings: 150 g/L.
d. Concrete/Masonry Sealers: 100 g/L.
e. Dry-Fog Coatings: 150 g/L.
f. Floor Coatings: 100 g/L.
g. Industrial Maintenance Coatings: 250 g/L.
h. Low-Solids Coatings: 120 g/L.
i. Mastic Texture Coatings: 100 g/L.
j. Metallic Pigmented Coatings: 500 g/L.
k. Pretreatment Wash Primers: 420 g/L.
l. Primers, Sealers, and Undercoaters: 100 g/L.
m. Reactive Penetrating Sealers: 350 g/L.
n. Recycled Coatings: 250 g/L.
o. Rust-Preventive Coatings: 250 g/L.

H. VOC Content: For field applications inside the building, verify wall paints comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Interior Flat Latex Wall Paint: 50 g/L.
2. Interior Nonflat Latex Wall Paint: 150 g/L.

I. VOC Emissions: For field applications inside the building, verify wall paints contain no more than half of the chronic REL of VOCs when tested in accordance with the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify the building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

2.5 PAINT MATERIALS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1. [**Benjamin Moore & Co.**]
2. [**Coronado Paint; Benjamin Moore & Co.**]
3. [**Insl-X Products; Benjamin Moore & Co.**]
4. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
5. [**Rodda Paint Co.**]
6. [**Rust-Oleum Corporation**]
7. [**Sherwin-Williams Company (The)**]
8. [**The Pittsburgh Paints Company**]
9. [**Valspar; a brand of The Sherwin-Williams Company**]
10. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Benjamin Moore & Co.**]
2. [**Coronado Paint; Benjamin Moore & Co.**]
3. [**Insl-X Products; Benjamin Moore & Co.**]
4. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
5. [**Rodda Paint Co.**]
6. [**Rust-Oleum Corporation**]
7. [**Sherwin-Williams Company (The)**]
8. [**The Pittsburgh Paints Company**]
9. [**Valspar; a brand of The Sherwin-Williams Company**]
10. <**Insert manufacturer's name**>

2.6 PATCHING MATERIALS

A. Patching Compound, General: Formulation specifically manufactured for repairs in damaged substrate materials as specified within tooling time required for the detail of work and site conditions; designed for filling voids that have deteriorated from weathering and decay, capable of filling deep holes, and spreading to feather edge.

B. Metal-Patching Compound: Two-part, polyester-resin, metal-patching compound; knife-grade formulation.

C. Cementitious Patching Compound: Repair materials specifically formulated and manufactured for filling type of cementitious substrates and for sanding or tooling prior to repainting; as recommended in writing by compound manufacturer for exposure to weather and traffic.

D. Wood-Patching Compound: Two-part, epoxy-resin, wood-patching compound; knife-grade formulation.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Abatron, Inc**]
    b. [**Advanced Repair Technology, Inc.**]
    c. [**ConServ Epoxy LLC**]
    d. [**Gougeon Brothers, Inc.**]
    e. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
    f. [**Protective Coating Company**]
    g. [**System Three Resins, Inc.**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Abatron, Inc**]
    b. [**Advanced Repair Technology, Inc.**]
    c. [**ConServ Epoxy LLC**]
    d. [**Gougeon Brothers, Inc.**]
    e. [**Polymeric Systems, Inc.; PPG Industries, Inc.**]
    f. [**Protective Coating Company**]

g. [**System Three Resins, Inc.**]
h. <**Insert manufacturer's name**>

E. Gypsum-Plaster Patching Compound: Finish coat plaster and bonding compound in accordance with ASTM C842.

PART 3 - EXECUTION

3.1 PROTECTION OF EXISTING SURFACES

A. Comply with each manufacturer's written instructions for protecting building and other surfaces against damage from exposure to its products. Prevent chemical solutions from coming into contact with people, motor vehicles, landscaping, buildings, and other surfaces that could be harmed by such contact.

1. Cover adjacent surfaces with materials that are proven to resist chemical solutions being used unless the solutions will not damage adjacent surfaces. Use protective materials that are UV resistant and waterproof. Apply masking agents to comply with manufacturer's written instructions. Do not apply liquid masking agent to painted or porous surfaces. When no longer needed, promptly remove masking to prevent adhesive staining.
2. Do not apply chemical solutions during winds of sufficient force to spread them to unprotected surfaces.
3. Neutralize and collect alkaline and acid wastes before disposal.
4. Dispose of runoff from operations by legal means and in a manner that prevents soil erosion, undermining of paving and foundations, damage to landscaping, and water penetration into building interiors.

3.2 MAINTENANCE REPAINTING, GENERAL

A. Maintenance Repainting Appearance Standard: Completed work is to have a uniform appearance as viewed by Architect from building interior at [**5 ft. (1.5 m)**][**10 ft. (3 m)**]<**Insert distance**> away from painted surface and from building exterior at [**20 ft. (6 m)**][**50 ft. (15 m)**]<**Insert distance**> away from painted surface.

B. Execution of the Work: In repainting surfaces, disturb them as minimally as possible and as follows:

1. Remove failed coatings and corrosion and repaint.
2. Verify that substrate surface conditions are suitable for repainting.
3. Allow other trades to repair items in place before repainting.

C. Mechanical Abrasion: Where mechanical abrasion is needed for the Work, use gentle methods, such as scraping and lightly hand sanding, that will not abrade softer substrates, reducing clarity of detail.

D. Heat Processes: Do not use torches, heat guns, or heat plates.

3.3 EXAMINATION

A. Examine substrates and conditions for compliance with requirements for maximum moisture content and other conditions affecting performance of painting work. Comply with paint manufacturer's written instructions for inspection.

B. Maximum Moisture Content of Substrates: Do not begin application of coatings unless moisture content

of exposed surface is below the maximum value recommended in writing by paint manufacturer and not greater than the following maximum values when measured with an electronic moisture meter appropriate to the substrate material:

1. Concrete: 12 percent.
2. Gypsum Board: 12 percent.
3. Gypsum Plaster: 12 percent.
4. Masonry (Clay and CMU): 12 percent.
5. Portland Cement Plaster (Stucco): 12 percent.
6. Wood: 15 percent.

C. Alkalinity: Do not begin application of coatings unless surface alkalinity is within range recommended in writing by paint manufacturer. Conduct alkali testing with litmus paper on exposed plaster, cementitious, and masonry surfaces.

D. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.

1. If existing surfaces cannot be prepared to an acceptable condition for proper finishing by using specified surface-preparation methods, notify Architect in writing.

E. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.

1. Application of coating indicates acceptance of surfaces and conditions.

3.4 APPLICATION OF PREPARATORY CLEANING MATERIALS

A. General: Use the gentlest, appropriate method necessary to clean surfaces in preparation for painting. Clean all surfaces, corners, contours, and interstices.

B. Detergent Cleaning: Wash surfaces by hand using clean rags, sponges, and bristle brushes. Scrub surface with detergent solution and bristle brush until soil is thoroughly dislodged and can be removed by rinsing. Use small brushes to remove soil from joints and crevices. Dip brush in solution often to ensure that adequate fresh detergent is used and that surface remains wet. Rinse with water applied by clean rags or sponges.

C. Solvent Cleaning: Use solvent cleaning to remove oil, grease, smoke, tar, and asphalt from painted or unpainted surfaces before other preparation work. Wipe surfaces with solvent using clean rags and sponges. If necessary, spot-solvent cleaning may be employed just prior to commencement of paint application, provided enough time is allowed for complete evaporation. Use clean solvent and clean rags for the final wash to ensure that all foreign materials have been removed. Do not use solvents, including primer thinner and turpentine, that leave residue.

D. Mildew Removal: Clean off existing mildew by scrubbing with bristle brush or sponge and detergent solution. Scrub mildewed areas with mildewcide. Rinse with water applied by clean rags or sponges.

E. Chemical Rust Removal:

1. Remove loose rust scale with specified abrasives for ferrous-metal cleaning.
2. Apply rust remover with brushes or as recommended in writing by manufacturer.
3. Allow rust remover to remain on surface for period recommended in writing by manufacturer or as determined by preconstruction testing. Do not allow extended dwell time.
4. Wipe off residue with mineral spirits and either steel wool or soft rags, or clean with method recommended in writing by manufacturer to remove residue.

5. Dry immediately with clean, soft cloths. Follow direction of grain in metal.
6. Prime immediately to prevent rust. Do not touch cleaned metal surface until primed.

F. Mechanical Rust Removal:

1. Remove rust with specified abrasives for ferrous-metal cleaning. Clean to bright metal.
2. Wipe off residue with mineral spirits and either steel wool or soft rags.
3. Dry immediately with clean, soft cloths. Follow direction of grain in metal.
4. Prime immediately to prevent rust. Do not touch cleaned metal surface until primed.

3.5 APPLICATION OF PAINT REMOVERS

A. General: Remove paint where indicated on Drawings. Where cleaning methods have been attempted and further removal of the paint is required because of incompatible or unsatisfactory surfaces for repainting, remove paint to extent required by conditions.

1. Application: Apply paint removers in accordance with paint-remover manufacturer's written instructions. Do not allow paint removers to remain on surface for periods longer than recommended in writing by manufacturer.

   a. Apply materials to all surfaces, corners, contours, and interstices, to provide a uniform final appearance without streaks.
   b. After work is complete, remove protection no longer required. Remove tape and adhesive marks.

2. Brushes: Use brushes that are resistant to chemicals being used.

   a. Metal Substrates: If using wire brushes on metal, use brushes of same metal composition as metal being treated.
   b. Wood Substrates: Do not use wire brushes.

3. Spray Equipment: Use spray equipment that provides controlled application at volume and pressure indicated, measured at nozzle. Adjust pressure and volume to ensure that spray methods do not damage surfaces.

   a. Equip units with pressure gauges.
   b. Unless otherwise indicated, hold spray nozzle at least **6 inches (150 mm)** from surface and apply material in horizontal, back-and-forth sweeping motion, overlapping previous strokes to produce uniform coverage.
   c. For chemical spray application, use low-pressure tank or chemical pump suitable for chemical indicated, equipped with nozzle having a cone-shaped spray.
   d. For water-spray application, use fan-shaped spray tip that disperses water at an angle of 25 to 50 degrees.
   e. For heated water-spray application, use equipment capable of maintaining temperature between **140 and 160 deg F (60 and 71 deg C)** at flow rates indicated.

B. Paint Removal with Hand Tools: Remove paint manually using hand-held scrapers, wire brushes, sandpaper, and metallic wool as appropriate for the substrate material.

C. Paint Removal with Alkaline Paste Paint Remover:

1. Remove loose and peeling paint using [**water,**] scrapers, stiff brushes, or a combination of these. Let surface dry thoroughly.
2. Apply paint remover to dry, painted surface with brushes.
3. Allow paint remover to remain on surface for period recommended in writing by manufacturer or

as determined by preconstruction testing.
4. Rinse with [**cold**][**hot**] water applied by [**low**][**medium**] -pressure spray to remove chemicals and paint residue.
5. Use mechanical methods recommended in writing by manufacturer to remove chemicals and paint residue.
6. Repeat process if necessary to remove all paint.

D. Paint Removal with Covered or Skin-Forming Alkaline Paint Remover:

1. Remove loose and peeling paint using [**water,**] scrapers, stiff brushes, or a combination of these. Let surface dry thoroughly.
2. Apply paint remover to dry, painted surface with brushes or as recommended in writing by manufacturer.
3. Apply cover in accordance with manufacturer's written instructions.
4. Allow paint remover to remain on surface for period recommended in writing by manufacturer or as determined by preconstruction testing.
5. Scrape off paint and remover.
6. Rinse with [**cold**][**hot**] water applied by [**low**][**medium**] -pressure spray to remove chemicals and paint residue.
7. Use mechanical methods recommended in writing by manufacturer to remove chemicals and paint residue.
8. For spots of remaining paint, apply alkaline paste paint remover in accordance with "Paint Removal with Alkaline Paste Paint Remover" Paragraph.

E. Paint Removal with Solvent-Type Paste Paint Remover:

1. Remove loose and peeling paint using [**water,**] scrapers, stiff brushes, or a combination of these. Let surface dry thoroughly.
2. Apply thick coating of paint remover to dry, painted surface with natural-fiber cleaning brush, deep-nap roller, or large paintbrush. Apply in one or two coats in accordance with manufacturer's written instructions.
3. Allow paint remover to remain on surface for period recommended in writing by manufacturer or as determined by preconstruction testing.
4. Rinse with [**cold**][**hot**] water applied by [**low**][**medium**] -pressure spray to remove chemicals and paint residue.
5. Use mechanical methods recommended in writing by manufacturer to remove chemicals and paint residue.
6. Repeat process if necessary to remove all paint.

F. Paint Removal with Covered, Solvent-Type Paste Paint Remover:

1. Remove loose and peeling paint using [**water,**] scrapers, stiff brushes, or a combination of these. Let surface dry thoroughly.
2. Apply paint remover to dry, painted surface with natural-fiber cleaning brush, deep-nap roller, or large paint brush or as recommended in writing by manufacturer.
3. Apply cover in accordance with manufacturer's written instructions.
4. Allow paint remover to remain on surface for period recommended in writing by manufacturer or as determined by preconstruction testing.
5. Scrape off paint and remover.
6. Rinse with [**cold**][**hot**] water applied by [**low**][**medium**] -pressure spray to remove chemicals and paint residue.
7. Use mechanical methods recommended in writing by manufacturer to remove remaining chemicals and paint residue.

3.6 SUBSTRATE REPAIR

A. General: Repair substrate surface defects that are inconsistent with the surface appearance of adjacent materials and finishes.

B. Metal Substrates:

1. Preparation: Treat repair locations by wire-brushing and solvent cleaning. Use [**chemical**][**or**][**mechanical**] rust removal method to clean off rust.
2. Defects in Metal Surfaces: Repair non-load-bearing defects in existing metal surfaces, including dents and gouges more than [**1/16 inch (6 mm)**][**1/8 inch (3 mm)**]<**Insert dimension**> deep or [**1/2 inch (13 mm)**][**1 inch (25 mm)**]<**Insert dimension**> across and all holes and cracks by filling with metal-patching compound and sanding smooth. Remove burrs and protruding fasteners.
3. Priming: Prime iron and steel surfaces immediately after repair to prevent flash rusting. Stripe paint corners, crevices, bolts, welds, and sharp edges. Apply two coats to surfaces that are inaccessible after completion of the Work.

C. Cementitious Material Substrates:

1. General: Repair defects including dents and chips more than [**1/4 inch (6 mm)**][**1/2 inch (13 mm)**]<**Insert dimension**> in size and all holes and cracks by filling with cementitious patching compound and sanding smooth. Remove protruding fasteners.
2. New and Bare Portland Cement Plaster (Stucco): Neutralize surface of plaster with mild acid solution as recommended in writing by paint manufacturer. In lieu of acid neutralization, follow manufacturer's written instruction for primer or transition coat over alkaline plaster surfaces.
3. Existing Concrete, Cement Plaster, and Other Cementitious Substrates: Remove efflorescence, chalk, dust, dirt, grease, oils, and release agents. If surfaces are too alkaline to paint, correct this condition before painting.

D. Wood Substrates:

1. Repair wood defects including dents and gouges more than [**1/8 inch (3 mm)**][**1/4 inch (6 mm)**]<**Insert dimension**> in size and all holes and cracks by filling with wood-patching compound and sanding smooth. Reset or remove protruding fasteners.
2. Where existing paint is allowed to remain, sand irregular buildup of paint, runs, and sags to achieve a uniformly smooth surface.

E. Gypsum-Plaster and Gypsum-Board Substrates:

1. Repair defects including dents and chips more than [**1/8 inch (3 mm)**][**1/4 inch (6 mm)**]<**Insert dimension**> in size and all holes and cracks by filling with gypsum-plaster patching compound and sanding smooth. Remove protruding fasteners.
2. Rout out surface cracks to remove loose, unsound material; fill with patching compound and sand smooth.

3.7 APPLICATION OF PAINT MATERIALS, GENERAL

A. Comply with manufacturers' written instructions for application methods unless otherwise indicated in this Section.

B. Prepare surfaces to be painted in accordance with the Surface-Preparation Schedule and with manufacturer's written instructions for each substrate condition.

C. Apply a transition coat over incompatible existing coatings.

D. Metal Substrates: Stripe paint corners, crevices, bolts, welds, and sharp edges before applying full coat. Apply two coats to surfaces that are inaccessible after completion of the Work. Tint stripe coat different than the main coating and apply with brush.

E. Blending Painted Surfaces: When painting new substrates patched into existing surfaces or touching up missing or damaged finishes, apply coating system specified for the specific substrate. Apply final finish coat over entire surface from edge to edge and corner to corner.

3.8 FIELD QUALITY CONTROL

A. Manufacturer's Field Service: Engage paint-remover manufacturer's factory-authorized service representative for consultation and Project-site inspection and to provide on-site assistance when requested by Architect.

B. Paint Material Testing: Owner may engage the services of a qualified testing and inspecting agency to inspect and test paint for composition and dry film thickness.

1. Paint Composition: The following procedure may be performed at any time and as often as Owner deems necessary during the period when paints are being applied:

   a. Testing agency will sample paint materials being used. Samples of material delivered to Project site will be taken, identified, sealed, and certified in presence of Contractor.
   b. Testing agency will perform tests for compliance of paint materials with product requirements.
   c. If test results show materials being used do not comply with product requirements, Contractor will remove noncomplying-paint materials from Project site, pay for testing, and repaint surfaces painted with rejected materials. Remove rejected materials from previously painted surfaces if, on repainting with complying materials, the two paints are incompatible.

2. Dry Film Thickness:

   a. Contractor will touch up and restore painted surfaces damaged by testing.
   b. If test results show that dry film thickness of applied paint does not comply with paint manufacturer's written instructions, Contractor will pay for testing and apply additional coats as needed to provide dry film thickness that complies with paint manufacturer's written instructions.

3.9 CLEANING

A. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.

B. After completing paint application, clean spattered surfaces. Remove spattered paints by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

3.10 PROTECTION

A. Protect work of other trades against damage from paint application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.

B. At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.

3.11 SURFACE-PREPARATION SCHEDULE

A. General: Before painting, prepare surfaces [**where indicated on Drawings**] for painting in accordance with applicable requirements specified in this schedule.

1. Examine surfaces to evaluate each surface condition in accordance with paragraphs below.
2. Where existing degree of soiling prevents examination, preclean surface and allow it to dry before making an evaluation.
3. Repair substrate defects in accordance with "Substrate Repair" Article.

B. Surface Preparation for Sound Surfaces: [**MPI DSD 0**]<**Insert designation**> .

1. Surface Condition: Existing paint film in good condition and tightly adhered.
2. Paint Removal: Not required.
3. Preparation for Painting: Wash surface by detergent cleaning; use solvent cleaning where needed. Roughen or degloss cleaned surfaces to ensure paint adhesion in accordance with paint manufacturer's written instructions.

C. Surface Preparation for Slightly Deteriorated Surfaces: [**MPI DSD 1**]<**Insert designation**> .

1. Surface Condition: Paint film cracked or broken but adhered. Surface may include visual (aesthetic) defects that do not affect film's protective properties.
2. Paint Removal: Scrape by hand-tool cleaning methods to remove loose paint until only tightly adhered paint remains.
3. Preparation for Painting: Wash surface by detergent cleaning; use other cleaning methods for small areas of bare substrate if required. Roughen, degloss, and sand the cleaned surfaces to ensure paint adhesion and a smooth finish in accordance with paint manufacturer's written instructions.

D. Surface Preparation for Moderately Deteriorated Surfaces: [**MPI DSD 2**]<**Insert designation**> .

1. Surface Condition: Paint film loose, flaking, or peeling. Surface may show fading such as gloss reduction, slight surface contamination, minor pin holes, scratches, or minor cosmetic defects such as runs or sags.
2. Paint Removal: Remove loose, flaking, or peeling paint film by hand-tool or chemical paint-removal methods.
3. Preparation for Painting: Wash surface by detergent cleaning; use solvent cleaning where needed. Use other cleaning methods for small areas of bare substrate if required. Sand surfaces to smooth remaining paint film edges. Prepare bare cleaned surface to be painted in accordance with paint manufacturer's written instructions for substrate construction materials.

E. Surface Preparation for Severely Deteriorated Surfaces: [**MPI DSD 3**]<**Insert designation**> .

1. Surface Condition: Paint film [**severely deteriorated**][**obscuring fine architectural detail work because of paint-layer buildup**][**and**][**surface indicated to have paint completely removed**] .
2. Paint Removal: Completely remove paint film by hand-tool or chemical paint-removal methods. Remove rust.
3. Preparation for Painting: Prepare bare cleaned surface in accordance with paint manufacturer's written instructions for substrate construction materials.

F. Surface Preparation for Damaged Substrate Surfaces: [**MPI DSD 4**]<**Insert designation**> .

1. Surface Condition: Missing material, small holes and openings, and damaged or corroded substrate.
2. Substrate Preparation: Repair, replace, and treat substrate in accordance with "Substrate Repair" Article [**and requirements in other Specification Sections**] .
3. Preparation for Painting: Sand substrate surfaces to smooth remaining paint film edges and prepare in accordance with paint manufacturer's written instructions for substrate construction materials. Remove rust.
4. Painting: Paint as required for [**MPI DSD 2**]<**Insert designation**> degree of surface degradation.

3.12 EXTERIOR MAINTENANCE REPAINTING SCHEDULE

A. Ferrous Metal Substrates:

1. Alkyd System: [**MPI REX 5.1D**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, metal, surface tolerant [**, MPI #23**] .
        3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, metal, surface tolerant [**, MPI #23**] .
        4) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat: Matching topcoat.
    c. Topcoat:

        1) Alkyd, exterior (Gloss Level G5) [**, MPI #94**] .
        2) Alkyd, exterior (Gloss Level G6) [**, MPI #9**] .
        3) <**Insert manufacturer's name; product name or designation**> .

2. High-Performance, Pigmented-Polyurethane-over-Epoxy System: [**MPI REX 5.1H**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, epoxy, anti-corrosive, for metal [**, MPI #101**] .
        3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, epoxy, anti-corrosive, for metal [**, MPI #101**] .
        4) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat in Primed Areas: Epoxy, high build [**, MPI #108**] .
    c. Topcoat: Polyurethane, two-component, pigmented, Gloss Level G6 [**, MPI #72**] .

        1) <**Insert manufacturer's name; product name or designation**> .

    d. Second Topcoat: Match topcoat.

B. Dimension Lumber Substrates:

1. Applications: Columns, beams, soffits, siding, and fencing.
2. Latex System: [**MPI REX 6.2A**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, for exterior wood [**, MPI #5**] .
        3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, latex, for exterior wood [**, MPI #6**] .
        4) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, for exterior wood [**, MPI #5**] .
        5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, latex, for exterior wood [**, MPI #6**] .
        6) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat: Matching topcoat.
    c. Topcoat:

        1) Latex, exterior, Gloss Levels G1-G2 [**, MPI #10**] .
        2) Latex, exterior, Gloss Levels G3-G4 [**, MPI #15**] .
        3) Latex, exterior, Gloss Level G5 [**, MPI #11**] .
        4) Latex, exterior, Gloss Level G6 [**, MPI #119**] .
        5) <**Insert manufacturer's name; product name or designation**> .

3. Alkyd System: [**MPI REX 6.2C**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, for exterior wood [**, MPI #5**] .
        3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, for exterior wood [**, MPI #5**] .
        4) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat: Matching topcoat.
    c. Topcoat:

        1) Alkyd, exterior, Gloss Level G1 [**, MPI #8**] .
        2) Alkyd, exterior, Gloss Level G5 [**, MPI #94**] .
        3) Alkyd, exterior, Gloss Level G6 [**, MPI #9**] .
        4) <**Insert manufacturer's name; product name or designation**> .

C. Dressed Lumber Substrates:

1. Applications: Doors, windows, door and window frames, casings, and smooth fascia.
2. Latex System: [**MPI REX 6.3A**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime

with primer, alkyd, for exterior wood [**, MPI #5**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, for exterior wood [**, MPI #5**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, exterior, Gloss Levels G1-G2 [**, MPI #10**] .
2) Latex, exterior, Gloss Levels G3-G4 [**, MPI #15**] .
3) Latex, exterior, Gloss Level G5 [**, MPI #11**] .
4) Latex, exterior, Gloss Level G6 [**, MPI #119**] .
5) <**Insert manufacturer's name; product name or designation**> .

3. Alkyd System: [**MPI REX 6.3B**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, for exterior wood [**, MPI #5**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, for exterior wood [**, MPI #5**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Alkyd, exterior, Gloss Level G1 [**, MPI #8**] .
2) Alkyd, exterior, Gloss Level G5 [**, MPI #94**] .
3) Alkyd, exterior, Gloss Level G6 [**, MPI #9**] .
4) <**Insert manufacturer's name; product name or designation**> .

4. Varnish System (Clear): [**MPI REX 6.3F**]<**Insert system description**> .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with topcoat.
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with topcoat.
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Varnish, with UV inhibitor, exterior, Gloss Level G5 [**, MPI #30**] .
2) Varnish, with UV inhibitor, exterior, Gloss Level G6 [**, MPI #29**] .
3) Varnish, marine spar, exterior, Gloss Level G6 [**, MPI #28**] .
4) <**Insert manufacturer's name; product name or designation**> .

D. Wood Decks and Stairs Substrates:

1. Latex Porch and Floor System over Alkyd Primer: [**MPI REX 6.5A**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, for exterior wood [**, MPI #5**] .
        3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, for exterior wood [**, MPI #5**] .
        4) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat: Matching topcoat.
    c. Topcoat:

        1) Floor paint, latex, low gloss [**, MPI #60**] .
        2) Floor paint, latex, gloss [**, MPI #68**] .
        3) <**Insert manufacturer's name; product name or designation**> .

    d. Topcoat Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

2. Alkyd Floor Enamel System: [**MPI REX 6.5B**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with topcoat.
        3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with topcoat.
        4) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat: Matching topcoat.
    c. Topcoat:

        1) Floor enamel, alkyd, low gloss [**, MPI #59**] .
        2) Floor enamel, alkyd, gloss [**, MPI #27**] .
        3) <**Insert manufacturer's name; product name or designation**> .

    d. Topcoat Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

E. Wood Shingles and Shakes:

1. Latex System: [**MPI REX 6.6A**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, for exterior wood [**, MPI #5**] .

3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, for exterior wood [**, MPI #5**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, exterior, Gloss Levels G1-G2 [**, MPI #10**] .
2) Latex, exterior, Gloss Levels G3-G4 [**, MPI #15**] .
3) Latex, exterior, Gloss Level G5 [**, MPI #11**] .
4) Latex, exterior, Gloss Level G6 [**, MPI #119**] .
5) <**Insert manufacturer's name; product name or designation**> .

2. Alkyd System: [**MPI REX 6.6B**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, for exterior wood [**, MPI #5**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, for exterior wood [**, MPI #5**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Alkyd, exterior, Gloss Level G1 [**, MPI #8**] .
2) Alkyd, exterior, Gloss Level G5 [**, MPI #94**] .
3) Alkyd, exterior, Gloss Level G6 [**, MPI #9**] .
4) <**Insert manufacturer's name; product name or designation**> .

3.13 INTERIOR MAINTENANCE REPAINTING SCHEDULE

A. Ferrous Metal Substrates:

1. Latex System: [**MPI RIN 5.1N**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, metal, surface tolerant [**, MPI #23**] .
3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, anti-corrosive, for metal [**, MPI #79**] .
4) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, rust inhibitive, water based [**, MPI #107**] .
5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, metal, surface tolerant [**, MPI #23**] .
6) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, anti-corrosive, for metal [**, MPI #79**] .
7) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime

coat with primer, rust inhibitive, water based [**, MPI #107**] .
8) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G1 [**, MPI #53**] .
2) Latex, interior, Gloss Level G2 [**, MPI #44**] .
3) Latex, interior, Gloss Level G3 [**, MPI #52**] .
4) Latex, interior, Gloss Level G4 [**, MPI #43**] .
5) Latex, interior, Gloss Level G5 [**, MPI #54**] .
6) Latex, interior, Gloss Level G6 [**, MPI #114**] .
7) <**Insert manufacturer's name; product name or designation**> .

2. Alkyd System: [**MPI RIN 5.1E**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, metal, surface tolerant [**, MPI #23**] .
3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, alkyd, anti-corrosive, for metal [**, MPI #79**] .
4) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, metal, surface tolerant [**, MPI #23**] .
5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, alkyd, anti-corrosive, for metal [**, MPI #79**] .
6) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Alkyd, interior, Gloss Level G1 [**, MPI #49**] .
2) Alkyd, interior, Gloss Level G3 [**, MPI #51**] .
3) Alkyd, interior, Gloss Level G5 [**, MPI #47**] .
4) Alkyd, interior, Gloss Level G6 [**, MPI #48**] .
5) <**Insert manufacturer's name; product name or designation**> .

3. High-Performance, Pigmented-Polyurethane-over-Epoxy System: [**MPI RIN 5.1H**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with epoxy, gloss [**, MPI #77**] .
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, zinc rich, organic [**, MPI #18**] .
3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, zinc rich, epoxy [**, MPI #20**] .
4) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, zinc rich, organic [**, MPI #18**] .
5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, zinc rich, epoxy [**, MPI #20**] .
6) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat in Primed Areas: Epoxy, gloss [**, MPI #77**] .
c. Topcoat: Polyurethane, two-component, pigmented, Gloss Level G6 [**, MPI #72**] .

1) <**Insert manufacturer's name; product name or designation**> .

d. Second Topcoat: Matching topcoat.

B. Dimension Lumber Substrates:

1. Applications: Columns, beams, exposed joists, and underside of decking.
2. Latex System over Latex Primer: [**MPI RIN 6.2D**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, latex, for interior wood [**, MPI #39**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, latex, for interior wood [**, MPI #39**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G1 [**, MPI #53**] .
2) Latex, interior, Gloss Level G2 [**, MPI #44**] .
3) Latex, interior, Gloss Level G3 [**, MPI #52**] .
4) Latex, interior, Gloss Level G4 [**, MPI #43**] .
5) Latex, interior, Gloss Level G5 [**, MPI #54**] .
6) Latex, interior, Gloss Level G6 [**, MPI #114**] .
7) <**Insert manufacturer's name; product name or designation**> .

3. Latex System over Alkyd Primer: [**MPI RIN 6.2A**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with undercoat, enamel, interior [**, MPI #46**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with undercoat, enamel, interior [**, MPI #46**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G1 [**, MPI #53**] .
2) Latex, interior, Gloss Level G2 [**, MPI #44**] .
3) Latex, interior, Gloss Level G3 [**, MPI #52**] .
4) Latex, interior, Gloss Level G4 [**, MPI #43**] .
5) Latex, interior, Gloss Level G5 [**, MPI #54**] .

6) Latex, interior, Gloss Level G6 [**, MPI #114**] .
7) <**Insert manufacturer's name; product name or designation**> .

4. Alkyd System: [**MPI RIN 6.2C**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with undercoat, enamel, interior [**, MPI #46**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with undercoat, enamel, interior [**, MPI #46**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Alkyd, interior, Gloss Level G1 [**, MPI #49**] .
2) Alkyd, interior, Gloss Level G3 [**, MPI #51**] .
3) Alkyd, interior, Gloss Level G5 [**, MPI #47**] .
4) Alkyd, interior, Gloss Level G6 [**, MPI #48**] .
5) <**Insert manufacturer's name; product name or designation**> .

C. Wood Dressed Lumber Substrates:

1. Applications: Doors, windows, door and window frames, and moldings.
2. Latex System over Latex Primer: [**MPI RIN 6.3U**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, latex, for interior wood [**, MPI #39**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, latex, for interior wood [**, MPI #39**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G5 [**, MPI #54**] .
2) Latex, interior, Gloss Level G6 [**, MPI #114**] .
3) <**Insert manufacturer's name; product name or designation**> .

3. Low-Odor Latex System over Latex Primer: [**MPI RIN 6.3V**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, latex, for interior wood [**, MPI #39**] .

3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, latex, for interior wood [**, MPI #39**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, institutional low odor/VOC, Gloss Level G1 [**, MPI #143**] .
2) Latex, interior, institutional low odor/VOC, Gloss Level G2 [**, MPI #144**] .
3) Latex, interior, institutional low odor/VOC, Gloss Level G3 [**, MPI #145**] .
4) Latex, interior, institutional low odor/VOC, Gloss Level G4 [**, MPI #146**] .
5) Latex, interior, institutional low odor/VOC, Gloss Level G5 [**, MPI #147**] .
6) Latex, interior, institutional low odor/VOC, Gloss Level G6 [**, MPI #148**] .
7) <**Insert manufacturer's name; product name or designation**> .

4. Latex System over Alkyd Primer: [**MPI RIN 6.3A**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with undercoat, enamel, interior [**, MPI #46**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with undercoat, enamel, interior [**, MPI #46**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G5 [**, MPI #54**] .
2) Latex, interior, Gloss Level G6 [**, MPI #114**] .
3) <**Insert manufacturer's name; product name or designation**> .

5. Alkyd System: [**MPI RIN 6.3B**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with undercoat, enamel, interior [**, MPI #46**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with undercoat, enamel, interior [**, MPI #46**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Alkyd, interior, Gloss Level G5 [**, MPI #47**] .
2) Alkyd, interior, Gloss Level G6 [**, MPI #48**] .
3) <**Insert manufacturer's name; product name or designation**> .

6. Alkyd Varnish System (Clear): [**MPI RIN 6.3J**]<**Insert system description**> .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with shellac [**, MPI #88**] .
3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with alkyd, sanding sealer, clear [**, MPI #102**] .
4) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with shellac [**, MPI #88**] .
5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with alkyd, sanding sealer, clear [**, MPI #102**] .
6) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Varnish, interior, Gloss Level G1 [**, MPI #73**] .
2) Varnish, interior, Gloss Level G5 [**, MPI #74**] .
3) Varnish, interior, Gloss Level G6 [**, MPI #75**] .
4) <**Insert manufacturer's name; product name or designation**> .

D. Wood Paneling, Casework, and Millwork:

1. Latex System over Latex Primer: [**MPI RIN 6.4T**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, latex, for interior wood [**, MPI #39**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, latex, for interior wood [**, MPI #39**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G5 [**, MPI #54**] .
2) Latex, interior, Gloss Level G6 [**, MPI #114**] .
3) <**Insert manufacturer's name; product name or designation**> .

2. Low-Odor Latex System over Latex Primer: [**MPI RIN 6.4D**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, latex, for interior wood [**, MPI #39**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, latex, for interior wood [**, MPI #39**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, institutional low odor/VOC, Gloss Level G1 [**, MPI #143**] .
2) Latex, interior, institutional low odor/VOC, Gloss Level G2 [**, MPI #144**] .
3) Latex, interior, institutional low odor/VOC, Gloss Level G3 [**, MPI #145**] .
4) Latex, interior, institutional low odor/VOC, Gloss Level G4 [**, MPI #146**] .
5) Latex, interior, institutional low odor/VOC, Gloss Level G5 [**, MPI #147**] .
6) Latex, interior, institutional low odor/VOC, Gloss Level G6 [**, MPI #148**] .
7) <**Insert manufacturer's name; product name or designation**> .

3. Latex System over Alkyd Primer: [**MPI RIN 6.4A**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with undercoat, enamel, interior [**, MPI #46**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with undercoat, enamel, interior [**, MPI #46**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G1 [**, MPI #53**] .
2) Latex, interior, Gloss Level G2 [**, MPI #44**] .
3) Latex, interior, Gloss Level G3 [**, MPI #52**] .
4) Latex, interior, Gloss Level G4 [**, MPI #43**] .
5) Latex, interior, Gloss Level G5 [**, MPI #54**] .
6) Latex, interior, Gloss Level G6 [**, MPI #114**] .
7) <**Insert manufacturer's name; product name or designation**> .

4. Alkyd System: [**MPI RIN 6.4C**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with undercoat, enamel, interior [**, MPI #46**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with undercoat, enamel, interior [**, MPI #46**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Alkyd, interior, Gloss Level G1 [**, MPI #49**] .
2) Alkyd, interior, Gloss Level G3 [**, MPI #51**] .
3) Alkyd, interior, Gloss Level G5 [**, MPI #47**] .
4) Alkyd, interior, Gloss Level G6 [**, MPI #48**] .
5) <**Insert manufacturer's name; product name or designation**> .

5. Alkyd Varnish System over Stain: [**MPI RIN 6.4F**]<**Insert system description**> .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with stain, semi-transparent, for interior wood [**, MPI #90**] .
        3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with stain, semi-transparent, for interior wood [**, MPI #90**] .
        4) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat: Matching topcoat.
    c. Topcoat:

        1) Varnish, interior, Gloss Level G1 [**, MPI #73**] .
        2) Varnish, interior, Gloss Level G5 [**, MPI #74**] .
        3) Varnish, interior, Gloss Level G6 [**, MPI #75**] .
        4) <**Insert manufacturer's name; product name or designation**> .

    d. Stain Color: [**As selected by Architect from manufacturer's full range**][**Match Architect's samples**][**As indicated in a color schedule on Drawings**]<**Insert requirements**> .

E. Wood Floors and Stairs Substrates:

1. Latex Porch and Floor System over Alkyd Primer: [**MPI RIN 6.5J**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
        2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer sealer, alkyd, interior [**, MPI #45**] .
        3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer sealer, alkyd, interior [**, MPI #45**] .
        4) <**Insert manufacturer's name; product name or designation**> .

    b. Intermediate Coat: Matching topcoat.
    c. Topcoat:

        1) Floor paint, latex, low gloss [**, MPI #60**] .
        2) Floor paint, latex, gloss [**, MPI #68**] .
        3) <**Insert manufacturer's name; product name or designation**> .

    d. Topcoat Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

2. Alkyd Floor Enamel System: [**MPI RIN 6.5A**]<**Insert system description**> system [**over a transition coat**] .

    a. Prime Coat:

        1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.

2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with topcoat.
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with topcoat.
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Floor paint, alkyd, low gloss [**, MPI #59**] .
2) Floor enamel, alkyd, gloss [**, MPI #27**] .
3) <**Insert manufacturer's name; product name or designation**> .

d. Topcoat Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

3. Polyurethane Varnish System (Clear): [**MPI RIN 6.5C**]<**Insert system description**> .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with topcoat.
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with topcoat.
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat: Varnish, interior, polyurethane, oil modified, gloss [**, MPI #56**] .

1) <**Insert manufacturer's name; product name or designation**> .

4. Two-Component Aliphatic Polyurethane System (Clear): [**MPI RIN 6.5G**]<**Insert system description**> .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with topcoat.
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with topcoat.
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane, two-component [**, MPI #78**] .

1) <**Insert manufacturer's name; product name or designation**> .

5. Moisture-Cured Polyurethane System (over Stain): [**MPI RIN 6.5L**]<**Insert system description**> .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with stain, semi-transparent, for interior wood [**, MPI #90**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with stain, semi-transparent, for interior wood [**, MPI #90**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat: Varnish, polyurethane, moisture cured, Gloss Level G6 [**, MPI #31**] .

1) <**Insert manufacturer's name; product name or designation**> .

d. Stain Color: [**As selected by Architect from manufacturer's full range**][**Match Architect's samples**][**As indicated in a color schedule on Drawings**]<**Insert requirements**> .

F. Plaster Substrates:

1. Latex System over Waterborne Primer: [**MPI RIN 9.2A**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer sealer, latex, interior [**, MPI #50**] .
3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, stain blocking, water based [**, MPI #137**] .
4) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer sealer, latex, interior [**, MPI #50**] .
5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, stain blocking, water based [**, MPI #137**] .
6) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G1 [**, MPI #53**] .
2) Latex, interior, Gloss Level G2 [**, MPI #44**] .
3) Latex, interior, Gloss Level G3 [**, MPI #52**] .
4) Latex, interior, Gloss Level G4 [**, MPI #43**] .
5) Latex, interior, Gloss Level G5 [**, MPI #54**] .
6) Latex, interior, Gloss Level G6 [**, MPI #114**] .
7) <**Insert manufacturer's name; product name or designation**> .

2. Low-Odor Latex System over Waterborne Primer: [**MPI RIN 9.2M**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer sealer, latex, interior [**, MPI #50**] .

3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, stain blocking, water based [**, MPI #137**] .
4) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer sealer, latex, interior [**, MPI #50**] .
5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, stain blocking, water based [**, MPI #137**] .
6) <**Insert manufacturer's name; product name or designation**> .

b. Topcoat:

1) Latex, interior, institutional low odor/VOC, Gloss Level G1 [**, MPI #143**] .
2) Latex, interior, institutional low odor/VOC, Gloss Level G2 [**, MPI #144**] .
3) Latex, interior, institutional low odor/VOC, Gloss Level G3 [**, MPI #145**] .
4) Latex, interior, institutional low odor/VOC, Gloss Level G4 [**, MPI #146**] .
5) Latex, interior, institutional low odor/VOC, Gloss Level G5 [**, MPI #147**] .
6) Latex, interior, institutional low odor/VOC, Gloss Level G6 [**, MPI #148**] .
7) <**Insert manufacturer's name; product name or designation**> .

3. Latex System over Alkyd Primer: [**MPI RIN 9.2K**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer sealer, alkyd, interior [**, MPI #45**] .
3) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat primer sealer, alkyd, interior [**, MPI #45**] .
4) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Latex, interior, Gloss Level G1 [**, MPI #53**] .
2) Latex, interior, Gloss Level G2 [**, MPI #44**] .
3) Latex, interior, Gloss Level G3 [**, MPI #52**] .
4) Latex, interior, Gloss Level G4 [**, MPI #43**] .
5) Latex, interior, Gloss Level G5 [**, MPI #54**] .
6) <**Insert manufacturer's name; product name or designation**> .

4. Alkyd System: [**MPI RIN 9.2C**]<**Insert system description**> system [**over a transition coat**] .

a. Prime Coat:

1) For [**MPI DSD 1**]<**Insert designation**> degree of surface degradation, touch up with topcoat.
2) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer sealer, latex, interior [**, MPI #50**] .
3) For [**MPI DSD 2**]<**Insert designation**> degree of surface degradation, spot prime with primer, stain blocking, water based [**, MPI #137**] .
4) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer sealer, latex, interior [**, MPI #50**] .
5) For [**MPI DSD 3**]<**Insert designation**> degree of surface degradation, fully prime coat with primer, stain blocking, water based [**, MPI #137**] .

6) <**Insert manufacturer's name; product name or designation**> .

b. Intermediate Coat: Matching topcoat.
c. Topcoat:

1) Alkyd, interior, Gloss Level G1 [**, MPI #49**] .
2) Alkyd, interior, Gloss Level G3 [**, MPI #51**] .
3) Alkyd, interior, Gloss Level G5 [**, MPI #47**] .
4) Alkyd, interior, Gloss Level G6 [**, MPI #48**] .
5) <**Insert manufacturer's name; product name or designation**> .

END OF SECTION 09 01 90 52A

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 05 61 13 - MOISTURE VAPOR EMISSION CONTROL

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. MVE-control system - fluid applied.
2. MVE-control system - sheet membranes.

1.2 ALLOWANCES

A. Concrete MVE-control systems are part of [**Moisture Vapor Emission Control Allowance**]<**Insert allowance**>.

1.3 UNIT PRICES

A. Work of this Section is affected by [**Moisture Vapor Emission Control Unit Price**]<**Insert unit price**>.

1.4 DEFINITIONS

A. MVE: Moisture vapor emission per ASTM F710, a term used by the flooring industry in the United States to measure moisture emission from concrete floors in pounds per 1000 sq. ft. during a 24-hour period (56.51 µg/(s m2) using the anhydrous calcium chloride test.

B. MVER: Moisture vapor emission rate per ASTM F1869, a term used to indicate the amount of water vapor in pounds emitted from a 1000 sq. ft. area of concrete flooring during a 24-hour period.

1.5 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1.6 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Sustainable Design Submittals:

1. Product Data: For waterproofing, providing information for testing in compliance with ASHRAE 160-2016.2009.
2. Product Data: For waterproofing, providing information for testing in compliance with CCR, Title 24, Part 2, Section 1202 and Ch. 14.
3. Product Data: For adhesives, mastics, and sealants, indicating VOC content.
4. Laboratory Test Reports: For adhesives, mastics, and sealants, indicating compliance with requirements for low-emitting materials.

1.7 INFORMATIONAL SUBMITTALS

A. Product Test Reports: For each MVE-control system, for tests performed by [**manufacturer and witnessed by a qualified testing agency**][**a qualified testing agency**].

B. Preinstallation testing reports.

C. Field quality control reports.

D. Qualification Statements: For [**Installer**][**manufacturer**].

1.8 QUALITY ASSURANCE

A. Manufacturer Qualifications: Employs factory-trained personnel who are available for consultation and Project-site inspection.

B. Installer Qualifications: [**Fabricator of products**][**Entity that employs installers and supervisors who are trained and approved by manufacturer**][**Authorized representative who is trained and approved by manufacturer**].

1.9 MOCKUPS

A. Build mockups [**to verify selections made under Sample submittals**][**to demonstrate aesthetic effects**][**to set quality standards for materials and execution**][**to set quality standards for fabrication and installation**][**and**][**for preconstruction testing**].

1. Build mockup [**as indicated on Drawings**][**as directed by Architect**]<**Insert mockup requirements**>.
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.10 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials in original packages and containers, with seals unbroken, bearing manufacturer's labels indicating directions for storage and mixing with other components.

1.11 FIELD CONDITIONS

A. Environmental Limitations: Comply with MVE-control system manufacturer's written instructions for substrate and ambient temperatures, humidity, ventilation, and other conditions affecting system installation.

1. Store system components in a temperature-controlled environment and protected from weather and at ambient temperature of not less than **65 deg F (18 deg C)** and not more than **85 deg F (29.4 deg C)** at least 48 hours before use.
2. Maintain ambient temperature and relative humidity in installation areas within range recommended in writing by MVE-control system manufacturer, but not less than **65 deg F (18 deg C)** or more than **85 deg F (29.4 deg C)** and not less than 40 or more than 60 percent relative

humidity, for 48 hours before installation, during installation, and for 48 hours after installation unless longer period is recommended in writing by manufacturer.

3. Install MVE-control systems where concrete surface temperatures will remain a minimum of **5 deg F (3 deg C)** higher than the dew point for ambient temperature and relative humidity conditions in installation areas for 48 hours before installation, during installation, and for 48 hours after installation unless longer period is recommended in writing by manufacturer.

1.12 WARRANTY

A. Special Warranty: [**Manufacturer agrees**][**Installer agrees**][**Manufacturer and Installer agree**] to repair or replace the floor covering materials or floor coatings and the applied moisture vapor emission control system, that fails in materials and or workmanship within specified warranty period.

1. Warranty Period: [**5**][**10**][**20**]<**Insert number**> year(s) from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. MVE-Control System Capabilities: Capable of suppressing MVE without failure where installed on concrete that exhibits the following conditions:

1. MVER: Maximum [**15 lb of water/1000 sq. ft. (6.80 kg of water/92.9 sq. m)**][**25 lb of water/1000 sq. ft. (11.34 kg of water/92.9 sq. m)**][**30 lb of water/1000 sq. ft. (13.61 kg of water/92.9 sq. m)**]<**Insert rate**> when tested in accordance with ASTM F1869.
2. Relative Humidity: Maximum [**100**][**90**]<**Insert number**> percent when tested in accordance with ASTM F2170 using in situ probes.

B. Water-Vapor Transmission: Through MVE-control system, maximum [**0.10 perm (5.75 ng/Pa x s x sq. m)**][**0.02 perm (1.15 ng/Pa x s x sq. m)**][**0.05 perm (2.86 ng/Pa x s x sq. m)**][**0.06 perm (3.45 ng/Pa x s x sq. m)**] when tested in accordance with ASTM E96/E96M.

C. Tensile Bond Strength: For MVE-control system, greater than [**200 psi (1.38 MPa)**]<**Insert pressure**> with failure in the concrete in accordance with ASTM D7234.

2.2 MVE-CONTROL SYSTEM - FLUID APPLIED

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Advanced Moisture Control, Inc.**]
2. [**ARDEX Americas**]
3. [**Custom Building Products**]
4. [**Dependable, LLC**]
5. [**Floor Seal Technology, Inc.**]
6. [**H.B. Fuller Construction Products Inc. / TEC**]
7. [**KOSTER American Corporation**]
8. [**Laticrete International, Inc.**]
9. [**MAPEI Corporation**]

10. [**Maxxon Corporation**]
11. [**Schonox HPS North America, Inc.**]
12. [**Synthetics International**]
13. [**USG Corporation**]
14. [**Uzin Utz North America, Inc.**]
15. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Advanced Moisture Control, Inc.**]
2. [**ARDEX Americas**]
3. [**Custom Building Products**]
4. [**Dependable, LLC**]
5. [**Floor Seal Technology, Inc.**]
6. [**H.B. Fuller Construction Products Inc. / TEC**]
7. [**KOSTER American Corporation**]
8. [**Laticrete International, Inc.**]
9. [**MAPEI Corporation**]
10. [**Maxxon Corporation**]
11. [**Schonox HPS North America, Inc.**]
12. [**Synthetics International**]
13. [**USG Corporation**]
14. [**Uzin Utz North America, Inc.**]
15. <**Insert manufacturer's name**>

C. MVE-Control System:

1. ASTM F3513 compliant-qualified, fluid-applied, single-component, membrane-forming system; formulated for application on [**new**][**and**][**existing**] concrete substrates to reduce MVER to level required for installation of floor coverings indicated and acceptable to manufacturers of floor covering products indicated, including adhesives.
2. ASTM F3010 compliant-qualified, fluid-applied, two-component, epoxy-resin, membrane-forming system; formulated for application on [**new**][**and**][**existing**] concrete substrates to reduce MVER to level required for installation of floor coverings indicated and acceptable to manufacturers of floor covering products indicated, including adhesives.
3. Water-based epoxy, fluid-applied, [**single**][**two**]-component, membrane-forming system; formulated for application on [**new**][**and**][**existing**] concrete substrates to reduce MVER to level required for installation of floor coverings indicated and acceptable to manufacturers of floor covering products indicated, including adhesives.
4. Polyurethane resin, fluid-applied, [**single**][**two**]-component, membrane-forming system; formulated for application on [**new**][**and**][**existing**] concrete substrates to reduce MVER to level required for installation of floor coverings indicated and acceptable to manufacturers of floor covering products indicated, including adhesives.
5. Acrylic-based, fluid-applied, [**two**][**three**]-component, membrane-forming system; formulated for application on [**new**][**and**][**existing**] concrete substrates to reduce MVER to level required for installation of floor coverings indicated and acceptable to manufacturers of floor covering products indicated, including adhesives.
6. Silicate-based, fluid-applied, single-component, membrane-forming system; formulated for application on [**new**][**and**][**existing**] concrete substrates to reduce MVER to level required for installation of floor coverings indicated and acceptable to manufacturers of floor covering products indicated, including adhesives.
7. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

8. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
9. Verify adhesive complies with testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify building concentration of formaldehyde does not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde does not exceed 9 mcg/cu. m.

2.3 MVE-CONTROL SYSTEM - SHEET MEMBRANES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. <**Insert manufacturer's name**>.

B. MVE-Control System: Sheet membrane, mold and fungal resistance per ASTM D3273, loose laid applied system; formulated for application on concrete substrates to reduce MVER to level required for installation of floor coverings indicated and acceptable to manufacturers of floor covering products indicated, including adhesives.

2.4 ACCESSORIES

A. Patching and Repair Material: Moisture-, mildew-, and alkali-resistant product recommended in writing by MVE-control system manufacturer and with minimum of [**3000 psi (20.68 MPa)**]<**Insert pressure**> compressive strength after 28 days when tested in accordance with ASTM C109/C109M.

B. Leveling Material: Moisture-, mildew-, and alkali-resistant product recommended in writing by MVE-control system manufacturer and with minimum of [**3000 psi (20.68 MPa)**]<**Insert pressure**> compressive strength after 28 days when tested in accordance with ASTM C109/C109M.

C. Crack and Joint Repair Material: Resin-based material recommended in writing by MVE-control system manufacturer for sealing concrete substrate crack repair.

D. Substrate Primer: Provide MVE-control system manufacturer's substrate primer if required for system indicated by substrate conditions. Ensure adhesion of products to MVE-control system.

E. Cementitious Underlayment: [**Gypsum**][**Hydraulic**] cement-based underlayment. Provide product as recommended by MVE-control system manufacturer.

F. Seam Tapes: Double-sided tape to adhere to concrete surface and MVE-control sheet membrane surface with seal tape for seams.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Installer present, for compliance with requirements for maximum moisture content, installation tolerances, and other conditions affecting performance of the

Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

1. Installation of system indicates acceptance of surfaces and conditions.

3.2 PREPARATION

A. Preinstallation Testing:

1. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests.
2. Alkalinity Testing: Perform pH testing in accordance with flooring manufacturer's written instructions or, in the absence thereof, in accordance with ASTM F3441. Install MVE-control system in areas where pH readings are outside the acceptable range of the flooring materials to be installed.
3. Moisture Testing: Perform tests so that each test area does not exceed [**200 sq. ft. (18.6 sq. m)**][**1000 sq. ft. (304.8 sq. m)**]<**Insert dimension**>, and perform no fewer than three tests in each installation area and with test areas evenly spaced in installation areas.

    a. Anhydrous Calcium Chloride Test: ASTM F1869. Install MVE-control system in locations where concrete substrate MVER exceeds flooring manufacturer's published limits.
    b. Internal Relative Humidity Test: Using in situ probes, ASTM F2170. Install MVE-control system in locations where concrete substrates exhibit relative humidity levels that exceed flooring manufacturer's published limits.

4. Tensile-Bond-Strength Testing: For typical locations indicated to receive installation of MVE-control system, install minimum [**100-sq. ft. (9.29-sq. m)**]<**Insert dimension**> area of MVE-control system to prepared concrete substrate and test in accordance with ASTM D7234.

    a. Proceed with installation only where tensile bond strength is greater than [**200 psi (1.38 MPa)**]<**Insert pressure**> with failure in the concrete.

B. Concrete Substrates: Prepare and clean substrates in accordance with MVE-control system manufacturer's written instructions to ensure adhesion of system to concrete.

1. Remove coatings and other substances that are incompatible with MVE-control system and that contain soap, wax, oil, or silicone, using mechanical methods recommended in writing by MVE-control system manufacturer. Do not use solvents.
2. Provide concrete surface profile CSP as described within ICRI 310.2R as required by the MVE control system, if any, by shot blasting using apparatus that abrades the concrete surface with shot, contains the dispensed shot within the apparatus, and recirculates the shot by vacuum pickup.
3. After shot blasting, repair damaged and deteriorated concrete in accordance with MVE-control system manufacturer's written instructions.
4. Protect substrate voids and joints to prevent resins from flowing into or leaking through them.
5. Fill surface depressions and irregularities with patching and repair material.
6. Fill surface cracks, grooves, control joints, and other nonmoving joints with crack-filling material.
7. Allow concrete to dry, undisturbed, for period recommended in writing by MVE-control system manufacturer after surface preparation, but not less than 24 hours.
8. Before installing MVE-control systems, broom sweep and vacuum prepared concrete.

C. Protect walls, floor openings, electrical openings, door frames, and other obstructions during installation.

3.3 INSTALLATION OF MVE-CONTROL SYSTEM - FLUID APPLIED

A. Confirm that Architect approved mockups.

B. Install MVE-control system - fluid applied in accordance with ASTM F3010 or ASTM F3513 and manufacturer's written instructions to produce a uniform, monolithic surface free of surface deficiencies such as pin holes, fisheyes, and voids.

1. Install primers as required to comply with manufacturer's written instructions.

C. Do not apply MVE-control system across substrate expansion, isolation, and other moving joints.

D. Apply system, including component coats if any, in thickness recommended in writing by MVE-control system manufacturer for MVER indicated by preinstallation testing.

E. Cure MVE-control system components in accordance with manufacturer's written instructions. Prevent contamination or other damage during installation and curing processes.

F. After curing, examine MVE-control system for surface deficiencies. Repair surface deficiencies in accordance with manufacturer's written instructions.

G. Install cementitious underlayment over cured membrane if required to maintain manufacturer's warranty and in thickness required to maintain the warranty.

3.4 INSTALLATION OF MVE-CONTROL SYSTEM - SHEET MEMBRANES

A. Install MVE-control system - sheet membrane in accordance with manufacturer's written instructions to produce a uniform, monolithic surface free of surface deficiencies such as pin holes, fisheyes, and voids.

1. Install seam tapes required to comply with manufacturer's written instructions.
2. Per floor covering manufacturer's written instructions, finished floor covering requires at least 48 hours of acclimation in order to minimize expansion and contraction after installation. Do not install floor covering until proper acclimation occurs.

3.5 FIELD QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform installation inspections.

B. Installation Inspections: Inspect substrate preparation and installation of system components to ensure compliance with manufacturer's written instructions and to ensure that a complete MVE-control system is installed without deficiencies.

1. Verify that surface preparation meets requirements.
2. Verify that component coats and complete MVE-control-system film thicknesses comply with manufacturer's written instructions.
3. Verify that MVE-control-system components and installation areas that evidence deficiencies are repaired in accordance with manufacturer's written instructions.

C. MVE-control system will be considered defective if it does not pass inspections.

3.6 PROTECTION

A. Protect MVE-control system from damage, wear, dirt, dust, and other contaminants before floor covering installation. Use protective methods and materials, including temporary coverings, recommended in writing by MVE-control system manufacturer.

B. Do not allow subsequent preinstallation examination and testing for floor covering installation to damage, puncture, or otherwise compromise the MVE-control system membrane.

END OF SECTION 09 05 61 13

Task	Specification	Specification Description
09 05 71 00	09 01 30 91	Ceramic Tiling

09 22 13 23	09 23 00 00	Gypsum Plastering

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 22 16 00 - NON-STRUCTURAL METAL FRAMING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Nonstructural steel framing.
2. Grid suspension systems.

B. Related Requirements:

1. Section 054000 "Cold-Formed Metal Framing" for exterior and interior load-bearing, structural framing.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference [**at Project site**][**by web conference**]<**Insert location**> .

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings:

1. Include layout, spacings, sizes, thicknesses, and types of nonstructural steel framing and fastening and anchorage details.
2. Indicate reinforcing channels, opening framing, supplemental framing, strapping, bracing, bridging, splices, accessories, and attachments to adjoining work.

C. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
2. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.

1.4 INFORMATIONAL SUBMITTALS

A. Product Certificates: For code-compliance certification of studs and track.

B. Evaluation Reports: From [**an agency acceptable to authorities having jurisdiction**][**ICC-ES**]<**Insert evaluation agency**> showing compliance with Project requirements, for the following:

1. Studs and track.
2. High-strength steel studs and track.
3. Equivalent corrosion-resistant coating on steel framing.

4. Firestop track.
5. Post-installed anchors.
6. Power-actuated anchors.

1.5 QUALITY ASSURANCE

A. Code-Compliance Certification of Studs and Track: Provide documentation that framing members are certified in accordance with product-certification program of [**the Steel Framing Industry Association**][**the Steel Stud Manufacturers Association**][**or**][**the Supreme Steel Framing System Association**] .

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials in manufacturer's original, unopened, undamaged containers with identification labels intact.

B. Protect materials from corrosion, deformation, and other damage during delivery, storage, and handling in accordance with AISI S202.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Fire-Test-Response Characteristics: Where indicated on Drawings, provide assemblies incorporating nonstructural steel framing identical to those of assemblies tested for fire resistance in accordance with ASTM E119 by an independent testing agency.

B. STC-Rated Assemblies: Where indicated on Drawings, provide assemblies incorporating nonstructural steel framing identical to those of assemblies tested in accordance with ASTM E90 and classified in accordance with ASTM E413 by an independent testing agency.

C. Horizontal Deflection: For [**composite**][**non-composite**] wall assemblies, limited to [**1/240**][**1/360**]<**Insert requirements**> of the wall height based on the following horizontal loading:

1. Horizontal Loading: [**As indicated on Drawings**][**5 lbf/sq. ft. (240 Pa)**][**10 lbf/sq. ft. (480 Pa)**]<**Insert value**> .

2.2 NONSTRUCTURAL STEEL FRAMING

A. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled content not less than 25 percent.

B. Framing Members, General: Comply with requirements in AISI S220 for conditions indicated on Drawings.

1. Protective Coating: ASTM A653/A653M, [**G40 (Z120)**][**G60 (Z180)**] hot-dip galvanized or coating with demonstrated equivalent corrosion resistance. Galvannealed products are unacceptable.

a. Equivalent Corrosion-Resistant Coating: Evaluation report acceptable to authorities having

jurisdiction demonstrates corrosion resistance equivalent to specified protective coating.

C. Studs and Track: Conventional members, roll-formed into standard shapes without surface deformations to stiffen framing members.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**CEMCO; California Expanded Metal Products Co.**]
   b. [**ClarkDietrich**]
   c. [**CRACO Mfg., Inc.**]
   d. [**Jaimes Industries, Inc.**]
   e. [**Marino\WARE**]
   f. [**MBA Building Supplies**]
   g. [**MBA Metal Framing**]
   h. [**MRI Steel Framing, LLC**]
   i. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
   j. [**Steel Construction Systems; Stone Group of Companies**]
   k. [**Steel Network, Inc. (The)**]
   l. [**TELLING Industries**]
   m. [**UMS Metal Building Systems USA LLC**]
   n. [**US Frame Factory**]
   o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**CEMCO; California Expanded Metal Products Co.**]
   b. [**ClarkDietrich**]
   c. [**CRACO Mfg., Inc.**]
   d. [**Jaimes Industries, Inc.**]
   e. [**Marino\WARE**]
   f. [**MBA Building Supplies**]
   g. [**MBA Metal Framing**]
   h. [**MRI Steel Framing, LLC**]
   i. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
   j. [**Steel Construction Systems; Stone Group of Companies**]
   k. [**Steel Network, Inc. (The)**]
   l. [**TELLING Industries**]
   m. [**UMS Metal Building Systems USA LLC**]
   n. [**US Frame Factory**]
   o. <**Insert manufacturer's name**>

3. Minimum Base-Steel Thickness: [**As indicated on Drawings**][**As required by performance requirements for horizontal deflection**][**0.0179 inch (0.455 mm)**][**0.0296 inch (0.752 mm)**] .
4. Minimum Yield Strength: **33 ksi (230 MPa)**.
5. Depth: [**As indicated on Drawings**][**1-5/8 inches (41 mm)**][**2-1/2 inches (64 mm)**][**3-5/8 inches (92 mm)**][**4 inches (102 mm)**][**6 inches (152 mm)**]<**Insert dimension**> .

D. High-Strength Steel Studs and Track: Roll-formed into proprietary shapes incorporating ribs, embossment, knurling, or dimensional changes to stiffen framing members.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

a. [CEMCO; California Expanded Metal Products Co.]
b. [ClarkDietrich]
c. [CRACO Mfg., Inc.]
d. [Marino\WARE]
e. [MBA Building Supplies]
f. [MBA Metal Framing]
g. [MRI Steel Framing, LLC]
h. [SCAFCO Steel Stud Company; Stone Group of Companies]
i. [Steel Construction Systems; Stone Group of Companies]
j. [TELLING Industries]
k. [The Mill Steel Co]
l. [US Frame Factory]
m. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <Insert manufacturer's name; product name or designation> or comparable product by one of the following:

a. [CEMCO; California Expanded Metal Products Co.]
b. [ClarkDietrich]
c. [CRACO Mfg., Inc.]
d. [Marino\WARE]
e. [MBA Building Supplies]
f. [MBA Metal Framing]
g. [MRI Steel Framing, LLC]
h. [SCAFCO Steel Stud Company; Stone Group of Companies]
i. [Steel Construction Systems; Stone Group of Companies]
j. [TELLING Industries]
k. [The Mill Steel Co]
l. [US Frame Factory]
m. <Insert manufacturer's name>

3. Minimum Base-Steel Thickness and Yield Strength: [As indicated on Drawings][As required by horizontal deflection performance requirements][As required to provide equivalent capacity to conventional stud and track members specified and indicated on Drawings][0.0147 inch (0.373 mm) and 50 ksi (345 MPa)][0.0179 inch (0.455 mm) and 57 ksi (390 MPa)]<Insert requirements> .
4. Depth: [As indicated on Drawings][1-5/8 inches (41 mm)][2-1/2 inches (64 mm)][3-5/8 inches (92 mm)][4 inches (102 mm)][6 inches (152 mm)]<Insert dimension> .

E. Moisture-Barrier Bottom Track: Proprietary roll-formed steel shapes with ledges that lift finish panels 2 inches (51 mm) above the floor surface to prevent moisture damage.

1. Manufacturers: Subject to compliance with requirements, [provide products by the following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

a. [TELLING Industries]
b. <Insert manufacturer's name>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**TELLING Industries**]
   b. <**Insert manufacturer's name**>

3. Minimum Base-Steel Thickness: [**As indicated on Drawings**][**Matching studs**][**0.0179 inch (0.455 mm)**][**0.0296 inch (0.752 mm)**]<**Insert requirements**> .
4. Minimum Yield Strength: **33 ksi (230 MPa)**.
5. Depth: [**As indicated on Drawings**][**As required to accommodate studs**]<**Insert dimension**> .
6. Configuration: [**As indicated on Drawings**]<**Insert requirements**> .
7. Fire-Resistance-Rated Assemblies: Comply with requirements of assembly indicated on Drawings.

F. Slip-Type Head Joints: Where indicated on Drawings.

1. Clip System: Clips designed for use in head-of-wall deflection conditions that provide a positive attachment of studs to track.

   a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

      1) [**CEMCO; California Expanded Metal Products Co.**]
      2) [**ClarkDietrich**]
      3) [**CRACO Mfg., Inc.**]
      4) [**Marino\WARE**]
      5) [**MBA Metal Framing**]
      6) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
      7) [**Steel Construction Systems; Stone Group of Companies**]
      8) [**Steel Network, Inc. (The)**]
      9) [**Super Stud Building Products Inc.**]
      10) [**US Frame Factory**]
      11) <**Insert manufacturer's name**>

   b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

      1) [**CEMCO; California Expanded Metal Products Co.**]
      2) [**ClarkDietrich**]
      3) [**CRACO Mfg., Inc.**]
      4) [**Marino\WARE**]
      5) [**MBA Metal Framing**]
      6) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
      7) [**Steel Construction Systems; Stone Group of Companies**]
      8) [**Steel Network, Inc. (The)**]
      9) [**Super Stud Building Products Inc.**]
      10) [**US Frame Factory**]
      11) <**Insert manufacturer's name**>

   c. Minimum Allowable Vertical Movement: [**1-1/2 inches (38 mm)**][**2 inches (51 mm)**][**2-1/2 inches (64 mm)**][**3 inches (76 mm)**]<**Insert dimension**> .

2. Single Long-Leg Track: Top track with solid, deep flanges in base-steel thickness not less than that of studs, installed with studs friction fit into track and with continuous bridging located within **12 inches (305 mm)** of the top of studs to provide lateral bracing.

    a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

        1) [**CEMCO; California Expanded Metal Products Co.**]
        2) [**ClarkDietrich**]
        3) [**Jaimes Industries, Inc.**]
        4) [**Marino\WARE**]
        5) [**MBA Building Supplies**]
        6) [**MRI Steel Framing, LLC**]
        7) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
        8) [**Steel Construction Systems; Stone Group of Companies**]
        9) [**Steel Network, Inc. (The)**]
        10) [**TELLING Industries**]
        11) [**The Mill Steel Co**]
        12) [**US Frame Factory**]
        13) <**Insert manufacturer's name**>

    b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

        1) [**CEMCO; California Expanded Metal Products Co.**]
        2) [**ClarkDietrich**]
        3) [**Jaimes Industries, Inc.**]
        4) [**Marino\WARE**]
        5) [**MBA Building Supplies**]
        6) [**MRI Steel Framing, LLC**]
        7) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
        8) [**Steel Construction Systems; Stone Group of Companies**]
        9) [**Steel Network, Inc. (The)**]
        10) [**TELLING Industries**]
        11) [**The Mill Steel Co**]
        12) [**US Frame Factory**]
        13) <**Insert manufacturer's name**>

    c. Flange Length: [**2 inches (51 mm)**][**2-1/2 inches (64 mm)**]<**Insert dimension**> .

3. Slotted Deflection Track: Steel sheet top track manufactured with deep flanges that allow positive attachment to studs through long slots and prevent deflection of structure above from cracking finishes applied to framing; in base-steel thickness not less than that of studs and in width to accommodate depth of studs.

    a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

        1) [**CEMCO; California Expanded Metal Products Co.**]
        2) [**ClarkDietrich**]

3) [**Jaimes Industries, Inc.**]
4) [**Marino\WARE**]
5) [**MBA Building Supplies**]
6) [**MRI Steel Framing, LLC**]
7) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
8) [**Steel Construction Systems; Stone Group of Companies**]
9) [**Steel Network, Inc. (The)**]
10) [**TELLING Industries**]
11) [**The Mill Steel Co**]
12) [**US Frame Factory**]
13) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**CEMCO; California Expanded Metal Products Co.**]
2) [**ClarkDietrich**]
3) [**Jaimes Industries, Inc.**]
4) [**Marino\WARE**]
5) [**MBA Building Supplies**]
6) [**MRI Steel Framing, LLC**]
7) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
8) [**Steel Construction Systems; Stone Group of Companies**]
9) [**Steel Network, Inc. (The)**]
10) [**TELLING Industries**]
11) [**The Mill Steel Co**]
12) [**US Frame Factory**]
13) <**Insert manufacturer's name**>

c. Flange Length: [**2-1/2 inches (64 mm)**]<**Insert dimension**> .

4. Double-Track System: Top outer track sized to friction-fit over inner track and inner track with deep flanges in base-steel thickness not less than that of studs and fastened to studs.

a. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

1) [**ClarkDietrich**]
2) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
3) [**Steel Construction Systems; Stone Group of Companies**]
4) [**US Frame Factory**]
5) <**Insert manufacturer's name**>

b. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1) [**ClarkDietrich**]
2) [**SCAFCO Steel Stud Company; Stone Group of Companies**]
3) [**Steel Construction Systems; Stone Group of Companies**]
4) [**US Frame Factory**]
5) <**Insert manufacturer's name**>

c. Inner Track Flange Length: [2 inches (51 mm)]<**Insert dimension**> .

G. Firestop Track: Top track manufactured to allow partition heads to expand and contract with movement of structure above while maintaining continuity of fire-resistance-rated assembly indicated on Drawings; in base-steel thickness not less than that of studs and in width to accommodate depth of studs.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**Fire Trak Corp**]
d. [**Marino\WARE**]
e. [**Metal-Lite**]
f. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
g. [**Steel Construction Systems; Stone Group of Companies**]
h. [**Steel Network, Inc. (The)**]
i. [**TELLING Industries**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**Fire Trak Corp**]
d. [**Marino\WARE**]
e. [**Metal-Lite**]
f. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
g. [**Steel Construction Systems; Stone Group of Companies**]
h. [**Steel Network, Inc. (The)**]
i. [**TELLING Industries**]
j. <**Insert manufacturer's name**>

H. Flat Strap and Backing Plate: Steel sheet for blocking and bracing in length and width indicated on Drawings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**Jaimes Industries, Inc.**]
d. [**Marino\WARE**]
e. [**MBA Building Supplies**]
f. [**MRI Steel Framing, LLC**]
g. [**Phillips Manufacturing Co**]
h. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
i. [**Steel Construction Systems; Stone Group of Companies**]
j. [**Steel Network, Inc. (The)**]

k. [**TELLING Industries**]
l. [**The Mill Steel Co**]
m. [**US Frame Factory**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**Jaimes Industries, Inc.**]
d. [**Marino\WARE**]
e. [**MBA Building Supplies**]
f. [**MRI Steel Framing, LLC**]
g. [**Phillips Manufacturing Co**]
h. [**SCAFCO Steel Stud Company; Stone Group of Companies**]

3. Depth:

a. Bridging: [**As indicated on Drawings**][**1-1/2 inches (38 mm)**]<**Insert dimension**> .
b. Suspended-Assembly Carrying Channels (Main Runners): [**As indicated on Drawings**][**2-1/2 inches (64 mm)**][**2 inches (51 mm)**][**1-1/2 inches (38 mm)**]<**Insert dimension**> .
c. Suspended-Assembly Furring Channels (Furring Members): [**3/4 inch (19 mm)**]<**Insert dimension**> .

4. Bridging Clip Angle: Not less than **1-1/2 by 1-1/2 inches (38 by 38 mm)**; **0.068-inch- (1.73-mm-)** base-steel thickness.

J. Rigid Hat-Shaped Furring Channels: Conventional members, roll-formed into standard shapes.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**CRACO Mfg., Inc.**]
d. [**Jaimes Industries, Inc.**]
e. [**Marino\WARE**]
f. [**MBA Building Supplies**]
g. [**MBA Metal Framing**]

j. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
k. [**Steel Construction Systems; Stone Group of Companies**]
l. [**Steel Network, Inc. (The)**]
m. [**TELLING Industries**]
n. [**The Mill Steel Co**]
o. [**UMS Metal Building Systems USA LLC**]
p. [**US Frame Factory**]
q. <**Insert manufacturer's name**>

3. Minimum Base-Steel Thickness: [**As indicated on Drawings**][**0.0179 inch (0.455 mm)**][**0.0296 inch (0.752 mm)**][**0.0329 inch (0.836 mm)**]<**Insert thickness**> .
4. Depth: [**As indicated on Drawings**][**7/8 inch (22.2 mm)**][**1-1/2 inches (38 mm)**]<**Insert requirements**> .

K. Resilient Furring Channels: **1/2-inch- (13-mm-)** deep, steel sheet members designed to reduce sound transmission.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**CRACO Mfg., Inc.**]
d. [**Jaimes Industries, Inc.**]
e. [**Marino\WARE**]
f. [**MBA Building Supplies**]
g. [**MRI Steel Framing, LLC**]
h. [**Phillips Manufacturing Co**]
i. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
j. [**Steel Construction Systems; Stone Group of Companies**]
k. [**Steel Network, Inc. (The)**]
l. [**TELLING Industries**]
m. [**The Mill Steel Co**]
n. [**US Frame Factory**]
o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**CRACO Mfg., Inc.**]

d. [**Jaimes Industries, Inc.**]
e. [**Marino\WARE**]
f. [**MBA Building Supplies**]
g. [**MRI Steel Framing, LLC**]
h. [**Phillips Manufacturing Co**]
i. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
j. [**Steel Construction Systems; Stone Group of Companies**]
k. [**Steel Network, Inc. (The)**]
l. [**TELLING Industries**]
m. [**The Mill Steel Co**]
n. [**US Frame Factory**]
o. <**Insert manufacturer's name**>

3. Configuration: [**Asymmetrical**][**or**][**hat shaped**] .

L. Z-Shaped Furring: With slotted or nonslotted web, face flange of **1-1/4 inches (32 mm)**, wall attachment flange of **3/4 inch (19 mm)**, minimum base-steel thickness of **0.0179 inch (0.455 mm)**, and depth required to fit insulation thickness indicated on Drawings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**CRACO Mfg., Inc.**]
d. [**Jaimes Industries, Inc.**]
e. [**Marino\WARE**]
f. [**MBA Building Supplies**]
g. [**MBA Metal Framing**]
h. [**MRI Steel Framing, LLC**]
i. [**Phillips Manufacturing Co**]
j. [**SCAFCO Steel Stud Company; Stone Group of Companies**]
k. [**Steel Construction Systems; Stone Group of Companies**]
l. [**Steel Network, Inc. (The)**]
m. [**TELLING Industries**]
n. [**The Mill Steel Co**]
o. [**US Frame Factory**]
p. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CEMCO; California Expanded Metal Products Co.**]
b. [**ClarkDietrich**]
c. [**CRACO Mfg., Inc.**]
d. [**Jaimes Industries, Inc.**]
e. [**Marino\WARE**]
f. [**MBA Building Supplies**]
g. [**MBA Metal Framing**]
h. [**MRI Steel Framing, LLC**]
i. [**Phillips Manufacturing Co**]
j. [**SCAFCO Steel Stud Company; Stone Group of Companies**]

k. [**Steel Construction Systems; Stone Group of Companies**]
l. [**Steel Network, Inc. (The)**]
m. [**TELLING Industries**]
n. [**The Mill Steel Co**]
o. [**US Frame Factory**]
p. <**Insert manufacturer's name**>

2.3 Auxiliary Materials - Steel Framing Connectors

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. <**Insert manufacturer's name**>

2.4 GRID SUSPENSION SYSTEMS

A. Grid Suspension Systems for Gypsum Board Ceilings: ASTM C645, direct-hung system composed of main beams and cross-furring members that interlock.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Armstrong World Industries**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Rockfon; ROCKWOOL International**]
d. [**USG Corporation**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Armstrong World Industries**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Rockfon; ROCKWOOL International**]
d. [**USG Corporation**]
e. <**Insert manufacturer's name**>

2.5 Flexible Backing Plate

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. <**Insert manufacturer's name**>

2.6 AUXILIARY MATERIALS

A. General: Provide auxiliary materials that comply with referenced installation standards.

1. Fasteners for Steel Framing: Of type, material, size, corrosion resistance, holding power, and other properties required to fasten steel members to substrates.

B. Adjustable Wall-Furring Brackets: Steel sheet in minimum **0.0329-inch- (0.836-mm-)** base-steel thickness with serrated edges for attaching furring channels to exterior masonry or concrete walls.

1. Protective Coating: ASTM A653/A653M, [**G40 (Z120)**][**or**][**G60 (Z180)**] , hot-dip galvanized.

C. Tie Wire: ASTM A641/A641M, Class 1 zinc coating, soft temper.

1. Tire Wire for Adjustable Wall-Furring Brackets: Use minimum double strand of **0.0625-inch- (1.59-mm-)** diameter wire, or triple strand of **0.0475-inch- (1.21-mm-)** diameter wire to attach furring channels.
2. Tire Wire for Suspended-Ceiling Systems:

a. Splicing Carrying Channels and Furring Members: Use double loops of minimum **0.0625-inch- (1.59-mm-)** diameter wire.
b. Saddle Tying Main Runners and Cross Furring: Use minimum **0.0625-inch- (1.59-mm-)** diameter wire, or double strand of **0.0475-inch- (1.21-mm-)** diameter wire.

D. Post-Installed Anchors: Fastener systems with an evaluation report, acceptable to authorities having jurisdiction, as appropriate for the substrate.

1. Securing Hangers:

a. Acceptance Criteria: ICC-ES [**AC01**][**AC193**][**AC58**][**or**][**AC308**] .
b. Type: [**Torque-controlled, expansion anchor**][**torque-controlled, adhesive anchor**][**or**][**adhesive anchor**] .
c. Material for Interior Locations: Carbon-steel components zinc-plated to comply with ASTM B633 or ASTM F1941/F1941M, Class Fe/Zn 5, unless otherwise indicated on Drawings.
d. Stainless Steel Material for Exterior or Interior Locations: Alloy [**Group 1 (A1)**][**Group 2 (A4)**] stainless steel bolts, ASTM F593, and nuts, ASTM F594.

E. Power-Actuated Anchors: Fastener systems with an evaluation report, acceptable to authorities having jurisdiction, based on ICC-ES AC70.

F. Wire Hangers: ASTM A641/A641M, Class 1 zinc coating, soft temper.

1. Diameter: [**0.162 inch (4.12 mm)**]<**Insert dimension**> .

G. Flat Hangers: Steel sheet.

1. Protective Coating: ASTM A653/A653M, [**G40 (Z120)**][**or**][**G60 (Z180)**] , hot-dip galvanized.
2. Size and Length: [**In size indicated on Drawings**][**1 by 3/16 inch (25 by 5 mm) by length indicated on Drawings**]<**Insert dimensions**> .

H. Isolation Strip at Exterior Walls: Provide [**one of**] the following:

1. Asphalt-Saturated Organic Felt: ASTM D226/D226M, Type I (No. 15 asphalt felt), nonperforated.
2. Foam Gasket: Adhesive-backed, closed-cell vinyl foam strips that allow fastener penetration without foam displacement, **1/8 inch (3.2 mm)** thick, in width to suit steel stud size.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas, substrates, and conditions, with Installer present, for compliance with requirements and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Suspended Assemblies: Coordinate installation of suspension systems with installation of overhead structure to ensure that inserts and other provisions for anchorages to building structure have been installed to receive hangers at spacing required to support the Work and that hangers will develop their full strength.

1. Furnish concrete inserts and other devices required to other trades for installation in advance of time needed for coordination and construction.

B. Coordination with Sprayed Fire-Resistive Materials:

1. Before sprayed fire-resistive materials are applied, attach offset anchor plates or ceiling track to surfaces indicated on Drawings to receive sprayed fire-resistive materials. Where offset anchor plates are required, provide continuous plates fastened to building structure not more than **24 inches (610 mm)** o.c.
2. After sprayed fire-resistive materials are applied, remove them only to extent necessary for installation of nonstructural steel framing. Do not reduce thickness of fire-resistive materials below that required for fire-resistance ratings indicated on Drawings. Protect adjacent fire-resistive materials from damage.

3.3 INSTALLATION OF NONSTRUCTURAL STEEL FRAMING, GENERAL

A. Installation Standard: ASTM C754.

1. Gypsum Plaster Assemblies: Also comply with requirements in ASTM C841 that apply to framing installation.
2. Portland Cement Plaster Assemblies: Also comply with requirements in ASTM C1063 that apply to framing installation.
3. Gypsum Veneer Plaster Assemblies: Also comply with requirements in ASTM C844 that apply to framing installation.
4. Gypsum Board Assemblies: Also comply with requirements in ASTM C840 that apply to framing installation.

B. Install framing and accessories plumb, square, and true to line, with connections securely fastened.

C. Install supplementary framing, and blocking to support fixtures, equipment services, heavy trim, grab bars, toilet accessories, furnishings, or similar construction.

D. Install bracing at terminations in assemblies.

E. Do not bridge building control and expansion joints with framing members. Frame both sides of joints independently.

3.4 INSTALLATION OF NONSTRUCTURAL STEEL FRAMING

A. Install framing system components at spacings indicated on Drawings, but not greater than spacings required by referenced installation standards for assembly types.

1. Single-Layer Application: [**As required by horizontal deflection performance requirements**][**16 inches (406 mm) o.c.**][**24 inches (610 mm) o.c.**] unless otherwise indicated on Drawings.
2. Multilayer Application: [**As required by horizontal deflection performance requirements**][**16 inches (406 mm) o.c.**][**24 inches (610 mm) o.c.**] unless otherwise indicated on Drawings.
3. Tile Backing Panels: [**As required by horizontal deflection performance requirements**][**16 inches (406 mm) o.c.**] unless otherwise indicated on Drawings.

B. Where studs are installed directly against exterior masonry walls or dissimilar metals at exterior walls, install isolation strip between studs and exterior wall.

C. Install studs so flanges within framing system point in same direction.

D. Install track at floors and overhead supports. Extend framing full height to structural supports or substrates above suspended ceilings except where partitions are indicated on Drawings to terminate at suspended ceilings. Continue framing around ducts that penetrate partitions above ceiling.

1. Slip-Type Head Joints: Where framing extends to overhead structural supports, install to produce joints at tops of framing systems that prevent axial loading of finished assemblies.
2. Door Openings: Screw vertical studs at jambs to jamb anchor clips on door frames; install track section (for cripple studs) at head and secure to jamb studs.

    a. Install two studs at each jamb unless otherwise indicated on Drawings.
    b. Install cripple studs at head adjacent to each jamb stud, with a minimum **1/2-inch (13-mm)** clearance from jamb stud to allow for installation of control joint in finished assembly.
    c. Extend jamb studs through suspended ceilings and attach to underside of overhead structure unless otherwise indicated on Drawings.

3. Other Framed Openings: Frame openings other than door openings the same as required for door openings unless otherwise indicated on Drawings. Install framing below sills of openings to match framing required above door heads.
4. Fire-Resistance-Rated Partitions: Install framing to comply with fire-resistance-rated assembly indicated on Drawings and support closures to make partitions continuous from floor to underside of solid structure.

    a. Firestop Track: Install to maintain continuity of fire-resistance-rated assembly indicated on Drawings.

5. STC-Rated Partitions: Install framing to comply with STC-rated assembly indicated on Drawings.
6. Curved Partitions:

    a. Bend track to uniform curve and locate straight lengths so they are tangent to arcs.
    b. Begin and end each arc with a stud, and space intermediate studs equally along arcs. On straight lengths of at least two studs at ends of arcs, place studs **6 inches (152 mm)** o.c.

E. Direct Furring:

1. Screw to wood framing.
2. Attach to concrete or masonry with stub nails, screws designed for masonry attachment, or

powder-driven fasteners spaced **24 inches (610 mm)** o.c.

F. Adjustable Wall-Furring Brackets: Install brackets with serrated edges facing upward spaced at minimum **48 inches (1219 mm)** o.c. vertically with **6 inches (152 mm)** maximum from floor and ceiling, and minimum **36 inches (914 mm)** o.c. horizontally with **4 inches (102 mm)** maximum from abutting construction, unless otherwise indicated on Drawings.

G. Z-Shaped Furring:

1. Install insulation, specified in Section 072100 "Thermal Insulation," vertically and hold in place with Z-shaped furring members spaced [**24 inches (610 mm)**]<**Insert dimension**> o.c.
2. Except at exterior corners, securely attach narrow flanges of furring members to wall with concrete stub nails, screws designed for masonry attachment, or powder-driven fasteners spaced **24 inches (610 mm)** o.c.
3. At exterior corners, attach wide flange of furring members to wall with short flange extending beyond corner; on adjacent wall surface, screw-attach short flange of furring channel to web of attached channel. At interior corners, space second member no more than **12 inches (305 mm)** from corner and cut insulation to fit.

H. Suspended Assemblies: Isolate suspension assemblies from building structure where they abut or are penetrated by building structure to prevent transfer of loading imposed by structural movement.

1. Hangers: Install hangers plumb and free from contact with insulation or other objects within ceiling plenum that are not part of supporting structural or suspension system spaced [**as indicated on Drawings**]<**Insert requirements**> .

    a. Splay hangers only where required to miss obstructions and offset resulting horizontal forces by bracing, countersplaying, or other equally effective means.
    b. Where width of ducts and other construction within ceiling plenum produces hanger spacings that interfere with locations of hangers required to support standard suspension system members, install supplemental suspension members and hangers in the form of trapezes or equivalent devices.

        1) Size supplemental suspension members and hangers to support ceiling loads within [**performance limits established by referenced installation standards**]<**Insert deflection limit**> .

    c. Wire Hangers: Secure by looping and wire tying, either directly to structures or to inserts, eye screws, or other devices and fasteners that are secure and appropriate for substrate, and in a manner that will not cause hangers to deteriorate or otherwise fail.
    d. Flat Hangers: Secure to structure, including intermediate framing members, by attaching to inserts, eye screws, or other devices and fasteners that are secure and appropriate for structure and hanger, and in a manner that will not cause hangers to deteriorate or otherwise fail.
    e. Do not attach hangers to steel roof deck.
    f. Do not attach hangers to permanent metal forms. Furnish cast-in-place hanger inserts that extend through forms.
    g. Do not attach hangers to rolled-in hanger tabs of composite steel floor deck.
    h. Do not connect or suspend framing from ducts, pipes, or conduit.

2. U-Channels: Carrying channels (main runners) spaced [**as indicated on Drawings**]<**Insert requirements**> .
3. Furring Channels (Furring Members): [**As indicated on Drawings**][**U-channels**][**Studs and track**][**High-strength steel studs and track**][**Rigid hat-shaped furring channels**][**Resilient furring channels**]<**Insert requirements**> .

a. Spacing: [**As indicated on Drawings**]<**Insert requirements**> .
b. Fire-Resistance-Rated Assemblies: Wire tie furring channels to supports.

4. Seismic Bracing: Sway-brace suspension systems [**with hangers used for support**]<**Insert requirements**> .

I. Installation Tolerances for Nonstructural Steel Framing:

1. Framing Members: Install each framing member so fastening surfaces vary not more than **1/8 inch (3.2 mm)** from the plane formed by faces of adjacent framing.
2. Suspended Assemblies: Install suspension systems that are level to within [**1/8 inch in 12 ft. (3.2 mm in 3.7 m)**]<**Insert dimensions**> measured lengthwise on each member that will receive finishes and transversely between parallel members that will receive finishes.

3.5 INSTALLATION OF GRID SUSPENSION SYSTEMS

A. Grid Suspension Systems: Install in accordance with manufacturer's written instructions. Attach perimeter wall track or angle where grid suspension systems meet vertical surfaces. Mechanically join main beam and cross-furring members to each other and butt-cut to fit into wall track.

B. Installation Tolerances for Grid Suspension Systems: Install suspension systems that are level to within [**1/8 inch in 12 ft. (3.2 mm in 3.7 m)**]<**Insert dimensions**> measured lengthwise on each member that will receive finishes and transversely between parallel members that will receive finishes.

END OF SECTION 09 22 16 00

Task	Specification	Specification Description
09 22 16 13	09 22 16 00	Non-Structural Metal Framing
09 22 36 13	09 23 00 00	Gypsum Plastering
09 22 36 23	09 23 00 00	Gypsum Plastering
09 22 36 33	09 23 00 00	Gypsum Plastering

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 23 00 00 - GYPSUM PLASTERING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Expanded metal lath.
2. Accessories.
3. Base-coat gypsum plaster materials.
4. Finish-coat gypsum plaster materials.

B. Related Requirements:

1. Section 092613 "Gypsum Veneer Plastering" for gypsum-based veneer plaster applied on gypsum base for veneer plaster, unit masonry, and monolithic concrete.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.

B. Shop Drawings: Locations and installation of control and expansion joints, including plans, elevations, sections, and attachment details.

C. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
2. Health Product Declaration (HPD): Provide documentation indicating that manufacturer has screened and publicly provided ingredient disclosure to 1000 ppm, and has developed an action plan to mitigate known hazards.

1.4 MOCKUPS

A. Build mockups to demonstrate aesthetic effects and to set quality standards for materials and execution.

1. Build mockups for each substrate and finish texture indicated for gypsum plastering, including accessories.

a. Size: [**100 sq. ft.** (**9 sq. m**)]<**Insert dimension**> in surface area.

2. Simulate finished lighting conditions for review of mockups.

3. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
4. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Store materials inside under cover, and keep them dry and protected against damage from weather, moisture, direct sunlight, contamination, corrosion, construction traffic, and other causes.

1.6 FIELD CONDITIONS

A. Comply with ASTM C842 requirements or gypsum plaster manufacturer's written instructions, whichever are more stringent.

B. Room Temperatures: Maintain temperatures at not less than **55 deg F (13 deg C)** or greater than **80 deg F (27 deg C)** for at least seven days before application of gypsum plaster, continuously during application, and for seven days after plaster has set or until plaster has dried.

C. Avoid conditions that result in gypsum plaster drying out too quickly.

1. Distribute heat evenly; prevent concentrated or uneven heat on plaster.
2. Maintain relative humidity levels for prevailing ambient temperature that produce normal drying conditions.
3. Ventilate building spaces in a manner that prevents drafts of air from contacting surfaces during plaster application and until plaster is dry.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain base- and finish-coat plasters from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Fire-Resistance Ratings: Where indicated on Drawings, provide gypsum plaster assemblies identical to those of assemblies tested for fire resistance in accordance with ASTM E119 by a qualified testing agency.

B. Sound-Transmission Characteristics: Where indicated on Drawings, provide gypsum plaster assemblies identical to those of assemblies tested for STC ratings in accordance with ASTM E90 and classified in accordance with ASTM E413 by a qualified testing agency.

2.3 EXPANDED METAL LATH

A. Expanded Metal Lath: ASTM C847; cold-rolled carbon-steel sheet, hot-dip galvanized with ASTM A653/A653M **G60 (Z180)** zinc coating.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**AMICO, a Gibraltar Industries company**]
    b. [**CEMCO; California Expanded Metal Products Co.**]
    c. [**ClarkDietrich**]
    d. [**Marino\WARE**]
    e. [**Phillips Manufacturing Co**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**AMICO, a Gibraltar Industries company**]
    b. [**CEMCO; California Expanded Metal Products Co.**]
    c. [**ClarkDietrich**]
    d. [**Marino\WARE**]
    e. [**Phillips Manufacturing Co**]
    f. <**Insert manufacturer's name**>

3. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than [**25**]<**Insert value**> percent.
4. Flat Diamond-Mesh Lath: [**2.5 lb/sq. yd. (1.4 kg/sq. m)**][**3.4 lb/sq. yd. (1.8 kg/sq. m)**], unbacked.
5. Self-Furring Diamond-Mesh Lath: [**V-grooved**][**Dimpled**].

    a. Weight: [**2.5 lb/sq. yd. (1.4 kg/sq. m)**][**3.4 lb/sq. yd. (1.8 kg/sq. m)**].
    b. Paper Backing: Kraft paper factory bonded to back of lath.

6. 3/8-Inch (10-mm) Rib Lath: [**3.4 lb/sq. yd. (1.8 kg/sq. m)**][**4 lb/sq. yd. (2.2 kg/sq. m)**].

    a. Paper Backing: Kraft paper factory bonded to back of lath.

2.4 ACCESSORIES

A. General: Comply with requirements in ASTM C841, and coordinate depth of trim and accessories with thicknesses and number of plaster coats required.

B. Metal Accessories:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**AMICO, a Gibraltar Industries company**]
    b. [**CEMCO; California Expanded Metal Products Co.**]
    c. [**ClarkDietrich**]
    d. [**Marino\WARE**]
    e. [**Phillips Manufacturing Co**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**AMICO, a Gibraltar Industries company**]
b. [**CEMCO; California Expanded Metal Products Co.**]
c. [**ClarkDietrich**]
d. [**Marino\WARE**]
e. [**Phillips Manufacturing Co**]
f. <**Insert manufacturer's name**>

3. Cornerite: Fabricated from expanded metal lath, hot-dip galvanized with ASTM A653/A653M **G60 (Z180)** zinc coating.
4. Striplath: Fabricated from expanded metal lath, hot-dip galvanized with ASTM A653/A653M **G60 (Z180)** zinc coating.
5. Cornerbeads: Fabricated from [**zinc**][**or**][**zinc-coated (galvanized) steel**].

a. Smallnose cornerbead with expanded flanges; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.
b. Smallnose cornerbead with perforated flanges; use [**on curved corners**][**at locations indicated on Drawings**]<**Insert requirements**>.
c. Smallnose cornerbead with expanded flanges reinforced by perforated stiffening rib; use [**on columns and for finishing unit masonry corners**][**at locations indicated on Drawings**]<**Insert requirements**>.
d. Bullnose cornerbead, radius **3/4-inch (19-mm)** minimum, with expanded flanges; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.

6. Casing Beads: Fabricated from [**zinc**][**or**][**zinc-coated (galvanized) steel**]; square-edged style; with expanded flanges.
7. Control Joints: Fabricated from [**zinc**][**or**][**zinc-coated (galvanized) steel**]; one-piece-type, folded pair of unperforated screeds in M-shaped configuration; with perforated flanges and removable protective tape on exposed face of control joint.
8. One-Piece Expansion Joints: Fabricated from [**zinc**][**or**][**zinc-coated (galvanized) steel**]; folded pair of unperforated screeds in M-shaped configuration; with expanded flanges.
9. Two-Piece Expansion Joints: Fabricated from [**zinc**][**or**][**zinc-coated (galvanized) steel**]; formed to produce slip-joint and square-edged reveal that is adjustable from **1/4 to 5/8 inch (6 to 16 mm)** wide; with perforated flanges.

C. Plastic Accessories: Manufactured from high-impact PVC.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**AMICO, a Gibraltar Industries company**]
b. [**ClarkDietrich**]
c. [**Plastic Components, Inc**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**AMICO, a Gibraltar Industries company**]

b. [**ClarkDietrich**]
c. [**Plastic Components, Inc**]
d. <**Insert manufacturer's name**>

3. Cornerbeads: With perforated flanges.

a. Smallnose cornerbead; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.
b. Bullnose cornerbead, radius **3/4-inch (19-mm)** minimum; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.

4. Casing Beads: Square-edge style, with perforated flanges in depth required to suit plaster bases indicated and flange length required to suit applications indicated.
5. Control Joints: One-piece-type, folded pair of unperforated screeds in M-shaped configuration; with perforated flanges and removable protective tape on exposed face of control joint.
6. Expansion Joints: Two-piece type, formed to produce slip-joint and square-edged [**1/2-inch- (13-mm-)**][**1-inch- (25-mm-)**][**1-1/2-inch- (38-mm-)**]<**Insert dimension**> wide reveal; with perforated concealed flanges.
7. Termination Reveal Trim: F-shaped, one-piece trim, formed to produce a [**1/2-inch- (13-mm-)**][**3/4-inch- (19-mm-)**][**1-inch- (25-mm-)**]<**Insert dimension**> wide reveal at the termination of plaster where it abuts other materials; with single, perforated concealed flange.

D. Aluminum Trim: Extruded accessories of profiles and dimensions indicated on Drawings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Brand X Metals, Inc**]
b. [**Flannery, Inc.**]
c. [**Fry Reglet Corporation**]
d. [**Gordon Inc.**]
e. [**Pittcon Industries**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Brand X Metals, Inc**]
b. [**Flannery, Inc.**]
c. [**Fry Reglet Corporation**]
d. [**Gordon Inc.**]
e. [**Pittcon Industries**]
f. <**Insert manufacturer's name**>

3. Aluminum: Alloy and temper with not less than the strength and durability properties of **ASTM B221 (ASTM B221M)**, Alloy 6063-T5.
4. Finish: [**Mill**][**Chemical-conversion coating, ASTM D1730, Type B, compatible with field-applied finish coatings specified**]<**Insert requirements**>.

2.5 BASE-COAT GYPSUM PLASTER MATERIALS

A. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not

less than <**Insert value**> percent.

B. Lightweight-Gypsum Ready-Mixed Plaster: ASTM C28/C28M, with factory-mixed perlite aggregate.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   b. [**USG Corporation**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   b. [**USG Corporation**]
   c. <**Insert manufacturer's name**>

C. Gypsum Neat Plaster: ASTM C28/C28M, for use with job-mixed aggregates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   b. [**USG Corporation**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   b. [**USG Corporation**]
   c. <**Insert manufacturer's name**>

D. Gypsum Wood-Fibered Plaster: ASTM C28/C28M, for use as is or with the addition of job-mixed sand in up to equal proportions by weight.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**USG Corporation**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**USG Corporation**]
b. <**Insert manufacturer's name**>

E. High-Strength Gypsum Neat Plaster: ASTM C28/C28M, with a minimum, average, dry compressive strength of **2800 psi (19 MPa)** in accordance with ASTM C472 for a mix of **100 lb (45 kg)** of plaster and **2 cu. ft. (0.06 cu. m)** of sand.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**USG Corporation**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**USG Corporation**]
b. <**Insert manufacturer's name**>

F. Aggregates for Base-Coat Plasters: ASTM C35, [**sand**][**and**][**perlite**].

2.6 FINISH-COAT GYPSUM PLASTER MATERIALS

A. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert value**> percent.

B. Gypsum Gauging Plaster: ASTM C28/C28M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. [**USG Corporation**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. [**USG Corporation**]
c. <**Insert manufacturer's name**>

C. Gypsum Ready-Mixed Finish Plaster: Manufacturer's standard, factory-mixed, gaged, interior finish.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. [**USG Corporation**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. [**USG Corporation**]
c. <**Insert manufacturer's name**>

D. High-Strength Gypsum Gauging Plaster: ASTM C28/C28M, with a minimum, average, dry compressive strength of **5000 psi (34 MPa)** in accordance with ASTM C472 for a neat mix.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**USG Corporation**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**USG Corporation**]
b. <**Insert manufacturer's name**>

E. Gypsum Keene's Cement: ASTM C61/C61M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**USG Corporation**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**USG Corporation**]
b. <**Insert manufacturer's name**>

F. Lime: ASTM C206, [**Type S, special**][**or**][**Type N, normal**] finishing hydrated lime.

G. Aggregates for Float Finishes: ASTM C35, [**sand**][**and**][**perlite for finish coats over base coats containing perlite**]; graded in accordance with ASTM C842.

2.7 MISCELLANEOUS MATERIALS

A. Water for Mixing and Finishing Plaster: Potable and free of substances capable of affecting plaster set or of damaging plaster, lath, or accessories.

B. Bonding Compound: ASTM C631; recommended by plaster manufacturer for application indicated.

C. Fasteners for Attaching Metal Lath to Substrates: ASTM C841.

D. Wire: ASTM A641/A641M, Class 1 zinc coating, soft temper, not less than **0.0475-inch (1.21-mm)** diameter unless otherwise indicated.

E. Sound-Attenuation Blankets: ASTM C665, Type I (blankets without membrane facing), produced by combining thermosetting resins with mineral fibers manufactured from glass, slag wool, or rock wool.

1. Fire-Resistance-Rated Assemblies: Comply with mineral-fiber requirements of rated assembly.
2. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than [**25**]<**Insert value**> percent.

F. Acoustical Sealant: As specified in Section 079219 "Acoustical Joint Sealants."

G. Mix Additives: Use gypsum plaster accelerator and retarder products of plaster manufacturer if required by Project conditions. Use only additives that plaster manufacturer recommends in writing for use with plaster to which it is added.

2.8 PLASTER MIXES

A. Mixing: Comply with ASTM C842 and manufacturer's written instructions for applications indicated.

B. Mix Additives: Use accelerators and retarders, if required by Project conditions, in accordance with manufacturer's written instructions.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Reject plaster materials that are wet or moisture damaged.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Protect adjacent work from soiling, spattering, moisture deterioration, and other harmful effects caused by plastering.

3.3 INSTALLATION, GENERAL

A. Fire-Resistance-Rated Assemblies: Install components in accordance with requirements for design designations from listing organization and publication indicated on Drawings.

B. STC-Rated Assemblies: Install components in accordance with requirements for design designations from listing organization and publication indicated on Drawings.

C. Sound-Attenuation Blankets: Where [**indicated on Drawings**][**and**][**required by design designations from listing organization and publication indicated on Drawings**], install blankets before installing lath unless blankets are readily installed after lath has been installed on one side.

D. Acoustical Sealant: Where [**indicated on Drawings**][**and**][**required by design designations from listing organization and publication indicated on Drawings**], seal joints between edges of plasterwork and abutting construction with acoustical sealant.

3.4 INSTALLATION OF EXPANDED METAL LATH

A. Expanded Metal Lath: Install in accordance with ASTM C841.

1. Partition Framing and Vertical Furring: Install flat diamond-mesh lath.
2. Flat-Ceiling and Horizontal Framing: Install [**flat diamond-mesh**][**3/8-inch (10-mm) rib**] lath.
3. Curved-Ceiling Framing: Install flat diamond-mesh lath.
4. On Solid Surfaces, Not Otherwise Furred: Install self-furring, diamond-mesh lath.
5. Channel-Stud Solid-Plaster Partitions: Where supported by channel studs and L-runners, install flat diamond-mesh lath.
6. Studless Solid-Plaster Partitions: Where supported by L-runners, install **3/8-inch (10-mm)** rib lath.

3.5 INSTALLATION OF ACCESSORIES

A. General: Install in accordance with ASTM C841.

B. Cornerbeads: Install at external corners.

C. Casing Beads: Install at terminations of plasterwork, except where plaster passes behind and is concealed by other work and where metal screeds, bases, or frames act as casing beads.

D. Control Joints: Locate as approved by Architect for visual effect and as follows:

1. With spacing between joints in either direction not exceeding the following:

   a. Partitions: **30 ft. (9 m)**.
   b. Ceilings: [**50 ft. (15 m)**][**30 ft. (9 m)**].

2. Where furred or suspended ceilings abut columns, walls, beams, or other vertical elements.
3. Where ceiling framing or furring changes direction.
4. Where control joints occur in supporting construction.

E. Expansion Joints: Locate where an expansion joint occurs in supporting construction.

F. Aluminum Trim: Install in accordance with manufacturer's written instructions.

3.6 APPLICATION OF PLASTER

A. General: Comply with ASTM C842.

1. Do not deviate more than plus or minus **1/8 inch in 10 ft. (3 mm in 3 m)** from a true plane in finished plaster surfaces when measured by a **10-ft. (3-m)** straightedge placed on surface.
2. Finish plaster flush with metal frames and other built-in metal items or accessories that act as a plaster ground unless otherwise indicated. Where casing bead does not terminate plaster at metal frame, cut base coat free from metal frame before plaster sets and groove finish coat at junctures with metal.
3. Provide plaster surfaces that are ready to receive field-applied finishes indicated.

B. Bonding Compound: Apply on [**unit masonry**][**and**][**monolithic concrete**] substrates for direct application of plaster.

3.7 INSTALLATION OF BASE-COAT GYPSUM PLASTER MATERIALS

A. Over Expanded Metal Lath:

1. Scratch Coat: [**Gypsum neat plaster with job-mixed sand**][**Gypsum wood-fibered plaster; neat or with job-mixed sand**][**High-strength gypsum neat plaster with job-mixed sand**]<**Insert requirements**>.
2. Brown Coat: [**Lightweight-gypsum ready-mixed plaster**][**Gypsum neat plaster with job-mixed sand**][**Gypsum neat plaster with job-mixed perlite**][**Gypsum wood-fibered plaster with job-mixed sand**][**High-strength gypsum neat plaster with job-mixed sand**]<**Insert requirements**>.

B. Over Unit Masonry: [**Lightweight-gypsum ready-mixed plaster**][**Wood-fibered gypsum plaster with job-mixed sand**][**Gypsum neat plaster with job-mixed sand**]<**Insert requirements**>.

C. Over Monolithic Concrete: [**Gypsum neat plaster with job-mixed sand**]<**Insert requirements**>.

3.8 INSTALLATION OF FINISH-COAT GYPSUM PLASTER MATERIALS

A. Smooth-Troweled Finishes:

1. Materials: [**Gypsum gauging plaster and lime putty**][**Gypsum ready-mixed finish plaster**][**High-strength gypsum gauging plaster and lime putty**][**Gypsum Keene's cement and lime putty**]<**Insert requirements**>.
2. Locations: Provide smooth-troweled finish [**unless otherwise indicated**][**where indicated on Drawings**]<**Insert locations**>.

B. Float Finishes:

1. Materials: [**Gypsum gauging plaster and lime putty**][**Gypsum Keene's cement and lime putty**]<**Insert requirements**>.
2. Locations: Provide float finish [**unless otherwise indicated**][**where indicated on Drawings**]<**Insert locations**>.

C. Sprayed Finishes: [**Match Architect's sample**]<**Insert requirements**>.

1. Materials: [**Gypsum ready-mixed finish plaster**]<**Insert requirements**>.
2. Locations: Provide sprayed finish [**unless otherwise indicated**][**where indicated on**

Drawings]<**Insert locations**>.

D. Textured Finishes: [**Match Architect's sample**]<**Insert requirements**>.

1. Materials: [**Gypsum ready-mixed finish plaster**]<**Insert requirements**>.
2. Locations: Provide textured finish [**unless otherwise indicated**][**where indicated on Drawings**]<**Insert locations**>.

E. Concealed Plaster:

1. Where plaster application is concealed behind built-in cabinets, similar furnishings, and equipment, apply finish coat.
2. Where plaster application is concealed above suspended ceilings and in similar locations, omit finish coat.
3. Where plaster application is used as a base for adhesive application of tile and similar finishes, omit finish coat.

3.9 REPAIR

A. Repair or replace work to eliminate cracks, dents, blisters, buckles, crazing and check cracking, dry outs, efflorescence, sweat outs, and similar defects and where bond to substrate has failed.

3.10 CLEANING

A. Remove temporary protection and enclosure of other work after plastering is complete.

B. Promptly remove plaster from door frames, windows, and other surfaces not indicated to be plastered.

C. Repair floors, walls, and other surfaces stained, marred, or otherwise damaged during plastering.

END OF SECTION 09 23 00 00

Task	Specification	Specification Description
09 23 13 00	09 23 00 00	Gypsum Plastering

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 24 00 00 - CEMENT PLASTERING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Metal lath.
2. Accessories.
3. Base-coat cement plaster.
4. Cement plaster finish coats.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.

B. Shop Drawings: Locations and installation of control and expansion joints, including plans, elevations, sections, and attachment details.

C. Samples for Initial Selection: For each type of factory-prepared finish coat and for each color and finish texture specified.

D. Samples for Verification: For each type of factory-prepared finish coat and for each color and finish texture specified, **12 by 12 inches (305 by 305 mm)**, and prepared on rigid backing.

E. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
2. Health Product Declaration (HPD): Provide documentation indicating that manufacturer has screened and publicly provided ingredient disclosure to 1000 ppm, and has developed an action plan to mitigate known hazards.

1.4 MOCKUPS

A. Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.

1. Build mockups for each substrate and color and finish texture indicated for cement plastering, including accessories.

a. Size: [**100 sq. ft. (9 sq. m)**]<**Insert dimension**> in surface area.

2. For interior plasterwork, simulate finished lighting conditions for review of mockups.
3. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
4. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.5 DELIVERY, STORAGE AND HANDLING

A. Store materials inside under cover, and keep them dry and protected against damage from weather, moisture, direct sunlight, surface contamination, corrosion, construction traffic, and other causes.

1.6 FIELD CONDITIONS

A. Comply with ASTM C926 requirements.

B. Exterior Plasterwork:

1. Apply and cure plaster to prevent plaster drying out during curing period. Use procedures required by climatic conditions, including moist curing, providing coverings, and providing barriers to deflect sunlight and wind.
2. Apply plaster when ambient temperature is greater than **40 deg F (4.4 deg C)**.
3. Protect plaster coats from freezing for not less than 48 hours after set of plaster coat has occurred.

C. Interior Plasterwork: Maintain room temperatures at greater than **40 deg F (4.4 deg C)** for at least 48 hours before plaster application, and continuously during and after application.

1. Avoid conditions that result in plaster drying out during curing period. Distribute heat evenly; prevent concentrated or uneven heat on plaster.
2. Ventilate building spaces as required to remove water in excess of that required for hydrating plaster in a manner that prevents drafts of air from contacting surfaces during plaster application and until plaster is dry.

D. Factory-Prepared Finish Coats: Comply with manufacturer's written instructions for environmental conditions for applying finish coats.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Fire-Resistance Ratings: Where indicated on Drawings, provide cement plaster assemblies identical to those of assemblies tested for fire resistance in accordance with ASTM E119 by a qualified testing agency.

2.2 METAL LATH

A. Expanded Metal Lath: ASTM C847; cold-rolled carbon steel sheet, hot-dip galvanized with ASTM A653/A653M [**G60 (Z180)**][**G90 (Z275)**] zinc coating.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**AMICO, a Gibraltar Industries company**]
    b. [**CEMCO; California Expanded Metal Products Co.**]
    c. [**ClarkDietrich**]
    d. [**Marino\WARE**]
    e. [**Phillips Manufacturing Co**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**AMICO, a Gibraltar Industries company**]
    b. [**CEMCO; California Expanded Metal Products Co.**]
    c. [**ClarkDietrich**]
    d. [**Marino\WARE**]
    e. [**Phillips Manufacturing Co**]
    f. <**Insert manufacturer's name**>

3. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than [**25**]<**Insert value**> percent.
4. Flat Diamond-Mesh Lath: [**2.5 lb/sq. yd. (1.4 kg/sq. m)**][**3.4 lb/sq. yd. (1.8 kg/sq. m)**].

    a. Water-Resistive Barrier: Vapor-permeable paper, factory bonded to back of lath; complying with requirements in FS UU-B-790a for Type I, Grade D and with [**10-minute**][**60-minute**] water resistance.

        1) Provide water-resistive barrier [**at exterior locations**][**where indicated on Drawings**]<**Insert requirements**>.

5. Self-Furring Diamond-Mesh Lath: [**V-grooved**][**Dimpled**].

    a. Weight: [**2.5 lb/sq. yd. (1.4 kg/sq. m)**][**3.4 lb/sq. yd. (1.8 kg/sq. m)**].
    b. Water-Resistive Barrier: Vapor-permeable paper, factory bonded to back of lath; complying with requirements in FS UU-B-790a for Type I, Grade D and with [**10-minute**][**60-minute**] water resistance.

        1) Provide water-resistive barrier [**at exterior locations**][**where indicated on Drawings**]<**Insert requirements**>.

    c. Kraft-Paper Backing: Factory bonded to back of lath.

        1) Provide kraft-paper backing [**at interior locations**][**where indicated on Drawings**]<**Insert requirements**>.

6. 3/8-Inch (10-mm) Rib Lath: [**3.4 lb/sq. yd. (1.8 kg/sq. m)**][**4 lb/sq. yd. (2.2 kg/sq. m)**].

    a. Kraft-Paper Backing: Factory bonded to back of lath.

B. Wire-Fabric Lath:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ClarkDietrich**]
b. [**Davis Wire; a Heico Wire Group company**]
c. [**K-Lath; a Tree Island Steel Ltd. company**]
d. [**Structa Wire Corp.**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ClarkDietrich**]
b. [**Davis Wire; a Heico Wire Group company**]
c. [**K-Lath; a Tree Island Steel Ltd. company**]
d. [**Structa Wire Corp.**]
e. <**Insert manufacturer's name**>

3. Welded-Wire Lath: ASTM C933; self-furring, [**1.14 lb/sq. yd. (0.6 kg/sq. m)**][**1.95 lb/sq. yd. (1.1 kg/sq. m)**].
4. Woven-Wire Lath: ASTM C1032; self-furring, with stiffener wires, **1.4 lb/sq. yd. (0.8 kg/sq. m)**, with **1.5-inch (38-mm)** openings, and woven from **0.051-inch (1.30-mm)** diameter wire.
5. Water-Resistive Barrier: Vapor-permeable paper, factory bonded to back of lath; complying with requirements in FS UU-B-790a for Type I, Grade D and [**in double layer, each having 10-minute**][**with 10-minute**][**with 60-minute**] water resistance.

a. Provide water-resistive barrier [**at exterior locations**][**where indicated on Drawings**]<**Insert requirements**>.

2.3 ACCESSORIES

A. General: Comply with requirements in ASTM C1063, and coordinate depth of trim and accessories with thicknesses and number of plaster coats required.

B. Metal Accessories:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**AMICO, a Gibraltar Industries company**]
b. [**Brand X Metals, Inc**]
c. [**CEMCO; California Expanded Metal Products Co.**]
d. [**ClarkDietrich**]
e. [**Flannery, Inc.**]
f. [**Marino\WARE**]
g. [**Phillips Manufacturing Co**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**AMICO, a Gibraltar Industries company**]
b. [**Brand X Metals, Inc**]
c. [**CEMCO; California Expanded Metal Products Co.**]
d. [**ClarkDietrich**]
e. [**Flannery, Inc.**]
f. [**Marino\WARE**]
g. [**Phillips Manufacturing Co**]
h. <**Insert manufacturer's name**>

3. Foundation Weep Screed: Fabricated from hot-dip-galvanized steel sheet with ASTM A653/A653M [**G60 (Z180)**][**G90 (Z275)**] zinc coating.
4. Cornerite: Fabricated from metal lath, hot-dip galvanized with ASTM A653/A653M [**G60 (Z180)**][**G90 (Z275)**] zinc coating.
5. External- (Outside-) Corner Reinforcement: Fabricated from metal lath, hot-dip galvanized with ASTM A653/A653M [**G60 (Z180)**][**G90 (Z275)**] zinc coating.
6. Cornerbeads: Fabricated from [**zinc**][**zinc-coated (galvanized) steel**][**or**][**anodized aluminum**].

   a. Smallnose cornerbead with expanded flanges; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.
   b. Smallnose cornerbead with perforated flanges; use [**on curved corners**][**at locations indicated on Drawings**]<**Insert requirements**>.
   c. Smallnose cornerbead with expanded flanges reinforced by perforated stiffening rib; use [**on columns and for finishing unit masonry corners**][**at locations indicated on Drawings**]<**Insert requirements**>.
   d. Bullnose cornerbead, radius **3/4-inch (19-mm)** minimum, with expanded flanges; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.

7. Casing Beads: Fabricated from [**zinc**][**zinc-coated (galvanized) steel**][**or**][**anodized aluminum**]; square-edged style; with expanded flanges.
8. Control Joints: Fabricated from [**zinc**][**or**][**zinc-coated (galvanized) steel**]; one-piece-type, folded pair of unperforated screeds in M-shaped configuration; with perforated flanges and removable protective tape on exposed face of control joint.
9. One-Piece Expansion Joints: Fabricated from [**zinc**][**or**][**zinc-coated (galvanized) steel**]; folded pair of unperforated screeds in M-shaped configuration; with expanded flanges.
10. Two-Piece Expansion Joints: Fabricated from [**zinc**][**zinc-coated (galvanized) steel**][**or**][**anodized aluminum**]; formed to produce slip-joint and square-edged reveal that is adjustable from **1/4 to 5/8 inch (6 to 16 mm)** wide; with perforated flanges.

C. Plastic Accessories: Manufactured from high-impact PVC.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**AMICO, a Gibraltar Industries company**]
   b. [**ClarkDietrich**]
   c. [**Plastic Components, Inc**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**AMICO, a Gibraltar Industries company**]
b. [**ClarkDietrich**]
c. [**Plastic Components, Inc**]
d. <**Insert manufacturer's name**>

3. Cornerbeads: With perforated flanges.

a. Smallnose cornerbead; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.
b. Bullnose cornerbead, radius **3/4-inch (19-mm)** minimum; use [**unless otherwise indicated**][**at locations indicated on Drawings**]<**Insert requirements**>.

4. Casing Beads: Square-edge style, with perforated flanges in depth required to suit plaster bases indicated and flange length required to suit applications indicated.
5. Control Joints: One-piece-type, folded pair of unperforated screeds in M-shaped configuration; with perforated flanges and removable protective tape on exposed face of control joint.
6. Expansion Joints: Two-piece type, formed to produce slip-joint and square-edged [**1/2-inch- (13-mm-)**][**1-inch- (25-mm-)**][**1-1/2-inch- (38-mm-)**]<**Insert dimension**> wide reveal; with perforated concealed flanges.

2.4 BASE-COAT CEMENT PLASTER

A. General: Comply with requirements in ASTM C926 for applications indicated.

1. Fiber Content: Add fiber to base-coat mixes after ingredients have mixed at least two minutes. Comply with fiber manufacturer's written instructions for fiber quantities in mixes, but do not exceed **1 lb of fiber/cu. yd. (0.6 kg of fiber/cu. m)** of cementitious materials.
2. Aggregate:

a. Sand: Use [**unless otherwise indicated**]<**Insert requirements**>.
b. Perlite: Use [**where required by fire-resistance-rated design designations from listing organization and publication indicated on Drawings**]<**Insert requirements**>.

B. Base-Coat Mixes for Use over Metal Lath: Scratch and brown coats for three-coat plasterwork as follows:

1. Portland Cement Mixes:

a. Scratch Coat: For cementitious material, mix 1 part portland cement and [**0 to 3/4**][**3/4 to 1-1/2**] parts lime. Use 2-1/2 to 4 parts aggregate per part of cementitious material.
b. Brown Coat: For cementitious material, mix 1 part portland cement and [**0 to 3/4**][**3/4 to 1-1/2**] parts lime. Use 3 to 5 parts aggregate per part of cementitious material, but not less than volume of aggregate used in scratch coat.

2. Masonry Cement Mixes:

a. Scratch Coat: Mix 1 part masonry cement and 2-1/2 to 4 parts aggregate.
b. Brown Coat: Mix 1 part masonry cement and 3 to 5 parts aggregate, but not less than volume of aggregate used in scratch coat.

3. Portland and Masonry Cement Mixes:

a. Scratch Coat: For cementitious material, mix 1 part portland cement and 1 part masonry cement. Use 2-1/2 to 4 parts aggregate per part of cementitious material.

b. Brown Coat: For cementitious material, mix 1 part portland cement and 1 part masonry cement. Use 3 to 5 parts aggregate per part of cementitious material, but not less than volume of aggregate used in scratch coat.

4. Plastic Cement Mixes:

a. Scratch Coat: Mix 1 part plastic cement and 2-1/2 to 4 parts aggregate.
b. Brown Coat: Mix 1 part plastic cement and 3 to 5 parts aggregate, but not less than volume of aggregate used in scratch coat.

5. Portland and Plastic Cement Mixes:

a. Scratch Coat: For cementitious material, mix 1 part plastic cement and 1 part portland cement. Use 2-1/2 to 4 parts aggregate per part of cementitious material.
b. Brown Coat: For cementitious material, mix 1 part plastic cement and 1 part portland cement. Use 3 to 5 parts aggregate per part of cementitious material, but not less than volume of aggregate used in scratch coat.

C. Base-Coat Mix for Use over Solid Plaster Bases: Single base (scratch) coat for two-coat plasterwork as follows:

1. Low-Absorption Unit Masonry and Concrete Substrates:

a. Portland Cement Mix: For cementitious material, mix 1 part portland cement and 0 to 3/4 part lime. Use 2-1/2 to 4 parts aggregate per part of cementitious material.
b. Portland and Masonry Cement Mix: For cementitious material, mix 1 part portland cement and 1 part masonry cement. Use 2-1/2 to 4 parts aggregate per part of cementitious material.
c. Plastic Cement Mix: Use 1 part plastic cement and 2-1/2 to 4 parts aggregate.

2. High-Absorption Unit Masonry and Concrete Substrates:

a. Portland Cement Mix: For cementitious material, mix 1 part portland cement and 3/4 to 1-1/2 parts lime. Use 2-1/2 to 4 parts aggregate per part of cementitious material.
b. Masonry Cement Mix: Use 1 part masonry cement and 2-1/2 to 4 parts aggregate.
c. Portland and Masonry Cement Mix: For cementitious material, mix 1 part portland cement and 1 part masonry cement. Use 2-1/2 to 4 parts aggregate per part of cementitious material.
d. Plastic Cement Mix: Use 1 part plastic cement and 2-1/2 to 4 parts aggregate.

2.5 CEMENT PLASTER FINISH COATS

A. Job-Mixed Finish-Coat Mix: Comply with requirements in ASTM C926.

1. Aggregates:

a. Sand: Use over base coats containing sand.
b. Perlite: Use over base coats containing perlite.
c. Exposed Aggregates: Use [**where indicated on Drawings**]<**Insert requirements**>.

2. Portland Cement Mix: For cementitious material, mix 1 part portland cement and [**3/4 to 1-1/2**][**1-1/2 to 2**] parts lime. Use 1-1/2 to 3 parts aggregate per part of cementitious material.
3. Masonry Cement Mix: Use 1 part masonry cement and 1-1/2 to 3 parts aggregate.
4. Portland and Masonry Cement Mix: For cementitious material, mix 1 part portland cement and 1 part masonry cement. Use 1-1/2 to 3 parts aggregate per part of cementitious material.

5. Plastic Cement Mix: Use 1 part plastic cement and 1-1/2 to 3 parts aggregate.

B. Ready-Mixed Finish-Coat Plaster: Factory-mixed portland cement, aggregates, coloring agents, and proprietary ingredients.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**California Stucco Products Corp.**]
   b. [**El Rey Stucco Solutions; a Parex USA, Inc. brand**]
   c. [**Florida Stucco**]
   d. [**Omega Products International, Inc.**]
   e. [**Parex, a Sika brand**]
   f. [**Quikrete; The QUIKRETE Companies, LLC**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**California Stucco Products Corp.**]
   b. [**El Rey Stucco Solutions; a Parex USA, Inc. brand**]
   c. [**Florida Stucco**]
   d. [**Omega Products International, Inc.**]
   e. [**Parex, a Sika brand**]
   f. [**Quikrete; The QUIKRETE Companies, LLC**]
   g. <**Insert manufacturer's name**>

3. Color: [**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color**>.
4. Source Limitations: Obtain ready-mixed finish-coat plaster from single source from single manufacturer.

C. Acrylic-Based Finish Coatings: Factory-mixed, acrylic-emulsion coating systems formulated with colorfast mineral pigments and fine aggregates; for use over cement plaster base coats. Include manufacturer's recommended primers and sealing topcoats for acrylic-based finishes.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**California Stucco Products Corp.**]
   b. [**Dryvit Systems, Inc.**]
   c. [**El Rey Stucco Solutions; a Parex USA, Inc. brand**]
   d. [**Finestone, a Sika brand**]
   e. [**Master Wall Inc.**]
   f. [**Omega Products International, Inc.**]
   g. [**Senergy; a SIKA brand**]
   h. [**Sto Corp.**]
   i. [**Stuc-O-Flex International, Inc.**]
   j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**California Stucco Products Corp.**]
    b. [**Dryvit Systems, Inc.**]
    c. [**El Rey Stucco Solutions; a Parex USA, Inc. brand**]
    d. [**Finestone, a Sika brand**]
    e. [**Master Wall Inc.**]
    f. [**Omega Products International, Inc.**]
    g. [**Senergy; a SIKA brand**]
    h. [**Sto Corp.**]
    i. [**Stuc-O-Flex International, Inc.**]
    j. <**Insert manufacturer's name**>

3. Color: [**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert color**>.
4. Texture: [**Match Architect's sample**][**As selected by Architect from manufacturer's full range**]<**Insert texture**>.
5. Source Limitations: Obtain acrylic-based finish coating from single source from single manufacturer.

2.6 PLASTER MATERIALS

A. Portland Cement: ASTM C150/C150M, [**Type I**][**Type II**].

1. Color for Finish Coats: [**White**][**Gray**].

B. Masonry Cement: ASTM C91/C91M, Type N.

1. Color for Finish Coats: [**White**][**Gray**].

C. Plastic Cement: ASTM C1328/C1328M.

D. Colorants for Job-Mixed Finish Coats: Colorfast mineral pigments that produce finish plaster color [**to match Architect's sample**]<**Insert requirements**>.

E. Lime: ASTM C206, Type S; or ASTM C207, Type S.

F. Sand Aggregate: ASTM C897.

1. Color for Job-Mixed Finish Coats: [**White**][**In color matching Architect's sample**].

G. Perlite Aggregate: ASTM C35.

H. Exposed Aggregates for Finish Coats: [**For marblecrete finish, clean, sound, crushed marble matching color and size gradation of Architect's sample**]<**Insert requirements**>.

2.7 MISCELLANEOUS MATERIALS

A. Water for Mixing and Finishing Plaster: Potable and free of substances capable of affecting plaster set or of damaging plaster, lath, or accessories.

B. Fiber for Base Coat: Alkaline-resistant glass or polypropylene fibers, **1/2 inch (13 mm)** long, free of contaminants, manufactured for use in cement plaster.

C. Bonding Compound: ASTM C932.

D. Fasteners for Attaching Metal Lath to Substrates: ASTM C1063.

E. Wire: ASTM A641/A641M, Class 1 zinc coating, soft temper, not less than **0.0475-inch (1.21-mm)** diameter unless otherwise indicated.

F. Sound-Attenuation Blankets: ASTM C665, Type I (blankets without membrane facing) produced by combining thermosetting resins with mineral fibers manufactured from glass, slag wool, or rock wool.

1. Fire-Resistance-Rated Assemblies: Comply with mineral-fiber requirements of assembly.
2. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert value**> percent.

G. Acoustical Sealant: As specified in Section 079219 "Acoustical Joint Sealants."

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Reject plaster materials that are wet or moisture damaged.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Protect adjacent work from soiling, spattering, moisture deterioration, and other harmful effects caused by plastering.

B. Prepare smooth, solid substrates for plaster in accordance with ASTM C926.

3.3 INSTALLATION, GENERAL

A. Fire-Resistance-Rated Assemblies: Install components in accordance with requirements for design designations from listing organization and publication indicated on Drawings.

B. Sound-Attenuation Blankets: Where indicated on Drawings, install blankets before installing lath unless blankets are readily installed after lath has been installed on one side.

C. Acoustical Sealant: Where indicated on Drawings, seal joints between edges of plasterwork and abutting construction with acoustical sealant.

3.4 INSTALLATION OF METAL LATH

A. Metal Lath: Install in accordance with ASTM C1063.

1. Partition Framing and Vertical Furring: Install [**flat diamond-mesh**][**welded-wire**][**woven-wire**] lath.
2. Flat-Ceiling and Horizontal Framing: Install [**flat diamond-mesh**][**3/8-inch (10-mm) rib**][**welded-wire**][**woven-wire**] lath.
3. Curved-Ceiling Framing: Install [**flat diamond-mesh**][**welded-wire**][**woven-wire**] lath.
4. On Solid Surfaces, Not Otherwise Furred: Install [**self-furring diamond-mesh**][**welded-wire**][**woven-wire**] lath.

3.5 INSTALLATION OF ACCESSORIES

A. Install in accordance with ASTM C1063 and at locations indicated on Drawings.

B. Reinforcement for External (Outside) Corners:

1. Install [**lath-type, external-corner reinforcement**][**cornerbead**] at exterior locations.
2. Install cornerbead at interior locations.

C. Control Joints: Locate as approved by Architect for visual effect and as follows:

1. As required to delineate plasterwork into areas (panels) of the following maximum sizes:

   a. Vertical Surfaces: **144 sq. ft. (13.4 sq. m)**.
   b. Horizontal and Other Nonvertical Surfaces: **100 sq. ft. (9.3 sq. m)**.

2. At distances between control joints of not greater than **18 ft. (5.5 m)** o.c.
3. As required to delineate plasterwork into areas (panels) with length-to-width ratios of not greater than 2-1/2:1.
4. Where control joints occur in surface of construction directly behind plaster.
5. Where plastered ceiling framing or furring changes direction.
6. Where plasterwork areas change dimensions, to delineate rectangular-shaped areas (panels) and to relieve the stress that occurs at the corner formed by the dimension change.

D. Expansion Joints: Locate where expansion joints occur in supporting construction.

3.6 APPLICATION OF BASE-COAT CEMENT PLASTER

A. General: Comply with ASTM C926.

1. Install so that finished plaster surfaces will not deviate more than plus or minus **1/4 inch in 10 ft. (6 mm in 3 m)** from a true plane when measured by a **10-ft. (3-m)** straightedge placed on surface.
2. Install so finished plaster surfaces will be flush with metal frames and other built-in metal items or accessories that act as a plaster ground unless otherwise indicated. Where casing bead does not terminate plaster at metal frame, cut base coat free from metal frame before plaster sets.

B. Bonding Compound: Apply on [**unit masonry**][**and**][**concrete**] substrates for direct application of plaster.

C. Wall/Vertical Base Coats:

1. Three-Coat Plasterwork Over Metal Lath: Install base-coat mixes for use over metal lath to produce scratch and brown coats having **3/4-inch (19-mm)** total thickness.
2. Two-Coat Plasterwork Over Solid Plaster Bases: Install base-coat mix for use over solid plaster bases in [**3/8-inch (10-mm) thickness on masonry**][**1/4-inch (6-mm) thickness on concrete**].

D. Ceiling/Horizontal Base Coats:

1. Three-Coat Plasterwork Over Metal Lath: Install base-coat mixes for use over metal lath to produce scratch and brown coats with [**1/2-inch (13-mm) total thickness**][**3/4-inch (19-mm) total thickness for metal lath on concrete**].
2. Two-Coat Plasterwork Over Solid Plaster Bases: Install base-coat mix for use over solid plaster bases in **1/4-inch (6-mm)** thickness on concrete.

3.7 APPLICATION OF CEMENT PLASTER FINISH COATS

A. General: Comply with ASTM C926.

1. Do not deviate more than plus or minus **1/4 inch in 10 ft. (6 mm in 3 m)** from a true plane in finished plaster surfaces when measured by a **10-ft. (3-m)** straightedge placed on surface.
2. Finish plaster flush with metal frames and other built-in metal items or accessories that act as a plaster ground unless otherwise indicated. Where casing bead does not terminate plaster at metal frame, groove finish coat at junctures with metal.
3. Provide plaster surfaces that are ready to receive field-applied finishes indicated.

B. Plaster Finish Coats: Apply to provide [**float**][**dash**][**scraped trowel-textured**][**skip trowel-textured**][**brocade (knock-down dash)**][**trowel sweep**][**combed**][**sacked (California mission)**][**English**][**marblecrete**]<**Insert requirements**> finish to match Architect's sample.

C. Acrylic-Based Finish Coatings: Apply coating system, including primers, finish coats, and sealing topcoats, in accordance with manufacturer's written instructions.

D. Concealed Exterior Plasterwork: Where plaster application is used as a base for adhered finishes, omit finish coat.

E. Concealed Interior Plasterwork:

1. Where plaster application is concealed behind built-in cabinets, similar furnishings, and equipment, apply finish coat.
2. Where plaster application is concealed above suspended ceilings and in similar locations, omit finish coat.
3. Where plaster application is used as a base for adhesive application of tile and similar finishes, omit finish coat.

3.8 REPAIR

A. Repair or replace work to eliminate cracks, dents, blisters, buckles, crazing and check cracking, dry outs, efflorescence, sweat outs, and similar defects and where bond to substrate has failed.

3.9 CLEANING

A. Remove temporary protection and enclosure of other work after plastering is complete.

B. Promptly remove plaster from door frames, windows, and other surfaces not indicated to be plastered.

C. Repair floors, walls, and other surfaces stained, marred, or otherwise damaged during plastering.

END OF SECTION 09 24 00 00

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
09 24 13 00	09 23 00 00	Gypsum Plastering
09 24 13 00	09 24 00 00	Cement Plastering

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 29 00 00 - GYPSUM BOARD

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Interior gypsum board.
2. Exterior gypsum board.
3. Tile backing panels.
4. Texture finish.

B. Related Requirements:

1. Section 061600 "Sheathing" for gypsum sheathing for exterior applications.
2. Section 079219 "Acoustical Joint Sealants" for acoustical joint sealants installed in gypsum board assemblies.
3. Section 092116.23 "Gypsum Board Shaft Wall Assemblies" for steel shaft wall framing, gypsum shaft liners, and other components of shaft wall assemblies.
4. Section 092216 "Non-Structural Metal Framing" for nonstructural steel framing and suspension systems that support gypsum board panels.
5. Section 092613 "Gypsum Veneer Plastering" for gypsum base for veneer plaster and for other components of gypsum-veneer-plaster finishes.
6. Section 093013 "Ceramic Tiling" for tile backing panels installed as substrates for ceramic tile.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Shop Drawings: Locations and installation of control and expansion joints, including plans, elevations, sections, and attachment details.

C. Samples for Initial Selection:

1. Trim Accessories: For [**aluminum trim**][**and**][**base-of-wall PVC moisture-barrier trim**]<**Insert requirements**> .
2. Texture Finish: For each type required.

D. Samples for Verification: Actual sample of finished products for the following:

1. Trim Accessories: Actual sample of finished products for each profile of [**aluminum trim**][**and**][**base-of-wall PVC moisture-barrier trim**]<**Insert requirements**> .

   a. Size: Full size profile, [**12 inches (305 mm)**]<**Insert dimension**> long.

2. Texture Finish: [**Manufacturer's standard size**]<**Insert requirements**> for each texture finish required and on same backing indicated for Work.

E. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
2. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.
3. Health Product Declaration (HPD): Provide documentation indicating that manufacturer has screened and publicly provided ingredient disclosure to 1000 ppm, and has developed an action plan to mitigate known hazards.
4. Product Certificates: For indigenous materials, indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include distance to Project, means of transportation, and cost for each indigenous material.
5. Laboratory Test Reports: For ceiling and wall materials, indicating compliance with requirements for low-emitting materials.
6. Laboratory Test Reports: For ceiling and wall materials, indicating compliance with requirements for low-emitting materials.

1.3 MOCKUPS

A. Build mockups of at least [**100 sq. ft.** (9 sq. m)]<**Insert dimension**> in surface area to demonstrate aesthetic effects and to set quality standards for materials and execution.

1. Build mockups for the following:

    a. Each level of interior gypsum board finish required for use in exposed locations.
    b. Each texture finish required.

2. Apply or install final decoration required, including painting and wallcoverings, on exposed surfaces for review of mockups.
3. Simulate finished lighting conditions for review of mockups.
4. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
5. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.4 DELIVERY, STORAGE, AND HANDLING

A. Store materials inside under cover and keep them dry and protected against weather, condensation, direct sunlight, construction traffic, and other potential causes of damage. Stack panels flat and supported on risers on a flat platform to prevent sagging.

1.5 FIELD CONDITIONS

A. Environmental Limitations: Comply with ASTM C840 requirements or manufacturer's written instructions, whichever are more stringent.

B. Do not install paper-faced gypsum panels until installation areas are enclosed and conditioned.

C. Do not install panels that are wet, moisture damaged, or mold damaged.

1. Indications that panels are wet or moisture damaged include, but are not limited to, discoloration, sagging, or irregular shape.
2. Indications that panels are mold damaged include, but are not limited to, fuzzy or splotchy surface contamination and discoloration.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each type of gypsum board and joint finishing material from single source with resources to provide products of consistent quality in appearance and physical properties.

2.2 PERFORMANCE REQUIREMENTS

A. Fire-Resistance-Rated Assemblies: For fire-resistance-rated assemblies, provide materials and construction identical to those tested in assembly indicated on Drawings in accordance with ASTM E119; tested by a qualified testing agency.

B. STC-Rated Assemblies: For STC-rated assemblies, provide materials and construction identical to those tested in assembly indicated on Drawings in accordance with ASTM E90 and classified in accordance with ASTM E413; tested by a qualified testing agency.

C. Verify ceiling and wall materials comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

D. Verify ceiling and wall materials comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.

2.3 GYPSUM BOARD, GENERAL

A. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert number**> percent.

B. Product Data: Verify materials were manufactured within **100 miles (160 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **100 miles (160 km)** of Project site.

C. Regional Materials: Verify materials were manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site. If materials are transported by rail or water, multiply the distance by 0.25 to determine the distance to Project site.

D. Size: Provide panel products in maximum lengths and widths available that will minimize joints in each area and that correspond with support system specified or indicated on Drawings.

2.4 INTERIOR GYPSUM BOARD

A. Gypsum Wallboard: ASTM C1396/C1396M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

3. Thickness: [**As indicated on Drawings**][**1/4 inch (6.4 mm)**][**3/8 inch (9.5 mm)**][**1/2 inch (12.7 mm)**] .
4. Long Edges: [**Tapered**][**Tapered and featured (rounded or beveled) for prefilling**]<**Insert requirements**> .

B. Lightweight Gypsum Wallboard: ASTM C1396/C1396M; manufactured to be lighter in weight and have greater sag resistance than traditional gypsum board of same thickness.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**Panel Rey**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**Panel Rey**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

3. Thickness: [**As indicated on Drawings**][**1/2 inch (12.7 mm)**] .
4. Long Edges: [**Tapered**][**Tapered and featured (rounded or beveled) for prefilling**]<**Insert requirements**> .

C. Gypsum Board, Type X: ASTM C1396/C1396M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Gypsum**]
   b. [**CertainTeed; SAINT-GOBAIN**]
   c. [**Georgia-Pacific Gypsum LLC**]
   d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   e. [**PABCO Gypsum**]
   f. [**Panel Rey**]
   g. [**USG Corporation**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Gypsum**]
   b. [**CertainTeed; SAINT-GOBAIN**]
   c. [**Georgia-Pacific Gypsum LLC**]
   d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   e. [**PABCO Gypsum**]
   f. [**Panel Rey**]
   g. [**USG Corporation**]
   h. <**Insert manufacturer's name**>

3. Thickness: [**As indicated on Drawings**][**5/8 inch (15.9 mm)**][**3/4 inch (19.1 mm)**] .
4. Long Edges: [**Tapered**][**Tapered and featured (rounded or beveled) for prefilling**]<**Insert requirements**> .

D. Lightweight Gypsum Board, Type X: ASTM C1396/C1396M; manufactured to be lighter in weight than traditional Type X gypsum board of same thickness.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Gypsum**]
   b. [**CertainTeed; SAINT-GOBAIN**]
   c. [**Georgia-Pacific Gypsum LLC**]
   d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   e. [**USG Corporation**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**USG Corporation**]
f. <**Insert manufacturer's name**>

3. Thickness: [**As indicated on Drawings**][**5/8 inch (15.9 mm)**] .
4. Long Edges: [**Tapered**][**Tapered and featured (rounded or beveled) for prefilling**]<**Insert requirements**> .

E. Gypsum Board, Type C: ASTM C1396/C1396M; manufactured to have increased fire-resistive capability.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**Panel Rey**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**Panel Rey**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

3. Thickness: As required by fire-resistance-rated assembly indicated on Drawings.
4. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.
5. Long Edges: Tapered.

F. Lightweight Gypsum Board, Type C: ASTM C1396/C1396M; manufactured to have increased fire-resistive capability and to be lighter in weight than traditional gypsum board of same thickness.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]

c. [**USG Corporation**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
c. [**USG Corporation**]
d. <**Insert manufacturer's name**>

3. Thickness: As required by fire-resistance-rated assembly indicated on Drawings.
4. Long Edges: [**Tapered**][**Tapered and featured (rounded or beveled) for prefilling**]<**Insert requirements**> .

G. Flexible Gypsum Board: ASTM C1396/C1396M; manufactured to bend to fit radii and to be more flexible than standard regular-type gypsum board of same thickness.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. [**PABCO Gypsum**]
c. [**Panel Rey**]
d. [**USG Corporation**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. [**PABCO Gypsum**]
c. [**Panel Rey**]
d. [**USG Corporation**]
e. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/4 inch (6.4 mm); regular type**][**3/8 inch (9.5 mm); regular type**][**5/16 inch (7.9 mm); Type C as required by fire-resistance-rated assembly on Drawings; with ASTM D3273 mold-resistance score of 10 rated in accordance with ASTM D3274**]<**Insert requirements**> .
4. Long Edges: Tapered.

H. Gypsum Ceiling Board: ASTM C1396/C1396M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]

d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**Panel Rey**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**Panel Rey**]
g. [**USG Corporation**]
h. <**Insert manufacturer's name**>

3. Thickness: [**As indicated on Drawings**][**1/2 inch (12.7 mm)**] .
4. Long Edges: [**Tapered**][**Tapered and featured (rounded or beveled) for prefilling**]<**Insert requirements**> .

I. Foil-Backed Gypsum Board: ASTM C1396/C1396M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
b. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**5/8 inch (15.9 mm), Type X**]<**Insert requirements**> .
4. Long Edges: [**Tapered**]<**Insert requirements**> .

J. Abuse-Resistant Gypsum Board: ASTM C1396/C1396M, tested in accordance with ASTM C1629/C1629M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]

d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**5/8 inch (15.9 mm), Type X**]<**Insert requirements**> .
4. Surface Abrasion: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
5. Indentation: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
6. Soft-Body Impact: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
7. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.
8. Long Edges: [**Tapered**]<**Insert requirements**> .

K. Impact-Resistant Gypsum Board: ASTM C1396/C1396M or ASTM C1658/C1658M, tested in accordance with ASTM C1629/C1629M.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Georgia-Pacific Gypsum LLC**]
d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
e. [**PABCO Gypsum**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**5/8 inch (15.9 mm), Type X**]<**Insert requirements**> .
4. Surface Abrasion: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**]

requirements.

5. Indentation: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
6. Soft-Body Impact: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
7. Hard-Body Impact: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements in accordance with test in Annex A1.
8. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.
9. Long Edges: [**Tapered**]<**Insert requirements**> .

L. Mold-Resistant Gypsum Board: ASTM C1396/C1396M; manufactured with moisture- and mold-resistant core and paper surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Gypsum**]
   b. [**CertainTeed; SAINT-GOBAIN**]
   c. [**Georgia-Pacific Gypsum LLC**]
   d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   e. [**PABCO Gypsum**]
   f. [**Panel Rey**]
   g. [**USG Corporation**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Gypsum**]
   b. [**CertainTeed; SAINT-GOBAIN**]
   c. [**Georgia-Pacific Gypsum LLC**]
   d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   e. [**PABCO Gypsum**]
   f. [**Panel Rey**]
   g. [**USG Corporation**]
   h. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**5/8 inch (15.9 mm), Type X**][**5/8 inch (15.9 mm), Type C as required by fire-resistance-rated assembly indicated on Drawings**]<**Insert requirements**> .
4. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.
5. Long Edges: [**Square**][**Tapered**]<**Insert requirements**> .

M. Lightweight Mold-Resistant Gypsum Board: ASTM C1396/C1396M; manufactured with moisture- and mold-resistant core and paper surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**USG Corporation**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**USG Corporation**]
    b. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**5/8 inch (15.9 mm), Type X**]<**Insert requirements**> .
4. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.
5. Long Edges: [**Tapered**][**Tapered and featured (rounded or beveled) for prefilling**]<**Insert requirements**> .

N. Glass-Mat Interior Gypsum Board: ASTM C1658/C1658M; manufactured with fiberglass mat laminated to both sides and designed for interior use.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Georgia-Pacific Gypsum LLC**]
    c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
    d. [**PABCO Gypsum**]
    e. [**Panel Rey**]
    f. [**USG Corporation**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Georgia-Pacific Gypsum LLC**]
    c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
    d. [**PABCO Gypsum**]
    e. [**Panel Rey**]
    f. [**USG Corporation**]
    g. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**1/2 inch (12.7 mm), Type C as required by fire-resistance-rated assembly indicated on Drawings**][**5/8 inch (15.9 mm), Type X**][**5/8 inch (15.9 mm), Type C as required by fire-resistance-rated assembly indicated on Drawings**]<**Insert requirements**> .
4. Abuse and Impact Resistance:

    a. Surface Abrasion: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
    b. Indentation: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
    c. Soft-Body Impact: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements.
    d. Hard-Body Impact: ASTM C1629/C1629M, meets or exceeds [**Level 1**][**Level 2**][**Level 3**] requirements in accordance with test in Annex A1.

5. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.
6. Long Edges: Tapered.

O. Acoustically Enhanced Gypsum Board: ASTM C1766; multilayer products constructed of two layers of gypsum boards sandwiching a viscoelastic sound-absorbing polymer core.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
    c. [**PABCO Gypsum**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
    c. [**PABCO Gypsum**]
    d. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**5/8 inch (15.9 mm), Type X**]<**Insert requirements**> .
4. Long Edges: Tapered.

P. Trim for Interior Gypsum Board: ASTM C1047.

1. Material: [**Galvanized-steel sheet or aluminum-coated steel sheet, rolled zinc, plastic, or paper-faced galvanized-steel sheet**][**Galvanized-steel sheet or aluminum-coated steel sheet or rolled zinc**][**Plastic**][**Paper-faced galvanized-steel sheet**][**PVC**]<**Insert material**> .
2. Shapes:

    a. Cornerbead.
    b. Bullnose bead.
    c. LC-Bead: J-shaped; exposed long flange receives joint compound.
    d. L-Bead: L-shaped; exposed long flange receives joint compound.
    e. U-Bead: J-shaped; exposed short flange does not receive joint compound.
    f. Curved-Edge Cornerbead: With notched or flexible flanges.
    g. Expansion (Control) Joint: One-piece, rolled zinc with V-shaped slot and removable strip covering slot opening.

Q. Base-of-Wall PVC Moisture-Barrier Trim: Proprietary extruded shapes that lifts finish panels above the floor surface to prevent moisture damage.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Waterguard**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Waterguard**]
    b. <**Insert manufacturer's name**>

3. Height: [**1/2 inch (12.7 mm)**][**1-3/4 inches (44 mm)**][**3-1/2 inches (89 mm)**] .
4. Fire-Resistance-Rated Assemblies: Comply with requirements of assembly indicated on Drawings.

R. Aluminum Trim: Extruded accessories of profiles and dimensions indicated on Drawings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Brand X Metals, Inc**]
    b. [**Flannery, Inc.**]
    c. [**Fry Reglet Corporation**]
    d. [**Gordon Inc.**]
    e. [**Pittcon Industries**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Brand X Metals, Inc**]
    b. [**Flannery, Inc.**]
    c. [**Fry Reglet Corporation**]
    d. [**Gordon Inc.**]
    e. [**Pittcon Industries**]
    f. <**Insert manufacturer's name**>

3. Product Standard: Alloy and temper with not less than the strength and durability properties of **ASTM B221 (ASTM B221M)**, Alloy 6063-T5.
4. Finish: [**Corrosion-resistant primer compatible with joint compound and finish materials specified**]<**Insert finish**> .

S. Joint Treatment Materials for Interior Gypsum Board: Comply with ASTM C475/C475M requirements.

1. Joint Tape: Paper.
2. Joint Compound: For each coat, use formulation that is compatible with other compounds applied on previous or for successive coats.

    a. Mold-Resistant Joint Compound: Use mold-resistant formulations with mold-resistant gypsum board products.
    b. Prefilling: At open joints [**, rounded or beveled panel edges,**] and damaged surface areas, use setting-type taping compound.
    c. Embedding and First Coat: For embedding tape and first coat on joints, fasteners, and trim flanges, use [**setting-type taping**][**drying-type, all-purpose**] compound.
    d. Fill Coat: For second coat, use [**setting-type, sandable topping**][**drying-type, all-purpose**] compound.
    e. Finish Coat: For third coat, use [**setting-type, sandable topping**][**drying-type, all-**

purpose] compound.

f. Skim Coat: For final coat of Level 5 finish, use [**setting-type, sandable topping compound**][**drying-type, all-purpose compound**][**high-build interior coating product designed for application by airless sprayer and to be used instead of skim coat to produce Level 5 finish**] .

2.5 EXTERIOR GYPSUM BOARD

A. Exterior Gypsum Soffit Board: ASTM C1396/C1396M, with manufacturer's standard edges.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Gypsum**]
   b. [**CertainTeed; SAINT-GOBAIN**]
   c. [**Georgia-Pacific Gypsum LLC**]
   d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   e. [**PABCO Gypsum**]
   f. [**Panel Rey**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Gypsum**]
   b. [**CertainTeed; SAINT-GOBAIN**]
   c. [**Georgia-Pacific Gypsum LLC**]
   d. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
   e. [**PABCO Gypsum**]
   f. [**Panel Rey**]
   g. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**1/2 inch (12.7 mm), Type C as required by fire-resistance-rated assembly indicated on Drawings**][**5/8 inch (15.9 mm), Type X**][**5/8 inch (15.9 mm), Type C as required by fire-resistance-rated assembly indicated on Drawings**]<**Insert requirements**> .

B. Trim for Exterior Gypsum Board: ASTM C1047.

1. Material: [**Hot-dip galvanized-steel sheet, plastic, or rolled zinc**]<**Insert material**> .
2. Shapes:

   a. Cornerbead.
   b. LC-Bead: J-shaped; exposed long flange receives joint compound.
   c. Expansion (Control) Joint: One-piece, rolled zinc with V-shaped slot and removable strip covering slot opening.

C. Joint Treatment Materials for Exterior Gypsum Board: Comply with ASTM C475/C475M requirements.

1. Joint Tape: Paper.
2. Joint Compound: Use setting-type taping compound and setting-type, sandable topping

compound.

2.6 TILE BACKING PANELS

A. Glass-Mat, Water-Resistant Gypsum Panel: ASTM C1658/C1658M, with fiberglass mat partially or completely embedded into the core.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Georgia-Pacific Gypsum LLC**]
c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
d. [**PABCO Gypsum**]
e. [**Panel Rey**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Georgia-Pacific Gypsum LLC**]
c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
d. [**PABCO Gypsum**]
e. [**Panel Rey**]
f. [**USG Corporation**]
g. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm), regular type**][**1/2 inch (12.7 mm), Type C**][**5/8 inch (15.9 mm), Type X**][**5/8 inch (15.9 mm), abuse resistant**] .
4. Long Edges: Tapered.
5. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.

B. Coated Glass-Mat, Water-Resistant Gypsum Backing Panel: ASTM C1178/C1178M, with a water-resistant coating on one surface, and manufacturer's standard edges.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**Georgia-Pacific Gypsum LLC**]
c. [**USG Corporation**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CertainTeed; SAINT-GOBAIN**]

b. [**Georgia-Pacific Gypsum LLC**]
c. [**USG Corporation**]
d. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm)**, **regular type**][**5/8 inch (15.9 mm)**, **Type X**] .
4. Mold Resistance: ASTM D3273, score of 10 as rated in accordance with ASTM D3274.

C. Water-Resistant Gypsum Backing Board: ASTM C1396/C1396M, with manufacturer's standard edges.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
d. [**Panel Rey**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Gypsum**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
d. [**Panel Rey**]
e. <**Insert manufacturer's name**>

3. Core: [**As indicated on Drawings**][**1/2 inch (12.7 mm)**, **regular type**][**5/8 inch (15.9 mm)**, **Type X**]<**Insert requirements**> .

D. Joint Treatment Materials for Tile Backing Panels: Comply with ASTM C475/C475M requirements.

1. Mold-Resistant Joint Compound: Use mold-resistant formulations with mold-resistant panel products.
2. Joint Tape: As recommended in writing by panel manufacturer.
3. Joint Compound for Tile Backing Panels:

a. Glass-Mat, Water-Resistant Gypsum Panel: As recommended in writing by panel manufacturer.
b. Coated Glass-Mat, Water-Resistant Gypsum Backing Panel: As recommended in writing by panel manufacturer.
c. Water-Resistant Gypsum Backing Board: Use setting-type taping compound and setting-type, sandable topping compound.

2.7 Gypsum Board, Type C

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American Gypsum**]

2. [**CertainTeed; SAINT-GOBAIN**]
3. [**Georgia-Pacific Gypsum LLC**]
4. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
5. [**PABCO Gypsum**]
6. [**Panel Rey**]
7. [**USG Corporation**]
8. <**Insert manufacturer's name**>

2.8 AUXILIARY MATERIALS

A. Provide auxiliary materials that comply with referenced installation standards and manufacturer's written instructions.

B. Laminating Adhesive: Adhesive or joint compound recommended in writing by manufacturer for directly adhering gypsum panels to continuous substrate.

1. Verify adhesives have a VOC content of [**50**]<**Insert number**> g/L or less.

C. Steel Drill Screws: ASTM C1002 unless otherwise specified or indicated on Drawings.

1. Use screws complying with ASTM C954 for fastening panels to steel members from **0.033 to 0.112 inch (0.84 to 2.84 mm)** thick.

D. Sound-Attenuation Blankets: ASTM C665, Type I (blankets without membrane facing) produced by combining thermosetting resins with mineral fibers as follows:

1. Non-Fire-Resistance-Rated Assemblies: [**Glass**][**or**][**slag or rock wool**] .
2. Fire-Resistance-Rated Assemblies: Comply with mineral-fiber requirements of assembly.
3. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert number**> percent.

E. Acoustical Sealant: As specified in Section 079219 "Acoustical Joint Sealants."

1. Product Data: Verify architectural sealant has a VOC content of 250 g/L or less.

F. Thermal Insulation: As specified in Section 072100 "Thermal Insulation."

G. Vapor Retarder: As specified in Section 072600 "Vapor Retarders."

2.9 Paperless Wallboard

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. <**Insert manufacturer's name**>

2.10 TEXTURE FINISH

A. Primer: As recommended in writing by texture finish manufacturer.

B. Polystyrene Aggregate Ceiling Finish: Water-based, job-mixed, polystyrene aggregate finish with flame-spread and smoke-developed indexes of not more than 25 when tested in accordance with ASTM E84.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**ProForm Finishing Products, LLC provided by National Gypsum Company**]
    b. [**USG Corporation**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ProForm Finishing Products, LLC provided by National Gypsum Company**]
    b. [**USG Corporation**]
    c. <**Insert manufacturer's name**>

3. Texture: [**Fine**][**Medium**][**Coarse**] .

C. Aggregate Job-Mixed Finish: Water-based, drying-type texture finish for spray application.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**ProForm Finishing Products, LLC provided by National Gypsum Company**]
    c. [**USG Corporation**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**ProForm Finishing Products, LLC provided by National Gypsum Company**]
    c. [**USG Corporation**]
    d. <**Insert manufacturer's name**>

3. Texture: [**Light spatter**][**Spatter knock-down**]<**Insert texture**> .

D. Non-Aggregate Premixed Finish: Vinyl texture finish for spray application.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**CertainTeed; SAINT-GOBAIN**]
    b. [**ProForm Finishing Products, LLC provided by National Gypsum Company**]
    c. [**USG Corporation**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**CertainTeed; SAINT-GOBAIN**]
b. [**ProForm Finishing Products, LLC provided by National Gypsum Company**]
c. [**USG Corporation**]
d. <**Insert manufacturer's name**>

3. Texture: [**Orange peel**][**Spatter**][**Spatter knock-down**]<**Insert texture**> .

E. Acoustical Finish: Water-based, chemical-setting or drying-type, job-mixed texture finish for spray application.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**International Cellulose Corp.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**International Cellulose Corp.**]
b. <**Insert manufacturer's name**>

3. Application Thickness: [**1/2 inch (12.7 mm)**]<**Insert dimension**> .
4. Surface-Burning Characteristics: Comply with ASTM E84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

a. Flame-Spread Index: [**5**]<**Insert value**> or less.
b. Smoke-Developed Index: [**5**]<**Insert value**> or less.

5. NRC: [**0.65**]<**Insert NRC**> in accordance with ASTM C423.

2.11 Tile Backing Panels: Water-Resistant Fiber-Reinforced Gypsum Backing Board

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. <**Insert manufacturer's name**>

2.12 Glass-Mat, Water-Resistant Backing Board

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**CertainTeed; SAINT-GOBAIN**]
2. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
3. [**USG Corporation**]
4. <**Insert manufacturer's name**>

2.13 Gypsum Board, Type X

A. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American Gypsum**]
2. [**CertainTeed; SAINT-GOBAIN**]
3. [**Georgia-Pacific Gypsum LLC**]
4. [**Gold Bond Building Products, LLC provided by National Gypsum Company**]
5. [**PABCO Gypsum**]
6. [**Panel Rey**]
7. [**USG Corporation**]
8. <**Insert manufacturer's name**>

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine areas and substrates including welded hollow-metal frames and support framing, with Installer present, for compliance with requirements and other conditions affecting performance of the Work.

B. Examine panels before installation. Reject panels that are wet, moisture damaged, or mold damaged.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION AND FINISHING OF GYPSUM BOARD, GENERAL

A. Comply with ASTM C840 requirements.

B. Install ceiling panels across framing to minimize the number of abutting end joints and to avoid abutting end joints in central area of each ceiling. Stagger abutting end joints of adjacent panels not less than one framing member.

C. Install panels with face side out. Butt panels together for a light contact at edges and ends with not more than **1/16 inch (1.6 mm)** of open space between panels. Do not force into place.

D. Locate edge and end joints over supports, except in ceiling applications where intermediate supports or gypsum board back-blocking is provided behind end joints. Do not place tapered edges against cut edges or ends. Stagger vertical joints on opposite sides of partitions. Do not make joints other than control joints at corners of framed openings.

E. Form expansion (control) joints with space between edges of adjoining gypsum panels.

F. Cover both faces of support framing with gypsum panels in concealed spaces (above ceilings, etc.), except in chases braced internally.

1. Unless concealed application is indicated or required for sound, fire, air, or smoke ratings, coverage may be accomplished with scraps of not less than **8 sq. ft. (0.7 sq. m)** in area.
2. Fit gypsum panels around ducts, pipes, and conduits.
3. Where partitions intersect structural members projecting below underside of floor/roof slabs and decks, cut gypsum panels to fit profile formed by structural members; allow **1/4- to 3/8-inch- (6.4-**

to 9.5-mm-) wide joints to install sealant.

G. Isolate perimeter of gypsum board applied to non-load-bearing partitions at structural abutments. Provide 1/4- to 1/2-inch- (6.4- to 12.7-mm-) wide spaces at these locations and trim edges with edge trim where edges of panels are exposed. Seal joints between edges and abutting structural surfaces with acoustical sealant.

H. Attachment to Steel Framing: Attach panels so leading edge or end of each panel is attached to open (unsupported) edges of stud flanges first.

I. Wood Framing: Install gypsum panels over wood framing, with floating internal corner construction. Do not attach gypsum panels across the flat grain of wide-dimension lumber, including floor joists and headers. Float gypsum panels over these members or provide control joints to counteract wood shrinkage.

J. STC-Rated Assemblies: Seal construction at perimeters, behind control joints, and at openings and penetrations with a continuous bead of acoustical sealant. Install acoustical sealant at both faces of partitions at perimeters and through penetrations. Comply with ASTM C919 requirements and with manufacturer's written instructions for locating edge trim and closing off sound-flanking paths around or through assemblies, including sealing partitions above acoustical ceilings.

K. Install sound-attenuation blankets before installing gypsum panels unless blankets are readily installed after panels have been installed on one side.

3.3 INSTALLATION OF INTERIOR GYPSUM BOARD

A. Single-Layer Application:

1. On ceilings, apply gypsum panels before wall/partition board application to greatest extent possible and at right angles to framing unless otherwise indicated on Drawings.
2. On partitions/walls, apply gypsum panels [**vertically (parallel to framing)**][**horizontally (perpendicular to framing)**] unless otherwise specified or indicated on Drawings or required by fire-resistance-rated assembly, and minimize end joints.

    a. Stagger abutting end joints not less than one framing member in alternate courses of panels.
    b. At stairwells and other high walls, install panels horizontally unless otherwise indicated on Drawings or required by fire-resistance-rated assembly.

3. On Z-shaped furring members, apply gypsum panels vertically (parallel to framing) with no end joints. Locate edge joints over furring members.
4. Fastening Methods: Apply gypsum panels to supports with steel drill screws.

B. Multilayer Application:

1. On ceilings, apply gypsum board indicated for base layers before applying base layers on walls/partitions; apply face layers in same sequence. Apply base layers at right angles to framing members and offset face-layer joints one framing member, 16 inches (406 mm) minimum, from parallel base-layer joints, unless otherwise indicated on Drawings or required by fire-resistance-rated assembly.
2. On partitions/walls, apply gypsum board indicated for base layers and face layers vertically (parallel to framing) with joints of base layers located over studs or furring members and face-layer joints offset at least one stud or furring member with base-layer joints unless otherwise indicated on Drawings or required by fire-resistance-rated assembly. Stagger joints on opposite sides of partitions.

3. On Z-shaped furring members, apply base layer vertically (parallel to framing) and face layer either vertically (parallel to framing) or horizontally (perpendicular to framing) with vertical joints offset at least one furring member. Locate edge joints of base layer over furring members.
4. Fastening Methods: Fasten base layers [**and face layers separately to supports with screws**][**with screws; fasten face layers with adhesive and supplementary fasteners**] .

C. Application of Laminating Adhesive to Substrate: Where gypsum panels are indicated as directly adhered to a substrate (other than studs, joists, furring members, or base layer of gypsum board), comply with gypsum board manufacturer's written instructions and temporarily brace or fasten gypsum panels until fastening adhesive has set.

D. Curved Surfaces:

1. Install panels horizontally (perpendicular to supports) and unbroken, to extent possible, across curved surface plus **12-inch- (305-mm-)** long straight sections at ends of curves and tangent to them.
2. For double-layer construction, fasten base layer to studs with screws **16 inches (406 mm)** o.c. Center gypsum board face layer over joints in base layer, and fasten to studs with screws spaced **12 inches (305 mm)** o.c.

E. Trim for Interior Gypsum Board: For trim with back flanges intended for fasteners, attach to framing with same fasteners used for panels. Otherwise, attach trim in accordance with manufacturer's written instructions.

1. Cornerbead: Install at outside corners [**unless otherwise specified or indicated on Drawings**] .
2. Bullnose Bead: Install [**at outside corners**][**where indicated on Drawings**]<**Insert requirements**> .
3. LC-Bead: Install [**at exposed panel edges**]<**Insert requirements**> .
4. L-Bead: Install [**where indicated on Drawings**]<**Insert requirements**> .
5. U-Bead: Install [**at exposed panel edges**][**where indicated on Drawings**]<**Insert requirements**> .
6. Curved-Edge Cornerbead: Install at curved openings.
7. Expansion (Control) Joint: Install control joints [**at locations indicated on Drawings**][**in accordance with ASTM C840 and in specific locations approved by Architect for visual effect**]<**Insert requirements**> .

F. Base-of-Wall PVC Moisture Barrier Trim: Install at base of wall [**unless otherwise specified or indicated on Drawings**] .

G. Aluminum Trim: Install in locations [**indicated on Drawings**]<**Insert requirements**> .

H. Joint Treatment Materials for Interior Gypsum Board: Treat joints, interior angles, edge trim, control joints, penetrations, fastener heads, surface defects, and elsewhere as required to prepare panel surfaces for decoration. Promptly remove residual joint compound from adjacent surfaces.

1. Prefill open joints [**, rounded or beveled edges,**] and damaged surface areas.
2. Apply joint tape over panel joints, except for trim products specifically indicated as not intended to receive tape.

I. Finish interior gypsum board panels to comply with levels indicated below and in accordance with ASTM C840:

1. Level 1: Ceiling plenum areas, concealed areas, and where indicated on Drawings.
2. Level 2: [**Panels that are substrate for tile**][**Panels that are substrate for acoustical**

tile][**Where indicated on Drawings**]<**Insert locations**> .

3. Level 3: [**Where indicated on Drawings**]<**Insert locations**> .

    a. Primer and its application to surfaces are specified in [**Section 099123 "Interior Painting."**][**Section 099124 "Interior Painting (MPI Standards)."**]

4. Level 4: [**At panel surfaces that will be exposed to view unless otherwise indicated**]<**Insert locations**> .

    a. Primer and its application to surfaces are specified in [**Section 099123 "Interior Painting."**][**Section 099124 "Interior Painting (MPI Standards)."**]

5. Level 5: [**Where indicated on Drawings**]<**Insert locations**> .

    a. Primer and its application to surfaces are specified in [**Section 099123 "Interior Painting."**][**Section 099124 "Interior Painting (MPI Standards)."**]

3.4 INSTALLATION OF EXTERIOR GYPSUM BOARD

A. Apply panels perpendicular to supports, with end joints staggered and located over supports.

1. Install with **1/4-inch (6.4-mm)** open space where panels abut other construction or structural penetrations.
2. Fasten with corrosion-resistant screws.

B. Trim for Exterior Gypsum Board: Install in the following locations:

1. Cornerbead: Use at outside corners.
2. LC-Bead: Use [**at exposed panel edges**]<**Insert requirements**> .
3. Expansion (Control) Joint: Install control joints [**at locations indicated on Drawings**][**in accordance with ASTM C840 and in specific locations approved by Architect for visual effect**]<**Insert requirements**> .

C. Finish exterior gypsum board in accordance with manufacturer's written instructions.

3.5 INSTALLATION OF TILE BACKING PANELS

A. Glass-Mat, Water-Resistant Gypsum Panel: Comply with manufacturer's written installation instructions and install at locations indicated to receive tile. Install with **1/4-inch (6.4-mm)** gap where panels abut other construction or penetrations.

B. Coated Glass-Mat, Water-Resistant Gypsum Backing Panel: Comply with manufacturer's written installation instructions and install at [**showers, tubs, and where indicated on Drawings**][**locations indicated to receive tile**] . Install with **1/4-inch (6.4-mm)** gap where panels abut other construction or penetrations.

C. Water-Resistant Gypsum Backing Board: Install where indicated with **1/4-inch (6.4-mm)** gap where panels abut other construction or penetrations.

D. Where tile backing panels abut other types of panels in same plane, shim surfaces to produce a uniform plane across panel surfaces.

E. Finish tile backing panels in accordance with manufacturer's written instructions.

3.6 APPLICATION OF TEXTURE FINISH

A. Surface Preparation and Primer: Prepare and apply primer to gypsum panels and other surfaces receiving texture finish. Apply primer to surfaces that are clean, dry, and smooth.

B. Texture Finish Application: Mix and apply finish using powered spray equipment, to produce a uniform texture [**matching approved mockup and**] free of starved spots or other evidence of thin application or of application patterns.

C. Prevent texture finish from contacting surfaces not indicated to receive texture finish by covering them with masking agents, polyethylene film, or other means. If, despite these precautions, texture finish contacts these surfaces, immediately remove droppings and overspray to prevent damage in accordance with texture-finish manufacturer's written instructions.

3.7 PROTECTION

A. Protect adjacent surfaces from joint compound and promptly remove from floors and other non-gypsum board surfaces. Repair surfaces stained, marred, or otherwise damaged during gypsum board installation and finishing.

B. Protect installed products from damage from weather, condensation, direct sunlight, construction, and other causes during remainder of the construction period.

C. Remove and replace panels that have gotten wet, moisture damaged, or mold damaged.

1. Indications that panels are wet or moisture damaged include, but are not limited to, discoloration, sagging, or irregular shape.
2. Indications that panels are mold damaged include, but are not limited to, fuzzy or splotchy surface contamination and discoloration.

END OF SECTION 09 29 00 00

Task	Specification	Specification Description
09 29 10 00	01 22 00 00	No Specification Required
09 29 10 00	09 29 00 00	Gypsum Board
09 29 82 00	09 29 00 00	Gypsum Board

SECTION 09 51 13 00 - ACOUSTICAL PANEL CEILINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Acoustical panels.
2. Exposed metal suspension system.
3. Metal edge moldings and trim.

B. Related Requirements:

1. Section 095123 "Acoustical Tile Ceilings" for ceilings consisting of mineral-base acoustical tiles used with fully concealed suspension systems, stapling, or adhesive bonding.
2. Section 095133 "Acoustical Metal Pan Ceilings" for ceilings consisting of metal-pan units with exposed and concealed suspension systems.

C. Products furnished, but not installed under this Section, include anchors, clips, and other ceiling attachment devices to be cast in concrete.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference [**at Project site**][**by web conference**]<**Insert location**> .

1.3 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

B. Samples: For each exposed product and for each color and texture specified, **6 inches (150 mm)** in size.

C. Samples for Initial Selection: For components with factory-applied finishes.

D. Samples for Verification: For each component indicated and for each exposed finish required, prepared on Samples of sizes indicated below:

1. Acoustical Panels: Set of [**full-size**][**6-inch- (150-mm-) square**]<**Insert size**> Samples of each type, color, pattern, and texture.
2. Exposed Suspension-System Members, Moldings, and Trim: Set of [**6-inch- (150-mm-)**]<**Insert dimension**> long Samples of each type, finish, and color.
3. Clips: Full-size [**hold-down**][**impact**][**and**][**seismic**] clips.

E. Delegated Design Submittals: For seismic restraints for ceiling systems.

1. Include design calculations for seismic restraints including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.
2. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer

recycled content and cost.

3. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.
4. Environmental Product Declaration (EPD): For each product.
5. Health Product Declaration (HPD): For each product.
6. Environmental Product Declaration (EPD): For each product.
7. Health Product Declaration (HPD): For each product.
8. Environmental Product Declaration (EPD): For each product.
9. Environmental Product Declaration (EPD): For each product.
10. Environmental Product Declaration (EPD): For each product.
11. Third-Party Certifications: For each product.
12. Third-Party-Certified Life-Cycle Assessment: For each product.
13. Health Product Declaration (HPD): For each product.
14. Health Product Declaration (HPD): Provide HPD.
15. Health Product Declaration (HPD): Provide documentation confirming product compliance with one of the following:

    a. Inventory or HPD to at least 0.01 percent by weight, with at least 95 percent assessed using GreenScreen Benchmark assessment.
    b. Cradle to Cradle v3 certification with minimum Silver level of Material Health.
    c. Living Product Challenge certification indicating achievement of Imperative 09, "Transparent Material Health."

16. Health Product Declaration (HPD): Provide documentation indicating that manufacturer has screened and publicly provided ingredient disclosure to 1000 ppm, and has developed an action plan to mitigate known hazards.
17. Laboratory Test Reports: For ceiling products, indicating compliance with the VOC emissions evaluation.
18. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Reflected ceiling plans, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Ceiling suspension-system members.
2. Structural members to which suspension systems will be attached.
3. Method of attaching hangers to building structure.

    a. Furnish layouts for cast-in-place anchors, clips, and other ceiling attachment devices whose installation is specified in other Sections.

4. Carrying channels or other supplemental support for hanger-wire attachment where conditions do not permit installation of hanger wires at required spacing.
5. Size and location of initial access modules for acoustical panels.
6. Items penetrating finished ceiling and ceiling-mounted items including the following:

    a. Lighting fixtures.
    b. Diffusers.
    c. Grilles.
    d. Speakers.
    e. Sprinklers.
    f. Access panels.

g. Perimeter moldings.

7. Show operation of hinged and sliding components covered by or adjacent to acoustical panels.
8. Minimum Drawing Scale: [**1/4 inch = 1 ft. (1:48)**][**1/8 inch = 1 ft. (1:96)**][**1:50**][**1:100**]<**Insert scale**> .

B. Product Test Reports: For each acoustical panel ceiling, for tests performed by [**manufacturer and witnessed by a qualified testing agency**][**a qualified testing agency**] .

C. Evaluation Reports: For each acoustical panel ceiling suspension system [**and anchor and fastener type**] , from ICC-ES.

D. Field Quality Control Reports: For specified tests and inspections.

E. Qualification Statements: For testing agency.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Data: For finishes to include in maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials [**, from the same production run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Acoustical Panels: Full-size panels equal to [**2**]<**Insert number**> percent of quantity installed.
2. Suspension-System Components: Quantity of each exposed component equal to [**2**]<**Insert number**> percent of quantity installed.
3. Hold-Down Clips: Equal to [**2**]<**Insert number**> percent of quantity installed.
4. Impact Clips: Equal to [**2**]<**Insert number**> percent of quantity installed.

1.7 MOCKUPS

A. Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.

1. Build mockup of typical ceiling area as indicated on Drawings.
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Deliver acoustical panels, suspension-system components, and accessories to Project site and store them in a fully enclosed, conditioned space where they will be protected against damage from moisture, humidity, temperature extremes, direct sunlight, surface contamination, and other causes.

B. Before installing acoustical panels, permit them to reach room temperature and a stabilized moisture content.

1.9 FIELD CONDITIONS

A. Environmental Limitations: Do not install acoustical panel ceilings until spaces are enclosed and weathertight, wet-work in spaces is complete and dry, work above ceilings is complete, and ambient temperature and humidity conditions are maintained at the levels indicated for Project when occupied for its intended use.

1. Pressurized Plenums: Operate ventilation system for not less than 48 hours before beginning acoustical panel ceiling installation.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Source Limitations for Ceiling System: Obtain each type of acoustical panel and its supporting suspension system from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design seismic restraints for ceiling systems.

B. Seismic Performance: Suspended ceilings to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**]<**Insert requirement**> .

C. Surface-Burning Characteristics: Comply with ASTM E84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame-Spread Index: Class [**A**][**B**][**C**] in accordance with ASTM E1264.
2. Smoke-Developed Index: [**50**][**450**]<**Insert value**> or less.

D. Fire-Resistance Ratings: Comply with ASTM E119; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Indicate design designations from UL or from the listings of another qualified testing agency.

E. Verify ceiling products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

F. Verify ceiling products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.

2.3 ACOUSTICAL PANEL CEILINGS

A. Acoustical Panels : Provide manufacturer's standard panels in accordance with ASTM E1264 and designated by type, form, pattern, acoustical rating, and light reflectance unless otherwise indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**American Gypsum**]
    b. [**Armstrong World Industries**]
    c. [**Cardinal Acoustics, Inc.**]
    d. [**CertainTeed; SAINT-GOBAIN**]
    e. [**Rockfon; ROCKWOOL International**]
    f. [**USG Corporation**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Gypsum**]
    b. [**Armstrong World Industries**]
    c. [**Cardinal Acoustics, Inc.**]
    d. [**CertainTeed; SAINT-GOBAIN**]
    e. [**Rockfon; ROCKWOOL International**]
    f. [**USG Corporation**]
    g. <**Insert manufacturer's name**>

3. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert number**> percent.
4. Classification: Provide [**fire-resistance-rated**] panels as follows:

    a. Type and Form, Type III: Mineral base with painted finish; [**Form 1, nodular**][**Form 2, water felted**][**Form 4, cast or molded**] .
    b. Type and Form, Type IV Form 1: Mineral base with membrane-faced overlay; Form 1, nodular; with [**glass-fiber cloth**][**washable vinyl-film**] overlay.
    c. Type and Form, Type IV Form 2: Mineral base with membrane-faced overlay; Form 2, water felted; with [**vinyl overlay on face**][**vinyl overlay on face and back**][**vinyl overlay on face, back, and sealed edges**][**fiberglass-fabric overlay on face**] .
    d. Type and Form, Type XII: Glass-fiber base with membrane-faced overlay; [**Form 1, plastic**][**Form 2, cloth**][**Form 3, other**] . Binder may not contain urea formaldehyde.
    e. Type and Form, Type XX: High-density, ceramic- and mineral-base panels with scrubbable finish, resistant to heat, moisture, and corrosive fumes.
    f. Type and Form: <**Insert type and form**> .
    g. Pattern: [**C (perforated, small holes)**][**CD (perforated, small holes and fissured)**][**CE (perforated, small holes and lightly textured)**][**D (fissured)**][**E (lightly textured)**][**F (heavily textured)**][**G (smooth)**][**GH (smooth and printed)**][**I (embossed)**][**J (embossed-in-register)**][**K (surface scored)**][**Z (other patterns as described)**][**and**][**as indicated by manufacturer's designation**]<**Insert pattern**> .

5. Color: [**White**][**As selected from manufacturer's full range**][**Match Architect's sample**][**As indicated by manufacturer's designation**][**As indicated on Drawings**][**As indicated in a schedule**]<**Insert color**> .
6. Light Reflectance (LR): Not less than [**LR indicated in a schedule**][**0.65**][**0.70**][**0.75**][**0.80**][**0.85**][**0.90**]<**Insert LR**> .
7. Ceiling Attenuation Class (CAC): Not less than [**CAC indicated in a schedule**][**20**][**25**][**30**][**35**][**40**]<**Insert CAC**> .
8. Noise Reduction Coefficient (NRC): Not less than [**NRC indicated in a schedule**][**0.40**][**0.50**][**0.55**][**0.60**][**0.65**][**0.70**][**0.75**][**0.80**][**0.85**][**0.90**][**0.95**][**1.00**]<**Insert NRC**> .

9. Articulation Class (AC): Not less than [**AC indicated in a schedule**][**170**][**180**][**190**][**200**][**210**]<**Insert AC**> .
10. Edge/Joint Detail: [**Square**][**Reveal sized to fit flange of exposed suspension-system members**][**Flush reveal sized to fit flange of exposed suspension-system members**][**Beveled, kerfed, and rabbeted long edges and square, butt-on short edges**][**As indicated by manufacturer's designation**]<**Insert requirement**> .
11. Thickness: [**5/8 inch (15 mm)**][**3/4 inch (19 mm)**][**7/8 inch (22 mm)**][**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**As indicated on Drawings**][**As indicated in a schedule**]<**Insert dimension**> .
12. Modular Size: [**24 by 24 inches (610 by 610 mm)**][**24 by 48 inches (610 by 1220 mm)**][**24 by 72 inches (610 by 1830 mm)**][**24 by 96 inches (610 by 2440 mm)**][**48 by 48 inches (1220 by 1220 mm)**][**600 by 600 mm**][**600 by 1200 mm**][**As indicated on Drawings**][**As indicated in a schedule**]<**Insert size**> .
13. Antimicrobial Treatment: Manufacturer's standard broad spectrum, antimicrobial formulation that inhibits fungus, mold, mildew, and gram-positive and gram-negative bacteria and showing no mold, mildew, or bacterial growth when tested in accordance with ASTM D3273, ASTM D3274, or ASTM G21 and evaluated in accordance with ASTM D3274 or ASTM G21.

B. Exposed Metal Suspension System :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Armstrong World Industries**]
    b. [**Cardinal Acoustics, Inc.**]
    c. [**CertainTeed; SAINT-GOBAIN**]
    d. [**Cipriani USA**]
    e. [**Rockfon; ROCKWOOL International**]
    f. [**USG Corporation**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Armstrong World Industries**]
    b. [**Cardinal Acoustics, Inc.**]
    c. [**CertainTeed; SAINT-GOBAIN**]
    d. [**Cipriani USA**]
    e. [**Rockfon; ROCKWOOL International**]
    f. [**USG Corporation**]
    g. <**Insert manufacturer's name**>

3. Metal Suspension-System Standard: Provide manufacturer's standard, direct-hung, metal suspension system and accessories in accordance with ASTM C635/C635M and designated by type, structural classification, and finish indicated.

    a. High-Humidity Finish: Where indicated, provide coating tested and classified for "severe environment performance" in accordance with ASTM C635/C635M.

4. Wide-Face, Capped, Double-Web, Steel Suspension System: Main and cross runners roll formed from cold-rolled steel sheet; prepainted, electrolytically zinc coated, or hot-dip galvanized, **G30 (Z90)** coating designation; with prefinished **15/16-inch- (24-mm-)** wide metal caps on flanges.

a. Fire Rating: [**As indicated on Drawings**]<**Insert fire rating**> .
b. Structural Classification: [**Intermediate**][**Heavy**] -duty system.
c. End Condition of Cross Runners: [**Override (stepped)**][**or**][**butt-edge**] type.
d. Face Design: Flat, flush.
e. Cap Material: [**Cold-rolled steel**][**or**][**aluminum**] .
f. Cap Finish: [**Painted white**][**Painted in color as selected from manufacturer's full range**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of acoustical unit**][**Plated with metallic finish as selected from manufacturer's full range**][**Plated with metallic finish indicated by manufacturer's designation**][**Natural finish for aluminum**] .

5. Narrow-Face, Capped, Double-Web, Steel Suspension System: Main and cross runners roll formed from cold-rolled steel sheet; prepainted, electrolytically zinc coated, or hot-dip galvanized, **G30 (Z90)** coating designation; with prefinished **9/16-inch- (15-mm-)** wide metal caps on flanges.

a. Structural Classification: [**Intermediate**][**Heavy**] -duty system.
b. End Condition of Cross Runners: [**Override (stepped)**][**or**][**butt-edge**] type.
c. Face Design: [**Flat, flush**][**Flanges formed with an integral center reveal**] .
d. Cap Material: [**Cold-rolled steel**][**or**][**aluminum**] .
e. Cap Finish: [**Painted white**][**Painted in color as selected from manufacturer's full range**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of acoustical unit**][**Plated with metallic finish as selected from manufacturer's full range**][**Plated with metallic finish indicated by manufacturer's designation**][**Natural finish for aluminum**] .

6. Narrow-Face, Steel-Capped, Double-Web, Fire-Rated Steel Suspension System: Main and cross runners roll formed from cold-rolled steel sheet; prepainted, electrolytically zinc coated, or hot-dip galvanized, **G30 (Z90)** coating designation; with prefinished, cold-rolled, **9/16-inch- (15-mm-)** wide metal caps on flanges.

a. Structural Classification: Intermediate-duty system.
b. Face Design: Flat, flush.
c. Cap Finish: [**Painted white**][**Painted in color as selected from manufacturer's full range**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of acoustical unit**][**Plated with metallic finish as selected from manufacturer's full range**][**Plated with metallic finish indicated by manufacturer's designation**] .

7. Narrow-Face, Uncapped, Double-Web, Steel Suspension System: Main and cross runners roll formed from cold-rolled steel sheet; prepainted, electrolytically zinc coated, or hot-dip galvanized, **G30 (Z90)** coating designation; to produce structural members with **9/16-inch- (15-mm-)** wide faces.

a. Structural Classification: [**Intermediate**][**Heavy**] -duty system.
b. Face Design: [**With 1/8-inch- (3-mm-) wide, slotted, box-shaped flange**][**With 1/4-inch- (6-mm-) wide, slotted, box-shaped flange**][**Flanges formed in stepped design with a center protrusion projecting 19/64 inch (7.54 mm) below flange surfaces supporting panel faces and forming 3/16-inch- (4.76-mm-) wide reveals between edges of protrusion and those of panels**] .
c. Face Finish: Painted [**white**][**in color as selected from manufacturer's full range**][**to match color indicated by manufacturer's designation**][**to match color of acoustical unit**] .
d. Reveal Finish: Painted [**to match flange color**][**white**][**black**][**in color other than flange color as selected from manufacturer's full range of contrasting reveal colors**] .

8. Wide-Face, Aluminum-Capped, Double-Web, Hot-Dip Galvanized, G60 (Z180), Steel Suspension

System: Main and cross runners roll formed from cold-rolled steel sheet; hot-dip galvanized, **G60 (Z180)** coating designation; with prefinished, **15/16-inch- (24-mm-)** wide aluminum caps on flanges.

a. Fire Rating: [**As indicated on the Drawings**]<**Insert fire rating**> .
b. Structural Classification: [**Intermediate**][**Heavy**] -duty system.
c. Face Design: Flat, flush.
d. Cap Finish: [**Painted white**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of acoustical unit**][**Natural finish**] .

9. Wide-Face, Single-Web, Steel Suspension System: Main and cross runners roll formed from cold-rolled steel sheet electrolytically zinc coated, with prefinished flanges of width indicated.

a. Structural Classification: Heavy-duty system.
b. Face Finish: Painted [**white**][**black**] .

10. Wide-Face, Capped, Double-Web, Stainless Steel Suspension System: Main and cross runners roll formed from Type 304 or 316 stainless steel sheet, with prefinished **15/16-inch- (24-mm-)** wide, stainless steel caps on flanges.

a. Structural Classification: Intermediate-duty system.
b. Face Design: Flat, flush.

11. Narrow-Face, Single-Web, Extruded-Aluminum Suspension System: Main and cross runners formed from extruded aluminum to produce structural members with **9/16-inch- (15-mm-)** wide faces.

a. Structural Classification: [**Intermediate**][**Heavy**] -duty system.
b. Face Design: Screw-slot profile.
c. Face Finish: [**Painted white**][**Satin anodized in accordance with AAMA 611, AA-M12C22A31**] .
d. Reveal Finish: [**Match face finish**][**Painted white**][**Painted black**] .

12. Extra-Wide-Face, Metal Suspension System: Main and cross runners formed from [**extruded aluminum**][**aluminum-capped steel**][**steel-capped steel**]<**Insert description**> to produce structural members with [**1-1/2-inch- (38-mm-)**][**2-inch- (50-mm-)**] wide flanges.

a. Structural Classification: [**Intermediate**][**Heavy**] -duty system.
b. Face Design: Flat, flush.
c. Face Finish: [**Painted white**][**Satin anodized in accordance with AAMA 611, AA-M12C22A31**] .
d. Gasket System: Clean-room type.

C. Metal Edge Moldings and Trim :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Armstrong World Industries**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Cipriani USA**]
d. [**Rockfon; ROCKWOOL International**]
e. [**USG Corporation**]

f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Armstrong World Industries**]
b. [**CertainTeed; SAINT-GOBAIN**]
c. [**Cipriani USA**]
d. [**Rockfon; ROCKWOOL International**]
e. [**USG Corporation**]
f. <**Insert manufacturer's name**>

3. Roll-Formed, Sheet-Metal Edge Moldings and Trim: Type and profile indicated or, if not indicated, manufacturer's standard moldings for edges and penetrations that comply with seismic design requirements; formed from sheet metal of same material, finish, and color as that used for exposed flanges of suspension-system runners.

a. Edge moldings to fit acoustical panel edge details and suspension systems indicated and match width and configuration of exposed runners unless otherwise indicated.
b. For lay-in panels with reveal edge details, provide [**stepped edge molding that forms reveal of same depth and width as that formed between edge of panel and flange at exposed suspension member**]<**Insert description**> .
c. For circular penetrations of ceiling, provide edge moldings fabricated to diameter required to fit penetration exactly.

4. Extruded-Aluminum Edge Moldings and Trim: Where indicated, provide manufacturer's extruded-aluminum edge moldings and trim of profile indicated or referenced by manufacturer's designations, including splice plates, corner pieces, and attachment and other clips, complying with seismic design requirements.
5. Clear Anodic Finish: AAMA 611, AA-M12C22A31, Class II, 0.010 mm or thicker.
6. Baked-Enamel or Powder-Coat Finish: Minimum dry film thickness of **1.5 mils (0.04 mm)**. Comply with ASTM C635/C635M and coating manufacturer's written instructions for cleaning, conversion coating, and applying and baking finish.

2.4 ACCESSORIES

A. Attachment Devices: Size for five times the design load indicated in ASTM C635/C635M, Table 1, "Direct Hung," unless otherwise indicated. [**Comply with seismic design requirements.**]

1. Anchors in Concrete: Anchors of type and material indicated below, with holes or loops for attaching hangers of type indicated and with capability to sustain, without failure, a load equal to [**five**]<**Insert safety factor**> times that imposed by ceiling construction, as determined by testing in accordance with ASTM E488/E488M or ASTM E1512 as applicable, conducted by a qualified testing and inspecting agency.

a. Type: [**Cast-in-place**][**Postinstalled expansion**][**Postinstalled bonded**] anchors.
b. Corrosion Protection, Carbon Steel: Components zinc plated in accordance with ASTM B633, Class SC 1 (mild) service condition.
c. Corrosion Protection, Stainless Steel: Components complying with ASTM F593 and ASTM F594, Group 1 Alloy 304 or 316.
d. Corrosion Protection, Nickel-Copper Alloy: Components fabricated from nickel-copper-alloy rods complying with ASTM B164 for UNS No. N04400 alloy.

2. Power-Actuated Fasteners in Concrete: Fastener system of type suitable for application

indicated, fabricated from corrosion-resistant materials, with clips or other accessory devices for attaching hangers of type indicated and with capability to sustain, without failure, a load equal to [**10**]<**Insert safety factor**> times that imposed by ceiling construction, as determined by testing in accordance with ASTM E1190, conducted by a qualified testing and inspecting agency.

B. Wire Hangers, Braces, and Ties: Provide wires as follows:

1. Zinc-Coated, Carbon-Steel Wire: ASTM A641/A641M, Class 1 zinc coating, soft temper.
2. Stainless Steel Wire: ASTM A580/A580M, Type 304, nonmagnetic.
3. Nickel-Copper-Alloy Wire: ASTM B164, nickel-copper-alloy UNS No. N04400.
4. Size: Wire diameter sufficient for its stress at three times hanger design load (ASTM C635/C635M, Table 1, "Direct Hung") will be less than yield stress of wire, but not less than [**0.106-inch- (2.69-mm-)**][**0.135-inch- (3.5-mm-)**]<**Insert dimension**> diameter wire.

C. Hanger Rods: Mild steel, zinc coated or protected with rust-inhibitive paint.

D. Flat Hangers: Mild steel, zinc coated or protected with rust-inhibitive paint.

E. Angle Hangers: Angles with legs not less than **7/8 inch (22 mm)** wide; formed with **0.04-inch- (1-mm-)** thick, galvanized-steel sheet complying with ASTM A653/A653M, **G90 (Z275)** coating designation; with bolted connections and **5/16-inch- (8-mm-)** diameter bolts.

F. Hold-Down Clips: Manufacturer's standard hold-down.

G. Impact Clips: Manufacturer's standard impact-clip system designed to absorb impact forces against acoustical panels.

H. Seismic Clips: Manufacturer's standard seismic clips designed to secure acoustical panels in place during a seismic event.

I. Seismic Stabilizer Bars: Manufacturer's standard perimeter stabilizers designed to accommodate seismic forces.

J. Seismic Struts: Manufacturer's standard compression struts designed to accommodate seismic forces.

K. Clean-Room Gasket System: Where indicated, provide manufacturer's standard system, including [**manufacturer's standard**][**closed-cell PVC**][**neoprene**][**antimicrobial**] gasket and related adhesives, tapes, seals, and retention clips, designed to seal out foreign material from and maintain positive pressure in clean room.

2.5 ACOUSTICAL SEALANT

A. Acoustical Sealant: As specified in Section 079219 "Acoustical Joint Sealants."

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, including structural framing to which acoustical panel ceilings attach or abut, with Installer present, for compliance with requirements specified in this and other Sections that affect ceiling installation and anchorage and with requirements for installation

tolerances and other conditions affecting performance of acoustical panel ceilings.

B. Examine acoustical panels before installation. Reject acoustical panels that are wet, moisture damaged, or mold damaged.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Measure each ceiling area and establish layout of acoustical panels to balance border widths at opposite edges of each ceiling. Avoid using less-than-half-width panels at borders unless otherwise indicated, and comply with layout shown on reflected ceiling plans.

B. Layout openings for penetrations centered on the penetrating items.

3.3 INSTALLATION OF ACOUSTICAL PANEL CEILINGS

A. Install acoustical panel ceilings in accordance with ASTM C636/C636M [**, seismic design requirements,**] and manufacturer's written instructions.

1. Fire-Rated Assembly: Install fire-rated ceiling systems in accordance with tested fire-rated design.

B. Suspend ceiling hangers from building's structural members and as follows:

1. Install hangers plumb and free from contact with insulation or other objects within ceiling plenum that are not part of supporting structure or of ceiling suspension system.
2. Splay hangers only where required [**and, if permitted with fire-resistance-rated ceilings,**] to miss obstructions; offset resulting horizontal forces by bracing, countersplaying, or other equally effective means.
3. Where width of ducts and other construction within ceiling plenum produces hanger spacings that interfere with location of hangers at spacings required to support standard suspension-system members, install supplemental suspension members and hangers in form of trapezes or equivalent devices.
4. Secure wire hangers to ceiling-suspension members and to supports above with a minimum of three tight turns. Connect hangers directly to structure or to inserts, eye screws, or other devices that are secure and appropriate for substrate and that will not deteriorate or otherwise fail due to age, corrosion, or elevated temperatures.
5. Secure flat, angle, channel, and rod hangers to structure, including intermediate framing members, by attaching to inserts, eye screws, or other devices that are secure and appropriate for both the structure to which hangers are attached and the type of hanger involved. Install hangers in a manner that will not cause them to deteriorate or fail due to age, corrosion, or elevated temperatures.
6. Do not support ceilings directly from permanent metal forms or floor deck. Fasten hangers to cast-in-place hanger inserts, postinstalled mechanical or adhesive anchors, or power-actuated fasteners that extend through forms into concrete.
7. When steel framing does not permit installation of hanger wires at spacing required, install carrying channels or other supplemental support for attachment of hanger wires.
8. Do not attach hangers to steel deck tabs.
9. Do not attach hangers to steel roof deck. Attach hangers to structural members.
10. Space hangers not more than **48 inches (1200 mm)** o.c. along each member supported directly from hangers unless otherwise indicated; provide hangers not more than **8 inches (200 mm)** from ends of each member.
11. Size supplemental suspension members and hangers to support ceiling loads within performance limits established by referenced standards.

C. Secure bracing wires to ceiling suspension members and to supports with a minimum of four tight turns. Suspend bracing from building's structural members as required for hangers, without attaching to permanent metal forms, steel deck, or steel deck tabs. Fasten bracing wires into concrete with cast-in-place or postinstalled anchors.

D. Metal Edge Moldings and Trim: Install edge moldings and trim of type indicated at perimeter of acoustical panel ceiling area and where necessary to conceal edges of acoustical panels.

1. Apply acoustical sealant in a continuous ribbon concealed on back of vertical legs of moldings before they are installed.
2. Screw attach moldings to substrate at intervals not more than **16 inches (400 mm)** o.c. and not more than **3 inches (75 mm)** from ends. Miter corners accurately and connect securely.
3. Do not use exposed fasteners, including pop rivets, on moldings and trim.

E. Install suspension-system runners so they are square and securely interlocked with one another. Remove and replace dented, bent, or kinked members.

F. Install acoustical panels with undamaged edges and fit accurately into suspension-system runners and edge moldings. Scribe and cut panels at borders and penetrations to provide precise fit.

1. Arrange directionally patterned acoustical panels as follows:

   a. As indicated on reflected ceiling plans.
   b. Install panels with pattern running in one direction parallel to [**long**][**short**] axis of space.
   c. Install panels in a basket-weave pattern.

2. For square-edged panels, install panels with edges fully hidden from view by flanges of suspension-system runners and moldings.
3. For reveal-edged panels on suspension-system runners, install panels with bottom of reveal in firm contact with top surface of runner flanges.
4. For reveal-edged panels on suspension-system members with box-shaped flanges, install panels with reveal surfaces in firm contact with suspension-system surfaces and panel faces flush with bottom face of runners.
5. Paint cut edges of panel remaining exposed after installation; match color of exposed panel surfaces using coating recommended in writing for this purpose by acoustical panel manufacturer.
6. Install [**hold-down**][**impact**][**and**][**seismic**] clips in areas indicated; space in accordance with panel manufacturer's written instructions unless otherwise indicated.

   a. Hold-Down Clips: Space [**24 inches (610 mm)**]<**Insert dimension**> o.c. on all cross runners.

7. Install clean-room gasket system in areas indicated, sealing each panel and fixture as recommended by panel manufacturer's written instructions.
8. Protect lighting fixtures and air ducts in accordance with requirements indicated for fire-resistance-rated assembly.

3.4 ERECTION TOLERANCES

A. Suspended Ceilings: Install main and cross runners level to a tolerance of [**1/8 inch in 12 ft. (3 mm in 3.6 m)**]<**Insert dimensions**> , non-cumulative.

B. Metal Edge Moldings and Trim: Install moldings and trim to substrate and level with ceiling suspension system to a tolerance of [**1/8 inch in 12 ft. (3 mm in 3.6 m)**]<**Insert dimensions**> , non-cumulative.

3.5 FIELD QUALITY CONTROL

A. Special Inspections: [**Owner will engage**][**Engage**] a qualified special inspector to perform the following special inspections:

1. Periodic inspection during the installation of suspended ceiling grids in accordance with ASCE/SEI 7.

B. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

C. Perform the following tests and inspections of completed installations of acoustical panel ceiling hangers and anchors and fasteners in successive stages and when installation of ceiling suspension systems on each floor has reached 20 percent completion, but no panels have been installed. Do not proceed with installations of acoustical panel ceiling hangers for the next area until test results for previously completed installations of acoustical panel ceiling hangers show compliance with requirements.

1. Within each test area, testing agency will select one of every 10 power-actuated fasteners and postinstalled anchors used to attach hangers to concrete and will test them for **200 lbf (890 N)** of tension; it will also select one of every two postinstalled anchors used to attach bracing wires to concrete and will test them for **440 bf (1957 N)** of tension.
2. When testing discovers fasteners and anchors that do not comply with requirements, testing agency will test those anchors not previously tested until 20 pass consecutively and then will resume initial testing frequency.
3. Acoustical panel ceiling hangers, anchors, and fasteners will be considered defective if they do not pass tests and inspections.

D. Prepare test and inspection reports.

3.6 CLEANING

A. Clean exposed surfaces of acoustical panel ceilings, including trim, edge moldings, and suspension-system members. Comply with manufacturer's written instructions for cleaning and touchup of minor finish damage.

B. Remove and replace ceiling components that cannot be successfully cleaned and repaired to permanently eliminate evidence of damage.

END OF SECTION 09 51 13 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 51 23 00 - ACOUSTICAL TILE CEILINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Acoustical tiles.
2. Metal suspension system.
3. Metal edge moldings and trim.

B. Related Requirements:

1. Section 095113 "Acoustical Panel Ceilings" for ceilings consisting of mineral-base and glass-fiber-base acoustical panels and exposed suspension systems.
2. Section 095133 "Acoustical Metal Pan Ceilings" for ceilings consisting of metal-pan units with exposed and concealed suspension systems.

C. Products furnished, but not installed under this Section, include anchors, clips, and other ceiling attachment devices to be cast in concrete.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1.3 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
2. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.
3. Environmental Product Declaration (EPD): For each product.
4. Health Product Declaration (HPD): For each product.
5. Environmental Product Declaration (EPD): For each product.
6. Health Product Declaration (HPD): For each product.
7. Environmental Product Declaration (EPD): For each product.
8. Environmental Product Declaration (EPD): For each product.
9. Environmental Product Declaration (EPD): For each product.
10. Third-Party Certifications: For each product.
11. Third-Party-Certified Life-Cycle Assessment: For each product.
12. Health Product Declaration (HPD): For each product.
13. Health Product Declaration (HPD): Provide HPD.
14. Health Product Declaration (HPD): Provide documentation confirming product compliance with

one of the following:

a. Inventory or HPD to at least 0.01 percent by weight, with at least 95 percent assessed using GreenScreen Benchmark assessment.
b. Cradle to Cradle v3 certification with minimum Silver level of Material Health.
c. Living Product Challenge certification indicating achievement of Imperative 09, "Transparent Material Health."

15. Health Product Declaration (HPD): Provide documentation indicating that manufacturer has screened and publicly provided ingredient disclosure to 1000 ppm, and has developed an action plan to mitigate known hazards.
16. Product Data: For adhesives, indicating VOC content.
17. Laboratory Test Reports: For ceiling products, indicating compliance with the VOC emissions evaluation.
18. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.

C. Samples: For each exposed product and for each color and texture specified, **6 inches (150 mm)** in size.

D. Samples for Initial Selection: For components with factory-applied finishes.

E. Samples for Verification: For each component indicated and for each exposed finish required, prepared on Samples of sizes indicated below:

1. Acoustical Tiles: Set of full-size Samples of each type, color, pattern, and texture.
2. Concealed Suspension-System Members: [**6-inch- (150-mm-)**]<**Insert dimension**> long Sample of each type.
3. Exposed Moldings and Trim: Set of [**6-inch- (150-mm-)**]<**Insert dimension**> long Samples of each type and color.
4. Seismic Clips: Full size.

F. Delegated Design Submittals: For seismic restraints for ceiling systems.

1. Include design calculations for seismic restraints including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Reflected ceiling plans, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Ceiling suspension-system members.
2. Structural members to which suspension systems will be attached.
3. Method of attaching hangers to building structure.

a. Furnish layouts for cast-in-place anchors, clips, and other ceiling attachment devices whose installation is specified in other Sections.

4. Carrying channels or other supplemental support for hanger-wire attachment where conditions do not permit installation of hanger wires at required spacing.
5. Size and location of initial access modules for acoustical tile.
6. Items penetrating finished ceiling and ceiling-mounted items including the following:

a. Lighting fixtures.
b. Diffusers.
c. Grilles.
d. Speakers.
e. Sprinklers.
f. Access panels.
g. Perimeter moldings.
h. <**Insert item**>.

7. Show operation of hinged and sliding components adjacent to acoustical tiles.
8. Minimum Drawing Scale: [**1/4 inch = 1 foot (1:48)**][**1/8 inch = 1 foot (1:96)**][**1:50**][**1:100**]<**Insert scale**>.

B. Qualification Data: For testing agency.

C. Product Test Reports: For each acoustical tile ceiling, for tests performed by [**manufacturer and witnessed by a qualified testing agency**][**a qualified testing agency**].

D. Evaluation Reports: For each acoustical tile ceiling suspension system[**and anchor and fastener type**], from ICC-ES.

E. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Data: For finishes to include in maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials[**, from the same production run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Acoustical Ceiling Units: Full-size tiles equal to [**2**]<**Insert number**> percent of quantity installed.
2. Suspension-System Components: Quantity of each concealed grid and exposed component equal to [**2**]<**Insert number**> percent of quantity installed.

1.7 QUALITY ASSURANCE

A. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.

1. Build mockup of typical ceiling area as indicated on Drawings.
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Deliver acoustical tiles, suspension-system components, and accessories to Project site and store them in a fully enclosed, conditioned space where they will be protected against damage from moisture,

humidity, temperature extremes, direct sunlight, surface contamination, and other causes.

B. Before installing acoustical tiles, permit them to reach room temperature and a stabilized moisture content.

1.9 FIELD CONDITIONS

A. Environmental Limitations: Do not install acoustical tile ceilings until spaces are enclosed and weathertight, wet-work in spaces is complete and dry, work above ceilings is complete, and ambient temperature and humidity conditions are maintained at the levels indicated for Project when occupied for its intended use.

1. Pressurized Plenums: Operate ventilation system for not less than 48 hours before beginning acoustical tile ceiling installation.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Source Limitations for Suspended Acoustical Tile Ceiling System: Obtain each type of acoustical ceiling tile and its suspension system from single source from single manufacturer.

B. Source Limitations for Directly Attached Acoustical Tile Ceiling Tile: Obtain each type of acoustical ceiling tile from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Verify ceiling products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

B. Verify ceiling products comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.

C. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design seismic restraints for ceiling systems.

D. Seismic Performance: Suspended ceilings to withstand the effects of earthquake motions determined in accordance with [**ASCE/SEI 7**]<**Insert requirement**>.

E. Surface-Burning Characteristics: Comply with ASTM E84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame-Spread Index: Class [**A**][**B**][**C**] in accordance with ASTM E1264.
2. Smoke-Developed Index: [**50**][**450**]<**Insert value**> or less.

F. Fire-Resistance Ratings: Comply with ASTM E119; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Indicate design designations from UL or from the listings of another qualified testing agency.

2.3 ACOUSTICAL TILES

A. Acoustical Tiles :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Armstrong World Industries, Inc**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Rockfon; ROCKWOOL International**]
    d. [**USG Corporation**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Armstrong World Industries, Inc**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Rockfon; ROCKWOOL International**]
    d. [**USG Corporation**]
    e. <**Insert manufacturer's name**>

3. Acoustical Tile Standard: Provide manufacturer's standard tiles of configuration indicated that comply with ASTM E1264 classifications as designated by type, form, pattern, acoustical rating, and light reflectance unless otherwise indicated.
4. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert number**> percent.
5. Classification: Provide[**fire-resistance-rated**] tiles as follows:

    a. Type and Form, Type III: Mineral base with painted finish; [**Form 1, nodular**][**Form 2, water felted**][**Form 4, cast or molded**].
    b. Type and Form: <**Insert type and form**>.
    c. Pattern: [**C (perforated, small holes)**][**CD (perforated, small holes and fissured)**][**CE (perforated, small holes and lightly textured)**][**D (fissured)**][**E (lightly textured)**][**F (heavily textured)**][**G (smooth)**][**I (embossed)**][**J (embossed-in-register)**][**and**][**as indicated by manufacturer's designation**]<**Insert pattern**>.

6. Color: [**White**][**As selected from manufacturer's full range**][**Match Architect's sample**][**As indicated by manufacturer's designation**][**As indicated on Drawings**][**As indicated in a schedule**]<**Insert color**>.
7. Light Reflectance (LR): Not less than [**LR indicated in a schedule**][**0.65**][**0.70**][**0.75**][**0.80**]<**Insert LR**>.
8. Ceiling Attenuation Class (CAC): Not less than [**CAC indicated in a schedule**][**20**][**25**][**30**][**35**][**40**]<**Insert CAC**>.
9. Noise Reduction Coefficient (NRC): Not less than [**NRC indicated in a schedule**][**0.50**][**0.55**][**0.60**][**0.65**][**0.70**]<**Insert NRC**>.
10. Articulation Class (AC): Not less than [**AC indicated in a schedule**][**170**][**180**][**190**][**200**][**210**]<**Insert AC**>.
11. Edge/Joint Detail: [**Square, kerfed, and rabbeted; tongue and grooved; or butt**][**Beveled, kerfed, and rabbeted; tongue and grooved; or butt**][**Beveled, kerfed, and rabbeted long**

edges and square, butt on short edges][**As indicated by manufacturer's designation**]<**Insert requirement**>.

12. Thickness: [**5/8 inch (15 mm)**][**3/4 inch (19 mm)**][**As indicated on Drawings**][**As indicated in a schedule**]<**Insert thickness**>.
13. Modular Size: [**12 by 12 inches (305 by 305 mm)**][**300 by 300 mm**][**As indicated on Drawings**][**As indicated in a schedule**]<**Insert size**>.
14. Antimicrobial Treatment: Manufacturer's standard broad spectrum, antimicrobial formulation that inhibits fungus, mold, mildew, and gram-positive and gram-negative bacteria and showing no mold, mildew, or bacterial growth when tested in accordance with ASTM D3273, ASTM D3274, or ASTM G21 and evaluated in accordance with ASTM D3274 or ASTM G21.

2.4 METAL SUSPENSION SYSTEM

A. Concealed or Semi-Exposed Metal Suspension System :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Armstrong Ceiling & Wall Solutions**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Rockfon; ROCKWOOL International**]
    d. [**USG Corporation**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Armstrong Ceiling & Wall Solutions**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Rockfon; ROCKWOOL International**]
    d. [**USG Corporation**]
    e. <**Insert manufacturer's name**>

3. Metal Suspension-System Standard: Provide manufacturer's standard, direct-hung, fully concealed, metal suspension system and accessories of type, structural classification, and finish indicated that complies with applicable requirements in ASTM C635/C635M.

    a. High-Humidity Finish: Where indicated, provide coating tested and classified for "severe environment performance" in accordance with ASTM C635/C635M.

4. Direct-Hung, Double-Web Suspension System: Main and cross runners roll formed from and capped with cold-rolled steel sheet, prepainted, electrolytically zinc coated, or hot-dip galvanized, **G30 (Z90)** coating designation.

    a. Fire Rating: [**As indicated on Drawings**]<**Insert fire rating**>.
    b. Structural Classification: [**Intermediate**][**Heavy**]-duty system.
    c. Access: [**Upward**][**Downward**] and [**end pivoted**][**or**][**side pivoted**], with initial access openings of size indicated below and located throughout ceiling within each module formed by main and cross runners, with additional access available by progressively removing remaining acoustical tiles.

1) Initial Access Opening: In each module, [**24 by 24 inches (610 by 610 mm)**][**As indicated on Drawings**]<**Insert requirements**>.

2.5 ACCESSORIES

A. Attachment Devices: Size for five times the design load indicated in ASTM C635/C635M, Table 1, "Direct Hung," unless otherwise indicated. Comply with seismic design requirements.

1. Anchors in Concrete: Anchors of type and material indicated below, with holes or loops for attaching hangers of type indicated and with capability to sustain, without failure, a load equal to [**five**]<**Insert safety factor**> times that imposed by ceiling construction, as determined by testing in accordance with ASTM E488/E488M or ASTM E1512 as applicable, conducted by a qualified testing and inspecting agency.

a. Type: [**Cast-in-place**][**Postinstalled expansion**][**Postinstalled bonded**] anchors.
b. Corrosion Protection, Carbon Steel: Components zinc plated in accordance with ASTM B633, Class SC 1 (mild) service condition.
c. Corrosion Protection, Stainless Steel: Components complying with ASTM F593 and ASTM F594, Group 1 Alloy 304 or 316.

2. Power-Actuated Fasteners in Concrete: Fastener system of type suitable for application indicated, fabricated from corrosion-resistant materials, with clips or other accessory devices for attaching hangers of type indicated, and with capability to sustain, without failure, a load equal to [**10**]<**Insert safety factor**> times that imposed by ceiling construction, as determined by testing in accordance with ASTM E1190, conducted by a qualified testing and inspecting agency.

B. Wire Hangers, Braces, and Ties: Provide wires as follows:

1. Zinc-Coated, Carbon-Steel Wire: ASTM A641/A641M, Class 1 zinc coating, soft temper.
2. Stainless Steel Wire: ASTM A580/A580M, Type 304, nonmagnetic.
3. Size: Wire diameter sufficient for its stress at three times hanger design load (ASTM C635/C635M, Table 1, "Direct Hung") will be less than yield stress of wire, but not less than [**0.106-inch- (2.69-mm-)**][**0.135-inch- (3.5-mm-)**]<**Insert dimension**> diameter wire.

C. Hanger Rods: Mild steel, zinc coated or protected with rust-inhibitive paint.

D. Flat Hangers: Mild steel, zinc coated or protected with rust-inhibitive paint.

E. Angle Hangers: Angles with legs not less than **7/8 inch (22 mm)** wide; formed with **0.04-inch- (1-mm-)** thick, galvanized-steel sheet complying with ASTM A653/A653M, **G90 (Z275)** coating designation; with bolted connections and **5/16-inch- (8-mm-)** diameter bolts.

F. Seismic Stabilizer Bars: Manufacturer's standard perimeter stabilizers designed to accommodate seismic forces.

G. Seismic Struts: Manufacturer's standard compression struts designed to accommodate lateral forces.

H. Seismic Clips: Manufacturer's standard seismic clips designed to secure acoustical tiles in-place during a seismic event.

2.6 METAL EDGE MOLDINGS AND TRIM

A. Metal Edge Moldings and Trim :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Armstrong Ceiling & Wall Solutions**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Rockfon; ROCKWOOL International**]
    d. [**USG Corporation**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Armstrong Ceiling & Wall Solutions**]
    b. [**CertainTeed; SAINT-GOBAIN**]
    c. [**Rockfon; ROCKWOOL International**]
    d. [**USG Corporation**]
    e. <**Insert manufacturer's name**>

3. Roll-Formed, Sheet-Metal Edge Moldings and Trim: Type and profile indicated or, if not indicated, manufacturer's standard moldings for edges and penetrations complying with seismic design requirements; formed from sheet metal of same material, finish, and color as that used for of suspension-system runners.

    a. Edge moldings to fit acoustical panel edge details and suspension systems indicated and match width and configuration of exposed runners unless otherwise indicated.
    b. For lay-in panels with reveal edge details, provide [**stepped edge molding that forms reveal of same depth and width as that formed between edge of panel and flange at exposed suspension member**]<**Insert description**>.
    c. For circular penetrations of ceiling, provide edge moldings fabricated to diameter required to fit penetration exactly.
    d. Finish: [**Painted white**][**Painted in color as selected from manufacturer's full range**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of acoustical unit**]<**Insert finish**>.

4. Extruded-Aluminum Edge Moldings and Trim: Where indicated, provide manufacturer's extruded-aluminum edge moldings and trim of profile indicated or referenced by manufacturer's designations, including splice plates, corner pieces, and attachment and other clips, complying with seismic design requirements.

    a. Clear Anodic Finish: AAMA 611, AA-M12C22A31, Class II, 0.010 mm or thicker.
    b. Baked-Enamel or Powder-Coat Finish: Minimum dry film thickness of **1.5 mils (0.04 mm)**. Comply with ASTM C635/C635M and coating manufacturer's written instructions for cleaning, conversion coating, and applying and baking finish.

2.7 ACOUSTICAL SEALANT

A. Acoustical Sealant: As specified in Section 079219 "Acoustical Joint Sealants."

2.8 MISCELLANEOUS MATERIALS

A. Acoustical Tile Adhesive: Type recommended in writing by acoustical tile manufacturer, bearing UL label for Class 0-25 flame spread.

1. Verify adhesives have a VOC content of [**50**]<**Insert number**> g/L or less.

B. Staples: **5/16-inch-** **(8-mm-)** long, divergent-point staples.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, including structural framing and substrates to which acoustical tile ceilings attach or abut, with Installer present, for compliance with requirements specified in this and other Sections that affect ceiling installation and anchorage and for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Examine acoustical tiles before installation. Reject acoustical tiles that are wet, moisture damaged, or mold damaged.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Testing Substrates: Before adhesively bonding tiles to wet-placed substrates such as cast-in-place concrete or plaster, test and verify that moisture level is below tile manufacturer's recommended limits.

B. Measure each ceiling area and establish layout of acoustical tiles to balance border widths at opposite edges of each ceiling. Avoid using less-than-half-width tiles at borders unless otherwise indicated, and comply with layout shown on reflected ceiling plans.

C. Layout openings for penetrations centered on the penetrating items.

3.3 INSTALLATION OF SUSPENDED ACOUSTICAL TILE CEILINGS

A. Install suspended acoustical tile ceilings in accordance with ASTM C636/C636M[**, seismic design requirements,**] and manufacturer's written instructions.

1. Fire-Rated Assembly: Install fire-rated ceiling systems in accordance with tested fire-rated design.

B. Suspend ceiling hangers from building's structural members and as follows:

1. Install hangers plumb and free from contact with insulation or other objects within ceiling plenum that are not part of supporting structure or of ceiling suspension system.
2. Splay hangers only where required[**and, if permitted with fire-resistance-rated ceilings,**] to miss obstructions; offset resulting horizontal forces by bracing, countersplaying, or other equally effective means.
3. Where width of ducts and other construction within ceiling plenum produces hanger spacings that interfere with location of hangers at spacings required to support standard suspension-system members, install supplemental suspension members and hangers in form of trapezes or

equivalent devices.

4. Secure wire hangers to ceiling suspension members and to supports above with a minimum of three tight turns. Connect hangers directly to structure or to inserts, eye screws, or other devices that are secure and appropriate for substrate and that will not deteriorate or otherwise fail due to age, corrosion, or elevated temperatures.
5. Secure flat, angle, channel, and rod hangers to structure, including intermediate framing members, by attaching to inserts, eye screws, or other devices that are secure and appropriate for both the structure to which hangers are attached and the type of hanger involved. Install hangers in a manner that will not cause them to deteriorate or fail due to age, corrosion, or elevated temperatures.
6. Do not support ceilings directly from permanent metal forms or floor deck. Fasten hangers to cast-in-place hanger inserts, postinstalled mechanical or adhesive anchors, or power-actuated fasteners that extend through forms into concrete.
7. When steel framing does not permit installation of hanger wires at spacing required, install carrying channels or other supplemental support for attachment of hanger wires.
8. Do not attach hangers to steel deck tabs.
9. Do not attach hangers to steel roof deck. Attach hangers to structural members.
10. Space hangers not more than **48 inches (1200 mm)** o.c. along each member supported directly from hangers unless otherwise indicated; provide hangers not more than **8 inches (200 mm)** from ends of each member.
11. Size supplemental suspension members and hangers to support ceiling loads within performance limits established by referenced standards.

C. Secure bracing wires to ceiling suspension members and to supports with a minimum of four tight turns. Suspend bracing from building's structural members as required for hangers without attaching to permanent metal forms, steel deck, or steel deck tabs. Fasten bracing wires into concrete with cast-in-place or postinstalled anchors.

D. Install edge moldings and trim of type indicated at perimeter of acoustical ceiling area and where necessary to conceal edges of acoustical tiles.

1. Apply acoustical sealant in a continuous ribbon concealed on back of vertical legs of moldings before they are installed.
2. Screw attach moldings to substrate at intervals not more than **16 inches (400 mm)** o.c. and not more than **3 inches (75 mm)** from ends. Miter corners accurately and connect securely.
3. Do not use exposed fasteners, including pop rivets, on moldings and trim.

E. Install suspension-system runners so they are square and securely interlocked with one another. Remove and replace dented, bent, or kinked members.

F. Arrange directionally patterned acoustical tiles as follows:

1. As indicated on reflected ceiling plans.
2. Install tiles with pattern running in one direction parallel to [**long**][**short**] axis of space.
3. Install tiles in a basket-weave pattern.

G. Install acoustical tiles in coordination with suspension system and exposed moldings and trim. Place splines or suspension-system flanges into kerfed edges of tiles so tile-to-tile joints are interlocked.

1. Fit adjoining tiles to form flush, tight joints. Scribe and cut tiles for accurate fit at borders and around penetrations through ceiling.
2. Hold tile field in compression by inserting leaf-type, spring-steel spacers between tiles and moldings, spaced **12 inches (305 mm)** o.c.
3. Protect lighting fixtures and air ducts in accordance with requirements indicated for fire-resistance-rated assembly.

3.4 INSTALLATION OF DIRECTLY ATTACHED ACOUSTICAL TILE CEILINGS

A. Adhesive Installation: Install acoustical tile by bonding to substrate, using acoustical tile adhesive and procedure recommended in writing by tile manufacturer and as follows:

1. Wipe and prime ceiling.
2. Remove loose dust from backs of tiles by brushing.
3. Install splines in joints between tiles and maintain bottom surface to a uniform level. Shim tile or correct substrate as required to maintain levelness.
4. Maintain tight butt joints, aligned in both directions and coordinated with ceiling fixtures.

B. Stapled Installation: Fasten acoustical tile to substrate using a minimum of two staples per tile that are installed in flanges of tile and as follows:

1. Form double-lapped joint between tiles by securely pressing tile tongues into corresponding tile grooves.
2. Maintain bottom surface of tiles to a uniform level. Shim tile or correct substrate as required to maintain levelness.
3. Maintain tight butt joints, aligned in both directions and coordinated with ceiling fixtures.

C. Install edge moldings and trim of type indicated at perimeter of acoustical tile ceiling area and where necessary to conceal edges of acoustical units.

D. Arrange directionally patterned acoustical tiles [**as indicated on Drawings**][**with pattern running in one direction parallel to long axis of space**][**with pattern running in one direction parallel to short axis of space**][**in a basket-weave pattern**]<**Insert requirement**>.

3.5 ERECTION TOLERANCES

A. Suspended Ceilings: Install main and cross runners level to a tolerance of [**1/8 inch in 12 feet (3 mm in 3.6 m)**]<**Insert dimensions**>, non-cumulative.

B. Directly Attached Ceilings: Install bottom surface of tiles to a tolerance of [**1/8 inch in 12 feet (3 mm in 3.6 m) and not exceeding 1/4 inch (6 mm) cumulatively**]<**Insert requirement**>.

C. Moldings and Trim: Install moldings and trim to substrate and level with ceiling suspension system to a tolerance of [**1/8 inch in 12 feet (3 mm in 3.6 m)**]<**Insert dimensions**>, non-cumulative.

3.6 FIELD QUALITY CONTROL

A. Special Inspections: [**Owner will engage**][**Engage**] a qualified special inspector to perform the following special inspections:

1. Periodic inspection during the installation of suspended ceiling grids in accordance with ASCE/SEI 7.

B. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

C. Perform the following tests and inspections of completed installations of acoustical tile ceiling hangers and anchors and fasteners in successive stages and when installation of ceiling suspension systems on each floor has reached 20 percent completion, but no tiles have been installed. Do not proceed with installations of acoustical tile ceiling hangers for the next area until test results for previously completed

installations of acoustical tile ceiling hangers show compliance with requirements.

1. Within each test area, testing agency will select one of every 10 power-actuated fasteners and postinstalled anchors used to attach hangers to concrete and will test them for **200 lbf (890 N)** of tension; it will also select one of every two postinstalled anchors used to attach bracing wires to concrete and will test them for **440 lbf (1957 N)** of tension.
2. When testing discovers fasteners and anchors that do not comply with requirements, testing agency will test those anchors not previously tested until 20 pass consecutively and then will resume initial testing frequency.

D. Acoustical tile ceiling hangers, anchors, and fasteners will be considered defective if they do not pass tests and inspections.

E. Prepare test and inspection reports.

3.7 ADJUSTING

A. Clean exposed surfaces of acoustical tile ceilings, including trim and edge moldings. Comply with manufacturer's written instructions for cleaning and touchup of minor finish damage.

B. Remove and replace tiles and other ceiling components that cannot be successfully cleaned and repaired to permanently eliminate evidence of damage.

END OF SECTION 09 51 23 00

SECTION 09 51 33 00 - ACOUSTICAL METAL PAN CEILINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Aluminum pans for acoustical metal pan ceiling.
2. Steel pans for acoustical metal pan ceiling.
3. Stainless steel pans for acoustical metal pan ceiling.
4. Metal suspension system for acoustical, standard-grid metal pan ceilings.
5. Metal suspension system for acoustical, snap-in metal pan ceilings.

B. Related Requirements:

1. Section 079219 "Acoustical Joint Sealants" for acoustical sealant for exposed and concealed joints.
2. Section 095113 "Acoustical Panel Ceilings" for ceilings consisting of mineral-base and glass-fiber-base acoustical panels and exposed suspension systems.
3. Section 095123 "Acoustical Tile Ceilings" for ceilings consisting of mineral-base acoustical tiles used with concealed suspension systems, stapling, or adhesive bonding.
4. Section 095423 "Linear Metal Ceilings."
5. Section 095436 "Suspended Decorative Grids."
6. Section 095753 "Security Ceiling Assemblies" for downward-locking panel and plank ceilings for use in security or detention facilities.

C. Products furnished, but not installed, under this Section include anchors, clips, and other ceiling attachment devices to be cast in concrete.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product. Include procedure for cutting metal pans.

1. Aluminum pans for acoustical metal pan ceiling.
2. Steel pans for acoustical metal pan ceiling.
3. Stainless steel pans for acoustical metal pan ceiling.
4. Metal suspension system for acoustical, standard-grid metal pan ceilings.
5. Metal suspension system for acoustical, snap-in metal pan ceilings.

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
2. Product Data: For adhesives and sealants, indicating VOC content.
3. Laboratory Test Reports: For adhesives and sealants, indicating compliance with requirements

for low-emitting materials.

4. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
5. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
6. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
7. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
8. Laboratory Test Reports: For Insulation, indicating compliance with requirements for low-emitting materials.
9. Laboratory Test Reports: For insulation, indicating compliance with requirements for low-emitting materials.
10. Laboratory Test Reports: For insulation, indicating compliance with requirements for low-emitting materials.
11. Laboratory Test Reports: For insulation, indicating compliance with requirements for low-emitting materials.
12. Product Certificates: For regional materials, indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each regional material.
13. Product Certificates: For indigenous materials, indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include distance to Project, means of transportation, and cost for each indigenous material.
14. Environmental Product Declaration: For each product.
15. Health Product Declaration: For each product.
16. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
17. Environmental Product Declaration: For each product.
18. Environmental Product Declaration: For each product.
19. Environmental Product Declaration: For each product.
20. Third-Party Certifications: For each product.
21. Third-Party Certified Life Cycle Assessment: For each product.

C. Samples: For each exposed product and for each color and texture specified, **6 inches (150 mm)** in size.

D. Samples for Initial Selection: For units with factory-applied finishes.

E. Samples for Verification: For each component indicated and for each exposed finish required, prepared on Samples of size indicated below:

1. Metal Pans: Set of [**full-size**][**6-inch- (150-mm-) square**] Samples of each type, finish, color, pattern, and texture. Show pan edge profile.
2. Exposed Suspension-System Members, Moldings, and Trim: Set of **6-inch- (150-mm-)** long Samples of each type, finish, and color.
3. Sound Absorber: Sample of each type matching size of Sample metal pan.

F. Delegated Design Submittals: For design of [**seismic restraints and**]attachment devices.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Reflected ceiling plans, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Suspended ceiling components.

2. Structural members to which suspension systems will be attached.
3. Size and location of access modules for acoustical panels.
4. Items penetrating finished ceiling including the following:

    a. Lighting fixtures.
    b. Air outlets and inlets.
    c. Speakers.
    d. Sprinklers.
    e. Access panels.
    f. <**Insert item**>.

5. Perimeter moldings.

B. Qualification Data: For testing agency.

C. Product Test Reports: For each acoustical metal pan ceiling, for tests performed by [**manufacturer and witnessed by a qualified testing agency**][**a qualified testing agency**].

D. Evaluation Reports: For each acoustical metal pan ceiling suspension system[**and anchor and fastener type**].

E. Field quality-control reports.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Data: For finishes to include in maintenance manuals.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Acoustical Metal Pans: Full-size units[**with sound absorber**] equal to [**2**]<**Insert number**> percent of quantity installed.
2. Suspension-System Components: Quantity of each grid, exposed molding, and trim equal to [**2**]<**Insert number**> percent of quantity installed.
3. Hold-Down Clips: [**Equal to 2 percent of quantity installed**]<**Insert number**>.

1.7 QUALITY ASSURANCE

A. Testing Agency Qualifications: Qualified according to NVLAP for testing indicated.

B. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.

1. Build mockup of typical ceiling area as indicated on Drawings.
2. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Deliver acoustical metal pans, suspension-system components, and accessories to Project site in original, unopened packages and store them in a fully enclosed, conditioned space where they are protected against damage from moisture, humidity, temperature extremes, direct sunlight, surface contamination, and other causes.

B. Handle acoustical metal pans, suspension-system components, and accessories carefully to avoid damaging units and finishes in any way.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design [**seismic restraints and**]attachment devices.

B. Surface-Burning Characteristics: Comply with ASTM E84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame-Spread Index: Comply with ASTM E1264 for [**Class A**][**Class B**][**Class C**] materials.
2. Smoke-Developed Index: [**50**][**450**]<**Insert value**> or less.

2.2 ACOUSTICAL METAL PANS, GENERAL

A. Source Limitations: Obtain each type of acoustical metal ceiling pan and supporting suspension system from single source from single manufacturer.

B. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled content not less than [**25**]<**Insert value**> percent.

C. Recycled Content of Aluminum Components: Postconsumer recycled content plus one-half of preconsumer recycled content not less than [**25**][**50**]<**Insert value**> percent.

D. Recycled Content of Insulation: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert value**> percent.

E. Insulation shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

F. Insulation shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

G. Insulation shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less, except for insulation manufactured without formaldehyde.

H. Insulation shall comply with the requirements of the California Department of Public Health's "Standard

Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

I. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site.

J. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site.

K. Regional Materials: Products shall be manufactured within **100 miles (160 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **100 miles (160 km)** of Project site.

L. Indigenous Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site. If materials are transported by rail or water, the distance transported by rail or water shall be multiplied by 0.25 to determine the distance to Project site.

M. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site. If materials are transported by rail or water, the distance transported by rail or water shall be multiplied by 0.25 to determine the distance to Project site.

N. Acoustical Panel Standard: Provide manufacturer's standard pans of configuration indicated that comply with ASTM E1264 classifications as designated by types, patterns, acoustical ratings, and light reflectances unless otherwise indicated.

1. Mounting Method for Measuring NRC: Type E-400; plenum mounting in which face of test specimen is **15-3/4 inches (400 mm)** away from test surface in accordance with ASTM E795.

O. Sheet Metal Characteristics: For metal components exposed to view in the completed Work, provide materials with smooth, flat surfaces without blemishes. Do not use materials with exposed pitting, seam marks, roller marks, roughness, stains, or discolorations.

1. Aluminum Sheet: Rolled aluminum sheet, complying with **ASTM B209 (ASTM B209M)**; alloy and temper recommended by aluminum producer and finisher for type of use and finish indicated.
2. Steel Sheet: Commercial-quality, cold-rolled, carbon-steel sheet; stretcher leveled; with protective coating complying with ASTM C635/C635M.

    a. Painted Finishes: Electrolytic zinc-coated steel complying with ASTM A879/A879M, **13Z (40G)** coating, surface treatment as recommended by finish manufacturer for type of use and finish indicated.
    b. Chemical/Mechanical Finishes: Uncoated steel sheet complying with ASTM A1008/A1008M with luster or bright finish as required by finisher for applying electroplating or other metallic-finishing processes.

3. Stainless Steel Sheet: Complying with ASTM A240/A240M or ASTM A666, [**Type 304**][**Type 430**]<**Insert type**>.

P. Sound-Absorbent Fabric Layer: Provide fabric layer, sized to fit concealed surface of pan, and consisting of black, nonwoven, nonflammable, sound-absorbent material with surface-burning characteristics for flame-spread index of 25 or less and smoke-developed index of 50 or less, as determined by testing in accordance with ASTM E84.

1. Bond fabric layer to panels in the factory with manufacturer's standard nonflammable adhesive.

Q. Sound-Absorbent Pads: Provide width and length to completely fill concealed surface of pan, with surface-burning characteristics for flame-spread index of 25 or less and smoke-developed index of 50 or less, as determined by testing in accordance with ASTM E84, and to comply with the following requirements:

1. Plastic Sheet-Wrapped, Mineral-Fiber Insulation: Pads consisting of nonrigid, PVC plastic sheet encapsulating unfaced mineral-fiber insulation complying with ASTM C553, Type I, Type II, or Type III, and as follows:

   a. Mineral-Fiber Type and Thickness: Glass fiber; [**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**3 inches (76 mm)**]<**Insert dimension**>.
   b. Mineral-Fiber Density: [**3/4 lb/cu. ft. (12 kg/cu. m)**][**1 lb/cu. ft. (16 kg/cu. m)**][**1-1/2 lb/cu. ft. (24 kg/cu. m)**]<**Insert value**>.
   c. Plastic Sheet Thickness and Color: Not less than **0.003 inch (0.076 mm)**; [**clear**][**flat black**][**white**].

2. Unwrapped, Glass-Fiber Insulation: Black coated, unfaced, complying with ASTM C553, Type I, Type II, or Type III; treated to be nondusting; [**1 inch (25 mm)**][**1-1/2 inches (38 mm)**]<**Insert dimension**> thick.
3. Spacer Grids: Provide manufacturer's standard [**aluminum**][**galvanized-steel**] grid units that provide an air cushion between metal pans and insulation pads and that act to improve sound absorption.

R. Sound Attenuation Panels: Provide manufacturer's standard [**aluminum**][**galvanized-steel**] unperforated metal backing unit that acts as a sound attenuation pan to reduce sound travel through ceiling plenum into adjoining rooms.

1. Sound-Absorbent Pads: Provide secondary sound-absorbent pads, [**same as specified for primary sound-absorbent pads**]<**Insert requirements**>, for placement over sound attenuation pan to reduce plenum sound.

S. Adhesive: Manufacturer's standard nonflammable adhesive for sound-absorbent [**fabric**][**and**][**pads**].

1. Adhesives shall have a VOC content of [**70**]<**Insert value**> g/L or less.
2. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
4. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
5. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
6. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit, or 33 mcg/cu. m, and that of acetaldehyde shall not exceed 9 mcg/cu. m.

2.3 ALUMINUM PANS FOR ACOUSTICAL METAL PAN CEILING

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American Decorative Ceilings, Inc.**]
2. [**Armstrong Ceiling & Wall Solutions**]
3. [**CertainTeed; SAINT-GOBAIN**]
4. [**Gage Corporation International (The)**]
5. [**Lindner Group**]
6. [**Rockfon; ROCKWOOL International**]
7. [**USG Corporation**]
8. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American Decorative Ceilings, Inc.**]
2. [**Armstrong Ceiling & Wall Solutions**]
3. [**CertainTeed; SAINT-GOBAIN**]
4. [**Gage Corporation International (The)**]
5. [**Lindner Group**]
6. [**Rockfon; ROCKWOOL International**]
7. [**USG Corporation**]
8. <**Insert manufacturer's name**>

C. Classification: Units complying with ASTM E1264 for [**Type VII, perforated aluminum facing (pan) with mineral- or glass-fiber-base backing**][**Type XX, other types described as perforated aluminum facing (pan) units with sound-absorbent fabric backing**][**Type XX, other types described as unperforated aluminum facing (pan) units**]<**Insert Type XX description**>.

1. Pattern A: Perforated, regularly spaced large holes, arranged in [**diagonal**][**parallel**] alignment to pan edge with uniform perforations of dimension, holes per square foot or inch, and percent open area as [**indicated by product designation**][**selected from manufacturer's full range**].
2. Pattern B: Perforated, small holes regularly spaced, with uniform perforations of dimension, holes per square foot or inch, and percent open area as [**specified by product designation**][**selected from manufacturer's full range**].
3. Pattern: <**Insert pattern designation for perforated pans and any requirements for perforation alignment, hole shape and size, holes per square foot or inch, percent open area, and border requirements**>.

D. Pan Fabrication: Manufacturer's standard units of size, profile, and edge treatment indicated, formed from metal indicated and finished to comply with requirements indicated.

1. Lay-in Pans: Formed to set in exposed suspension grid.
2. Clip-in Pans: Designed to clip in and be securely retained in exposed suspension grid by formed edges or accessory clips provided by manufacturer.
3. Snap-in Pans: Designed with dimples or continuous beads on flanges for snap-in, secure engagement with concealed suspension system.
4. Torsion-Spring-Hinged Pans: Designed to be securely retained in preslotted, exposed suspension grid by torsion springs provided by manufacturer.
5. <**Insert type and description**>.

E. Pan Thickness: Not less than [**0.019 inch (0.5 mm)**][**0.025 inch (0.6 mm)**][**0.032 inch (0.8 mm)**][**0.040 inch (1.0 mm)**]<**Insert dimension**>.

F. Pan Edge Detail: [**Square**][**Beveled**][**Reveal**][**Manufacturer's standard edge detail**].

G. Pan Joint Detail: [**Butt**][**Wide reveal, not less than 15/16 inch (24 mm) wide**][**Narrow reveal, not greater than 9/16 inch (15 mm) wide**][**Flush narrow reveal, not greater than 9/16 inch (15 mm) wide**]<**Insert description**>.

H. Pan Size: [**12 by 12 inches (305 by 305 mm)**][**12 by 24 inches (305 by 610 mm)**][**12 by 36 inches (305 by 915 mm)**][**24 by 24 inches (610 by 610 mm)**][**24 by 48 inches (610 by 1220 mm)**][**24 by 60 inches (610 by 1525 mm)**][**30 by 30 inches (760 by 760 mm)**][**30 by 60 inches (760 by 1525 mm)**][**As indicated on Drawings**]<**Insert dimensions**>.

I. Scoring: Score pans at intervals to appear as [**12-by-12-inch (305-by-305-mm)**]<**Insert dimensions**> ceiling units.

J. Pan Face Finish: [**Mill**][**Lacquered mill**][**Clear anodized**][**Clear mirror anodized**][**Painted white**][**Painted to match color indicated by product designation**][**Painted to match Architect's sample**][**Painted in color selected from manufacturer's full range**][**Bright-reflective metallic finish selected from manufacturer's full range**]<**Insert finish**>.

K. Light Reflectance Coefficient: Not less than [**0.70**][**0.75**]<**Insert number**>.

L. NRC: Not less than [**0.60**][**0.65**][**0.70**][**0.75**][**0.80**][**0.85**][**0.90**][**0.95**]<**Insert number**>.

M. Ceiling Attenuation Class: Not less than [**35**][**40**][**45**]<**Insert number**>.

2.4 STEEL PANS FOR ACOUSTICAL METAL PAN CEILING

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**American Decorative Ceilings, Inc.**]
2. [**Armstrong Ceiling & Wall Solutions**]
3. [**CertainTeed; SAINT-GOBAIN**]
4. [**Lindner Group**]
5. [**Rockfon; ROCKWOOL International**]
6. [**USG Corporation**]
7. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**American Decorative Ceilings, Inc.**]
2. [**Armstrong Ceiling & Wall Solutions**]
3. [**CertainTeed; SAINT-GOBAIN**]
4. [**Lindner Group**]
5. [**Rockfon; ROCKWOOL International**]
6. [**USG Corporation**]
7. <**Insert manufacturer's name**>

C. Classification: Units complying with ASTM E1264 for [**Type V, perforated steel facing (pan) with mineral- or glass-fiber-base backing**][**Type XX, other types described as perforated steel facing (pan) units with sound-absorbent fabric backing**][**Type XX, other types described as unperforated steel facing (pan) units**]<**Insert Type XX description**>.

1. Pattern A: (Perforated, regularly spaced large holes), arranged in [**diagonal**][**parallel**] alignment to pan edge with uniform perforations of dimension, holes per square foot or inch, and percent open area as [**indicated by product designation**][**selected from manufacturer's full range**].
2. Pattern B: (Perforated, small holes) regularly spaced, with uniform perforations of dimension, holes per square foot or inch, and percent open area as [**specified by product designation**][**selected from manufacturer's full range**].
3. Pattern: <**Insert pattern designation for perforated pans and any requirements for perforation alignment, hole shape and size, holes per square foot or inch, and percent open area**>.

D. Pan Fabrication: Manufacturer's standard units of size, profile, and edge treatment indicated, formed from metal indicated and finished to comply with requirements indicated.

1. Lay-in Pans: Formed to set in exposed suspension grid.
2. Clip-in Pans: Designed to clip in and be securely retained in exposed suspension grid by formed edges or accessory clips provided by manufacturer.
3. Snap-in Pans: Designed with dimples or continuous beads on flanges for snap-in, secure engagement with concealed suspension system.
4. Torsion-Spring-Hinged Pans: Designed to be securely retained in preslotted, exposed suspension grid by torsion springs provided by manufacturer.
5. <**Insert type and description**>.

E. Pan Thickness: Not less than [**0.010 inch (0.25 mm)**][**0.019 inch (0.5 mm)**][**0.025 inch (0.6 mm)**][**0.030 inch (0.75 mm)**][**0.036 inch (0.9 mm)**]<**Insert dimension**>.

F. Pan Edge Detail: [**Square**][**Beveled**][**Reveal**][**Manufacturer's standard edge detail**].

G. Pan Joint Detail: [**Butt**][**Wide reveal, not less than 15/16 inch (24 mm) wide**][**Narrow reveal, not greater than 9/16 inch (15 mm) wide**][**Flush narrow reveal, not greater than 9/16 inch (15 mm) wide**]<**Insert description**>.

H. Pan Size: [**12 by 12 inches (305 by 305 mm)**][**12 by 24 inches (305 by 610 mm)**][**12 by 36 inches (305 by 915 mm)**][**24 by 24 inches (610 by 610 mm)**][**24 by 48 inches (610 by 1220 mm)**][**24 by 60 inches (610 by 1525 mm)**][**30 by 30 inches (760 by 760 mm)**][**30 by 60 inches (760 by 1525 mm)**][**As indicated on Drawings**]<**Insert dimensions**>.

I. Scoring: Score pans at intervals to appear as [**12-by-12-inch (305-by-305-mm)**]<**Insert dimensions**> ceiling units.

J. Pan Face Finish: [**Painted white**][**Painted to match color indicated by product designation**][**Painted to match Architect's sample**][**Painted in color selected from manufacturer's full range**][**Plated with metallic finish, as selected from manufacturer's full range**][**Bright-reflective metallic finish selected from manufacturer's full range**]<**Insert finish**>.

K. Light Reflectance Coefficient: Not less than [**0.70**][**0.75**]<**Insert number**>.

L. NRC: Not less than [**0.60**][**0.65**][**0.70**][**0.75**][**0.80**][**0.85**][**0.90**][**0.95**]<**Insert number**>.

M. Ceiling Attenuation Class: Not less than [**35**][**40**][**45**]<**Insert number**>.

2.5 STAINLESS STEEL PANS FOR ACOUSTICAL METAL PAN CEILING

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Armstrong Ceiling & Wall Solutions**]
2. [**Rockfon; ROCKWOOL International**]
3. [**USG Corporation**]
4. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Armstrong Ceiling & Wall Solutions**]
2. [**Rockfon; ROCKWOOL International**]
3. [**USG Corporation**]
4. <**Insert manufacturer's name**>

C. Classification: Units complying with ASTM E1264 for [**Type VI, perforated stainless steel facing (pan) with mineral- or glass-fiber-base backing**][**Type XX, other types described as perforated stainless steel facing (pan) units with sound-absorbent fabric backing**][**Type XX, other types described as unperforated stainless steel facing (pan) units**]<**Insert Type XX description**>.

1. Pattern A: (Perforated, regularly spaced large holes), arranged in parallel alignment to pan edge with uniform perforations of **0.109-inch (2.8-mm)** diameter, 1800 holes/sq. ft. or inch, and 11.8 percent open area.
2. Pattern: <**Insert pattern designation for perforated pans and any requirements for perforation alignment, hole shape and size, holes per square foot or inch, and percent open area**>.

D. Pan Fabrication: Manufacturer's standard units of size, profile, and edge treatment indicated, formed from metal indicated and finished to comply with requirements indicated.

1. Lay-in Pans: Formed to set in exposed suspension grid.
2. Clip-in Pans: Designed to clip in and be securely retained in exposed suspension grid by formed edges or accessory clips provided by manufacturer.
3. Snap-in Pans: Designed with dimples or continuous beads on flanges for snap-in, secure engagement with concealed suspension system.
4. Torsion-Spring-Hinged Pans: Designed to be securely retained in preslotted, exposed suspension grid by torsion springs provided by manufacturer.
5. <**Insert type and description**>.

E. Pan Thickness: Not less than [**0.019 inch (0.5 mm)**][**0.025 inch (0.6 mm)**][**0.030 inch (0.76 mm)**]<**Insert dimension**>.

F. Pan Edge Detail: [**Square**][**Beveled**][**Reveal**][**Manufacturer's standard edge detail**].

G. Pan Joint Detail: [**Butt**][**Wide reveal, not less than 15/16 inch (24 mm) wide**][**Narrow reveal, not greater than 9/16 inch (15 mm) wide**][**Flush narrow reveal, not greater than 9/16 inch (15 mm) wide**]<**Insert description**>.

H. Pan Size: [**12 by 12 inches (305 by 305 mm)**][**12 by 24 inches (305 by 610 mm)**][**12 by 36 inches (305 by 915 mm)**][**24 by 24 inches (610 by 610 mm)**][**24 by 48 inches (610 by 1220 mm)**][**30 by 30 inches (760 by 760 mm)**][**As indicated on Drawings**]<**Insert dimensions**>.

I. Scoring: Score pans at intervals to appear as [**12-by-12-inch (305-by-305-mm)**]<**Insert dimensions**> ceiling units.

J. Pan Face Finish: [**Directional Satin Finish: ASTM A480/A480M No. 4**][**Dull Satin Finish: ASTM A480/A480M No. 6**][**Mirrorlike Reflective, Nondirectional Polish: ASTM A480/A480M No. 8**]<**Insert**

finish>.

K. NRC: Not less than [**0.60**][**0.65**][**0.70**][**0.75**][**0.80**][**0.85**][**0.90**][**0.95**]<**Insert number**>.

L. Ceiling Attenuation Class: Not less than [**35**][**40**][**45**]<**Insert number**>.

2.6 METAL SUSPENSION SYSTEMS, GENERAL

A. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <**Insert value**> percent.

B. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site.

C. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site.

D. Regional Materials: Products shall be manufactured within **100 miles (160 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **100 miles (160 km)** of Project site.

E. Indigenous Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site. If materials are transported by rail or water, the distance transported by rail or water shall be multiplied by 0.25 to determine the distance to Project site.

F. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site. If materials are transported by rail or water, the distance transported by rail or water shall be multiplied by 0.25 to determine the distance to Project site.

G. Metal Suspension System Standard: Provide manufacturer's standard metal suspension systems of types, structural classifications, and finishes indicated that comply with applicable ASTM C635/C635M requirements.

H. Suspension Systems: Provide systems complete with carriers, runners, splice sections, connector clips, alignment clips, leveling clips, hangers, molding, trim, retention clips, load-resisting struts, and other suspension components required to support ceiling units and other ceiling-supported construction.

I. Attachment Devices: Size for 5 times the design load indicated in ASTM C635/C635M, Table 1, Direct Hung, unless otherwise indicated. Comply with seismic design requirements.

J. Expansion Anchors: Fabricated from corrosion-resistant materials, with allowable load or strength design capacities calculated in accordance with ICC-ES AC193 and ACI 318 greater than or equal to the design load, as determined by testing per ASTM E488/E488M conducted by a qualified testing agency.

K. Power-Actuated Anchors: Fastener system of type suitable for application indicated, fabricated from corrosion-resistant materials, with clips or other accessory devices for attaching hangers of type indicated and with allowable load capacities calculated according to ICC-ES AC70, greater than or equal to the design load, as determined by testing per ASTM E1190 conducted by a qualified testing agency.

L. Wire Hangers, Braces, and Ties: Provide wires complying with the following requirements:

1. Zinc-Coated, Carbon-Steel Wire: ASTM A641/A641M, Class 1 zinc coating, soft temper.
2. Stainless Steel Wire: ASTM A580/A580M, Type 304, nonmagnetic.
3. Nickel-Copper-Alloy Wire: ASTM B164, nickel copper alloy for UNS No. N04400 alloy.
4. Size: Select wire diameter so its stress at 3 times the hanger design load indicated in ASTM C635/C635M, Table 1, Direct Hung, is less than yield stress of wire, but provide not less than [**0.106-inch- (2.69-mm-)**][**0.135-inch- (3.5-mm-)**]<**Insert dimension**> diameter wire.

M. Rods and Flat Hangers: Mild steel, zinc coated or protected with rust-inhibitive paint.

N. Angle Hangers: Angles with legs not less than **7/8 inch (22 mm)** wide; formed with **0.04-inch- (1.0-mm-)** thick, galvanized-steel sheet complying with ASTM A653/A653M, **G90 (Z275)** coating designation; with bolted connections and **5/16-inch- (8-mm-)** diameter bolts.

O. Seismic Stabilizer Bars: Manufacturer's standard perimeter stabilizers designed to accommodate seismic forces.

P. Seismic Struts: Manufacturer's standard compression struts designed to accommodate seismic forces.

Q. Seismic Clips: Manufacturer's standard seismic clips designed and spaced to secure acoustical metal pans in place.

R. Hold-Down Clips: Manufacturer's standard hold-down clips spaced to secure acoustical metal pans in place [**to molding and trim at perimeter**][**at each pan**]<**Insert requirements**>.

S. Exposed Metal Edge Moldings and Trim: Provide exposed members as indicated or as required to comply with seismic requirements of authorities having jurisdiction, to conceal edges of and penetrations through ceiling, to conceal edges of pans and runners, for fixture trim and adapters, for fasciae at changes in ceiling height, and for other conditions; of metal and finish matching acoustical metal pan ceiling units unless otherwise indicated.

1. For Circular Penetrations of Ceiling: Fabricate edge moldings to diameter required to fit penetration exactly.

2.7 METAL SUSPENSION SYSTEM FOR ACOUSTICAL, STANDARD-GRID METAL PAN CEILINGS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Armstrong Ceiling & Wall Solutions**]
2. [**CertainTeed; SAINT-GOBAIN**]
3. [**Rockfon; ROCKWOOL International**]
4. [**USG Corporation**]
5. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Armstrong Ceiling & Wall Solutions**]
2. [**CertainTeed; SAINT-GOBAIN**]
3. [**Rockfon; ROCKWOOL International**]
4. [**USG Corporation**]
5. <**Insert manufacturer's name**>

C. Suspension System: For [**clip-in**][**lay-in**][**torsion-spring-hinged**]<**Insert type**> pans.

1. Wide-Face, Capped, Double-Web, Suspension System: Main and cross runners roll formed from cold-rolled steel sheet, prepainted, electrolytic zinc-coated or hot-dip galvanized in accordance with ASTM A653/A653M, **G30 (Z90)** coating designation, with prefinished, cold-rolled, **15/16-inch- (24-mm-)** wide, sheet metal caps on flanges.

    a. Structural Classification: [**Intermediate**][**Heavy**]-duty system.
    b. End Condition of Cross Runners: [**Override (stepped)**][**or**][**butt-edge**] type.
    c. Face Design: Flat, flush.
    d. Cap Material: [**Steel**][**or**][**aluminum**] cold-rolled sheet.
    e. Cap Finish: [**Painted white**][**Painted in color as selected from manufacturer's full range**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of metal pan**][**Plated with metallic finish, as selected from manufacturer's full range**][**Plated with metallic finish indicated by manufacturer's designation**][**Natural finish for aluminum**].

2. Narrow-Face, Capped, Double-Web, Suspension System: Main and cross runners roll formed from cold-rolled steel sheet, prepainted, electrolytic zinc-coated or hot-dip galvanized in accordance with ASTM A653/653M, **G30 (Z90)** coating designation, with prefinished, cold-rolled, **9/16-inch- (15-mm-)** wide, sheet metal caps on flanges.

    a. Structural Classification: [**Intermediate**][**Heavy**]-duty system.
    b. End Condition of Cross Runners: [**Override (stepped)**][**or**][**butt-edge**] type.
    c. Face Design: [**Flat, flush**][**Flanges formed with an integral center reveal**].
    d. Cap Material: [**Steel**][**or**][**aluminum**] cold-rolled sheet.
    e. Cap Finish: [**Painted white**][**Painted in color as selected from manufacturer's full range**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of metal pan**][**Plated with metallic finish, as selected from manufacturer's full range**][**Plated with metallic finish indicated by manufacturer's designation**][**Natural finish for aluminum**].

3. Narrow-Face, Uncapped, Double-Web, Steel Suspension System: Main and cross runners roll formed from cold-rolled steel sheet, prepainted, electrolytic zinc-coated or hot-dip galvanized, to produce structural members with **9/16-inch- (15-mm-)** wide faces.

    a. Structural Classification: [**Intermediate**][**Heavy**]-duty system.
    b. Face Design: With [**1/8-inch- (3.2-mm-)**][**1/4-inch- (6.35-mm-)**] wide, slotted, box-shaped flange.
    c. Face Finish: Painted [**white**][**in color as selected from manufacturer's full range**][**to match color indicated by manufacturer's designation**][**to match color of metal pan**].

4. Wide-Face, Capped, Double-Web, Steel Suspension System: Main and cross runners roll formed from cold-rolled steel sheet, hot-dip galvanized in accordance with ASTM A653/A653M, **G60 (Z180)** coating designation, with prefinished, cold-rolled, **15/16-inch- (24-mm-)** wide, aluminum caps on flanges.

    a. Structural Classification: [**Intermediate**][**Heavy**]-duty system.
    b. Face Design: Flat, flush.
    c. Face Finish: [**Painted white**][**Painted to match color indicated by manufacturer's designation**][**Painted to match color of acoustical unit**][**Natural finish**].

5. Wide-Face, Capped, Double-Web, Stainless Steel Suspension System: Main and cross runners roll formed from and capped with Type 304 or Type 316 stainless steel sheet, with prefinished, cold-rolled, **15/16-inch- (24-mm-)** wide, stainless steel caps on flanges.

a. Structural Classification: Intermediate-duty system.
b. Face Design: Flat, flush.
c. Finish: [**Directional Satin Finish: ASTM A480/A480M No. 4**][**Dull Satin Finish: ASTM A480/A480M No. 6**][**Mirrorlike Reflective, Nondirectional Polish: ASTM A480/A480M No. 8**]<**Insert finish**>.

6. Suspension System for Torsion-Spring-Hinged Metal Pans: Provide runners with factory-cut slots fabricated to accept torsion-spring-hinged attachment.

2.8 METAL SUSPENSION SYSTEM FOR ACOUSTICAL SNAP-IN METAL PAN CEILINGS

A. Snap-In Grid Suspension System: .

1. Manufacturers: Subject to compliance with requirements, provide products by snap-in metal pan ceiling manufacturer.

B. Indirect-Hung, Snap-in System: Designed to support metal pans that snap into main runners, consisting of main runners connected to carrying channels that are attached by hangers to building structure, and complying with the following requirements:

1. Main Runners: Formed from the following metal:

a. Aluminum Sheet: Alloy and temper recommended by aluminum producer and finisher for type of use indicated and manufacturer's standard finish, complying with **ASTM B209 (ASTM B209M)**.
b. Electrolytic Zinc-Coated Steel Sheet: ASTM A879/A879M, with not less than [**08Z (24G)**]<**Insert coating designation**> zinc coating.
c. Hot-Dip Galvanized Steel: ASTM A653/A653M, with not less than [**G60 (Z180)**]<**Insert coating designation**> zinc coating.
d. Stainless Steel Sheet: ASTM A240/A240M or ASTM A666, Type 302 or Type 304, stretcher leveled, with cold-rolled mill finish.
e. Metal Sheet: Metal as standard with ceiling system manufacturer, with factory-applied protective finish complying with ASTM C635/C635M.

2. Carrying Channels:

a. Same member and metal as indicated for main runners.
b. Cold-rolled steel, not less than **0.060-inch (1.5-mm)** nominal thickness of base (uncoated) metal and **7/16-inch- (11-mm-)** wide flanges, [**protected with rust-inhibitive paint**][**hot-dip galvanized in accordance with ASTM A653/A653M, G60 (Z180) coating designation**], and as follows:

1) Depth and Weight: [**1-1/2 inches and 475 lb/1000 feet (38 mm and 215 kg/305 m)**][**2 inches and 590 lb/1000 feet (51 mm and 268 kg/305 m)**].

C. Direct-Hung, Snap-in System: Designed to support metal pans that snap into main runners, consisting of main runners supported by hangers attached directly to building structure, and complying with the following requirements:

1. Hangers: Angles or channels, as standard with ceiling system manufacturer, formed from same metal as main runners.
2. Main Runners: Rolled aluminum sheet; alloy and temper recommended by aluminum producer and finisher for type of use indicated and manufacturer's standard finish, complying with **ASTM B209 (ASTM B209M)**.

D. Access Panels: For access at locations indicated, provide acoustical snap-in metal pan ceiling units, accessible by [**key or tool**][**two access knobs; place one access knob at each end of panel near corners**].

1. Access Key or Tool: Provide manufacturer's standard key or tool for opening access panels; [**one**][**two**]<**Insert number**>.

2.9 ACOUSTICAL SEALANT

A. Acoustical Sealant: As specified in Section 079219 "Acoustical Joint Sealants."

2.10 GENERAL FINISH REQUIREMENTS

A. Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

B. Appearance of Finished Work: Noticeable variations in same piece are not acceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

C. High-Humidity Finish: Comply with ASTM C635/C635M requirements for "Coating Classification for Severe Environment Performance" where high-humidity finishes are indicated.

2.11 ALUMINUM FINISHES

A. Mill Finish: AA-M10C10 (Mechanical Finish: as fabricated, unspecified; Chemical Finish: chemically cleaned).

B. Lacquered Mill Finish: AA-M10C10R1x (Mechanical Finish: as fabricated, unspecified; Chemical Finish: chemically cleaned; Organic Coating: as specified below).

1. Organic Coating: Manufacturer's standard clear organic coating.

C. Clear Anodic Finish: AAMA 611, AA-M12C22A31, Class II, 0.010 mm or thicker.

D. Clear Mirror Anodic Finish: AA-M21C12A212, 0.005 mm or thicker.

E. Color-Coated Finish: Manufacturer's standard[**powder-coat**] baked paint complying with coating manufacturer's written instructions for surface preparation, pretreatment, application, baking, and minimum dry film thickness.

F. Bright-Reflective Finish: Manufacturer's standard chemical/mechanical bright-reflective metallic finish complying with finish manufacturer's written instructions for surface preparation, pretreatment, process, protective coating, and minimum thickness to produce a finish uniform in appearance and free of blisters, pits, roughness, nodules, burning, cracks, unfinished areas, and other visible defects.

2.12 METALLIC-COATED STEEL SHEET FINISHES

A. Color-Coated Finish: Manufacturer's standard[**powder-coat**] baked paint complying with coating manufacturer's written instructions for surface preparation, pretreatment, application, baking, and minimum dry film thickness.

2.13 STEEL SHEET FINISHES

A. Electroplated Finish: Electroplating process complying with finish manufacturer's written instructions for surface preparation, pretreatment, process, and minimum thickness to produce a coating uniform in appearance and free of blisters, pits, roughness, nodules, burning, cracks, unplated areas, and other visible defects.

B. Bright-Reflective Finish: Manufacturer's standard chemical/mechanical bright-reflective metallic finish complying with finish manufacturer's written instructions for surface preparation, pretreatment, process, protective coating, and minimum thickness to produce a finish uniform in appearance and free of blisters, pits, roughness, nodules, burning, cracks, unfinished areas, and other visible defects.

2.14 STAINLESS STEEL FINISHES

A. Surface Preparation: Remove tool and die marks and stretch lines, or blend into finish.

B. Polished Finishes: Grind and polish surfaces to produce uniform finish, free of cross scratches.

1. Run grain of directional finishes with long dimension of each piece.
2. When polishing is completed, passivate and rinse surfaces. Remove embedded foreign matter and leave surfaces chemically clean.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, including structural framing to which acoustical metal pan ceilings attach or abut, with Installer present, for compliance with requirements specified in this and other Sections that affect ceiling installation and anchorage and with requirements for installation tolerances and other conditions affecting performance of acoustical metal pan ceilings.

B. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Measure each ceiling area and establish layout of acoustical metal pans to balance border widths at opposite edges of each ceiling. Avoid using less-than-half-width pans at borders, and comply with layout shown on reflected ceiling plans and coordination drawings.

3.3 INSTALLATION OF ACOUSTICAL METAL PAN CEILINGS

A. General: Install acoustical metal pan ceiling assemblies to comply with ASTM C636/C636M[**, seismic design requirements,**] and manufacturer's written instructions.

B. Suspend ceiling hangers from building's structural members and as follows:

1. Install hangers plumb and free from contact with insulation or other objects within ceiling plenum

that are not part of supporting structure or of ceiling suspension system.

2. Splay hangers only where required[**and, if permitted with fire-resistance-rated ceilings,**] to miss obstructions; offset resulting horizontal forces by bracing, countersplaying, or other equally effective means.
3. Where width of ducts and other construction within ceiling plenum produces hanger spacings that interfere with location of hangers at spacings required to support standard suspension-system members, install supplemental suspension members and hangers in form of trapezes or equivalent devices.
4. Secure wire hangers to ceiling suspension members[**or carrying channels**] and to supports above with a minimum of three tight turns. Connect hangers directly either to structures or to inserts, eye screws, or other devices that are secure and appropriate for substrate and that do not deteriorate or otherwise fail due to age, corrosion, or elevated temperatures.
5. Secure flat, angle, channel, and rod hangers to ceiling suspension members[**or carrying channels**] and to structure, including intermediate framing members, by attaching to inserts, eye screws, or other devices that are secure and appropriate for both structure to which hangers are attached and the type of hanger involved. Install hangers in a manner that does not cause them to deteriorate or fail due to age, corrosion, or elevated temperatures.
6. Do not support ceilings directly from permanent metal forms or floor deck. Fasten hangers to cast-in-place hanger inserts, postinstalled mechanical or adhesive anchors, or power-actuated fasteners that extend through forms into concrete.
7. When steel framing does not permit installation of hanger wires at spacing required, install carrying channels or other supplemental support for attachment of hanger wires.
8. Do not attach hangers to steel deck tabs.
9. Do not attach hangers to steel roof deck. Attach hangers to structural members.
10. Space hangers not more than **48 inches (1200 mm)** o.c. along each member supported directly from hangers unless otherwise indicated; provide hangers not more than **8 inches (200 mm)** from ends of each member.
11. Size supplemental suspension members and hangers to support ceiling loads within performance limits established by referenced standards and publications.

C. Secure bracing wires to ceiling suspension members[**or carrying channels**] and to supports with a minimum of four tight turns. Suspend bracing from building's structural members as required for hangers, without attaching to permanent metal forms, steel deck, or steel deck tabs. Fasten bracing wires into concrete with cast-in-place or postinstalled anchors.

D. Install edge moldings and trim of type indicated at perimeter of acoustical ceiling area and where necessary to conceal edges of acoustical metal pans.

1. Apply acoustical sealant in a continuous ribbon concealed on back of vertical legs of moldings before they are installed.
2. Screw attach moldings to substrate at intervals not more than **16 inches (400 mm)** o.c. and not more than **3 inches (75 mm)** from ends, leveling with ceiling suspension system to a tolerance of **1/8 inch in 12 feet (3.2 mm in 3.6 m)**. Miter corners accurately and connect securely.
3. Do not use exposed fasteners, including pop rivets, on moldings and trim.

E. Install suspension-system runners so they are square and securely interlocked with one another. Remove and replace dented, bent, or kinked members.

F. Cut acoustical metal pan units for accurate fit at borders and at interruptions and penetrations by other work through ceilings. Stiffen edges of cut units as required to eliminate evidence of buckling or variations in flatness exceeding referenced standards for stretcher-leveled metal sheet. Cut and treat edges to comply with manufacturer's written instructions.

G. Install acoustical metal pans in coordination with suspension system and exposed moldings and trim. Comply with manufacturer's installation tolerances.

1. For lay-in, square-edge pans, install pans with edges fully hidden from view by flanges of suspension-system runners and moldings.
2. For lay-in, reveal-edge pans on suspension-system runners, install pans with bottom of reveal in firm contact with top surface of runner flanges.
3. For lay-in, reveal-edge pans on suspension-system members with box-shaped flanges, install pans with reveal surfaces in firm contact with suspension-system surfaces and panel faces flush with bottom face of runners.
4. For [**clip-in**][**torsion-spring-hinged**] pans, position pans in accordance with manufacturer's written instructions.
5. For snap-in pans, fit adjoining units to form flush, tight joints.
6. Align joints in adjacent courses to form uniform, straight joints parallel to room axis in both directions unless otherwise indicated.
7. Fit adjoining units to form flush, tight joints.
8. Install directionally patterned or textured metal pans in directions indicated.
9. Install sound-absorbent fabric layers in, and bond to, perforated metal pans.
10. Install sound-absorbent pads in perforated metal pans[**over metal spacer grids**].

H. Install sound attenuation panels in areas indicated by reflected ceiling plans or room finish schedules. Lay panels directly on ceiling system and close major openings to form complete coverage in required areas. Lay second sound-absorbent pads on sound attenuation panels.

I. Install hold-down clips where indicated.

3.4 FIELD QUALITY CONTROL

A. Special Inspections: [**Owner will engage**][**Engage**] a qualified special inspector to perform the following special inspections:

1. Seismic design compliance.

B. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

C. Perform the following tests and inspections of completed installations of acoustical metal panel ceiling hangers, anchors, and fasteners in successive stages. Do not proceed with installations of acoustical metal panel ceiling hangers for the next area until test results for previously completed installations show compliance with requirements.

1. Extent of Each Test Area: When installation of ceiling suspension systems on each floor has reached 20 percent completion, but no panels have been installed.

a. Within each test area, testing agency selects one of every 10 power-actuated fasteners and postinstalled anchors used to attach hangers to concrete and tests them for **200 lbf (890 N)** of tension; it also selects one of every two postinstalled anchors used to attach bracing wires to concrete and tests them for **440 lbf (1957 N)** of tension.
b. When tested fasteners and anchors do not comply with requirements, testing agency tests those fasteners and anchors not previously tested until 20 pass consecutively and then resumes initial testing frequency.

D. Acoustical metal panel ceiling hangers, anchors, and fasteners will be considered defective if they do not pass tests and inspections.

E. Prepare test and inspection reports.

3.5 CLEANING

A. Clean exposed surfaces of acoustical metal pan ceilings, including trim and edge moldings, after removing strippable, temporary protective covering, if any. Comply with manufacturer's written instructions for stripping of temporary protective covering, cleaning, and touchup of minor finish damage. Remove and replace ceiling components that cannot be successfully cleaned and repaired to permanently eliminate evidence of damage, including dented and bent units.

SECTION 09 54 00 00 - STRETCHED-FABRIC CEILING SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes: Stretched-fabric ceiling systems.

B. Related Requirements:

1. Section 095446 "Fabric-Wrapped Ceiling Panels" for decorative, fabric-wrapped ceiling panels that are not required to be tested for acoustical performance[**and for coordinated requirements for fabric**].
2. Section 097200 "Wall Coverings" for adhesively applied textile wall coverings[**and for coordinated requirements for fabric**].
3. Section 097713 "Stretched-Fabric Wall Systems" for site-upholstered systems applied to walls[**and for coordinated requirements for fabric**].
4. Section 098436 "Sound-Absorbing Ceiling Units" for shop-fabricated, acoustical ceiling panels tested for acoustical performance[**and for coordinated requirements for fabric**].

1.2 DEFINITIONS

A. NRC: Noise Reduction Coefficient.

B. SAA: Sound absorption average.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1.4 ACTION SUBMITTALS

A. Product Data: For stretched-fabric ceiling systems.

1. Include[**fabric facing,**] frame edge and trim, core material, and mounting indicated.

B. Sustainable Design Submittals:

1. Product Data: For adhesives, indicating VOC content.
2. Laboratory Test Reports: For adhesives, indicating compliance with requirements for low-emitting materials.
3. Product Data: For composite wood products, indicating that product contains no urea formaldehyde.
4. Laboratory Test Reports: For composite wood products, indicating compliance with requirements for low-emitting materials.
5. Laboratory Test Reports: For composite wood products, indicating compliance with requirements for low-emitting materials.
6. Product Data: For composite wood products, indicating compliance with requirements for formaldehyde emissions.

7. Product Data: For composite wood products, indicating that product contains no urea formaldehyde.
8. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
9. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
10. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
11. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings: For each stretched-fabric system.

1. Include the following:

   a. Reflected ceiling plans, elevations, sections, and installation and system details.
   b. Details at joints and corners; and details at ceiling intersections and intersections with walls. Indicate frame-edge profile and core materials.
   c. Details at cutouts and penetrations for other work.
   d. Direction of fabric weave and pattern matching.

2. Show sewn-seam locations, types, and methods.

D. Samples for Initial Selection: For each type of fabric facing.

1. Include accessories involving color or finish selection.

E. Samples for Verification: For the following:

1. Fabric: Full-width by approximately [**36-inch- (900-mm-)**]<**Insert dimension**> long Sample, but not smaller than required to show complete pattern repeat, from dye lot to be used for the Work, and with specified treatments applied. Mark top and face of fabric.
2. Frame System: **12-inch- (300-mm-)** square Sample(s) showing each edge profile and corner.
3. Core Material: **12-inch- (300-mm-)** square Sample at corner.
4. Assembled System: Approximately **36 by 36 inches (900 by 900 mm)**, including joints[**and seams**] in mockup.

1.5 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Reflected ceiling plans and other details, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Electrical outlets.
2. Suspended ceiling components above stretched-fabric systems.
3. Structural members to which suspension devices will be attached.
4. Items penetrating or covered by stretched-fabric systems including the following:

   a. Lighting fixtures.
   b. Air outlets and inlets.
   c. Speakers.
   d. Alarms.
   e. Sprinklers.
   f. Access panels.
   g. <**Insert item**>.

5. Show operation of hinged and sliding components covered by or adjacent to stretched-fabric systems.

B. Qualification Data: For Installer.

C. Product Certificates: For each type of stretched-fabric system.

D. Sample Warranty: For special warranty.

1.6 CLOSEOUT SUBMITTALS

A. Maintenance Data: For stretched-fabric systems to include in maintenance manuals. Include fabric manufacturer's written cleaning, stain-removal, restretching, and reupholstering instructions.

1.7 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials, from the same product run, that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Fabric: For each fabric, color, and pattern installed, furnish length equal to [**10**]<**Insert number**> percent of amount installed, but no fewer than [**10 sq. yd. (9 sq. m)**]<**Insert quantity**>, full width of bolt.
2. Framing and Related Installation Items: Furnish manufacturer's full-length units equal to [**5**]<**Insert number**> percent of amount installed, but no fewer than [**5**]<**Insert number**> units, including unopened adhesives.

1.8 QUALITY ASSURANCE

A. Installer Qualifications: An authorized representative who is trained and approved by manufacturer.

B. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials, fabrication, and installation.

1. Build mockup of typical ceiling area[**as shown on Drawings**][**96 inches (2400 mm) wide by full width of ceiling**]<**Insert dimensions**>.[**Include intersection of wall and ceiling, corners, and perimeters.**]
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Comply with fabric and stretched-fabric system manufacturers' written instructions for minimum and maximum temperature and humidity requirements for shipment, storage, and handling.

B. Deliver materials in unopened bundles and store in a temperature-controlled dry place with adequate air circulation.

1.10 FIELD CONDITIONS

A. Environmental Limitations: Do not install stretched-fabric systems until spaces are enclosed and weathertight, wet-work in spaces is complete and dry, work at and above ceilings is complete, and ambient temperature and humidity conditions are maintained at the levels indicated for Project when occupied for its intended use.

B. Lighting: Do not install stretched-fabric systems until [**a permanent level of lighting**][**a lighting level of not less than 50 fc (538 lx)**]<**Insert requirement**> is provided on surfaces to receive stretched-fabric systems.

C. Air-Quality Limitations: Protect stretched-fabric systems from exposure to airborne odors, such as tobacco smoke, and install systems under conditions free from odor contamination of ambient air.

1.11 WARRANTY

A. Special Warranty: Manufacturer and Installer agree to repair or replace components of stretched-fabric systems that fail in performance, materials, or workmanship within specified warranty period.

1. Failures include, but are not limited to, the following:

a. Acoustical performance.
b. Fabric sagging, distorting, or releasing from panel edge.
c. Warping of core.

2. Warranty Period: [**Two**][**Five**]<**Insert number**> years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain stretched-fabric ceiling systems specified in this Section[**and stretched-fabric wall systems specified in Section 097713 "Stretched-Fabric Wall Systems"**] from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

B. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

C. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.

D. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

E. Fire-Test-Response Characteristics: Stretched-fabric ceiling systems comply with "Surface-Burning Characteristics" or "Fire Growth Contribution" Subparagraph below, or both, as determined by testing identical products by UL or another testing and inspecting agency acceptable to authorities having jurisdiction:

1. Surface-Burning Characteristics: Comply with ASTM E84 or UL 723; testing by a qualified testing agency on systems prepared in accordance with ASTM E2573. Identify products with appropriate markings of applicable testing agency.

   a. Flame-Spread Index: 25 or less.
   b. Smoke-Developed Index: [**450**]<**Insert value**> or less.

2. Fire Growth Contribution: Comply with acceptance criteria of local code and authorities having jurisdiction when tested in accordance with NFPA 286.

2.3 STRETCHED-FABRIC CEILING SYSTEMS

A. Stretched-Fabric Ceiling System : Manufacturer's standard system consisting of facing material stretched tightly over a frame[**and core material**] and secured in the frame.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Accutrack Systems, LLC**]
   b. [**Acoustical Fabric Systems Inc**]
   c. [**Novawall Systems, Inc**]
   d. [**SnapTex International LLC**]
   e. [**SoftWalls, Inc.**]
   f. [**Whisper Walls**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Accutrack Systems, LLC**]
   b. [**Acoustical Fabric Systems Inc**]
   c. [**Novawall Systems, Inc**]
   d. [**SnapTex International LLC**]
   e. [**SoftWalls, Inc.**]
   f. [**Whisper Walls**]
   g. <**Insert manufacturer's name**>

3. Core: [**Manufacturer's standard**][**Glass-fiber board**][**Glass-fiber blanket**][**Mineral-fiber board**][**Cementitious-fiber board**][**Medium-density fiberboard**][**Particleboard**]<**Insert requirement**>.

   a. Nominal Core Thickness: [**Match nominal frame thickness**][**1/2 inch (13 mm)**][**3/4 inch (19 mm)**][**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**2 inches (51 mm)**][**As indicated on**

Drawings]<**Insert dimension**>.

4. Core Overlay: Polyester batting [**1/2 inch (13 mm) thick**][**Manufacturer's standard thickness**]<**Insert dimension**>.
5. Frame Edge: [**Chamfered (beveled)**][**Radiused (bullnosed)**][**Square**]<**Insert profile**> profile.

    a. Fabric-Insertion Point: [**Bottom load**][**Side load**][**Top load**].
    b. Nominal Frame Thickness: [**Match nominal core thickness**][**1/2 inch (13 mm)**][**3/4 inch (19 mm)**][**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**2 inches (51 mm)**][**As indicated on Drawings**]<**Insert dimension**>.

6. Frame Color: [**Natural**][**Black**][**White**][**Prepainted color as selected by Architect from full range of manufacturer's colors**]<**Insert requirement**>.
7. Reveals between Panels: [**Recessed**][**Flush**][**Projecting**] reveals [**as selected by Architect from manufacturer's full range**][**as indicated on Drawings**]<**Insert requirement**>.
8. Facing Material: [**Owner-furnished material**][**As indicated on Drawings**]<**Insert drawing designation**>.
9. Acoustical Performance: Sound absorption [**NRC**][**or**][**SAA**] of [**0.50 to 0.90**][**0.60 to 0.70**][**0.65 to 0.75**][**not less than 0.65**][**not more than 0.35**]<**Insert range or single value**> in accordance with ASTM C423 for [**Type A**]<**Insert mounting**> mounting in accordance with ASTM E795.
10. Nominal Overall System Thickness: [**Match nominal frame thickness**][**1/2 inch (13 mm)**][**3/4 inch (19 mm)**][**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**2 inches (51 mm)**][**As indicated on Drawings**]<**Insert dimension**>.

2.4 MATERIALS

A. Sustainable Design Requirements:

1. Composite Wood Products: Products shall be made without urea formaldehyde.
2. Composite Wood Products: Products shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Composite Wood Products: Products shall be made using ultra-low-emitting formaldehyde resins as defined in the California Air Resources Board's "Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products" or shall be made with no added formaldehyde.
4. Composite Wood Products: Formaldehyde emission rates shall not be greater than the following when tested according to ASTM D 6007 or ASTM E 1333:

    a. Hardwood Plywood: 0.05 ppm.
    b. Particleboard: 0.09 ppm.
    c. MDF More Than **5/16 Inch (8 mm)** Thick: 0.11 ppm.
    d. MDF **5/16 Inch (8 mm)** or Less in Thickness: 0.13 ppm.

5. Composite Wood Products: Products shall be made without urea formaldehyde.

B. Core Materials:[**Manufacturer's standard.**]

1. Glass-Fiber Board: ASTM C612, of type standard with manufacturer; nominal density of [**6 to 7 lb/cu. ft. (96 to 112 kg/cu. m)**]<**Insert values**>, unfaced, and dimensionally stable, molded rigid board; and with maximum flame-spread and smoke-developed indexes of 25 and 50, respectively.
2. Glass-Fiber Blanket: ASTM C553, ASTM C612, or ASTM C665; of type standard with manufacturer; nominal density of [**3 to 4 lb/cu. ft. (48 to 64 kg/cu. m)**]<**Insert values**>; flexible;

and with maximum flame-spread and smoke-developed indexes of 25 and 50, respectively.

3. Mineral-Fiber Board: Maximum flame-spread and smoke-developed indexes of 25 and 10, respectively; minimum density of [**13 lb/cu. ft. (208 kg/cu. m)**][**20 lb/cu. ft. (320 kg/cu. m)**], and with perforated surface.
4. Cementitious-Fiber Board: Density of not less than [**20 lb/cu. ft. (320 kg/cu. m)**]<**Insert value**>.
5. Medium-Density Fiberboard: Panels complying with ANSI A208.2, [**grade to suit performance requirements**][**Grade 130**]<**Insert grade**>.

    a. Fire-retardant panels made from softwood fibers, synthetic resins, and fire-retardant chemicals mixed together at time of panel manufacture to achieve flame-spread index of 25 or less and smoke-developed index of 200 or less when tested in accordance with ASTM E84 or UL 723.

6. Particleboard: Panels complying with ANSI A208.1, [**grade to suit performance requirements**][**Grade M-2**]<**Insert grade**>.

    a. Fire-retardant panels made from softwood particles and fire-retardant chemicals mixed together at time of panel manufacture to achieve flame-spread index of 25 or less and smoke-developed index of 25 or less when tested in accordance with ASTM E84 or UL 723.

7. Core Overlay: Flame-retardant, compressible, fiberfill, polyester batting.

C. Frame Construction: Manufacturer's standard, continuous, extruded plastic frame (track).

D. Facing Material : Fabric from same dye lot; color and pattern [**as indicated by manufacturer's designations**][**matching Architect's samples**][**as selected by Architect from manufacturer's full range**][**as indicated on Drawings**]<**Insert requirement**>.

1. Manufacturer: <**Insert manufacturer's name**>.
2. Product Line/Pattern: <**Insert product name or designation**>.
3. Pattern Repeat: <**Insert requirement**>.
4. Style Number: <**Insert number**>.
5. Color: <**Insert name or number, or both**>.
6. Fiber Content: [**100**]<**Insert number**> percent [**woven polyester**][**nonwoven polyester**][**polyolefin**][**acoustically transparent vinyl**]<**Insert fiber requirement**>.
7. Width: [**54 inches (1371 mm)**][**66 inches (1676 mm)**]<**Insert dimension**>.
8. Source: <**Insert fabric-vendor's name**>.
9. Applied Treatments: [**Stain resistance**][**flame retardant**][**acrylic backing, single coat**][**acrylic backing, double coat**][**latex backing**][**foam backing**][**and**][**knit backing**]<**Insert treatment**>.
10. Light Reflectance: Average value not less than [**0.75**]<**Insert value**> when tested in accordance with ASTM E1477.
11. Lining Material: [**Manufacturer's standard fabric for each use indicated**]<**Insert material designation**>.
12. Trim Strip: <**Insert material designation**>.

E. Lining Material <**Insert material designation**>: Fabric [**as indicated by manufacturer's designations**][**matching Architect's samples**][**as selected by Architect from manufacturer's full range**][**as indicated on Drawings**]<**Insert requirement**>.

1. Manufacturer: <**Insert manufacturer's name**>.
2. Product Line: <**Insert product name or designation**>.
3. Style Number: <**Insert number**>.
4. Color: [**White**]<**Insert name or number, or both**>.
5. Fiber Content: <**Insert content by percentage and fiber type**>.
6. Width: [**54 inches (1371 mm)**][**66 inches (1676 mm)**]<**Insert dimension**>.

7. Source: <**Insert fabric-vendor's name**>.
8. Applied Treatments: [**Stain resistance**][**and**][**flame retardant**]<**Insert treatment**>.

F. Trim Strip <**Insert material designation**>: Fabric [**matching facing material except as follows**]<**Insert requirement**>.

1. Product Line: <**Insert product name or designation**>.
2. Style Number: <**Insert number**>.
3. Color: [**White**]<**Insert name or number, or both**>.

2.5 INSTALLATION MATERIALS

A. Installation Products: Concealed on back of system, recommended by stretched-fabric system manufacturer to support weight of system, fabric tension, and as follows:

1. Adhesives shall have a VOC content of [**70**]<**Insert value**> g/L or less.
2. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
3. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
4. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
5. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
6. Adhesive shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit or 33 mcg/cu. m and that of acetaldehyde shall not exceed 9 mcg/cu. m.
7. Fasteners: [**Manufacturer's standard**]<**Insert requirement**>.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine fabric, materials, substrates, areas, and conditions, with Installer present, for compliance with requirements, installation tolerances, and other conditions affecting performance of stretched-fabric systems.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Measure each area and establish layout of panels and joints of [**uniform size with balanced borders at opposite edges**][**sizes indicated on Drawings**] within a given area.

B. Before installation, allow fabric to adjust and become stable in spaces where it will be installed according to stretched-fabric system manufacturer's written instructions. Acclimatize fabric for minimum of [**24**]<**Insert number**> hours at ambient temperature and humidity conditions indicated for spaces when occupied for their intended use.

3.3 INSTALLATION OF STRETCHED-FABRIC CEILING SYSTEMS

A. Install stretched-fabric ceiling systems according to system manufacturer's written instructions.

1. Provide continuous perimeter frames of each profile indicated, designed to be inconspicuous when covered by fabric facing, with smooth edges, and with surface finish that will not telegraph through fabric facing.
2. Install framing around penetrations.
3. Tightly fit framing to adjacent construction and securely attach to substrate.
4. Install core material with full coverage, flush with face of stretched-fabric system frame.
5. Attach frame and core to substrate with adhesive or fasteners, or both, to support system and prevent deformation of components.
6. Install stretched-fabric systems true in plane and with fabric square to the grain.
7. Install jointed panels with [**butt joints**][**and**][**reveals**]<**Insert requirement**> as indicated.

B. Fabric Installation: Apply fabric monolithically in continuous run over area, without joints or reveals, except where panel joints or midspan frames are indicated.

1. Fabric Direction: Run fabric [**as indicated on Drawings**]<**Insert requirement**>.
2. Fabric Sequence: Maintain sequence of fabric drops; match and level fabric pattern and grain.
3. Fabric Alignment: Install fabric with patterns or directional weaves so pattern or weave [**aligns with adjacent panels**][**varies from adjacent panels as indicated on Drawings**].
4. Fabric Seams:

    a. Sewn seams are not permitted.
    b. [**Manufacturer's standard**][**Flat standard**][**French**][**Welt-trimmed**]<**Insert description**> sewn seams, straight and parallel; seam dimensions and locations as indicated on Drawings.

5. Core Overlay: Evenly stretch over core face and edges; free from puckers, ripples, wrinkles, and sags.
6. Stretch and secure fabric to frame edges and so frame and frame attachment method are concealed by fabric unless otherwise indicated.
7. Stretch fabric tightly and square without puckers, ripples, or distortions. Acclimatize and restretch if recommended by stretched-fabric system manufacturer. Repair distortions, wrinkles, and sagging.
8. Trim Strip: Back-wrap trim strip fabric from the fabric-insertion point over the exposed part of the frame edge where indicated, resulting in a contrasting fabric along the edge.

3.4 INSTALLATION TOLERANCES

A. Edge Straightness: Plus or minus [**1/16 inch (1.6 mm)**]<**Insert dimension**> in **48 inches (1200 mm)**.

B. Variation from Alignment with Surfaces: Plus or minus [**1/16 inch (1.6 mm)**]<**Insert dimension**> in **48 inches (1200 mm)**, noncumulative.

C. Variation from Level or Slope: Plus or minus [**1/16 inch (1.6 mm)**][**1/8 inch (3.2 mm)**]<**Insert dimension**>.

D. Variation of Joint Width: Not more than [1/16 inch (1.6 mm)]<**Insert dimension**> in 48 inches (1200 mm) from [**hairline**][**reveal line**], noncumulative.

3.5 CLEANING

A. Clip loose threads; remove pills and extraneous materials.

B. Clean panels on completion of installation to remove dust and other foreign materials according to manufacturer's written instructions.

END OF SECTION 09 54 00 00

SECTION 09 54 00 00A - FABRIC-WRAPPED CEILING PANELS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes: Shop-fabricated, fabric-wrapped ceiling panels.

B. Related Requirements:

1. Section 095443 "Stretched-Fabric Ceiling Systems" for site-upholstered systems applied to ceilings[**and for coordinated requirements for fabric**].
2. Section 097200 "Wall Coverings" for adhesively applied textile wall coverings[**and for coordinated requirements for fabric**].
3. Section 098436 "Sound-Absorbing Ceiling Units" for shop-fabricated, acoustical ceiling panels tested for acoustical performance[**and for coordinated requirements for fabric**].

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1.3 ACTION SUBMITTALS

A. Product Data: For each product.

1. Include[**fabric facing,**] panel edge, core material, and mounting indicated.

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
2. Product Certificates: For regional materials, indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include distance to Project and cost for each regional material.
3. Product Certificates: For indigenous materials, indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include distance to Project, means of transportation, and cost for each indigenous material.
4. Chain-of-Custody Certificates: For certified wood products. Include statement of costs.
5. Chain-of-Custody Qualification Data: For manufacturer and vendor.
6. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
7. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
8. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.
9. Laboratory Test Reports: For ceiling products, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings: For panel assembly and installation.

1. Include reflected ceiling plans, elevations, sections, and mounting devices and details.
2. Include details at joints and corners; and details at ceiling intersections and intersections with walls. Indicate panel edge profile and core materials.
3. Include direction of fabric weave and pattern matching.

D. Samples for Initial Selection: For each type of fabric facing.

1. Include Samples of hardware and accessories involving color or finish selection.

E. Samples for Verification: For the following products:

1. Fabric: Full-width by approximately [**36-inch- (900-mm-)**]<**Insert dimension**> long Sample, but not smaller than required to show complete pattern repeat, from dye lot to be used for the Work, and with specified treatments applied. Mark top and face of fabric.
2. Panel Edge: **12-inch- (300-mm-)** long Sample(s) showing each edge profile, corner, and finish.
3. Core Material: **12-inch- (300-mm-)** square Sample at corner.
4. Mounting Devices: Full-size Samples.
5. Assembled Panels: Approximately **36 by 36 inches (900 by 900 mm)**, including joints and mounting methods.

1.4 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Reflected ceiling plans and other details, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Electrical outlets.
2. Suspended ceiling components above ceiling panels.
3. Structural members to which suspension devices will be attached.
4. Items penetrating or covered by panels including the following:

    a. Lighting fixtures.
    b. Air outlets and inlets.
    c. Speakers.
    d. Alarms.
    e. Sprinklers.
    f. Access panels.
    g. <**Insert item**>.

5. Show operation of hinged and sliding components covered by or adjacent to panels.

B. Product Certificates: For each type of panel.

C. Sample Warranty: For manufacturer's special warranty.

1.5 CLOSEOUT SUBMITTALS

A. Maintenance Data: For each type of panel to include in maintenance manuals. Include fabric manufacturer's written cleaning and stain-removal instructions.

1.6 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials, from the same product run, that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Fabric: For each fabric, color, and pattern installed, furnish length equal to [**10**]<**Insert number**> percent of amount installed, but no fewer than [**10 sq. yd. (9 sq. m)**]<**Insert quantity**>, full width of bolt.
2. Mounting Devices: Full-size units equal to [**5**]<**Insert number**> percent of amount installed, but no fewer than [**five**]<**Insert number**> devices.

1.7 QUALITY ASSURANCE

A. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials, fabrication, and installation.

1. Build mockup of typical ceiling area[**as shown on Drawings**][**96 inches (2400 mm) wide by full width of ceiling**]<**Insert dimensions**>.[**Include intersection of wall and ceiling, corners, and perimeters.**]
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Comply with fabric and panel manufacturers' written instructions for minimum and maximum temperature and humidity requirements for shipment, storage, and handling.

B. Deliver materials and panels in unopened bundles and store in a temperature-controlled dry place with adequate air circulation.

1.9 FIELD CONDITIONS

A. Environmental Limitations: Do not install panels until spaces are enclosed and weathertight, wet-work in spaces is complete and dry, work at and above ceilings is complete, and ambient temperature and humidity conditions are maintained at the levels indicated for Project when occupied for its intended use.

B. Lighting: Do not install fabric-wrapped ceiling panels until [**a permanent level of lighting**][**a lighting level of not less than 50 fc (538 lx)**]<**Insert requirement**> is provided on surfaces to receive the panels.

C. Air-Quality Limitations: Protect panels from exposure to airborne odors, such as tobacco smoke, and install panels under conditions free from odor contamination of ambient air.

D. Field Measurements: Verify panel locations and actual dimensions of openings and penetrations by field measurements before fabrication, and indicate them on Shop Drawings.

1.10 WARRANTY

A. Special Warranty: Manufacturer agrees to repair or replace panels and components that fail in materials or workmanship within specified warranty period.

1. Failures include, but are not limited to, the following:

a. Fabric sagging, distorting, or releasing from panel edge.
b. Warping of core.

2. Warranty Period: [**Two**]<**Insert number**> years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain fabric-wrapped ceiling panels[**and fabric-wrapped wall panels specified in Section 097723 "Fabric-Wrapped Panels"**] from single source from single manufacturer.

2.2 PERFORMANCE REQUIREMENTS

A. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

B. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

C. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 16.5 mcg/cu. m or 13.5 ppb, whichever is less.

D. Ceiling products shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

E. Fire-Test-Response Characteristics: Panels are to comply with "Surface-Burning Characteristics" or "Fire Growth Contribution" Subparagraph below, or both, as determined by testing identical products by UL or another testing and inspecting agency acceptable to authorities having jurisdiction:

1. Surface-Burning Characteristics: Comply with ASTM E84 or UL 723; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

a. Flame-Spread Index: 25 or less.
b. Smoke-Developed Index: [**450**]<**Insert value**> or less.

2. Fire Growth Contribution: Comply with acceptance criteria of local code and authorities having jurisdiction when tested in accordance with NFPA 286.

2.3 SHOP-FABRICATED FABRIC-WRAPPED CEILING PANELS

A. Fabric-Wrapped Ceiling Panel : Manufacturer's standard panel construction consisting of facing material [**laminated to front face, edges, and back edge border of core**][**stretched over front face of edge-framed core and bonded or attached to edges and back of frame**]<**Insert description**>.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Acoustical Panel Systems (APS, Inc.)**]
b. [**Acoustical Solutions**]
c. [**Armstrong Ceiling & Wall Solutions**]
d. [**Armstrong World Industries**]
e. [**AVL Systems, Inc**]
f. [**Benton Brothers Solutions, Inc.**]
g. [**Conwed**]
h. [**Decoustics; CertainTeed Architectural Products; a Saint Gobain company**]
i. [**Essi Acoustical Products**]
j. [**G&S Acoustics**]
k. [**Lamvin, Inc**]
l. [**MBI Products Company, Inc**]
m. [**Perdue Acoustics**]
n. [**Sound Concepts**]
o. [**Sound Management Group LLC**]
p. [**Wenger Corporation**]
q. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Acoustical Panel Systems (APS, Inc.)**]
b. [**Acoustical Solutions**]
c. [**Armstrong Ceiling & Wall Solutions**]
d. [**Armstrong World Industries**]
e. [**AVL Systems, Inc**]
f. [**Benton Brothers Solutions, Inc.**]
g. [**Conwed**]
h. [**Decoustics; CertainTeed Architectural Products; a Saint Gobain company**]
i. [**Essi Acoustical Products**]
j. [**G&S Acoustics**]
k. [**Lamvin, Inc**]
l. [**MBI Products Company, Inc**]
m. [**Perdue Acoustics**]
n. [**Sound Concepts**]
o. [**Sound Management Group LLC**]
p. [**Wenger Corporation**]
q. <**Insert manufacturer's name**>

3. Panel Shape: [**Flat**][**As indicated on Drawings**]<**Insert shape**>.
4. Mounting: Back mounted with manufacturer's standard [**metal clips**][**suspension system**][**suspension system with stiffening, back-support angles**]<**Insert requirement**>, secured to substrate.
5. Core: [**Manufacturer's standard**][**Glass-fiber board**][**Glass-fiber blanket**][**Mineral-fiber**

board][Cementitious-fiber board][Medium-density fiberboard][Particleboard]<Insert requirement>.

6. Core Overlay: Polyester batting [1/2 inch (13 mm) thick][manufacturer's standard thickness]<Insert dimension>.
7. Edge Construction: Manufacturer's standard [chemically hardened core with no frame][extruded-aluminum or zinc-coated, rolled-steel frame][extruded PVC frame][wood frame, rabbeted, and splined with glued joints and machined corners]<Insert requirement>.
8. Edge Profile: [Chamfered (beveled)][Eased (small radius)][Mitered (beveled to a point)][Radiused (bullnosed)][Square][Custom profile as indicated on Drawings]<Insert profile>.
9. Corner Detail in Elevation: [Square][Round, radius as indicated on Drawings][Custom as indicated on Drawings]<Insert description> with continuous edge profile indicated.
10. Reveals between Panels: [Recessed][Flush][Projecting] reveals [as selected by Architect from manufacturer's full range][as indicated on Drawings]<Insert requirement>.
11. Facing Material: [Owner-furnished material][As indicated on Drawings]<Insert drawing designation>.
12. Nominal [Core][Overall Panel] Thickness: [3/4 inch (19 mm)][1 inch (25 mm)][1-1/2 inches (38 mm)][2 inches (51 mm)][As indicated on Drawings]<Insert dimension>.
13. Panel Width: [24 inches (610 mm)][30 inches (762 mm)][48 inches (1220 mm)][As indicated on Drawings]<Insert dimension>.
14. Panel Height: [72 inches (1829 mm)][96 inches (2438 mm)][108 inches (2743 mm)][120 inches (3048 mm)][As indicated on Drawings]<Insert dimension>.

2.4 MATERIALS

A. Composite Wood Products: Products shall be made without urea formaldehyde.

B. Composite Wood Products: Products shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

C. Composite Wood Products: Products shall be made using ultra-low-emitting formaldehyde resins as defined in the California Air Resources Board's "Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products" or shall be made with no added formaldehyde.

D. Composite Wood Products: Formaldehyde emission rates shall not be greater than the following when tested according to ASTM D6007 or ASTM E1333:

1. Hardwood Plywood: 0.05 ppm.
2. Particleboard: 0.09 ppm.
3. MDF More Than 5/16 Inch (8 mm) Thick: 0.11 ppm.
4. MDF 5/16 Inch (8 mm) or Less in Thickness: 0.13 ppm.

E. Composite Wood Products: Products shall be made without urea formaldehyde.

F. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than <Insert value> percent.

G. Regional Materials: Products shall be manufactured within 500 miles (800 km) of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within 500 miles (800 km) of Project site.

H. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site.

I. Regional Materials: Products shall be manufactured within **100 miles (160 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **100 miles (160 km)** of Project site.

J. Indigenous Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site. If materials are transported by rail or water, the distance transported by rail or water shall be multiplied by 0.25 to determine the distance to Project site.

K. Regional Materials: Products shall be manufactured within **500 miles (800 km)** of Project site from materials that have been extracted, harvested, or recovered, as well as manufactured, within **500 miles (800 km)** of Project site. If materials are transported by rail or water, the distance transported by rail or water shall be multiplied by 0.25 to determine the distance to Project site.

L. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.

M. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.

N. Certified Wood: Wood products shall be labeled according to the AF&PA's Sustainable Forestry Initiative, be certified as "FSC Pure" according to FSC STD-01-001 and FSC STD-40-004, or be certified and labeled according to the standards of the Programme for Endorsement of Forest Certification.

O. Certified Wood: Wood products shall [**contain not less than 60 percent**][**be made from**] certified wood tracked through a chain-of-custody process. Certified wood documentation shall be provided by sources certified through a forest certification system with principles, criteria, and standards developed using ISO/IEC Guide 59 or the World Trade Organization's "WTO Agreement on Technical Barriers to Trade."

P. Certified Wood: Wood products shall be certified according to the American Tree Farm System's "AFF Standard," the AF&PA's Sustainable Forestry Initiative, FSC STD-01-001 and FSC STD-40-004, or the standards of the Programme for Endorsement of Forest Certification.

Q. Core Materials:[**Manufacturer's standard.**]

1. Glass-Fiber Board: ASTM C612, of type standard with manufacturer; nominal density of [**6 to 7 lb/cu. ft. (96 to 112 kg/cu. m)**]<**Insert value**>, unfaced, and dimensionally stable, molded rigid board; and with maximum flame-spread and smoke-developed indexes of 25 and 50, respectively.
2. Glass-Fiber Blanket: ASTM C553, ASTM C612, or ASTM C665; of type standard with manufacturer; nominal density of [**3 to 4 lb/cu. ft. (48 to 64 kg/cu. m)**]<**Insert value**>; flexible; and with maximum flame-spread and smoke-developed indexes of 25 and 50, respectively.
3. Mineral-Fiber Board: Maximum flame-spread and smoke-developed indexes of 25 and 10, respectively; minimum density of [**13-lb/cu. ft. (208-kg/cu. m)**][**20-lb/cu. ft. (320-kg/cu. m)**].
4. Cementitious-Fiber Board: Density of not less than [**20 lb/cu. ft. (320 kg/cu. m)**]<**Insert value**>.
5. Medium-Density Fiberboard: Panels complying with ANSI A208.2, [**grade to suit performance requirements**][**Grade 130**]<**Insert grade**>.

    a. Fire-retardant panels made from softwood fibers, synthetic resins, and fire-retardant chemicals mixed together at time of panel manufacture to achieve flame-spread index of 25 or less and smoke-developed index of 200 or less when tested in accordance with ASTM E84 or UL 723.

6. Particleboard: Panels complying with ANSI A208.1, [**grade to suit performance requirements**][**Grade M-2**]<**Insert grade**>.

    a. Fire-retardant panels made from softwood particles and fire-retardant chemicals mixed together at time of panel manufacture to achieve flame-spread index of 25 or less and smoke-developed index of 25 or less when tested in accordance with ASTM E84 or UL 723.

7. Core Overlay: Flame-retardant, compressible, fiberfill, polyester batting.
8. Wood and Plywood: Manufacturer's standard plywood or clear, vertical grain, straight, kiln-dried hardwood.

    a. Fire-retardant treated by pressure process with a flame spread index of 25 or less when tested in accordance with ASTM E84 or UL 723, and with no evidence of significant progressive combustion when the test is extended an additional 20 minutes, and with the flame front not extending more than **10.5 feet (3.2 m)** beyond the centerline of the burners at any time during the test.

        1) Treated material is to have a moisture content of 28 percent or less when tested in accordance with ASTM D3201/D3201M at 92 percent relative humidity.
        2) Kiln-dry material after treatment to 19 percent or less for lumber and 15 percent or less for plywood.

R. Facing Material : Fabric from same dye lot; color and pattern [**as indicated by manufacturer's designations**][**matching Architect's samples**][**as selected by Architect from manufacturer's full range**][**as indicated on Drawings**]<**Insert requirement**>.

1. Manufacturer: <**Insert manufacturer's name**>.
2. Product Line/Pattern: <**Insert product name or designation**>.
3. Pattern Repeat: <**Insert requirement**>.
4. Style Number: <**Insert number**>.
5. Color: <**Insert name or number, or both**>.
6. Fiber Content: [**100**]<**Insert number**> percent [**woven polyester**][**nonwoven polyester**][**polyolefin**][**vinyl**]<**Insert fiber requirement**>.
7. Width: [**54 inches (1371 mm)**][**66 inches (1676 mm)**]<**Insert dimension**>.
8. Source: <**Insert fabric-vendor's name**>.
9. Applied Treatments: [**Stain resistance**][**flame-retardant**][**acrylic backing, single coat**][**acrylic backing, double coat**][**latex backing**][**foam backing**][**and**][**knit backing**]<**Insert treatment**>.
10. Light Reflectance: Average value not less than [**0.75**]<**Insert value**> when tested in accordance with ASTM E1477.
11. Lining Material: [**Manufacturer's standard fabric for each use indicated**]<**Insert material designation**>.

S. Lining Material <**Insert material designation**>: Fabric [**as indicated by manufacturer's designations**][**matching Architect's samples**][**as selected by Architect from manufacturer's full range**][**as indicated on Drawings**]<**Insert requirement**>.

1. Manufacturer: <**Insert manufacturer's name**>.
2. Product Line: <**Insert product name or designation**>.
3. Style Number: <**Insert number**>.
4. Color: [**White**]<**Insert name or number, or both**>.
5. Fiber Content: <**Insert content by percentage and fiber type**>.
6. Width: [**54 inches (1371 mm)**][**66 inches (1676 mm)**]<**Insert dimension**>.
7. Source: <**Insert fabric-vendor's name**>.
8. Applied Treatments: [**Stain resistance**][**and**][**flame retardant**]<**Insert treatment**>.

T. Mounting Devices: Concealed on back of panel, recommended by manufacturer to support weight of panel.

2.5 FABRICATION

A. Standard Construction: Use manufacturer's standard construction except as otherwise indicated; with facing material applied to face, edges, and back border of dimensionally stable core; and with rigid edges to reinforce panel perimeter against warpage and damage.

B. Measure each area and establish layout of panels and joints of [**uniform size with balanced borders at opposite edges**][**sizes indicated on Drawings**] within a given area.

C. Edge Hardening: For [**glass-fiber board**][**and**][**mineral-fiber board**] cores, chemically harden core edges and areas of core where mounting devices are attached.

D. Core Overlay: Evenly stretched over core face and edges and securely attached to core; free from puckers, ripples, wrinkles, or sags.

E. Facing Material[**and Lining Material**]: Apply fabric fully covering visible surfaces of panel; with material stretched straight, on the grain, tight, square, and free from puckers, ripples, wrinkles, sags, blisters, seams, adhesive, or other visible distortions or foreign matter.

1. Square Corners: Tailor corners.[**Heat seal vinyl fabric seams at corners.**]
2. Radius and Other Nonsquare Corners: Attach material so there are no seams or gathering of material.
3. Fabrics with Directional or Repeating Patterns or Directional Weave: Mark fabric top and attach fabric in same direction so pattern or weave matches adjacent panels.

F. Dimensional Tolerances of Finished Panels: Plus or minus **1/16 inch (1.6 mm)** for the following:

1. Thickness.
2. Edge straightness.
3. Overall length and width.
4. Squareness from corner to corner.
5. Chords, radii, and diameters.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine fabric, fabricated panels, substrates, areas, and conditions for compliance with requirements, installation tolerances, and other conditions affecting panel performance.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION

A. Install panels in locations indicated. Unless otherwise indicated, install units with edges in alignment with walls and other panels, faces flush, and scribed to fit adjoining work accurately at borders and at penetrations.

B. Comply with panel manufacturer's written instructions for installation of panels using type of mounting devices indicated. Mount panels securely to supporting substrate.

C. Align fabric pattern and grain[**with adjacent panels**][**as shown on Drawings**].

3.3 INSTALLATION TOLERANCES

A. Variation from Alignment with Surfaces: Plus or minus [**1/16 inch (1.6 mm)**]<**Insert dimension**> in **48 inches (1200 mm)**, noncumulative.

B. Variation from Level or Slope: Plus or minus [**1/16 inch (1.6 mm)**][**1/8 inch (3.2 mm)**]<**Insert dimension**>.

C. Variation of Joint Width: Not more than [**1/16 inch (1.6 mm)**][**1/32 inch (0.79 mm)**]<**Insert dimension**> wide from [**hairline**][**reveal line**] in **48 inches (1200 mm)**, noncumulative.

3.4 CLEANING

A. Clip loose threads; remove pills and extraneous materials.

B. Clean panels on completion of installation to remove dust and other foreign materials according to manufacturer's written instructions.

END OF SECTION 09 54 00 00A

Task	Specification	Specification Description
09 54 16 00	09 54 00 00	Stretched-Fabric Ceiling Systems
09 54 16 00	09 54 00 00a	Fabric-Wrapped Ceiling Panels

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 54 23 00 - LINEAR METAL CEILINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Linear metal ceilings.

1.2 ALLOWANCES

A. See Section 012100 "Allowances" for description of allowances affecting items specified in this Section.

1.3 UNIT PRICES

A. See Section 012200 "Unit Prices" for description of unit prices affecting items specified in this Section.

1.4 ALTERNATES

A. See Section 012300 "Alternates" for description of alternates affecting items specified in this Section.

1.5 COORDINATION

A. Coordinate layout and installation of linear metal pans and suspension system with other construction that penetrates ceilings or is supported by them, including light fixtures, HVAC equipment, fire-suppression system, and partition assemblies.

1.6 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

1. <**Insert participant requirements**>.

1.7 ACTION SUBMITTALS

A. Product Data: For linear metal ceilings.

B. Sustainable Design Submittals:

1. Product Data: For recycled content, indicating postconsumer and preconsumer recycled content and cost.
2. Recycled Content: Provide manufacturer documentation for recycled content, indicating postconsumer and preconsumer recycled content.
3. Product Data: For adhesives, indicating VOC content.
4. Laboratory Test Reports: For adhesives, indicating compliance with requirements for low-emitting

materials.

C. Shop Drawings: For linear metal ceilings.

1. Include reflected ceiling plans, sections, and details, drawn to scale, showing the following:

a. Linear ceiling patterns and joints.
b. Ceiling suspension members.
c. Method of attaching hangers to building structure and locations of cast-in-place anchors, clips, and other ceiling attachment devices whose installation is specified in other Sections.
d. Ceiling-mounted items including, but not limited to, light fixtures, diffusers, grilles, speakers, sprinklers, and access panels.
e. Ceiling perimeter and penetrations through ceiling; trim and moldings.

D. Samples: For each exposed product and for each type, color, and finish specified, **12 inches (305 mm)** long in size.

E. Samples for Initial Selection: For units with factory-applied colors and finishes.

1. Include Samples of accessories involving color and finish selections.

F. Samples for Verification: For the following products:

1. Linear Metal Pans: **12 inches (305 mm)** long by full-width Samples of each type, color, and finish and a **12-inch- (305-mm-)** long spliced section.
2. Suspension-System Members: **12-inch- (305-mm-)** long Sample of each type.
3. Exposed Molding and Trim: **12-inch- (305-mm-)** long Samples of each type, color, and finish.
4. Filler Strips: **12-inch- (305-mm-)** long Samples of each type, color, and finish.
5. Sound Absorbers: **12 inches (305 mm)** long by full width.
6. End Caps: Full size.

G. Delegated Design Submittals: For design of[**seismic restraints and**] attachment devices.

1.8 INFORMATIONAL SUBMITTALS

A. Qualification Data: For testing agency.

B. Product Test Reports: For each linear metal ceiling, for tests performed by a qualified testing agency.

C. Evaluation Reports: For linear-metal-ceiling framing systems.

D. Field quality-control reports.

1.9 CLOSEOUT SUBMITTALS

A. Maintenance Data: For finishes to include in maintenance manuals.

1.10 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Linear-Metal-Ceiling Components: Quantity of each pan, carrier, accessory, and exposed molding and trim equal to [**2**]<**Insert number**> percent of quantity installed.

1.11 QUALITY ASSURANCE

A. Testing Agency Qualifications: Accredited by National Voluntary Laboratory Accreditation Program for testing indicated.

B. Mockups: Build mockups to verify selections made under Sample submittals and to demonstrate aesthetic effects and to set quality standards for materials and execution.

1. Build mockup of each type of linear metal ceiling as shown on Drawings.
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

C. Manufacturer Qualifications: A qualified manufacturer that is certified for chain of custody by an FSC-accredited certification body.

D. Certified Wood: Provide an invoice including vendor's chain-of-custody number, product cost, and entity being invoiced.

E. Vendor Qualifications: A vendor that is certified for chain of custody by an FSC-accredited certification body.

F. Vendor Qualifications: A vendor that is certified for chain of custody by an FSC-accredited certification body.

1.12 DELIVERY, STORAGE, AND HANDLING

A. Deliver ceiling components and accessories to Project site in original, unopened packages and store them in a fully enclosed, conditioned space where they are protected against damage from moisture, humidity, temperature extremes, direct sunlight, surface contamination, and other causes.

B. Handle ceiling components and accessories in a manner that prevents damage.

1.13 PROJECT CONDITIONS

A. Environmental Limitations: Do not install interior ceilings until spaces are enclosed and weathertight, wet-work in spaces is complete and dry, work above ceilings is complete, and HVAC system is operating and maintaining temperature and relative humidity at levels planned for building occupants during the remainder of the construction period.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements" to design [**seismic restraints and**]attachment devices.

B. Structural Performance: Exterior linear metal ceilings to withstand exterior exposure, the effects of gravity loads, and the following loads and stresses without showing permanent deformation of ceiling system components, including pans and suspension system; noise or metal fatigue caused by vibration, deflection, and displacement of ceiling pans; or permanent damage to fasteners and anchors:

1. Wind Load: Uniform pressure [**indicated on Drawings**]<**Insert requirements**>, acting inward or outward.

C. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

1. Temperature Change (Range): [**120 deg F (67 deg C), ambient; 180 deg F (100 deg C) material surfaces**]<**Insert requirements**>.

D. Seismic Criteria: Provide linear metal ceilings designed and installed to withstand the effects of earthquake motions in accordance with [**ASTM E580/E580M**][**CISCA's "Recommendations for Direct-Hung Acoustical Tile and Lay-in Panel Ceilings - Seismic Zones 0-2"**][**CISCA's "Guidelines for Seismic Restraint of Direct-Hung Suspended Ceiling Assemblies - Seismic Zones 3 & 4"**][**ASCE/SEI 7**]<**Insert requirements**> and requirements of authorities having jurisdiction.

E. Recycled Content of Steel Products: Postconsumer recycled content plus one-half of preconsumer recycled content not less than [**25**]<**Insert value**> percent.

2.2 LINEAR METAL CEILINGS

A. Pans and Suspension System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American Decorative Ceilings, Inc.**]
b. [**Armstrong Ceiling & Wall Solutions**]
c. [**B+N Industries, Inc.**]
d. [**Rockfon; ROCKWOOL International**]
e. [**USG Corporation**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**American Decorative Ceilings, Inc.**]
b. [**Armstrong Ceiling & Wall Solutions**]
c. [**B+N Industries, Inc.**]
d. [**Rockfon; ROCKWOOL International**]
e. [**USG Corporation**]
f. <**Insert manufacturer's name**>

B. Metal Pans: Complying with ASTM E1264 for [**Type XIII**][**Type XX**] and formed to snap on to carriers securely, without separate fasteners.

1. Surface-Burning Characteristics: For metal-pan assemblies, including backings, determined by testing in accordance with ASTM E84 by a qualified testing agency. Identify products with

appropriate markings of applicable testing agency.

a. Flame-Spread Index: [**25**]<**Insert value**> or less.
b. Smoke-Developed Index: [**50**][**55**]<**Insert value**> or less.

2. Metal: [**Aluminum sheet, ASTM B209 (ASTM B209M), alloy and temper recommended by producer and finisher for type of use and finish indicated**][**Electrolytic zinc-coated steel sheet, ASTM A879/A879M, 04Z (12G) coating; surface treatment as recommended by finish manufacturer for type of use and painted finish indicated**]<**Insert requirements**>.
3. Form: [**Perforated**][**Nonperforated**].

a. Perforation Pattern: [**As indicated by manufacturers designation**]<**Insert requirements**>.

4. Noise Reduction Coefficient (NRC) Rating: Not less than [**0.70**][**0.75**][**0.85**][**1.00**]<**Insert requirements**> when tested in accordance with ASTM C423.
5. Backing: [**Manufacturer's standard to provide NRC rating indicated for perforation pattern indicated**][**Nonwoven black fabric**][**Nonwoven black fabric with 1-inch- (25-mm-) thick glass fiber, 1 lb/cu. ft. (16 kg/cu. m) density, enclosed in black polyethylene**][**1-inch- (25-mm-) thick glass fiber, 1 lb/cu. ft. (16 kg/cu. m) density, enclosed in black polyethylene**]<**Insert requirements**>.
6. Pan Thickness: Not less than [**0.020 inch (0.51 mm)**][**0.025 inch (0.64 mm)**][**0.028 inch (0.71 mm)**][**0.040 inch (1.02 mm)**]<**Insert dimension**>.
7. Pan Edge Detail: [**Beveled**][**Square**][**Round**][**Manufacturer's standard**].
8. Pan Width: [**2-inch (51-mm) module width and 1-1/4-inch (32-mm) face width**][**4-inch (102-mm) module width and 3-1/4-inch (83-mm) face width**][**6-inch (152-mm) module width and 5-1/4-inch (133-mm) face width**][**8-inch (203-mm) module width and 7-1/4-inch (184-mm) face width**][**As indicated on Drawings**]<**Insert dimensions**>.
9. Pan Depth: [**5/8 inch (16 mm)**][**3/4 inch (19 mm)**][**1 inch (25 mm)**][**1-1/2 inches (38 mm)**][**As indicated on Drawings**]<**Insert dimension**>.
10. Metal-Pan Finish: Protected on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping and as follows:

a. Aluminum Anodic Finish: [**Clear finish, AAMA 611, AMP 500 AA-M12C22A31, Class II, 0.010 mm or thicker**][**Clear, mirror finish, AMP 500 AA-M21C12A212, 0.005 mm or thicker**]<**Insert requirements**>.
b. Color-Coated Finish: Manufacturer's standard[**powder-coat**] baked paint finish complying with coating manufacturer's written instructions for surface preparation, pretreatment, application, baking, and minimum dry film thickness.

1) Color and Pattern: [**As selected by Architect from manufacturer's full range**][**Match Architect's sample**][**As indicated by manufacturer's product designation**]<**Insert requirements**>.
2) Light Reflectance (LR) Coefficient: Not less than [**0.61**][**0.77**][**0.81**]<**Insert value**> LR when tested in accordance with ASTM E1477.

c. Laminated-Film Finish: Provide [**manufacturer's standard**][**vinyl**][**PVC-free**]<**Insert requirements**> film permanently bonded to metal pan with adhesive.

1) Color and Pattern: [**As selected by Architect from manufacturer's full range**][**Match Architect's sample**][**As indicated by manufacturer's product designation**]<**Insert requirements**>.

d. Wood-Veneer Finish: [**Match Architect's sample**][**As indicated by manufacturer's product designation**][**Wood veneer in species and finish selected by Architect from manufacturer's full range**]<**Insert requirements**>; permanently bonded to metal pan with

adhesive.

e. Finish Bonding Adhesive: Manufacturer's standard that permanently bonds finish to aluminum.

C. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-00 and FSC STD-40-004.

D. Certified Wood: Wood products shall be certified as "FSC Pure"[**or "FSC Mixed Credit"**] according to FSC STD-01-001 and FSC STD-40-004.

E. Certified Wood: Wood products shall be labeled according to the AFPA's Sustainable Forestry Initiative, be certified as "FSC Pure" according to FSC STD-01-001 and FSC STD-40-004, or be certified and labeled according to the standards of the Programme for Endorsement of Forest Certification.

F. Certified Wood: Wood products shall [**contain not less than 60 percent**][**be made from**] certified wood tracked through a chain-of-custody process. Certified wood documentation shall be provided by sources certified through a forest certification system with principles, criteria, and standards developed using ISO/IEC Guide 59 or the World Trade Organization's "Technical Barriers to Trade."

G. Certified Wood: Wood products shall be certified according to the American Tree Farm System's "AFF Standard," the AFPA's Sustainable Forestry Initiative, FSC STD-01-001 and FSC STD-40-004, or the standards of the Programme for Endorsement of Forest Certification.

H. Adhesives: Do not use adhesives that contain urea formaldehyde.

I. Adhesives: Use adhesives that meet the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

J. Adhesives: Use adhesives that meet the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

K. Adhesives: Do not use adhesives that contain urea formaldehyde.

L. Adhesives: Do not use adhesives that contain urea formaldehyde.

M. Pan Splices: Formed for snap fit into butt-cut pans, [**4 inches (102 mm)**][**8 to 12 inches (203 to 305 mm)**]<**Insert dimension**> long.

1. Finish: [**Manufacturer's standard**][**Matte black**][**Matching pan**]<**Insert requirements**>.

N. End Caps: Manufacturer's standard material fabricated to fit and conceal exposed ends of pans.

1. Finish: [**Manufacturer's standard**][**Matte black**][**Matching pan**]<**Insert requirements**>.

O. Filler Strips: Manufacturer's standard, fabricated to close voids between pans.

1. Type: [**Recessed**][**Flush**][**Integral extension of pan profile**][**Expansion, for use with expansion carriers**][**Slotted, for air diffusion**]<**Insert requirements**>.
2. Finish: [**Manufacturer's standard**][**Matte black**][**Matching pan**]<**Insert requirements**>.

P. Moldings and Trim: Manufacturer's standard for exposed members, to conceal edges of penetrations through ceiling, to conceal ends of pans and carriers, for fixture trim and adapters, for fasciae at

changes in ceiling height, and for other conditions; of metal and finish matching linear metal pans or extruded plastic unless otherwise indicated.

1. For Circular Penetrations of Ceiling: Fabricate edge moldings to diameter required to fit penetration exactly.

Q. Carrier Suspension System: Manufacturer's standard complying with requirements in ASTM C635/C635M for applications indicated; complete with carriers, splice sections, stabilizing components, connector clips, alignment clips, leveling clips, hangers, molding, trim, retention clips, load-resisting struts, fixture adapters, and other suspension components required to support ceiling units and other ceiling-supported construction.

1. Material: [**ASTM A653/A653M, hot-dip galvanized, cold-rolled sheet steel, G60 (Z180) coating designation**][**ASTM A879/A879M, electrolytic zinc-coated, cold-rolled steel, 08Z (24G) coating designation**][**ASTM B209 (ASTM B209M) aluminum**]<**Insert requirements**>.
2. Structural Classification: [**Heavy-duty**]<**Insert requirements**> system.
3. Adaptable Carriers: Manufacturer's standard carriers for direct attachment to existing suspended tees.
4. Flexible Radial Carriers: Manufacturer's standard radial carriers.
5. Expansion Carriers: Manufacturer's standard carriers allowing for irregularities or other unusual space conditions.
6. Stabilizer Channels, Tees, and Bars: Manufacturer's standard components for stabilizing main carriers.
7. Carrier Splices: Same metal, profile, and finish as for carriers.
8. Hold-Down Clips: Manufacturer's standard hold-down clips spaced as standard with manufacturer.
9. Carrier Finish: [**Flat black**]<**Insert requirements**>.

2.3 CARRIER-SYSTEM HANGERS, BRACES, AND TIES

A. Attachment Devices: Size for 5 times the design load indicated in ASTM C635/C635M, Table 1, Direct Hung, unless otherwise indicated.

1. Cast-in-Place and Postinstalled Anchors in Concrete: Anchors of type and material indicated below, with holes or loops for attaching hangers of type indicated and with capability to sustain, without failure, a load equal to [**5**]<**Insert safety factor**> times that imposed by ceiling construction as determined by testing in accordance with ASTM E488/E488M or ASTM E1512, as applicable, conducted by a qualified testing and inspecting agency.

   a. Type: [**Cast-in-place**][**Postinstalled expansion**][**Postinstalled bonded**] anchors.
   b. Corrosion Protection:

      1) Carbon-steel components zinc plated to comply with ASTM B633, Class Fe/Zn 5 (0.005 mm) for Class SC service condition (mild).
      2) Stainless steel components complying with ASTM F593 and ASTM F594, Group 1 Alloy 304 or 316 for bolts; Alloy 304 or 316 for anchors.
      3) Components fabricated from nickel-copper-alloy rods complying with ASTM B164 for UNS No. N04400 alloy.

2. Power-Actuated Fasteners in Concrete: Fastener system of type suitable for application indicated, fabricated from corrosion-resistant materials, with clips or other accessory devices for attaching hangers of type indicated, and with capability to sustain, without failure, a load equal to [**10**]<**Insert safety factor**> times that imposed by ceiling construction as determined by testing in accordance with ASTM E1190 conducted by a qualified testing and inspecting agency.

B. Wire Hangers, Braces, and Ties: Provide wire complying with the following requirements:

1. Zinc-Coated, Carbon-Steel Wire: ASTM A641/A641M, Class 1 zinc coating, soft temper.
2. Stainless Steel Wire: ASTM A580/A580M, Type 304, nonmagnetic.
3. Nickel-Copper-Alloy Wire: ASTM B164, nickel-copper-alloy UNS No. N04400.
4. Size: Select wire diameter so its stress at 3 times the hanger design load indicated in ASTM C635/C635M, Table 1, Direct Hung is less than yield stress of wire, but provides not less than [**0.106-inch- (2.69-mm-)**][**0.135-inch- (3.5-mm-)**]<**Insert dimension**> diameter wire.

C. Rods and Flat Hangers: Mild steel, zinc coated or protected with rust-inhibitive paint.

D. Angle Hangers: Angles with legs not less than **7/8 inch (22 mm)** wide; formed from **0.04-inch- (1.0-mm-)** thick, galvanized-steel sheet complying with ASTM A653/A653M, **G90 (Z275)** coating designation; with bolted connections and **5/16-inch- (8-mm-)** diameter bolts.

E. Seismic Struts: Suspension-system manufacturer's standard compression struts designed to accommodate seismic forces.

F. Exterior Bracing: Cold-rolled steel channels and angles, hot-dip galvanized to comply with ASTM A653/A653M, **G60 (Z180)** coating designation; size and profile as required to withstand wind load.

2.4 ACCESSORIES

A. Access Panels: For access at locations indicated, provide door hinge assembly, retainer clip, and retainer bar, assembled with ceiling panels and carrier sections into access doors permitting upward or downward opening.

1. Size: [**As indicated on Drawings**][**24 inches (610 mm) square**]<**Insert requirements**>.

B. Air-Distribution Devices: Where indicated on Drawings, provide independently suspended air-distribution devices that are relocatable and adjustable from below finished ceiling, that do not interrupt ceiling components, and that are fully concealed by and integrated with ceiling system.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, including structural framing and substrates to which linear metal ceilings attach or abut, with Installer present, for compliance with requirements specified in this and other Sections that affect ceiling installation and anchorage and with requirements for installation tolerances and other conditions affecting performance of linear metal ceilings.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Measure each ceiling area and establish layout of linear metal pans.

1. Balance border widths at opposite edges of each ceiling.
2. Avoid using less-than-half-width pans at borders.

3.3 INSTALLATION OF LINEAR METAL CEILINGS

A. Comply with ASTM C636/C636M and seismic requirement indicated, in accordance with manufacturer's written instructions and CISCA's "Ceiling Systems Handbook."

B. Suspend ceiling hangers from building's structural members and as follows:

1. Install hangers plumb and free from contact with insulation or other objects within ceiling plenum that are not part of supporting structure or of ceiling suspension system.
2. Splay hangers only where required to miss obstructions; offset resulting horizontal forces by bracing, countersplaying, or other equally effective means.
3. Where width of ducts and other construction within ceiling plenum produces hanger spacings that interfere with location of hangers at spacings required to support standard suspension-system members, install supplemental suspension members and hangers in form of trapezes or equivalent devices.
4. Secure wire hangers to ceiling suspension members and to supports above with a minimum of three tight turns in **3 inches (76 mm)**. Connect hangers directly either to structures or to inserts, eye screws, or other devices that are secure and appropriate for substrate to which hangers are attached and for type of hanger involved.
5. Secure flat, angle, channel, and rod hangers to structure, including intermediate framing members, by attaching to inserts, eye screws, or other devices that are secure and appropriate for both structure to which hangers are attached and type of hanger involved. Install hangers in a manner that does not cause them to deteriorate or fail due to age, corrosion, or elevated temperatures.
6. Do not support ceilings directly from permanent metal forms or floor deck. Fasten hangers to cast-in-place hanger inserts**[, power-actuated fasteners,]** or postinstalled mechanical or adhesive anchors that extend through forms into concrete.
7. When steel framing does not permit installation of hanger wires at spacing required, install carrying channels or other supplemental support for attachment of hanger wires.
8. Do not attach hangers to steel deck tabs.
9. Do not attach hangers to steel roof deck. Attach hangers to structural members.
10. Space hangers not more than **48 inches (1219 mm)** o.c. along each member supported directly from hangers unless otherwise indicated; provide hangers not more than **8 inches (203 mm)** from ends of each member.
11. Size supplemental suspension members and hangers to support ceiling loads within performance limits established by referenced standards and publications.

C. Secure bracing wires to ceiling suspension members and to supports with a minimum of four tight turns in **1-1/2 inches (38 mm)**. Suspend bracing from building's structural members as required for hangers and without attaching to permanent metal forms, steel deck, or steel deck tabs. Fasten bracing wires into concrete with cast-in-place or postinstalled anchors.

D. Install edge moldings and trim at perimeter of linear metal ceiling area and where necessary to conceal edges and ends of linear metal pans.

1. Screw attach moldings to substrate at intervals of not more than **16 inches (406 mm)** o.c. and not more than **3 inches (76 mm)** from ends, leveling with ceiling suspension system to a tolerance of **1/8 inch in 12 feet (3 mm in 3.7 m)**. Miter corners accurately and connect securely.
2. Do not use exposed fasteners, including pop rivets, on moldings and trim.

E. Install suspension-system carriers so they are aligned and securely interlocked with one another.

1. Install stabilizer channels, tees, and bars at regular intervals to stabilize carriers and at light fixtures, air-distribution equipment, access doors, and other equipment; spaced as standard with manufacturer for use indicated.
2. Remove and replace dented, bent, or kinked members.

F. Cut linear metal pans for accurate fit at borders and at interruptions and penetrations by other work through ceilings. Stiffen edges of cut units as required to eliminate evidence of buckling or variations in flatness.

G. Install linear metal pans in coordination with suspension system and exposed moldings and trim.

1. Align joints in adjacent courses to form uniform, straight joints parallel to room axis in both directions unless otherwise indicated on Drawings.
2. Fit adjoining units to form flush, tight joints. Scribe and cut units for accurate fit at borders and around construction penetrating ceiling.

a. Install pans with butt joints [**aligned**][**aligned, every other pan length**][**staggered a minimum of 12 inches (305 mm)**][**randomly aligned**][**aligned as indicated on Drawings**]<**Insert requirements**> using internal pan splices.

3. Install directionally textured or patterned metal pans in directions indicated.
4. Where metal pan ends are visible, install end caps unless trim is indicated.
5. Install filler strips where indicated [**on Drawings**]<**Insert requirements**>.
6. Install sound-absorbent pads at right angle to perforated metal pans so pads do not hang unsupported.

H. Install hold-down clips where indicated.

3.4 FIELD QUALITY CONTROL

A. Special Inspections: [**Owner will engage**][**Engage**] a qualified special inspector to perform the following special inspections:

1. Suspended ceiling system.
2. Hangers, anchors, and fasteners.
3. <**Insert special inspections**>.

B. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to perform tests and inspections.

C. Tests and Inspections: Testing and inspecting of completed installations of linear metal ceiling hangers, anchors, and fasteners to take place in successive stages, in test areas and using methods as follows. Do not proceed with installations of linear metal ceiling hangers for the next area until test results for previously completed installations show compliance with requirements.

1. Test Areas: Test installation of ceiling suspension systems on each floor when installation has reached 20 percent completion but before pans have been installed.

a. Within each test area, testing agency will select one of every 10 power-actuated fasteners and postinstalled anchors used to attach hangers to concrete and will test them for **200 lbf (890 N)** of tension; it will also select one of every two postinstalled anchors used to attach bracing wires to concrete and will test them for **440 lbf (1957 N)** of tension.
b. When testing discovers fasteners and anchors that do not comply with requirements, testing agency will test those anchors not previously tested until 20 pass consecutively and then will resume initial testing frequency.

D. Linear metal ceiling hangers, anchors, and fasteners will be considered defective if they do not pass tests and inspections.

E. Prepare test and inspection reports.

3.5 CLEANING

A. Clean exposed surfaces of linear metal ceilings, including trim and edge moldings, after removing strippable, temporary protective covering if any. Comply with manufacturer's written instructions for stripping of temporary protective covering, cleaning, and touchup of minor finish damage. Remove and replace ceiling components that cannot be successfully cleaned and repaired to permanently eliminate evidence of damage, including dented and bent units.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 91 13 00 - EXTERIOR PAINTING

1.1 GENERAL

A. Description Of Work
1. This specification covers the furnishing and installation of materials for exterior painting. Products shall be as follows or as directed by the Owner. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.

B. Summary
1. This Section includes surface preparation and the application of paint systems on the following exterior substrates:
   a. Concrete.
   b. Clay masonry.
   c. Concrete masonry units (CMU).
   d. Steel.
   e. Galvanized metal.
   f. Aluminum (not anodized or otherwise coated).
   g. Wood.
   h. Plastic trim fabrications.
   i. Exterior portland cement (stucco).
   j. Exterior gypsum board.

C. Submittals
1. Product Data: For each type of product indicated. Provide data on all finishing products, including VOC content.
2. Samples: For each finish and for each color and texture required. Submit two painted samples, illustrating selected colors and textures for each color and system selected. Submit on tempered hardboard, 8 x 10 inch in size.
3. Product List: Printout of current "MPI Approved Products List" for each product category specified in Part 1.2, with the proposed product highlighted.

D. Quality Assurance
1. MPI Standards:
   a. Products: Complying with MPI standards indicated and listed in "MPI Approved Products List."
   b. Preparation and Workmanship: Comply with requirements in "MPI Architectural Painting Specification Manual" for products and paint systems indicated. For renovation projects, comply with requirements of "MPI Maintenance Repainting Manual" for products and paint systems indicated.

E. Delivery, Storage, And Handling
1. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than 45 deg F (7 deg C).
   a. Maintain containers in clean condition, free of foreign materials and residue.
   b. Remove rags and waste from storage areas daily.

F. Project Conditions
1. Apply paints only when temperature of surfaces to be painted and ambient air temperatures are between 50 and 95 deg F (10 and 35 deg C).
2. Do not apply paints in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures less than 5 deg F (3 deg C) above the dew point; or to damp or wet surfaces.
3. Provide lighting level of 80 ft candles measured mid-height at substrate surface.

1.2 PRODUCTS

A. Paint, General
1. Conform to applicable code for flame and smoke rating requirements for products and finishes.
2. Conform to County of San Mateo Public Works Building Standards
   a. Paint products shall not contain formaldehyde, aqueous ammonia, crystalline silica, or ethylene glycol. Total Volatile Organic Compounds (VOC) shall not exceed 2.9 pounds per gallon.
3. Material Compatibility:
   a. Provide materials for use within each paint system that are compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
   b. For each coat in a paint system, provide products recommended in writing by manufacturers of topcoat for use in paint system and on substrate indicated.
4. Colors: As selected from manufacturer's full range.

B. Block Fillers
1. Interior/Exterior Latex Block Filler: MPI #4.
   a. VOC Content: E Range of E2 **OR** E3, **as directed**.

C. Primers/Sealers
1. Alkali-Resistant Primer: MPI #3.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
2. Bonding Primer (Water Based): MPI #17.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
3. Bonding Primer (Solvent Based): MPI #69.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
4. Wood-Knot Sealer: Sealer recommended in writing by topcoat manufacturer for use in paint system indicated.

D. Metal Primers
1. Alkyd Anticorrosive Metal Primer: MPI #79.
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
2. Quick-Drying Alkyd Metal Primer: MPI #76.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
3. Cementitious Galvanized-Metal Primer: MPI #26.
   a. VOC Content: E Range of E1.
4. Waterborne Galvanized-Metal Primer: MPI #134.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
5. Quick-Drying Primer for Aluminum: MPI #95.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

E. Wood Primers
1. Exterior Latex Wood Primer: MPI #6.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
2. Exterior Alkyd Wood Primer: MPI #5.
   a. VOC Content: E Range of E2 **OR** E3, **as directed**.
3. Exterior Oil Wood Primer: MPI #7.
   a. VOC Content: E Range of E2.

F. Exterior Latex Paints
1. Exterior Latex (Flat): MPI #10 (Gloss Level 1).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
2. Exterior Latex (Semigloss): MPI #11 (Gloss Level 5).

a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

3. Exterior Latex (Gloss): MPI #119 (Gloss Level 6, except minimum gloss of 65 units at 60 deg).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

G. Exterior Alkyd Paints
1. Exterior Alkyd Enamel (Flat): MPI #8 (Gloss Level 1).
   a. VOC Content: E Range of E1.
2. Exterior Alkyd Enamel (Semigloss): MPI #94 (Gloss Level 5).
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
3. Exterior Alkyd Enamel (Gloss): MPI #9 (Gloss Level 6).
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.

H. Quick-Drying Enamels
1. Quick-Drying Enamel (Semigloss): MPI #81 (Gloss Level 5).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
2. Quick-Drying Enamel (High Gloss): MPI #96 (Gloss Level 7).
   a. VOC Content: E Range of E1 **OR** E **OR** E3, **as directed**.

I. Textured And High-Build Coatings
1. Latex Stucco and Masonry Textured Coating: MPI #42.
   a. VOC Content: E Range of E2 **OR** E3, **as directed**.
2. High-Build Latex (Exterior): MPI #40.
   a. VOC Content: E Range of E1 **OR** E3, **as directed**.

J. Aluminum Paint
1. Aluminum Paint: MPI #1.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

K. Floor Coatings
1. Interior/Exterior Clear Concrete Floor Sealer (Water Based): MPI #99.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
2. Interior/Exterior Clear Concrete Floor Sealer (Solvent Based): MPI #104.
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
3. Interior/Exterior Latex Floor and Porch Paint (Low Gloss): MPI #60 (maximum Gloss Level 3).
   a. VOC Content: E Range of E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 3.
4. Exterior/Interior Alkyd Floor Enamel (Gloss): MPI #27 (Gloss Level 6).
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
   b. Additives: Manufacturer's standard additive to increase skid resistance of painted surface.

L. Accessory Materials: Linseed oil, shellac, turpentine, paint thinners and other materials not specifically indicated but required to achieve the finishes specified; commercial quality.

1.3 EXECUTION

A. Examination
1. Examine substrates and conditions, with Applicator present, for compliance with requirements for maximum moisture content and other conditions affecting performance of work.
2. Maximum Moisture Content of Substrates: When measured with an electronic moisture meter as follows:
   a. Concrete: 12 percent.
   b. Masonry (Clay and CMU): 12 percent.
   c. Wood: 15 percent.
   d. Plaster: 12 percent.
   e. Gypsum Board: 12 percent.

3. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.
4. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.
   a. Beginning coating application constitutes Contractor's acceptance of substrates and conditions.

B. Preparation And Application
1. Comply with manufacturer's written instructions and recommendations in "MPI Architectural Painting Specification Manual" applicable to substrates and paint systems indicated.
2. Clean substrates of substances that could impair bond of paints, including dirt, oil, grease, and incompatible paints and encapsulants.
   a. Remove incompatible primers and reprime substrate with compatible primers as required to produce paint systems indicated.
3. Apply paints to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.
4. Protect work of other trades against damage from paint application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.
5. At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.
6. Marks: Seal with shellac those which may bleed through surface finishes.
7. Impervious Surfaces: Remove mildew by scrubbing with solution of tetra-sodium phosphate and bleach. Rinse with clean water and allow surface to dry.

C. Exterior Painting Schedule
1. Paint systems herein are based on "MPI Architectural Painting Specification Manual" (hereafter, "MPI Manual"). For renovation projects, consult "MPI Maintenance Repainting Manual" and revise paint systems accordingly.
2. For a Premium Grade system, "MPI Manual" requires intermediate coat; if Custom Grade system is required or if so directed, delete intermediate coat, **unless directed otherwise** or as otherwise required by manufacturer's recommendations.
3. Concrete Substrates, Nontraffic Surfaces:
   a. Latex System: MPI EXT 3.1A.
      1) Prime Coat: Exterior latex matching topcoat.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Latex Aggregate/Latex System: MPI EXT 3.1 B.
      1) Prime Coat: Latex stucco and masonry textured coating.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Latex Over Alkali-Resistant Primer System: MPI EXT 3.1K.
      1) Prime Coat: Alkali-resistant primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   d. High-Build Latex System: MPI EXT 3.1L, applied to form dry film thickness of not less than 10 mils (0.25 mm).
      1) Prime Coat: As recommended in writing by topcoat manufacturer.
      2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
      3) Topcoat: High-build latex (exterior).
   e. Latex Aggregate System: MPI EXT 3.1N.
      1) Prime Coat: As recommended in writing by topcoat manufacturer.
      2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
      3) Topcoat: Latex stucco and masonry textured coating.

4. Concrete Substrates, Traffic Surfaces:
   a. Latex Floor Paint System: MPI EXT 3.2A.
      1) Prime Coat: Interior/exterior latex floor and porch paint (low gloss).
      2) Intermediate Coat: Interior/exterior latex floor and porch paint (low gloss).
      3) Topcoat: Interior/exterior latex floor and porch paint (low gloss).
   b. Alkyd Floor Enamel System: MPI EXT 3.2D.
      1) Prime Coat: Exterior/interior alkyd floor enamel (gloss).
      2) Intermediate Coat: Exterior/interior alkyd floor enamel (gloss).
      3) Topcoat: Exterior/interior alkyd floor enamel (gloss).
   c. Clear Sealer System: MPI EXT 3.2G.
      1) Prime Coat: Interior/exterior clear concrete floor sealer (solvent based).
      2) Intermediate Coat: Interior/exterior clear concrete floor sealer (solvent based).
      3) Topcoat: Interior/exterior clear concrete floor sealer (solvent based).
   d. Water-Based Clear Sealer System: MPI EXT 3.2H.
      1) Prime Coat: Interior/exterior clear concrete floor sealer (water based).
      2) Intermediate Coat: Interior/exterior clear concrete floor sealer (water based).
      3) Topcoat: Interior/exterior clear concrete floor sealer (water based).
5. Clay-Masonry Substrates:
   a. Latex System: MPI EXT 4.1A.
      1) Prime Coat: Exterior latex matching topcoat.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. High-Build Latex System: MPI EXT 4.1H, applied to form dry film thickness of not less than 10 mils (0.25 mm).
      1) Prime Coat: As recommended in writing by topcoat manufacturer.
      2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
      3) Topcoat: High-build latex (exterior).
   c. Latex Aggregate System: MPI EXT 4.1B.
      1) Prime Coat: As recommended in writing by topcoat manufacturer.
      2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
      3) Topcoat: Latex stucco and masonry textured coating.
6. CMU Substrates:
   a. Latex System: MPI EXT 4.2A.
      1) Prime Coat: Interior/exterior latex block filler.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Latex Over Alkali-Resistant Primer System: MPI EXT 4.2L.
      1) Prime Coat: Alkali-resistant primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. High-Build Latex System: MPI EXT 4.2K, applied to form dry film thickness of not less than 10 mils (0.25 mm).
      1) Prime Coat: As recommended in writing by topcoat manufacturer.
      2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
      3) Topcoat: High-build latex (exterior).
   d. Latex Aggregate System: MPI EXT 4.2B.
      1) Prime Coat: As recommended in writing by topcoat manufacturer.
      2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
      3) Topcoat: Latex stucco and masonry textured coating.
7. Steel Substrates:
   a. Quick-Drying Enamel System: MPI EXT 5.1A.
      1) Prime Coat: Quick-drying alkyd metal primer.
      2) Intermediate Coat: Quick-drying enamel matching topcoat.
      3) Topcoat: Quick-drying enamel (semigloss) **OR** (high gloss), **as directed**.
   b. Alkyd System: MPI EXT 5.1D.
      1) Prime Coat: Alkyd anticorrosive metal primer.

2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

c. Aluminum Paint System: MPI EXT 5.1K.
1) Prime Coat: Alkyd anticorrosive metal primer.
2) Intermediate Coat: Aluminum paint.
3) Topcoat: Aluminum paint.

8. Galvanized-Metal Substrates: Galvanized-metal substrates should not be chromate passivated (commercially known as "bonderized") if primer is field applied. If galvanized metal is chromate passivated, consult manufacturers for appropriate surface preparation and primers.
a. Latex System: MPI EXT 5.3A.
1) Prime Coat: Cementitious galvanized-metal primer.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

b. Latex Over Water-Based Primer System: MPI EXT 5.3H. "MPI Manual" recommends latex over water-based primer system for low-contact/traffic areas.
1) Prime Coat: Waterborne galvanized-metal primer.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

c. Alkyd System: MPI EXT 5.3B.
1) Prime Coat: Cementitious galvanized-metal primer.
2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

9. Aluminum Substrates:
a. Latex System: MPI EXT 5.4H.
1) Prime Coat: Quick-drying primer for aluminum.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

b. Alkyd System: MPI EXT 5.4F.
1) Prime Coat: Quick-drying primer for aluminum.
2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

10. Glue-Laminated Beam and Column Substrates:
a. Latex System: MPI EXT 6.1L.
1) Prime Coat: Exterior latex wood primer.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

b. Latex Over Alkyd Primer System: MPI EXT 6.1A.
1) Prime Coat: Exterior alkyd **OR** oil, **as directed**, wood primer.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

c. Alkyd System: MPI EXT 6.1B.
1) Prime Coat: Exterior alkyd **OR** oil, **as directed,** wood primer.
2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

11. Dressed Lumber Substrates: Including architectural woodwork **OR** doors, **as directed**.
a. Latex System: MPI EXT 6.3L.
1) Prime Coat: Exterior latex wood primer.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**. Flat paint is not recommended for use on doors.

b. Latex Over Alkyd Primer System: MPI EXT 6.3A.
1) Prime Coat: Exterior alkyd **OR** oil, **as directed,** wood primer.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**. Flat paint is not recommended for use on doors.

c. Alkyd System: MPI EXT 6.3B.
   1) Prime Coat: Exterior alkyd **OR** oil, **as directed,** wood primer.
   2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
   3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**. Flat paint is not recommended for use on doors.

12. Wood Panel Substrates: Including plywood siding **OR** fascias **OR** soffits, **as directed**.
   a. Latex System: MPI EXT 6.4K.
      1) Prime Coat: Exterior latex wood primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Latex Over Alkyd Primer System: MPI EXT 6.4G.
      1) Prime Coat: Exterior alkyd wood primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Alkyd System: MPI EXT 6.4B.
      1) Prime Coat: Exterior alkyd **OR** oil, **as directed,** wood primer.
      2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
      3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
13. Wood Shingle and Shake Substrates (Excluding Roofs):
   a. Latex System: MPI EXT 6.6E.
      1) Prime Coat: Exterior latex wood primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Latex Over Alkyd Primer System: MPI EXT 6.6A.
      1) Prime Coat: Exterior alkyd **OR** oil, **as directed**, wood primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Alkyd System: MPI EXT 6.6B.
      1) Prime Coat: Exterior alkyd **OR** oil, **as directed**, wood primer.
      2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
      3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
14. Dimension Lumber Substrates, Nontraffic Surfaces: Including board siding **OR** fencing **OR** undersides of decking, **as directed**.
   a. Latex System: MPI EXT 6.2M.
      1) Prime Coat: Exterior latex wood primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Latex Over Alkyd Primer System: MPI EXT 6.2A.
      1) Prime Coat: Exterior alkyd **OR** oil, **as directed,** wood primer.
      2) Intermediate Coat: Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Alkyd System: MPI EXT 6.2C.
      1) Prime Coat: Exterior alkyd **OR** oil, **as directed,** wood primer.
      2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
      3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
15. Dimension Lumber Substrates, Traffic Surfaces: Including lumber decking **OR** stairs, **as directed**.
   a. Latex System: MPI EXT 6.5E.
      1) Prime Coat: Exterior latex wood primer.
      2) Intermediate Coat: Interior/exterior latex floor and porch (low gloss).
      3) Topcoat: Interior/exterior latex floor and porch (low gloss).
         a) With additive to increase skid resistance of painted surface.
   b. Latex Over Alkyd Primer System: MPI EXT 6.5A.
      1) Prime Coat: Exterior alkyd wood primer.
      2) Intermediate Coat: Interior/exterior latex floor and porch (low gloss).
      3) Topcoat: Interior/exterior latex floor and porch (low gloss).

a) With additive to increase skid resistance of painted surface.

c. Alkyd Floor Enamel System: MPI EXT 6.5B.
1) Prime Coat: Exterior/interior alkyd floor enamel (gloss).
2) Intermediate Coat: Exterior/interior alkyd floor enamel (gloss).
3) Topcoat: Exterior/interior alkyd floor enamel (gloss).
a) With additive to increase skid resistance of painted surface.

16. Plastic Trim Fabrication Substrates:
a. Latex System: MPI EXT 6.8A.
1) Prime Coat: Bonding primer (water based) **OR** (solvent based), **as directed**.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
b. Alkyd System: MPI EXT 6.8B.
1) Prime Coat: Bonding primer (water based) **OR** (solvent based , **as directed**.
2) Intermediate Coat: Exterior alkyd enamel matching topcoat.
3) Topcoat: Exterior alkyd enamel (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

17. Stucco Substrates:
a. Latex System: MPI EXT 9.1A.
1) Prime Coat: Exterior latex matching topcoat.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
b. Latex Over Alkali-Resistant Primer System: MPI EXT 9.1J.
1) Prime Coat: Alkali-resistant primer.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
c. High-Build Latex System: MPI EXT 9.1H, applied to form dry film thickness of not less than 10 mils (0.25 mm).
1) Prime Coat: As recommended in writing by topcoat manufacturer.
2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
3) Topcoat: High-build latex (exterior).

18. Exterior Gypsum Board Substrates:
a. Latex System: MPI EXT 9.2A.
1) Prime Coat: Exterior latex matching topcoat.
2) Intermediate Coat: Exterior latex matching topcoat.
3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.

END OF SECTION 09 91 13 00

Task	Specification	Specification Description
09 91 13 00	01 22 00 00	No Specification Required
09 91 13 00	09 93 00 00	Staining and Transparent Finishing

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 91 23 00 - INTERIOR PAINTING

1.1 GENERAL

A. Description Of Work
1. This specification covers the furnishing and installation of materials for interior painting. Products shall be as follows or as directed by the Owner. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.

B. Summary
1. This Section includes surface preparation and the application of paint systems on the following interior substrates:
   a. Concrete.
   b. Clay masonry.
   c. Concrete masonry units (CMU).
   d. Steel.
   e. Galvanized metal.
   f. Aluminum (not anodized or otherwise coated).
   g. Wood.
   h. Gypsum board.
   i. Plaster.
   j. Spray-textured ceilings.
   k. Cotton or canvas insulation covering.

C. Submittals
1. Product Data: For each type of product indicated. Provide data on all finishing products, including VOC content.
2. Samples: For each finish and for each color and texture required. Submit two painted samples, illustrating selected colors and textures for each color and system selected. Submit on tempered hardboard, 8 x 10 inch in size.
3. Product List: Printout of current "MPI Approved Products List" for each product category specified in Part 1.2, with the proposed product highlighted.
4. LEED Submittal:
   a. Product Data for Credit EQ 4.2: For paints, including printed statement of VOC content and chemical components.

D. Quality Assurance
1. MPI Standards:
   a. Products: Complying with MPI standards indicated and listed in "MPI Approved Products List."
   b. Preparation and Workmanship: Comply with requirements in "MPI Architectural Painting Specification Manual" for products and paint systems indicated.

E. Delivery, Storage, And Handling
1. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than 45 deg F (7 deg C).
   a. Maintain containers in clean condition, free of foreign materials and residue.
   b. Remove rags and waste from storage areas daily.

F. Project Conditions
1. Apply paints only when temperature of surfaces to be painted and ambient air temperatures are between 50 and 95 deg F (10 and 35 deg C).

2. Do not apply paints when relative humidity exceeds 85 percent; at temperatures less than 5 deg F (3 deg C) above the dew point; or to damp or wet surfaces.
3. Provide lighting level of 80 ft candles measured mid-height at substrate surface.

1.2 PRODUCTS

A. Paint, General
1. Conform to applicable code for flame and smoke rating requirements for products and finishes.
2. Conform to County of San Mateo Public Works Building Standards
   a. Paint products shall not contain formaldehyde, aqueous ammonia, crystalline silica, or ethylene glycol. Total Volatile Organic Compounds (VOC) shall not exceed 2.9 pounds per gallon.
3. Material Compatibility:
   a. Provide materials for use within each paint system that are compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
   b. For each coat in a paint system, provide products recommended in writing by manufacturers of topcoat for use in paint system and on substrate indicated.
4. VOC Content of Field-Applied Interior Paints and Coatings: Provide products that comply with the following limits for VOC content, exclusive of colorants added to a tint base, when calculated according to 40 CFR 59, Subpart D (EPA Method 24); these requirements do not apply to paints and coatings that are applied in a fabrication or finishing shop:
   a. Flat Paints, Coatings, and Primers: VOC content of not more than 50 g/L.
   b. Nonflat Paints, Coatings, and Primers: VOC content of not more than 150 g/L.
   c. Anti-Corrosive and Anti-Rust Paints Applied to Ferrous Metals: VOC not more than 250 g/L.
   d. Floor Coatings: VOC not more than 100 g/L.
   e. Shellacs, Clear: VOC not more than 730 g/L.
   f. Shellacs, Pigmented: VOC not more than 550 g/L.
   g. Flat Topcoat Paints: VOC content of not more than 50 g/L.
   h. Nonflat Topcoat Paints: VOC content of not more than 150 g/L.
   i. Anti-Corrosive and Anti-Rust Paints Applied to Ferrous Metals: VOC not more than 250 g/L.
   j. Floor Coatings: VOC not more than 100 g/L.
   k. Shellacs, Clear: VOC not more than 730 g/L.
   l. Shellacs, Pigmented: VOC not more than 550 g/L.
   m. Primers, Sealers, and Undercoaters: VOC content of not more than 200 g/L.
   n. Dry-Fog Coatings: VOC content of not more than 400 g/L.
   o. Zinc-Rich Industrial Maintenance Primers: VOC content of not more than 340 g/L.
5. Pre-Treatment Wash Primers: VOC content of not more than 420 g/L.
6. Chemical Components of Field-Applied Interior Paints and Coatings: Provide topcoat paints and anti-corrosive and anti-rust paints applied to ferrous metals that comply with the following chemical restrictions; these requirements do not apply to paints and coatings that are applied in a fabrication or finishing shop:
   a. Aromatic Compounds: Paints and coatings shall not contain more than 1.0 percent by weight of total aromatic compounds (hydrocarbon compounds containing one or more benzene rings).
   b. Restricted Components: Paints and coatings shall not contain any of the following:
      1) Acrolein.
      2) Acrylonitrile.
      3) Antimony.
      4) Benzene.
      5) Butyl benzyl phthalate.
      6) Cadmium.

7) Di (2-ethylhexyl) phthalate.
8) Di-n-butyl phthalate.
9) Di-n-octyl phthalate.
10) 1,2-dichlorobenzene.
11) Diethyl phthalate.
12) Dimethyl phthalate.
13) Ethylbenzene.
14) Formaldehyde.
15) Hexavalent chromium.
16) Isophorone.
17) Lead.
18) Mercury.
19) Methyl ethyl ketone.
20) Methyl isobutyl ketone.
21) Methylene chloride.
22) Naphthalene.
23) Toluene (methylbenzene).
24) 1,1,1-trichloroethane.
25) Vinyl chloride.

7. Colors: As selected from manufacturer's full range **OR** Match samples **OR** As indicated in a color schedule, **as directed**.

B. Block Fillers
1. Interior/Exterior Latex Block Filler: MPI #4.
a. VOC Content: E Range of E2 **OR** E3, **as directed**.

C. Primers/Sealers
1. Interior Latex Primer/Sealer: MPI #50.
a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
2. Interior Alkyd Primer/Sealer: MPI #45.
a. VOC Content: E Range of E1 **OR** E2, **as directed**.
3. Wood-Knot Sealer: Sealer recommended in writing by topcoat manufacturer for use in paint systems indicated.

D. Metal Primers
1. Alkyd Anticorrosive Metal Primer: MPI #79.
a. VOC Content: E Range of E1 **OR** E2, **as directed**.
2. Quick-Drying Alkyd Metal Primer: MPI #76.
a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
3. Rust-Inhibitive Primer (Water Based): MPI #107.
a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
4. Cementitious Galvanized-Metal Primer: MPI #26.
a. VOC Content: E Range of E1.
5. Waterborne Galvanized-Metal Primer: MPI #134.
a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
6. Vinyl Wash Primer: MPI #80.
a. VOC Content: E Range of E2 **OR** E3, **as directed**.
7. Quick-Drying Primer for Aluminum: MPI #95.
a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

E. Wood Primers
1. Interior Latex-Based Wood Primer: MPI #39.
a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.

F. Latex Paints
1. Interior Latex (Flat): MPI #53 (Gloss Level 1).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 0.5 **OR** EPR 1.5 **OR** EPR 2.5, **as directed**.
2. Interior Latex (Low Sheen): MPI #44 (Gloss Level 2).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
3. Interior Latex (Eggshell): MPI #52 (Gloss Level 3).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
4. Interior Latex (Satin): MPI #43 (Gloss Level 4).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 1.5 **OR** EPR 2 **OR** EPR 2.5 **OR** EPR 3.5, **as directed**.
5. Interior Latex (Semigloss): MPI #54 (Gloss Level 5).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 2 **OR** EPR 3 **OR** EPR 4, **as directed**.
6. Interior Latex (Gloss): MPI #114 (Gloss Level 6, except minimum gloss of 65 units at 60 deg).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 2 **OR** EPR 3 **OR** EPR 4, **as directed**.
7. Institutional Low-Odor/VOC Latex (Flat): MPI #143 (Gloss Level 1).
   a. VOC Content: E Range of E3.
   b. Environmental Performance Rating: EPR 4 **OR** EPR 5.5, **as directed**.
8. Institutional Low-Odor/VOC Latex (Low Sheen): MPI #144 (Gloss Level 2).
   a. VOC Content: E Range of E3.
   b. Environmental Performance Rating: EPR 4.5.
9. Institutional Low-Odor/VOC Latex (Eggshell): MPI #145 (Gloss Level 3).
   a. VOC Content: E Range of E3.
   b. Environmental Performance Rating: EPR 4.5.
10. Institutional Low-Odor/VOC Latex (Semigloss): MPI #147 (Gloss Level 5).
   a. VOC Content: E Range of E3.
   b. Environmental Performance Rating: EPR 3 **OR** EPR 5.5, **as directed**.
11. High-Performance Architectural Latex (Low Sheen): MPI #138 (Gloss Level 2).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 4 **OR** EPR 5 **OR** EPR 6, **as directed**.
12. High-Performance Architectural Latex (Eggshell): MPI #139 (Gloss Level 3).
   a. VOC Content: E Range of E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 5 **OR** EPR 6, **as directed**.
13. High-Performance Architectural Latex (Satin): MPI #140 (Gloss Level 4).
   a. VOC Content: E Range of E1 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 4.5 **OR** EPR 6.5, **as directed**.
14. High-Performance Architectural Latex (Semigloss): MPI #141 (Gloss Level 5).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 5 **OR** EPR 6 **OR** EPR 7, **as directed**.
15. Exterior Latex (Flat): MPI #10 (Gloss Level 1).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
16. Exterior Latex (Semigloss): MPI #11 (Gloss Level 5).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
17. Exterior Latex (Gloss): MPI #119 (Gloss Level 6, except minimum gloss of 65 units at 60 deg).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

G. Alkyd Paints
1. Interior Alkyd (Flat): MPI #49 (Gloss Level 1).

a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

2. Interior Alkyd (Eggshell): MPI #51 (Gloss Level 3).
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
3. Interior Alkyd (Semigloss): MPI #47 (Gloss Level 5).
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
   b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
4. Interior Alkyd (Gloss): MPI #48 (Gloss Level 6).
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.

H. Quick-Drying Enamels
1. Quick-Drying Enamel (Semigloss): MPI #81 (Gloss Level 5).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
2. Quick-Drying Enamel (High Gloss): MPI #96 (Gloss Level 7).
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

I. Textured Coating
1. Latex Stucco and Masonry Textured Coating: MPI #42.
   a. VOC Content: E Range of E2 **OR** E3, **as directed**.

J. Dry Fog/Fall Coatings
1. Latex Dry Fog/Fall: MPI #118.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
2. Waterborne Dry Fall: MPI #133.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 1 **OR** EPR 2 **OR** EPR 3, **as directed**.
3. Interior Alkyd Dry Fog/Fall: MPI #55.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

K. Aluminum Paint
1. Aluminum Paint: MPI #1.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.

L. Floor Coatings
1. Interior Concrete Floor Stain: MPI #58.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 2.
2. Interior/Exterior Clear Concrete Floor Sealer (Water Based): MPI #99.
   a. VOC Content: E Range of E1 **OR** E2 **OR** E3, **as directed**.
3. Interior/Exterior Clear Concrete Floor Sealer (Solvent Based): MPI #104.
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
4. Interior/Exterior Latex Floor and Porch Paint (Low Gloss): MPI #60 (maximum Gloss Level 3).
   a. VOC Content: E Range of E2 **OR** E3, **as directed**.
   b. Environmental Performance Rating: EPR 3.
5. Exterior/Interior Alkyd Floor Enamel (Gloss): MPI #27 (Gloss Level 6).
   a. VOC Content: E Range of E1 **OR** E2, **as directed**.
   b. Additives: Manufacturer's standard additive to increase skid resistance of painted surface.

M. Accessory Materials: Linseed oil, shellac, turpentine, paint thinners and other materials not specifically indicated but required to achieve the finishes specified; commercial quality.

1.3 EXECUTION

A. Preparation

1. Comply with manufacturer's written instructions and recommendations in "MPI Architectural Painting Specification Manual" applicable to substrates indicated.
2. Remove plates, machined surfaces, and similar items already in place that are not to be painted. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and painting.
    a. After completing painting operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection if any.
    b. Do not paint over labels of independent testing agencies or equipment name, identification, performance rating, or nomenclature plates.
3. Clean substrates of substances that could impair bond of paints, including dirt, oil, grease, and incompatible paints and encapsulants.
    a. Remove incompatible primers and reprime substrate with compatible primers as required to produce paint systems indicated.
4. Concrete Substrates: Remove release agents, curing compounds, efflorescence, and chalk. Do not paint surfaces if moisture content or alkalinity of surfaces to be painted exceeds that permitted in manufacturer's written instructions.
5. Clay Masonry Substrates: Remove efflorescence and chalk. Do not paint surfaces if moisture content of surfaces or alkalinity of mortar joints to be painted exceed that permitted in manufacturer's written instructions.
6. Concrete Masonry Substrates: Remove efflorescence and chalk. Do not paint surfaces if moisture content or alkalinity of surfaces to be painted exceeds that permitted in manufacturer's written instructions.
7. Steel Substrates: Remove rust and loose mill scale. Clean using methods recommended in writing by paint manufacturer.
8. Galvanized-Metal Substrates: Remove grease and oil residue from galvanized sheet metal fabricated from coil stock by mechanical methods to produce clean, lightly etched surfaces that promote adhesion of subsequently applied paints.
9. Aluminum Substrates: Remove surface oxidation.
10. Uncoated Steel and Iron Surfaces to be Painted: Remove grease, mill scale, weld splatter, dirt, and rust. Where heavy coatings of scale are evident, remove by hand wire brushing or sandblasting; clean by washing with solvent. Apply a treatment of phosphoric acid solution, ensuring weld joints, bolts, and nuts are similarly cleaned. Prime paint entire surface; spot prime after repairs.
11. Shop-Primed Steel Surfaces to be Finish Painted: Sand and scrape to remove loose primer and rust. Feather edges to make touch-up patches inconspicuous. Clean surfaces with solvent. Prime bare steel surfaces. Re-prime entire shop-primed item.
12. Metal Doors to be Painted: Prime metal door top and bottom edge surfaces.
13. Wood Substrates:
    a. Scrape and clean knots, and apply coat of knot sealer before applying primer.
    b. Sand surfaces that will be exposed to view, and dust off.
    c. Prime edges, ends, faces, undersides, and backsides of wood.
    d. After priming, fill holes and imperfections in the finish surfaces with putty or plastic wood filler. Sand smooth when dried.
14. Gypsum Board Substrates: Fill minor defects with filler compound. Spot prime defects after repair. Do not begin paint application until finishing compound is dry and sanded smooth.
15. Plaster Substrates: Do not begin paint application until plaster is fully cured and dry.
16. Spray-Textured Ceiling Substrates: Do not begin paint application until surfaces are dry.
17. Cotton or Canvas Insulation Covering Substrates: Remove dust, dirt, and other foreign material that might impair bond of paints to substrates.
18. Marks: Seal with shellac those which may bleed through surface finishes.
19. Impervious Surfaces: Remove mildew by scrubbing with solution of tetra-sodium phosphate and bleach. Rinse with clean water and allow surface to dry.

B. Application
1. Apply paints according to manufacturer's written instructions.
    a. Use applicators and techniques suited for paint and substrate indicated.

b. Paint surfaces behind movable equipment and furniture same as similar exposed surfaces. Before final installation, paint surfaces behind permanently fixed equipment or furniture with prime coat only.
c. Paint front and backsides of access panels, removable or hinged covers, and similar hinged items to match exposed surfaces.

2. Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of same material are to be applied. Tint undercoats to match color of topcoat, but provide sufficient difference in shade of undercoats to distinguish each separate coat.
3. If undercoats or other conditions show through topcoat, apply additional coats until cured film has a uniform paint finish, color, and appearance.
4. Apply paints to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.
5. Painting Mechanical and Electrical Work:
   a. Remove unfinished louvers, grilles, covers, and access panels on mechanical and electrical components and paint separately.
   b. Finish equipment, piping, conduit, and exposed duct work at all exterior areas in colors according to the color schedule.
   c. Reinstall electrical cover plates, hardware, light fixture trim, escutcheons, and fittings removed prior to finishing.
   d. Paint items exposed in equipment rooms and occupied spaces including, but not limited to, the following:
      1) Mechanical Work:
         a) Uninsulated metal piping.
         b) Uninsulated plastic piping.
         c) Pipe hangers and supports.
         d) Tanks that do not have factory-applied final finishes.
         e) Visible portions of internal surfaces of metal ducts, without liner, behind air inlets and outlets.
         f) Duct, equipment, and pipe insulation having cotton or canvas insulation covering or other paintable jacket material.
         g) Mechanical equipment that is indicated to have a factory-primed finish for field painting.
      2) Electrical Work:
         a) Switchgear.
         b) Panelboards.
         c) Electrical equipment that is indicated to have a factory-primed finish for field painting.

C. Field Quality Control
1. Testing of Paint Materials: Owner reserves the right to invoke the following procedure at any time and as often as Owner deems necessary during the period when paints are being applied:
   a. Owner will engage the services of a qualified testing agency to sample paint materials being used. Samples of material delivered to Project site will be taken, identified, sealed, and certified in presence of Contractor.
   b. Testing agency will perform tests for compliance with product requirements.
   c. Owner may direct Contractor to stop applying paints if test results show materials being used do not comply with product requirements. Contractor shall remove noncomplying-paint materials from Project site, pay for testing, and repaint surfaces painted with rejected materials. Contractor will be required to remove rejected materials from previously painted surfaces if, on repainting with complying materials, the two paints are incompatible.

D. Cleaning And Protection
1. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.

2. After completing paint application, clean spattered surfaces. Remove spattered paints by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.
3. Protect work of other trades against damage from paint application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by the Owner, and leave in an undamaged condition.
4. At completion of construction activities of other trades, touch up and restore damaged or defaced painted surfaces.

E. Interior Painting Schedule
1. Concrete Substrates, Nontraffic Surfaces:
   a. Latex System: MPI INT 3.1E.
      1) Prime Coat: Interior latex matching topcoat.
      2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
      3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Latex Over Sealer System: MPI INT 3.1A.
      1) Prime Coat: Interior latex primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
      3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Latex Over Latex Aggregate System: MPI INT 3.1B.
      1) Prime Coat: Latex stucco and masonry textured coating.
      2) Intermediate Coat (for MPI Premium Grade system): Exterior latex matching topcoat.
      3) Topcoat: Exterior latex (flat) **OR** (semigloss) **OR** (gloss), **as directed**.
   d. Alkyd System: MPI INT 3.1D.
      1) Prime Coat: Interior latex primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
      3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
   e. Institutional Low-Odor/VOC Latex System: MPI INT 3.1M.
      1) Prime Coat: Institutional low-odor/VOC interior latex matching topcoat.
      2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
      3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.
   f. High-Performance Architectural Latex System: MPI INT 3.1C.
      1) Prime Coat: Interior latex primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
      3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.
2. Concrete Substrates, Traffic Surfaces:
   a. Latex Floor Enamel System: MPI INT 3.2A.
      1) Prime Coat: Interior/exterior latex floor and porch paint (low gloss).
      2) Intermediate Coat (for MPI Premium Grade system): Interior/exterior latex floor and porch paint (low gloss).
      3) Topcoat: Interior/exterior latex floor and porch paint (low gloss).
   b. Alkyd Floor Enamel System: MPI INT 3.2B.
      1) Prime Coat: Exterior/interior alkyd floor enamel (gloss).
      2) Intermediate Coat (for MPI Premium Grade system): Exterior/interior alkyd floor enamel (gloss).
      3) Topcoat: Exterior/interior alkyd floor enamel (gloss).
   c. Concrete Stain System: MPI INT 3.2E.
      1) First Coat (for MPI Premium Grade system): Interior concrete floor stain.

2) Topcoat: Interior concrete floor stain.

d. Clear Sealer System: MPI INT 3.2F.
   1) First Coat: Interior/exterior clear concrete floor sealer (solvent based).
   2) Topcoat: Interior/exterior clear concrete floor sealer (solvent based).

e. Water-Based Clear Sealer System: MPI INT 3.2G.
   1) First Coat: Interior/exterior clear concrete floor sealer (water based).
   2) Topcoat: Interior/exterior clear concrete floor sealer (water based).

3. Clay-Masonry Substrates:
   a. Latex System: MPI INT 4.1A.
      1) Prime Coat: Interior latex matching topcoat.
      2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
      3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Alkyd System: MPI INT 4.1D.
      1) Prime Coat: Interior latex primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
      3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Latex Aggregate System: MPI INT 4.1B.
      1) Prime Coat: As recommended in writing by topcoat manufacturer.
      2) Intermediate Coat: As recommended in writing by topcoat manufacturer.
      3) Topcoat: Latex stucco and masonry textured coating.
   d. Institutional Low-Odor/VOC Latex System: MPI INT 4.1M.
      1) Prime Coat: Institutional low-odor/VOC interior latex matching topcoat.
      2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
      3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.
   e. High-Performance Architectural Latex System: MPI INT 4.1L.
      1) Prime Coat: High-performance architectural latex matching topcoat.
      2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
      3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

4. CMU Substrates:
   a. Latex System: MPI INT 4.2A.
      1) Prime Coat: Interior/exterior latex block filler.
      2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
      3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Alkyd System: MPI INT 4.2C.
      1) Prime Coat: Interior/exterior latex block filler.
      2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
      3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Alkyd Over Latex Sealer System: MPI INT 4.2N.
      1) Prime Coat: Interior/exterior latex block filler.
      2) Sealer Coat: Interior latex primer/sealer.
      3) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
      4) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
   d. Institutional Low-Odor/VOC Latex System: MPI INT 4.2E.
      1) Prime Coat: Interior/exterior latex block filler.
      2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.

3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.

e. High-Performance Architectural Latex System: MPI INT 4.2D.
1) Prime Coat: Interior/exterior latex block filler.
2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

5. Steel Substrates:
a. Quick-Drying Enamel System: MPI INT 5.1A.
1) Prime Coat: Quick-drying alkyd metal primer.
2) Intermediate Coat: Quick-drying enamel matching topcoat.
3) Topcoat: Quick-drying enamel (semigloss) **OR** (high gloss), **as directed**.

b. Water-Based Dry-Fall System: MPI INT 5.1C.
1) Prime Coat: Alkyd anticorrosive **OR** Quick-drying alkyd, **as directed**, metal primer.
2) Topcoat: Latex dry fog/fall **OR** Waterborne dry fall, **as directed**.

c. Alkyd Dry-Fall System: MPI INT 5.1D.
1) Prime Coat: Alkyd anticorrosive **OR** Quick-drying alkyd, **as directed**, metal primer.
2) Topcoat: Interior alkyd dry fog/fall.

d. Latex Over Alkyd Primer System: MPI INT 5.1Q.
1) Prime Coat: Alkyd anticorrosive **OR** Quick-drying alkyd, **as directed**, metal primer.
2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.

e. Alkyd System: MPI INT 5.1E.
1) Prime Coat: Alkyd anticorrosive **OR** Quick-drying alkyd, **as directed**, metal primer.
2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.

f. Aluminum Paint System: MPI INT 5.1M.
1) Prime Coat: Alkyd anticorrosive **OR** Quick-drying alkyd, **as directed**, metal primer.
2) Intermediate Coat (for MPI Premium Grade system): Aluminum paint.
3) Topcoat: Aluminum paint.

g. Institutional Low-Odor/VOC Latex System: MPI INT 5.1S.
1) Prime Coat: Rust-inhibitive primer (water based).
2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.

h. High-Performance Architectural Latex System: MPI INT 5.1R.
1) Prime Coat: Alkyd anticorrosive **OR** Quick-drying alkyd, **as directed**, metal primer.
2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

6. Galvanized-Metal Substrates:
a. Water-Based Dry-Fall System: MPI INT 5.3H.
1) Prime Coat: Waterborne dry fall.
2) Topcoat: Waterborne dry fall.

b. Alkyd Dry-Fall System: MPI INT 5.3F.
1) Prime Coat: Cementitious galvanized-metal primer.
2) Topcoat: Interior alkyd dry fog/fall.

c. Latex System: MPI INT 5.3A.
1) Prime Coat: Cementitious galvanized-metal primer.
2) Intermediate Coat: Interior latex matching topcoat.

3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.

d. Latex Over Waterborne Primer System: MPI INT 5.3J.
1) Prime Coat: Waterborne galvanized-metal primer.
2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.

e. Alkyd System: MPI INT 5.3C.
1) Prime Coat: Cementitious galvanized-metal primer.
2) Intermediate Coat: Interior alkyd matching topcoat.
3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.

f. Aluminum Paint System: MPI INT 5.3G.
1) Prime Coat: Cementitious galvanized-metal primer.
2) Intermediate Coat (for MPI Premium Grade system): Aluminum paint.
3) Topcoat: Aluminum paint.

g. Institutional Low-Odor/VOC Latex System: MPI INT 5.3N.
1) Prime Coat: Waterborne galvanized-metal primer.
2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.

h. High-Performance Architectural Latex System: MPI INT 5.3M.
1) Prime Coat: Waterborne galvanized-metal primer.
2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

7. Aluminum (Not Anodized or Otherwise Coated) Substrates:

a. Latex System: MPI INT 5.4H.
1) Prime Coat: Quick-drying primer for aluminum.
2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.

b. Alkyd Over Vinyl Wash Primer System: MPI INT 5.4A.
1) Prime Coat: Vinyl wash primer.
2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.

c. Alkyd Over Quick-Drying Primer System: MPI INT 5.4J.
1) Prime Coat: Quick-drying primer for aluminum.
2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
3) Topcoat: Interior alkyd (flat **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.

d. Aluminum Paint System: MPI INT 5.4D.
1) Prime Coat: Vinyl wash primer.
2) Intermediate Coat (for MPI Premium Grade system): Aluminum paint.
3) Topcoat: Aluminum paint.

e. Institutional Low-Odor/VOC Latex System: MPI INT 5.4G.
1) Prime Coat: Quick-drying primer for aluminum.
2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.

f. High-Performance Architectural Latex System: MPI INT 5.4F.
1) Prime Coat: Quick-drying primer for aluminum.

2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

8. Glue-Laminated Beam and Column Substrates:
   a. Latex System: MPI INT 6.1M.
      1) Prime Coat: Interior latex-based wood primer.
      2) Intermediate Coat: Interior latex matching topcoat.
      3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
   b. Latex Over Alkyd Primer System: MPI INT 6.1A.
      1) Prime Coat: Interior alkyd primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
      3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
   c. Alkyd System: MPI INT 6.1B.
      1) Prime Coat: Interior alkyd primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
      3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
   d. Institutional Low-Odor/VOC Latex System: MPI INT 6.1Q.
      1) Prime Coat: Interior latex-based wood primer.
      2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
      3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.
   e. High-Performance Architectural Latex System: MPI INT 6.1N.
      1) Prime Coat: Interior latex-based wood primer.
      2) Intermediate Coat: High-performance architectural latex matching topcoat.
      3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.
9. Dressed Lumber Substrates: Including architectural woodwork and doors.
   a. Latex System: MPI INT 6.3T.
      1) Prime Coat: Interior latex-based wood primer.
      2) Intermediate Coat: Interior latex matching topcoat.
      3) Topcoat: Interior latex (semigloss) **OR** (gloss), **as directed**.
   b. Latex Over Alkyd Primer System: MPI INT 6.3U.
      1) Prime Coat: Interior alkyd primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
      3) Topcoat: Interior latex (semigloss) **OR** (gloss), **as directed**.
   c. Alkyd System: MPI INT 6.3B.
      1) Prime Coat: Interior alkyd primer/sealer.
      2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
      3) Topcoat: Interior alkyd (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
   d. Institutional Low-Odor/VOC Latex System: MPI INT 6.3V.
      1) Prime Coat: Interior latex-based wood primer.
      2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
      3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.
   e. High-Performance Architectural Latex System: MPI INT 6.3A.
      1) Prime Coat: Interior latex-based wood primer.
      2) Intermediate Coat: High-performance architectural latex matching topcoat.

3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

10. Wood Panel Substrates: Including painted plywood, medium-density fiberboard, and hardboard.
    a. Latex System: MPI INT 6.4R.
        1) Prime Coat: Interior latex-based wood primer.
        2) Intermediate Coat: Interior latex matching topcoat.
        3) Topcoat: Interior latex (semigloss) **OR** (gloss), **as directed**.
    b. Latex Over Alkyd Primer System: MPI INT 6.4A.
        1) Prime Coat: Interior alkyd primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
        3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
    c. Alkyd System: MPI INT 6.4B.
        1) Prime Coat: Interior alkyd primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
        3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
    d. Institutional Low-Odor/VOC Latex System: MPI INT 6.4T.
        1) Prime Coat: Interior latex-based wood primer.
        2) Intermediate Coat : Institutional low-odor/VOC interior latex matching topcoat.
        3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.
    e. High-Performance Architectural Latex System: MPI INT 6.4S.
        1) Prime Coat: Interior latex-based wood primer.
        2) Intermediate Coat: High-performance architectural latex matching topcoat.
        3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.
11. Dimension Lumber Substrates, Nontraffic Surfaces: Including exposed joists and exposed beams.
    a. Latex System: MPI INT 6.2D.
        1) Prime Coat: Interior latex-based wood primer.
        2) Intermediate Coat: Interior latex matching topcoat.
        3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
    b. Latex Over Alkyd Primer System: MPI INT 6.2A.
        1) Prime Coat: Interior alkyd primer/sealer.
        2) Intermediate Coat : Interior latex matching topcoat.
        3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
    c. Alkyd System: MPI INT 6.2C.
        1) Prime Coat: Interior alkyd primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
        3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
    d. Institutional Low-Odor/VOC Latex System: MPI INT 6.2L.
        1) Prime Coat: Interior latex-based wood primer.
        2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
        3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.
    e. High-Performance Architectural Latex System: MPI INT 6.2B.
        1) Prime Coat: Interior alkyd primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
        3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

12. Wood Substrates, Traffic Surfaces:
    a. Latex Floor Paint System: MPI INT 6.5G.
        1) Prime Coat: Interior alkyd primer/sealer.
        2) Intermediate Coat: Interior/exterior latex floor and porch paint (low gloss).
        3) Topcoat: Interior/exterior latex floor and porch paint (low gloss).
    b. Alkyd Floor Enamel System: MPI INT 6.5A.
        1) Prime Coat: Exterior/interior alkyd floor enamel (gloss).
        2) Intermediate Coat: Exterior/interior alkyd floor enamel (gloss).
        3) Topcoat: Exterior/interior alkyd floor enamel (gloss).
13. Gypsum Board Substrates:
    a. Latex System: MPI INT 9.2A.
        1) Prime Coat: Interior latex primer/sealer (for MPI Premium Grade system) **OR** matching topcoat, **as directed**.
        2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
        3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
    b. Alkyd Over Latex Primer System: MPI INT 9.2C.
        1) Prime Coat: Interior latex primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
        3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
    c. Institutional Low-Odor/VOC Latex System: MPI INT 9.2M.
        1) Prime Coat: Interior latex primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
        3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.
    d. High-Performance Architectural Latex System: MPI INT 9.2B.
        1) Prime Coat: Interior latex primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
        3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.
14. Plaster Substrates:
    a. Latex System: MPI INT 9.2A.
        1) Prime Coat: Interior latex primer/sealer (for MPI Premium Grade system) **OR** matching topcoat, **as directed**.
        2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
        3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
    b. Latex Over Alkyd Primer System: MPI INT 9.2K.
        1) Prime Coat: Interior alkyd primer/sealer.
        2) Intermediate Coat: Interior latex matching topcoat.
        3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
    c. Alkyd Over Latex Primer System: MPI INT 9.2C.
        1) Prime Coat: Interior latex primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
        3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
    d. Institutional Low-Odor/VOC Latex System: MPI INT 9.2M.
        1) Prime Coat: Interior latex primer/sealer.
        2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.

3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.

e. High-Performance Architectural Latex System: MPI INT 9.2B.
1) Prime Coat: Interior latex primer/sealer.
2) Intermediate Coat (for MPI Premium Grade system): High-performance architectural latex matching topcoat.
3) Topcoat: High-performance architectural latex (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.

15. Spray-Textured Ceiling Substrates:
a. Latex (Flat) System: MPI INT 9.1A, spray applied.
1) Prime Coat: Interior latex primer/sealer **OR** (flat), **as directed**.
2) Topcoat: Interior latex (flat).
b. Latex System: MPI INT 9.1E, spray applied.
1) Prime Coat: Interior latex matching topcoat.
2) Intermediate Coat: Interior latex matching topcoat.
3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss), **as directed**.
c. Latex Over Alkyd Primer System: MPI INT 9.1B.
1) Prime Coat: Interior alkyd primer/sealer.
2) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
d. Alkyd (Flat) System: MPI INT 9.1C.
1) Prime Coat: Interior alkyd (flat).
2) Topcoat: Interior alkyd (flat).
e. Alkyd System: MPI INT 9.1D.
1) Prime Coat: Interior alkyd primer/sealer.
2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
3) Topcoat: Interior alkyd (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.

16. Cotton or Canvas Insulation-Covering Substrates: Including pipe and duct coverings.
a. Latex System: MPI INT 10.1A.
1) Prime Coat: Interior latex primer/sealer (for MPI Premium Grade system) **OR** matching topcoat, **as directed**.
2) Intermediate Coat (for MPI Premium Grade system): Interior latex matching topcoat.
3) Topcoat: Interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (satin) **OR** (semigloss) **OR** (gloss), **as directed**.
b. Alkyd Over Latex Primer System: MPI INT 10.1B.
1) Prime Coat: Interior latex primer/sealer.
2) Intermediate Coat (for MPI Premium Grade system): Interior alkyd matching topcoat.
3) Topcoat: Interior alkyd (flat) **OR** (eggshell) **OR** (semigloss) **OR** (gloss), **as directed**.
c. Aluminum Paint System: MPI INT 10.1C.
1) Prime Coat: Interior latex primer/sealer.
2) Intermediate Coat (for MPI Premium Grade system): Aluminum paint.
3) Topcoat: Aluminum paint.
d. Institutional Low-Odor/VOC Latex System: MPI INT 10.1D.
1) Prime Coat: Interior latex primer/sealer.
2) Intermediate Coat (for MPI Premium Grade system): Institutional low-odor/VOC interior latex matching topcoat.
3) Topcoat: Institutional low-odor/VOC interior latex (flat) **OR** (low sheen) **OR** (eggshell) **OR** (semigloss), **as directed**.

END OF SECTION 09 91 23 00

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
09 91 23 00	09 91 13 00	Exterior Painting
09 91 33 00	09 93 00 00	Staining and Transparent Finishing

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 93 00 00 - STAINING AND TRANSPARENT FINISHING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Primers
2. Wood stains.
3. Transparent finishes.

B. Related Requirements:

1. Section 099123 "Interior Painting" for stains and transparent finishes on concrete floors.
2. Section 099600 "High-Performance Coatings" for transparent high-performance coatings on concrete floors and clay masonry.

1.2 ACTION SUBMITTALS

A. Product Data:

1. For each type of product.
2. Include preparation requirements and application instructions.
3. Indicate VOC content.

B. Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type of exposed finish.

C. Samples for Verification: Sample for each type of finish system and in each color and gloss of finish required on representative samples of actual wood substrates.

1. Size: [**8 inches (200 mm) square**][**or**][**8 inches (200 mm) long**].
2. Apply coats on Samples in steps to show each coat required for system.
3. Label each coat of each Sample.
4. Label each Sample for location and application area.

D. Product List: Cross-reference to finish system and locations of application areas. Use same designations indicated on Drawings and in schedules. Include color designations.

E. Sustainable Design Submittals:

1. Product Data: For paints and coatings, indicating VOC content.
2. Laboratory Test Reports: For paints and coatings, indicating compliance with requirements for low-emitting materials.
3. Environmental Product Declaration: For each product.
4. Health Product Declaration: For each product.
5. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
6. Environmental Product Declaration: For each product.
7. Environmental Product Declaration: For each product.
8. Environmental Product Declaration: For each product.

9. Third-Party Certifications: For each product.
10. Third-Party Certified Life Cycle Assessment: For each product.
11. Manufacturer Inventory: For each product, provide manufacturer's manifest of ingredients.

1.3 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials[**, from the same product run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Stains and Transparent Finishes: [**5**]<**Insert number**> percent, but not less than [**1 gal. (3.8 L)**]<**Insert number**> of each material and color applied.

1.4 MOCKUPS

A. Apply mockups of each finish system indicated and each color selected [**to verify preliminary selections made under Sample submittals**][**to demonstrate aesthetic effects**][**and**][**to set quality standards for materials and execution**].

1. Architect will select one surface to represent surfaces and conditions for application of each type of finish system and substrate.

a. Vertical and Horizontal Surfaces: Provide samples of at least **100 sq. ft. (9 sq. m)**.
b. Other Items: Architect will designate items or areas required.

2. Final approval of stain color selections will be based on mockups.

a. If preliminary stain color selections are not approved, apply additional mockups of additional stain colors selected by Architect at no added cost to Owner.

3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than **45 deg F (7 deg C)**.

1. Maintain containers in clean condition, free of foreign materials and residue.
2. Remove rags and waste from storage areas daily.

1.6 FIELD CONDITIONS

A. Apply finishes only when temperature of surfaces to be finished and ambient air temperatures are between **50 and 95 deg F (10 and 35 deg C)**.

B. Do not apply finishes when relative humidity exceeds 85 percent, at temperatures of less than **5 deg F (3 deg C)** above the dew point, or to damp or wet surfaces.

C. Do not apply exterior finishes in snow, rain, fog, or mist.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Source Limitations: Obtain each coating product from single source from single manufacturer.

2.2 STAINING AND TRANSPARENT FINISHING

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Behr Paint Company (Behr Process LLC)**]
2. [**Benjamin Moore & Co.**]
3. [**Coronado Paint; Benjamin Moore & Co.**]
4. [**Diamond Vogel Paint Company**]
5. [**Dunn-Edwards Corporation (a Nippon Paint Holdings Co. Ltd. company)**]
6. [**Hempel (USA), Inc.**]
7. [**Lenmar Lacquers; Benjamin Moore & Co.**]
8. [**PPG Paints; PPG Industries, Inc.**]
9. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
10. [**Rodda Paint Co.**]
11. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
12. [**Sherwin-Williams Company (The)**]
13. [**United Gilsonite Laboratories (UGL)**]
14. [**Vista Paint Corporation**]
15. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Behr Paint Company (Behr Process LLC)**]
2. [**Benjamin Moore & Co.**]
3. [**Coronado Paint; Benjamin Moore & Co.**]
4. [**Diamond Vogel Paint Company**]
5. [**Dunn-Edwards Corporation (a Nippon Paint Holdings Co. Ltd. company)**]
6. [**Hempel (USA), Inc.**]
7. [**Lenmar Lacquers; Benjamin Moore & Co.**]
8. [**PPG Paints; PPG Industries, Inc.**]
9. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
10. [**Rodda Paint Co.**]
11. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
12. [**Sherwin-Williams Company (The)**]
13. [**United Gilsonite Laboratories (UGL)**]
14. [**Vista Paint Corporation**]
15. <**Insert manufacturer's name**>

C. Material Compatibility:

1. Provide materials for use within each coating system that are compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.

D. VOC Content, LEED 2009: For field applications that are inside the weatherproofing system, paints and

coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Clear Wood Finishes, Varnishes: 350 g/L.
2. Clear Wood Finishes, Lacquers: 550 g/L.
3. Shellacs, Clear: 730 g/L.
4. Stains: 250 g/L.

E. Low-Emitting Materials, LEED 2009: Interior paints and coatings shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

F. VOC Content, LEED v4: For field applications[**that are inside the weatherproofing system**], paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Primers, Sealers, and Undercoaters: 100 g/L.
2. Clear Wood Finishes, Varnishes: 275 g/L.
3. Clear Wood Finishes, Lacquers: 275 g/L.
4. Shellacs, Clear: 730 g/L.
5. Stains: 100 g/L.

G. Low-Emitting Materials, LEED v4: For field applications that are inside the weatherproofing system, 90 percent of paints and coatings shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

H. Material Emissions and Pollutant Control: Not less than 85 percent of field-applied paints and coatings that are inside the weatherproofing system shall comply with the following:

1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.

I. Emissions Requirements: Field-applied paints and coatings that are inside the weatherproofing system shall comply with either of the following:

1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
2. VOC content shall not exceed limits of authorities having jurisdiction and the following:

    a. Shellacs, Clear: 730 g/L.
    b. Stains: 250 g/L.
    c. Clear Wood Finishes (Varnishes, Sanding Sealers, and Lacquers): 275 g/L.

J. VOC Emissions: For field applications inside the building, wall paints shall contain no more than half of the chronic REL of VOCs when tested according to the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit or 33 mcg/cu. m and that of acetaldehyde shall not exceed 9 mcg/cu. m.

K. Stain Colors: [**As selected by Architect from manufacturer's full range**][**Match Architect's samples**][**As indicated in a color schedule**]<**Insert requirements**>.

2.3 PRIMERS

A. Primer, Alkyd Oil for Exterior Wood: Alkyd/oil-based primer for exterior wood with resistance to bleeding.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Benjamin Moore & Co.**]
b. [**Diamond Vogel Paint Company**]
c. [**PPG Paints; PPG Industries, Inc.**]
d. [**Rodda Paint Co.**]
e. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
f. [**Sherwin-Williams Company (The)**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Benjamin Moore & Co.**]
b. [**Diamond Vogel Paint Company**]
c. [**PPG Paints; PPG Industries, Inc.**]
d. [**Rodda Paint Co.**]
e. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
f. [**Sherwin-Williams Company (The)**]
g. <**Insert manufacturer's name**>

B. Primer, Latex for Exterior Wood: Pigmented, water-borne, emulsion-type primer for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Diamond Vogel Paint Company**]
d. [**Dunn-Edwards Corporation (a Nippon Paint Holdings Co. Ltd. company)**]
e. [**PPG Paints; PPG Industries, Inc.**]
f. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
g. [**Rodda Paint Co.**]
h. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
i. [**Sherwin-Williams Company (The)**]
j. [**Vista Paint Corporation**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Diamond Vogel Paint Company**]
d. [**Dunn-Edwards Corporation (a Nippon Paint Holdings Co. Ltd. company)**]
e. [**PPG Paints; PPG Industries, Inc.**]
f. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
g. [**Rodda Paint Co.**]
h. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
i. [**Sherwin-Williams Company (The)**]
j. [**Vista Paint Corporation**]
k. <**Insert manufacturer's name**>

C. Preservative for Exterior Wood: Solvent-based, penetrating anti-fungal treatment for exterior wood consisting mainly of zinc or copper napthenate.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
b. <**Insert manufacturer's name**>

D. Alkyd Sanding Sealer, Interior, Solvent Based, Clear: Solvent-based, quick-drying, clear, sandable alkyd sealer used on new interior wood surfaces that are to be top-coated with an alkyd varnish.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**PPG Paints; PPG Industries, Inc.**]
b. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
c. [**Rodda Paint Co.**]
d. [**Sherwin-Williams Company (The)**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**PPG Paints; PPG Industries, Inc.**]
b. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
c. [**Rodda Paint Co.**]
d. [**Sherwin-Williams Company (The)**]
e. <**Insert manufacturer's name**>

2.4 WOOD STAINS

A. Stain, Exterior, Solvent Based, Semitransparent: Solvent-based, oil or oil/alkyd, semitransparent, pigmented stain for new wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Diamond Vogel Paint Company**]
d. [**PPG Paints; PPG Industries, Inc.**]
e. [**Rodda Paint Co.**]
f. [**Sherwin-Williams Company (The)**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Diamond Vogel Paint Company**]
d. [**PPG Paints; PPG Industries, Inc.**]
e. [**Rodda Paint Co.**]
f. [**Sherwin-Williams Company (The)**]
g. <**Insert manufacturer's name**>

B. Stain, Exterior, Solvent Based, Solid Hide: Solvent-based, oil or oil/alkyd, pigmented stain for new, or previously stained, wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Diamond Vogel Paint Company**]
b. [**Sherwin-Williams Company (The)**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Diamond Vogel Paint Company**]
b. [**Sherwin-Williams Company (The)**]
c. <**Insert manufacturer's name**>

C. Stain, Exterior, Water Based, Solid Hide: Water-based, solid-hide, emulsion-type, pigmented stain for primed or previously painted exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Diamond Vogel Paint Company**]
d. [**Dunn-Edwards Corporation (a Nippon Paint Holdings Co. Ltd. company)**]
e. [**PPG Paints; PPG Industries, Inc.**]
f. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
g. [**Sherwin-Williams Company (The)**]
h. [**Vista Paint Corporation**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Diamond Vogel Paint Company**]
d. [**Dunn-Edwards Corporation (a Nippon Paint Holdings Co. Ltd. company)**]
e. [**PPG Paints; PPG Industries, Inc.**]
f. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
g. [**Sherwin-Williams Company (The)**]
h. [**Vista Paint Corporation**]
i. <**Insert manufacturer's name**>

D. Stain, Exterior, Water Based, Semitransparent: Water-based, semitransparent, pigmented stain for new wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Coronado Paint; Benjamin Moore & Co.**]
d. [**PPG Paints; PPG Industries, Inc.**]
e. [**Sherwin-Williams Company (The)**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Coronado Paint; Benjamin Moore & Co.**]
d. [**PPG Paints; PPG Industries, Inc.**]
e. [**Sherwin-Williams Company (The)**]
f. <**Insert manufacturer's name**>

E. Stain, Exterior, for Wood Decks: Solvent- or water- based, modified-oil or alkyd-type, semitransparent, penetrating stain for exterior dimensional wood decking.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Behr Paint Company (Behr Process LLC)**]
    b. [**Benjamin Moore & Co.**]
    c. [**Diamond Vogel Paint Company**]
    d. [**PPG Paints; PPG Industries, Inc.**]
    e. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
    f. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
    g. [**Sherwin-Williams Company (The)**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Behr Paint Company (Behr Process LLC)**]
    b. [**Benjamin Moore & Co.**]
    c. [**Diamond Vogel Paint Company**]
    d. [**PPG Paints; PPG Industries, Inc.**]
    e. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
    f. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
    g. [**Sherwin-Williams Company (The)**]
    h. <**Insert manufacturer's name**>

F. Stain, Interior, Semitransparent, for Interior Wood: Solvent-based, oil or oil/alkyd, semitransparent, pigmented stain for new interior wood surfaces that are to be finished with a clear varnish.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Behr Paint Company (Behr Process LLC)**]
    b. [**PPG Paints; PPG Industries, Inc.**]
    c. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
    d. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
    e. [**Sherwin-Williams Company (The)**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Behr Paint Company (Behr Process LLC)**]
    b. [**PPG Paints; PPG Industries, Inc.**]
    c. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
    d. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
    e. [**Sherwin-Williams Company (The)**]
    f. <**Insert manufacturer's name**>

G. Shellac: Alcohol-based, shellac type, clear or light amber-colored coating for use as a sealer on stains and knots or as a wash coat to even the porosity of some wood types.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
    b. [**Sherwin-Williams Company (The)**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
    b. [**Sherwin-Williams Company (The)**]
    c. <**Insert manufacturer's name**>

H. Danish Oil: Solvent-based, oil-type, penetrating stain for application by brush or wiping on interior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Sherwin-Williams Company (The)**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Sherwin-Williams Company (The)**]
    b. <**Insert manufacturer's name**>

2.5 TRANSPARENT FINISHES

A. Varnish, Marine Spar, Exterior, Gloss: Solvent-based, phenolic-modified clear varnish for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Sherwin-Williams Company (The)**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Sherwin-Williams Company (The)**]
    b. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of 70 to 85 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

B. Varnish with UV Inhibitor, Exterior, Gloss: Solvent-based, alkyd-type, clear gloss varnish stabilized against UV deterioration for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Sherwin-Williams Company (The)**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Sherwin-Williams Company (The)**]
   b. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of 70 to 85 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

C. Varnish with UV Inhibitor, Exterior, Semigloss: Solvent-based, alkyd-type, clear semigloss varnish stabilized against UV deterioration for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Sherwin-Williams Company (The)**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Sherwin-Williams Company (The)**]
   b. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard semigloss finish**][**Gloss of 35 to 70 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

D. Varnish, Exterior, Aliphatic Polyurethane, Two Component: Solvent-based, two-component, aliphatic polyurethane clear coating used on exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Hempel (USA), Inc.**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Hempel (USA), Inc.**]
    b. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of minimum 80 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

E. Varnish, Exterior, Water Based, Eggshell: Water-based clear varnish for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. <**Insert manufacturer's name**>

3. Gloss and Sheen Level: Gloss and Sheen Level: [**Manufacturer's standard eggshell finish**][**Gloss of 10 to 25 units at 60 degrees and sheen of 10 to 35 units at 85 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

F. Varnish, Exterior, Water Based, Satin: Water-based clear varnish for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. [**Sherwin-Williams Company (The)**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. [**Sherwin-Williams Company (The)**]
    c. <**Insert manufacturer's name**>

3. Gloss and Sheen Level: [**Manufacturer's standard low-sheen finish**][**Gloss of 20 to 35 units at 60 degrees and minimum sheen of 35 units at 85 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

G. Varnish, Exterior, Water Based, Semigloss: Water-based clear varnish for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. [**Sherwin-Williams Company (The)**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. [**Sherwin-Williams Company (The)**]
    c. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard semigloss finish**][**Gloss of 35 to 70 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

H. Varnish, Exterior, Water Based, Gloss: Water-based clear varnish for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of 70 to 85 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

I. Varnish, Exterior, Water Based, High Gloss: Water-based clear varnish for exterior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**PPG Paints; PPG Industries, Inc.**]
    b. [**Sherwin-Williams Company (The)**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**PPG Paints; PPG Industries, Inc.**]

b. [**Sherwin-Williams Company (The)**]
c. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of minimum 85 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

J. Varnish, Interior Polyurethane, Moisture Cured, Gloss: Solvent-based, moisture-curing polyurethane clear-coating with a gloss finish for interior wood surfaces,

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Benjamin Moore & Co.**]
b. [**Sherwin-Williams Company (The)**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Benjamin Moore & Co.**]
b. [**Sherwin-Williams Company (The)**]
c. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of 70 to 85 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

K. Varnish, Interior, Polyurethane, Oil Modified, Gloss: Solvent-based, one-component, oil-modified polyurethane clear gloss varnish for new or previously varnished or stained interior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**PPG Paints; PPG Industries, Inc.**]
d. [**Rodda Paint Co.**]
e. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
f. [**Sherwin-Williams Company (The)**]
g. [**United Gilsonite Laboratories (UGL)**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**PPG Paints; PPG Industries, Inc.**]
d. [**Rodda Paint Co.**]
e. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]

f. [**Sherwin-Williams Company (The)**]
g. [**United Gilsonite Laboratories (UGL)**]
h. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of 70 to 85 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

L. Varnish, Interior, Polyurethane, Oil Modified, Satin: Solvent-based, one-component, oil-modified polyurethane clear satin varnish for new or previously varnished or stained interior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**PPG Paints; PPG Industries, Inc.**]
d. [**Rodda Paint Co.**]
e. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
f. [**Sherwin-Williams Company (The)**]
g. [**United Gilsonite Laboratories (UGL)**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**PPG Paints; PPG Industries, Inc.**]
d. [**Rodda Paint Co.**]
e. [**Rust-Oleum Corporation; a subsidiary of RPM International, Inc.**]
f. [**Sherwin-Williams Company (The)**]
g. [**United Gilsonite Laboratories (UGL)**]
h. <**Insert manufacturer's name**>

3. Gloss and Sheen Level: [**Manufacturer's standard low-sheen finish**][**Gloss of 20 to 35 units at 60 degrees and minimum sheen of 35 units at 85 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

M. Varnish, Interior, Flat/Satin: Solvent-based, alkyd-type, clear flat/satin varnish for new or properly prepared, previously varnished interior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Sherwin-Williams Company (The)**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Sherwin-Williams Company (The)**]
b. <**Insert manufacturer's name**>

3. Gloss and Sheen Level: [**Manufacturer's standard flat finish**][**Maximum gloss of 5 units at 60 degrees and maximum sheen of 10 units at 85 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

N. Varnish, Interior, Gloss: Solvent-based, alkyd-type, clear gloss varnish for new or properly prepared, previously varnished interior wood surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**PPG Paints; PPG Industries, Inc.**]
b. [**Sherwin-Williams Company (The)**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**PPG Paints; PPG Industries, Inc.**]
b. [**Sherwin-Williams Company (The)**]
c. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of 70 to 85 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

O. Varnish, Interior, Water Based, Clear, Satin: Water-based clear satin coating for interior wood trim, frames, doors, paneling and cabinetry.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Lenmar Lacquers; Benjamin Moore & Co.**]
d. [**PPG Paints; PPG Industries, Inc.**]
e. [**Sherwin-Williams Company (The)**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Lenmar Lacquers; Benjamin Moore & Co.**]
d. [**PPG Paints; PPG Industries, Inc.**]
e. [**Sherwin-Williams Company (The)**]
f. <**Insert manufacturer's name**>

3. Gloss and Sheen Level: [**Manufacturer's standard low-sheen finish**][**Gloss of 20 to 35 units at 60 degrees and minimum sheen of 35 units at 85 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

P. Varnish, Interior, Water Based, Clear, Semigloss: Water-based clear semigloss coating for interior wood trim, frames, doors, paneling and cabinetry.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Benjamin Moore & Co.**]
   b. [**Lenmar Lacquers; Benjamin Moore & Co.**]
   c. [**PPG Paints; PPG Industries, Inc.**]
   d. [**Sherwin-Williams Company (The)**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Benjamin Moore & Co.**]
   b. [**Lenmar Lacquers; Benjamin Moore & Co.**]
   c. [**PPG Paints; PPG Industries, Inc.**]
   d. [**Sherwin-Williams Company (The)**]
   e. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard semigloss finish**][**Gloss of 35 to 70 units at 60 degrees when tested in accordance with ASTM D523**]<**Insert requirements**>.

Q. Varnish, Interior, Water Based, Clear, High Gloss: Water-based clear high-gloss coating for interior wood trim, frames, doors, paneling and cabinetry.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Benjamin Moore & Co.**]
   b. [**Lenmar Lacquers; Benjamin Moore & Co.**]
   c. [**PPG Paints; PPG Industries, Inc.**]
   d. [**Sherwin-Williams Company (The)**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Benjamin Moore & Co.**]
   b. [**Lenmar Lacquers; Benjamin Moore & Co.**]
   c. [**PPG Paints; PPG Industries, Inc.**]
   d. [**Sherwin-Williams Company (The)**]
   e. <**Insert manufacturer's name**>

3. Gloss Level: [**Manufacturer's standard gloss finish**][**Gloss of minimum 85 units at 60**

degrees when tested in accordance with ASTM D523]<**Insert requirements**>.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with requirements for maximum moisture content and other conditions affecting performance of the Work.

B. Maximum Moisture Content of Exterior Wood Substrates: 15 percent, when measured with an electronic moisture meter.

C. Maximum Moisture Content of Interior Wood Substrates: [**15**][**13**][**10**][**9**] percent, when measured with an electronic moisture meter.

D. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.

E. Proceed with finish application only after unsatisfactory conditions have been corrected.

1. Beginning finish application constitutes Contractor's acceptance of substrates and conditions.

3.2 PREPARATION

A. Remove hardware, covers, plates, and similar items already in place that are removable. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and finishing.

1. After completing finishing operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection if any.

B. Clean and prepare surfaces to be finished according to manufacturer's written instructions for each substrate condition and as specified.

1. Remove dust, dirt, oil, and grease by washing with a detergent solution; rinse thoroughly with clean water and allow to dry. Remove grade stamps and pencil marks by sanding lightly. Remove loose wood fibers by brushing.
2. Remove mildew by scrubbing with a commercial wash formulated for mildew removal and as recommended by stain manufacturer.

C. Exterior Wood Substrates:

1. Scrape and clean knots, and apply coat of knot sealer before applying primer.
2. Prime edges, ends, faces, undersides, and backsides of wood.

a. For solid hide stained wood, stain edges and ends after priming.
b. For varnish-coated stained wood, stain edges and ends and prime with varnish. Prime undersides and backsides with varnish.

3. Countersink steel nails, if used, and fill with putty or plastic wood filler tinted to final color. Sand smooth when dried.

D. Interior Wood Substrates:

1. Scrape and clean knots, and apply coat of knot sealer before applying primer.
2. Apply wood filler paste to open-grain woods to produce smooth, glasslike finish.
3. Sand surfaces exposed to view and dust off.
4. After priming, fill holes and imperfections in the finish surfaces with putty or plastic wood filler. Sand smooth when dry.

3.3 APPLICATION

A. Apply finishes according to manufacturer's written instructions.

1. Use applicators and techniques suited for finish and substrate indicated.
2. Finish surfaces behind movable equipment and furniture same as similar exposed surfaces.
3. Do not apply finishes over labels of independent testing agencies or equipment name, identification, performance rating, or nomenclature plates.

B. Apply finishes to produce surface films without cloudiness, holidays, lap marks, brush marks, runs, ropiness, or other surface imperfections.

3.4 CLEANING AND PROTECTION

A. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.

B. After completing finish application, clean spattered surfaces. Remove spattered materials by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

C. Protect work of other trades against damage from finish application. Correct damage by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.

D. At completion of construction activities of other trades, touch up and restore damaged or defaced finished wood surfaces.

3.5 EXTERIOR WOOD-FINISH-SYSTEM SCHEDULE

A. Wood Substrates, Glued-Laminated Construction:

1. Solid-Color, Solvent-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, solvent based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, solvent based, solid hide.

2. Varnish over Semitransparent Stain System :

a. Stain Coat: Stain, exterior, solvent based, semitransparent.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

3. Water-Based Varnish System :

a. Prime Coat: Water-based varnish matching topcoat.
b. Intermediate Coat: Water-based varnish matching topcoat.
c. Topcoat: Water-based varnish, [**eggshell**][**satin**][**semigloss**][**gloss**][**high gloss**].

4. Varnish System :

a. Prime Coat: Varnish matching topcoat.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

5. Clear, Two-Component Polyurethane Varnish over Stain System :

a. Stain Coat: Stain, exterior, solvent based, semitransparent.
b. First Intermediate Coat: Varnish, aliphatic polyurethane, two component, matching topcoat.
c. Second Intermediate Coat: Varnish, aliphatic polyurethane, two component, matching topcoat.
d. Topcoat: Varnish, aliphatic polyurethane, two component, gloss.

6. Clear, Two-Component Polyurethane Varnish System :

a. Prime Coat: Varnish, aliphatic polyurethane, two component, matching topcoat.
b. Topcoat: Varnish, aliphatic polyurethane, two component, gloss.

B. Wood Substrates, Exposed Framing:

1. Solid-Color, Water-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, water based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, water based, solid hide.

2. Solid-Color, Solvent-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, solvent based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, solvent based, solid hide.

3. Water-Based Semitransparent Stain System :

a. Prime Coat: Stain, exterior, water based, semitransparent, matching topcoat.
b. Intermediate Coat: Stain, exterior, water based, semitransparent, matching topcoat.
c. Topcoat: Stain, exterior, water based, semitransparent.

4. Semitransparent Stain System :

a. Prime Coat: Stain, exterior, solvent based, semitransparent, matching topcoat.
b. Topcoat: Stain, exterior, solvent based, semitransparent.

5. Varnish over Stain System :

a. Stain Coat: Stain, exterior, solvent based, semitransparent.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.

d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

6. Water-Based Varnish System :

a. Prime Coat: Water-based varnish matching topcoat.
b. Intermediate Coat: Water-based varnish matching topcoat.
c. Topcoat: Water-based varnish, [**eggshell**][**satin**][**semigloss**][**gloss**][**high gloss**].

7. Varnish System :

a. Prime Coat: Varnish matching topcoat.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

8. Clear, Two-Component Polyurethane Varnish System :

a. Prime Coat: Varnish, aliphatic polyurethane, two component, matching topcoat.
b. Intermediate Coat: Varnish, aliphatic polyurethane, two component, matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane, two component, [**gloss**][**high gloss**].

C. Wood Substrates, [**Wood Trim**][**Architectural woodwork**][**Doors**][**Windows**][**Wood Board Siding**][**and**][**Wood Fences**]:

1. Solid-Color, Water-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, water based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, water based, solid hide.

2. Solid-Color, Solvent-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, solvent based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, solvent based, solid hide.

3. Water-Based Semitransparent Stain System :

a. Prime Coat: Stain, exterior, water based, semitransparent, matching topcoat.
b. Intermediate Coat: Stain, exterior, water based, semitransparent, matching topcoat.
c. Topcoat: Stain, exterior, water based, semitransparent.

4. Semitransparent Stain System :

a. Prime Coat: Stain, exterior, solvent based, semitransparent, matching topcoat.
b. Topcoat: Stain, exterior, solvent based, semitransparent.

5. Varnish over Stain System :

a. Stain Coat: Stain, exterior, solvent-based, semitransparent.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

6. Water-Based Varnish System :

a. Prime Coat: Water-based varnish matching topcoat.
b. Intermediate Coat: Water-based varnish matching topcoat.
c. Topcoat: Water-based varnish, [**eggshell**][**satin**][**semigloss**][**gloss**][**high gloss**].

7. Varnish System :

a. Prime Coat: Varnish matching topcoat.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

8. Clear, Two-Component Polyurethane Varnish System :

a. Prime Coat: Varnish, aliphatic polyurethane, two component, matching topcoat.
b. Topcoat: Varnish, aliphatic polyurethane, two component gloss.

D. Wood Substrates, Wood-Based Panel Products:

1. Solid-Color, Water-Based Stain System :

a. Prime Coat: Primer, [**latex**][**alkyd**] for exterior wood.
b. Intermediate Coat: Stain, exterior, water based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, water based, solid hide.

2. Solid-Color, Solvent-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, solvent based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, solvent based, solid hide.

3. Water-Based Semitransparent Stain System :

a. Prime Coat: Stain, exterior, water based, semitransparent, matching topcoat.
b. Intermediate Coat: Stain, exterior, water based, semitransparent, matching topcoat.
c. Topcoat: Stain, exterior, water based, semitransparent.

4. Semitransparent Stain System :

a. Prime Coat: Stain, exterior, solvent based, semitransparent, matching topcoat.
b. Topcoat: Stain, exterior, solvent based, semitransparent.

5. Varnish over Stain System :

a. Stain Coat: Stain, exterior, solvent based, semitransparent.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

6. Varnish System :

a. Prime Coat: Varnish matching topcoat.
b. First Intermediate Coat: Varnish matching topcoat.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, with UV inhibitor, exterior, [**semigloss**][**gloss**][**high gloss**].

E. Wood Substrates, Traffic Surfaces, Including [**Lumber Decking**][**and**][**Stairs**]:

1. Deck Stain over Wood Preservative System :

a. Preservative Coat: Preservative, for exterior wood.
b. Intermediate Coat: Stain, for exterior wood decks, matching topcoat.
c. Topcoat: Stain, for exterior wood decks.

2. Deck Stain System :

a. Prime Coat: Stain, for exterior wood decks, matching topcoat.
b. Topcoat: Stain, for exterior wood decks.

F. Wood Substrates, Wood Shingles and Shakes (Excluding Roofs):

1. Solid-Color, Water-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, water based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, water based, solid hide.

2. Solid-Color, Solvent-Based Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, solvent based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, solvent based, solid hide.

3. Semitransparent Stain System :

a. Prime Coat: Stain, exterior, solvent based, semitransparent, matching topcoat.
b. Topcoat: Stain, exterior, solvent based, semitransparent.

3.6 INTERIOR WOOD-FINISH-SYSTEM SCHEDULE

A. Wood Substrates, Glued-Laminated Construction:

1. Solid-Color Latex Stain System :

a. Prime Coat: Primer, alkyd for exterior wood.
b. Intermediate Coat: Stain, exterior, water based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, water based, solid hide.

2. Solid-Color, Solvent-Based Stain System :

a. Prime Coat: Stain, exterior, solvent based, solid hide, matching topcoat.
b. Topcoat: Stain, exterior, solvent based, solid hide.

3. Semitransparent Stain System :

a. Prime Coat: Stain, semitransparent, matching topcoat.
b. Topcoat: Stain, semitransparent, for interior wood.

4. Water-Based Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Water-based varnish matching topcoat.
c. Second Intermediate Coat: Water-based varnish matching topcoat.
d. Topcoat: Varnish, water based, clear, [**satin**][**semigloss**][**gloss**].

5. Water-Based Varnish System :

a. Prime Coat: Water-based varnish matching topcoat.
b. Intermediate Coat: Water-based varnish matching topcoat.
c. Topcoat: Varnish, water based, clear, [**satin**][**semigloss**][**gloss**].

6. Alkyd Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: [**Varnish matching topcoat**][**Alkyd, sanding sealer, clear**].
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, interior, [**flat**][**gloss**].

7. Alkyd Varnish System :

a. Prime Coat: Alkyd, sanding sealer, clear.
b. Intermediate Coat: Varnish matching topcoat.
c. Topcoat: Varnish, interior, [**flat**][**gloss**].

8. Polyurethane Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Polyurethane varnish matching topcoat.
c. Second Intermediate Coat: Polyurethane varnish matching topcoat.
d. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

9. Polyurethane Varnish System :

a. Prime Coat: Polyurethane varnish matching topcoat.
b. Intermediate Coat: Polyurethane varnish matching topcoat.
c. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

10. Moisture-Cured Clear Polyurethane over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Moisture-cured polyurethane matching topcoat.
c. Second Intermediate Coat: Moisture-cured polyurethane matching topcoat.
d. Topcoat: Varnish, polyurethane, moisture cured, gloss.

11. Clear, Two-Component Polyurethane System :

a. Prime Coat: Two-component polyurethane matching topcoat.
b. Intermediate Coat: Two-component polyurethane matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane, two component, gloss.

B. Wood Substrates, Exposed Framing:

1. Water-Based Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Water-based varnish matching topcoat.
c. Second Intermediate Coat: Water-based varnish matching topcoat.
d. Topcoat: Varnish, water based, clear, [**satin**][**semigloss**][**gloss**].

2. Alkyd Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Alkyd, sanding sealer, clear.
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, interior, [**flat**][**gloss**].

3. Alkyd Varnish System :

a. Prime Coat: Alkyd, sanding sealer, clear.
b. Intermediate Coat: Varnish matching topcoat.
c. Topcoat: Varnish, interior, [**flat**][**gloss**].

4. Polyurethane Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Polyurethane varnish matching topcoat.
c. Second Intermediate Coat: Polyurethane varnish matching topcoat.
d. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

5. Polyurethane Varnish System :

a. Prime Coat: Polyurethane varnish matching topcoat.
b. Intermediate Coat: Polyurethane varnish matching topcoat.
c. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

6. Moisture-Cured Clear Polyurethane over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Moisture-cured polyurethane matching topcoat.
c. Second Intermediate Coat: Moisture-cured polyurethane matching topcoat.
d. Topcoat: Varnish, polyurethane, moisture cured, gloss.

7. Clear, Two-Component Polyurethane System :

a. Prime Coat: Two-component polyurethane matching topcoat.
b. Intermediate Coat: Two-component polyurethane matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane, two component, gloss.

C. Wood Substrates, [**Wood Trim**][**Architectural Woodwork**][**Doors**][**Windows**][**and**][**Wood Board Paneling**]:

1. Semitransparent Stain System :

a. Prime Coat: Stain, exterior, solvent based, semitransparent, matching topcoat.
b. Topcoat: Stain, exterior, solvent based, semitransparent.

2. Water-Based Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.

b. First Intermediate Coat: Water-based varnish matching topcoat.
c. Second Intermediate Coat: Water-based varnish matching topcoat.
d. Topcoat: Varnish, water based, clear, [**satin**][**semigloss**][**gloss**].

3. Water-Based Varnish System :

a. Prime Coat: Water-based varnish matching topcoat.
b. Intermediate Coat: Water-based varnish matching topcoat.
c. Topcoat: Varnish, water based, clear, [**satin**][**semigloss**][**gloss**].

4. Alkyd Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: [**Alkyd, sanding sealer, clear**][**Shellac, clear**].
c. Second Intermediate Coat: Varnish matching topcoat.
d. Topcoat: Varnish, interior, [**flat**][**gloss**].

5. Alkyd Varnish System :

a. Prime Coat: [**Alkyd, sanding sealer, clear**][**Shellac, clear**].
b. Intermediate Coat: Varnish matching topcoat.
c. Topcoat: Varnish, interior, [**flat**][**gloss**].

6. Polyurethane Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Polyurethane varnish matching topcoat.
c. Second Intermediate Coat: Polyurethane varnish matching topcoat.
d. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

7. Polyurethane Varnish System :

a. Prime Coat: Polyurethane varnish matching topcoat.
b. Intermediate Coat: Polyurethane varnish matching topcoat.
c. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

8. Moisture-Cured Clear Polyurethane over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Moisture-cured polyurethane matching topcoat.
c. Second Intermediate Coat: Moisture-cured polyurethane matching topcoat.
d. Topcoat: Varnish, polyurethane, moisture cured, gloss.

9. Moisture-Cured Clear Polyurethane System :

a. Prime Coat: Moisture-cured polyurethane matching topcoat.
b. Intermediate Coat: Moisture-cured polyurethane matching topcoat.
c. Topcoat: Varnish, polyurethane, moisture cured, gloss.

10. Clear, Two-Component Polyurethane System :

a. Prime Coat: Two-component polyurethane matching topcoat.
b. Intermediate Coat: Two-component polyurethane matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane, two component, gloss.

11. Danish Oil System :

    a. Prime Coat: Danish oil matching topcoat.
    b. Topcoat: Danish oil.

D. Wood Substrates, [**Wood Paneling**][**and**][**Casework**]:

1. Semitransparent Stain System :

    a. Prime Coat: Stain, exterior, solvent based, semitransparent, matching topcoat.
    b. Topcoat: Stain, exterior, solvent based, semitransparent.

2. Water-Based Varnish over Stain System :

    a. Stain Coat: Stain, semitransparent, for interior wood.
    b. First Intermediate Coat: Water-based varnish matching topcoat.
    c. Second Intermediate Coat: Water-based varnish matching topcoat.
    d. Topcoat: Varnish, water based, clear, [**satin**][**semigloss**][**gloss**].

3. Water-Based Varnish System :

    a. Prime Coat: Water-based varnish matching topcoat.
    b. Intermediate Coat: Water-based varnish matching topcoat.
    c. Topcoat: Varnish, water based, clear, [**satin**][**semigloss**][**gloss**].

4. Alkyd Varnish over Stain System :

    a. Stain Coat: Stain, semitransparent, for interior wood.
    b. First Intermediate Coat: [**Alkyd, sanding sealer, clear**][**Shellac, clear**].
    c. Second Intermediate Coat: Varnish matching topcoat.
    d. Topcoat: Varnish, interior, [**flat**][**gloss**].

5. Alkyd Varnish System :

    a. Prime Coat: Alkyd, sanding sealer, clear [**Shellac, clear**].
    b. Intermediate Coat: Varnish matching topcoat.
    c. Topcoat: Varnish, interior, [**flat**][**gloss**].

6. Polyurethane Varnish over Stain System :

    a. Stain Coat: Stain, semitransparent, for interior wood.
    b. First Intermediate Coat: Polyurethane varnish matching topcoat.
    c. Second Intermediate Coat: Polyurethane varnish matching topcoat.
    d. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

7. Polyurethane Varnish System :

    a. Prime Coat: Polyurethane varnish matching topcoat.
    b. Intermediate Coat: Polyurethane varnish matching topcoat.
    c. Topcoat: Varnish, interior, polyurethane, oil modified, [**satin**][**gloss**].

8. Moisture-Cured Clear Polyurethane over Stain System :

    a. Stain Coat: Stain, semitransparent, for interior wood.
    b. First Intermediate Coat: Moisture-cured polyurethane matching topcoat.

c. Second Intermediate Coat: Moisture-cured polyurethane matching topcoat.
d. Topcoat: Varnish, polyurethane, moisture cured, gloss.

9. Danish Oil System :

a. Prime Coat: Danish oil matching topcoat.
b. Topcoat: Danish oil.

E. Wood Substrates, Traffic Surfaces, Including [**Floors**][**and**][**Stairs**]:

1. Polyurethane Varnish over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Polyurethane varnish matching topcoat.
c. Second Intermediate Coat: Polyurethane varnish matching topcoat.
d. Topcoat: Varnish, interior, polyurethane, oil modified, gloss.

2. Polyurethane Varnish System :

a. Prime Coat: Polyurethane varnish matching topcoat.
b. Intermediate Coat: Polyurethane varnish matching topcoat.
c. Topcoat: Varnish, interior, polyurethane, oil modified, gloss.

3. Moisture-Cured Clear Polyurethane over Stain System :

a. Stain Coat: Stain, semitransparent, for interior wood.
b. First Intermediate Coat: Moisture-cured polyurethane matching topcoat.
c. Second Intermediate Coat: Moisture-cured polyurethane matching topcoat.
d. Topcoat: Varnish, polyurethane, moisture cured, gloss.

4. Moisture-Cured Clear Polyurethane System :

a. Prime Coat: Moisture-cured polyurethane matching topcoat.
b. Intermediate Coat: Moisture-cured polyurethane matching topcoat.
c. Topcoat: Varnish, polyurethane, moisture cured, gloss.

5. Clear, Two-Component Polyurethane System :

a. Prime Coat: Two-component polyurethane matching topcoat.
b. Intermediate Coat: Two-component polyurethane matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane, two component, gloss.

F. Wood Substrates, Wood Shingles and Shakes:

1. Solid-Color Latex Stain System :

a. Prime Coat: Primer, latex for exterior wood.
b. Intermediate Coat: Stain, exterior, water based, solid hide, matching topcoat.
c. Topcoat: Stain, exterior, water based, solid hide.

2. Solid-Color, Solvent-Based Stain System :

a. Prime Coat: Stain, exterior, solvent based, solid hide, matching topcoat.
b. Topcoat: Stain, exterior, solvent based, solid hide.

3. Semitransparent Stain System :

   a. Prime Coat: Stain, semitransparent, matching topcoat.
   b. Topcoat: Stain, semitransparent, for interior wood.

END OF SECTION 09 93 00 00

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 96 00 00 - HIGH-PERFORMANCE COATINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Block fillers.
2. Interior primers/sealers.
3. Metal primers.
4. Epoxy coatings.
5. Polyurethane coatings.

B. Related Requirements:

1. [**Section 051200 "Structural Steel Framing"**][**Section 051213 "Architecturally Exposed Structural Steel Framing"**] for shop priming structural steel substrates with primers specified in this Section.
2. Section 055213 "Pipe and Tube Railings" for shop priming and painting pipe and tube railings with coatings specified in this Section.
3. Section 099113 "Exterior Painting" for general field painting.
4. Section 099123 "Interior Painting" for general field painting.
5. Section 099300 "Staining and Transparent Finishing" for general field staining.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

1. Include preparation requirements and application instructions.
2. Indicate VOC content.

B. Samples for Initial Selection: For each type of topcoat product.

C. Samples for Verification: For each type of coating system and each color and gloss of topcoat. Submit [**actual paint drawdowns as specified below**][**paint manufacturer's standard printed cards**] for verification Samples.

1. Submit Samples on actual substrate material to be coated, **8 inches (200 mm)** square.
2. Apply coats on Samples in steps to show each coat required for system.
3. Label each coat of each Sample.
4. Label each Sample for location and application area.

D. Product List: Cross-reference to coating system and locations of application areas. Use same designations indicated on Drawings and in High-Performance Coating Schedules. Include color designations and production runs (batch numbers).

E. Sustainable Design Submittals:

1. Product Data: For paints and coatings, indicating VOC content.

2. Environmental Product Declaration (EPD): For each product.

3. Health Product Declaration (HPD): For each product.

4. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.

5. Environmental Product Declaration (EPD): For each product.

6. Health Product Declaration (HPD): For each product.

7. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.

8. Environmental Product Declaration (EPD): For each product.

9. Environmental Product Declaration (EPD): For each product.

10. Environmental Product Declaration (EPD): For each product.
11. Third-Party Certifications: For each product.
12. Third-Party-Certified Life-Cycle Assessment: For each product.

13. Product Data for Green Seal GS-11 Certification: Green Seal GS-11 certification.

1.3 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish extra materials [**from the same production run (batch number),**] that match coating system products applied and that are packaged with protective covering for storage and identified with labels describing contents.

1. Coatings: [**5**] percent, but not less than [**1 gal. (3.8 L)**] of each material and color applied.

1.4 MOCKUPS

A. Apply mockups of each coating system indicated and each color and finish selected to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution, as directed by the Owner.

1. Architect will select one surface to represent surfaces and conditions for application of each coating system.

   a. Wall and Ceiling Surfaces: Provide samples of at least **100 sq. ft. (9 sq. m)**.
   b. Other Items: Architect will designate items or areas required.

2. Final approval of color selections will be based on mockups.

   a. If preliminary color selections are not approved, apply additional mockups of additional colors selected by Architect at no added cost to the Owner, as directed by the Owner.

3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than **45 deg F (7 deg C)**.

1. Maintain containers in clean condition, free of foreign materials and residue.
2. Remove rags and waste from storage areas daily.

1.6 FIELD CONDITIONS

A. Apply coatings only when temperature of surfaces to be coated and ambient air temperatures are between **50 and 95 deg F (10 and 35 deg C)**.

B. Do not apply coatings when relative humidity exceeds 85 percent; at temperatures less than **5 deg F (3 deg C)** above the dew point; or to damp or wet surfaces.

C. Do not apply exterior coatings in snow, rain, fog, or mist.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each coating system product from single source from single manufacturer.

2.2 HIGH-PERFORMANCE COATING PRODUCTS, GENERAL

A. High-Performance Coating Products: Subject to compliance with requirements, [**provide product**][**provide one of the products**][**available products that may be incorporated into the Work include but are not limited to products**] listed in product types below and applicable exterior and interior high-performance coating schedule articles for the coating category indicated.

B. Material Compatibility:

1. Materials for use within each coating system must be compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer based on testing and field experience.
2. For each coat in a coating system, provide products recommended in writing by topcoat manufacturer for use in system and on substrate indicated.

C. VOC Content: For field applications [**that are inside the weatherproofing system**] , verify paints and coatings comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Flat Paints and Coatings: 50 g/L.
2. Nonflat Paints and Coatings: 50 g/L.
3. Primers, Sealers, and Undercoaters: 100 g/L.
4. Rust-Preventive Coatings: 100 g/L.
5. Zinc-Rich Industrial Maintenance Primers: 100 g/L.
6. Pretreatment Wash Primers: 420 g/L.
7. Floor Coatings: 50 g/L.
8. Shellacs, Clear: 730 g/L.

9. Shellacs, Pigmented: 550 g/L.

D. Low-Emitting Materials: For field applications that are inside the weatherproofing system, verify 90 percent of paints and coatings comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

E. Material Emissions and Pollutant Control: Verify that not less than 85 percent of field-applied paints and coatings that are inside the weatherproofing system comply with either of the following:

1. Low-Emitting Materials: Verify VOC emissions comply with requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Verify formaldehyde emissions do not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
2. Verify VOC content does not exceed limits of authorities having jurisdiction and the following:

a. Flat Coatings: 50 g/L.
b. Nonflat Coatings: 100 g/L.
c. Nonflat - High-Gloss Coatings: 150 g/L.
d. Concrete/Masonry Sealers: 100 g/L.
e. Floor Coatings: 100 g/L.
f. Industrial Maintenance Coatings: 250 g/L.
g. Low-Solids Coatings: 120 g/L.
h. Mastic Texture Coatings: 100 g/L.
i. Metallic Pigmented Coatings: 500 g/L.
j. Pretreatment Wash Primers: 420 g/L.
k. Primers, Sealers, and Undercoaters: 100 g/L.
l. Reactive Penetrating Sealers: 350 g/L.
m. Recycled Coatings: 250 g/L.
n. Rust-Preventive Coatings: 250 g/L.

F. VOC Emissions: For field applications inside the building, wall paints shall contain no more than half of the chronic REL of VOCs when tested according to the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit or 33 mcg/cu. m and that of acetaldehyde shall not exceed 9 mcg/cu. m.

G. Low-Emitting Materials: For field applications that are inside the weatherproofing system, verify paints and coatings comply with VOC emissions evaluation criteria.

H. Colors: [**As selected by Architect from manufacturer's full range**][**Match Architect's samples**][**As indicated in color schedule on Drawings**] as directed by the Owner.

2.3 BLOCK FILLERS

A. Latex Block Filler: Water-based, pigmented, high-solids, emulsion coating formulated to bridge and fill porous surfaces of CMU substrates in preparation for specified subsequent coatings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Sherwin-Williams Company (The)**]
d. [**The Pittsburgh Paints Company**]
e. [**Tnemec Company, Inc.**]

B. Epoxy Block Filler: Solvent-based, two-component, epoxy, high-solids coating; formulated to bridge and fill porous surfaces of CMU substrates in preparation for specified subsequent coatings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Benjamin Moore & Co.**]
b. [**Sherwin-Williams Company (The)**]
c. [**The Pittsburgh Paints Company**]
d. [**Tnemec Company, Inc.**]

2.4 INTERIOR PRIMERS/SEALERS

A. Interior Latex Primer Sealer: Pigmented, water-based latex sealer; formulated to reduce porosity of substrate for finish coats; for use on new interior plaster, concrete, and gypsum board substrates. Not intended for use on wood or previously painted surfaces.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Sherwin-Williams Company (The)**]
d. [**The Pittsburgh Paints Company**]
e. [**Tnemec Company, Inc.**]

B. Knot Sealer: White shellac or other sealer recommended in writing by topcoat manufacturer for sealing wood knots.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Sherwin-Williams Company (The)**]

2.5 METAL PRIMERS

A. Zinc-Rich Inorganic Primer: Corrosion-resistant, inorganic-based, zinc-rich primer; formulated for use on prepared ferrous metal substrates that will be exposed to severe industrial or marine environments.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Sherwin-Williams Company (The)**]
b. [**The Pittsburgh Paints Company**]
c. [**Tnemec Company, Inc.**]

B. Epoxy Zinc-Rich Primer: Solvent-based, multi-component, epoxy-type anticorrosive primer; formulated for use on cleaned ferrous metal substrates that will be exposed to moderate industrial or marine environments.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Sherwin-Williams Company (The)**]
b. [**The Pittsburgh Paints Company**]
c. [**Tnemec Company, Inc.**]

C. Water-Based, Rust-Inhibitive Primer: Corrosion-resistant, water-based-emulsion primer; formulated for resistance to flash rusting when applied to cleaned, ferrous metal substrates subject to mildly corrosive environments.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Sherwin-Williams Company (The)**]
d. [**The Pittsburgh Paints Company**]
e. [**Tnemec Company, Inc.**]

D. Epoxy, Anticorrosive Primer: Solvent-based, two-component, epoxy, anticorrosive primer; formulated for use on ferrous and galvanized metal substrates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Sherwin-Williams Company (The)**]
b. [**The Pittsburgh Paints Company**]

c. [**Tnemec Company, Inc.**]

E. Vinyl Wash Primer: Two-component, vinyl butyral/phosphoric acid-wash primer formulated for use over cleaned ferrous metal substrates and zinc-rich primers as a tie coat for subsequent corrosion-resistant primers or finish coatings.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Sherwin-Williams Company (The)**]
b. [**The Pittsburgh Paints Company**]

2.6 EPOXY COATINGS

A. Epoxy: Solvent-based, two-component epoxy coating; formulated for resistance to incidental splash and spillage of dilute (5 percent) sulfuric acid, (15 percent) hydrochloric acid, (20 percent) sodium hydroxide, gasoline, and heavy-duty cleaners and detergents; for use on wall and floor surfaces in moderate-to-heavy-traffic commercial and moderate industrial environments.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Benjamin Moore & Co.**]
b. [**H&C Decorative Concrete Products; a brand of Sherwin-Williams Co.**]
c. [**Sherwin-Williams Company (The)**]
d. [**The Pittsburgh Paints Company**]
e. [**Tnemec Company, Inc.**]

2. Gloss Level: Manufacturer's standard [**semigloss**][**gloss**] .

B. High-Build Epoxy: Two-component epoxy, high-solids, self-priming coating for use on interior or exterior substrates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Behr Paint Company (Behr Process LLC)**]
b. [**Benjamin Moore & Co.**]
c. [**Sherwin-Williams Company (The)**]
d. [**The Pittsburgh Paints Company**]
e. [**Tnemec Company, Inc.**]

2. Gloss Level: Manufacturer's standard [**low gloss**][**gloss**] .

C. Epoxy-Modified Latex: Water-based, two-component, epoxy-modified latex paint for use on interior or exterior substrates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**H&C Decorative Concrete Products; a brand of Sherwin-Williams Co.**]
    b. [**Sherwin-Williams Company (The)**]
    c. [**The Pittsburgh Paints Company**]
    d. [**Tnemec Company, Inc.**]

2. Gloss Level: Manufacturer's standard [**semigloss**][**gloss**] .

D. Epoxy Deck Coating (Slip Resistant): Solvent-based, two-component epoxy, non-slip coating formulated for resistance to abrasion, solvents, fuel, and oils; for use on interior and exterior decks.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Benjamin Moore & Co.**]
    b. [**H&C Decorative Concrete Products; a brand of Sherwin-Williams Co.**]
    c. [**Neogard; Hempel Group**]
    d. [**Sherwin-Williams Company (The)**]
    e. [**The Pittsburgh Paints Company**]
    f. [**Tnemec Company, Inc.**]

2.7 POLYURETHANE COATINGS

A. Pigmented Polyurethane: Solvent-based, two-component coating formulated for resistance to abrasion, weathering, and chemical and solvent exposure; for use on interior or exterior substrates.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Benjamin Moore & Co.**]
    b. [**Sherwin-Williams Company (The)**]
    c. [**The Pittsburgh Paints Company**]
    d. [**Tnemec Company, Inc.**]

2. Gloss Level: Manufacturer's standard [**semigloss**][**gloss**] .

B. Varnish, Aliphatic Polyurethane: Clear, solvent-based, two-component coating formulated for use on interior or exterior wood substrates; manufacturer's standard gloss and sheen.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Benjamin Moore & Co.**]
b. [**H&C Decorative Concrete Products; a brand of Sherwin-Williams Co.**]
c. [**Sherwin-Williams Company (The)**]
d. [**The Pittsburgh Paints Company**]
e. [**Tnemec Company, Inc.**]

2.8 SOURCE QUALITY CONTROL

A. Testing of Coating Materials: the Owner reserves the right to invoke the following procedure:

1. the Owner will engage services of a qualified testing agency to sample coating materials. Contractor will be notified in advance and may be present when samples are taken. If coating materials have already been delivered to Project site, samples may be taken at Project site. Samples will be identified, sealed, and certified by testing agency.
2. Testing agency will perform tests for compliance with product requirements.
3. the Owner may direct Contractor to stop applying coatings if test results show materials being used do not comply with product requirements. Contractor to remove noncomplying coating materials from Project site, pay for testing, and recoat surfaces coated with rejected materials. Contractor will be required to remove rejected materials from previously coated surfaces if, on recoating with complying materials, both coatings are incompatible.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with requirements for maximum moisture content and other conditions affecting performance of the Work.

B. Maximum Moisture Content of Substrates: When measured with an electronic moisture meter as follows:

1. Concrete: 12 percent.
2. Cementitious Composition Board: 12 percent.
3. Masonry (Clay and CMUs): 12 percent.
4. Wood: 15 percent.
5. Portland Cement (Plaster Stucco): 12 percent. Verify that plaster is fully cured.
6. Gypsum Board: 12 percent. Verify that finishing compound is dry and sanded smooth.

C. Verify suitability of substrates, including surface conditions and compatibility, with finishes and primers. Proceed with coating application only after unsatisfactory conditions have been corrected.

1. Application of coating indicates acceptance of surfaces and conditions.

3.2 PREPARATION

A. Comply with manufacturer's written instructions applicable to substrates and coating systems indicated.

B. Remove hardware, covers, plates, and similar items already in place that are removable and are not to be painted. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and painting.

1. After completing coating operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection.

C. Clean substrates of substances that could impair bond of coatings, including dust, dirt, oil, grease, and incompatible paints and encapsulants.

1. Remove incompatible primers and reprime substrate with compatible primers or apply tie coat as required to produce coating systems indicated.

D. Concrete Substrates: Remove release agents, curing compounds, efflorescence, and chalk. Do not coat surfaces if moisture content or alkalinity of surfaces to be coated exceeds that permitted in manufacturer's written instructions.

1. Clean surfaces with pressurized water. Use pressure range of [**1500 to 4000 psi (10 350 to 27 580 kPa)**][**4000 to 10,000 psi (27 580 to 68 950 kPa)**] at **6 to 12 inches (150 to 300 mm)**.
2. Abrasive blast clean surfaces to comply with SSPC-SP 7/NACE No. 4.

E. Masonry Substrates: Remove efflorescence and chalk. Do not coat surfaces if moisture content, alkalinity of surfaces, or alkalinity of mortar joints exceeds that permitted in manufacturer's written instructions.

1. Clean surfaces with pressurized water. Use pressure range of [**100 to 600 psi (690 to 4140 kPa)**][**600 to 1500 psi (4140 to 10 350 kPa)**][**1500 to 4000 psi (10 350 to 27 580 kPa)**] at **6 to 12 inches (150 to 300 mm)**.

F. Steel Substrates: Remove loose rust, loose mill scale, loose shop primer, and other foreign matter. Clean using methods recommended in writing by coating manufacturer [**.**][**but not less than the following:**]

1. SSPC-SP 7/NACE No. 4.
2. SSPC-SP 11.
3. SSPC-SP 6/NACE No. 3.
4. SSPC-SP 10/NACE No. 2.
5. SSPC-SP 5/NACE No. 1.

G. Shop-Primed Steel Substrates: Clean field welds, bolted connections, and areas where shop paint is abraded. Paint exposed areas with the same material as used for shop priming to comply with SSPC-PA 1 for touching up shop-primed surfaces.

H. Galvanized Metal Substrates: Remove grease and oil residue from galvanized metal by mechanical methods to produce clean, lightly etched surfaces that promote adhesion of subsequently applied coatings.

I. Aluminum Substrates: Remove loose surface oxidation.

J. Wood Substrates:

1. Scrape and clean knots. Before applying primer, apply coat of knot sealer that is recommended in writing by topcoat manufacturer for coating system indicated.

2. Sand surfaces that will be exposed to view and dust off.
3. Prime edges, ends, faces, undersides, and backsides of wood.
4. After priming, fill holes and imperfections in the finish surfaces with filler that is recommended in writing by topcoat manufacturer for coating system indicated. Sand smooth when dried.

3.3 APPLICATION OF HIGH-PERFORMANCE COATINGS

A. Apply coating system products in accordance with manufacturer's written instructions.

1. Use applicators and techniques suited for coating and substrate indicated.
2. Coat surfaces behind movable equipment and furniture same as similar exposed surfaces. Before final installation, coat surfaces behind permanently fixed equipment or furniture with prime coat only.
3. Coat backsides of access panels, removable or hinged covers, and similar hinged items to match exposed surfaces.
4. Do not apply coatings over labels of independent testing agencies or equipment name, identification, performance rating, or nomenclature plates.

B. Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of the same material are to be applied. Tint undercoats to match color of finish coat but provide sufficient difference in shade of undercoats to distinguish each separate coat.

C. If undercoats or other conditions show through final coat, apply additional coats until cured film has a uniform coating finish, color, and appearance.

D. Apply coatings to produce surface films without cloudiness, spotting, holidays, laps, brush marks, runs, sags, ropiness, or other surface imperfections. Produce sharp glass lines and color breaks.

3.4 FIELD QUALITY CONTROL

A. Dry Film Thickness Testing: the Owner may engage the services of a qualified testing and inspecting agency to inspect and test coatings for dry film thickness.

1. Touch up and restore coated surfaces damaged by testing.
2. If test results show that dry film thickness of applied coating does not comply with coating manufacturer's written instructions, apply additional coats as needed to provide dry film thickness that complies with coating manufacturer's written instructions.
3. Cost of retesting is Contractor's responsibility.

3.5 CLEANING

A. After completing coating application, clean spattered surfaces. Remove spattered coatings by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

B. At completion of construction activities of other trades, touch up and restore damaged or defaced coated surfaces.

3.6 PROTECTION

A. Protect work of other trades against damage from coating operation. Correct damage to work of other trades by cleaning, repairing, replacing, and recoating, as approved by Architect, and leave in an

undamaged condition, as directed by the Owner.

3.7 EXTERIOR HIGH-PERFORMANCE COATING SCHEDULE, CONCRETE SUBSTRATES

A. Vertical (Nontraffic) Surfaces:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane over Epoxy System:

a. Prime Coat: Epoxy, matching intermediate coat.
b. Intermediate Coat: Epoxy, gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

B. Horizontal (Traffic) Surfaces:

1. Epoxy Non-Slip Deck Coating System:

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Epoxy deck coating (slip resistant).

3.8 EXTERIOR HIGH-PERFORMANCE COATING SCHEDULE, CEMENTITIOUS SUBSTRATES

A. Cementitious Composition Board Substrates: [**Siding**][**Trim**][**Panels**] .

1. Epoxy-Modified Latex System:

a. Prime Coat: Epoxy-modified latex, matching topcoat.
b. Intermediate Coat: Epoxy-modified latex, matching topcoat.
c. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Pigmented Polyurethane over Epoxy System:

a. Prime Coat: Epoxy, gloss.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

B. Portland Cement Plaster (Stucco) Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3.9 EXTERIOR HIGH-PERFORMANCE COATING SCHEDULE, MASONRY SUBSTRATES

A. Clay Masonry Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane over Epoxy System:

a. Prime Coat: Epoxy, matching intermediate coat.
b. Intermediate Coat: Epoxy, gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

B. CMU Substrates:

1. Epoxy System:

a. Block Filler: Epoxy block filler.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane over High-Build Epoxy System:

a. Block Filler: Epoxy block filler.
b. Intermediate Coat: High-build epoxy, low gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3.10 EXTERIOR HIGH-PERFORMANCE COATING SCHEDULE, METAL SUBSTRATES

A. Steel Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: High-build epoxy, low gloss.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy over Self-Priming Epoxy System:

a. Prime Coat: High-build epoxy.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Epoxy Deck Coating over Epoxy Primer and High-Build Epoxy System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: High-build epoxy, low gloss.
c. Topcoat: Epoxy deck coating (slip resistant).
d. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

4. Epoxy Deck Coating over Self-Priming Epoxy System:

a. Prime Coat: High-build epoxy.
b. Topcoat: Epoxy deck coating (slip resistant).
c. Additive: Manufacturer's standard additive to increase skid resistance of painted surface.

5. Pigmented Polyurethane over Epoxy System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: Epoxy, gloss.
c. First and Second Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

6. Pigmented Polyurethane over High-Build Epoxy System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: High-build epoxy, low gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

7. Pigmented Polyurethane over Self-Priming Epoxy System:

a. Prime Coat: High-build epoxy.
b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

8. Pigmented Polyurethane over Epoxy Zinc-Rich Primer System:

a. Prime Coat: Epoxy zinc-rich primer.
b. Intermediate Coat: Epoxy, gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

9. Pigmented Polyurethane over Epoxy Zinc-Rich Primer and High-Build Epoxy System:

a. Prime Coat: Epoxy zinc-rich primer.
b. Intermediate Coat: High-build epoxy, low gloss.
c. First and Second Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

10. Pigmented Polyurethane over Zinc-Rich Inorganic Primer and High-Build Epoxy System:

a. Prime Coat: Zinc-rich inorganic primer.
b. Intermediate Coat: High-build epoxy, low gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

B. Galvanized Metal Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane over Epoxy Primer System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Pigmented Polyurethane over Vinyl Wash Primer and Epoxy Primer System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Epoxy, anticorrosive primer.
c. First and Second Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

C. Aluminum (Not Anodized or Otherwise Coated) Substrates:

1. Epoxy System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane over Epoxy System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Epoxy, anticorrosive primer.
c. First and Second Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

D. Copper Substrates:

1. Epoxy System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane over Epoxy System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Epoxy, anticorrosive primer.
c. First and Second Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

E. Stainless Steel Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane System:

a. Prime Coat: Vinyl wash primer.
b. Intermediate Coat: Epoxy, anticorrosive primer.
c. First and Second Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3.11 EXTERIOR HIGH-PERFORMANCE COATING SCHEDULE, WOOD SUBSTRATES

A. Glued-Laminated Wood Substrates:

1. Pigmented Polyurethane System:

    a. Prime Coat: Pigmented polyurethane, matching topcoat.
    b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
    c. Topcoat: Pigmented polyurethane.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Clear (Two-Component) Polyurethane System:

    a. Stain Coat: As specified in Section 099300 "Staining and Transparent Finishing."
    b. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
    c. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
    d. Topcoat: Varnish, aliphatic polyurethane.

B. Exposed Wood-Framed Substrates:

1. Pigmented Polyurethane System:

    a. Prime Coat: Pigmented polyurethane, matching topcoat.
    b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
    c. Topcoat: Pigmented polyurethane.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Clear (Two-Component) Polyurethane System:

    a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
    b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
    c. Topcoat: Varnish, aliphatic polyurethane.

C. Dressed Wood Substrates: [**Wood trim**][**Architectural woodwork**][**Doors**][**Windows**][**Wood board siding**][**Railings**][**and**][**Fences**] .

1. Pigmented Polyurethane System:

    a. Prime Coat: Pigmented polyurethane, matching topcoat.
    b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
    c. Topcoat: Pigmented polyurethane.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Clear (Two-Component) Polyurethane System:

    a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
    b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
    c. Topcoat: Varnish, aliphatic polyurethane.

3.12 EXTERIOR HIGH-PERFORMANCE COATING SCHEDULE, MISCELLANEOUS SUBSTRATES

A. Fiberglass Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy-Modified Latex System:

a. Prime Coat: Epoxy-modified latex, matching topcoat.
b. Intermediate Coat: Epoxy-modified latex, matching topcoat.
c. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Pigmented Polyurethane over Epoxy System:

a. Prime Coat: Epoxy, matching intermediate coat.
b. Intermediate Coat: Epoxy, gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3.13 INTERIOR HIGH-PERFORMANCE COATING SCHEDULE, CONCRETE SUBSTRATES

A. Vertical (Nontraffic) Surfaces:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy, High-Build System:

a. Prime Coat: High-build epoxy, matching topcoat (reduced).
b. Intermediate Coat: High-build epoxy, matching topcoat.
c. Topcoat: High-build epoxy.

1) Gloss Level: Low gloss.

3. Epoxy-Modified Latex System:

a. Prime Coat: Epoxy-modified latex, matching topcoat.
b. Intermediate Coat: Epoxy-modified latex, matching topcoat.
c. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

B. Horizontal (Traffic) Surfaces.

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy, High-Build System:

a. Prime Coat: High-build epoxy, matching topcoat (reduced).
b. Intermediate Coat: High-build epoxy, matching topcoat.
c. Topcoat: High-build epoxy.

1) Gloss Level: [**Low gloss**][**Gloss**] .

3. Pigmented Polyurethane System:

a. Prime Coat: Epoxy, gloss.
b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

4. Clear (Two-Component) Polyurethane System:

a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane.

3.14 INTERIOR HIGH-PERFORMANCE COATING SCHEDULE, CEMENTITIOUS SUBSTRATES

A. Cementitious Composition Board Substrates: [**Siding**][**Trim**][**Panels**] .

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy-Modified Latex System:

a. Prime Coat: Epoxy-modified latex, matching topcoat.
b. Intermediate Coat: Epoxy-modified latex, matching topcoat.
c. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3.15 INTERIOR HIGH-PERFORMANCE COATING SCHEDULE, MASONRY SUBSTRATES

A. Clay Masonry Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy-Modified Latex System:

a. Prime Coat: Epoxy-modified latex, matching topcoat.
b. Intermediate Coat: Epoxy-modified latex, matching topcoat.
c. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Clear (Two-Component) Polyurethane System:

a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane.

B. CMU Substrates:

1. Epoxy System for Dry Environments:

a. Block Filler: Latex block filler.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy System for Wet Environments:

a. Block Filler: Epoxy block filler.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Epoxy, High-Build System:

a. Prime Coat: Epoxy block filler.
b. Intermediate Coat: High-build epoxy, matching topcoat.
c. Topcoat: High-build epoxy.

1) Gloss Level: [**Low gloss**][**Gloss**] .

4. Epoxy-Modified Latex System:

a. Block Filler: Latex block filler.
b. Intermediate Coat: Epoxy-modified latex, interior, matching topcoat.
c. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

5. Clear (Two-Component) Polyurethane System:

    a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
    b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
    c. Topcoat: Varnish, aliphatic polyurethane.

3.16 INTERIOR HIGH-PERFORMANCE COATING SCHEDULE, METAL SUBSTRATES

A. Steel Substrates:

1. Epoxy System:

    a. Prime Coat: Epoxy, anticorrosive primer.
    b. Intermediate Coat: Epoxy, matching topcoat.
    c. Topcoat: Epoxy.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

2. High-Build Epoxy over Epoxy Zinc-Rich Primer System:

    a. Prime Coat: Epoxy zinc-rich primer.
    b. Intermediate Coat: High-build epoxy, low gloss.
    c. Topcoat: Epoxy.

        1) Gloss Level: [**Low gloss**][**Gloss**] .

3. Epoxy over Self-Priming Epoxy System:

    a. Prime Coat: High build epoxy.
    b. Intermediate Coat: Epoxy, matching topcoat.
    c. Topcoat: Epoxy.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

4. Epoxy, High-Build System:

    a. Prime Coat: Epoxy, anticorrosive primer.
    b. Intermediate Coat: High-build epoxy, matching topcoat.
    c. Topcoat: High-build epoxy.

        1) Gloss Level: [**Low gloss**][**Gloss**] .

5. Epoxy Deck Coating System:

    a. Prime Coat: Epoxy, anticorrosive primer.
    b. Intermediate Coat: Epoxy.
    c. Topcoat: Epoxy deck coating (slip resistant).

6. Epoxy-Modified Latex System:

    a. Prime Coat, First Coat: Water-based, rust-inhibitive primer.
    b. Prime Coat, Second Coat: Water-based, rust-inhibitive primer.
    c. Intermediate Coat: Epoxy-modified latex, matching topcoat.
    d. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

7. Pigmented Polyurethane over Epoxy Primer System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

8. Pigmented Polyurethane over High-Build Epoxy System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: High-build epoxy, low gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

9. Pigmented Polyurethane over Self-Priming Epoxy System:

a. Prime Coat: High-build epoxy.
b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

10. Pigmented Polyurethane over Inorganic Zinc-Rich and Epoxy System:

a. Prime Coat: Zinc-rich inorganic primer.
b. Intermediate Coat: Epoxy.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

11. Pigmented Polyurethane over Epoxy Zinc-Rich and Epoxy System:

a. Prime Coat: Epoxy zinc-rich primer.
b. Intermediate Coat: Epoxy, gloss.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

B. Galvanized Metal Substrates:

1. Epoxy over Epoxy Primer System:

a. Prime Coat: Epoxy, anticorrosive primer.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

C. Aluminum (Not Anodized or Otherwise Coated) Substrates:

1. Epoxy System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Epoxy, matching topcoat.
    c. Topcoat: Epoxy.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Epoxy, gloss.
    c. Topcoat: Pigmented polyurethane.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

D. Copper Substrates:

1. Epoxy System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Epoxy, matching topcoat.
    c. Topcoat: Epoxy.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Epoxy, gloss.
    c. Topcoat: Pigmented polyurethane.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

E. Stainless Steel Substrates:

1. Epoxy System:

    a. Prime Coat: Primer, epoxy.
    b. Intermediate Coat: Epoxy, matching topcoat.
    c. Topcoat: Epoxy.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane System:

    a. Prime Coat: Vinyl wash primer.
    b. Intermediate Coat: Epoxy, gloss.
    c. Topcoat: Pigmented polyurethane.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

3.17 INTERIOR HIGH-PERFORMANCE COATING SCHEDULE, WOOD SUBSTRATES

A. Glued-Laminated Wood Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane System:

a. Prime Coat: Pigmented polyurethane, matching topcoat.
b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Clear (Two-Component) Polyurethane System:

a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane.

B. Exposed Wood-Framed Substrates:

1. Clear (Two-Component) Polyurethane System:

a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane.

C. Dressed Wood Substrates: [**Wood trim**][**Architectural woodwork**][**Doors**][**Windows**][**and**][**Wood board paneling**] .

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Clear (Two-Component) Polyurethane System:

a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane.

D. Wood-Traffic Substrates: [**Floors**][**and**][**stairs**] .

1. Clear (Two-Component) Polyurethane System:

a. Prime Coat: Varnish, aliphatic polyurethane, matching topcoat.
b. Intermediate Coat: Varnish, aliphatic polyurethane, matching topcoat.
c. Topcoat: Varnish, aliphatic polyurethane, .
d. Additive: Manufacturer's standard additive to increase skid resistance of coated surface.

3.18 INTERIOR HIGH-PERFORMANCE COATING SCHEDULE, GYPSUM-BASED SUBSTRATES

A. Gypsum Board and Plaster Substrates:

1. Epoxy System:

a. Prime Coat: Interior latex primer sealer.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Epoxy, High-Build System:

a. Prime Coat: Interior latex primer sealer.
b. Intermediate Coat: High-build epoxy, matching topcoat.
c. Topcoat: High-build epoxy.

1) Gloss Level: [**Low gloss**][**Gloss**] .

3. Epoxy-Modified Latex System:

a. Prime Coat: Interior latex primer sealer.
b. Intermediate Coat: Epoxy-modified latex, matching topcoat.
c. Topcoat: Epoxy-modified latex.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3.19 INTERIOR HIGH-PERFORMANCE COATING SCHEDULE, MISCELLANEOUS SUBSTRATES

A. Fiberglass Substrates:

1. Epoxy System:

a. Prime Coat: Epoxy, matching topcoat.
b. Intermediate Coat: Epoxy, matching topcoat.
c. Topcoat: Epoxy.

1) Gloss Level: [**Semigloss**][**Gloss**] .

2. Pigmented Polyurethane System:

a. Prime Coat: Epoxy, gloss.
b. Intermediate Coat: Pigmented polyurethane, matching topcoat.
c. Topcoat: Pigmented polyurethane.

1) Gloss Level: [**Semigloss**][**Gloss**] .

3. Epoxy-Modified Latex System:

    a. Prime Coat: Epoxy-modified latex, matching topcoat.
    b. Intermediate Coat: Epoxy-modified latex, matching topcoat.
    c. Topcoat: Epoxy-modified latex.

        1) Gloss Level: [**Semigloss**][**Gloss**] .

END OF SECTION 09 96 00 00

SECTION 09 96 53 00 - ELASTOMERIC COATINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Elastomeric coating systems.

B. Related Requirements:

1. Section 099113 "Exterior Painting."
2. Section 099600 "High-Performance Coatings" for tile-like coatings.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include preparation requirements and application instructions.
2. Indicate VOC content.

B. Samples for Initial Selection: For each type of elastomeric topcoat product.

C. Samples for Verification: For each type of elastomeric topcoat product indicated and in each color and gloss. Submit [**actual coating system drawdowns as specified below**][**coating manufacturer's standard printed cards**] for verification Samples.

1. Submit Samples on same type of substrate as that to receive application, **8 inches (200 mm)** square.
2. Apply coats on Samples in steps to show each separate coat, including primers and block fillers as applicable.
3. Label each coat of each Sample.
4. Label each Sample for location and application area.

D. Product List: Cross-reference to coating system and locations of application areas. Use same designations indicated on Drawings and in the Elastomeric Coating Schedule to cross-reference coating systems specified in this Section. Include color designations.

E. Sustainable Design Submittals:

1. Product Data: For paints and coatings, indicating VOC content.
2. Environmental Product Declaration (EPD): For each product.
3. Health Product Declaration (HPD): For each product.
4. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
5. Manufacturer Inventory: For each product, provide manufacturer's manifest of ingredients.

1.3 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials[**, from the same production run,**] that match products installed and that are

packaged with protective covering for storage and identified with labels describing contents.

1. Elastomeric Coating System Products: Furnish an additional [**5**]<**Insert number**> percent but not less than [**1 gal. (3.8 L)**]<**Insert quantity**> of each material, color, and texture applied.

1.4 MOCKUPS

A. Apply mockups of each coating system indicated and each color and finish selected to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.

1. Architect will select one surface to represent surfaces and conditions for application of each coating system.

a. Vertical Surfaces: Provide samples of at least **100 sq. ft (9 sq. m)**.
b. Other Items: Architect will designate items or areas required.

2. Final approval of color selections will be based on mockups.

a. If preliminary color selections are not approved, apply additional mockups of additional colors selected by Architect at no added cost to Owner.

3. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.
4. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than **45 deg F (7 deg C)**.

1. Maintain containers in clean condition, free of foreign materials and residue.
2. Remove rags and waste from storage areas daily.

1.6 FIELD CONDITIONS

A. Apply coatings only when temperature of surfaces to be coated and ambient air temperatures are between **50 and 90 deg F (10 and 32 deg C)** unless otherwise permitted by manufacturer's written instructions.

B. Do not apply coatings in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures less than **5 deg F (3 deg C)** above the dew point; or to damp or wet surfaces.

C. Allow wet surfaces to dry thoroughly and attain temperature and conditions specified before starting or continuing coating operation.

1.7 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace

elastomeric coatings that fail within specified warranty period.

1. Failures include, but are not limited to, the following:

   a. Water penetration through the coating.
   b. Deterioration of coating beyond normal weathering.
   c. <**Insert failure modes**>.

2. Warranty Period: [**Five**][**10**]<**Insert number**> years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 SOURCE LIMITATIONS

A. Obtain each coating system product from single source from single manufacturer.

2.2 ELASTOMERIC COATINGS, GENERAL

A. Elastomeric Coating Systems: Subject to compliance with requirements, [**provide product**][**provide one of the products**][**available products that may be incorporated into the Work include but are not limited to products**] listed in the Elastomeric Coating Schedule Article for the substrate category indicated.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Behr Paint Company (Behr Process LLC)**]
   b. [**Benjamin Moore & Co.**]
   c. [**Coronado Paint; Benjamin Moore & Co.**]
   d. [**Insl-X Products; Benjamin Moore & Co.**]
   e. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
   f. [**Rodda Paint Co.**]
   g. [**Sherwin-Williams Company (The)**]
   h. [**Sto Corp.**]
   i. [**Textured Coatings of America, Inc**]
   j. [**The Pittsburgh Paints Company**]
   k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Behr Paint Company (Behr Process LLC)**]
   b. [**Benjamin Moore & Co.**]
   c. [**Coronado Paint; Benjamin Moore & Co.**]
   d. [**Insl-X Products; Benjamin Moore & Co.**]
   e. [**Pratt & Lambert; a subsidiary of The Sherwin-Williams Company**]
   f. [**Rodda Paint Co.**]
   g. [**Sherwin-Williams Company (The)**]
   h. [**Sto Corp.**]
   i. [**Textured Coatings of America, Inc**]

j. [**The Pittsburgh Paints Company**]
k. <**Insert manufacturer's name**>

B. Moisture-Vapor Transmission: Minimum <**Insert perms (metric perms)**>, based on testing in accordance with ASTM D1653.

C. Material Compatibility:

1. Materials for use within each coating system are compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
2. For each coat in a coating system, products are recommended in writing by manufacturers of topcoat for use in elastomeric coating system and on substrate indicated.

D. VOC Content: For field applications, verify paints and coatings comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Flat Paints and Coatings: 50 g/L.
2. Nonflat Paints and Coatings: 50 g/L.
3. Dry-Fog Coatings: 150 g/L.
4. Primers, Sealers, and Undercoaters: 100 g/L.
5. Rust-Preventive Coatings: 100 g/L.
6. Zinc-Rich Industrial Maintenance Primers: 100 g/L.
7. Pretreatment Wash Primers: 420 g/L.
8. Shellacs, Clear: 730 g/L.
9. Shellacs, Pigmented: 550 g/L.

E. Colors: [**As selected by Architect from manufacturer's full range**][**Match Architect's samples**][**As indicated in a color schedule**]<**Insert requirements**>.

1. [**10**][**20**][**30**]<**Insert number**> percent of surface area will be coated with deep tones.

F. Crack Fillers: Elastomeric coating manufacturer's recommended, factory-formulated crack fillers or sealants, including crack filler primers, compatible with substrate and other materials indicated.

G. Primer: Elastomeric coating manufacturer's recommended, factory-formulated, alkali-resistant primer compatible with substrate and other materials indicated.

H. Concrete Masonry Unit Block Filler: Elastomeric coating manufacturer's recommended, factory-formulated, high-performance latex block filler compatible with substrate and other materials indicated.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with manufacturer's requirements for maximum moisture content, alkalinity, and other conditions affecting performance of the Work.

B. Begin coating only when moisture content of substrate is 12 percent or less when measured with an electronic moisture meter.

C. Begin coating no sooner than [**28**]<**Insert number**> days after substrate is constructed and is visually dry on both sides.

D. Verify that substrate is within the range of alkalinity recommended by manufacturer.

E. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.

F. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.

1. Application of coating system indicates acceptance of substrates and conditions.

3.2 PREPARATION

A. Comply with manufacturer's written instructions applicable to substrates and coating systems indicated.

B. Remove hardware and hardware accessories, plates, machined surfaces, light fixtures, and similar items already installed that are not to be coated. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and coating.

1. After completing coating operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection if any.

C. Clean substrates of substances that could impair bond of coatings, including dirt, oil, grease, and incompatible paints and encapsulants. Do not coat surfaces if moisture content or alkalinity of surfaces to be coated exceeds that permitted in manufacturer's written instructions.

1. Remove incompatible primers and reprime substrate with compatible primers as required to produce coating systems indicated.
2. Perform cleaning and coating application so dust and other contaminants from cleaning process will not fall on wet, newly coated surfaces.

D. Crack Repair: Fill cracks in accordance with manufacturer's written instructions before coating surfaces.

3.3 APPLICATION OF ELASTOMERIC COATING SYSTEMS

A. Apply elastomeric coatings in accordance with manufacturer's written instructions.

1. Use equipment and techniques best suited for substrate and type of material being applied.
2. Coat surfaces behind movable items the same as similar exposed surfaces.
3. Apply each coat separately in accordance with manufacturer's written instructions.

B. Primers: Apply at a rate to ensure complete coverage.

C. Block Fillers: Apply at a rate to ensure complete coverage with pores filled.

D. Elastomeric Finish Coat(s): [**Minimum two coats with a total dry film thickness of 16 to 18 mils (0.41 to 0.45 mm)**][**Minimum one coat with a total dry film thickness of 7 to 10 mils (0.18 to 0.25 mm)**][**Manufacturer's recommended number of coats and total dry film thickness for condition of substrate**]<**Insert requirement**>.

E. Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of same material are to be applied. Tint undercoats similar to color of topcoat, but provide sufficient difference in

shade of undercoats to distinguish each separate coat.

F. If undercoats or other conditions show through topcoat, apply additional coats until cured film has a uniform finish, color, and appearance.

G. Apply coatings to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.

H. Apply coatings to prepared surfaces as soon as practicable after preparation and before subsequent surface soiling or deterioration.

I. Spray Application: Use spray equipment for application only when permitted by authorities having jurisdiction. Wherever spray application is used, do not double back with spray equipment to build up film thickness of two coats in one pass.

3.4 FIELD QUALITY CONTROL

A. Testing of Paint Materials: Owner reserves the right to invoke the following testing procedures:

1. Owner will engage the services of a qualified testing agency to sample materials being used. Samples of material delivered to Project site will be taken, identified, sealed, and certified in presence of Contractor.
2. Testing agency will perform tests for compliance of materials with product requirements.
3. Owner may direct Contractor to stop coating application if test results show materials being used do not comply with requirements. Remove noncomplying materials from Project site, pay for testing, and recoat surfaces that were coated with rejected materials. Remove rejected materials from previously coated surfaces if, on recoating with complying materials, the two coatings are incompatible.

B. Field Testing and Inspection: Owner reserves the right to engage the services of a qualified testing agency to verify installed thickness of elastomeric coatings.

3.5 CLEANING AND PROTECTION

A. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.

B. After completing coating application, clean spattered surfaces. Remove spattered coatings by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

C. Protect work of other trades against damage from coating application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.

D. At completion of construction activities, touch up and restore damaged or defaced coated surfaces.

3.6 ELASTOMERIC COATING SCHEDULE

A. Concrete Substrates:

1. Elastomeric Coating System:

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Elastomeric, pigmented, exterior, water-based, [**flat**][**nonflat**] coating.

1) <**Insert manufacturer's name; product name or designation**>.

B. Concrete Masonry Unit Substrates:

1. Elastomeric Coating System:

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Block Filler: As recommended in writing by topcoat manufacturer.
c. Intermediate Coat: As recommended in writing by topcoat manufacturer.
d. Topcoat: Elastomeric, pigmented, exterior, water-based, [**flat**][**nonflat**] coating.

1) <**Insert manufacturer's name; product name or designation**>.

C. Stucco Substrates:

1. Elastomeric Coating System:

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Elastomeric, pigmented, exterior, water-based, [**flat**][**nonflat**] coating.

1) <**Insert manufacturer's name; product name or designation**>.

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 97 26 00 - CEMENTITIOUS COATINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes surface preparation and application of cementitious coating systems on the following substrates:

1. [**Exterior**][**Interior**] concrete.
2. [**Exterior**][**Interior**] concrete masonry units.
3. [**Exterior**][**Interior**] brick.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Sustainable Design Submittals:

1. Product Data: For paints and coatings, indicating VOC content.
2. Laboratory Test Reports: For paints and coatings, indicating compliance with requirements for low-emitting materials.

C. Samples for Initial Selection: For each type of topcoat product.

D. Samples for Verification: In each color and gloss of topcoat.

1. Submit Samples on [**rigid backing**][**actual substrate**], not less than **8 inches (200 mm)** square[**, with mortar joint in center**].
2. Apply coats on Samples in steps to show each coat required for system.
3. Label each coat of each Sample.
4. Label each Sample for location and application area.

1.3 INFORMATIONAL SUBMITTALS

A. Material Certificates: For each cementitious coating, from manufacturer.

B. Product Test Reports: Based on evaluation of comprehensive tests performed by manufacturer and witnessed by a qualified testing agency or performed by a qualified testing agency, for each product formulation.

1.4 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that are from same production run (batch mix) as materials applied and that are packaged with protective covering for storage and identified with labels describing contents.

1. Quantity: Furnish an additional [**5**]<**Insert number**> percent of each color applied.

1.5 QUALITY ASSURANCE

A. Mockups: Apply mockups of coating system indicated and each color and finish selected to verify preliminary selections made under Sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.

1. Architect will select one [**actual substrate of each type**]<**Insert requirements**> to represent surfaces and conditions for application of coating.

a. Wall Surfaces: Prepare Samples of at least [**100 sq. ft. (9.3 sq. m)**]<**Insert dimension**>.

2. Apply mockups after permanent lighting and other environmental services have been activated.
3. Final approval of color selections will be based on mockups.

a. If preliminary color selections are not approved, apply additional mockups of colors selected by Architect at no added cost to Owner.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to Project site in manufacturer's original, new, unopened packages and containers bearing manufacturer's name and label, and the following information:

1. Product name or title of material.
2. Manufacturer's stock number and date of manufacture.
3. Contents by volume, for pigment and vehicle constituents.
4. Application instructions.
5. Color name and number.
6. Handling instructions and precautions.

B. Store materials not in use in tightly covered containers in a well-ventilated area at a minimum ambient temperature of **45 deg F (7 deg C)**. Maintain containers used in storage of coatings in a clean condition, free of foreign materials and residue.

1. Protect cementitious coating materials from freezing. Keep materials dry and storage area neat and orderly. Remove waste daily. Take necessary measures to ensure that workers and work areas are protected from health hazards resulting from handling, mixing, and applying the coating.

1.7 FIELD CONDITIONS

A. Apply coatings only when temperature of surfaces to be painted and ambient air temperatures are between **50 and 95 deg F (10 and 35 deg C)**.

B. Do not apply coatings when relative humidity exceeds 85 percent; at temperatures less than **5 deg F (3 deg C)** above the dew point; or to damp or wet surfaces.

PART 2 - PRODUCTS

2.1 CEMENTITIOUS COATINGS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
2. [**Fox Industries, Inc.**]
3. [**Gemite Products Inc., a W.R. Meadows company**]
4. [**MAPEI Corporation**]
5. [**Master Builders Solutions**]
6. [**Sakrete; CRH Americas, Oldcastle APG**]
7. [**Silpro Corporation**]
8. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Euclid Chemical Company (The); a subsidiary of RPM International, Inc.**]
2. [**Fox Industries, Inc.**]
3. [**Gemite Products Inc., a W.R. Meadows company**]
4. [**MAPEI Corporation**]
5. [**Master Builders Solutions**]
6. [**Sakrete; CRH Americas, Oldcastle APG**]
7. [**Silpro Corporation**]
8. <**Insert manufacturer's name**>

C. Products: Subject to compliance with requirements, [**provide product**][**provide one of the products**][**available products that may be incorporated into the Work include, but are not limited to products**] listed in the Cementitious Coating Schedule for the paint category indicated.

D. Source Limitations: Obtain cementitious coating materials from single source and from single manufacturer.

E. Polymer-Modified Cementitious Coating: Containing portland cement, polymer, and hydrated lime or aggregates.

1. Compressive Strength: Not less than [**3500 psi (24.1 MPa)**]<**Insert value**> at 28 days according to ASTM C109/C109M.
2. Tensile Strength: Not less than [**350 psi (2.41 MPa)**]<**Insert value**> at 28 days according to ASTM C109/C109M.
3. Flexural Strength: <**Insert value and test method**>.
4. Adhesion: <**Insert value and test method**>.
5. Permeance: <**Insert value and test method**>.
6. Accelerated Weathering: <**Insert value and test method**>.
7. UV Resistance: <**Insert value and test method**>.
8. Salt-Spray Resistance: <**Insert value and test method**>.
9. <**Insert performance requirements**>.

F. VOC Content, LEED 2009: For field applications that are inside the weatherproofing system, paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Flat Paints and Coatings: 50 g/L.
2. Nonflat Paints and Coatings: 150 g/L.
3. Primers, Sealers, and Undercoaters: 200 g/L.

G. Low-Emitting Materials, LEED 2009: Interior paints and coatings shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

H. VOC Content, LEED v4: For field applications[**that are inside the weatherproofing system**], paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Flat Paints and Coatings: 50 g/L.
2. Nonflat Paints and Coatings: 50 g/L.
3. Primers, Sealers, and Undercoaters: 100 g/L.

I. Low-Emitting Materials, LEED v4: For field applications that are inside the weatherproofing system, 90 percent of paints and coatings shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

J. Material Emissions and Pollutant Control: Not less than 85 percent of field-applied paints and coatings that are inside the weatherproofing system shall comply with either of the following:

1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
2. VOC content shall not exceed limits of authorities having jurisdiction and the following:

    a. Flat Coatings: 50 g/L.
    b. Nonflat Coatings: 100 g/L.
    c. Primers, Sealers, and Undercoaters: 100 g/L.

K. Emissions Requirements: Field-applied paints and coatings that are inside the weatherproofing system shall comply with either of the following:

1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
2. VOC content shall not exceed limits of authorities having jurisdiction and the following:

    a. Flat Coatings: 50 g/L.
    b. Nonflat Coatings: 100 g/L.
    c. Primers, Sealers, and Undercoats: 100 g/L.

L. VOC Emissions: For field applications inside the building, wall paints shall contain no more than half of the chronic REL of VOCs when tested according to the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit or 33 mcg/cu. m and that of acetaldehyde shall not exceed 9 mcg/cu. m.

M. Colors: [**As selected by Architect from manufacturer's full range**][**Match Architect's samples**][**As**

indicated in a color schedule]<**Insert requirements**>.

N. Other Materials: Provide crack fillers, block fillers, and related materials that are compatible with cementitious finish-coat materials and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with requirements and other conditions affecting performance of the Work.

B. Verify suitability of substrates, including surface conditions and compatibility.

C. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.

1. Beginning coating application constitutes Contractor's acceptance of substrates and conditions.

3.2 PREPARATION

A. Comply with manufacturer's written instructions for mixing and preparing materials and as applicable to substrates indicated.

B. Remove plates, machined surfaces, and similar items already in place that are not to be coated. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and coating.

1. After completing coating operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection if any.

C. Clean substrates of substances that could impair bond of coatings, including dirt, oil, grease, incompatible coatings, and loose substrate materials.

D. Cementitious and Masonry Surfaces: Remove release agents, curing compounds, efflorescence, and chalk. Do not paint surfaces if moisture content or alkalinity of surfaces to be painted exceeds that permitted in manufacturer's written instructions.

E. Crack Repair: Fill cracks according to manufacturer's written instructions before coating surfaces.

1. Cracks Larger Than **1/32 Inch (0.8 mm)**: Cut out static cracks, voids, or honeycombing larger than **1/32 inch (0.8 mm)** and patch with materials recommended in writing by coating manufacturer. Identify dynamic cracks and treat according to manufacturer's written instructions before beginning application.

3.3 APPLICATION

A. Apply coatings according to manufacturer's written instructions. Use applicators and techniques suited for coating and substrate indicated.

1. Dampen substrate of surfaces to receive cementitious coatings one hour before beginning

application to prevent surface drag. Immediately before applying coatings, redampen substrate. Substrates shall be saturated and surface dry at time of application.
2. Brushes: Use Tampico or masonry brushes best suited for material being applied.
3. Spray Equipment: Use spray equipment recommended in writing by manufacturer for material and texture required.

B. Apply coating to achieve material thickness as recommended in writing by manufacturer, but not less than the following:

1. First Coat: Apply polymer-modified cementitious coating material at the rate of **2 lb/sq. yd. (1 kg/sq. m)** to achieve a total cured thickness of **25 mils (0.6 mm)**.
2. Second Coat: Apply polymer-modified cementitious coating material at the rate of **1 lb/sq. yd. (0.5 kg/sq. m)** to achieve a total cured thickness of **15 mils (0.4 mm)**.
3. Apply additional coats when undercoats or other conditions show through final coat until cured film is of uniform coating finish, color, and appearance.

C. On previously coated surfaces, apply coating to achieve material thickness as recommended in writing by manufacturer, but not less than the following:

1. Apply polymer-modified cementitious coating material at the rate of **1 lb/sq. yd. (0.5 kg/sq. m)** to achieve a total cured thickness of **15 mils (0.4 mm)**.
2. Apply additional coats when undercoats or other conditions show through final coat until cured film is of uniform coating finish, color, and appearance.

D. Brush Application: Brush out and work brush coats into surfaces in an even film, filling all pores and voids at rate recommended in writing by manufacturer to achieve cured material thickness indicated. Finish coat with smooth, horizontal strokes.

E. Spray Application: Apply each coat according to manufacturer's written instructions to provide the equivalent hiding of brush-applied coats. Follow spray application with a general light brooming of coated surface to impart a slight texture.

3.4 FIELD QUALITY CONTROL

A. Testing of Coating Materials: Owner reserves the right to invoke the following procedure at any time and as often as Owner deems necessary during the period when coating operations are being conducted:

1. Owner will engage the services of a qualified testing agency to sample coating materials being used. Samples of material delivered to Project site will be taken, identified, sealed, and certified in presence of Contractor.
2. Testing agency will perform tests for compliance with product requirements specified.
3. Owner may direct Contractor to stop coating application if test results show materials being used do not comply with requirements. Contractor shall remove noncomplying materials from Project site, pay for testing, and recoat surfaces coated with rejected materials. Contractor will be required to remove rejected materials from previously coated surfaces if, on recoating with complying materials, the two coatings are incompatible.

3.5 CLEANING AND PROTECTION

A. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.

B. After completing coating application, clean spattered surfaces. Remove spattered coatings by washing,

scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

C. Protect work of other trades against damage from coating application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.

D. At completion of construction activities of other trades, touch up and restore damaged or defaced coated surfaces.

3.6 CEMENTITIOUS COATING SCHEDULE

A. Above-Grade Concrete and Masonry:

1. Polymer-Modified Cementitious Coating:

a. Prime Coat: As recommended in writing by topcoat manufacturer.
b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
c. Topcoat: Polymer-modified cementitious coating.

1) <**Insert manufacturer's name; product name or designation**>.

09 97 35 00	09 91 23 00	Interior Painting

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 09 97 63 00 - COATINGS FOR HVAC

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes application of coating systems on internal HVAC components and external equipment surfaces, including the following systems:

1. Bake-cured corrosion-resistant coating systems.
2. Air-dried corrosion-resistant coating systems.

1.2 DEFINITIONS

A. Salt Water Acetic Acid Test (SWAAT): A salt fog-spray test of corrosion resistance performed in accordance with ASTM G85, Annex 3.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product. Include Safety Data Sheets, preparation requirements, and application instructions.

B. Sustainable Design Submittals:

1. Product Data: For paints and coatings, indicating VOC content.
2. Laboratory Test Reports: For paints and coatings, indicating compliance with requirements for low-emitting materials.

1.4 INFORMATIONAL SUBMITTALS

A. Source Quality-Control Reports:

1. Certification of coating material testing.

1.5 MAINTENANCE MATERIAL SUBMITTALS

A. Furnish extra materials that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.

1. Coatings: [**1**]<**Insert number**>[**container**][**spray can**] of each material and color applied [**, including base coat and top coat products**].

1.6 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in clean, dry, well-ventilated areas with ambient temperatures continuously maintained between **50 and 75 deg F (10 and 24 deg C)**.

1. Keep containers out of direct sunlight; avoid excessive heat and keep from freezing.
2. Maintain containers in clean condition, free of foreign materials and residue.
3. Remove rags and waste from storage areas daily.

1.7 CONDITIONS FOR COATING APPLICATION

A. Comply with manufacturer's recommendations regarding required temperature and humidity ranges during coating application.

PART 2 - PRODUCTS

2.1 CORROSION-RESISTANT COATING SYSTEMS, GENERAL

A. Material Compatibility:

1. Provide materials for application within each coating system that are compatible with one another and with metal substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
2. For each coating material in coating system, submit compatibility certification from manufacturer of each coating product that products are compatible with substrate base material and with substrate-coating products applied as earlier coats.
3. Products shall be of same manufacturer for each coat in a coating system.

B. Colors: [**Manufacturer's standard**]<**Insert requirements**>.

C. VOC Content, LEED 2009: For field applications that are inside the weatherproofing system, paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Flat Paints and Coatings: 50 g/L.
2. Nonflat Paints and Coatings: 150 g/L.
3. Dry-Fog Coatings: 400 g/L.
4. Primers, Sealers, and Undercoaters: 200 g/L.
5. Anticorrosive and Antirust Paints Applied to Ferrous Metals: 250 g/L.
6. Zinc-Rich Industrial Maintenance Primers: 340 g/L.
7. Pretreatment Wash Primers: 420 g/L.
8. Shellacs, Clear: 730 g/L.
9. Shellacs, Pigmented: 550 g/L.

D. Low-Emitting Materials, LEED 2009: Interior paints and coatings shall comply with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

E. VOC Content, LEED v4: For field applications that are inside the weatherproofing system, paints and coatings shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Flat Paints and Coatings: 50 g/L.
2. Nonflat Paints and Coatings: 50 g/L.
3. Dry-Fog Coatings: 150 g/L.
4. Primers, Sealers, and Undercoaters: 100 g/L.

5. Rust-Preventive Coatings: 100 g/L.
6. Zinc-Rich Industrial Maintenance Primers: 100 g/L.
7. Pretreatment Wash Primers: 420 g/L.
8. Shellacs, Clear: 730 g/L.
9. Shellacs, Pigmented: 550 g/L.

F. Low-Emitting Materials, LEED v4: For field applications that are inside the weatherproofing system, 90 percent of paints and coatings shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

G. Material Emissions and Pollutant Control: Not less than 85 percent of field-applied paints and coatings that are inside the weatherproofing system shall comply with either of the following:

1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." Formaldehyde emissions shall not exceed 9 mcg/cu. m or 7 ppb, whichever is less.
2. VOC content shall not exceed limits of authorities having jurisdiction and the following:

    a. Flat Coatings: 50 g/L.
    b. Nonflat Coatings: 100 g/L.
    c. Nonflat - High-Gloss Coatings: 150 g/L.
    d. Dry-Fog Coatings: 150 g/L.
    e. Industrial Maintenance Coatings: 250 g/L.
    f. Pretreatment Wash Primers: 420 g/L.
    g. Primers, Sealers, and Undercoaters: 100 g/L.
    h. Recycled Coatings: 250 g/L.
    i. Rust-Preventive Coatings: 250 g/L.

H. Emissions Requirements: Field-applied paints and coatings that are inside the weatherproofing system shall comply with either of the following:

1. Low-Emitting Materials: VOC emissions shall comply with the requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."
2. VOC content shall not exceed limits of authorities having jurisdiction and the following:

    a. Flat Coatings: 50 g/L.
    b. Nonflat Coatings: 100 g/L.
    c. Primers, Sealers, and Undercoats: 100 g/L.
    d. Shellacs, Clear: 730 g/L.
    e. Shellacs, Pigmented: 550 g/L.

I. VOC Content: For field applications inside the building, wall paints shall comply with VOC content limits of authorities having jurisdiction and the following VOC content limits:

1. Interior Flat Latex Wall Paint: 50 g/L.
2. Interior Nonflat Latex Wall Paint: 150 g/L.

J. VOC Emissions: For field applications inside the building, wall paints shall contain no more than half of the chronic REL of VOCs when tested according to the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers." The building concentration of formaldehyde shall not exceed half of the indoor recommended exposure limit or 33 mcg/cu. m and that of acetaldehyde shall not exceed 9 mcg/cu. m.

2.2 BAKE-CURED CORROSION-RESISTANT COATING SYSTEMS

A. Base Coat Performance Requirements:

1. Corrosion Resistance: ASTM B117: [**1500**][**2000**][**3500**][**6000**]<**Insert number**> hours.
2. Cross-Hatch Adhesion: ASTM D3359: [**5B**]<**Insert value**>.
3. SWAAT: ASTM G85: [**1000**][**Insert number**] hours.
4. Cyclic Weathering: ISO 12944-9, [**4200**]<**Insert number**> hours.
5. Mandrel Flexibility: ASTM D522/D522M: [**1/4 inch (6 mm)**][**1/2 inch (13 mm)**]<**Insert value**> without cracking or delamination of film after full cure.
6. Adhesion - Elcometer: ASTM D4541: [**1100 psi (7.6 MPa)**]<**Insert value**>.
7. Impact: ASTM D2794.

    a. Direct Hit: [**70 lb.-in. (7.9 N-m)**][**80 lb.-in. (9.0 N-m)**][**90 lb.-in. (10.2 N-m)**][**100 lb.-in. (11.3 N-m)**]<**Insert value**>.
    b. Reverse Hit: [**20 lb.-in. (2.2 N-m)**][**30 lb.-in. (3.4 N-m)**][**40 lb.-in. (4.5 N-m)**][**50 lb.-in. (5.6 N-m)**]<**Insert value**>.

8. pH Range, 14-Day Liquid Spot Test: [**2.4 to 12.6**][**or**][**3 to 12**][**Insert value**].
9. Dry Heat Resistance: ASTM D2485: [**320 deg F (160 deg C)**][**392 deg F (200 deg C)**]<**Insert value**> maximum.
10. Dry Film Thickness: [**0.5 to 1.2 mils (0.013 to 0.030 mm)**][**0.6 to 1.5 mils (0.015 to 0.038 mm)**]<**Insert thickness range**>.
11. Heat-Transfer Reduction: [**1 percent maximum**]<**Insert value**>.
12. Hardness: ASTM D3363 Pencil Test: [**2B-HB**][**5H-6H**]<**Insert value**>.

B. Bake-Cured Coating for Equipment Serving Food-Preparation Areas: In accordance with NSF 51.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Heresite Protective Coatings**]
    b. [**Modine Manufacturing Company**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Heresite Protective Coatings**]
    b. [**Modine Manufacturing Company**]
    c. <**Insert manufacturer's name**>

C. Bake-Cured Top Coat:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Heresite Protective Coatings**]
    b. [**Modine Manufacturing Company**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Heresite Protective Coatings**]
   b. [**Modine Manufacturing Company**]
   c. <**Insert manufacturer's name**>

3. Performance Requirements: Provide product with UV shielding properties, color stability, and maintenance of manufacturer's standard sheen, after exposure to outdoor conditions.

D. Bake-Cured, Immersion-Applied Phenolic Epoxy System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Heresite Protective Coatings**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Heresite Protective Coatings**]
   b. <**Insert manufacturer's name**>

E. Baked-Cured, Immersion-Applied Epoxy Coating System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Modine Manufacturing Company**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Modine Manufacturing Company**]
   b. <**Insert manufacturer's name**>

2.3 AIR-DRIED CORROSION-RESISTANT COATING SYSTEMS

A. Performance Requirements:

1. Corrosion Resistance: ASTM B117: [**1500**][**2000**][**3500**]<**Insert number**> hours.
2. Cross-Hatch Adhesion: ASTM D3359: [**5B**]<**Insert value**>.
3. Cyclic Weathering: ISO 12944-9, Offshore Standard: [**4200**]<**Insert number**> hours.
4. Mandrel Flexibility: ASTM D522/D522M: [**1/2 inch (13 mm)**][**1/8 inch (3 mm)**]<**Insert value**> without cracking or delamination of film after full cure.
5. Impact: ASTM D2794.

a. Direct Hit: [**100 in-lb (11.3 N-m)**]<**Insert value**>.

6. Dry Heat Resistance: ASTM D2485: [**356 deg F (180 deg C)**]<**Insert value**> maximum.
7. Dry Film Thickness: [**2 to 3 mils (0.050 to 0.075 mm)**]<**Insert thickness range**>.
8. Heat-Transfer Reduction: [**1 percent**]<**Insert value**> maximum.
9. Hardness: ASTM D3363 Pencil Test: [**2B-HB**][**2H**][**HBF**]<**Insert value**>.

B. Air-Dried, Spray-Applied Principle Coating System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Blygold America**]
   b. [**Heresite Protective Coatings**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Blygold America**]
   b. [**Heresite Protective Coatings**]
   c. <**Insert manufacturer's name**>

C. Air-Dried Phenolic System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Heresite Protective Coatings**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Heresite Protective Coatings**]
   b. <**Insert manufacturer's name**>

D. Air-Dried, Spray-Applied Coating System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Modine Manufacturing Company**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**Modine Manufacturing Company**]
b. <**Insert manufacturer's name**>

E. Air-Dried, Spray-Applied, Polyurethane Mixed with Aluminum Flakes System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Blygold America**]
b. [**Energy Guard USA**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Blygold America**]
b. [**Energy Guard USA**]
c. <**Insert manufacturer's name**>

F. Base Coat Performance Requirements:

1. Corrosion Resistance: ASTM B117: [**1500**][**2000**][**3000**][**4000**][**5000**][**6000**][**10,000**]<**Insert number**> hours.
2. SWAAT: ASTM G85: [**1000**][**Insert number**] hours.
3. Cyclic Weathering: ISO 12944-9: [**4200**]<**Insert number**> hours.
4. Cross-Hatch Adhesion: ASTM D3359: [**5B**]<**Insert value**>.
5. Mandrel Flexibility: ASTM D522/D522M: [**1/8 inch (3 mm)**][**1/4 inch (6 mm)**][**1/2 inch (13 mm)**]<**Insert value**> without cracking or delamination of film after full cure.
6. Adhesion - Elcometer: ASTM D4541: [**1,100 psi (7.6 MPa)**]<**Insert value**>
7. Impact: ASTM D2794.

a. Direct Hit: [**100 lb.-in. (11.3 N-m)**][**160 lb.-in. (18.0 N-m)**]<**Insert value**>.

8. Dry Heat Resistance: ASTM D2485: [**250 deg F (121 deg C)**]<**Insert value**> maximum.
9. Dry Film Thickness: [**0.5 to 1.2 mils (0.013 to 0.030 mm)**][**0.6 to 1.5 mils (0.015 to 0.038 mm)**]<**Insert thickness range**>.
10. Heat-Transfer Reduction: [**1 percent**]<**Insert value**> maximum.
11. Hardness: ASTM D3363 Pencil Test: [**2B-HB**][**HB-F**]<**Insert value**>.

G. Air-Dried Coating for Equipment Serving Food-Preparation Areas: In accordance with 21 CFR 175.300.

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Heresite Protective Coatings**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**Heresite Protective Coatings**]
b. <**Insert manufacturer's name**>

H. Spray-Can Application System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Heresite Protective Coatings**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Heresite Protective Coatings**]
b. <**Insert manufacturer's name**>

3. Spray-Can Application System Air-Dried Top Coat Performance Requirements: Provide product with UV shielding properties, color stability, and maintenance of manufacturer's standard sheen, after exposure to outdoor conditions.

a. Type: Air dry, phenolic.

2.4 SOURCE QUALITY CONTROL

A. Certification of Coating Material Testing: Submit manufacturer's test report of corrosion-resistance performance testing, as performed by a nationally recognized testing laboratory.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with coating manufacturer's requirements and other conditions affecting performance of the Work.

B. Verify suitability of substrates, including surface conditions and compatibility, with existing finishes and primers.

C. Proceed with coating application only after unsatisfactory conditions have been corrected.

1. Application of coating indicates acceptance of surfaces and conditions.

3.2 PREPARATION

A. Comply with manufacturer's written instructions applicable to substrates and coating systems indicated.

1. Thinning: Thin coating material with manufacturer's recommended thinning products when recommended or permitted by coating system manufacturer.

B. Comply with coating system manufacturer's recommendations to clean substrates of substances that could impair bond of coatings, including dust, dirt, oil, grease, and incompatible paints and encapsulants.

3.3 APPLICATION

A. Verify with coating manufacturer whether coatings required must be applied and cured in factory-certified application shop.

B. Apply coating systems with equipment designed to deposit coating of specified uniform thickness over HVAC components, in complex, three-dimensional geometries.

1. Apply coatings with manufacturer-recommended tools and techniques suited for specified coating system and each coated HVAC component.
2. Do not apply coatings over labels or equipment name, identification, performance rating, or nomenclature plates.

C. Perform inspection and coating system manufacturer's recommended tests to verify coating integrity and thickness. Where coating was damaged by testing, repair damage in accordance with coating system manufacturer's written recommendations.

SECTION 13 46 13 00 - LIGHTNING PROTECTION FOR STRUCTURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes: Lightning protection system for ordinary structures.

B. Section Includes: Lightning protection system for the following:

1. Ordinary structures.
2. <**Insert one or more miscellaneous structures or special occupancies**>.

1.2 ACTION SUBMITTALS

A. Product Data: For each product.

B. Shop Drawings:

1. Include layouts of the lightning protection system, with details of the components to be used in the installation.
2. Include raceway locations needed for the installation of conductors.
3. Details of air terminals, ground rods, ground rings, conductor supports, splices, and terminations, including concealment requirements.
4. Include roof attachment details, coordinated with roof installation.
5. Calculations required by NFPA 780 for bonding of metal bodies.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Lightning protection system Shop Drawings, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Lightning protection cabling attachments to roofing systems and accessories.
2. Lightning protection strike termination device attachment to roofing systems, coordinated with the roofing system manufacturer.
3. Lightning protection system components penetrating roofing and moisture protection systems and system components, coordinated with the roofing system manufacturer.

B. Qualification Data: For Installer.

C. Product Certificates: For each type of roof adhesive for attaching the roof-mounted air terminal assemblies, approved by the roofing-material manufacturer.

D. Field quality-control reports.

1.4 CLOSEOUT SUBMITTALS

A. Maintenance Data: For lightning protection system to include in maintenance manuals.

1. In addition to items specified in Section 017823 "Operation and Maintenance Data," include the following:

    a. Dimensioned site plan showing dimensioned route of the ground loop conductor and the ground rod locations. Comply with requirements of Section 017839 "Project Record Documents."
    b. A system testing and inspection record, listing the results of inspections and ground resistance tests, as recommended by NFPA 780, Annex D.

B. Completion Certificate:

1. [**UL Master Label Certificate**][**UL Letter of Findings Limited Scope Inspection Report**][**LPI Master Certificate**][**LPI Limited Scope Certification**].

1.5 QUALITY ASSURANCE

A. Installer Qualifications: [**UL-listed installer, category OWAY**][**or**][**LPI Master Installer**].

PART 2 - PRODUCTS

2.1 LIGHTNING PROTECTION FOR STRUCTURES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**allG Fabrication (formerly ALT)**]
2. [**East Coast Lightning Equipment Inc.**]
3. [**ERICO; brand of nVent Electrical plc**]
4. [**Harger Lightning & Grounding; business of Harger, Inc.**]
5. [**Heary Bros. Lightning Protection Co. Inc**]
6. [**Independent Protection Co**]
7. [**National Lightning Protection**]
8. [**Preferred Lightning Protection**]
9. [**Robbins Lightning, Inc**]
10. [**Thompson Lightning Protection, Inc**]
11. [**VFC Lightning Protection**]
12. **<Insert manufacturer's name>**

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [**allG Fabrication (formerly ALT)**]
2. [**East Coast Lightning Equipment Inc.**]
3. [**ERICO; brand of nVent Electrical plc**]
4. [**Harger Lightning & Grounding; business of Harger, Inc.**]
5. [**Heary Bros. Lightning Protection Co. Inc**]
6. [**Independent Protection Co**]
7. [**National Lightning Protection**]
8. [**Preferred Lightning Protection**]
9. [**Robbins Lightning, Inc**]
10. [**Thompson Lightning Protection, Inc**]

11. [**VFC Lightning Protection**]
12. <**Insert manufacturer's name**>

2.2 PERFORMANCE REQUIREMENTS

A. NFPA Lightning Protection Standard: Comply with NFPA 780 requirements for [**Class I**][**Class II**] buildings.

B. UL Lightning Protection Standard: Comply with UL 96A requirements for [**Class I**][**Class II**] buildings.

C. Lightning Protection Components, Devices, and Accessories: Listed and labeled by a qualified testing agency as complying with UL 96, and marked for intended location and application.

2.3 MATERIALS

A. Air Terminals:

1. [**Copper**][**Stainless steel**][**or**][**Aluminum**] unless otherwise indicated.
2. [**3/8-inch (10-mm)**][**1/2-inch (12.7-mm)**][**5/8-inch (16-mm)**] diameter by [**10 inches (254 mm)**][**12 inches (305 mm)**][**15 inches (380 mm)**][**18 inches (450 mm)**][**24 inches (610 mm)**]<**Insert length of air terminal**> long.
3. [**Pointed**][**Rounded**] tip.
4. [**Integral base support**][**Threaded base support**].

B. Air Terminal Bracing:

1. [**Aluminum**][**Copper**][**Stainless steel**][**Galvanized steel**].
2. [**1/4-inch (6-mm)**]<**Insert size**> diameter rod.

C. Class I Main Conductors:

1. [**Stranded Copper: 57,400 circular mils in diameter**][**Aluminum: 98,600 circular mils in diameter**].

D. Class II Main Conductors:

1. [**Stranded Copper: 115,000 circular mils in diameter**][**Aluminum: 192,000 circular mils in diameter**].

E. Secondary Conductors:

1. [**Stranded Copper: 26,240 circular mils in diameter**][**Aluminum: 41,400 circular mils in diameter**].

F. Ground Loop Conductor: [**Stranded copper**][**Tinned copper**].

G. Ground Rods:

1. Material: [**Solid copper**][**Copper-clad steel**][**Stainless steel**].
2. Diameter: [**5/8 inch (16 mm)**][**3/4 inch (19 mm)**].
3. Rods shall be not less than **120 inches (3050 mm)** long.
4. [**Sectional type, with integral threads**].

H. Conductor Splices and Connectors: Compression fittings that are installed with hydraulically operated tools, or exothermic welds, approved for use with the class type.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install lightning protection components and systems according to [**UL 96A**][**NFPA 780**].

B. Install conductors with direct paths from air terminals to ground connections. Avoid bends less than 90 degrees and **8 inches (203 mm)** in radius and narrow loops.

C. Conceal conductors within normal view from exterior locations at grade within **200 feet (60 m)** of building. Comply with requirements for [**concealed installations in UL 96A**][**concealed systems in NFPA 780**].

1. Roof penetrations required for down conductors and connections to structural-steel framework shall be made using listed through-roof fitting and connector assemblies with solid rods and appropriate roof flashings. Use materials approved by the roofing manufacturer for the purpose. Conform to the methods and materials required at roofing penetrations of the lightning protection components to ensure compatibility with the roofing specifications and warranty.
2. Install conduit where necessary to comply with conductor concealment requirements.
3. Air Terminals on Single-Ply Membrane Roofing: Comply with adhesive manufacturer's written instructions.

D. Ground Ring Electrode: The conductor shall be not less than the main-size lightning conductor.

3.2 CONNECTIONS

A. Aboveground concealed connections, and connections in earth or concrete, shall be done by exothermic welds or by high-compression fittings listed for the purpose.

B. Aboveground exposed connections shall be done using the following types of connectors, listed and labeled for the purpose: [**bolted connectors**][**exothermic weld**][**high compression**][**crimp**].

C. Bonding Straps and Jumpers: Install in locations accessible for inspection and maintenance, except where routed through short lengths of conduit.

1. Bonding to Structure: Bond straps directly to basic structure, taking care not to penetrate any adjacent parts.
2. Bonding to Equipment Mounted on Vibration Isolation Hangers and Supports: Install bonding so vibration is not transmitted to rigidly mounted equipment.

3.3 CORROSION PROTECTION

A. Do not combine materials that can form an electrolytic couple that will accelerate corrosion in the presence of moisture unless moisture is permanently excluded from junction of such materials.

B. Use conductors with protective coatings where conditions would cause deterioration or corrosion of conductors.

3.4 FIELD QUALITY CONTROL

A. Special Inspections: [**Owner will engage**][**Engage**] a qualified special inspector to perform the following special inspections:

1. Perform inspections as required to obtain a UL Master Label for system.
2. Perform inspections to obtain an LPI certification.

B. Prepare test and inspection reports and certificates.

END OF SECTION 13 46 13 00

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 01 00 00 - SUPPLEMENTAL REQUIREMENTS FOR ELECTRICAL

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes requirements generally applicable to all electrical Work on the Project, including but not limited to Work specified in Divisions 26, 27, and 28.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. [**Section 013100 "Project Management and Coordination"**]<**Insert Section number and title**> specifies preinstallation conference procedures.

1.2 REFERENCES

A. Abbreviations and Acronyms for Electrical Terms and Units of Measure:

1. 8P8C: An 8-position 8-contact modular jack.
2. A: Ampere, unit of electrical current.
3. AC or ac: Alternating current.
4. AFCI: Arc-fault circuit interrupter.
5. AGC: Automatic gain control.
6. AIC: Ampere interrupting capacity.
7. AL, Al, or ALUM: Aluminum.
8. ASD: Adjustable-speed drive.
9. ATP: Acceptance test procedure.
10. ATS: Automatic transfer switch.
11. A/V: Audio/visual.
12. AWG: American wire gauge; see ASTM B258.
13. BAS: Building automation system.
14. BDA: Bi-directional amplifier.
15. BIL: Basic impulse insulation level.
16. BIM: Building information modeling.
17. BMS: Building management system.
18. BNC: Bayonet Neill-Concelman - type of connector.
19. B/W: Black and white.
20. CAD: Computer-aided design or drafting.
21. CATV: Community antenna television.
22. CB: Circuit breaker.
23. CCD: Charge-coupled device.
24. CCTV: Closed-circuit television.
25. cd: Candela, the SI fundamental unit of luminous intensity.
26. CO/ALR: Copper-aluminum, revised.
27. COPS: Critical operations power system.
28. CU or Cu: Copper.
29. CU-AL or AL-CU: Copper-aluminum.

30. DACR: Digital alarm communicator receiver.
31. DACT: Digital alarm communicator transmitter.
32. DAS: Distributed antenna system.
33. dB: Decibel, a unitless logarithmic ratio of two electrical, acoustical, or optical power values.
34. dB(A-weighted) or dB(A): Decibel acoustical sound pressure level with A-weighting applied in accordance with IEC 61672-1.
35. dB(adjusted) or dBa: Decibel weighted absolute noise power with respect to 3.16 pW (minus 85 dBm).
36. dBm: Decibel absolute power with respect to 1 mW.
37. dBmV: Decibel absolute voltage with respect to 1 mV across identical impedance.
38. DC or dc: Direct current.
39. DCOA: Designated critical operations area.
40. DDC: Direct digital control (HVAC).
41. DGP: Data gathering panel.
42. DHCP: Dynamic host configuration protocol.
43. EGC: Equipment grounding conductor.
44. ELV: Extra-low voltage.
45. EMF: Electromotive force.
46. EMI: Electromagnetic interference.
47. EMP: Electrical maintenance program (operation and maintenance); electromagnetic pulse (transient analysis).
48. EPS: Emergency power supply.
49. EPSS: Emergency power supply system.
50. ERCES: Emergency responder communications enhancement system.
51. ESS: Energy storage system.
52. EV: Electric vehicle.
53. EVPE: Electric vehicle power export equipment.
54. EVSE: Electric vehicle supply equipment.
55. FACU: Fire-alarm control unit.
56. FAS: Fire-alarm system.
57. fc: Footcandle, an internationally recognized unit of illuminance equal to one lumen per square foot or 10.76 lx. The simplified conversion 1 fc = 10 lx in the Specifications is common practice and considered adequate precision for building construction activities. When there are conflicts, lux is the primary unit; footcandle is specified for convenience.
58. FCC: Federal Communications Commission; fire command center.
59. FLC: Full-load current.
60. ft: Foot.
61. ft-cd: Foot-candle, the antiquated U.S. standard unit of illuminance, equal to one international candle measured at a distance of one foot, that was superseded in 1948 by the unit "footcandle" when the SI unit candela (cd) replaced the international candle; see "fc."
62. FTP: File transfer protocol.
63. FXO: Foreign exchange office.
64. GEC: Grounding electrode conductor.
65. GFCI: Ground-fault circuit interrupter.
66. GFPE: Ground-fault protection of equipment.
67. GND: Ground.
68. GROL: General Radiotelephone Operator License (FCC).
69. H.323: Audio and video protocol.
70. HACR: Heating, air conditioning, and refrigeration.
71. HDPE: High-density polyethylene.
72. HID: High-intensity discharge.
73. HP or hp: Horsepower.
74. HVAC: Heating, ventilating, and air conditioning.
75. Hz: Hertz.
76. I&TFAS: Inspection and testing of fire-alarm system.

77. IB-PSC: In-building public safety communications.
78. IBT: Intersystem bonding termination.
79. ICT: Information and communications technology.
80. IDC: Initiating device circuit.
81. inch: Inch. To avoid confusion, the abbreviation "in." is not used.
82. I/O: Input/output.
83. IP: Ingress protection rating (enclosures); Internet protocol (communications).
84. IR: Infrared.
85. IS: Intrinsically safe.
86. IT&R: Inspecting, testing, and repair.
87. ITE: Information technology equipment.
88. kAIC: Kiloampere interrupting capacity.
89. kcmil or MCM: One thousand circular mils.
90. kV: Kilovolt.
91. kVA: Kilovolt-ampere.
92. kvar: Kilovolt-ampere reactive.
93. kW: Kilowatt.
94. kWh: Kilowatt-hour.
95. LAN: Local area network.
96. lb: Pound (weight).
97. lbf: Pound (force).
98. LCD: Liquid-crystal display.
99. LCDI: Leakage-current detector-interrupter.
100. LED: Light-emitting diode.
101. Li-ion: Lithium-ion.
102. lm: Lumen, the SI-derived unit of luminous flux.
103. LNG: Liquefied natural gas.
104. LP-Gas: Liquefied petroleum gas.
105. LRC: Locked-rotor current.
106. LTE: Long-term evolution (mobile device technology standard).
107. LV: Low voltage.
108. lx: Lux, the SI-derived unit of illuminance equal to one lumen per square meter.
109. m: Meter.
110. MATV: Master antenna television.
111. MCC: Motor-control center.
112. MDC: Modular data center.
113. MG set: Motor-generator set.
114. MIDI: Musical instrument digital interface.
115. MLO: Main lugs only.
116. MPEG: Moving Picture Experts Group.
117. MPEG-2: Abbreviation for the ISO/IEC Moving Picture Experts Group's standard for generic coding of moving pictures and associated audio information (ISO/IEC 13818) released in 1995 and used for most over-the-air and satellite broadcast digital television.
118. MPEG-4: Abbreviation for the ISO/IEC Moving Picture Experts Group's standard framework for coding of audio-visual objects (ISO/IEC 14496) released in 1999, with digital rights management and more advanced compression algorithms than MPEG-2.
119. MOV: Metal-oxide varistor.
120. MV: Medium voltage.
121. MVA: Megavolt-ampere.
122. mW: Milliwatt.
123. MW: Megawatt.
124. MWh: Megawatt-hour.
125. NAC: Notification appliance circuit.
126. N.C.: Normally closed.
127. NFC: Near field communications.
128. Ni-Cd: Nickel-cadmium.

129. NICET: National Institute for Certification in Engineering Technologies, a division of the National Society of Professional Engineers.
130. Ni-MH: Nickel-metal hydride.
131. NIU: Network interface unit.
132. N.O.: Normally open.
133. NPT: National (American) standard pipe taper.
134. NTSC: National Television System Committee.
135. OCPD: Overcurrent protective device.
136. ONT: Optical network terminal.
137. PC: Personal computer.
138. PCS: Power conversion system.
139. PCU: Power-conditioning unit.
140. Percent obs/ft (percent obs/m): Percent obscuration per unit distance; unit of measure for sensitivity of smoke detectors.
141. PF or pf: Power factor.
142. PHEV: Plug-in hybrid electric vehicle.
143. PIR: Passive infrared.
144. PLC: Programmable logic controller.
145. PLFA: Power-limited fire alarm.
146. PoE: Power over Ethernet.
147. POTS: Plain old telephone service. See "public switched telephone network" definition.
148. PSTN: Public switched telephone network.
149. PTZ: Pan-tilt-zoom.
150. PV: Photovoltaic.
151. PVC: Polyvinyl chloride.
152. pW: Picowatt.
153. RAID: Redundant array of inexpensive disks; redundant array of independent disks.
154. RAM: Random-access memory.
155. RAT: Radio alarm transmitter.
156. REX: Request-to-exit.
157. RF: Radio frequency.
158. RFI: (electrical) Radio-frequency interference; (contract) Request for interpretation.
159. RMS or rms: Root-mean-square.
160. RPM or rpm: Revolutions per minute.
161. SCADA: Supervisory control and data acquisition.
162. SCCR: Short-circuit current rating.
163. SCR: Silicon-controlled rectifier.
164. SIP: Session initiation protocol.
165. SLC: Signaling-line circuit.
166. SPD: Surge protective device.
167. SPDT: Single pole, double throw.
168. sq.: Square.
169. SWD: Switching duty.
170. TCP/IP: Transmission Control Protocol/Internet Protocol.
171. TEFC: Totally enclosed fan-cooled.
172. TR: Tamper resistant.
173. TVSS: Transient voltage surge suppressor.
174. UHF: Ultra-high frequency.
175. UL: (standards) UL Standards & Engagement Inc.; (product categories) UL, LLC.
176. UL CCN: UL Category Control Number.
177. UPS: Uninterruptible power supply.
178. USB: Universal serial bus.
179. UTC: Coordinated universal time.
180. UV: Ultraviolet.
181. V: Volt, unit of electromotive force.

182. V(ac): Volt, alternating current.
183. V(dc): Volt, direct current.
184. VA: Volt-ampere, unit of complex electrical power.
185. VAR: Volt-ampere reactive, unit of reactive electrical power.
186. VFC: Variable-frequency controller.
187. VOM: Volt-ohm-multimeter.
188. VoIP: Voice over Internet Protocol.
189. VPN: Virtual private network.
190. VRLA: Valve regulated lead acid; also called "sealed lead acid (SLA)" or "valve regulated sealed lead acid."
191. VU: Volume unit.
192. W: Watt, unit of real electrical power.
193. WAN: Wide area network.
194. Wh: Watt-hour, unit of electrical energy usage.
195. WPT: Wireless power transfer.
196. WPTE: Wireless power transfer equipment.
197. WR: Weather resistant.

B. Abbreviations and Acronyms for Electrical Raceway Types:

1. EMT: Electrical metallic tubing.
2. EMT-A: Aluminum electrical metallic tubing.
3. EMT-S: Steel electrical metallic tubing.
4. EMT-SS: Stainless steel electrical metallic tubing.
5. ENT: Electrical nonmetallic tubing.
6. EPEC: Electrical HDPE underground conduit (thin wall).
7. EPEC-A: Type A electrical HDPE underground conduit.
8. EPEC-B: Type B electrical HDPE underground conduit.
9. ERMC: Electrical rigid metal conduit.
10. ERMC-A: Aluminum electrical rigid metal conduit.
11. ERMC-S: Steel electrical rigid metal conduit.
12. ERMC-S-G: Galvanized-steel electrical rigid metal conduit.
13. ERMC-S-PVC: PVC-coated-steel electrical rigid metal conduit.
14. ERMC-SS: Stainless steel electrical rigid metal conduit.
15. FMC: Flexible metal conduit.
16. FMC-A: Aluminum flexible metal conduit.
17. FMC-S: Steel flexible metal conduit.
18. FMT: Steel flexible metallic tubing.
19. FNMC: Flexible nonmetallic conduit. See "LFNC."
20. HDPE: HDPE underground conduit (thick wall).
21. HDPE-40: Schedule 40 HDPE underground conduit.
22. HDPE-80: Schedule 80 HDPE underground conduit.
23. IMC: Steel electrical intermediate metal conduit.
24. LFMC: Liquidtight flexible metal conduit.
25. LFMC-A: Aluminum liquidtight flexible metal conduit.
26. LFMC-S: Steel liquidtight flexible metal conduit.
27. LFMC-SS: Stainless steel liquidtight flexible metal conduit.
28. LFNC: Liquidtight flexible nonmetallic conduit.
29. LFNC-A: Layered (Type A) liquidtight flexible nonmetallic conduit.
30. LFNC-B: Integral (Type B) liquidtight flexible nonmetallic conduit.
31. LFNC-C: Corrugated (Type C) liquidtight flexible nonmetallic conduit.
32. PVC: Rigid PVC conduit.
33. PVC-40: Schedule 40 rigid PVC conduit.
34. PVC-80: Schedule 80 rigid PVC Conduit.
35. PVC-A: Type A rigid PVC concrete-encased conduit.
36. PVC-EB: Type EB rigid PVC concrete-encased underground conduit.

37. RGS: See ERMC-S-G.
38. RMC: See ERMC.
39. RTRC: Reinforced thermosetting resin conduit.
40. RTRC-AG: Low-halogen, aboveground reinforced thermosetting resin conduit.
41. RTRC-AG-HW: Heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
42. RTRC-AG-SW: Standard wall, low-halogen, aboveground reinforced thermosetting resin conduit.
43. RTRC-AG-XW: Extra heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
44. RTRC-BG: Low-halogen, belowground reinforced thermosetting resin conduit.

C. Abbreviations and Acronyms for Electrical Single-Conductor and Multiple-Conductor Cable Types:

1. AC: Armored cable.
2. CATV: Coaxial general-purpose cable.
3. CATVP: Coaxial plenum cable.
4. CATVR: Coaxial riser cable.
5. CI: Circuit integrity cable.
6. CL2: Class 2 cable.
7. CL2P: Class 2 plenum cable.
8. CL2R: Class 2 riser cable.
9. CL2X: Class 2 cable, limited use.
10. CL3: Class 3 cable.
11. CL3P: Class 3 plenum cable.
12. CL3R: Class 3 riser cable.
13. CL3X: Class 3 cable, limited use.
14. CM: Communications general-purpose cable.
15. CMG: Communications general-purpose cable.
16. CMP: Communications plenum cable.
17. CMR: Communications riser cable.
18. CMUC: Under-carpet communications wire and cable.
19. CMX: Communications cable, limited use.
20. DG: Distributed generation cable.
21. FC: Flat cable.
22. FCC: Flat conductor cable.
23. FPL: Power-limited fire-alarm cable.
24. FPLP: Power-limited fire-alarm plenum cable.
25. FPLR: Power-limited fire-alarm riser cable.
26. IGS: Integrated gas spacer cable.
27. ITC: Instrumentation tray cable.
28. ITC-ER: Instrumentation tray cable, exposed run.
29. MC: Metal-clad cable.
30. MC-FPL/FPLR/FPLP: Metal-clad cable containing FPL, FPLR, or FPLP.
31. MC-HL: Metal-clad cable, hazardous location.
32. MI: Mineral-insulated, metal-sheathed cable.
33. MTW: (machine tool wiring) Moisture-, heat-, and oil-resistant thermoplastic cable.
34. MV: Medium-voltage cable.
35. NM: Nonmetallic sheathed cable.
36. NMC: Nonmetallic sheathed cable with corrosion-resistant nonmetallic jacket.
37. NMS: Nonmetallic sheathed cable with signaling, data, and communications conductors, plus power or control conductors.
38. NPLF: Non-power-limited fire-alarm circuit cable.
39. NPLFP: Non-power-limited fire-alarm circuit cable for environmental air spaces.
40. NPLFR: Non-power-limited fire-alarm circuit riser cable.
41. NUCC: Nonmetallic underground HDPE conduit with conductors.
42. OFC: Conductive optical fiber general-purpose cable.

43. OFCG: Conductive optical fiber general-purpose cable.
44. OFCP: Conductive optical fiber plenum cable.
45. OFCR: Conductive optical fiber riser cable.
46. OFN: Nonconductive optical fiber general-purpose cable.
47. OFNG: Nonconductive optical fiber general-purpose cable.
48. OFNP: Nonconductive optical fiber plenum cable.
49. OFNR: Nonconductive optical fiber riser cable.
50. P: Marine shipboard cable.
51. PLTC: Power-limited tray cable.
52. PLTC-ER: Power-limited tray cable, exposed run.
53. PV: Photovoltaic cable.
54. RHH: (high heat) Thermoset rubber, heat-resistant cable.
55. RHW: Thermoset rubber, moisture-resistant cable.
56. SA: Silicone rubber cable.
57. SE: Service-entrance cable.
58. SER: Service-entrance cable, round.
59. SEU: Service-entrance cable, flat.
60. SIS: Thermoset cable for switchboard and switchgear wiring.
61. TBS: Thermoplastic cable with outer braid.
62. TC: Tray cable.
63. TC-ER: Tray cable, exposed run.
64. TC-ER-HL: Tray cable, exposed run, hazardous location.
65. THW: Thermoplastic, heat- and moisture-resistant cable.
66. THHN: Thermoplastic, heat-resistant cable with nylon jacket outer sheath.
67. THHW: Thermoplastic, heat- and moisture-resistant cable.
68. THWN: Thermoplastic, moisture- and heat-resistant cable with nylon jacket outer sheath.
69. TW: Thermoplastic, moisture-resistant cable.
70. UF: Underground feeder and branch-circuit cable.
71. USE: Underground service-entrance cable.
72. XHH: Cross-linked polyethylene, heat-resistant cable.
73. XHHW: Cross-linked polyethylene, heat- and moisture-resistant cable.

D. Abbreviations and Acronyms for Electrical Flexible Cord Types:

1. SEO: 600 V extra-hard-usage, hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp locations.
2. SEOW: 600 V extra-hard-usage, hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp or wet locations.
3. SEOO: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp locations.
4. SEOOW: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer covering for damp or wet locations.
5. SJEO: 300 V hard-usage, junior hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp locations.
6. SJEOW: 300 V hard-usage, junior hard-service cord with thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp or wet locations.
7. SJEOO: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp locations.
8. SJEOOW: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic elastomer insulation and oil-resistant thermoplastic elastomer outer cover for damp or wet locations.
9. SJO: 300 V hard-usage, junior hard-service cord with thermoset insulation and oil-resistant thermoset outer cover for damp locations.
10. SJOW: 300 V hard-usage, junior hard-service cord with thermoset insulation and oil-resistant thermoset outer cover for damp or wet locations.
11. SJOO: 300 V hard-usage, junior hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer cover for damp locations.

12. SJOOW: 300 V hard-usage, junior hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer cover for damp or wet locations.
13. SJTO: 300 V hard-usage, junior hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer cover for damp locations.
14. SJTOW: 300 V hard-usage, junior hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer cover for damp or wet locations.
15. SJTOO: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer cover for damp locations.
16. SJTOOW: 300 V hard-usage, junior hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer cover for damp or wet locations.
17. SO: 600 V extra-hard-usage, hard-service cord with thermoset insulation and oil-resistant thermoset outer covering for damp locations.
18. SOW: 600 V extra-hard-usage, hard-service cord with thermoset insulation and oil-resistant thermoset outer covering for damp or wet locations.
19. SOO: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer covering for damp locations.
20. SOOW: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoset insulation and oil-resistant thermoset outer covering for damp or wet locations.
21. STO: 600 V extra-hard-usage, hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer covering for damp locations.
22. STOW: 600 V extra-hard-usage, hard-service cord with thermoplastic insulation and oil-resistant thermoplastic outer covering for damp or wet locations.
23. STOO: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer covering for damp locations.
24. STOOW: 600 V extra-hard-usage, hard-service cord with oil-resistant thermoplastic insulation and oil-resistant thermoplastic outer covering for damp or wet locations.

E. Abbreviations for Communications Spaces:

1. EF: Entrance facility; generally serves campus or building. EF may include an ER.
2. ER: Equipment room; generally serves campus or building.
3. TE: Telecommunications enclosure; generally serves a single tenant or floor.
4. TR: Telecommunications room; generally serves a single tenant or floor.

F. Abbreviations for Communications Facilities:

1. HC: Horizontal cross-connect; also called "floor distributor" (FD).
2. IC: Intermediate cross-connect; also called "building distributor" (BD).
3. MC: Main cross-connect; also called "campus distributor" (CD).

G. Abbreviations for Grounding and Bonding:

1. BBC: Backbone bonding conductor, for connecting multiple TBBs serving the same floor.
2. PBB: Primary bonding busbar; located in main distribution frame room, ideally near electrical service entrance.
3. RBB: Rack bonding busbar; located in equipment cabinets and racks.
4. SBB: Secondary bonding busbar; located in intermediate distribution frame rooms.
5. TBB: Telecommunications bonding backbone, for connecting SBBs to PBB.
6. TBC: Telecommunications bonding conductor, for connecting PBB to intersystem bonding termination device or busbar at electrical service entrance.
7. TEBC: Telecommunications equipment bonding conductor, for connecting RBBs to SBBs or PBB.
8. UBC: Unit bonding conductor, for connecting individual communications equipment to RBBs or SBBs.

H. Definitions:

1. 8-Position 8-Contact (8P8C) Modular Jack: An unkeyed jack with up to eight contacts commonly used to terminate twisted pair and multiconductor Ethernet cable. Also called a "TIA-1096 miniature 8-position series jack" (8PSJ), or an "IEC 8877 8-pole jack."

    a. Be careful when suppliers use "RJ45" generically. Obsolete RJ45 jacks used for analog telephone cables have rejection keys. 8P8C jacks used for digital telephone cables and Ethernet cables do not have rejection keys.

2. Agile Receiver: A broadband receiver that can be tuned to any desired channel.
3. Backbone: Primary segment of ERCES between donor antenna and distribution cabling.
4. Basic Impulse Insulation Level (BIL): Reference insulation level expressed in impulse crest voltage with a standard wave not longer than 1.5 times 50 microseconds and 1.5 times 40 microseconds.
5. Broadband: For the purposes of this Section, wide bandwidth equipment or systems that can carry signals occupying in the frequency range of 54 to 1002 MHz. A broadband communication system can simultaneously accommodate television, voice, data, and many other services.
6. Broadcast Media: Loudspeakers, radios, cellular phones, and other media that will carry the selected message to the selected audience.
7. Cable: In accordance with NIST NBS Circular 37 and IEEE standards, in the United States for the purpose of interstate commerce, the definition of "cable" is (1) a conductor with insulation, or a stranded conductor with or without insulation (single-conductor cable); or (2) a combination of conductors insulated from one another (multiple-conductor cable).
8. Carrier: A pure-frequency signal that is modulated to carry information. In the process of modulation, the signal is spread out over a wider band. The carrier frequency is the center frequency on any television channel.
9. Channels: Separate parallel signal paths, from sources to loudspeakers or loudspeaker zones, with separate amplification and switching that permit selection between paths for speaker alternative program signals.
10. Communications Jack: A fixed connecting device designed for insertion of a communications cable plug.
11. Communications Outlet: One or more communications jacks, or cables and plugs, mounted in a box or ring, with a suitable protective cover.
12. Conductive Cable: Cable containing non-current-carrying electrically conductive members such as metallic strength members and metallic vapor barriers.
13. Conductor: In accordance with NIST NBS Circular 37 and IEEE standards, in the United States for the purpose of interstate commerce, the definition of "conductor" is (1) a wire or combination of wires not insulated from one another, suitable for carrying an electric current; (2) (National Electrical Safety Code) a material, usually in the form of wire, cable, or bar, suitable for carrying an electric current; or (3) (general) a substance or body that allows a current of electricity to pass continuously along it.
14. Conduit: A structure containing one or more duct raceways.
15. Control Unit: A system component that monitors inputs and controls outputs through various types of circuits.

    a. Autonomous Control Unit (ACU): The primary control unit for an in-building mass notification system (MNS).
    b. Emergency Communications Control Unit (ECCU): A system capable of sending mass notification messages to individual buildings, zones of buildings, individual outdoor loudspeaker arrays, or zones of outdoor loudspeaker arrays; or a building, multiple buildings, outside areas, or a combination of these.
    c. Fire-alarm control unit (FACU).
    d. Wireless Control Unit: A component that transmits/receives and processes wireless signals.

16. Designated Seismic System: An architectural, electrical, or mechanical system and its components for which the component importance factor is greater than 1.0 when determined in

accordance with Section 018123 "Facility Seismic and Wind Criteria."

17. Direct Buried: Installed underground without encasement in concrete or other protective material.
18. Downlink: The signal from a base station to portable radios.
19. Duct Bank: An arrangement of conduit providing one or more continuous duct raceways between two points.
20. Duct Raceway: A single enclosed raceway for conductors or cable.
21. Electrical Service: The conductors and equipment for delivering electric energy from the serving utility to the wiring system of the premises served.
22. Emergency Communications System (ECS): A system for the protection of life by indicating the existence of an emergency situation and communicating information necessary to facilitate an appropriate response and action.

    a. Distributed Recipient Mass Notification System (DRMNS): A system meant to communicate directly to targeted individuals and groups that might not be in a contiguous area.
    b. Emergency Voice/Alarm Communications System (EVACS): Dedicated manual or automatic facilities for originating and distributing voice instructions, as well as evacuation signals pertaining to an emergency, to the occupants of a building.
    c. Mass Notification System (MNS): A system used to provide information and instructions to people in buildings or other spaces using intelligible voice communications and including visual signals, text, graphics, tactile, or other communication methods (in-building MNS); and could have the capability to provide real-time information to outdoor areas and to communicate with other notification systems provided for a campus, region, or global geographic setting (wide-area MNS).

23. Emergency Systems: Those systems legally required and classed as emergency by municipal, state, federal, or other codes, or by any governmental agency having jurisdiction that is designed to ensure continuity of lighting, electrical power, or both, to designated areas and equipment in the event of failure of the normal supply for safety of human life.
24. Enclosure: The case or housing of an apparatus, or the fence or wall(s) surrounding an installation, to prevent personnel from accidentally contacting energized parts or to protect the equipment from physical damage. Types of enclosures and enclosure covers include the following:

    a. Cabinet: An enclosure that is designed for either surface mounting or flush mounting and is provided with a frame, mat, or trim in which a swinging door or doors are or can be hung.
    b. Concrete Box: A box intended for use in poured concrete.
    c. Conduit Body: A means for providing access to the interior of a conduit or tubing system through one or more removable covers at a junction or terminal point. In the United States, conduit bodies are listed in accordance with outlet box requirements.
    d. Conduit Box: A box having threaded openings or knockouts for conduit, EMT, or fittings.
    e. Cover Plate: A cover designed for protecting wiring devices installed in flush-mounted device boxes while permitting their safe operation; also called a faceplate or wallplate.
    f. Cutout Box: An enclosure designed for surface mounting that has swinging doors or covers secured directly to and telescoping with the walls of the enclosure.
    g. Device Box: A box with provisions for mounting a wiring device directly to the box.
    h. Extension Ring: A ring intended to extend the sides of an outlet box or device box to increase the box depth, volume, or both.
    i. Floor Box: A box mounted in the floor intended for use with a floor box cover and other components to complete the floor box enclosure.
    j. Floor-Mounted Enclosure: A floor box and floor box cover assembly with means to mount in the floor that is sealed against the entrance of scrub water at the floor level.
    k. Floor Nozzle: An enclosure used on a wiring system, intended primarily as a housing for a receptacle, provided with a means, such as a collar, for surface-mounting on a floor, which may or may not include a stem to support it above the floor level, and is sealed against the

entrance of scrub water at the floor level.

l. Junction Box: A box with a blank cover that joins different runs of raceway or cable and provides space for connection and branching of the enclosed conductors.
m. Outlet Box: A box that provides access to a wiring system having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for the entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting an outlet box cover, but without provisions for mounting a wiring device directly to the box.
n. Pedestal Floor Box Cover: A floor box cover that, when installed as intended, provides a means for typically vertical or near-vertical mounting of receptacle outlets above the floor's finished surface.
o. Pull Box: A box with a blank cover that joins different runs of raceway and provides access for pulling or replacing the enclosed cables or conductors.
p. Raised-Floor Box: A floor box intended for use in raised floors.
q. Recessed Access Floor Box: A floor box with provisions for mounting wiring devices below the floor surface.
r. Recessed Access Floor Box Cover: A floor box cover with provisions for passage of cords to recessed wiring devices mounted within a recessed floor box.
s. Ring: A sleeve, which is not necessarily round, used for positioning a recessed wiring device flush with the plaster, concrete, drywall, or other wall surface.
t. Ring Cover: A box cover, with raised center portion to accommodate a specific wall or ceiling thickness, for mounting wiring devices or luminaires flush with the surface.
u. Termination Box: An enclosure designed for installation of termination base assemblies consisting of bus bars, terminal strips, or terminal blocks with provision for wire connectors to accommodate incoming or outgoing conductors, or both.

25. Essential Electrical Systems: (healthcare facilities) Those systems designed to ensure continuity of electrical power to designated areas and functions of a healthcare facility during disruption of normal power sources, and also to minimize disruption within the internal wiring system.
26. Fault Limited: Providing or being served by a source of electrical power that is limited to not more than 100 W when tested in accordance with UL 62368-1.

    a. The term "fault limited" is intended to encompass most Class 1, 2, and 3 power-limited sources complying with Article 725 of NFPA 70; Class ES1 and ES2 electrical energy sources that are Class PS1 electrical power sources (e.g., USB); and Class ES3 electrical energy sources that are Class PS1 and PS2 electrical power sources (e.g., PoE). See UL 62368-1 for discussion of classes of electrical energy sources and classes of electrical power sources.

27. Headend: The control center of the MATV system, where incoming signals are amplified, converted, processed, and combined into a common cable along with any locally originated television signals, for transmission to user-interface points. It is also called the "central retransmission facility."
28. High-Performance Building: A building that integrates and optimizes on a life-cycle basis all major high-performance attributes, including energy conservation, environment, safety, security, durability, accessibility, cost-benefit, productivity, sustainability, functionality, and operational considerations.
29. High Power Loudspeaker Array (HPLA): A product providing capability for voice and tone communication to large outdoor areas.
30. Jack: Also commonly called an "outlet," it is the fixed, female connector.
31. Jacket: A continuous nonmetallic outer covering for conductors or cables.
32. Local Operator Console (LOC): Equipment used by authorized personnel and emergency responders to activate and operate a mass notification system (MNS).
33. Luminaire: A complete lighting unit consisting of a light source such as a lamp, together with the parts designed to position the light source and connect it to the power supply. It may also include parts to protect the light source or the ballast or to distribute the light.
34. Master Control Unit: System component that accepts inputs from other control units and may also

perform control-unit functions. The unit has limited capacity for the number of protected zones and is installed at an unattended location or at a location where it is not the attendant's primary function to monitor the security system.

35. Mode: The terms "Active Mode," "Off Mode," and "Standby Mode" are used as defined in the Energy Independence and Security Act (EISA) of 2007.
36. Monitoring: Acquisition, processing, communication, and display of system and equipment status data and event and alarm signals.
37. Monitoring Station: Facility that receives signals and has personnel in attendance at all times to respond to signals. A central station is a monitoring station that is listed.
38. Multi-Outlet Assembly: A type of surface, flush, or freestanding raceway designed to hold conductors, receptacles, and switches, assembled in the field or at the factory.
39. Nonsecure: Unlocked or open. (For doors and gates.)
40. One-Line Diagram: A diagram that shows, by means of single lines and graphic symbols, the course of an electric circuit or system of circuits and the component devices or parts used therein. Also called "single-line diagram."
41. Plenum: A compartment or chamber to which one or more air ducts are connected and that forms part of the air distribution system.
42. Plug: Also commonly called a "connector," it is the removable, male telecommunications connector.
43. Protected Zone: A protected premises or an area within a protected premises that is provided with means to prevent an unwanted event.
44. Protective Device: A device that senses when an abnormal current flow, abnormal voltage potential, or other abnormal electrical waveform exists and then disconnects the affected portion of the circuit from the system. Common protective devices include fuses, circuit breakers, relays, ground-fault circuit interrupters, and arc-fault circuit interrupters.
45. Public Switched Telephone Network (PSTN): Analog telephone technology that uses twisted pair cables from a telephone-provider central office for the transmission medium. "PSTN" refers to the telephone network; "POTS" refers to the individual subscriber line.
46. Receptacle: A fixed connecting device arranged for insertion of a power cord plug. Also called a power jack.
47. Receptacle Outlet: One or more receptacles mounted in a box with a suitable protective cover.
48. Screen: A metallic layer, either a foil or braid, placed around a pair or group of conductors.
49. Secure: Closed and locked and with no unlock or open commands pending. (For doors and gates.)
50. Sheath: A continuous metallic covering for conductors or cables.
51. Shield: A metallic layer, either a foil or braid, placed around a pair or group of conductors.
52. Systems Integration: The bringing together of components of several systems containing interacting components to achieve indicated functional operation of combined systems.
53. UL Category Control Number (CCN): An alphabetic or alphanumeric code used to identify product categories covered by UL's Listing, Classification, and Recognition Services.
54. Uplink: The signal from a portable radio to the base station.
55. Voice over Internet Protocol (VoIP): Digital telephone packet technology that uses the internet for its transmission medium.
56. Voltage Class: For specified circuits and equipment, voltage classes are defined as follows:

    a. Control Voltage: Having electromotive force between any two conductors, or between a single conductor and ground, that is supplied from a battery or other Class 2 or Class 3 power-limited source.
    b. Line Voltage: (1) (controls) Designed to operate using the supplied low-voltage power without transformation. (2) (transmission lines, transformers, SPDs) The line-to-line voltage of the supplying power system.
    c. Extra-Low Voltage (ELV): Not having electromotive force between any two conductors, or between a single conductor and ground, exceeding 30 V(ac rms), 42 V(ac peak), or 60 V(dc).
    d. Low Voltage (LV): Having electromotive force between any two conductors, or between a

single conductor and ground, that is rated above 30 V but not exceeding 1000 V.

e. Medium Voltage (MV): Having electromotive force between any two conductors, or between a single conductor and ground, that is rated about 1 kV but not exceeding 69 kV.

f. High Voltage: (1) (circuits) Having electromotive force between any two conductors, or between a single conductor and ground, that is rated above 69 kV but not exceeding 230 kV. (2) (safety) Having sufficient electromotive force to inflict bodily harm or injury.

57. Wire: In accordance with NIST NBS Circular 37 and IEEE standards, in the United States for the purpose of interstate commerce, the definition of "wire" is a slender rod or filament of drawn metal. A group of small wires used as a single wire is properly called a "stranded wire." A wire or stranded wire covered with insulation is properly called an "insulated wire" or a "single-conductor cable." Nevertheless, when the context indicates that the wire is insulated, the term "wire" will be understood to include the insulation.

58. Zone. A defined area within a protected premises. It is a space or area for which an intrusion must be detected and uniquely identified. The sensor or group of sensors must then be assigned to perform the detection, and any interface equipment between sensors and communication must link to master control unit.

1.3 COORDINATION

A. Interruption of Existing Electrical Service: Do not interrupt electrical service to facilities occupied by Owner or others unless permitted under the following conditions:

1. Notify [**Architect**][**Construction Manager**][**Owner**][**Tenant**] no fewer than [**seven**]<**Insert number**> days in advance of proposed interruption of electrical service.
2. Do not proceed with interruption of electrical service without [**Architect's**][**Construction Manager's**][**Owner's**][**Tenant's**] written permission.
3. Coordinate interruption with systems impacted by outage including, but not limited to, the following:

    a. Exercising generators.
    b. Emergency lighting.
    c. Elevators.
    d. Fire-alarm systems.

4. Arrange to provide temporary emergency and standby electrical [**service**][**or**][**power**] so facility may remain occupied during the outage in accordance with requirements specified in Section 015000 "Temporary Facilities and Controls." Coordinate power requirements with Owner.

B. Interruption of Existing Telephone Service: Do not interrupt telephone service to facilities occupied by Owner or others unless permitted under the following conditions:

1. Notify [**Architect**][**Construction Manager**][**Owner**][**Tenant**] no fewer than [**seven**]<**Insert number**> days in advance of proposed interruption of telephone service.
2. Do not proceed with interruption of telephone service without [**Architect's**][**Construction Manager's**][**Owner's**][**Tenant's**] written permission.

C. Interruption of Existing Internet Service: Do not interrupt internet service to facilities occupied by Owner or others unless permitted under the following conditions:

1. Notify [**Architect**][**Construction Manager**][**Owner**][**Tenant**] no fewer than [**seven**]<**Insert number**> days in advance of proposed interruption of internet service.
2. Do not proceed with interruption of internet service without [**Architect's**][**Construction Manager's**][**Owner's**][**Tenant's**] written permission.

D. Interruption of Existing Security System: Do not interrupt security system to facilities occupied by Owner or others unless permitted under the following conditions:

1. Notify [**Architect**][**Construction Manager**][**Owner**][**Tenant**] no fewer than [**seven**]<**Insert number**> days in advance of proposed interruption of security system.
2. Do not proceed with interruption of security system without [**Architect's**][**Construction Manager's**][**Owner's**][**Tenant's**] written permission.

E. Interruption of Existing Fire-Alarm System: Do not interrupt fire-alarm system to facilities occupied by Owner or others unless permitted under the following conditions:

1. Notify [**Architect**][**Construction Manager**][**Owner**][**Tenant**] no fewer than [**seven**]<**Insert number**> days in advance of proposed interruption of fire-alarm system.
2. Do not proceed with interruption of fire-alarm system without [**Architect's**][**Construction Manager's**][**Owner's**][**Tenant's**] written permission.

1.4 PREINSTALLATION MEETINGS

A. Electrical Preconstruction Conference: Schedule conference with Architect and Owner, not later than [**10**]<**Insert number**> days after Notice to Proceed. Agenda topics include, but are not limited to, the following:

1. Electrical installation schedule.
2. Status of power system studies.
3. Value analysis proposals and requests for substitution of electrical equipment.
4. Utility work coordination and class of service requests.
5. Commissioning activities.
6. Sustainability activities[**, including Measurement and Verification Plan**].

B. Communications Preconstruction Conference: Schedule conference with Architect and Owner not later than [**10**]<**Insert number**> days after Notice to Proceed. Agenda topics include, but are not limited to, the following:

1. Installation schedule for communications systems.
2. Value analysis proposals and requests for substitution of communications equipment.
3. Utility services work coordination and monitoring service requests.
4. Commissioning activities.
5. Sustainability activities.

C. Electronic Safety and Security Preconstruction Conference: Schedule conference with Architect and Owner not later than [**10**]<**Insert number**> days after Notice to Proceed. Agenda topics include, but are not limited to, the following:

1. Installation schedule for security, fire-alarm, and other life-safety systems.
2. Value analysis proposals and requests for substitution of electronic safety and security equipment.
3. Monitoring services work coordination and monitoring service requests.
4. Commissioning activities.
5. Sustainability activities.

1.5 SEQUENCING

A. Conduct and submit results of power system studies before submitting product data and Shop Drawings

for electrical equipment.

1.6 SCHEDULING

A. <**Insert requirements for unusual scheduling coordination**>.

1.7 ACTION SUBMITTALS

A. Coordination Drawings for Structural Supports: Show coordination of structural supports for equipment and devices, including restraints and bracing for control of seismic and wind loads, with other systems, equipment, and structural supports in the vicinity.

B. Coordination Drawings for Ceiling Areas: Where indicated on drawings, provide reflected ceiling plan(s), supplemented by sections and other details, drawn to scale, in accordance with Section 013100 "Project Management and Coordination," on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Suspended ceiling components.
2. Structural members to which equipment and suspension systems will be attached.
3. Size and location of access panels on ceilings.
4. Elevation, size, and route of sprinkler piping.
5. Elevation, size, and route of plumbing piping.
6. Elevation, size, and route of ductwork.
7. Elevation, size, and route of cable tray.
8. Elevation, size, and route of conduit.
9. Elevation and size of wall-mounted and ceiling-mounted equipment.
10. Access panels.
11. Sprinklers.
12. Air inlets and outlets.
13. Control modules.
14. Luminaires.
15. Communications devices.
16. Speakers.
17. Security devices.
18. Fire-alarm devices.
19. Indicate clear dimensions for maintenance access in front of equipment.
20. Indicate dimensions of fully open access doors.

C. Coordination Drawings for Cable Tray Routing: Reflected ceiling plan(s), supplemented by sections and other details, drawn to scale, in accordance with Section 013100 "Project Management and Coordination," on which the following items are shown and coordinated with each other, using input from installers of the items involved:

1. Elevation, size, and route of cable trays.
2. Relationships between components and adjacent structural, electrical, and mechanical elements.
3. Vertical and horizontal offsets and transitions.
4. Elevation and size of sleeves for wall, ceiling, and floor cable penetrations.
5. Elevation of ceilings and size of ceiling tiles.
6. Locations of access panels on ceilings.
7. Locations where cable tray crosses or parallels sprinkler piping.
8. Locations where cable tray crosses plumbing piping.
9. Locations where cable tray crosses or parallels ductwork.
10. Locations of access panels on ductwork.
11. Locations where cable tray crosses conduit.

12. Items blocking access around cable trays, including the following:

    a. Light fixtures.
    b. Speakers.
    c. Fire-alarm devices.
    d. Power outlets.
    e. Wall-mounted equipment.
    f. Equipment racks.
    g. Furniture.
    h. Door swings.
    i. Building features.

13. Indicate clear dimension between cable tray and walls or obstructions that are closer than **10 ft (3 m)**.
14. Highlight locations where cable tray is greater than **3 ft (1 m)** above ceilings. Explain how personnel access will be accommodated for cable tray maintenance.

D. Coordination Drawings for Conduit Routing: Conduit routing plans, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of items involved:

1. Structural members in paths of conduit groups with common supports.
2. HVAC and plumbing items and architectural features in paths of conduit groups with common supports.

E. Coordination Drawings for Bus Assembly Routing: Floor plans and sections, drawn to scale, on which the following items are shown and coordinated with each other, using input from installers of items involved:

1. Scaled bus-assembly layouts and relationships between components and adjacent structural, mechanical, and electrical elements.
2. Vertical and horizontal enclosed bus-assembly runs, offsets, and transitions.
3. Clearances for access above and to the side of enclosed bus assemblies.
4. Vertical elevation of enclosed bus assemblies above the floor or bottom of structure.
5. Support locations, type of support, and weight on each support.
6. Location of adjacent construction elements, including luminaires, HVAC and plumbing equipment, fire sprinklers and piping, signal and control devices, and other equipment.

F. Coordination Drawings for Large Equipment Indoor Installations:

1. Location plan, drawn to scale, showing heavy equipment or truck access paths to loading dock or other freight access into building. Indicate available width and height of doors or openings.
2. Floor plan for entry floor and floor where equipment is located, drawn to scale, showing heavy equipment access paths for maintenance and replacement, with the following items shown and coordinated with each other, based on input from installers of the items involved:

    a. Dimensioned concrete bases, outlines of equipment, conduit entries, and grounding equipment locations.
    b. If freight elevator must be used, indicate width and height of door and depth of car. Indicate if large equipment must be tipped to use elevator.
    c. Dimensioned working clearances and dedicated areas below and around electrical equipment where obstructions and tripping hazards are prohibited.

3. Reflected ceiling plans for entry floor and floor where equipment is located, drawn to scale, on which the following items are shown and coordinated with each other, based on input from installers of the items involved:

a. Support locations, type of support, and weight on each support. Locate structural supports for structure-supported raceways[**, busways,**][**and seismic bracing**].
b. Location of lighting fixtures, sprinkler piping and sprinklers, ducts and diffusers, and other obstructions, indicating available overhead clearance.
c. Dimensioned working clearances and dedicated areas above and around electrical equipment where foreign systems and equipment are prohibited.

G. Coordination Drawings for Large Equipment Outdoor Installations:

1. Utilities site plan, drawn to scale, showing heavy equipment or truck access paths for maintenance and replacement, with the following items shown and coordinated with each other, based on input from installers of the items involved:

a. Fences and walls, dimensioned concrete bases, outlines of equipment, conduit entries, and grounding and bonding locations.
b. Indicate clear dimensions for fence gates and wall openings.
c. Indicate depth and type of ground cover, and locations of trees, shrubbery, and other obstructions in access path.
d. Indicate clear height below tree branches, overhead lines, bridges, and other overhead obstructions in access path, or where cranes and hoists will be needed to handle large electrical equipment.
e. Support locations, type of support, and weight on each support. Locate structural supports for structure-supported raceways[**, busways,**][**and seismic bracing**].
f. Dimensioned working clearances and dedicated areas around electrical equipment.

H. Coordination Drawings for Duct Banks:

1. Show duct profiles and coordination with other utilities and underground structures.
2. Include plans and sections, drawn to scale, and show bends and locations of expansion fittings.

I. Sustainable Design Submittals:

1. Electrical Waste Management (Wire): Provide documentation for quantity of abandoned electrical wire that has been removed from Project site, in accordance with Rule 645.5(G) of NFPA 70, and provide verification that abandoned wire containing lead stabilizers has been identified and disposed of in accordance with jurisdictional hazardous waste requirements.
2. Electrical Waste Management (Lamps): Provide documentation that an area has been provided to serve entire Project for collection and storage of fluorescent and HID lamps and ballasts for their appropriate disposal or recycling in accordance with jurisdictional hazardous waste requirements.
3. Electrical Waste Management (Electronics and Batteries): Provide documentation that an area has been provided to serve entire Project for collection and storage of electronics, alkaline batteries, and rechargeable batteries for their appropriate disposal or recycling in accordance with jurisdictional hazardous waste requirements.

1.8 INFORMATIONAL SUBMITTALS

A. Electrical Installation Schedule: At preconstruction meeting, and periodically thereafter as dates change, provide schedule for electrical installation Work to Owner and Architect including, but not limited to, milestone dates for the following activities:

1. Submission of power system studies.
2. Submission of specified coordination drawings.
3. Submission of action submittals specified in Division 26.
4. Orders placed for major electrical equipment.

5. Arrival of major electrical equipment on-site.
6. Preinstallation meetings specified in Division 26.
7. Utility service outages.
8. Utility service inspection and activation.
9. Mockup reviews.
10. Closing of walls and ceilings containing electrical Work.
11. System startup, testing, and commissioning activities for major electrical equipment.
12. System startup, testing, and commissioning activities for emergency lighting.
13. System startup, testing, and commissioning activities for automation systems (SCADA, BMS, lighting, HVAC, fire alarm, fire pump, etc.).
14. Pouring of concrete housekeeping pads for electrical equipment and testing of concrete samples.
15. Requests for special inspections.
16. Requests for inspections by authorities having jurisdiction.

B. Installation Schedule for Communications Systems: At preconstruction meeting, and periodically thereafter as dates change, provide schedule for installation of the communications Work to Owner and Architect including, but not limited to, milestone dates for the following activities:

1. Submission of specified coordination drawings.
2. Submission of action submittals specified in Division 27.
3. Orders placed for major equipment.
4. Arrival of major equipment on-site.
5. Preinstallation meetings specified in Division 27.
6. Telephone and internet service outages.
7. Telephone and internet service inspection and activation.
8. Mockup reviews.
9. Closing of walls and ceilings containing the communications Work.
10. System startup, testing, and commissioning activities for communications equipment.
11. System startup, testing, and commissioning activities for the Work specified in other divisions that depends on the Work specified in Division 27.
12. System startup, testing, and commissioning activities for automation systems (SCADA, BMS, lighting, HVAC, fire alarm, fire pump, etc.).
13. Requests for special inspections.
14. Requests for inspections by authorities having jurisdiction.

C. Installation Schedule for Security, Fire-Alarm, and Other Life-Safety Systems: At preconstruction meeting, and periodically thereafter as dates change, provide schedule for installation of security, fire-alarm, and the other life-safety Work to Owner and Architect including, but not limited to, milestone dates for the following activities:

1. Submission of specified coordination drawings.
2. Submission of action submittals specified in Division 28.
3. Orders placed for major equipment.
4. Arrival of major equipment on-site.
5. Preinstallation meetings specified in Division 28.
6. Security and fire-alarm system outages.
7. Security and fire-alarm system inspection and activation.
8. Mockup reviews.
9. Closing of walls and ceilings containing the security and fire-alarm Work.
10. System startup, testing, and commissioning activities for security and fire-alarm equipment.
11. System startup, testing, and commissioning activities for fire-alarm interfaces with the Work specified in other divisions.
12. System startup, testing, and commissioning activities for automation systems (SCADA, BMS, lighting, HVAC, fire alarm, fire pump, etc.).
13. Requests for special inspections.

14. Requests for inspections by authorities having jurisdiction.

D. Welding certificates.

E. Seismic Performance Certificates: Provide special certification for designated seismic systems as required to meet requirements specified in Section 018123 "Facility Seismic and Wind Criteria" for all designated seismic systems identified on the Drawings or in the Specifications.

1. Include the following information:

a. Basis for Certification: Indicate whether withstand certification is based on actual test of assembled components or on calculation.
b. Dimensioned Outline Drawings of Equipment Unit: Identify center of gravity and locate and describe mounting and anchorage provisions.
c. Detailed description of equipment anchorage devices on which the certification is based and their installation requirements.
d. Detailed description of conduit support devices and interconnections on which the certification is based and their installation requirements.
e. Equipment manufacturer's written certification for each designated active electrical seismic device and system, stating that it will remain operable following the basis-of-design seismic criteria specified in Section 018123 "Facility Seismic and Wind Criteria."
f. Equipment manufacturer's written certification that components with hazardous contents maintain containment following the basis-of-design seismic criteria specified in Section 018123 "Facility Seismic and Wind Criteria."
g. Evidence demonstrating compliance with these requirements for approval to authorities having jurisdiction after review and acceptance by qualified structural professional engineer.

F. Wind Performance Certificates: Provide special certification for systems and components designated on the Drawings or in the Specifications to be subject to high wind exposure and impact damage.

1. Include the following information:

a. Provide equipment manufacturer's written certification for each designated system and component, stating that it will remain in place and operable following the design wind event and comply with requirements of authorities having jurisdiction.
b. Certification must be based on ICC-ES or similar nationally recognized testing standard procedures acceptable to authorities having jurisdiction.

G. Qualification Statements:

1. For qualified regional manufacturer.
2. For structural professional engineer.
3. For electrical professional engineer.
4. For lighting professional engineer.
5. For EPM specialist.
6. For welder.
7. For ERMC-S-PVC raceway Installer.
8. For medium-voltage cable Installer.
9. For medium-voltage duct Installer.
10. For medium-voltage equipment Installer.
11. For electrical power monitoring Installer.
12. For switchboard Installer.
13. For EVSE Installer.
14. For generator set Installer.
15. For lightning protection system Installer.

16. For theatrical lighting Installer.
17. For exterior athletic lighting Installer.
18. For power quality specialist.
19. For electrical testing and inspecting agency and its on-site electrical testing supervisor.
20. For structural testing and inspecting agency.
21. For outdoor pole testing and inspecting agency.
22. For luminaire photometric testing laboratory.
23. For lighting testing and inspecting agency.
24. For communications design professional.
25. For communications cable Installer.
26. For communications testing and inspecting agency and its on-site communications testing supervisor.
27. For nurse call/code blue system Installer.
28. For security design professional.
29. For fire-alarm system design professional.
30. For mass notification design professional.
31. For IB-PSC design professional.
32. For general radiotelephone operator license (GROL) designer.
33. For emergency communications design professional.
34. For fire-alarm cable Installer and its on-site fire-alarm cable installation supervisor.
35. For security testing and inspecting agency and its on-site security testing supervisor.
36. For intrusion detection systems installer.
37. For perimeter security systems integrator.
38. For fire-alarm testing agency and its on-site fire-alarm testing supervisor.
39. For detention electronics systems Installer.
40. For detention electronics systems integrator.
41. For detention electronics systems testing and inspecting agency.

1.9 CLOSEOUT SUBMITTALS

A. Facility EMP Binders:

1. Complete Set: On [**approved online or cloud solution**][**and**][**USB media that is clearly and permanently labeled with attached placard on lanyard to prevent misplacement**].
2. Volumes 2 and 8: Reproducible hardcopy on archival quality, **28 lb (105 GSM)**, acid-free, bond paper.

B. Operation and Maintenance Data:

1. Provide emergency operation, normal operation, and preventive maintenance manuals for each system, equipment, and device listed below:

   a. <**Insert system, equipment, or device**>.

2. Include the following information:

   a. Manufacturer's operating specifications.
   b. User's guides for software and hardware.
   c. Schedule of maintenance material items recommended to be stored at the Project site.
   d. Detailed instructions covering operation under both normal and abnormal conditions.
   e. Time-current curves for overcurrent protective devices and manufacturer's written instructions for testing and adjusting their settings.
   f. List of load-current and overload-relay heaters with related motor nameplate data.
   g. List of lamp types and photoelectric relays used on the Project, with ANSI and

manufacturers' codes.
h. Manufacturer's instructions for setting field-adjustable components.
i. Manufacturer's instructions for testing, adjusting, and reprogramming microprocessor controls.
j. EPSS: Manufacturer's system checklists, maintenance schedule, and maintenance log sheets in accordance with NFPA 110.
k. Exterior pole inspection and repair procedures.

C. Software and Firmware Operational Documentation: Provide software and firmware operational documentation[**in Facility EPM Binders**], including the following:

1. Software operating and upgrade manuals.
2. Names, versions, and website addresses for locations of installed software.
3. Device address list.
4. Printout of software application and graphic screens.
5. Testing and adjusting of panic and emergency power features.
6. For lighting controls, include the following:

a. Adjustments of scene preset controls, adjustable fade rates, and fade overrides.
b. Operation of adjustable zone controls.

D. Software:

1. Program Software Backup: Provide [**username and password for approved online or cloud solution**][**and**][**USB media that is clearly and permanently labeled with attached placard on lanyard to prevent misplacement**].
2. Provide to Owner upgrades and unrestricted licenses[**for Government use**] for installed and backup software, including operating systems and programming tools required for operation and maintenance.

1.10 MOCKUPS

A. Simple Mockups for Coordinating Accessibility of Electrical Devices around Fixed Furnishings and Equipment:

1. Build simple mockups using art supplies and other inexpensive materials for verification of general arrangement, actual dimensions, and accessibility of <**Insert identification of room and fabrication**> by [**Architect**][**Owner**][**Tenant**]<**Insert approving stakeholders**> prior to fabrication and installation of Work. Depict products from all Divisions requiring coordination, including, but not limited to, fixed furnishings, casework, outlet covers and plates, HVAC controls, exposed raceway, exposed plumbing, equipment, and signage.

B. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Owner specifically approves such deviations by Change Order.

PART 2 - PRODUCTS

2.1 SUBSTITUTION LIMITATIONS FOR ELECTRICAL EQUIPMENT

A. Substitution requests for electrical equipment will be entertained under the following conditions:

1. Substitution requests may be submitted for consideration prior to the Electrical Preconstruction Conference if accompanied by value analysis data indicating that substitution will comply with the

Project performance requirements while significantly increasing value for Owner throughout life of facility.
2. Substitution requests may be submitted for consideration concurrently with submission of power system study reports when those reports indicate that substitution is necessary for safety of maintenance personnel and facility occupants.
3. Contractor is responsible for sequencing and scheduling power system studies and electrical equipment procurement. After the Electrical Preconstruction Conference, insufficient lead time for electrical equipment delivery will not be considered a valid reason for substitution.

2.2 SUBSTITUTION LIMITATIONS FOR COMMUNICATIONS EQUIPMENT

A. Substitution requests for communications equipment will be entertained under the following conditions:

1. Substitution requests may be submitted for consideration prior to the Communications Preconstruction Conference if accompanied by value analysis data indicating that substitution will comply with the Project performance requirements while significantly increasing value for Owner throughout life of facility.
2. Contractor is responsible for sequencing and scheduling equipment procurement. After the Communications Preconstruction Conference, insufficient lead time for equipment delivery will not be considered a valid reason for substitution.

2.3 SUBSTITUTION LIMITATIONS FOR ELECTRONIC SAFETY AND SECURITY EQUIPMENT

A. Substitution requests for electronic safety and security equipment will be entertained under the following conditions:

1. Substitution requests may be submitted for consideration prior to the Electronic Safety and Security Preconstruction Conference if accompanied by value analysis data indicating that substitution will comply with the Project performance requirements while significantly increasing value for Owner throughout life of facility.
2. Contractor is responsible for sequencing and scheduling equipment procurement. After the Electronic Safety and Security Preconstruction Conference, insufficient lead time for equipment delivery will not be considered a valid reason for substitution.

2.4 FACILITY ELECTRICAL MAINTENANCE PROGRAM (EMP) BINDERS

A. Description: Set of binders containing operation and maintenance data for facility's electrical equipment that was compiled during analysis of installed electrical Work for Facility EMP development.

B. Applicable Standards:

1. Regulatory Requirements: Comply with requirements in NFPA 70B.
2. General Characteristics:

a. Volume 1 - Introduction:

1) Summarize how Facility EMP analysis was performed, how data were collected, and how volumes are organized.
2) Describe Facility EMP and provide recommended policies and procedures for implementing the program and keeping it current.
3) Provide place for Owner to identify contact information for employees responsible for implementing and maintaining Facility EMP.

b. Volume 2 - Facility Safety, Hazards Awareness, and Emergency Procedures:

1) Include training requirements for employees and contractors.
2) Include list of known facility hazards impacting IT&R activities.
3) Include approval and permitting procedures for IT&R activities.
4) Include incident emergency response procedures.
5) Include emergency shutdown procedures.
6) Include electrical disaster recovery procedures.
7) Include procedures for investigating the following incidents:

a) Electrical safety incidents.
b) Equipment malfunctions.
c) Unintended operations or alarms.
d) Operation of protective devices.

c. Volume 3 - Operating Procedures for Electrical Equipment and Controls:

1) <**Insert requirements**>.

d. Volume 4 - Facility Diagrams and Schedules:

1) Include single-line diagrams.
2) Include grounding and bonding diagrams.
3) Include essential wiring diagrams.
4) Include system automation diagrams (SCADA, BMS, lighting, HVAC, etc.).
5) Include records of switchgear, switchboard, and panelboard schedules.
6) Include time-current curves for overcurrent protective devices.
7) Include list of load-current and overload-relay heaters with related motor nameplate data.

e. Volume 5 - Inventory of Facility Equipment Using Electrical Power:

1) Include simplified floor plans showing equipment locations.
2) Identify critical equipment (electrical or otherwise).
3) Include identifying designations and nameplate data.
4) Include warranty and maintenance contract information.

f. Volume 6 - Inventory of Facility Tools, Supplies, and Personnel Protective Equipment:

1) Include schedules of maintenance material items recommended to be stored at facility.
2) Include list of lamp types and photoelectric relays used in facility with ANSI and manufacturers' codes.
3) Include calibration and servicing data for each item.

g. Volume 7 - Inspection, Testing, and Repair (IT&R) Plan:

1) Include tables showing frequency of activities for each item.
2) Include annual schedule with activities mapped to specific days of the year.
3) Include exterior pole inspection and repair procedures.

h. Volume 8 - Inspection, Testing, and Repair (IT&R) Forms:

1) <**Insert requirements**>.

i. Volume 9 - Inspection, Testing, and Repair (IT&R) Procedures:

1) **<Insert requirements>**.

j. Volume 10 - Spare Parts List:

1) Include list of all parts required to perform IT&R procedures.
2) Identify quantities of which parts are recommended to be stored on-site.
3) Include source contact information and budget cost for each item.

k. Volume 11 - Construction Project Closeout Record Documentation:

1) Include records of power system studies and photometric studies.
2) Include records of risk assessment studies.
3) Include records of electrical system startup and commissioning activities.
4) Include records of baseline inspections and tests.
5) Include records of baseline infrared photographs with normal light photographs showing the location, direction, angle, and conditions necessary for reproducing each infrared photograph.
6) Include records of baseline settings for adjustable equipment and devices.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verification of Conditions:

1. **<Insert Project requirements>**.

B. Preinstallation Testing:

1. **<Insert Project requirements>**.

C. Evaluation and Assessment:

1. **<Insert Project requirements>**.

3.2 PREPARATION

A. Protection of In-Place Conditions:

1. **<Insert Project requirements>**.

3.3 DEVELOPMENT OF FACILITY ELECTRICAL MAINTENANCE PROGRAM (EMP)

A. Facility EMP must be developed by qualified EMP specialist.

B. Conduct Facility EMP analysis in accordance with NFPA 70B requirements.

1. Renovation Projects:

a. Facility diagrams must include connected existing equipment for entire facility where

known. Areas of uncertainty should be clearly indicated.

b. Obtain copies of existing operation and maintenance data and existing Facility EMP information from Owner.

c. Facility EMP analysis should identify existing equipment that does not have available operation and maintenance data, and should explain Owner's risks because this equipment is not included in Facility EMP.

d. Data for existing equipment outside scope of the Project may be inserted in Facility EMP Binders without analysis.

e. Data for existing equipment impacted by scope of the Project should be analyzed and documented similar to the Project's new equipment data as much as possible.

C. Compile operation and maintenance data from Facility EMP analysis and submit [**updated**] Facility EMP Binders.

3.4 INSTALLATION OF ELECTRICAL WORK

A. Unless more stringent requirements are specified in the Contract Documents or manufacturers' written instructions, comply with NFPA 70 and NECA NEIS 1 for installation of electrical Work on the Project. Consult Architect for resolution of conflicting requirements.

3.5 CLEANING

A. Electrical or Electronic Waste Management:

1. <**Insert requirements for special handling or diversion of electrical and electronics waste for recycling or disposal**>.

3.6 CLOSEOUT ACTIVITIES

A. Training:

1. [**With assistance from factory-authorized service representatives, train**][**Train**] Owner's maintenance personnel on the following topics:

   a. How to implement [**updated**] Facility EMP.
   b. <**Insert system or equipment**>.

2. [**Provide video recordings of training sessions to Owner.**][**Allow Owner to record training sessions.**]

SECTION 26 05 00 00 - SLEEVES AND SLEEVE SEALS FOR ELECTRICAL RACEWAYS AND CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Round sleeves.
2. Rectangular sleeves.
3. Sleeve-seal systems.
4. Sleeve-seal fittings.
5. Grout.
6. Sealants.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
3. Section 078413 "Penetration Firestopping" for penetration firestopping installed in fire-resistance-rated walls, horizontal assemblies, and smoke barriers, with and without penetrating items.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding of raceways, electrical power cabling, and communications cabling referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
7. Section 270528 "Pathways for Communications Systems" [**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for raceway materials, routing, locations, and identification of communications equipment and cabling.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

B. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

PART 2 - PRODUCTS

2.1 ROUND SLEEVES

A. Steel Wall Sleeves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Advance Products & Systems, LLC**]
    b. [**CCI Piping Systems**]
    c. [**Flexicraft Industries**]
    d. [**GPT Industries, LLC.**]
    e. [**Specified Technologies Inc.**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Advance Products & Systems, LLC**]
    b. [**CCI Piping Systems**]
    c. [**Flexicraft Industries**]
    d. [**GPT Industries, LLC.**]
    e. [**Specified Technologies Inc.**]
    f. <**Insert manufacturer's name**>

3. Standard Features:

    a. Referenced Standard: ASTM A53/A53M, Type E, Grade B.
    b. Dimensions: Schedule 40; sized so outer diameter of sleeve matches inner diameter of penetration hole.
    c. Corrosion Resistance: Coated with [**Zinc**][**or**][**Gal-vo-plast**] .
    d. Configuration: Plain ends and integral waterstop.

B. Cast-Iron Wall Sleeves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**American Cast Iron Pipe Company**]
    b. [**Flexicraft Industries**]
    c. [**McWane Ductile; a part of the McWane family of companies**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Cast Iron Pipe Company**]
    b. [**Flexicraft Industries**]
    c. [**McWane Ductile; a part of the McWane family of companies**]
    d. <**Insert manufacturer's name**>

3. Standard Features:

a. Description: Cast or fabricated "wall pipe," equivalent to ductile-iron pressure pipe.
b. Configuration: Plain ends and integral waterstop.

C. PVC Pipe Sleeves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**CCI Piping Systems**]
b. [**GPT Industries, LLC.**]
c. [**Metraflex Company (The)**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**CCI Piping Systems**]
b. [**GPT Industries, LLC.**]
c. [**Metraflex Company (The)**]
d. <**Insert manufacturer's name**>

3. Standard Features:

a. Referenced Standard: ASTM D1785.
b. Dimensions: Schedule 40.

D. PVC Molded Sleeves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**ABB Electrification Installations Products**]
b. [**American Polywater Corporation**]
c. [**Arlington Industries, Inc.**]
d. [**Reliance Worldwide Corporation**]
e. [**Roxtec Inc.**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB Electrification Installations Products**]
b. [**American Polywater Corporation**]
c. [**Arlington Industries, Inc.**]
d. [**Reliance Worldwide Corporation**]
e. [**Roxtec Inc.**]
f. <**Insert manufacturer's name**>

3. Standard Features: With nailing flange for attaching to wooden forms.

E. PE or PP Molded Sleeves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**American Polywater Corporation**]
   b. [**Crete-Sleeve**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**American Polywater Corporation**]
   b. [**Crete-Sleeve**]
   c. <**Insert manufacturer's name**>

3. Standard Features: Removable, tapered-cup shaped, and smooth outer surface with nailing flange for attaching to wooden forms.

F. Round, Galvanized-Steel, Sheet Metal Sleeves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

   a. [**Benefast**]
   b. [**Specified Technologies Inc.**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Benefast**]
   b. [**Specified Technologies Inc.**]
   c. <**Insert manufacturer's name**>

3. Standard Features: Galvanized-steel sheet; thickness not less than **0.0239 inch (0.6 mm)**; round tube closed with welded longitudinal joint, with tabs for screw-fastening the sleeve to the board.

2.2 RECTANGULAR SLEEVES

A. Rectangular, Galvanized-Steel, Sheet Metal Sleeves:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Abesco Fire LLC**]
b. [**Specified Technologies Inc.**]
c. [**Wiremold; Legrand North America, LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Abesco Fire LLC**]
b. [**Specified Technologies Inc.**]
c. [**Wiremold; Legrand North America, LLC**]
d. <**Insert manufacturer's name**>

3. Standard Features:

a. Material: Galvanized sheet steel.
b. Minimum Metal Thickness:

1) For sleeve cross-section rectangle perimeter less than **50 inch (1270 mm)** and with no side larger than **16 inch (400 mm)**, thickness must be **0.052 inch (1.3 mm)**.
2) For sleeve cross-section rectangle perimeter not less than **50 inch (1270 mm)** or with one or more sides larger than **16 inch (400 mm)**, thickness must be **0.138 inch (3.5 mm)**.

2.3 SLEEVE-SEAL SYSTEMS

A. Sleeve-Seal System:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Advance Products & Systems, LLC**]
b. [**American Polywater Corporation**]
c. [**BWM Company**]
d. [**CALPICO, Inc.**]
e. [**Flexicraft Industries**]
f. [**GPT Industries, LLC.**]
g. [**Metraflex Company (The)**]
h. [**Proco Products, Inc**]
i. [**Roxtec Inc.**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Advance Products & Systems, LLC**]
b. [**American Polywater Corporation**]
c. [**BWM Company**]
d. [**CALPICO, Inc.**]
e. [**Flexicraft Industries**]

f. [**GPT Industries, LLC.**]
g. [**Metraflex Company (The)**]
h. [**Proco Products, Inc**]
i. [**Roxtec Inc.**]
j. <**Insert manufacturer's name**>

3. Standard Features:

a. Modular Sealing Device: Designed for field assembly, to fill annular space between sleeve and raceway or cable or between raceway and cable.
b. Sealing Elements: [**EPDM**][**Nitrile (Buna N)**] rubber interlocking links shaped to fit surface of pipe. Include type and number required for pipe material and size of pipe.
c. Pressure Plates: [**Carbon steel**][**Fiber-reinforced plastic**][**Stainless steel**] .
d. Connecting Bolts and Nuts: [**Carbon steel, with corrosion-resistant coating,**][**Stainless steel,**] of length required to secure pressure plates to sealing elements.

2.4 SLEEVE-SEAL FITTINGS

A. Sleeve-Seal Fitting:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Holdrite; a division of Reliance Worldwide Corporation**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Holdrite; a division of Reliance Worldwide Corporation**]
b. <**Insert manufacturer's name**>

3. Standard Features:

a. Description: Manufactured plastic, sleeve-type, waterstop assembly made for embedding in concrete slab or wall.
b. Waterstop Collar: Unit must have plastic or rubber waterstop collar with center opening to match piping OD.

2.5 GROUT

A. Grout for Sealing Penetrations:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Specified Technologies Inc.**]
b. [**W. R. Meadows, Inc**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Specified Technologies Inc.**]
b. [**W. R. Meadows, Inc**]
c. <**Insert manufacturer's name**>

3. Standard Features:

a. Description: Nonshrinking grout; recommended for interior and exterior sealing openings in non-fire-rated walls or floors.
b. Referenced Standard: ASTM C1107/C1107M, Grade B, post-hardening and volume-adjusting, dry, hydraulic-cement grout.
c. Design Mix: **5000 psi (34.5 MPa)**, 28-day compressive strength.
d. Packaging: Premixed and factory packaged.

2.6 SEALANTS

A. Pourable Sealants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Carlisle SynTec Systems; a Carlisle Company**]
b. [**GAF**]
c. [**Johns Manville; a Berkshire Hathaway company**]
d. [**Specified Technologies Inc.**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Carlisle SynTec Systems; a Carlisle Company**]
b. [**GAF**]
c. [**Johns Manville; a Berkshire Hathaway company**]
d. [**Specified Technologies Inc.**]
e. <**Insert manufacturer's name**>

3. Standard Features:

a. Description: Single-component, neutral-curing elastomeric sealants of grade indicated below.
b. Grade: Pourable (self-leveling) formulation for openings in floors and other horizontal surfaces that are not fire rated.

4. Sustainability Characteristics:

    a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.

B. Foam Sealants:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**Innovative Chemical Products (Building Solutions Group)**]
    b. [**The Dow Chemical Company**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Innovative Chemical Products (Building Solutions Group)**]
    b. [**The Dow Chemical Company**]
    c. <**Insert manufacturer's name**>

3. Standard Features:

    a. Description: Multicomponent, liquid elastomers that, when mixed, expand and cure in place to produce a flexible, nonshrinking foam.
    b. Foam Expansion: Must not damage cables or crack penetrated structure.

4. Sustainability Characteristics:

    a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Maintenance: NFPA 70B and NECA NEIS 91.
3. Electrical Safety: NFPA 70E.
4. Commissioning of Active and Passive Fire Protection Features: NFPA 3 and NFPA 4.
5. Hot Work: NFPA 51B.
6. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
7. Communications Work: BICSI N1.

8. Work in ITE Rooms: NFPA 75.
9. Work in Confined Spaces: NFPA 350.
10. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
11. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Sleeves for Conduits Penetrating Non-Fire-Rated Wall Assemblies: Use circular metal sleeves unless penetration arrangement requires rectangular sleeved opening.

D. Interfaces with Other Work:

1. Identification: Provide labels for penetrations and associated electrical equipment.

a. Identify field-installed conductors, interconnecting wiring, and components.
b. Label each enclosure with engraved metal or laminated-plastic nameplate.
c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.

2. Grounding and Bonding:

a. Bonding of Metal Sleeve for Metal Raceway Penetrations: Bond metal raceway to metal sleeve on both sides of penetration.
b. Bonding of Metal Sleeve for Cable Penetrations: Bond equipment grounding conductor for electrical power cables, or cable shield for communications cables, to metal sleeve on both sides of penetration.
c. Bonding is not required for nonmetallic sleeves.
d. Grounding of communications cables entering buildings from outside must be provided at the penetration.

3. Hangers and Supports:

a. Support of Raceways and Cables in Sleeve: Comply with manufacturer's published instructions for supporting raceways or cables on both sides of penetration. Sleeve sealing products are typically not rated for supporting the weight of raceways and cables.

3.2 INSTALLATION OF ROUND SLEEVES

A. Sleeves for Conduits Penetrating Above-Grade, Non-Fire-Rated, Concrete and Masonry-Unit Floors and Walls:

1. Interior Penetrations of Non-Fire-Rated Walls and Floors:

a. Seal space outside of sleeves with mortar or grout. Pack sealing material solidly between sleeve and wall or floor so no voids remain. Tool exposed surfaces smooth; protect material while curing.
b. Seal annular space between sleeve and raceway or cable, using joint sealant appropriate for size, depth, and location of joint. Comply with requirements in Section 079200 "Joint Sealants."

2. Use pipe sleeves unless penetration arrangement requires rectangular sleeved opening.
3. Size pipe sleeves to provide [**1/4 inch (6.4 mm)**]<**Insert dimension**> annular clear space between sleeve and raceway or cable, unless sleeve-seal system is to be installed [**or seismic criteria require different clearance**] .

4. Install sleeves for wall penetrations unless core-drilled holes or formed openings are used. Install sleeves during erection of walls. Cut sleeves to length for mounting flush with both surfaces of walls. Deburr after cutting.
5. Install sleeves for floor penetrations. Extend sleeves installed in floors [2 inch (50 mm)]<**Insert dimension**> above finished floor level. Install sleeves during erection of floors.
6. Seal space outside of sleeves with approved joint compound for wall assemblies.

B. Roof-Penetration Sleeves: Seal penetration of individual raceways and cables with flexible boot-type flashing units applied in coordination with roofing work.

C. Aboveground, Exterior-Wall Penetrations: Seal penetrations using [**steel**][**cast-iron**] pipe sleeves and mechanical sleeve-seal systems. Size sleeves to allow for 1 inch (25 mm) annular clear space between pipe and sleeve for installing mechanical sleeve seals.

D. Underground, Exterior-Wall and Floor Penetrations:

1. Install [**steel**][**cast-iron**] pipe sleeves with integral waterstops. Size sleeves to allow for 1 inch (25 mm) annular clear space between raceway or cable and sleeve for installing sleeve-seal system. Install sleeve during construction of floor or wall.
2. Install steel pipe sleeves. Size sleeves to allow for 1 inch (25 mm) annular clear space between raceway or cable and sleeve for installing sleeve-seal system. Grout sleeve into wall or floor opening.

3.3 INSTALLATION OF RECTANGULAR SLEEVES

A. Install sleeves in existing walls without compromising structural integrity of walls. Do not cut structural elements without reinforcing the wall to maintain the designed weight bearing and wall stiffness.

B. Install conduits and cable with no crossings within the sleeve.

C. Fill opening around conduits and cables with expanding foam without leaving voids.

D. Provide metal sheet covering at both wall surfaces and finish to match surrounding surfaces. Metal sheet must be same material as sleeve.

3.4 INSTALLATION OF SLEEVE-SEAL SYSTEMS

A. Install sleeve-seal systems in sleeves in exterior concrete walls and slabs-on-grade at raceway entries into building.

B. Install type and number of sealing elements recommended by manufacturer for raceway or cable material and size. Position raceway or cable in center of sleeve. Assemble mechanical sleeve seals and install in annular space between raceway or cable and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make watertight seal.

END OF SECTION 26 05 00 00

SECTION 26 05 13 00 - MEDIUM-VOLTAGE CABLES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Cables.
2. Connectors.
3. Solid terminations.
4. Separable insulated connectors.
5. Splice kits.
6. Medium-voltage tapes.
7. Arc-proofing materials.
8. Fault indicators.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of cable. Include splices and terminations for cables and cable accessories.

B. Samples: **16 inch (400 mm)** lengths for each type of cable specified.

C. Sustainable Design Submittals:

1. Product Data: For each conductor and cable indicating lead content.
2. Product Data: For solvents and adhesives, indicating VOC content.
3. Laboratory Test Reports: For solvents and adhesives, indicating compliance with requirements for low-emitting materials.

1.3 INFORMATIONAL SUBMITTALS

A. Coordination Drawings: Indicate location of each cable, splice, and termination.

B. Material Certificates: For each type of cable and accessory.

C. Design Data: Cable pulling calculations, including conduit size and fill percentage, pulling tensions, cable sidewall pressure, jam probability, voltage drop, and ground wire sizing for each cable.

D. Source quality-control reports.

E. Field quality-control reports.

PART 2 - PRODUCTS

2.1 SYSTEM DESCRIPTION

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

B. Comply with IEEE C2 and NFPA 70.

C. Source Limitations: Obtain cables and accessories from single source from single manufacturer.

2.2 CABLES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**General Cable; Prysmian Group North America**]
2. [**Hendrix Wire and Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.**]
3. [**Kerite Power Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.**]
4. [**Okonite Company (The)**]
5. [**Prysmian Cables and Systems; Prysmian Group North America**]
6. [**Southwire Company, LLC**]
7. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**General Cable; Prysmian Group North America**]
2. [**Hendrix Wire and Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.**]
3. [**Kerite Power Cable; Marmon Holdings, Inc.; Berkshire Hathaway Inc.**]
4. [**Okonite Company (The)**]
5. [**Prysmian Cables and Systems; Prysmian Group North America**]
6. [**Southwire Company, LLC**]
7. <**Insert manufacturer's name**>

C. Cable Type: [**Type MV 90**][**Type MV 105**].

D. Conductor Insulation: [**Crosslinked polyethylene**][**Ethylene-propylene rubber**].

1. Voltage Rating: [**5**][**8**][**15**][**25**][**35**] kV.
2. Insulation Thickness: [**100**][**133**] percent insulation level.

E. Conductor: [**Copper**][**Aluminum**].

F. Comply with UL 1072, AEIC CS8[**, ICEA S-93-639/NEMA WC 74, and ICEA S-97-682**][**, and ICEA S-94-649**].

G. Conductor Stranding: [**Compact round, concentric lay, Class B**][**Concentric lay, Class B**].

H. Strand Filling: Conductor interstices are filled with impermeable compound.

I. Lead Content: Less than 300 parts per million.

J. Shielding: [**Copper tape**][**Solid copper wires**], helically applied over semiconducting insulation shield.

K. Shielding and Jacket: Corrugated copper drain wires embedded in extruded, chlorinated, polyethylene jacket.

L. Three-Conductor Cable Assembly: Three insulated, shielded conductors cabled together[**with ground conductors**].

1. Circuit Identification: Color-coded tape (black, red, blue) under the metallic shielding.

M. Cable Sheath: [**Interlocked aluminum**][**Interlocked galvanized steel**][**Corrugated aluminum tube**] applied over cable.

N. Cable Jacket: [**Sunlight-resistant PVC**][**Chlorosulfonated polyethylene**].

2.3 CONNECTORS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**ABB, Electrification Business**]
3. [**DSG-Canusa; Shawcor Ltd.**]
4. [**Eaton**]
5. [**G&W Electric Company**]
6. [**TE Connectivity Ltd.**]
7. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**3M**]
2. [**ABB, Electrification Business**]
3. [**DSG-Canusa; Shawcor Ltd.**]
4. [**Eaton**]
5. [**G&W Electric Company**]
6. [**TE Connectivity Ltd.**]
7. <**Insert manufacturer's name**>

C. Comply with ANSI C119.4 for connectors between aluminum conductors or for connections between aluminum to copper conductors.

D. Copper-Conductor Connectors: [**Copper barrel crimped**][**Aluminum barrel crimped**][**Copper shear bolt**] connectors.

2.4 SOLID TERMINATIONS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide**

products by one of the following][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**ABB, Electrification Business**]
3. [**DSG-Canusa; Shawcor Ltd.**]
4. [**G&W Electric Company**]
5. [**Shawflex; Shawcor Ltd.**]
6. [**TE Connectivity Ltd.**]
7. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**3M**]
2. [**ABB, Electrification Business**]
3. [**DSG-Canusa; Shawcor Ltd.**]
4. [**G&W Electric Company**]
5. [**Shawflex; Shawcor Ltd.**]
6. [**TE Connectivity Ltd.**]
7. <**Insert manufacturer's name**>

C. Multiconductor Cable Sheath Seals: Type recommended by seal manufacturer for type of cable and installation conditions, including orientation.

1. Compound-filled, cast-metal-body, metal-clad cable terminator for metal-clad cable [**with**][**without**] external plastic jacket.
2. Cold-shrink sheath seal kit with preformed sleeve openings sized for cable and insulated conductors.
3. Heat-shrink sheath seal kit with phase- and ground-conductor rejacketing tubes, cable-end sealing boot, and sealing plugs for unused ground-wire openings in boot.
4. Cast-epoxy-resin sheath seal kit with wraparound mold and packaged, two-part, epoxy-resin casting material.

D. Shielded-Cable Terminations: Comply with the following classes of IEEE 48. Insulation class shall be equivalent to that of cable. Include shield ground strap for shielded cable terminations.

1. Class 1 Terminations:

    a. Modular type, furnished as a kit, with stress-relief tube; multiple, molded-silicone-rubber, insulator modules; shield ground strap; and compression-type connector.
    b. Heat-shrink type with heat-shrink inner stress control and outer nontracking tubes; multiple, molded, nontracking skirt modules; and compression-type connector.
    c. Modular type, furnished as a kit, with stress-relief shield terminator; multiple-wet-process, porcelain, insulator modules; shield ground strap; and compression-type connector.
    d. Indoors: Kit with stress-relief tube, nontracking insulator tube, shield ground strap, compression-type connector, and end seal.

2. Class 2 Terminations, Indoors: Kit with stress-relief tube, nontracking insulator tube, shield ground strap, and compression-type connector. Include silicone-rubber tape; cold-shrink-rubber sleeve; or heat-shrink, plastic-sleeve moisture seal for end of insulation whether or not supplied with kits.
3. Class 3 Terminations: Kit with stress cone and compression-type connector.

2.5 SEPARABLE INSULATED CONNECTORS

A. Description: Modular system, complying with IEEE 386, with disconnecting, single-pole, cable terminators and with matching, stationary, plug-in, dead-front terminals designed for cable voltage and for sealing against moisture.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**ABB, Electrification Business**]
2. [**Eaton**]
3. [**Richards Manufacturing Co.**]
4. <**Insert manufacturer's name**>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**ABB, Electrification Business**]
2. [**Eaton**]
3. [**Richards Manufacturing Co.**]
4. <**Insert manufacturer's name**>

D. Terminations at Distribution Points: Modular type, consisting of terminators installed on cables and modular, dead-front, terminal junctions for interconnecting cables.

E. Load-Break Cable Terminators: Elbow-type units with 200 A load make/break and continuous-current rating; coordinated with insulation diameter, conductor size, and material of cable being terminated. Include test point on terminator body that is capacitance coupled.

F. Dead-Break Cable Terminators: Elbow-type unit with [**200 A**][**600 A**] continuous-current rating; designed for de-energized disconnecting and connecting; coordinated with insulation diameter, conductor size, and material of cable being terminated. Include test point on terminator body that is capacitance coupled.

G. Dead-Front Terminal Junctions: Modular bracket-mounted groups of dead-front stationary terminals that mate and match with above cable terminators. Two-, three-, or four-terminal units as indicated, with fully rated, insulated, watertight conductor connection between terminals and complete with grounding lug, manufacturer's standard accessory stands, stainless steel mounting brackets, and attaching hardware.

1. Protective Cap: Insulating, electrostatic-shielding, water-sealing cap with drain wire.
2. Portable Feed-Through Accessory: Two-terminal, dead-front junction arranged for removable mounting on accessory stand of stationary terminal junction.
3. Grounding Kit: Jumpered elbows, portable feed-through accessory units, protective caps, test rods suitable for concurrently grounding three phases of feeders, and carrying case.
4. Standoff Insulator: Portable, single dead-front terminal for removable mounting on accessory stand of stationary terminal junction. Insulators suitable for fully insulated isolation of energized cable-elbow terminator.

H. Test-Point Fault Indicators: Applicable current-trip ratings and arranged for installation in test points of load-break separable connectors, and complete with self-resetting indicators capable of being installed with shotgun hot stick and tested with test tool.

I. Tool Set: Shotgun hot stick with energized terminal indicator, fault-indicator test tool, and carrying case.

2.6 SPLICE KITS

A. Description: For connecting medium voltage cables; type as recommended by cable or splicing kit manufacturer for the application.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**ABB, Electrification Business**]
3. [**DSG-Canusa; Shawcor Ltd.**]
4. [**Eaton**]
5. [**Richards Manufacturing Co.**]
6. [**TE Connectivity Ltd.**]
7. <**Insert manufacturer's name**>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**3M**]
2. [**ABB, Electrification Business**]
3. [**DSG-Canusa; Shawcor Ltd.**]
4. [**Eaton**]
5. [**Richards Manufacturing Co.**]
6. [**TE Connectivity Ltd.**]
7. <**Insert manufacturer's name**>

D. Standard: Comply with IEEE 404.

E. Splicing Products: As recommended, in writing, by splicing kit manufacturer for specific sizes, materials, ratings, and configurations of cable conductors. Include all components required for complete splice, with detailed instructions.

1. Combination tape and cold-shrink-rubber sleeve kit with rejacketing by cast-epoxy-resin encasement or other waterproof, abrasion-resistant material.
2. Heat-shrink splicing kit of uniform, cross-section, polymeric construction with outer heat-shrink jacket.
3. Premolded, cold-shrink-rubber, in-line splicing kit.
4. Premolded, EPDM splicing body kit with cable joint sealed by interference fit of mating parts and cable.
5. Separable multiway splice system with all components for the required splice configuration.

2.7 MEDIUM-VOLTAGE TAPES

A. Description: Electrical grade, insulating tape rated for medium voltage application.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**HellermannTyton**]
3. [**Scapa Industrial; Scapa Group plc**]

4. <**Insert manufacturer's name**>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**3M**]
2. [**HellermannTyton**]
3. [**Scapa Industrial; Scapa Group plc**]
4. <**Insert manufacturer's name**>

D. Ethylene/propylene rubber-based, **30 mil (0.76 mm)** splicing tape, rated for 130 deg C operation. Minimum **3/4 inch (20 mm)** wide.

E. Silicone rubber-based, **12 mil (0.30 mm)** self-fusing tape, rated for 130 deg C operation. Minimum **1-1/2 inch (38 mm)** wide.

F. Insulating-putty, **125 mil (3.175 mm)** elastic filler tape. Minimum **1-1/2 inch (38 mm)** wide.

2.8 ARC-PROOFING MATERIALS

A. Description: Fire retardant, providing arc flash protection.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. <**Insert manufacturer's name**>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**3M**]
2. <**Insert manufacturer's name**>

D. Tape for First Course on Metal Objects: **10 mil (250 micrometer)** thick, corrosion-protective, moisture-resistant, PVC pipe-wrapping tape.

E. Arc-Proofing Tape: Fireproof tape, flexible, conformable, intumescent to **0.3 inch (8 mm)** thick, and compatible with cable jacket.

F. Glass-Cloth Tape: Pressure-sensitive adhesive type, **1 inch (25 mm)** wide.

2.9 FAULT INDICATORS

A. Indicators: [**Automatically**][**Manually**] reset fault indicator[**with inrush restraint feature**], arranged to clamp to cable sheath and provide a display after a fault has occurred in cable. Instrument shall not be affected by heat, moisture, and corrosive conditions and shall be recommended by manufacturer for installation conditions.

B. Resetting Tool: Designed for use with fault indicators, with moisture-resistant storage and carrying case.

2.10 SOURCE QUALITY CONTROL

A. Test and inspect cables according to [**ICEA S-97-682**][**ICEA S-94-649**] before shipping.

B. Test strand-filled cables for water-penetration resistance according to ICEA T-31-610, using a test pressure of **5 psig (35 kPa)**.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install cables according to IEEE 576.

B. Proof conduits prior to conductor installation by passing a wire brush mandrel and then a rubber duct swab through the conduit. Separate the wire brush and the rubber swab by **48 to 72 inch (1200 to 1800 mm)** on the pull rope.

1. Wire Brush Mandrel: Consists of a length of brush approximately the size of the conduit inner diameter with stiff steel bristles and an eye on each end for attaching the pull ropes. If an obstruction is felt, pull the brush back and forth repeatedly to break up the obstruction.
2. Rubber Duct Swab: Consists of a series of rubber discs approximately the size of the conduit inner diameter on a length of steel cable with an eye on each end for attaching the pull ropes. Pull the rubber duct swab through the duct to extract loose debris from the duct.

C. Pull Conductors: Do not exceed manufacturer's recommended maximum pulling tensions and sidewall pressure values.

1. Where necessary, use manufacturer-approved pulling compound or lubricant that does not deteriorate conductor or insulation.
2. Use pulling means, including fish tape, cable, rope, and basket-weave cable grips, that do not damage cables and raceways. Do not use rope hitches for pulling attachment to cable.
3. Use pull-in guides, cable feeders, and draw-in protectors as required to protect cables during installation.
4. Do not pull cables with ends unsealed. Seal cable ends with rubber tape.

D. Install exposed cables parallel and perpendicular to surfaces of exposed structural members and follow surface contours where possible.

E. Support cables according to Section 260529 "Hangers and Supports for Electrical Systems."

F. Install direct-buried cables on leveled and tamped bed of **3 inch (75 mm)** thick, clean sand. Separate cables crossing other cables or piping by a minimum of **2 inch (50 mm)** of tamped earth, plus an additional **2 inch (50 mm)** of sand. Install permanent markers at ends of cable runs, changes in direction, and buried splices.

G. Install "buried-cable" warning tape **12 inch (305 mm)** above cables.

H. In manholes, handholes, pull boxes, junction boxes, and cable vaults, train cables around walls by the longest route from entry to exit; support cables at intervals adequate to prevent sag.

I. Install sufficient cable length to remove cable ends under pulling grips. Remove length of conductor damaged during pulling.

J. Install cable splices at pull points and elsewhere as indicated; use standard kits.[**Use dead-front separable watertight connectors in manholes and other locations subject to water infiltration.**]

K. Install terminations at ends of conductors, and seal multiconductor cable ends with standard kits.

L. Install separable insulated-connector components as follows:

1. Protective Cap: At each terminal junction, with one on each terminal to which no feeder is indicated to be connected.
2. Portable Feed-Through Accessory: At each terminal junction, with one on each terminal.
3. Standoff Insulator: At each terminal junction, with one on each terminal.

M. Arc Proofing: Unless otherwise indicated, arc proof medium-voltage cable at locations not protected by conduit, cable tray, direct burial, or termination materials. In addition to arc-proofing tape manufacturer's written instructions, apply arc proofing as follows:

1. Clean cable sheath.
2. Wrap metallic cable components with **10 mil (250 micrometer)** pipe-wrapping tape.
3. Smooth surface contours with electrical insulation putty.
4. Apply arc-proofing tape in one half-lapped layer with coated side toward cable.
5. Band arc-proofing tape with two layers of **1 inch (25 mm)** wide half-lapped, adhesive, glass-cloth tape at each end of the arc-proof tape.

N. Seal around cables passing through fire-rated elements according to Section 078413 "Penetration Firestopping."

O. Install fault indicators on each phase where indicated.

P. Ground shields of shielded cable at terminations, splices, and separable insulated connectors. Ground metal bodies of terminators, splices, cable and separable insulated-connector fittings, and hardware.

Q. Ground shields of shielded cable at one point only. Maintain shield continuity and connections to metal connection hardware at all connection points.

R. Identify cables according to Section 260553 "Identification for Electrical Systems." Identify phase and circuit number of each conductor at each splice, termination, pull point, and junction box. Arrange identification so that it is unnecessary to move the cable or conductor to read the identification.

3.2 FIELD QUALITY CONTROL

A. Tests and Inspections:

1. Perform each visual and mechanical inspection and electrical test stated in NETA ATS. Certify compliance with test parameters.
2. After installing medium-voltage cables and before electrical circuitry has been energized, test for compliance with requirements.
3. Perform direct-current High Potential test of each new conductor according to NETA ATS, Ch. 7.3.3. Do not exceed cable manufacturer's recommended maximum test voltage.
4. Perform Partial Discharge test of each new conductor according to NETA ATS, Ch. 7.3.3 and to test equipment manufacturer's recommendations.
5. Perform Dissipation Factor test of each new conductor according to NETA ATS, Ch. 7.3.3 and to test equipment manufacturer's recommendations.

B. Medium-voltage cables will be considered defective if they do not pass tests and inspections.

C. Prepare test and inspection reports.

END OF SECTION 26 05 13 00

Task	Specification	Specification Description
26 05 13 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 13 16	26 05 13 00	Medium-Voltage Cables
26 05 13 16	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 13 16	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 19 00 - LOW-VOLTAGE ELECTRICAL POWER CONDUCTORS AND CABLES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Thermoplastic-insulated wire.
2. Thermoset-insulated wire.
3. Nonmetallic underground conduit with conductors.
4. Metallic sheathed cable.
5. Photovoltaic single-conductor cable.
6. Nonmetallic jacketed cable.
7. Connectors and splices.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
5. Section 260513 "Medium-Voltage Cables" for single-conductor and multiconductor cables, cable splices, and terminations for electrical distribution systems with 601 to 35 000 V.
6. Section 260523 "Control-Voltage Electrical Power Cables" for control systems communications cables and Classes 1, 2, and 3 control cables.
7. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
8. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers, supports, and concrete bases referenced by this Section.
9. Section 260533.13 "Conduits for Electrical Systems" specifies installation of raceways referenced by this Section.
10. Section 260536 "Cable Trays for Electrical Systems" specifies cable tray installation referenced by this Section.
11. Section 260544 "Sleeves and Sleeve Seals for Electrical Raceways and Cabling" specifies installation of sleeves and sleeve seals referenced by this Section.
12. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
13. Section 271313 "Communications Copper Backbone Cabling" for twisted pair cabling used for data circuits.
14. Section 271513 "Communications Copper Horizontal Cabling" for twisted pair cabling used for data circuits.

1.2 DEFINITIONS

A. NICET: National Institute for Certification in Engineering Technologies; a division of the National Society of Professional Engineers (NSPE).

1.3 ACTION SUBMITTALS

A. Product Schedule: Indicate type, use, location, and termination locations.

B. Product Data: For each type of product.

C. Sustainable Design Submittals:

1. Product Data: For each conductor and cable indicating lead content.
2. Product Data: For recycled content, indicating percentage of postconsumer and preconsumer recycled content and cost.
3. Product Data: For solvents and adhesives, indicating VOC content.
4. Laboratory Test Reports: For solvents and adhesives, indicating compliance with requirements for low-emitting materials.

D. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

B. Field Reports:

1. Field reports for infrared scanning.

1.5 QUALIFICATIONS

A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.

B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.

C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site electrical testing supervisors must possess active NICET EPT Technician [**III**][**IV**] certification.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.2 THERMOPLASTIC-INSULATED WIRE

A. Description: Thermoplastic-insulated wire for use in accordance with Article 310 of NFPA 70.

B. UL ZLGR - Type THHN Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Cerro Wire LLC**]
d. [**Encore Wire Corporation**]
e. [**Okonite Company (The)**]
f. [**Prysmian Cables and Systems; Prysmian Group North America**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Cerro Wire LLC**]
d. [**Encore Wire Corporation**]
e. [**Okonite Company (The)**]
f. [**Prysmian Cables and Systems; Prysmian Group North America**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Temperature Rating: 90 deg C.
d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to

gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

C. UL ZLGR - Type THHW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Encore Wire Corporation**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Encore Wire Corporation**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Temperature Rating: [**75 deg C**][**90 deg C**].
d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.

g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

D. UL ZLGR - Type THW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Cerro Wire LLC**]
d. [**Encore Wire Corporation**]
e. [**Okonite Company (The)**]
f. [**Prysmian Cables and Systems; Prysmian Group North America**]
g. [**Service Wire Co.**]
h. [**Southwire Company, LLC**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Cerro Wire LLC**]
d. [**Encore Wire Corporation**]
e. [**Okonite Company (The)**]
f. [**Prysmian Cables and Systems; Prysmian Group North America**]
g. [**Service Wire Co.**]
h. [**Southwire Company, LLC**]
i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Temperature Rating: [**75 deg C**][**90 deg C**].
d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.

e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

E. UL ZLGR - Type THW-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Alpha Wire; brand of Belden, Inc.**]
    b. [**Belden Inc.**]
    c. [**Cerro Wire LLC**]
    d. [**Encore Wire Corporation**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Service Wire Co.**]
    h. [**Southwire Company, LLC**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Alpha Wire; brand of Belden, Inc.**]
    b. [**Belden Inc.**]
    c. [**Cerro Wire LLC**]
    d. [**Encore Wire Corporation**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Service Wire Co.**]
    h. [**Southwire Company, LLC**]
    i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

4. Standard Features:

    a. Referenced Standard: Article 310 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: 90 deg C.
    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
    e. Conductor Size:[**As indicated on the Drawings.**]

        1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
f. Marked "VW-1," indicating compliance with special vertical flame test.
g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

F. UL ZLGR - Type THWN Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Cerro Wire LLC**]
d. [**Encore Wire Corporation**]
e. [**Okonite Company (The)**]
f. [**Prysmian Cables and Systems; Prysmian Group North America**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Cerro Wire LLC**]
d. [**Encore Wire Corporation**]
e. [**Okonite Company (The)**]
f. [**Prysmian Cables and Systems; Prysmian Group North America**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Temperature Rating: 75 deg C.
d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

G. UL ZLGR - Type THWN-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Alpha Wire; brand of Belden, Inc.**]
    b. [**Belden Inc.**]
    c. [**Cerro Wire LLC**]
    d. [**Encore Wire Corporation**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Southwire Company, LLC**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Alpha Wire; brand of Belden, Inc.**]
    b. [**Belden Inc.**]
    c. [**Cerro Wire LLC**]
    d. [**Encore Wire Corporation**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Southwire Company, LLC**]
    h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

4. Standard Features:

    a. Referenced Standard: Article 310 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: 90 deg C.
    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
    e. Conductor Size:[**As indicated on the Drawings.**]

        1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

    a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
    b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
    c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
    d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
    e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
    f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
    g. Marked "VW-1," indicating compliance with special vertical flame test.
    h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

H. UL ZLGR - Type TW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Alpha Wire; brand of Belden, Inc.**]
    b. [**Belden Inc.**]
    c. [**Cerro Wire LLC**]
    d. [**Encore Wire Corporation**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Service Wire Co.**]
    h. [**Southwire Company, LLC**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Alpha Wire; brand of Belden, Inc.**]
    b. [**Belden Inc.**]
    c. [**Cerro Wire LLC**]
    d. [**Encore Wire Corporation**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Service Wire Co.**]
    h. [**Southwire Company, LLC**]
    i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

4. Standard Features:

    a. Referenced Standard: Article 310 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: 60 deg C.
    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].

e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

I. UL ZLGR - Type FEP Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Belden Inc.**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. [**Southwire Company, LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Belden Inc.**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. [**Southwire Company, LLC**]
d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Covering: None.
c. Insulation Voltage Rating: 600 V.
d. Insulation Temperature Rating: 90 deg C for dry and damp locations.
e. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
f. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
f. Marked "VW-1," indicating compliance with special vertical flame test.
g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

J. UL ZLGR - Type FEPB Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Belden Inc.**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. [**Southwire Company, LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Belden Inc.**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. [**Southwire Company, LLC**]
d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Covering: Glass or other suitable braid material.
c. Insulation Voltage Rating: 600 V.
d. Insulation Temperature Rating: 200 deg C for dry locations.
e. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
f. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
f. Marked "VW-1," indicating compliance with special vertical flame test.
g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

K. UL ZLGR - Type Z Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Belden Inc.**]
   b. [**Okonite Company (The)**]
   c. [**Prysmian Cables and Systems; Prysmian Group North America**]
   d. [**Southwire Company, LLC**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Belden Inc.**]
   b. [**Okonite Company (The)**]
   c. [**Prysmian Cables and Systems; Prysmian Group North America**]
   d. [**Southwire Company, LLC**]
   e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

      1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.

4. Standard Features:

   a. Referenced Standard: Article 310 of NFPA 70.
   b. Insulation Voltage Rating: 600 V.
   c. Insulation Temperature Rating: [**90 deg C for dry and damp locations**][**150 deg C for dry locations and special applications**].
   d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
   e. Conductor Size:[**As indicated on the Drawings.**]

      1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

   a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.

b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

L. UL ZLGR - Type ZW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Belden Inc.**]
   b. [**Okonite Company (The)**]
   c. [**Prysmian Cables and Systems; Prysmian Group North America**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Belden Inc.**]
   b. [**Okonite Company (The)**]
   c. [**Prysmian Cables and Systems; Prysmian Group North America**]
   d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

      1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.

4. Standard Features:

   a. Referenced Standard: Article 310 of NFPA 70.
   b. Insulation Voltage Rating: 600 V.
   c. Insulation Temperature Rating: [**60 deg C**][**75 deg C**][**85 deg C**][**90 deg C**][**150 deg C**][**200 deg C**][**250 deg C**].
   d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
   e. Conductor Size:[**As indicated on the Drawings.**]

      1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

   a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
   b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
   c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
   d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to

gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
f. Marked "VW-1," indicating compliance with special vertical flame test.
g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

M. UL ZLGR - Type ZW-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Okonite Company (The)**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Okonite Company (The)**]
   b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

      1) Thermoplastic Fluoropolymer Wire: Also investigated in accordance with UL 83A.

4. Standard Features:

   a. Referenced Standard: Article 310 of NFPA 70.
   b. Insulation Voltage Rating: 600 V.
   c. Insulation Temperature Rating: [**75 deg C for wet locations**][**90 deg C for dry and damp locations**][**150 deg C for dry locations and special applications**].
   d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
   e. Conductor Size:[**As indicated on the Drawings.**]

      1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

   a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
   b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
   c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
   d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
   e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
   f. Marked "VW-1," indicating compliance with special vertical flame test.
   g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

N. UL ZLGR - Type TBS Insulated Switchboard Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Belden Inc.**]
    b. [**Prysmian Cables and Systems; Prysmian Group North America**]
    c. [**Southwire Company, LLC**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Belden Inc.**]
    b. [**Prysmian Cables and Systems; Prysmian Group North America**]
    c. [**Southwire Company, LLC**]
    d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

        1) Thermoplastic and Fibrous Outer Braid: Also investigated in accordance with UL 83B.

4. Standard Features:

    a. Referenced Standard: Article 310 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: 90 deg C.
    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
    e. Conductor Size:[**As indicated on the Drawings.**]

        1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

    a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
    b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
    c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
    d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
    e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
    f. Marked "VW-1," indicating compliance with special vertical flame test.
    g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

O. UL ZLGR - Thermoplastic-Insulated Submersible Pump Multiconductor Cable :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Cerro Wire LLC**]
b. [**Encore Wire Corporation**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Cerro Wire LLC**]
b. [**Encore Wire Corporation**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoplastic-Insulated Wire: UL CCN ZLGR, including UL 83.

1) Submersible Pump Cable: Also investigated in accordance with UL CCN FDNP, including NSF 61.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Material: Type THW.
d. Insulation Temperature Rating: 75 deg C.
e. Conductor Material: Copper.
f. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
f. Marked "VW-1," indicating compliance with special vertical flame test.
g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.

2.3 THERMOSET-INSULATED WIRE

A. Description: Thermoset-insulated wire for use in accordance with Article 310 of NFPA 70.

B. UL ZKST - Type RHH Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Encore Wire Corporation**]
    d. [**Okonite Company (The)**]
    e. [**Prysmian Cables and Systems; Prysmian Group North America**]
    f. [**Service Wire Co.**]
    g. [**Southwire Company, LLC**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Encore Wire Corporation**]
    d. [**Okonite Company (The)**]
    e. [**Prysmian Cables and Systems; Prysmian Group North America**]
    f. [**Service Wire Co.**]
    g. [**Southwire Company, LLC**]
    h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

    a. Referenced Standard: Article 310 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: 90 deg C.
    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
    e. Conductor Size:[**As indicated on the Drawings.**]

        1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

    a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
    b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
    c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
    d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
    e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
    f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
    g. Marked "VW-1," indicating compliance with special vertical flame test.
    h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
    i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance

with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

C. UL ZKST - Type RHW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Belden Inc.**]
   b. [**Cerro Wire LLC**]
   c. [**Encore Wire Corporation**]
   d. [**Okonite Company (The)**]
   e. [**Prysmian Cables and Systems; Prysmian Group North America**]
   f. [**Service Wire Co.**]
   g. [**Southwire Company, LLC**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Belden Inc.**]
   b. [**Cerro Wire LLC**]
   c. [**Encore Wire Corporation**]
   d. [**Okonite Company (The)**]
   e. [**Prysmian Cables and Systems; Prysmian Group North America**]
   f. [**Service Wire Co.**]
   g. [**Southwire Company, LLC**]
   h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

   a. Referenced Standard: Article 310 of NFPA 70.
   b. Insulation Voltage Rating: 600 V.
   c. Insulation Temperature Rating: 75 deg C.
   d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
   e. Conductor Size:[**As indicated on the Drawings**].

      1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

   a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
   b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
   c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.

d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

D. UL ZKST - Type RHW-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Belden Inc.**]
b. [**Cerro Wire LLC**]
c. [**Encore Wire Corporation**]
d. [**Okonite Company (The)**]
e. [**Prysmian Cables and Systems; Prysmian Group North America**]
f. [**Service Wire Co.**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Belden Inc.**]
b. [**Cerro Wire LLC**]
c. [**Encore Wire Corporation**]
d. [**Okonite Company (The)**]
e. [**Prysmian Cables and Systems; Prysmian Group North America**]
f. [**Service Wire Co.**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Temperature Rating: 90 deg C.
d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

E. UL ZKST - Type SA Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Okonite Company (The)**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. [**Southwire Company, LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Okonite Company (The)**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. [**Southwire Company, LLC**]
d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Temperature Rating: [**90 deg C for dry and damp locations**][**200 deg C for special applications**].
d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
f. Marked "VW-1," indicating compliance with special vertical flame test.
g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
h. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

F. UL ZKST - Type XHH Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Encore Wire Corporation**]
b. [**Okonite Company (The)**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Encore Wire Corporation**]
b. [**Okonite Company (The)**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Temperature Rating: 90 deg C.
d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
g. Marked "VW-1," indicating compliance with special vertical flame test.
h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

G. UL ZKST - Type XHHW Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Belden Inc.**]
b. [**Cerro Wire LLC**]
c. [**Encore Wire Corporation**]
d. [**Okonite Company (The)**]
e. [**Prysmian Cables and Systems; Prysmian Group North America**]
f. [**Service Wire Co.**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Belden Inc.**]
b. [**Cerro Wire LLC**]
c. [**Encore Wire Corporation**]
d. [**Okonite Company (The)**]
e. [**Prysmian Cables and Systems; Prysmian Group North America**]
f. [**Service Wire Co.**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

    a. Referenced Standard: Article 310 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: [**75 deg C for wet locations**][**90 deg C for dry and damp locations**].
    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
    e. Conductor Size:[**As indicated on the Drawings.**]

        1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

    a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
    b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
    c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
    d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
    e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
    f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
    g. Marked "VW-1," indicating compliance with special vertical flame test.
    h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
    i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

        1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

H. UL ZKST - Type XHHW-2 Insulated Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Encore Wire Corporation**]
    d. [**Okonite Company (The)**]
    e. [**Prysmian Cables and Systems; Prysmian Group North America**]
    f. [**Service Wire Co.**]
    g. [**Southwire Company, LLC**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Encore Wire Corporation**]
    d. [**Okonite Company (The)**]
    e. [**Prysmian Cables and Systems; Prysmian Group North America**]
    f. [**Service Wire Co.**]
    g. [**Southwire Company, LLC**]

h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

   a. Referenced Standard: Article 310 of NFPA 70.
   b. Insulation Voltage Rating: 600 V.
   c. Insulation Temperature Rating: 90 deg C.
   d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
   e. Conductor Size:[**As indicated on the Drawings.**]

      1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

   a. Marked "Cable Tray Use" or "CT," indicating compliance with vertical-tray cable flame test.
   b. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
   c. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
   d. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
   e. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
   f. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
   g. Marked "VW-1," indicating compliance with special vertical flame test.
   h. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
   i. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

      1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

I. UL ZKST - Type SIS Insulated Switchboard and Switchgear Wire :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Belden Inc.**]
   b. [**Cerro Wire LLC**]
   c. [**Encore Wire Corporation**]
   d. [**Okonite Company (The)**]
   e. [**Prysmian Cables and Systems; Prysmian Group North America**]
   f. [**Service Wire Co.**]
   g. [**Southwire Company, LLC**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Belden Inc.**]
b. [**Cerro Wire LLC**]
c. [**Encore Wire Corporation**]
d. [**Okonite Company (The)**]
e. [**Prysmian Cables and Systems; Prysmian Group North America**]
f. [**Service Wire Co.**]
g. [**Southwire Company, LLC**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

4. Standard Features:

   a. Referenced Standard: Article 310 of NFPA 70.
   b. Insulation Voltage Rating: 600 V.
   c. Insulation Temperature Rating: 90 deg C.
   d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
   e. Conductor Size:[**As indicated on the Drawings.**]

      1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

   a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
   b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
   c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
   d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
   e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
   f. Marked "VW-1," indicating compliance with special vertical flame test.
   g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
   h. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

      1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

J. UL ZKST - Thermoset-Insulated Submersible Pump Multiconductor Cable :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Belden Inc.**]
   b. [**Prysmian Cables and Systems; Prysmian Group North America**]
   c. [**Service Wire Co.**]
   d. [**Southwire Company, LLC**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Belden Inc.**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. [**Service Wire Co.**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Thermoset-Insulated Wire: UL CCN ZKST, including UL 44.

1) Submersible Pump Cable: Also investigated in accordance with UL CCN FDNP, including NSF 61.

4. Standard Features:

a. Referenced Standard: Article 310 of NFPA 70.
b. Insulation Voltage Rating: 600 V.
c. Insulation Material: Type RHW-2.
d. Insulation Temperature Rating: 90 deg C.
e. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
f. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Sunlight Resistant" or "SR," indicating compliance with artificial weathering test.
b. Marked "Oil Resistant I" or "PR I," indicating 60 deg C oil resistance.
c. Marked "Oil Resistant II" or "PR II," indicating 75 deg C oil resistance.
d. Marked "Gasoline and Oil Resistant I" or "GR I," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 60 deg C.
e. Marked "Gasoline and Oil Resistant II" or "GR II," indicating suitable for exposure to gasoline at 23 deg C and exposure to mineral oil at 75 deg C.
f. Marked "VW-1," indicating compliance with special vertical flame test.
g. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
h. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

2.4 NONMETALLIC UNDERGROUND CONDUIT WITH CONDUCTORS

A. Nonmetallic Underground Conduit with Conductors, Type NUCC :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Blue Diamond Industries, LLC**]
b. [**Paige Electric Co, LP**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Blue Diamond Industries, LLC**]
b. [**Paige Electric Co, LP**]
c. [**Prysmian Cables and Systems; Prysmian Group North America**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

3. Description: A factory assembly of conductors or cables inside a nonmetallic, smooth-wall raceway with a circular cross section.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Type NUCC Conduit with Conductors: UL CCN QQRK, including UL 1990.

5. Standard Features:

a. Referenced Standard: Article 354 of NFPA 70.
b. Conduit Material: [**HDPE-40**][**HDPE-80**][**EPEC-B**].
c. Conduit Sizes: As indicated on the Drawings.
d. Preinstalled Conductors: Provide insulated conductors as indicated on the Drawings.

2.5 METALLIC SHEATHED CABLE

A. UL PJAZ - Metal-Clad Cable, Type MC :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**AFC Cable Systems; Atkore International**]
b. [**Alpha Wire; brand of Belden, Inc.**]
c. [**Belden Inc.**]
d. [**Cerro Wire LLC**]
e. [**Copperweld**]
f. [**Encore Wire Corporation**]
g. [**General Cable; Prysmian Group North America**]
h. [**Okonite Company (The)**]
i. [**Southwire Company, LLC**]
j. [**WESCO**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**AFC Cable Systems; Atkore International**]
b. [**Alpha Wire; brand of Belden, Inc.**]
c. [**Belden Inc.**]
d. [**Cerro Wire LLC**]
e. [**Copperweld**]
f. [**Encore Wire Corporation**]
g. [**General Cable; Prysmian Group North America**]
h. [**Okonite Company (The)**]
i. [**Southwire Company, LLC**]
j. [**WESCO**]
k. <**Insert manufacturer's name**>

3. Description: A factory assembly of one or more current-carrying insulated conductors in an overall metallic sheath.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Metal-Clad Cable: UL CCN PJAZ, including UL 1569.

5. Standard Features:

   a. Referenced Standard: Article 330 of NFPA 70.
   b. Circuits: [**Single circuit**][**and**][**multicircuit with color-coded conductors**].
   c. Conductors: [**Copper, complying with ASTM B3 for bare annealed copper and with ASTM B8 for stranded conductors**][**Aluminum, complying with ASTM B800 and ASTM B801**].
   d. Ground Conductor: [**Bare**][**Insulated**][**None**].
   e. Conductor Insulation:

      1) Type TFN/THHN/THWN-2. Comply with UL 83.
      2) Type XHHW-2. Comply with UL 44.
      3) <**Insert type and standard**>.

   f. Armor: [**Steel**][**Aluminum**], interlocked.
   g. Jacket: PVC applied over armor.

6. Other Available Features Required by the Project:

   a. Marked "MC-HL," indicating compliance with UL 2225 for use in hazardous (classified) locations.

B. UL AWEZ - Armored Cable, Type AC :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**AFC Cable Systems; Atkore International**]
   b. [**Alpha Wire; brand of Belden, Inc.**]
   c. [**Belden Inc.**]
   d. [**Encore Wire Corporation**]
   e. [**General Cable; Prysmian Group North America**]
   f. [**Okonite Company (The)**]

g. [**Southwire Company, LLC**]
h. [**WESCO**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**AFC Cable Systems; Atkore International**]
b. [**Alpha Wire; brand of Belden, Inc.**]
c. [**Belden Inc.**]
d. [**Encore Wire Corporation**]
e. [**General Cable; Prysmian Group North America**]
f. [**Okonite Company (The)**]
g. [**Southwire Company, LLC**]
h. [**WESCO**]
i. <**Insert manufacturer's name**>

3. Description: A factory assembly of insulated current-carrying conductors with or without an equipment grounding conductor in an overall metallic sheath.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Armored Cable: UL CCN AWEZ, including UL 4.

5. Standard Features:

a. Referenced Standard: Article 320 of NFPA 70.
b. Circuits: [**Single circuit**][**and**][**multicircuit with color-coded conductors**].
c. Conductors: [**Copper, complying with ASTM B3 for bare annealed copper and with ASTM B8 for stranded conductors**][**Aluminum, complying with ASTM B800 and ASTM B801**].
d. Ground Conductor: [**Bare**][**Insulated**][**None**].
e. Armor: [**Steel**][**Aluminum**], interlocked.

6. Other Available Features Required by the Project:

a. Marked "LS" or "For Use in Cable Trays," indicating compliance with UL 1685 flame and limited smoke test.

C. UL PPKV and FHJR - Fire-Resistant Mineral-Insulated Metal-Sheathed Cable, Type MI, for Use in Electrical Circuit Integrity Systems :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**PYROTENAX; brand of nVent Electrical plc**]
b. [**TEC International**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**PYROTENAX; brand of nVent Electrical plc**]
b. [**TEC International**]
c. <**Insert manufacturer's name**>

3. Description: Solid copper conductors encased in compressed metal oxide with an outer metallic sheath, rated 600 V or less.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Mineral-Insulated Metal-Sheathed Cable: UL CCN PPKV, including UL Subject 504.
b. Circuit Integrity: UL CCN FHJR, including UL 2196.

5. Standard Features:

a. Referenced Standard: Article 332 of NFPA 70.
b. Fire-Resistance Rating: [**1 h**][**2 h**].
c. Conductors: Copper, complying with ASTM B3 for bare annealed copper.
d. Insulation: [**Compressed magnesium oxide**]<**Insert material**>.
e. Sheath: [**Copper**]<**Insert material**>.

D. UL PJAZ and FHJR - Fire-Resistant Metal-Clad Cable, Type MC, for Use in Electrical Circuit Integrity Systems :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company**]
b. [**Prysmian Cables and Systems; Prysmian Group North America**]
c. <**Insert manufacturer's name**>

3. Description: A factory assembly of one or more current-carrying insulated conductors in an overall metallic sheath.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Metal-Clad Cable: UL CCN PJAZ, including UL 1569.
b. Circuit Integrity: UL CCN FHJR, including UL 2196.

5. Standard Features:

a. Referenced Standard: Article 330 of NFPA 70.

b. Fire-Resistance Rating: [**1 h**][**2 h**].
c. Circuits: [**Single circuit**][**and**][**multicircuit with color-coded conductors**].
d. Conductors: [**Copper**][**Copper-clad aluminum**].
e. Ground Conductor: [**Bare**][**Insulated**][**None**].
f. Armor: [**Steel**][**Aluminum**], interlocked.
g. Jacket: PVC applied over armor.

6. Other Available Features Required by the Project:

a. Marked "MC-HL," indicating compliance with UL 2225 for use in hazardous (classified) locations.

2.6 PHOTOVOLTAIC SINGLE-CONDUCTOR CABLE

A. Photovoltaic Single-Conductor Cable, Type PV :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Copperweld**]
b. [**Encore Wire Corporation**]
c. [**General Cable; Prysmian Group North America**]
d. [**Service Wire Co.**]
e. [**Southwire Company, LLC**]
f. [**WESCO**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Copperweld**]
b. [**Encore Wire Corporation**]
c. [**General Cable; Prysmian Group North America**]
d. [**Service Wire Co.**]
e. [**Southwire Company, LLC**]
f. [**WESCO**]
g. <**Insert manufacturer's name**>

3. Description: Flexible, insulated and uninsulated, drawn-copper current-carrying conductor with an overall insulation layer or jacket, or both, rated [**2000**][**600**] V.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Photovoltaic Wire: UL CCN ZKLA, including UL 4703.

5. Standard Features:

a. Referenced Standard: Article 609 of NFPA 70.
b. Conductors: Copper, complying with ASTM B3 for bare annealed copper and with ASTM B8 for stranded conductors.

2.7 NONMETALLIC JACKETED CABLE

A. UL PWVX - Nonmetallic-Sheathed Cable, Type NM-B and Type NMC-B :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Copperweld**]
    d. [**Encore Wire Corporation**]
    e. [**Prysmian Cables and Systems; Prysmian Group North America**]
    f. [**Republic Wire Inc.**]
    g. [**Southwire Company, LLC**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Copperweld**]
    d. [**Encore Wire Corporation**]
    e. [**Prysmian Cables and Systems; Prysmian Group North America**]
    f. [**Republic Wire Inc.**]
    g. [**Southwire Company, LLC**]
    h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Type NM-B and Type NMC-B Cables: UL CCN PWVX, including UL 719.

4. Standard Features:

    a. Referenced Standard: Article 334 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: Individual conductors are rated 90 deg C for multiple conductor ampacity calculations; however, final cable ampacity rating must not exceed value for 60 deg C in Table 310.15(C)(1) of NFPA 70.
    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
    e. Conductor Size:[**As indicated on the Drawings.**]

        1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

    f. Cable Covering:

        1) Type NM-B: Flame retardant and moisture resistant.
        2) Type NMC-B: Flame retardant, moisture resistant, fungus resistant, and corrosion resistant.

B. UL YDUX - Underground Feeder and Branch-Circuit Cable, Type UF and Type UF-B :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**AFC Cable Systems; Atkore International**]
   b. [**Belden Inc.**]
   c. [**Cerro Wire LLC**]
   d. [**Copperweld**]
   e. [**Encore Wire Corporation**]
   f. [**Prysmian Cables and Systems; Prysmian Group North America**]
   g. [**Republic Wire Inc.**]
   h. [**Southwire Company, LLC**]
   i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**AFC Cable Systems; Atkore International**]
   b. [**Belden Inc.**]
   c. [**Cerro Wire LLC**]
   d. [**Copperweld**]
   e. [**Encore Wire Corporation**]
   f. [**Prysmian Cables and Systems; Prysmian Group North America**]
   g. [**Republic Wire Inc.**]
   h. [**Southwire Company, LLC**]
   i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Type UF and Type UF-B Cables: UL CCN YDUX, including UL 493.

4. Standard Features:

   a. Referenced Standard: Article 340 of NFPA 70.
   b. Insulation Voltage Rating: 600 V.
   c. Insulation Temperature Rating:

      1) Type UF: 60 deg C.
      2) Type UF-B: Individual conductors are rated 90 deg C for multiple conductor ampacity calculations; however, final cable ampacity rating must not exceed value for 60 deg C in Table 310.15(C)(1) of NFPA 70.

   d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
   e. Conductor Size:[**As indicated on the Drawings.**]

      1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

   f. Cable Covering: Flame retardant, moisture resistant, fungus resistant, corrosion resistant, and suitable for direct burial in the earth.

C. UL TYLZ - Service-Entrance Cable, Type SE, Type USE, and Type USE-2 :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Encore Wire Corporation**]
    d. [**Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Republic Wire Inc.**]
    h. [**Southwire Company, LLC**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Belden Inc.**]
    b. [**Cerro Wire LLC**]
    c. [**Encore Wire Corporation**]
    d. [**Marmon Industrial Energy & Infrastructure; division of Marmon Electrical; a Berkshire Hathaway company**]
    e. [**Okonite Company (The)**]
    f. [**Prysmian Cables and Systems; Prysmian Group North America**]
    g. [**Republic Wire Inc.**]
    h. [**Southwire Company, LLC**]
    i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Service-Entrance Cable: UL CCN TYLZ, including UL 854.

4. Standard Features:

    a. Referenced Standard: Article 338 of NFPA 70.
    b. Insulation Voltage Rating: 600 V.
    c. Insulation Temperature Rating: Not in excess of rating for insulation type specified below:

        1) Type THWN: 75 deg C, dry and wet locations.
        2) Type THWN-2: 90 deg C, dry and wet locations.
        3) Type RHW: 75 deg C, dry and wet locations.
        4) Type XHHW: 90 deg C, dry and damp locations; 75 deg C, wet locations.
        5) Type RHW-2: 90 deg C, dry and wet locations.
        6) Type XHHW-2: 90 deg C, dry and wet locations.

    d. Conductor Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
    e. Conductor Size:[**As indicated on the Drawings.**]

1) Minimum Conductor Size: [**14 AWG**][**12 AWG**][**10 AWG**].

5. Other Available Features Required by the Project:

a. Marked "Style R," indicating that cable assembly includes uninsulated equipment ground conductor with insulated conductors.
b. Marked "Style U," indicating that cable assembly includes uninsulated equipment ground conductor helically wrapped over insulated conductors.
c. Marked "-HF," indicating that combustible materials are halogen-free when tested in accordance with UL Subject 2885.

1) Marked "-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

D. UL QPOR - Power and Control Tray Cable, Type TC :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Encore Wire Corporation**]
d. [**General Cable; Prysmian Group North America**]
e. [**Okonite Company (The)**]
f. [**Southwire Company, LLC**]
g. [**WESCO**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Alpha Wire; brand of Belden, Inc.**]
b. [**Belden Inc.**]
c. [**Encore Wire Corporation**]
d. [**General Cable; Prysmian Group North America**]
e. [**Okonite Company (The)**]
f. [**Southwire Company, LLC**]
g. [**WESCO**]
h. <**Insert manufacturer's name**>

3. Description: A factory assembly of insulated current-carrying conductors with or without an equipment grounding conductor in a nonmetallic jacket.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Power and Control Tray Cable: UL CCN QPOR, including UL 1277.

5. Standard Features:

a. Comply with NEMA WC 57/ICEA S-73-532 for Type TC cables used for control, thermocouple extension, and instrumentation.
b. Comply with NEMA WC 70/ICEA S-95-658 for Type TC cables used for power distribution.

c. Conductors: [**Copper**][**Aluminum**][**Copper-clad aluminum**].
d. Ground Conductor: [**Bare**][**Insulated**][**None**].
e. Conductor Insulation: Type XHHW-2. Comply with UL 44.

6. Other Available Features Required by the Project:

a. Marked "TC-ER," indicating that cable is designed for use with ASDs, with oversized crosslinked polyethylene insulation, [**spiral-wrapped foil plus 85 percent coverage braided shields and insulated full-size ground wire**][**dual spirally wrapped copper tape shields and three bare symmetrically applied ground wires**], and sunlight- and oil-resistant outer PVC jacket.

1) Marked "TC-ER-JP," indicating that cable is also suitable for pulling through structural members in accordance with Article 336.10(9) of NFPA 70.
2) Marked "TC-ER-HL," indicating that cable is also suitable for use in hazardous (classified) environments.

b. Marked "ST1," indicating compliance with UL 1685 flame and smoke test.
c. Marked "ST1-HF," indicating that combustible materials are halogen-free in accordance with UL Subject 2885.

1) Marked "ST1-LSHF," indicating that combustible materials are low smoke when also tested in accordance with IEC 61034-2.

2.8 CONNECTORS AND SPLICES

A. UL PJOX - Armored and Metal-Clad Cable Fittings :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Installation Products**]
b. [**Adalet; division of Scott Fetzer Co.**]
c. [**American Fittings Corp. (AMFICO)**]
d. [**Arlington Industries, Inc.**]
e. [**Bridgeport Fittings Inc.**]
f. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
g. [**Halex; division of Scott Fetzer Co.**]
h. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
i. [**O-Z/Gedney; brand of Appleton Group**]
j. [**Service Wire Co.**]
k. [**SIGMA Engineered Solutions**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Installation Products**]
b. [**Adalet; division of Scott Fetzer Co.**]
c. [**American Fittings Corp. (AMFICO)**]
d. [**Arlington Industries, Inc.**]

e. [**Bridgeport Fittings Inc.**]
f. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
g. [**Halex; division of Scott Fetzer Co.**]
h. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
i. [**O-Z/Gedney; brand of Appleton Group**]
j. [**Service Wire Co.**]
k. [**SIGMA Engineered Solutions**]
l. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Type AC and Type MC Cable Connectors: UL CCN PJOX, including UL 514B.

4. Standard Features: For steel and aluminum sheathed cables, designed to connect conductors specified in this Section.

B. UL PPYT - Mineral-Insulated Metallic-Sheathed Cable Fittings :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**TEC International**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**TEC International**]
   b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Type MI Cable Fittings: UL CCN PPYT, including UL 514B.

4. Standard Features: For copper sheathed cables, designed to connect conductors specified in this Section.

C. UL ZMVV - Wire Connectors and Soldering Lugs :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Installation Products**]
   b. [**Amphenol TPC Wire & Cable**]
   c. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   d. [**Eaton**]
   e. [**Fastenal Co.**]

f. [**Gardner Bender; brand of ECM Industries LLC; division of nVent Electric plc**]
g. [**Hillsdale Terminal**]
h. [**Ideal Industries, Inc.**]
i. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
j. [**Marinco Power Products**]
k. [**Morris Products Inc.**]
l. [**Newark; an Avnet Company**]
m. [**Panduit Corp**]
n. [**Penn-Union Corp.; subsidiary of Nesco, Inc.**]
o. [**TE Connectivity Ltd.**]
p. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Installation Products**]
b. [**Amphenol TPC Wire & Cable**]
c. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**Eaton**]
e. [**Fastenal Co.**]
f. [**Gardner Bender; brand of ECM Industries LLC; division of nVent Electric plc**]
g. [**Hillsdale Terminal**]
h. [**Ideal Industries, Inc.**]
i. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
j. [**Marinco Power Products**]
k. [**Morris Products Inc.**]
l. [**Newark; an Avnet Company**]
m. [**Panduit Corp**]
n. [**Penn-Union Corp.; subsidiary of Nesco, Inc.**]
o. [**TE Connectivity Ltd.**]
p. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Wire Connectors and Soldering Lugs: UL CCN ZMVV, including UL 486A-486B or UL 486C.

4. Standard Features:

a. One piece, seamless, designed to terminate conductors specified in this Section.
b. Material: [**Copper**][**Aluminum**][**Bronze**].
c. Type: [**One**][**Two**] hole with [**standard**][**long**] barrels.
d. Termination: [**Compression**][**Crimp**].

PART 3 - EXECUTION

3.1 CONDUCTOR MATERIAL APPLICATIONS

A. Feeders:

1. Copper; solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.
2. Copper for feeders smaller than No. 4 AWG; copper, aluminum, or copper-clad aluminum for feeders No. 4 AWG and larger. Conductors must be solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.

B. Branch Circuits:

1. Material: [**Copper**][**Aluminum**][**Copper-clad aluminum**].

a. Solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.
b. Solid for No. 12 AWG and smaller; stranded for No. 10 AWG and larger.

C. ASD Output Circuits Cable: Extra-flexible stranded for all sizes.

D. PV Circuits: [**Copper**][**Aluminum**][**Copper-clad aluminum**]; Solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.

3.2 CONDUCTOR INSULATION AND MULTICONDUCTOR CABLE APPLICATIONS AND WIRING METHODS

A. Service Entrance: [**Type THHN/THWN-2, single conductors in raceway**][**Type XHHW-2, single conductors in raceway**][**Type USE, single conductor in raceway**][**Mineral-insulated, metal-sheathed cable, Type MI**][**Multiconductor cable, Type SE**].

B. Exposed Feeders: [**Type THHN/THWN-2, single conductors in raceway**][**Type XHHW-2, single conductors in raceway**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**][**Nonmetallic-sheathed cable, Type NM**].

C. Feeders Concealed in Ceilings, Walls, Partitions, and Crawlspaces: [**Type THHN/THWN-2, single conductors in raceway**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**][**Nonmetallic-sheathed cable, Type NM**].

D. Feeders Concealed in Concrete, below Slabs-on-Grade, and Underground: [**Type THHN/THWN-2, single conductors in raceway**][**Type XHHW-2, single conductors in raceway**][**Underground feeder cable, Type UF**].

E. Feeders Installed below Raised Flooring: [**Type THHN/THWN-2, single conductors in raceway**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**].

F. Feeders in Cable Tray: [**Type THHN/THWN-2, single conductors in raceway**][**Type XHHW-2, single conductors larger than No. 1/0 AWG**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**][**Nonmetallic-sheathed cable, Type NM**].

G. Exposed Branch Circuits, Including in Crawlspaces: [**Type THHN/THWN-2, single conductors in raceway**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**][**Nonmetallic-sheathed cable, Type NM**].

H. Branch Circuits Concealed in Ceilings, Walls, and Partitions: [**Type THHN/THWN-2, single conductors in raceway**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**][**Nonmetallic-sheathed cable, Type NM**].

I. Branch Circuits Concealed in Concrete, below Slabs-on-Grade, and Underground: [**Type THHN/THWN-2, single conductors in raceway**][**Type XHHW-2, single conductors in raceway**][**Underground branch-circuit cable, Type UF**].

J. Branch Circuits Installed below Raised Flooring: [**Type THHN/THWN-2, single conductors in raceway**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**].

K. Branch Circuits in Cable Tray: [**Type THHN/THWN-2, single conductors in raceway**][**Type XHHW-2, single conductors larger than No. 1/0 AWG**][**Armored cable, Type AC**][**Metal-clad cable, Type MC**][**Mineral-insulated, metal-sheathed cable, Type MI**][**Nonmetallic-sheathed cable, Type NM**].

L. Cord Drops and Portable Appliance Connections: Type SO, hard service cord with stainless steel, wire-mesh, strain relief device at terminations to suit application.

M. ASD Output Circuits: [**Type XHHW-2 in metal conduit**][**Type TC-ER cable with braided shield**][**Type TC-ER cable with dual tape shield**].

N. PV Circuits, Type USE-2: For PV source circuits rated at 600 V or less.

O. PV Circuits, Type PV: For PV source circuits rated at [**600**][**1000**][**2000**] V.

3.3 INSTALLATION OF LOW-VOLTAGE ELECTRICAL POWER CONDUCTORS AND CABLES

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Maintenance: NFPA 70B.
3. Electrical Safety: NFPA 70E.
4. Temporary Electric Power Work: NECA NEIS 200.
5. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
6. Work in Confined Spaces: NFPA 350.
7. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
8. Installation of Type AC and Type MC Cables: NECA NEIS 120.
9. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Conceal cables in finished walls, ceilings, and floors unless otherwise indicated.
2. Complete raceway installation between conductor and cable termination points prior to pulling conductors and cables.
3. Use manufacturer-approved pulling compound or lubricant where necessary; compound used must not deteriorate conductor or insulation. Do not exceed manufacturer's recommended maximum pulling tensions and sidewall pressure values.
4. Use pulling means, including fish tape, cable, rope, and basket-weave wire/cable grips, that will not damage cables or raceway.
5. Install exposed cables parallel and perpendicular to surfaces of exposed structural members, and follow surface contours where possible.
6. Provide support for cables.
7. Complete cable tray systems installation prior to installing conductors and cables.
8. Connections:

    a. Tighten electrical connectors and terminals in accordance with manufacturer's published torque-tightening values. If manufacturer's torque values are not indicated, use those specified in UL 486A-486B.

b. Make splices, terminations, and taps that are compatible with conductor material[**and that possess equivalent or better mechanical strength and insulation ratings than unspliced conductors**].

1) Use oxide inhibitor in each splice, termination, and tap for aluminum conductors.

9. Wiring at Outlets: Install conductor at each outlet, with at least [**6 inch (150 mm)**][**12 inch (300 mm)**] of slack.

D. Interfaces with Other Work:

1. Identification:

a. Identify and color-code conductors and cables.
b. Identify each spare conductor at each end with identity number and location of other end of conductor, and identify as spare conductor.

2. Sleeves and Sleeve Seals: Install sleeves and sleeve seals at penetrations of exterior floor and wall assemblies.
3. Firestopping: Apply firestopping to electrical penetrations of fire-rated floor and wall assemblies to restore original fire-resistance rating of assembly.

3.4 FIELD QUALITY CONTROL

A. Administrant for Electrical Power Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Acceptance Testing Preparation:

1. <**Insert requirements**>.

C. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

D. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. After installing conductors and cables and before electrical circuitry has been energized, test service entrance and feeder conductors for compliance with requirements.
3. After installing conductors and cables and before electrical circuitry has been energized, test [**service entrance and feeder conductors**][**and**][**conductors**] feeding the following critical equipment and services for compliance with requirements:

a. <**Insert, in separate subparagraphs, critical equipment and services to be tested**>.

4. Perform each of the following visual and electrical tests:

a. Inspect exposed sections of conductor and cable for physical damage and correct connection in accordance with the single-line diagram.
b. Test bolted connections for high resistance using one or more of the following:

1) A low-resistance ohmmeter.
2) Calibrated torque wrench.
3) Thermographic survey.

c. Inspect compression-applied connectors for correct cable match and indentation.
d. Inspect for correct identification.
e. Inspect cable jacket and condition.
f. Insulation-resistance test on each conductor for ground and adjacent conductors. Apply a potential of 500 V(dc) for 300 V rated cable and 1000 V(dc) for 600 V rated cable for a one-minute duration.
g. Continuity test on each conductor and cable.
h. Uniform resistance of parallel conductors.

E. Nonconforming Work:

1. Wire or cable assembly will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.5 MAINTENANCE

A. Infrared Scanning of Splices: Two months after Substantial Completion, perform infrared scan of splices, joints, and connections in conductors 3 AWG and larger. Remove covers so splices, joints, and connections are accessible to portable scanner. Take visible light photographs at same locations and orientations as infrared scans for documentation to ensure follow-on scans match same conditions for valid comparison. Correct deficiencies determined during the scan.

1. Follow-On Infrared Scanning: Perform follow-up infrared scan of splices at 11 months after Substantial Completion.
2. Instrument: Use infrared-scanning device designed to measure temperature or to detect significant deviations from normal values. Provide documentation of device calibration.
3. Field Reports for Infrared Scanning: Prepare certified report that identifies cables splices checked and that describes scanning results. Include notation of deficiencies detected, remedial actions taken, and scanning observations after remedial action.

END OF SECTION 26 05 19 00

Task	Specification	Specification Description
26 05 19 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 19 13	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 19 13	26 05 39 00	Underfloor Raceways For Electrical Systems
26 05 19 13	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 19 16	26 05 13 00	Medium-Voltage Cables
26 05 19 16	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 19 16	26 05 23 00	Control-Voltage Electrical Power Cables
26 05 19 16	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 19 16	27 11 00 00	Communications Equipment Room Fittings
26 05 19 16	27 13 13 00	Communications Copper Backbone Cabling
26 05 19 16	27 15 33 00	Communications Coaxial Horizontal Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 23 00 - CONTROL-VOLTAGE ELECTRICAL POWER CABLES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Backboards.
2. Category 5e balanced twisted pair cable.
3. Category 6 balanced twisted pair cable.
4. Category 6a balanced twisted pair cable.
5. Balanced twisted pair cable hardware.
6. Twin-axial data highway cable.
7. RS-232 cable.
8. RS-485 cable.
9. Control cable.
10. Control-circuit conductors.
11. Fire-alarm wire and cable.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 ACTION SUBMITTALS

A. Product Data:

1. Backboards.
2. Category 5e balanced twisted pair cable.
3. Category 6 balanced twisted pair cable.
4. Category 6a balanced twisted pair cable.
5. Balanced twisted pair cable hardware.
6. Twin-axial data highway cable.
7. RS-232 cable.
8. RS-485 cable.
9. Control cable.
10. Control-circuit conductors.
11. Fire-alarm wire and cable.

B. Sustainable Design Submittals:

1. Product Data: For each conductor and cable indicating lead content.
2. Environmental Product Declaration: For each product.
3. Health Product Declaration: For each product.
4. Sourcing of Raw Materials: Corporate sustainability report for each manufacturer.
5. Environmental Product Declaration: For each product.
6. Environmental Product Declaration: For each product.

7. Environmental Product Declaration: For each product.
8. Third-Party Certifications: For each product.
9. Third-Party Certified Life Cycle Assessment: For each product.

1.3 INFORMATIONAL SUBMITTALS

A. Source quality-control reports.

B. Field quality-control reports.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

B. Flame Travel and Smoke Density in Plenums: As determined by testing identical products according to NFPA 262, by a qualified testing agency. Identify products for installation in plenums with appropriate markings of applicable testing agency.

1. Flame Travel Distance: **60 inch (1520 mm)** or less.
2. Peak Optical Smoke Density: 0.5 or less.
3. Average Optical Smoke Density: 0.15 or less.

C. Flame Travel and Smoke Density for Riser Cables in Non-Plenum Building Spaces: As determined by testing identical products according to UL 1666.

D. Flame Travel and Smoke Density for Cables in Non-Riser Applications and Non-Plenum Building Spaces: As determined by testing identical products according to UL 1685.

2.2 BACKBOARDS

A. Description: Plywood, [**fire-retardant treated,**]**3/4 by 48 by 96 inch (19 by 1220 by 2440 mm)**. Comply with requirements for plywood backing panels in Section 061000 "Rough Carpentry."

B. Painting: Paint plywood on all sides and edges with [**flat**][**eggshell**][**black**]<**Insert color**>[**latex**][**alkyd**] paint. Comply with requirements in Section 099123 "Interior Painting."

1. Lead Content: Less than 300 parts per million.

2.3 CATEGORY 5e BALANCED TWISTED PAIR CABLE

A. Description: Four-pair, balanced-twisted pair cable, certified to meet transmission characteristics of Category 5e cable at frequencies up to 100 MHz.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
2. [**Belden Inc.**]
3. [**Berk-Tek, a Leviton Company**]
4. [**CommScope, Inc**]
5. [**General Cable; Prysmian Group North America**]
6. [**Hitachi Cable America Inc.**]
7. [**Mohawk; a division of Belden Networking, Inc.**]
8. [**West Penn Wire; brand of Belden, Inc.**]
9. <**Insert manufacturer's name**>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
2. [**Belden Inc.**]
3. [**Berk-Tek, a Leviton Company**]
4. [**CommScope, Inc**]
5. [**General Cable; Prysmian Group North America**]
6. [**Hitachi Cable America Inc.**]
7. [**Mohawk; a division of Belden Networking, Inc.**]
8. [**West Penn Wire; brand of Belden, Inc.**]
9. <**Insert manufacturer's name**>

D. Standard: Comply with ICEA S-90-661, NEMA WC 63.1, and TIA-568-C.2 for Category 5e cables.

E. Conductors: 100 ohm, No. 24 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

F. Shielding/Screening: [**Unshielded twisted pairs (UTP)**][**Shielded twisted pairs (FTP)**][**Screened twisted pairs (F/UTP)**][**Screened and shielded twisted pairs (F/FTP)**].

G. Cable Rating: [**Riser**][**Plenum**].

H. Jacket: [**White**][**Gray**]<**Insert color**> thermoplastic.

2.4 CATEGORY 6 BALANCED TWISTED PAIR CABLE

A. Description: Four-pair, balanced-twisted pair cable,[**with internal spline,**] certified to meet transmission characteristics of Category 6 cable at frequencies up to 250 MHz.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
3. [**Belden Inc.**]
4. [**Berk-Tek, a Leviton Company**]
5. [**CommScope, Inc**]
6. [**General Cable; Prysmian Group North America**]
7. [**Genesis; Resideo Technologies, Inc.**]
8. [**Hitachi Cable America Inc.**]
9. [**Mohawk; a division of Belden Networking, Inc.**]
10. [**Prysmian Cables and Systems; Prysmian Group North America**]

11. [**Superior Essex Inc.; subsidiary of LS Corp.**]
12. <**Insert manufacturer's name**>

C. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**3M**]
2. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
3. [**Belden Inc.**]
4. [**Berk-Tek, a Leviton Company**]
5. [**CommScope, Inc**]
6. [**General Cable; Prysmian Group North America**]
7. [**Genesis; Resideo Technologies, Inc.**]
8. [**Hitachi Cable America Inc.**]
9. [**Mohawk; a division of Belden Networking, Inc.**]
10. [**Prysmian Cables and Systems; Prysmian Group North America**]
11. [**Superior Essex Inc.; subsidiary of LS Corp.**]
12. <**Insert manufacturer's name**>

D. Standard: Comply with NEMA WC 66/ICEA S-116-732 and TIA-568-C.2 for Category 6 cables.

E. Conductors: 100 ohm, No. 23 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

F. Shielding/Screening: [**Unshielded twisted pairs (UTP)**][**Shielded twisted pairs (FTP)**][**Screened twisted pairs (F/UTP)**][**Screened and shielded twisted pairs (F/FTP)**].

G. Cable Rating: [**Riser**][**Plenum**].

H. Jacket: [**White**][**Gray**][**Blue**][**Yellow**]<**Insert color**> thermoplastic.

2.5 CATEGORY 6a BALANCED TWISTED PAIR CABLE

A. Description: Four-pair, balanced-twisted pair cable,[**with internal spline,**] certified to meet transmission characteristics of Category 6a cable at frequencies up to 500 MHz.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
3. [**Belden Inc.**]
4. [**Berk-Tek, a Leviton Company**]
5. [**CommScope, Inc**]
6. [**General Cable; Prysmian Group North America**]
7. [**Genesis; Resideo Technologies, Inc.**]
8. [**Hitachi Cable America Inc.**]
9. [**Mohawk; a division of Belden Networking, Inc.**]
10. [**Prysmian Cables and Systems; Prysmian Group North America**]
11. [**Superior Essex Inc.; subsidiary of LS Corp.**]
12. <**Insert manufacturer's name**>

C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [**3M**]
2. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
3. [**Belden Inc.**]
4. [**Berk-Tek, a Leviton Company**]
5. [**CommScope, Inc**]
6. [**General Cable; Prysmian Group North America**]
7. [**Genesis; Resideo Technologies, Inc.**]
8. [**Hitachi Cable America Inc.**]
9. [**Mohawk; a division of Belden Networking, Inc.**]
10. [**Prysmian Cables and Systems; Prysmian Group North America**]
11. [**Superior Essex Inc.; subsidiary of LS Corp.**]
12. **<Insert manufacturer's name>**

D. Standard: Comply with TIA-568-C.2 for Category 6a cables.

E. Conductors: 100 ohm, No. 23 AWG solid copper.

1. Lead Content: Less than 300 parts per million.

F. Shielding/Screening: [**Unshielded twisted pairs (UTP)**][**Shielded twisted pairs (FTP)**][**Screened twisted pairs (F/UTP)**][**Screened and shielded twisted pairs (F/FTP)**].

G. Cable Rating: [**Riser**][**Plenum**].

H. Jacket: [**White**][**Gray**][**Blue**][**Yellow**]<**Insert color**> thermoplastic.

2.6 BALANCED TWISTED PAIR CABLE HARDWARE

A. Description: Hardware designed to connect, splice, and terminate balanced twisted pair copper communications cable.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**3M**]
2. [**American Technology Systems Industries, Inc**]
3. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
4. [**Belden Inc.**]
5. [**Berk-Tek, a Leviton Company**]
6. [**CommScope, Inc**]
7. [**Dynacom Corporation**]
8. [**General Cable; Prysmian Group North America**]
9. [**Genesis; Resideo Technologies, Inc.**]
10. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
11. [**Leviton Manufacturing Co., Inc.**]
12. [**Mohawk; a division of Belden Networking, Inc.**]
13. [**Molex Premise Networks**]
14. [**Panduit Corp**]
15. [**Prysmian Cables and Systems; Prysmian Group North America**]
16. [**Siemon Co. (The)**]
17. [**Superior Essex Inc.; subsidiary of LS Corp.**]

18. **<Insert manufacturer's name>**

C. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [**3M**]
2. [**American Technology Systems Industries, Inc**]
3. [**AMP NETCONNECT; a TE Connectivity Ltd. company**]
4. [**Belden Inc.**]
5. [**Berk-Tek, a Leviton Company**]
6. [**CommScope, Inc**]
7. [**Dynacom Corporation**]
8. [**General Cable; Prysmian Group North America**]
9. [**Genesis; Resideo Technologies, Inc.**]
10. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
11. [**Leviton Manufacturing Co., Inc.**]
12. [**Mohawk; a division of Belden Networking, Inc.**]
13. [**Molex Premise Networks**]
14. [**Panduit Corp**]
15. [**Prysmian Cables and Systems; Prysmian Group North America**]
16. [**Siemon Co. (The)**]
17. [**Superior Essex Inc.; subsidiary of LS Corp.**]
18. **<Insert manufacturer's name>**

D. General Requirements for Balanced Twisted Pair Cable Hardware:

1. Comply with the performance requirements of [**Category 5e**][**Category 6**][**Category 6a**][**Category 7**].
2. Comply with TIA-568-C.2, IDC type, with modules designed for punch-down caps or tools.
3. Cables must be terminated with connecting hardware of same category or higher.

E. Source Limitations: [**Obtain balanced twisted pair cable hardware from single source from single manufacturer**][**Obtain balanced twisted pair cable hardware from same manufacturer as balanced twisted pair cable, from single source**].

F. Connecting Blocks: [**110-style IDC for Category 5e**][**110-style IDC for Category 6**][**66-style IDC for Category 5e**]. Provide blocks for the number of cables terminated on the block, plus [**25**]**<Insert number>** percent spare, integral with connector bodies, including plugs and jacks where indicated.

G. Cross-Connect: Modular array of connecting blocks arranged to terminate building cables and permit interconnection between cables.

1. Number of Terminals per Field: [**One**]**<Insert number>** for each conductor in assigned cables.

H. Patch Panel: Modular panels housing numbered jack units with IDC-type connectors at each jack location for permanent termination of pair groups of installed cables.

1. Features:

a. Universal T568A and T568B wiring labels.
b. Labeling areas adjacent to conductors.
c. Replaceable connectors.
d. 24 or 48 ports.

2. Construction: 16-gauge steel and mountable on **19 inch (483 mm)** equipment racks.

3. Number of Jacks per Field: One for each four-pair [**cable indicated**][**conductor group of indicated cables, plus spares and blank positions adequate to suit specified expansion criteria**].

I. Patch Cords: Factory-made, four-pair cables in [**36 inch (900 mm)**][**48 inch (1200 mm)**]<**Insert length**>lengths; terminated with an eight-position modular plug at each end.

1. Patch cords must have bend-relief-compliant boots and color-coded icons to ensure performance. Patch cords must have latch guards to protect against snagging.
2. Patch cords must have color-coded boots for circuit identification.

J. Plugs and Plug Assemblies:

1. Male; eight position; color-coded modular telecommunications connector designed for termination of a single four-pair 100 ohm unshielded or shielded balanced twisted pair cable.
2. Comply with IEC 60603-7-1, IEC 60603-7-2, IEC 60603-7-3, IEC 60603-7-4, and IEC 60603-7.5.
3. Marked to indicate transmission performance.

K. Jacks and Jack Assemblies:

1. Female; eight position; modular; fixed telecommunications connector designed for termination of a single four-pair 100 ohm unshielded or shielded balanced twisted pair cable.
2. Designed to snap-in to a patch panel or faceplate.
3. Standards:

    a. Category 5e, unshielded balanced twisted pair cable must comply with IEC 60603-7-2.
    b. Category 5e, shielded balanced twisted pair cable must comply with IEC 60603-7-3.
    c. Category 6, unshielded balanced twisted pair cable must comply with IEC 60603-7-4.
    d. Category 6, shielded balanced twisted pair cable must comply with IEC 60603-7.5.
    e. Category 6a, unshielded balanced twisted pair cable must comply with IEC 60603-7-41.
    f. Category 6a, shielded balanced twisted pair cable must comply with IEC 60603-7.51.

4. Marked to indicate transmission performance.

L. Faceplate:

1. [**Two**][**Four**][**Six**] port, vertical single-gang faceplates designed to mount to single-gang wall boxes.
2. [**Eight**][**10**][**12**] port, vertical double-gang faceplates designed to mount to double-gang wall boxes.
3. Plastic Faceplate: High-impact plastic. Coordinate color with Section 260533.16 "Boxes and Covers for Electrical Systems."
4. Metal Faceplate: [**Stainless steel**][**Brass**]<**Insert description**>, complying with requirements in Section 260533.16 "Boxes and Covers for Electrical Systems."
5. For use with snap-in jacks accommodating any combination of balanced twisted pair, optical fiber, and coaxial work area cords.

    a. Flush mounting jacks, positioning the cord at a 45-degree angle.

M. Legend:

1. Machine printed, in the field, using adhesive-tape label.
2. Snap-in, clear-label covers and machine-printed paper inserts.

2.7 TWIN-AXIAL DATA HIGHWAY CABLE

A. Standard Cable: NFPA 70, Type CM.

1. Paired, <**Insert number**> pairs, [**No. 20**][**No. 22**][**No. 24**] AWG, stranded [**(7x28)**][**(7x30)**][**(7x32)**] tinned-copper conductors.
2. Polypropylene insulation.
3. Individual aluminum foil-polyester tape shielded pairs with 100 percent shield coverage.
4. PVC jacket.
5. Pairs are cabled on common axis with No. 24 AWG, stranded (7x32) tinned-copper drain wire.
6. Flame Resistance: Comply with UL 1685.
7. Lead Content: Less than 300 parts per million.

B. Plenum-Rated Cable: NFPA 70, Type CMP.

1. Paired, <**Insert number**> pairs, [**No. 20**][**No. 22**][**No. 24**] AWG, stranded [**(7x28)**][**(7x30)**][**(7x32)**] tinned-copper conductors.
2. Plastic insulation.
3. Individual aluminum foil-polyester tape shielded pairs with 100 percent shield coverage.
4. Plastic jacket.
5. Pairs are cabled on common axis with No. 24 AWG, stranded (7x32) tinned-copper drain wire.
6. Flame Resistance: Comply with NFPA 262.
7. Lead Content: Less than 300 parts per million.

2.8 RS-232 CABLE

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Allied Wire & Cable Inc.**]
2. [**Belden Inc.**]
3. [**General Cable; Prysmian Group North America**]
4. [**Genesis; Resideo Technologies, Inc.**]
5. [**Southwire Company, LLC**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Allied Wire & Cable Inc.**]
2. [**Belden Inc.**]
3. [**General Cable; Prysmian Group North America**]
4. [**Genesis; Resideo Technologies, Inc.**]
5. [**Southwire Company, LLC**]
6. <**Insert manufacturer's name**>

C. PVC-Jacketed, TIA 232-F:

1. [**Three**][**Nine**], No. 22 AWG, stranded (7x30) tinned copper conductors.
2. Lead Content: Less than 300 parts per million.
3. Polypropylene insulation.
4. Aluminum foil-polyester tape shield with 100 percent shield coverage.
5. PVC jacket.

6. Conductors are cabled on common axis with No. 24 AWG, stranded (7x32) tinned copper drain wire.
7. NFPA 70 Type: Type CM.
8. Flame Resistance: Comply with UL 1581.

D. Plenum-Type, TIA 232-F:

1. [**Three**][**Nine**], No. 22 AWG, stranded (7x30) tinned copper conductors.
2. Lead Content: Less than 300 parts per million.
3. PE insulation.
4. Aluminum foil-polyester tape shield with 100 percent shield coverage.
5. Fluorinated ethylene propylene jacket.
6. Conductors are cabled on common axis with No. 24 AWG, stranded (7x32) tinned copper drain wire.
7. Flame Resistance: Comply with NFPA 262.

2.9 RS-485 CABLE

A. Standard Cable: NFPA 70, Type CMG.

1. Paired, [**one pair**][**two pairs**], twisted, No. 22 AWG, stranded (7x30) tinned-copper conductors.
2. PVC insulation.
3. Unshielded.
4. PVC jacket.
5. Flame Resistance: Comply with UL 1685.
6. Lead Content: Less than 300 parts per million.

B. Plenum-Rated Cable: NFPA 70, Type CMP.

1. Paired, [**one pair**][**two pairs**], No. 22 AWG, stranded (7x30) tinned-copper conductors.
2. Fluorinated ethylene propylene insulation.
3. Unshielded.
4. Fluorinated ethylene propylene jacket.
5. Flame Resistance: NFPA 262.
6. Lead Content: Less than 300 parts per million.

2.10 CONTROL CABLE

A. Paired Cable: NFPA 70, Type CMG.

1. [**One**][**Multi-**]pair, twisted, [**No. 16 AWG, stranded (19x29)**][**No. 18 AWG, stranded (19x30)**] tinned-copper conductors.
2. PVC insulation.
3. Unshielded.
4. PVC jacket.
5. Flame Resistance: Comply with UL 1685.
6. Lead Content: Less than 300 parts per million.

B. Plenum-Rated, Paired Cable: NFPA 70, Type CMP.

1. [**One**][**Multi-**]pair, twisted, [**No. 16 AWG, stranded (19x29)**][**No. 18 AWG, stranded (19x30)**] tinned-copper conductors.
2. PVC insulation.
3. Unshielded.

4. PVC jacket.
5. Flame Resistance: Comply with NFPA 262.
6. Lead Content: Less than 300 parts per million.

2.11 CONTROL-CIRCUIT CONDUCTORS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Encore Wire Corporation**]
2. [**General Cable; Prysmian Group North America**]
3. [**Service Wire Co.**]
4. [**Southwire Company, LLC**]
5. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide **<Insert manufacturer's name; product name or designation>** or comparable product by one of the following:

1. [**Encore Wire Corporation**]
2. [**General Cable; Prysmian Group North America**]
3. [**Service Wire Co.**]
4. [**Southwire Company, LLC**]
5. <**Insert manufacturer's name**>

C. Class 1 Control Circuits: Stranded copper, [**Type THHN/THWN-2, complying with UL 83 in raceway**][**Type THW, complying with UL 83 in raceway**][**Type XHHW-2, complying with UL 44 in raceway**][**Type TC, complying with UL 1277 in raceway**][**Type MC, complying with UL 1569**].

D. Class 2 Control Circuits: Stranded copper, [**Type THHN/THWN-2, complying with UL 83 in raceway**][**Type XHHW-2, complying with UL 44 in raceway**][**power-limited cable, concealed in building finishes**][**power-limited tray cable, in cable tray**].

E. Class 3 Remote-Control and Signal Circuits: Stranded copper, [**Type THHN/THWN-2, complying with UL 83 in raceway**][**Type XHHW-2, complying with UL 44 in raceway**][**power-limited cable, concealed in building finishes**][**power-limited tray cable, in cable tray**][**Type TW or Type TF, complying with UL 83, in raceway**].

F. Class 2 Control Circuits and Class 3 Remote-Control and Signal Circuits That Supply Critical Circuits: Circuit Integrity (CI) cable.

1. Smoke control signaling and control circuits.
2. <**Insert list of critical circuits that require CI cable**>.

2.12 FIRE-ALARM WIRE AND CABLE

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Allied Wire & Cable Inc.**]
2. [**CommScope, Inc**]
3. [**Comtran Corporation**]

4. [**Genesis; Resideo Technologies, Inc.**]
5. [**Prysmian Cables and Systems; Prysmian Group North America**]
6. [**Radix Wire**]
7. [**Rockbestos-Suprenant Cable Corp.**]
8. [**Superior Essex Inc.; subsidiary of LS Corp.**]
9. [**West Penn Wire; brand of Belden, Inc.**]
10. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Allied Wire & Cable Inc.**]
2. [**CommScope, Inc**]
3. [**Comtran Corporation**]
4. [**Genesis; Resideo Technologies, Inc.**]
5. [**Prysmian Cables and Systems; Prysmian Group North America**]
6. [**Radix Wire**]
7. [**Rockbestos-Suprenant Cable Corp.**]
8. [**Superior Essex Inc.; subsidiary of LS Corp.**]
9. [**West Penn Wire; brand of Belden, Inc.**]
10. <**Insert manufacturer's name**>

C. General Wire and Cable Requirements: NRTL listed and labeled as complying with NFPA 70, Article 760.

1. Lead Content: Less than 300 parts per million.

D. Signaling Line Circuits: Twisted, shielded pair, [**not less than**][**No. 18 AWG**]<**Insert wire size**>[**size as recommended by system manufacturer**].

1. Circuit Integrity Cable: Twisted shielded pair, NFPA 70, Article 760, Classification CI, for power-limited fire-alarm signal service Type FPL. NRTL listed and labeled as complying with UL 1424 and UL 2196 for a two-hour rating.

E. Non-Power-Limited Circuits: Solid-copper conductors with 600 V rated, 75 deg C, color-coded insulation, and complying with requirements in UL 2196 for a two-hour rating.

1. Control-Voltage Circuits: No. 16 AWG, minimum, in pathway.
2. Low-Voltage Circuits: No. 12 AWG, minimum, in pathway.
3. Multiconductor Armored Cable: NFPA 70, Type MC, copper conductors, Type TFN/THHN conductor insulation, copper drain wire, copper armor[**with outer jacket**] with red identifier stripe, NTRL listed for fire-alarm and cable tray installation, plenum rated.

2.13 SOURCE QUALITY CONTROL

A. Testing Agency: [**Owner will engage**][**Engage**] a qualified testing agency to evaluate cables.

B. Factory test twisted pair cables according to TIA-568-C.2.

C. Cable will be considered defective if it does not pass tests and inspections.

D. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Test cables on receipt at Project site.

1. Test each pair of twisted pair cable for open and short circuits.

3.2 INSTALLATION OF RACEWAYS AND BOXES

A. Comply with requirements in Section 260533.13 "Conduits for Electrical Systems" for raceway selection and installation requirements for conduits as supplemented or modified in this Section.

B. Comply with requirements in Section 260533.23 "Surface Raceways for Electrical Systems" for raceway selection and installation requirements for wireways as supplemented or modified in this Section.

C. Comply with requirements in Section 260533.16 "Boxes and Covers for Electrical Systems" for raceway selection and installation requirements for boxes as supplemented or modified in this Section.

1. Outlet boxes must be no smaller than **2 inch (50 mm)** wide, **3 inch (75 mm)** high, and **2-1/2 inch (64 mm)** deep.
2. Outlet boxes for cables must be no smaller than **4 inch (102 mm)** square by [**1-1/2 inch (38 mm)**][**2-1/8 inch (53 mm)**] deep with extension ring sized to bring edge of ring to within **1/8 inch (3.1 mm)** of the finished wall surface.
3. Flexible metal conduit must not be used.

D. Comply with TIA-569-D for pull-box sizing and length of conduit and number of bends between pull points.

E. Install manufactured conduit sweeps and long-radius elbows if possible.

F. Raceway Installation in Equipment Rooms:

1. Position conduit ends adjacent to a corner on backboard if a single piece of plywood is installed, or in the corner of the room if multiple sheets of plywood are installed around perimeter walls of the room.
2. Install cable trays to route cables if conduits cannot be located in these positions.
3. Secure conduits to backboard if entering the room from overhead.
4. Extend conduits [**3 inch (75 mm)**]<**Insert dimension**> above finished floor.
5. Install metal conduits with grounding bushings and connect with grounding conductor to grounding system.

G. Backboards: Install backboards with **96 inch (2440 mm)** dimension vertical. Butt adjacent sheets tightly and form smooth gap-free corners and joints.

3.3 INSTALLATION OF CONDUCTORS AND CABLES

A. Comply with NECA 1.

B. General Requirements for Cabling:

1. Comply with TIA-568-C Series of standards.
2. Comply with BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems."
3. Terminate all conductors; cable must not contain unterminated elements. Make terminations only at indicated outlets, terminals, and cross-connect and patch panels.
4. Cables may not be spliced and must be continuous from terminal to terminal. Do not splice cable between termination, tap, or junction points.
5. Cables serving a common system may be grouped in a common raceway. Install network cabling and control wiring and cable in separate raceway from power wiring. Do not group conductors from different systems or different voltages.
6. Secure and support cables at intervals not exceeding **30 inch (760 mm)** and not more than **6 inch (150 mm)** from cabinets, boxes, fittings, outlets, racks, frames, and terminals.
7. Bundle, lace, and train conductors to terminal points without exceeding manufacturer's limitations on bending radii, but not less than radii specified in BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems." Install lacing bars and distribution spools.
8. Do not install bruised, kinked, scored, deformed, or abraded cable. Remove and discard cable if damaged during installation and replace it with new cable.
9. Cold-Weather Installation: Bring cable to room temperature before dereeling. Do not use heat lamps for heating.
10. Pulling Cable: Comply with BICSI ITSIMM, Ch. 5, "Copper Structured Cabling Systems." Monitor cable pull tensions.
11. Support: Do not allow cables to lie on removable ceiling tiles.
12. Secure: Fasten securely in place with hardware specifically designed and installed so as to not damage cables.
13. Provide strain relief.
14. Keep runs short. Allow extra length for connecting to terminals. Do not bend cables in a radius less than 10 times the cable OD. Use sleeves or grommets to protect cables from vibration at points where they pass around sharp corners and through penetrations.
15. Ground wire must be copper, and grounding methods must comply with IEEE C2. Demonstrate ground resistance.

C. Balanced Twisted Pair Cable Installation:

1. Comply with TIA-568-C.2.
2. Install termination hardware as specified in Section 271513 "Communications Copper Horizontal Cabling" unless otherwise indicated.
3. Do not untwist balanced twisted pair cables more than **1/2 inch (12 mm)** at the point of termination to maintain cable geometry.

D. Installation of Control-Circuit Conductors:

1. Install wiring in raceways.
2. Use insulated spade lugs for wire and cable connection to screw terminals.

E. Open-Cable Installation:

1. Install cabling with horizontal and vertical cable guides in telecommunications spaces with terminating hardware and interconnection equipment.
2. Suspend copper cable not in a wireway or pathway a minimum of **8 inch (200 mm)** above ceilings by cable supports not more than [**30 inch (760 mm)**]<**Insert dimension**> apart.
3. Cable must not be run through or on structural members or in contact with pipes, ducts, or other potentially damaging items. Do not run cables between structural members and corrugated panels.

F. Installation of Cable Routed Exposed under Raised Floors:

1. Install plenum-rated cable only.

2. Install cabling after the flooring system has been installed in raised floor areas.
3. Below each feed point, neatly coil a minimum of [72 inch (1830 mm)]<**Insert dimension**> of cable in a coil not less than [12 inch (305 mm)]<**Insert dimension**> in diameter.

G. Separation from EMI Sources:

1. Comply with BICSI TDMM and TIA-569-D recommendations for separating unshielded copper voice and data communications cable from potential EMI sources including electrical power lines and equipment.
2. Separation between open communications cables or cables in nonmetallic raceways and unshielded power conductors and electrical equipment must be as follows:

   a. Electrical Equipment or Circuit Rating Less Than 2 kVA: A minimum of **5 inch (127 mm)**.
   b. Electrical Equipment or Circuit Rating between 2 and 5 kVA: A minimum of **12 inch (305 mm)**.
   c. Electrical Equipment or Circuit Rating More Than 5 kVA: A minimum of **24 inch (600 mm)**.

3. Separation between communications cables in grounded metallic raceways and unshielded power lines or electrical equipment must be as follows:

   a. Electrical Equipment or Circuit Rating Less Than 2 kVA: A minimum of **2-1/2 inch (64 mm)**.
   b. Electrical Equipment or Circuit Rating between 2 and 5 kVA: A minimum of **6 inch (150 mm)**.
   c. Electrical Equipment or Circuit Rating More Than 5 kVA: A minimum of **12 inch (305 mm)**.

4. Separation between communications cables in grounded metallic raceways and power lines and electrical equipment located in grounded metallic conduits or enclosures must be as follows:

   a. Electrical Equipment or Circuit Rating Less Than 2 kVA: No requirement.
   b. Electrical Equipment or Circuit Rating between 2 and 5 kVA: A minimum of **3 inch (75 mm)**.
   c. Electrical Equipment or Circuit Rating More Than 5 kVA: A minimum of **6 inch (150 mm)**.

5. Separation between Communications Cables and Electrical Motors and Transformers, 5 kVA or 5 HP and Larger: A minimum of **48 inch (1200 mm)**.
6. Separation between Communications Cables and Fluorescent Fixtures: A minimum of **5 inch (127 mm)**.

3.4 REMOVAL OF CONDUCTORS AND CABLES

A. Remove abandoned conductors and cables. Abandoned conductors and cables are those installed that are not terminated at equipment and are not identified with a tag for future use.

3.5 CONTROL-CIRCUIT CONDUCTORS

A. Minimum Conductor Sizes:

1. Class 1 remote-control and signal circuits; [**No 14 AWG**]<**Insert wire size**>.
2. Class 2 low-energy, remote-control, and signal circuits; [**No. 16 AWG**]<**Insert wire size**>.
3. Class 3 low-energy, remote-control, alarm, and signal circuits; [**No 12 AWG**]<**Insert wire size**>.

3.6 FIRESTOPPING

A. Comply with requirements in Section 078413 "Penetration Firestopping."

B. Comply with TIA-569-D, Annex A, "Firestopping."

C. Comply with BICSI TDMM, "Firestopping" Chapter.

3.7 GROUNDING

A. For data communication wiring, comply with TIA-607-B and with BICSI TDMM, "Bonding and Grounding (Earthing)" Chapter.

B. For control-voltage wiring and cabling, comply with requirements in Section 260526 "Grounding and Bonding for Electrical Systems."

3.8 IDENTIFICATION

A. Comply with requirements for identification specified in Section 260553 "Identification for Electrical Systems."

B. Identify data and communications system components, wiring, and cabling according to TIA-606-B; label printers must use label stocks, laminating adhesives, and inks complying with UL 969.

C. Identify each wire on each end and at each terminal with a number-coded identification tag. Each wire must have a unique tag.

3.9 FIELD QUALITY CONTROL

A. Tests and Inspections:

1. Visually inspect cable jacket materials for UL or third-party certification markings. Inspect cabling terminations to confirm color-coding for pin assignments, and inspect cabling connections to confirm compliance with TIA-568-C.1.
2. Visually inspect cable placement, cable termination, grounding and bonding, equipment and patch cords, and labeling of all components.
3. Test cabling for direct-current loop resistance, shorts, opens, intermittent faults, and polarity between conductors. Test operation of shorting bars in connection blocks. Test cables after termination, but not after cross-connection.

    a. Test instruments must meet or exceed applicable requirements in TIA-568-C.2. Perform tests with a tester that complies with performance requirements in its "Test Instruments (Normative)" Annex, complying with measurement accuracy specified in its "Measurement Accuracy (Informative)" Annex. Use only test cords and adapters that are qualified by test equipment manufacturer for channel or link test configuration.

B. Document data for each measurement. Print data for submittals in a summary report that is formatted using Table 10.1 in BICSI TDMM as a guide, or transfer the data from the instrument to the computer, save as text files, print, and submit.

C. End-to-end cabling will be considered defective if it does not pass tests and inspections.

D. Prepare test and inspection reports.

END OF SECTION 26 05 23 00

Task	Specification	Specification Description

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 26 00 - GROUNDING AND BONDING FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Grounding and bonding conductors.
2. Grounding and bonding clamps.
3. Grounding and bonding bushings.
4. Grounding and bonding hubs.
5. Grounding and bonding connectors.
6. Intersystem bonding bridge grounding connectors.
7. Grounding and bonding busbars.
8. Signal reference grids.
9. Grounding (earthing) electrodes.
10. Grounding electrode enclosures.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 264113 "Lightning Protection for Structures" specifies bonding of lightning protection grounding electrodes to facility grounding electrodes.
5. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs installed by this Section.
6. Section 270528 "Pathways for Communications Systems"[**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for identification and grounding and bonding of communications equipment, raceways, boxes, and cable trays.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing agency, certifying product's compliance with specified listing criteria.

a. If listed manufacturer differs from selling manufacturer, indicate relationship between entities on submittal. Clearly indicate which entity warrants product performance and fitness for purpose.
b. Listing criteria identified in approval letter must match specified listing criteria. UL label indicating approval of equipment's enclosure is not considered approval of equipment for intended application.
c. Product identification in approval letter must match product branding and model numbers in submittal. Approval letters for discontinued or superseded products are unacceptable for

submitted product.

B. Shop Drawings: Prepare and submit the following:

1. Plans showing dimensioned locations of grounding features described in "Field Quality Control for Grounding and Bonding" Article, including the following:

a. Grounding electrode access enclosures.
b. Grounding electrodes.
c. Grounding arrangements and connections for separately derived systems.
d. <**Insert items**>.

C. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

D. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

1.4 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data:

1. In addition to items specified in Section 260010 "Supplemental Requirements for Electrical," include the following:

a. Plans showing locations of grounding features described in "Field Quality Control for Grounding and Bonding" Article, including the following:

1) Grounding electrode access enclosures.
2) Grounding electrodes.
3) Grounding arrangements and connections for separately derived systems.
4) <**Insert items**>.

b. Instructions for periodic testing and inspection of grounding features at [**test wells**][**ring electrodes**][**grounding connections for separately derived systems**]<**Insert locations**> based on [**NETA MTS**][**NFPA 70B**]<**Insert reference**>.

1) Tests must determine if ground-resistance or impedance values remain within specified maximums, and instructions must recommend corrective action if values do not.
2) Include recommended testing intervals.

1.5 QUALIFICATIONS

A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, conduct tests of complex equipment, analyze test and equipment data, plan a job, and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical

tests.

B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems, evaluate tests, test equipment, test results, and power system performance, recommend actions to maintain or improve system performance, and lead multi-team projects.

C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site electrical testing supervisors must possess active NICET EPT Technician [**III**][**IV**] certification.

1.6 SERVICE CONDITIONS FOR ELECTRICAL EQUIPMENT

A. Soil Resistivity: Grounding (earthing) Work on the Project must account for soil resistivity conditions specified in Section 018116 "Facility Environmental Requirements."

B. Electrical and ICT Equipment Grounding (Earthing): Do not exceed [**25 Ω**][**10 Ω**]<**Insert resistance value**> resistance to ground (earth).

1. Contact Architect for resolution if 25 Ω specified resistance to ground (earth) is not attained after complying with prescriptive requirements in Article 250 of NFPA 70.
2. Contact Architect for resolution if [**10 Ω**]<**Insert resistance value**> specified resistance to ground (earth) is not attained after second attempt to increase effectiveness of grounding (earthing) electrode.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

B. <**Insert additional performance requirements for the Project**>.

2.2 GROUNDING AND BONDING CONDUCTORS

A. Equipment Grounding Conductor:

1. Standard Features: 600 V, [**THHN/THWN-2**][**or**][**THWN-2**], [**copper**][**or**][**tinned-copper**] wire or cable, green color, in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

B. Isolated Equipment Grounding Conductor:

1. Standard Features: 600 V, [**THHN/THWN-2**][**or**][**THWN-2**], [**copper**][**or**][**tinned-copper**] wire or cable, green color with one or more yellow stripes, in accordance with Section 260519 "Low-Voltage Electrical Power Conductors and Cables."

C. ASTM - Bare Copper Grounding and Bonding Conductor:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ERICO; brand of nVent Electrical plc**]
   b. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ERICO; brand of nVent Electrical plc**]
   b. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   c. <**Insert manufacturer's name**>

3. Standard Features: Complying with one or more of the following:

   a. Soft or Annealed Copper Wire: ASTM B3.
   b. Concentric-Lay Stranded Copper Conductor: ASTM B8.
   c. Tin-Coated Soft or Annealed Copper Wire: ASTM B33.
   d. 19-Wire Combination Unilay-Stranded Copper Conductor: ASTM B787/B787M.

4. Sustainable Design Features:

   a. Lead Content for Electrical Wire and Cable: Less than 300 ppm.
   b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL KDER - Armored Grounding Wire:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**LS Cable & System USA; subsidiary of LS Corp.**]
   b. [**Southwire Company, LLC**]
   c. [**Superior Essex Inc.; subsidiary of LS Corp.**]
   d. [**Viakon; brand of Conductores Monterrey S.A. de C.V.; a subsidiary of Xignux**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**LS Cable & System USA; subsidiary of LS Corp.**]
    b. [**Southwire Company, LLC**]
    c. [**Superior Essex Inc.; subsidiary of LS Corp.**]
    d. [**Viakon; brand of Conductores Monterrey S.A. de C.V.; a subsidiary of Xignux**]
    e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

4. Standard Features: Single corrosion-resistant copper, aluminum, or copper-clad aluminum conductor within helically formed steel armor.
5. Sustainable Design Features:

    a. Lead Content for Electrical Wire and Cable: Less than 300 ppm.
    b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL KDSH - Protector Grounding Conductor:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Superior Essex Inc.; subsidiary of LS Corp.**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Superior Essex Inc.; subsidiary of LS Corp.**]
    b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

4. Standard Features:

a. Conductors intended to be used for grounding primary protector or metallic members of cable sheath in accordance with Chapters 7 and 8 of NFPA 70.
b. Color: [**Light olive gray**][**or**][**green**].

5. Sustainable Design Features:

a. Lead Content for Electrical Wire and Cable: Less than 300 ppm.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.3 GROUNDING AND BONDING CLAMPS

A. Description: Clamps suitable for attachment of grounding and bonding conductors to grounding electrodes, pipes, tubing, and rebar. Grounding and bonding clamps specified in this article are also suitable for use with communications applications.

B. UL KDER and KDSH - Hex-Fitting-Type Pipe and Rod Grounding and Bonding Clamp :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**America Fujikura Ltd. (AFL); Fujikura Ltd.**]
c. [**Arlington Industries, Inc.**]
d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
f. [**ERICO; brand of nVent Electrical plc**]
g. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
h. [**Greaves Corp.; Essex Products Group, Inc.**]
i. [**Harger Lightning & Grounding; business of Harger, Inc.**]
j. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
k. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
l. [**Panduit Corp**]
m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
n. **<Insert manufacturer's name>**

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**America Fujikura Ltd. (AFL); Fujikura Ltd.**]
    c. [**Arlington Industries, Inc.**]
    d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    f. [**ERICO; brand of nVent Electrical plc**]
    g. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
    h. [**Greaves Corp.; Essex Products Group, Inc.**]
    i. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    j. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
    k. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    l. [**Panduit Corp**]
    m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    n. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
    b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features:

    a. Two pieces with [**zinc-plated**][**stainless steel**] bolts.
    b. Clamp Material: [**Silicon bronze**][**Die-cast zinc alloy**][**Aluminum**][**Brass**][**Tinned brass**].
    c. Listed for outdoor use.

6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL KDER and KDSH - U-Bolt-Type Pipe and Rod Grounding and Bonding Clamp :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**America Fujikura Ltd. (AFL); Fujikura Ltd.**]
c. [**Arlington Industries, Inc.**]
d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
f. [**ERICO; brand of nVent Electrical plc**]
g. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
h. [**Greaves Corp.; Essex Products Group, Inc.**]
i. [**Harger Lightning & Grounding; business of Harger, Inc.**]
j. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
k. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
l. [**Panduit Corp**]
m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**America Fujikura Ltd. (AFL); Fujikura Ltd.**]
c. [**Arlington Industries, Inc.**]
d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
f. [**ERICO; brand of nVent Electrical plc**]
g. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
h. [**Greaves Corp.; Essex Products Group, Inc.**]
i. [**Harger Lightning & Grounding; business of Harger, Inc.**]
j. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
k. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
l. [**Panduit Corp**]
m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
n. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features:

a. Clamp Material: [**Aluminum**][**Brass**][**Tinned brass**].
b. Listed for outdoor use.

6. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL KDER and KDSH - Strap-Type Pipe and Rod Grounding and Bonding Clamp :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   c. [**ERICO; brand of nVent Electrical plc**]
   d. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
   e. [**Panduit Corp**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   c. [**ERICO; brand of nVent Electrical plc**]
   d. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
   e. [**Panduit Corp**]
   f. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
   b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features:

   a. Clamp Material: [**Aluminum**][**Copper**][**Tinned copper**][**Galvanized steel**].
   b. Listed for outdoor use.

6. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced

(extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL KDER - Beam Grounding and Bonding Clamp :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Anderson; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   c. [**Panduit Corp**]
   d. [**Penn-Union Corp.; subsidiary of Nesco, Inc.**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Anderson; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   c. [**Panduit Corp**]
   d. [**Penn-Union Corp.; subsidiary of Nesco, Inc.**]
   e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
   b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Mechanical-type, terminal, ground wire access from four directions; with dual, tin-plated or silicon bronze bolts.
6. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL KDER - Exothermically Welded Connection :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**ALLTEC LLC**]
   c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   e. [**ERICO; brand of nVent Electrical plc**]
   f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**ALLTEC LLC**]
   c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   e. [**ERICO; brand of nVent Electrical plc**]
   f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
   b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Exothermic-welding kits of types recommended by kit manufacturer for materials being joined and installation conditions.
6. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

G. UL KDER - Raised-Floor Signal Reference Grid Clamp :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    e. [**ERICO; brand of nVent Electrical plc**]
    f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    e. [**ERICO; brand of nVent Electrical plc**]
    f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
    b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Mechanical-type, stamped-steel terminal with hex head screw.
6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.4 GROUNDING AND BONDING BUSHINGS

A. Description: Bonding bushings connect conduit fittings, tubing fittings, threaded metal conduit, and unthreaded metal conduit to metal boxes and equipment enclosures, and have one or more bonding screws intended to provide electrical continuity between bushing and enclosure. Grounding bushings have provision for connection of bonding or grounding conductor and may or may not also have bonding screws.

B. UL KDER - Bonding Bushing :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Arlington Industries, Inc.**]
    c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Arlington Industries, Inc.**]
    c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: Threaded bushing with insulated throat.
6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL KDER - Grounding Bushing :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Arlington Industries, Inc.**]
   c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
   f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Arlington Industries, Inc.**]
   c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
   f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: Threaded bushing with insulated throat and mechanical-type wire terminal.
6. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.5 GROUNDING AND BONDING HUBS

A. UL KDER - Grounding and Bonding Hub :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Arlington Industries, Inc.**]
    c. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    e. [**Greaves Corp.; Essex Products Group, Inc.**]
    f. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    g. [**Penn-Union Corp.; subsidiary of Nesco, Inc.**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Arlington Industries, Inc.**]
    c. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    e. [**Greaves Corp.; Essex Products Group, Inc.**]
    f. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    g. [**Penn-Union Corp.; subsidiary of Nesco, Inc.**]
    h. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: Insulated, gasketed, watertight hub with mechanical-type wire terminal.
6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.6 GROUNDING AND BONDING CONNECTORS

A. UL KDER - Pressure-Type Grounding and Bonding Busbar Cable Connector :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    c. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
    b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Copper or copper alloy, for compression bonding of one or more conductor directly to copper busbar. Listed for direct burial.
6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL KDER - Lay-In Lug Mechanical-Type Grounding and Bonding Busbar Terminal :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Chatsworth Products, Inc.**]
c. [**Greaves Corp.; Essex Products Group, Inc.**]
d. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Chatsworth Products, Inc.**]
c. [**Greaves Corp.; Essex Products Group, Inc.**]
d. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Mechanical-type, [**aluminum**][**copper rated for direct burial**] terminal with set screw.
6. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL KDER - Crimped Lug Pressure-Type Grounding and Bonding Busbar Terminal :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Harger Lightning & Grounding; business of Harger, Inc.**]
c. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Harger Lightning & Grounding; business of Harger, Inc.**]
c. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Cast silicon bronze, solderless compression-type wire terminals; with long barrel and two holes spaced on **5/8 or 1 inch (16 or 25 mm)** centers for two-bolt connection to busbar.
6. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL KDER - Split-Bolt Service-Post Pressure-Type Grounding and Bonding Busbar Terminal :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Panduit Corp**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Panduit Corp**]
b. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in

accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Bolts that surround cable and bond to cable under compression when nut is tightened after assembly is screwed into busbar opening.
6. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL KDER - Crimped Pressure-Type Grounding and Bonding Cable Connector :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**aIIG Fabrication (formerly ALT)**]
c. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**aIIG Fabrication (formerly ALT)**]
c. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Crimp-and-compress connectors that bond to conductor when connector is compressed around conductor.

    a. [**Copper**][**Copper alloy**][**Tinned copper**], C and H shaped.

6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL KDER - Split-Bolt Pressure-Type Grounding and Bonding Cable Connector :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**allG Fabrication (formerly ALT)**]
    c. [**ERICO; brand of nVent Electrical plc**]
    d. [**Greaves Corp.; Essex Products Group, Inc.**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**allG Fabrication (formerly ALT)**]
    c. [**ERICO; brand of nVent Electrical plc**]
    d. [**Greaves Corp.; Essex Products Group, Inc.**]
    e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
    b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Bolts that surround cable and bond to cable under compression when nut is tightened.

a. [**Copper**][**Copper alloy**][**Tinned copper**].

6. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

G. UL KDER - Signal Reference Grid Grounding and Bonding Connector :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**ERICO; brand of nVent Electrical plc**]
e. [**Harger Lightning & Grounding; business of Harger, Inc.**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**ERICO; brand of nVent Electrical plc**]
e. [**Harger Lightning & Grounding; business of Harger, Inc.**]
f. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.
b. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

5. Standard Features: Combination of compression wire connectors, access floor grounding clamps, bronze U-bolt grounding clamps, and copper split-bolt connectors, designed for the purpose.
6. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.7 INTERSYSTEM BONDING BRIDGE GROUNDING CONNECTORS

A. Description: Devices that provide means for connecting communications systems grounding and bonding conductors at service equipment or at disconnecting means for buildings or structures.

B. UL KDSH - One-Piece Intersystem Bonding Bridge Grounding Connector :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
   b. [**Madison Electric Products; business of Southwire Company, LLC**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
   b. [**Madison Electric Products; business of Southwire Company, LLC**]
   c. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

4. Standard Features: Zinc-alloy one-piece construction; six terminating points; gangable.
5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced

(extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL KDSH - Two-Piece Intersystem Bonding Bridge Grounding Connector :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   c. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   c. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. Grounding and Bonding Equipment for Communications: UL CCN KDSH; including UL 467.

4. Standard Features: [**Zinc-alloy**][**Copper**] body and polycarbonate cover; four terminating points.
5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.8 GROUNDING AND BONDING BUSBARS

A. Description: Miscellaneous grounding and bonding devices that serve as common connection for multiple grounding and bonding conductors.

B. UL KDER - Equipment Room Grounding and Bonding Busbar :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**allG Fabrication (formerly ALT)**]
    b. [**Chatsworth Products, Inc.**]
    c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    e. [**ERICO; brand of nVent Electrical plc**]
    f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    g. [**Hoffman; brand of nVent Electrical plc**]
    h. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
    i. [**Panduit Corp**]
    j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**allG Fabrication (formerly ALT)**]
    b. [**Chatsworth Products, Inc.**]
    c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    e. [**ERICO; brand of nVent Electrical plc**]
    f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    g. [**Hoffman; brand of nVent Electrical plc**]
    h. [**ILSCO; brand of ECM Industries LLC; division of nVent Electric plc**]
    i. [**Panduit Corp**]
    j. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features:

    a. Bus: Rectangular bar of annealed copper.
    b. Mounting Stand-Off Insulators: Lexan or PVC.

        1) Comply with UL 891 for use in 600 V switchboards, impulse tested at 5000 V.

6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability

report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.

b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

c. Regional Materials (lgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

7. Other Available Features Required by the Project:

a. Dimensions: [**1/4 by 4 inch (6.3 by 100 mm)**]<**Insert dimensions**> in cross section; length as indicated on the Drawings.

b. Predrilled Hole Pattern: [**Complying with BICSI N3 and TIA-607**][**9/32 inch (7.14 mm) holes spaced 1-1/8 inch (28 mm) apart**][**Suitable for installing specified grounding and bonding connectors**].

c. Mounting Hardware: Stand-off brackets that provide [**2 inch (50 mm)**][**4 inch (100 mm)**]<**Insert dimension**> clearance to access rear of bus. Brackets and bolts must be stainless steel.

C. UL KDER - Rack and Cabinet Bonding Busbar :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Chatsworth Products, Inc.**]
b. [**Cooper B-line; brand of Eaton, Electrical Sector**]
c. [**Harger Lightning & Grounding; business of Harger, Inc.**]
d. [**Hoffman; brand of nVent Electrical plc**]
e. [**Panduit Corp**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Chatsworth Products, Inc.**]
b. [**Cooper B-line; brand of Eaton, Electrical Sector**]
c. [**Harger Lightning & Grounding; business of Harger, Inc.**]
d. [**Hoffman; brand of nVent Electrical plc**]
e. [**Panduit Corp**]
f. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features:

   a. Bus: Rectangular bar of hard-drawn solid copper.
   b. Horizontal Mounting Dimensions: Designed for mounting in [**19 inch (483 mm)**][**23 inch (584 mm)**] wide equipment racks or cabinets.
   c. Vertical Mounting Dimensions: Designed for mounting in [**72 inch (1827 mm)**][**36 inch (914 mm)**] high equipment racks or cabinets.
   d. Predrilled Hole Pattern: Accepts connectors for grounding and bonding conductor sizes 14 AWG to 2/0 AWG.
   e. Mounting Hardware: Stainless steel or copper-plated, for attachment to rack.

6. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.9 SIGNAL REFERENCE GRIDS

A. Description: Means for providing low-impedance path to ground over a large area, approximating an equipotential plan, while simultaneously mitigating large current spikes from faults or lightning.

B. UL KDER - Mesh-Type Signal Reference Grid :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   b. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   c. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Burndy; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   b. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   c. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.

4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: Conductive metal wire mesh for field-fabrication of grid.

    a. Wire Size: [**8 AWG**][**6 AWG**][**4 AWG**][**2 AWG**].
    b. Wire Material: [**Copper**][**Copper-clad steel**].
    c. Spacing: [**4 inch (102 mm)**][**8 inch (203 mm)**][**12 inch (305 mm)**][**24 inch (610 mm)**].
    d. Welded or brazed intersections.

6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL KDER - Tape-Type Signal Reference Grid :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    b. [**ERICO; brand of nVent Electrical plc**]
    c. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    b. [**ERICO; brand of nVent Electrical plc**]
    c. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: Conductive copper tape for field-fabrication of grid.

   a. Copper Tape Dimensions: [**16 mil (0.4 mm) (26 ga.) thick by 2 inch (51 mm) wide**][**40 mil (1 mm) (18 ga.) thick by 1.6 inch (40 mm) wide**]<**Insert dimensions**>.
   b. Spacing: [**24 inch (610 mm)**]<**Insert dimension**>.
   c. Welded or brazed fittings for intersections.

6. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.10 GROUNDING (EARTHING) ELECTRODES

A. UL KDER - Rod Electrode :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**allG Fabrication (formerly ALT)**]
   c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   d. [**ERICO; brand of nVent Electrical plc**]
   e. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
   f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**allG Fabrication (formerly ALT)**]
   c. [**Continental Industries; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
   d. [**ERICO; brand of nVent Electrical plc**]
   e. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
   f. [**Harger Lightning & Grounding; business of Harger, Inc.**]
   g. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in

accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: [**Copper-clad**][**Zinc-coated**][**Stainless**] steel[**, sectional type**]; [**3/4 inch by 10 ft (19 mm by 3 m)**][**5/8 inch by 8 ft (16 mm by 2.4 m)**].
6. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL KDER - Chemically Charged Rod Electrode :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**aIIG Fabrication (formerly ALT)**]
b. [**ALLTEC LLC**]
c. [**ERICO; brand of nVent Electrical plc**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**aIIG Fabrication (formerly ALT)**]
b. [**ALLTEC LLC**]
c. [**ERICO; brand of nVent Electrical plc**]
d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: Copper tube, straight or L-shaped, charged electrode enhancement material.

a. Termination: Factory-attached 4/0 AWG bare conductor at least **48 inch (1200 mm)** long.
b. Backfill Material: Electrode manufacturer's recommended material.

6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

7. Other Available Features Required by the Project:

    a. Electrode Enhancement Material: [**Nonhazardous electrolytic chemical salts**]<**Insert enhancement material**>.

C. UL KDER - Plate Electrode :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ALLTEC LLC**]
    b. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
    c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ALLTEC LLC**]
    b. [**Galvan Industries, Inc.; Electrical Products Division, LLC**]
    c. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. Grounding and Bonding Equipment: UL CCN KDER; including UL 467.

5. Standard Features: **1/4 inch (6 mm)** thick, hot-dip galvanized.
6. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.11 GROUNDING ELECTRODE ENCLOSURES

A. Description: Enclosures designed to protect grounding electrodes from damage while providing access for inspection and testing of the grounding system.

B. Grounding Electrode Access Well Enclosure :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ERICO; brand of nVent Electrical plc**]
    b. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    c. [**Quazite; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ERICO; brand of nVent Electrical plc**]
    b. [**Harger Lightning & Grounding; business of Harger, Inc.**]
    c. [**Quazite; brand of Hubbell Utility Solutions; Hubbell Incorporated**]
    d. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. Standard Features:

    a. Well Material: [**Concrete**][**HDPE**][**Schedule 40 PVC**].
    b. Cover Material: [**Cast iron**][**Concrete**][**HDPE**][**Plastic**][**Steel**].
    c. Cover Strength: [**Sidewalk or turf use**][**Driveway use**]<**Insert rating**>.

5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Material Reuse: Product is salvaged, refurbished, or reused.
    c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard

development organization, is publicly available for product.

f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Round:

1) Nominal Diameter: [**8 inch (200 mm)**][**9 inch (230 mm)**][**10 inch (250 mm)**][**12 inch (300 mm)**][**13 inch (330 mm)**]<**Insert dimension**>.
2) Nominal Height: [**10 inch (250 mm)**][**12 inch (300 mm)**][**18 inch (450 mm)**][**24 inch (600 mm)**][**30 inch (760 mm)**][**36 inch (910 mm)**][**48 inch (1220 mm)**]<**Insert dimension**>.
3) Slotted sides for installation after grounding connections made.

b. Rectangular:

1) Nominal Width: [**2 inch (50 mm)**][**12 inch (300 mm)**][**13 inch (330 mm)**][**17 inch (430 mm)**][**36 inch (910 mm)**]<**Insert dimension**>.
2) Nominal Length: [**10 inch (250 mm)**][**12 inch (300 mm)**][**13 inch (330 mm)**][**17 inch (430 mm)**][**18 inch (450 mm)**][**24 inch (600 mm)**][**36 inch (910 mm)**][**42 inch (1070 mm)**]<**Insert dimension**>.
3) Nominal Height: [**12 inch (300 mm)**][**18 inch (450 mm)**][**24 inch (600 mm)**][**30 inch (760 mm)**]<**Insert dimension**>.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine facility's grounding electrode system and equipment grounding for compliance with requirements for maximum ground-resistance level and other conditions affecting performance of grounding and bonding of electrical system.

B. Inspect test results of grounding system measured at point of electrical service equipment connection.

C. Prepare written report, endorsed by Installer, listing conditions detrimental to performance of the Work.

D. Proceed with connection of electrical service equipment only after unsatisfactory conditions have been corrected.

3.2 SELECTION OF GROUNDING AND BONDING PRODUCTS

A. Grounding and Bonding Conductors:

1. Provide solid conductor for [**8 AWG**]<**Insert wire size**> and smaller, and stranded conductors for [**6 AWG**]<**Insert wire size**> and larger unless otherwise indicated.
2. Custom-Length Insulated Equipment Bonding Jumpers: 6 AWG, 19-strand, Type THHN.
3. Bonding Cable: 28 kcmil, 14 strands of 17 AWG conductor, **1/4 inch (6 mm)** in diameter.
4. Bonding Conductor: 4 AWG or 6 AWG, stranded conductor.
5. Bonding Jumper: Copper tape, braided conductors terminated with copper ferrules; **1-5/8 inch (41 mm)** wide and **1/16 inch (1.6 mm)** thick.

6. Tinned Bonding Jumper: Tinned-copper tape, braided conductors terminated with copper ferrules; 1-5/8 inch (41 mm) wide and 1/16 inch (1.6 mm) thick.
7. Underground Grounding Conductors: Install bare [**tinned-**]copper conductor, [**2/0 AWG**]<**Insert wire size**> minimum.

B. Grounding and Bonding Connectors:

1. Pipe and Equipment Grounding Conductor Terminations: Bolted connectors.
2. Underground Connections: Welded connectors except at test wells and as otherwise indicated.
3. Connections to Ground Rods at Test Wells: Bolted connectors.
4. Connections to Structural Steel: Welded connectors.

C. Grounding and Bonding Busbars: Provide in electrical equipment rooms, in rooms housing service equipment, and elsewhere as indicated on the Drawings.

D. Substation Signal Reference Grid:

1. Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with IEEE C2.

a. Install [**8 AWG**][**6 AWG**]<**Insert wire size from fault calculation**> bonding conductors below grade in a grid pattern on 2 ft (600 mm) centers. Bond grid conductors with exothermic welds where they cross each other.
b. Grid must fill entire area inside equipment yard fence, and extend minimum 6.5 ft (2 m) outside fence, so someone walking or running outside yard may not touch fence or open gate without first stepping inside grid.
c. Bond each metal fence post and gate post to at least two grid conductors.
d. Inside grid, bond equipment reinforcing steel inside bases and sidewalks to at least two grid conductors.
e. Bond underground metal pipe and conduit passing under grid to nearest grid conductor at both ends.

E. Signal Reference Grid Tape Mesh:

1. Install tape mesh under floor finish with the following features:

a. Tape mesh, 2 inch (50 mm) by 16 mil (0.4 mm) solid copper, [12 inch (300 mm)][24 inch (610 mm)] spacing.

3.3 SELECTION OF GROUNDING AND BONDING PRODUCTS FOR COMMUNICATIONS

A. Comply with Section 270528 "Pathways for Communications Systems" and Section 271100 "Communications Equipment Room Fittings."

3.4 SELECTION OF GROUNDING AND BONDING PRODUCTS FOR TOWERS AND ANTENNAS

A. Special Techniques:

1. Ring Electrode: Buried at least 30 inch (760 mm) below grade and at least 24 inch (610 mm) from base of tower or mounting.
2. Bond each tower base and metallic frame of dish to ring electrode, buried at least 18 inch (460 mm) below grade.
3. Bond ring electrode and antenna bonding conductors to equipment room PBB or SBB, buried at least 30 inch (760 mm) below grade.

4. Bond metal fences located within **6 ft (1.8 m)** of towers and antennas to ring electrode, buried at least **18 inch (460 mm)** below grade.
5. Special Requirements for Roof-Mounted Towers:

    a. Roof Ring: Meet requirements for ring electrode except conductors must comply with NFPA 780.
    b. Bond tower base footings steel, SBB in equipment room, and antenna support guys to roof ring.
    c. Connect roof ring to perimeter conductors of lightning protection system.

6. Special Requirements for Waveguides and Coaxial Cable:

    a. Bond cable shields at point of entry into building to nearest SBB and to cable entrance plate, using 2 AWG bonding conductors.
    b. Bond coaxial cable surge arrester to ring electrode or roof ring using bonding conductor size recommended by surge-arrester manufacturer.

3.5 INSTALLATION OF GROUNDING AND BONDING

A. Comply with manufacturer's published instructions.

B. Reference Standards:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Maintenance: NFPA 70B.
3. Electrical Safety: NFPA 70E.
4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
5. Communications Work: BICSI N1.
6. Work in ITE Rooms: NFPA 75.
7. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
8. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
9. Work in Confined Spaces: NFPA 350.
10. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
11. Ground Bonding Common with Lightning Protection System: Comply with NFPA 780 and UL 96 when interconnecting with lightning protection system. Bond electrical power system ground directly to lightning protection system grounding conductor at closest point to electrical service grounding electrode. Use bonding conductor sized same as system grounding electrode conductor, and install in conduit.
12. Consult Architect for resolution of conflicting requirements.

C. Special Techniques:

1. Grounding and Bonding Conductors:

    a. Route along shortest and straightest paths possible unless otherwise indicated or required by Code. Avoid obstructing access or placing conductors where they may be subjected to strain, impact, or damage.
    b. Underground Grounding Conductors:

        1) Bury at least **30 inch (750 mm)** below grade.
        2) Duct-Bank Grounding Conductor: Bury **12 inch (300 mm)** above duct bank when indicated as part of duct-bank installation.

2. Grounding and Bonding Connectors: Make connections so possibility of galvanic action or

electrolysis is minimized. Select connectors, connection hardware, conductors, and connection methods so metals in direct contact are galvanically compatible.

a. Use electroplated or hot-tin-coated materials to ensure high conductivity and to make contact points closer in order of galvanic series.
b. Make connections with clean, bare metal at points of contact.
c. Make aluminum-to-steel connections with stainless steel separators and mechanical clamps.
d. Make aluminum-to-galvanized-steel connections with tin-plated copper jumpers and mechanical clamps.
e. Coat and seal connections having dissimilar metals with inert material to prevent future penetration of moisture to contact surfaces.
f. Bonding Straps and Jumpers: Install in locations accessible for inspection and maintenance except where routed through short lengths of conduit.

    1) Bonding to Structure: Bond straps directly to basic structure, taking care not to penetrate adjacent parts.
    2) Bonding to Equipment Mounted on Vibration Isolation Hangers and Supports: Install bonding so vibration is not transmitted to rigidly mounted equipment.
    3) Use exothermic-welded connectors for outdoor locations; if disconnect-type connection is required, use bolted clamp.

g. Grounding and Bonding for Piping:

    1) Metal Water Service Pipe: Install insulated copper grounding conductors, in conduit, from building's main service equipment, or grounding bus, to main metal water service entrances to building. Connect grounding conductors to main metal water service pipes; use bolted clamp connector or bolt lug-type connector to pipe flange by using one of lug bolts of flange. Where dielectric main water fitting is installed, connect grounding conductor on street side of fitting. Bond metal grounding conductor conduit or sleeve to conductor at each end.
    2) Water Meter Piping: Use braided-type bonding jumpers to electrically bypass water meters. Connect to pipe with bolted connector.
    3) Bond each aboveground portion of gas piping system downstream from equipment shutoff valve.

h. Bonding Interior Metal Ducts: Bond metal air ducts to equipment grounding conductors of associated fans, blowers, electric heaters, and air cleaners. Install [**tinned**]bonding jumper to bond across flexible duct connections to achieve continuity.
i. Grounding for Steel Building Structure: Install driven ground rod at base of each corner column and at intermediate exterior columns at distances not more than **60 ft (18 m)** apart.

3. Grounding and Bonding Busbars:

    a. Install busbar horizontally, on insulated spacers **2 inch (50 mm)** minimum from wall, **6 inch (150 mm)** above finished floor unless otherwise indicated.
    b. Where busbars are indicated on both sides of doorways, route bonding conductor up to top of door frame, across top of doorway, and down; connect to continuation of horizontal busbar.

4. Electrodes:

    a. Ground Rods: Drive rods until tops are **2 inch (50 mm)** below finished floor or final grade unless otherwise indicated.

        1) Interconnect ground rods with grounding electrode conductor below grade and as

otherwise indicated. Make connections without exposing steel or damaging coating if any.

2) Use exothermic welds for below-grade connections.

b. For grounding electrode system, install at least [**three**]<**Insert number**> rods spaced at least one-rod length from each other and located at least same distance from other grounding electrodes, and connect to service grounding electrode conductor.

c. Test Wells: Ground rod driven through drilled hole in bottom of handhole. Handholes are specified in Section 260543 "Underground Ducts and Raceways for Electrical Systems," and must be at least **12 inch (300 mm)** deep, with cover.

1) Install at least one test well for each service unless otherwise indicated. Install at ground rod electrically closest to service entrance. Set top of test well flush with finished grade or floor.

d. Ring Electrode: Install grounding conductor, electrically connected to each building structure ground rod and to each [**steel column**][**indicated item**], extending around perimeter of [**building**][**area or item indicated**].

1) Install tinned-copper conductor not less than [**2/0 AWG**]<**Insert wire size**> for ring electrode and for taps to building steel.

2) Bury ring electrode not less than [**24 inch (600 mm)**]<**Insert dimension**> from building's foundation.

e. Concrete-Encased Electrode (Ufer Ground):

1) Fabricate in accordance with NFPA 70; use minimum of [**20 ft (6 m)**]<**Insert dimension**> of bare copper conductor not smaller than [**4 AWG**]<**Insert wire size**>.

a) If concrete foundation is less than [**20 ft (6 m)**]<**Insert dimension**> long, coil excess conductor within base of foundation.

b) Bond grounding conductor to reinforcing steel in at least four locations and to anchor bolts. Extend grounding conductor below grade and connect to building's grounding grid or to grounding electrode external to concrete.

2) Fabricate in accordance with NFPA 70; using electrically conductive coated steel reinforcing bars or rods, at least **20 ft (6.0 m)** long. If reinforcing is in multiple pieces, connect together by usual steel tie wires or exothermic welding to create required length.

5. Grounding at Service:

a. Equipment grounding conductors and grounding electrode conductors must be connected to ground busbar. Install main bonding jumper between neutral and ground buses.

6. Grounding Separately Derived Systems:

a. Permanent Generators: Install grounding electrode(s) at location of permanent generators having switched neutral connections. Electrode must be connected to equipment grounding conductor and to frame of generator.

7. Grounding Underground Distribution System Components:

a. Duct-Bank Grounding Conductor: Bury **12 inch (300 mm)** above duct bank when indicated as part of duct-bank installation.

b. Comply with IEEE C2 grounding requirements.
c. Grounding Manholes and Handholes: Install driven ground rod through manhole or handhole floor, close to wall, and set rod depth so **4 inch (100 mm)** will extend above finished floor. If necessary, install ground rod before manhole is placed and provide 1/0 AWG bare, tinned-copper conductor from ground rod into manhole through waterproof sleeve in manhole wall. Protect ground rods passing through concrete floor with double wrapping of pressure-sensitive insulating tape or heat-shrunk insulating sleeve from **2 inch (50 mm)** above to **6 inch (150 mm)** below concrete. Seal floor opening with waterproof, nonshrink grout.
d. Grounding Connections to Manhole Components: Bond exposed-metal parts such as inserts, cable racks, pulling irons, ladders, and cable shields within each manhole or handhole, to ground rod or grounding conductor. Make connections with 4 AWG minimum, stranded, hard-drawn copper bonding conductor. Train conductors level or plumb around corners and fasten to manhole walls. Connect to cable armor and cable shields in accordance with manufacturer's published instructions with splicing and termination kits.
e. Pad-Mounted Transformers and Switches: Install two ground rods and ring electrode around pad. Ground pad-mounted equipment and noncurrent-carrying metal items associated with substations by connecting them to underground cable and grounding electrodes. Install tinned-copper conductor not less than 2 AWG for ring electrode and for taps to equipment grounding terminals. Bury ring electrode not less than **6 inch (150 mm)** from foundation.

8. Equipment Grounding and Bonding:

a. Install insulated equipment grounding conductors with feeders and branch circuits.
b. Install insulated equipment grounding conductors with the following items, in addition to those required by NFPA 70:

1) Feeders and branch circuits.
2) Lighting circuits.
3) Receptacle circuits.
4) Single-phase motor and appliance branch circuits.
5) Three-phase motor and appliance branch circuits.
6) Flexible raceway runs.
7) Armored and metal-clad cable runs.
8) Busway Supply Circuits: Install insulated equipment grounding conductor from grounding bus in switchgear, switchboard, or distribution panel to equipment grounding bar terminal on busway.
9) X-Ray Equipment Circuits: Install insulated equipment grounding conductor in circuits supplying x-ray equipment.

c. Air-Duct Equipment Circuits: Install insulated equipment grounding conductor to duct-mounted electrical devices operating at 120 V and more, including air cleaners, heaters, dampers, humidifiers, and other duct electrical equipment. Bond conductor to each unit and to air duct and connected metallic piping.
d. Water Heater, Heat-Tracing, and Antifrost Heating Cables: Install separate insulated equipment grounding conductor to each electric water heater and heat-tracing cable. Bond conductor to heater units, piping, connected equipment, and components.
e. Isolated Grounding Receptacle Circuits: Install insulated equipment grounding conductor connected to receptacle grounding terminal. Isolate conductor from raceway and from panelboard grounding terminals. Terminate at equipment grounding conductor terminal of applicable derived system or service unless otherwise indicated.
f. Isolated Equipment Enclosure Circuits: For designated equipment supplied by branch circuit or feeder, isolate equipment enclosure from supply circuit raceway with nonmetallic raceway fitting listed for the purpose. Install fitting where raceway enters enclosure, and install separate insulated equipment grounding conductor. Isolate conductor from raceway

and from panelboard grounding terminals. Terminate at equipment grounding conductor terminal of applicable derived system or service unless otherwise indicated.

g. Poles Supporting Outdoor Lighting Fixtures: Bond insulated equipment grounding conductor to equipment grounding terminal inside pole base.

h. Metallic Fences: Comply with requirements of IEEE C2.

1) Grounding Conductor: Bare[**, tinned**] copper, not less than [**8 AWG**]<**Insert wire size**>.

2) Gates: Must be bonded to grounding conductor with flexible bonding jumper.

3) Barbed Wire: Strands must be bonded to grounding conductor.

9. Fence Grounding:

a. Grounding Method: At each grounding location, drive grounding rod vertically until top is **6 inch (150 mm)** below finished grade. Connect rod to fence with 6 AWG conductor. Connect conductor to each fence component at grounding location.

b. Fences greater than **100 ft (30 m)** of Buildings, Structures, Walkways, and Roadways: Ground fence at maximum intervals of [**1500 ft (450 m)**]<**Insert lesser distance if grounding resistance is high**>.

c. Fences within **100 ft (30 m)** of Buildings, Structures, Walkways, and Roadways: Ground fence at maximum intervals of [**750 ft (225 m)**]<**Insert lesser distance if grounding resistance is high**>.

1) Gates and Other Fence Openings: Ground fence on each side of opening.

a) Bond metal gates to gate posts by connecting bonding jumper between gate post and gate frame.

b) Bond across openings, with and without gates, except at openings indicated as intentional fence discontinuities. Use 2 AWG wire and bury it at least **18 inch (460 mm)** below finished grade.

d. Protection at Crossings of Overhead Electrical Power Lines: Ground fence at location of power line crossing and at maximum distance of **150 ft (45 m)** on each side of crossing.

e. Bonding to Lightning-Protection System: If fence terminates at lightning-protected building or structure, ground fence and bond fence grounding conductor to lightning-protection down conductor or lightning-protection grounding conductor, complying with NFPA 780.

3.6 FIELD QUALITY CONTROL FOR GROUNDING AND BONDING

A. Administrant for Electrical Power Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Acceptance Testing Preparation:

1. <**Insert requirements**>.

C. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

D. Tests and Inspections:

1. After installing grounding system but before permanent electrical circuits have been energized, test for compliance with requirements.
2. Inspect physical and mechanical condition. Verify tightness of accessible, bolted, electrical connections with calibrated torque wrench in accordance with manufacturer's published instructions.
3. Test completed grounding system at each location where maximum ground-resistance level is specified, at service disconnect enclosure grounding terminal[**, at ground test wells**][**, and at individual ground rods**]. Make tests at ground rods before conductors are connected.

    a. Measure ground resistance no fewer than two full days after last trace of precipitation and without soil being moistened by means other than natural drainage or seepage and without chemical treatment or other artificial means of reducing natural ground resistance.
    b. Perform tests by fall-of-potential method in accordance with IEEE Std 81.
    c. Excessive Ground Resistance: If resistance to ground exceeds specified values, notify Architect promptly and include recommendations to reduce ground resistance.

4. Prepare dimensioned Drawings locating each test well, ground rod and ground-rod assembly, and other grounding electrodes. Identify each by letter in alphabetical order, and key to record of tests and observations. Include number of rods driven and their depth at each location, and include observations of weather and other phenomena that may affect test results. Describe measures taken to improve test results.

E. Nonconforming Work:

1. Grounding system will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective components and retest.

F. Collect, assemble, and submit test and inspection reports.

1. Report measured ground resistances that exceed the following values:

    a. Power and Lighting Equipment or System with Capacity of 500 kVA and Less: [**10 Ω**]<**Insert ohms**>.
    b. Power and Lighting Equipment or System with Capacity of 500 to 1000 kVA: [**5 Ω**]<**Insert ohms**>.
    c. Power and Lighting Equipment or System with Capacity More Than 1000 kVA: [**3 Ω**]<**Insert ohms**>.
    d. Power Distribution Units or Panelboards Serving Electronic Equipment: [**1 Ω**][**3 Ω**]<**Insert ohms**>.
    e. Substations and Pad-Mounted Equipment: [**5 Ω**]<**Insert ohms**>.
    f. Manhole Grounds: [**10 Ω**]<**Insert ohms**>.
    g. <**Insert application and maximum ground-resistance**>.

3.7 PROTECTION

A. After installation, protect grounding and bonding cables and equipment from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

SECTION 26 05 29 00 - HANGERS AND SUPPORTS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Support systems.
2. Mounting, anchoring, and attachment components.
3. Installation of fabricated metal supports.
4. Installation of concrete bases.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies basis-of-design environmental conditions and performance criteria that are applicable to product selection and installation of the Work on the Project.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies basis-of-design seismic and wind criteria for nonstructural components on the Project.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
4. Section 033000 "Cast-in-Place Concrete" specifies concrete materials, reinforcement, and placement requirements referenced by this Section.
5. Section 055000 "Metal Fabrications" specifies site-fabricated metal supports referenced by this Section.
6. [**Section 099113 "Exterior Painting"**][**Section 099123 "Interior Painting"**][**and**][**Section 099600 "High-Performance Coatings"**] specify cleaning and touchup painting of field welds, bolted connections, and abraded areas of shop paint on miscellaneous metal referenced by this Section.
7. Section 260548 "Vibration and Seismic Controls for Electrical Systems" specifies vibration controls, seismic restraints, and wind restraints referenced by this Section.

1.2 DELEGATED DESIGN SERVICES

A. Delegated Design Professionals: Engage qualified structural professional engineer to design hangers and supports for electrical systems.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for the following:

a. Slotted support systems, hardware, and accessories.
b. Clamps.
c. Hangers.
d. Sockets.
e. Eye nuts.

f. Fasteners.
g. Anchors.
h. Saddles.
i. Brackets.
j. <**Insert product type**>.

2. Include rated capacities and furnished specialties and accessories.

B. Shop Drawings: For fabrication and installation details for electrical hangers and support systems.

1. Hangers. Include product data for components.
2. Slotted support systems.
3. Equipment supports.
4. Vibration Isolation Base Details: Detail fabrication including anchorages and attachments to structure and to supported equipment. Include adjustable motor bases, rails, and frames for equipment mounting.

C. Delegated Design Submittals: For hangers and supports for electrical systems.

1. Include design calculations and details of hangers.
2. Include design calculations for seismic restraints.

1.4 INFORMATIONAL SUBMITTALS

A. Welding certificates.

1.5 REGULATORY AGENCY APPROVALS

A. Delegated design submittals and shop drawings requiring approval by authorities having jurisdiction must be signed by qualified structural professional engineer responsible for their preparation. [**Obtain approval by authorities having jurisdiction prior to submitting for action by Architect.**][**Submit for action by Architect prior to submitting for approval by authorities having jurisdiction.**]

1.6 QUALIFICATIONS

A. Structural Professional Engineer: Professional engineer possessing active qualifications specified in Section 014000 "Quality Requirements," with expertise in structural engineering, including design of seismic and wind controls, equipment hangers and supports, and concrete foundations.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Prepare design calculations in accordance with criteria specified in Section 260010 "Supplemental Requirements for Electrical" and Section 018123 "Facility Seismic and Wind Criteria."

B. Surface-Burning Characteristics: Comply with ASTM E84; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Flame Rating: Class 1.
2. Self-extinguishing according to ASTM D635.

2.2 SUPPORT SYSTEMS

A. Steel Slotted Support Systems :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Allied Tube & Conduit; Atkore International**]
    c. [**Atkore Unistrut**]
    d. [**CADDY; brand of nVent Electrical plc**]
    e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    f. [**Flex-Strut Inc.**]
    g. [**G-Strut**]
    h. [**Gripple Inc.**]
    i. [**Haydon Corporation**]
    j. [**Metal Ties Innovation**]
    k. [**MIRO Industries Inc.**]
    l. [**Rocket Rack; Robroy Industries**]
    m. [**Wesanco/ZSi-Foster; an Ideal Tridon Group Company**]
    n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Allied Tube & Conduit; Atkore International**]
    c. [**Atkore Unistrut**]
    d. [**CADDY; brand of nVent Electrical plc**]
    e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    f. [**Flex-Strut Inc.**]
    g. [**G-Strut**]
    h. [**Gripple Inc.**]
    i. [**Haydon Corporation**]
    j. [**Metal Ties Innovation**]
    k. [**MIRO Industries Inc.**]
    l. [**Rocket Rack; Robroy Industries**]
    m. [**Wesanco/ZSi-Foster; an Ideal Tridon Group Company**]
    n. <**Insert manufacturer's name**>

3. Standard Features: Preformed steel channels and angles with minimum **13/32 inch (10 mm)** diameter holes at a maximum of **8 inch (200 mm)** on center in at least one surface.

    a. Referenced Standard: MFMA-4 factory-fabricated components for field assembly.
    b. Material for Channel, Fittings, and Accessories: [**Galvanized steel**][**Plain steel**][**Stainless steel, Type 304**][**Stainless steel, Type 316**].
    c. Channel Width: [**Selected for applicable load criteria**][**1-5/8 inch (41.25 mm)**][**1-1/4 inch (31.75 mm)**][**13/16 inch (20.64 mm)**]<**Insert dimension**>.
    d. Metallic Coatings: Hot-dip galvanized after fabrication and applied according to MFMA-4.

e. Nonmetallic Coatings: Manufacturer's standard PVC, polyurethane, or polyester coating applied according to MFMA-4.
f. Painted Coatings: Manufacturer's standard painted coating applied according to MFMA-4.
g. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

B. Aluminum Slotted Support Systems :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Atkore Unistrut**]
c. [**Eaton**]
d. [**Flex-Strut Inc.**]
e. [**Haydon Corporation**]
f. [**MKT Metal Manufacturing**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Atkore Unistrut**]
c. [**Eaton**]
d. [**Flex-Strut Inc.**]
e. [**Haydon Corporation**]
f. [**MKT Metal Manufacturing**]
g. <**Insert manufacturer's name**>

3. Standard Features: Extruded-aluminum channels and angles with minimum **13/32 inch (10 mm)** diameter holes at a maximum of **8 inch (200 mm)** on center in at least one surface.

a. Referenced Standard: MFMA-4 factory-fabricated components for field assembly.
b. Channel Material: 6063-T5 aluminum alloy.
c. Fittings and Accessories Material: 5052-H32 aluminum alloy.
d. Channel Width: [**Selected for applicable load criteria**][**1-5/8 inch (41.25 mm)**][**1-1/4 inch (31.75 mm)**][**13/16 inch (20.64 mm)**]<**Insert dimension**>.
e. Nonmetallic Coatings: Manufacturer's standard PVC, polyurethane, or polyester coating applied according to MFMA-4.
f. Painted Coatings: Manufacturer's standard painted coating applied according to MFMA-4.
g. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

C. Nonmetallic Slotted Support Systems :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Allied Tube & Conduit; Atkore International**]

b. [**Atkore Unistrut**]
c. [**Champion Fiberglass, Inc**]
d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
e. [**Fabco Plastics Wholesale Limited**]
f. [**G-Strut**]
g. [**Haydon Corporation**]
h. [**Seasafe, Inc.; AMICO, a Gibraltar Industries Company**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Allied Tube & Conduit; Atkore International**]
b. [**Atkore Unistrut**]
c. [**Champion Fiberglass, Inc**]
d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
e. [**Fabco Plastics Wholesale Limited**]
f. [**G-Strut**]
g. [**Haydon Corporation**]
h. [**Seasafe, Inc.; AMICO, a Gibraltar Industries Company**]
i. <**Insert manufacturer's name**>

3. Standard Features: Structural-grade, factory-formed, glass-fiber-resin channels and angles with minimum **13/32 inch (10 mm)** diameter holes at a maximum of **8 inch (200 mm)** on center, in at least one surface.

a. Standard: Comply with MFMA-4 factory-fabricated components for field assembly.
b. Channel Width: [**Selected for applicable load criteria**][**1-5/8 inch (41.25 mm)**][**1-1/4 inch (31.75 mm)**][**13/16 inch (20.64 mm)**]<**Insert dimension**>.
c. Fittings and Accessories: Products provided by channel and angle manufacturer and designed for use with those items.
d. Fitting and Accessory Materials: Same as those for channels and angles[**, except metal items may be stainless steel**].
e. Rated Strength: Selected to suit applicable load criteria.
f. Protect finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

D. Conduit and Cable Support Devices:

1. Standard Features: [**Steel**][**Steel and malleable-iron**][**Stainless steel**][**Glass-fiber-resin**] hangers, clamps, and associated fittings, designed for types and sizes of raceway or cable to be supported.

E. Support for Conductors in Vertical Conduit:

1. Standard Features: Factory-fabricated assembly consisting of threaded body and insulating wedging plug or plugs for nonarmored electrical conductors or cables in riser conduits. Plugs must have number, size, and shape of conductor gripping pieces as required to suit individual conductors or cables supported. Body must be made of malleable iron.

F. Structural Steel for Fabricated Supports and Restraints:

1. Standard Features: ASTM A36/A36M steel plates, shapes, and bars; black and galvanized.

2.3 MOUNTING, ANCHORING, AND ATTACHMENT COMPONENTS

A. Powder-Actuated Fasteners :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Hilti, Inc.**]
   b. [**ITW Ramset/Red Head; Illinois Tool Works, Inc.**]
   c. [**MKT Fastening, LLC**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Hilti, Inc.**]
   b. [**ITW Ramset/Red Head; Illinois Tool Works, Inc.**]
   c. [**MKT Fastening, LLC**]
   d. <**Insert manufacturer's name**>

3. Standard Features: Threaded-steel stud, for use in hardened portland cement concrete, steel, or wood, with tension, shear, and pullout capacities appropriate for supported loads and building materials where used.

B. Mechanical-Expansion Anchors :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   b. [**Empire Industries, Inc.**]
   c. [**Hilti, Inc.**]
   d. [**ITW Ramset/Red Head; Illinois Tool Works, Inc.**]
   e. [**MKT Fastening, LLC**]
   f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   b. [**Empire Industries, Inc.**]
   c. [**Hilti, Inc.**]
   d. [**ITW Ramset/Red Head; Illinois Tool Works, Inc.**]
   e. [**MKT Fastening, LLC**]
   f. <**Insert manufacturer's name**>

3. Standard Features: Insert-wedge-type, [**zinc-coated**][**stainless**] steel, for use in hardened portland cement concrete, with tension, shear, and pullout capacities appropriate for supported loads and building materials where used.

C. Concrete Inserts:

1. Standard Features: Steel or malleable-iron, slotted support system units are similar to MSS Type 18 units and comply with MFMA-4 or MSS SP-58.

D. Clamps for Attachment to Steel Structural Elements:

1. Standard Features: MSS SP-58 units are suitable for attached structural element.

E. Through Bolts:

1. Standard Features: Structural type, hex head, and high strength. Comply with ASTM F3125/F3125M, **Grade A325 (Grade A325M)**.

F. Toggle Bolts:

1. Standard Features: [**All**][**Stainless**] steel springhead type.

G. Hanger Rods:

1. Standard Features: Threaded steel.

PART 3 - EXECUTION

3.1 SELECTION OF HANGERS AND SUPPORTS

A. Maximum Support Spacing and Minimum Hanger Rod Size for Raceways: Space supports for EMT, IMC, and ERMC as [**required by**][**scheduled in NECA NEIS 1, where its Table 1 lists maximum spacings that are less than those stated in**] NFPA 70. Minimum rod size must be **1/4 inch (6 mm)** in diameter.

B. Multiple Raceways or Cables: Install trapeze-type supports fabricated with steel slotted [**or other**]support system, sized so capacity can be increased by at least [**25**]<**Insert number**> percent in future without exceeding specified design load limits.

1. Secure raceways and cables to these supports with [**two-bolt conduit clamps**][**single-bolt conduit clamps**][**single-bolt conduit clamps using spring friction action for retention in support channel**].

C. Spring-steel clamps designed for supporting single conduits without bolts may be used for **1-1/2 inch (38 mm)** and smaller raceways serving branch circuits and communication systems above suspended ceilings, and for fastening raceways to trapeze supports.

3.2 INSTALLATION OF HANGERS AND SUPPORTS

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Hot Work: NFPA 51B.

3. Work in Confined Spaces: NFPA 350.
4. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
5. Installation of Steel Conduit: NECA NEIS 101.
6. Installation of Aluminum Conduit: NECA NEIS 102.
7. Installation of Metal Cable Tray Systems: NECA NEIS 105.
8. Installation of Nonmetallic Cable Tray Systems: NECA NEIS 111.
9. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Raceway Support Methods: In addition to methods described in NECA NEIS 1, [**EMT**][**IMC**][**and**][**ERMC**] may be supported by openings through structure members, in accordance with NFPA 70.
2. Strength of Support Assemblies: Where not indicated, select sizes of components so strength will be adequate to carry present and future static loads within specified loading limits. Minimum static design load used for strength determination must be weight of supported components plus **200 lb (90 kg)**.
3. Mounting and Anchorage of Surface-Mounted Equipment and Components: Anchor and fasten electrical items and their supports to building structural elements by the following methods unless otherwise indicated by code:

    a. To Wood: Fasten with lag screws or through bolts.
    b. To New Concrete: Bolt to concrete inserts.
    c. To Masonry: Approved toggle-type bolts on hollow masonry units and expansion anchor fasteners on solid masonry units.
    d. To Existing Concrete: Expansion anchor fasteners.
    e. Instead of expansion anchors, powder-actuated driven threaded studs provided with lock washers and nuts may be used in existing standard-weight concrete **4 inch (100 mm)** thick or greater. Do not use for anchorage to lightweight-aggregate concrete or for slabs less than **4 inch (100 mm)** thick.
    f. To Steel: [**Welded threaded studs complying with AWS D1.1/D1.1M, with lock washers and nuts**][**Beam clamps (MSS SP-58, Type 19, 21, 23, 25, or 27), complying with MSS SP-69**][**Spring-tension clamps**].
    g. To Light Steel: Sheet metal screws.
    h. Items Mounted on Hollow Walls and Nonstructural Building Surfaces: Mount cabinets, panelboards, disconnect switches, control enclosures, pull and junction boxes, transformers, and other devices on slotted-channel racks attached to substrate[**by means that comply with seismic-restraint strength and anchorage requirements**].

4. Drill holes for expansion anchors in concrete at locations and to depths that avoid the need for reinforcing bars.

D. Interfaces with Other Work:

1. Provide [**vibration**][**and**][**seismic**] controls with hangers and supports.
2. Touchup Finishes:

    a. Clean field welds and abraded areas of shop paint. Paint exposed areas immediately after erecting hangers and supports. Use same materials as used for shop painting. Comply with SSPC-PA 1 requirements for touching up field-painted surfaces.

        1) Apply paint by brush or spray to provide minimum dry film thickness of **2.0 mils (0.05 mm)**.

    b. Cleaning and touchup painting of field welds, bolted connections, and abraded areas of

shop paint on miscellaneous metal.

c. Galvanized Surfaces: Clean welds, bolted connections, and abraded areas and apply galvanizing-repair paint to comply with ASTM A780.

3. Installation of Fabricated Metal Supports:

a. Provide site-fabricated metal supports.
b. Cut, fit, and place miscellaneous metal supports accurately in location, alignment, and elevation to support and anchor electrical materials and equipment.
c. Field Welding: Comply with AWS D1.1/D1.1M. Submit welding certificates.

4. Installation of Concrete Bases:

a. Provide concrete bases of dimensions indicated, but not less than **4 inch (100 mm)** larger in both directions than supported unit, and so anchors will be a minimum of 10 bolt diameters from edge of the base.
b. Use [**3000 psi (20.7 MPa)**]<**Insert value**>, 28-day compressive-strength concrete.
c. Anchor equipment to concrete base as follows:

1) Place and secure anchorage devices. Use supported equipment manufacturer's setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
2) Install anchor bolts to elevations required for proper attachment to supported equipment.
3) Install anchor bolts according to anchor-bolt manufacturer's written instructions.

SECTION 26 05 33 13 - CONDUITS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Type EMT duct raceways and elbows.
2. Type ENT duct raceways and fittings.
3. Type HDPE and Type EPEC duct raceways and fittings.
4. Type ERMC duct raceways, elbows, couplings, and nipples.
5. Type FMC duct raceways.
6. Type FMT duct raceways.
7. Type IMC duct raceways.
8. Type LFMC duct raceways.
9. Type LFNC duct raceways.
10. Type PVC duct raceways and fittings.
11. Type RTRC duct raceways and fittings.
12. Fittings for conduit, tubing, and cable.
13. Joint compounds.
14. Solvent cements.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural load design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 078413 "Penetration Firestopping" specifies firestopping referenced by this Section.
5. Section 260519 "Low-Voltage for Electrical Power Conductors and Cables" specifies nonmetallic underground conduit with conductors (Type NUCC).
6. Section 260529 "Hangers and Supports for Electrical Systems" specifies conduit hangers and supports referenced by this Section.
7. Section 260543 "Underground Ducts and Raceways for Electrical Systems" specifies exterior duct banks, manholes, and underground utility construction.
8. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels.
9. Section 270528 "Pathways for Communications Systems"[**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for installation of conduits for communications cabling.

1.2 REFERENCES

A. Abbreviations and Acronyms for Electrical Raceway Types:

1. EMT: Electrical metallic tubing.
2. EMT-A: Aluminum electrical metallic tubing.
3. EMT-S: Steel electrical metallic tubing.

4. EMT-SS: Stainless steel electrical metallic tubing.
5. ENT: Electrical nonmetallic tubing.
6. EPEC: Electrical HDPE underground conduit (thin wall).
7. EPEC-A: Type A electrical HDPE underground conduit.
8. EPEC-B: Type B electrical HDPE underground conduit.
9. ERMC: Electrical rigid metal conduit.
10. ERMC-A: Aluminum electrical rigid metal conduit.
11. ERMC-S: Steel electrical rigid metal conduit.
12. ERMC-S-G: Galvanized-steel electrical rigid metal conduit.
13. ERMC-S-PVC: PVC-coated-steel electrical rigid metal conduit.
14. ERMC-SS: Stainless steel electrical rigid metal conduit.
15. FMC: Flexible metal conduit.
16. FMC-A: Aluminum flexible metal conduit.
17. FMC-S: Steel flexible metal conduit.
18. FMT: Steel flexible metallic tubing.
19. FNMC: Flexible nonmetallic conduit. See "LFNC."
20. HDPE: HDPE underground conduit (thick wall).
21. HDPE-40: Schedule 40 HDPE underground conduit.
22. HDPE-80: Schedule 80 HDPE underground conduit.
23. IMC: Steel electrical intermediate metal conduit.
24. LFMC: Liquidtight flexible metal conduit.
25. LFMC-A: Aluminum liquidtight flexible metal conduit.
26. LFMC-S: Steel liquidtight flexible metal conduit.
27. LFMC-SS: Stainless steel liquidtight flexible metal conduit.
28. LFNC: Liquidtight flexible nonmetallic conduit.
29. LFNC-A: Layered (Type A) liquidtight flexible nonmetallic conduit.
30. LFNC-B: Integral (Type B) liquidtight flexible nonmetallic conduit.
31. LFNC-C: Corrugated (Type C) liquidtight flexible nonmetallic conduit.
32. PVC: Rigid PVC conduit.
33. PVC-40: Schedule 40 rigid PVC conduit.
34. PVC-80: Schedule 80 rigid PVC Conduit.
35. PVC-A: Type A rigid PVC concrete-encased conduit.
36. PVC-EB: Type EB rigid PVC concrete-encased underground conduit.
37. RGS: See ERMC-S-G.
38. RMC: See ERMC.
39. RTRC: Reinforced thermosetting resin conduit.
40. RTRC-AG: Low-halogen, aboveground reinforced thermosetting resin conduit.
41. RTRC-AG-HW: Heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
42. RTRC-AG-SW: Standard wall, low-halogen, aboveground reinforced thermosetting resin conduit.
43. RTRC-AG-XW: Extra heavy wall, low-halogen, aboveground reinforced thermosetting resin conduit.
44. RTRC-BG: Low-halogen, belowground reinforced thermosetting resin conduit.

B. Definitions:

1. Conduit: A structure containing one or more duct raceways.
2. Direct Buried: Installed underground without encasement in concrete or other protective material.
3. Duct Bank: An arrangement of conduit providing one or more continuous duct raceways between two points.
4. Duct Raceway: A single enclosed raceway for conductors or cable.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

C. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

1.5 QUALIFICATIONS

A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.

B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.

C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site electrical testing supervisors must possess active NICET EPT Technician [**III**][**IV**] certification.

D. ERMC-S-PVC Installers: Installer possessing active qualifications specified in Section 014000 "Quality Requirements," and able to present unexpired certified Installer credentials issued by ERMC-S-PVC manufacturer prior to starting installation.

E. Communications Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site communications testing supervisor must have [**BICSI Technician (TECH)**]<**Insert certification program**> certification and documented training, and be experienced with testing communications equipment in accordance with [**BICSI**]<**Insert code enforced by authorities having jurisdiction**> testing standards.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

B. <**Insert additional performance requirements for the Project**>.

2.2 TYPE EMT DUCT RACEWAYS AND ELBOWS

A. UL FJMX - Aluminum Electrical Metal Tubing (EMT-A) and Elbows:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC**]
    b. [**Patriot Aluminum Products, LLC**]
    c. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC**]
    b. [**Patriot Aluminum Products, LLC**]
    c. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
    d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN FJMX; including UL 797A.

4. Standard Features:

    a. Material: Aluminum.
    b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

B. UL FJMX - Stainless Steel Electrical Metal Tubing (EMT-SS) and Elbows:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Calconduit; Atkore International**]
b. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Calconduit; Atkore International**]
b. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
c. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN FJMX; including UL 797A.

4. Standard Features:

a. Material: Stainless steel.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

C. UL FJMX - Steel Electrical Metal Tubing (EMT-S) and Elbows:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**Allied Tube & Conduit; Atkore International**]
b. [**Calconduit; Atkore International**]
c. [**Emerson Electric Co., Automation Solutions**]
d. [**Picoma; Zekelman Industries**]
e. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
f. [**Topaz Lighting & Electric**]
g. [**Western Tube; Zekelman Industries**]
h. [**Wheatland Tube; Zekelman Industries**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Allied Tube & Conduit; Atkore International**]
b. [**Calconduit; Atkore International**]
c. [**Emerson Electric Co., Automation Solutions**]
d. [**Picoma; Zekelman Industries**]
e. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
f. [**Topaz Lighting & Electric**]
g. [**Western Tube; Zekelman Industries**]
h. [**Wheatland Tube; Zekelman Industries**]
i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN FJMX; including UL 797.

4. Standard Features:

a. Material: Steel.
b. Exterior Coating: [**Zinc**][**Alternate corrosion-resistant coating**].
c. Interior Coating: [**Zinc with organic top coating**][**Zinc**][**Organic coating**].
d. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

2.3 TYPE ENT DUCT RACEWAYS AND FITTINGS

A. UL FKHU - Electrical Nonmetallic Tubing (ENT) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Cantex Inc.**]
c. [**JM Eagle**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Cantex Inc.**]
c. [**JM Eagle**]
d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN FKHU; including UL 1653.

4. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

5. Other Available Features Required by the Project:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade**

size 3/4)].

b. Fittings:

1) Mechanically Attached Fittings: UL 1653.
2) Solvent-Attached Fittings: UL 651.

2.4 TYPE HDPE AND TYPE EPEC DUCT RACEWAYS AND FITTINGS

A. UL EAZX - Schedule 40 Electrical HDPE Underground Conduit (HDPE-40):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Blue Diamond Industries, LLC**]
b. [**JM Eagle**]
c. [**Petroflex North America**]
d. [**Prysmian Cables and Systems; Prysmian Group North America**]
e. [**Southwire Company, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Blue Diamond Industries, LLC**]
b. [**JM Eagle**]
c. [**Petroflex North America**]
d. [**Prysmian Cables and Systems; Prysmian Group North America**]
e. [**Southwire Company, LLC**]
f. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN EAZX; including UL 651A.

4. Standard Features:

a. Dimensional Specifications: Schedule 40.

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute

standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

B. UL EAZX - Schedule 80 Electrical HDPE Underground Conduit (HDPE-80):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Blue Diamond Industries, LLC**]
b. [**JM Eagle**]
c. [**Petroflex North America**]
d. [**Prysmian Cables and Systems; Prysmian Group North America**]
e. [**Southwire Company, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Blue Diamond Industries, LLC**]
b. [**JM Eagle**]
c. [**Petroflex North America**]
d. [**Prysmian Cables and Systems; Prysmian Group North America**]
e. [**Southwire Company, LLC**]
f. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN EAZX; including UL 651A.

4. Standard Features:

a. Dimensional Specifications: Schedule 80.

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute

standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

C. UL EAZX - Type A Electrical HDPE Underground Conduit (EPEC-A):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN EAZX; including UL 651A.

4. Standard Features:

a. Dimensional Specifications: Type A.

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.

b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

D. UL EAZX - Type B Electrical HDPE Underground Conduit (EPEC-B):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN EAZX; including UL 651A.

4. Standard Features:

   a. Dimensional Specifications: Type B.

5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

   a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

2.5 TYPE ERMC DUCT RACEWAYS, ELBOWS, COUPLINGS, AND NIPPLES

A. UL DYWV - Aluminum Electrical Rigid Metal Conduit (ERMC-A), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC**]
d. [**Appleton; Emerson Electric Co., Automation Solutions**]
e. [**Calconduit; Atkore International**]
f. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
g. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Patriot Aluminum Products, LLC**]
i. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
j. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
k. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
l. [**Topaz Lighting & Electric**]
m. [**Western Tube; Zekelman Industries**]
n. [**Wheatland Tube; Zekelman Industries**]
o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**American Conduit; Norsk Hydro ASA, Hydro Extrusion USA LLC**]
d. [**Appleton; Emerson Electric Co., Automation Solutions**]
e. [**Calconduit; Atkore International**]
f. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
g. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Patriot Aluminum Products, LLC**]
i. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
j. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
k. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
l. [**Topaz Lighting & Electric**]
m. [**Western Tube; Zekelman Industries**]
n. [**Wheatland Tube; Zekelman Industries**]
o. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DYWV; including UL 6A.

4. Standard Features:

a. Material: Aluminum.
b. Protective Coating: Provide protective coating for [**use in concrete**][**direct burial**][**use in severely corrosive environment**].
c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability

report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.

b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

B. UL DYWV - Stainless Steel Electrical Rigid Metal Conduit (ERMC-SS), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Calconduit; Atkore International**]
d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
e. [**Patriot Aluminum Products, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Calconduit; Atkore International**]
d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
e. [**Patriot Aluminum Products, LLC**]
f. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DYWV; including UL 6A.

4. Standard Features:

a. Material: Stainless steel.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

C. UL DYIX - Galvanized-Steel Electrical Rigid Metal Conduit (ERMC-S-G), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Allied Tube & Conduit; Atkore International**]
b. [**Calconduit; Atkore International**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**Patriot Aluminum Products, LLC**]
f. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
g. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
h. [**Topaz Lighting & Electric**]
i. [**Western Tube; Zekelman Industries**]
j. [**Wheatland Tube; Zekelman Industries**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Allied Tube & Conduit; Atkore International**]
b. [**Calconduit; Atkore International**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**Patriot Aluminum Products, LLC**]
f. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
g. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
h. [**Topaz Lighting & Electric**]
i. [**Western Tube; Zekelman Industries**]
j. [**Wheatland Tube; Zekelman Industries**]
k. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in

accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DYIX; including UL 6.

4. Standard Features:

a. Exterior Coating: Zinc.
b. Interior Coating: [**Zinc with organic top coating**][**Zinc**][**Organic coating**].
c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

D. UL DYIX - PVC-Coated-Steel Electrical Rigid Metal Conduit (ERMC-S-PVC), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Bluesteel Services LLC**]
c. [**Calbond; Atkore International**]
d. [**KorKap; Robroy Industries**]
e. [**Perma-Cote; Robroy Industries**]
f. [**Plasti-Bond; Robroy Industries**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Bluesteel Services LLC**]
c. [**Calbond; Atkore International**]
d. [**KorKap; Robroy Industries**]

e. [**Perma-Cote; Robroy Industries**]
f. [**Plasti-Bond; Robroy Industries**]
g. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN DYIX; including UL 6.

4. Standard Features:

   a. Exterior Coating: PVC complying with NEMA RN 1.
   b. Interior Coating: [**Zinc with organic top coating**][**Zinc**][**Organic coating**].
   c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

   a. Colors: As indicated on the Drawings.
   b. Conduit Fittings for Hazardous (Classified) Locations: UL 1203.
   c. Expansion and Deflection Fittings: UL 651 with flexible bonding jumper.

2.6 TYPE FMC DUCT RACEWAYS

A. UL DXUZ - Steel Flexible Metal Conduit (FMC-S):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
   c. [**Electri-Flex Company**]
   d. [**International Metal Hose Co.**]
   e. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]

f. [**Topaz Lighting & Electric**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
c. [**Electri-Flex Company**]
d. [**International Metal Hose Co.**]
e. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
f. [**Topaz Lighting & Electric**]
g. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DXUZ; including UL 1.

4. Standard Features:

a. Material: Steel.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

B. UL DXUZ - Aluminum Flexible Metal Conduit (FMC-A):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]

b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
c. [**Electri-Flex Company**]
d. [**Topaz Lighting & Electric**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
c. [**Electri-Flex Company**]
d. [**Topaz Lighting & Electric**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DXUZ; including UL 1.

4. Standard Features:

a. Material: Aluminum.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

2.7 TYPE FMT DUCT RACEWAYS

A. UL ILJW - Steel Flexible Metallic Tubing (FMT):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Electri-Flex Company**]
b. [**International Metal Hose Co**]
c. [**Liquid Tight Connector Co.**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Electri-Flex Company**]
b. [**International Metal Hose Co**]
c. [**Liquid Tight Connector Co.**]
d. [**Southwire Company, LLC**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN ILJW; including UL Subject 1652.

4. Standard Features:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

2.8 TYPE IMC DUCT RACEWAYS

A. UL DYBY - Steel Intermediate Metal Conduit (IMC):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering**

products that may be incorporated into the Work include, but are not limited to, the following]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Calconduit; Atkore International**]
d. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
e. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
f. [**Topaz Lighting & Electric**]
g. [**Western Tube; Zekelman Industries**]
h. [**Wheatland Tube; Zekelman Industries**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Calconduit; Atkore International**]
d. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
e. [**Rymco USA brand; manufactured and listed by subsidiary Conduit S.A. de C.V**]
f. [**Topaz Lighting & Electric**]
g. [**Western Tube; Zekelman Industries**]
h. [**Wheatland Tube; Zekelman Industries**]
i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DYBY; including UL 1242.

4. Standard Features:

a. Exterior Coating: [**Zinc**][**Alternative corrosion-resistant coating**].
b. Interior Coating: [**Zinc with organic top coating**][**Zinc**][**Organic coating**].
c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

    a. Colors: As indicated on the Drawings.

2.9 TYPE LFMC DUCT RACEWAYS

A. UL DXHR - Steel Liquidtight Flexible Metal Conduit (LFMC-S):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
    c. [**Electri-Flex Company**]
    d. [**International Metal Hose Co**]
    e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
    c. [**Electri-Flex Company**]
    d. [**International Metal Hose Co**]
    e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN DXHR; including UL 360.

4. Standard Features:

    a. Material: Steel.
    b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate

scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

   a. Colors: As indicated on the Drawings.

B. UL DXHR - Stainless Steel Liquidtight Flexible Metal Conduit (LFMC-SS):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
   c. [**Electri-Flex Company**]
   d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Anaconda Sealtite; Anamet Electrical, Inc**]
   c. [**Electri-Flex Company**]
   d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN DXHR; including UL 360.

4. Standard Features:

   a. Material: Stainless steel.
   b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

    a. Colors: As indicated on the Drawings.

2.10 TYPE LFNC DUCT RACEWAYS

A. UL DXOQ - Layered (Type A) Liquidtight Flexible Nonmetallic Conduit (LFNC-A):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**AFC Cable Systems; Atkore International**]
    b. [**Electri-Flex Company**]
    c. [**Topaz Lighting & Electric**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**AFC Cable Systems; Atkore International**]
    b. [**Electri-Flex Company**]
    c. [**Topaz Lighting & Electric**]
    d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN DXOQ; including UL 1660.

4. Standard Features:

    a. Type A conduit with smooth seamless inner core and cover bonded together with one or more reinforcement layers between core and cover.
    b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
    c. Markings: [**80 deg C dry**][**90 deg C dry**][**105 deg C dry**][**70 deg C oil resistant**][**Sunlight resistant**][**Outdoor**][**Direct burial**][**Complies with flame test in cable trays**].

5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

B. UL DXOQ - Integral (Type B) Liquidtight Flexible Nonmetallic Conduit (LFNC-B):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Cambridge Resources**]
c. [**Electri-Flex Company**]
d. [**Superflex Ltd.**]
e. [**Topaz Lighting & Electric**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Cambridge Resources**]
c. [**Electri-Flex Company**]
d. [**Superflex Ltd.**]
e. [**Topaz Lighting & Electric**]
f. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DXOQ; including UL 1660.

4. Standard Features:

a. Type B conduit with smooth inner surface with integral reinforcement within conduit wall.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
c. Markings: [**80 deg C dry**][**90 deg C dry**][**105 deg C dry**][**70 deg C oil resistant**][**Sunlight resistant**][**Outdoor**][**Direct burial**][**Complies with flame test in cable trays**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project

site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

C. UL DXOQ - Corrugated (Type C) Liquidtight Flexible Nonmetallic Conduit (LFNC-C):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**HellermannTyton**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**HellermannTyton**]
c. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DXOQ; including UL 1660.

4. Standard Features:

a. Type C conduit with corrugated internal and external surfaces without integral reinforcement within conduit wall.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
c. Markings: [**80 deg C dry**][**90 deg C dry**][**105 deg C dry**][**70 deg C oil resistant**][**Sunlight resistant**][**Outdoor**][**Direct burial**][**Complies with flame test in cable trays**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute

standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Colors: As indicated on the Drawings.

2.11 TYPE PVC DUCT RACEWAYS AND FITTINGS

A. UL DZYR - Schedule 40 Rigid PVC Conduit (PVC-40) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Calconduit; Atkore International**]
c. [**JM Eagle**]
d. [**NAPCO; Westlake Chemical Corp.**]
e. [**National Pipe and Plastic, Inc. (Oldcastle)**]
f. [**Opti-Com Manufacturing Network, Inc (OMNI)**]
g. [**Topaz Lighting & Electric**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Calconduit; Atkore International**]
c. [**JM Eagle**]
d. [**NAPCO; Westlake Chemical Corp.**]
e. [**National Pipe and Plastic, Inc. (Oldcastle)**]
f. [**Opti-Com Manufacturing Network, Inc (OMNI)**]
g. [**Topaz Lighting & Electric**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DZYR; including UL 651.

4. Standard Features:

a. Dimensional Specifications: Schedule 40.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
c. Markings: [**For use with maximum 90 deg C wire**][**For directional boring applications**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL DZYR - Schedule 80 Rigid PVC Conduit (PVC-80) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Calconduit; Atkore International**]
c. [**JM Eagle**]
d. [**National Pipe and Plastic, Inc. (Oldcastle)**]
e. [**Opti-Com Manufacturing Network, Inc (OMNI)**]
f. [**Topaz Lighting & Electric**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Calconduit; Atkore International**]
c. [**JM Eagle**]
d. [**National Pipe and Plastic, Inc. (Oldcastle)**]
e. [**Opti-Com Manufacturing Network, Inc (OMNI)**]
f. [**Topaz Lighting & Electric**]
g. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DZYR; including UL 651.

4. Standard Features:

a. Dimensional Specifications: Schedule 80.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
c. Markings: [**For use with maximum 90 deg C wire**][**For directional boring applications**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL DZYR - Type A Rigid PVC Concrete-Encased Conduit (PVC-A) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Southern Pipe, Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Southern Pipe, Inc.**]
b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DZYR; including UL 651.

4. Standard Features:

a. Dimensional Specifications: Type A.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard

development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL DZYR - Type EB Rigid PVC Concrete-Encased Underground Conduit (PVC-EB) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**JM Eagle**]
b. [**Southern Pipe, Inc.**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**JM Eagle**]
b. [**Southern Pipe, Inc.**]
c. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DZYR; including UL 651.

4. Standard Features:

a. Dimensional Specifications: Type EB.
b. Minimum Trade Size: [**Metric designator 53 (trade size 2)**][**Metric designator 78 (trade size 3)**][**Metric designator 103 (trade size 4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.12 TYPE RTRC DUCT RACEWAYS AND FITTINGS

A. UL DZKT - Heavy Wall, Low-Halogen, Aboveground Reinforced Thermosetting Resin Conduit (RTRC-AG-HW) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Champion Fiberglass, Inc**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Champion Fiberglass, Inc**]
    b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN DZKT; including UL 2515.

4. Standard Features:

    a. Additional Characteristics: Type AG-HW.
    b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL DZKT - Standard Wall, Low-Halogen, Aboveground Reinforced Thermosetting Resin Conduit (RTRC-AG-SW) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Champion Fiberglass, Inc**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert**

manufacturer's name; product name or designation> or comparable product by one of the following:

a. [**Champion Fiberglass, Inc**]
b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DZKT; including UL 2515.

4. Standard Features:

a. Additional Characteristics: Type SW.
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL DZKT - Extra Heavy Wall, Low-Halogen, Aboveground Reinforced Thermosetting Resin Conduit (RTRC-AG-XW) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Champion Fiberglass, Inc**]
b. [**FRE Composites**]
c. [**United Fiberglass of America (UFA)**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Champion Fiberglass, Inc**]
b. [**FRE Composites**]
c. [**United Fiberglass of America (UFA)**]
d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN DZKT; including UL 2515 and UL 2515A.

4. Standard Features:

    a. Additional Characteristics: Type AG-XW.
    b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL DZKT - Low-Halogen, Belowground Reinforced Thermosetting Resin Conduit (RTRC-BG) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Champion Fiberglass, Inc**]
    b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Champion Fiberglass, Inc**]
    b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN DZKT; including UL 2420.

4. Standard Features:

    a. Additional Characteristics: Type BG.

b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.13 FITTINGS FOR CONDUIT, TUBING, AND CABLE

A. UL EBMB - Duct Fittings for Hazardous (Classified) Locations:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
b. [**Power Feed-Thru Systems and Connectors LLC**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
b. [**Power Feed-Thru Systems and Connectors LLC**]
c. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN EBMB; including UL 1203.

4. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project

site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL DWTT - Fittings for Type ERMC, Type IMC, Type PVC, Type HDPE, Type EPEC, and Type RTRC Duct Raceways:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Konkore Fittings; Atkore International**]
e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
f. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Southwire Company, LLC**]
i. [**Topaz Lighting & Electric**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Konkore Fittings; Atkore International**]
e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
f. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Southwire Company, LLC**]
i. [**Topaz Lighting & Electric**]
j. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN DWTT; including UL 514B.

4. Standard Features:

a. Material: [**Steel**][**Die cast**].
b. Coupling Method: [**Compression coupling**][**Raintight compression coupling with distinctive color gland nut**][**Setscrew coupling. Setscrew couplings with only single screw per conduit are unacceptable**].

c. Expansion and Deflection Fittings: UL 651 with flexible bonding jumper.

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL FKAV - Fittings for Type EMT Duct Raceways:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Appleton; Emerson Electric Co., Automation Solutions**]
d. [**Calconduit; Atkore International**]
e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
f. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Southwire Company, LLC**]
i. [**Topaz Lighting & Electric**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Appleton; Emerson Electric Co., Automation Solutions**]
d. [**Calconduit; Atkore International**]
e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
f. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Southwire Company, LLC**]
i. [**Topaz Lighting & Electric**]
j. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN FKAV; including UL 514B.

4. Standard Features:

    a. Material: [**Steel**][**Die cast**].
    b. Coupling Method: [**Compression coupling**][**Raintight compression coupling with distinctive color gland nut**][**Setscrew coupling. Setscrew couplings with only single screw per conduit are unacceptable**].
    c. Expansion and Deflection Fittings: UL 651 with flexible bonding jumper.

5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL ILNR - Fittings for Type FMC Duct Raceways:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**American Fittings Corp. (AMFICO)**]
    b. [**Liquid Tight Connector Co.**]
    c. [**Southwire Company, LLC**]
    d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**American Fittings Corp. (AMFICO)**]
    b. [**Liquid Tight Connector Co.**]
    c. [**Southwire Company, LLC**]
    d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN ILNR; including UL 514B.

4. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts

of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL DXAS - Fittings for Type LFMC and Type LFNC Duct Raceways:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Arlington Industries, Inc.**]
   b. [**Liquid Tight Connector Co.**]
   c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Arlington Industries, Inc.**]
   b. [**Liquid Tight Connector Co.**]
   c. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN DXAS; including UL 514B.

4. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.14 JOINT COMPOUNDS

A. UL FOIZ - Electrically Conductive Corrosion-Resistant Compound for Threaded Conduit:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN FOIZ; including UL Subject 2419.

4. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.15 SOLVENT CEMENTS

A. UL VBEW - Solvent Cements for Nonmetallic Duct Raceways and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. **<Insert manufacturer's name>**

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. Solvent Cements: UL CCN VBEW; including UL 340.
b. Solvent Cement Compatibility with PVC Conduit Fittings: UL CCN DWTT; including UL 514B. Follow solvent manufacturer's published instructions.
c. Solvent Cement Compatibility with Rigid PVC Conduit: UL CCN DZYR; including UL 651. Follow solvent manufacturer's published instructions.
d. Solvent Cement Compatibility with Rigid EPEC and HDPE Underground Conduit: UL CCN EAZX; including UL 651A. Follow solvent manufacturer's published instructions.

4. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

PART 3 - EXECUTION

3.1 SELECTION OF CONDUITS FOR ELECTRICAL SYSTEMS

A. Unless more stringent requirements are specified in the Contract Documents or manufacturer's published instructions, comply with NFPA 70 for selection of duct raceways. Consult Architect for resolution of conflicting requirements.

B. Special Instructions Regarding HDPE Conduits: Although Article 353 of NFPA 70 permits use of HDPE conduits where encased in concrete aboveground, UL CCN EAZX listing requirements state that HDPE[**and EPEC**] underground conduits are intended only for use where direct buried with or without being encased in concrete. Specified Type HDPE[**and Type EPEC**] underground conduits are not permitted to be used aboveground on the Project.

C. Outdoors:

1. Exposed and Subject to Severe Physical Damage: [**ERMC**][**IMC**].
2. Exposed and Subject to Physical Damage: [**ERMC**][**IMC**][**Corrosion-resistant EMT**].
3. Exposed and Not Subject to Physical Damage: [**ERMC**][**IMC**][**Corrosion-resistant EMT**][**PVC-80**][**RTRC-AG**].

4. Concealed Aboveground: [**ERMC**][**IMC**][**EMT**][**PVC-80**][**PVC-40**][**RTRC-AG**].
5. Direct Buried: [**PVC-80**][**PVC-40**][**HDPE-80**][**HDPE-40**][**RTRC-BG**].
6. Concrete Encased Not in Trench: [**PVC-80**][**PVC-40**][**PVC-A**][**RTRC-BG**].
7. Concrete Encased in Trench: [**PVC-80**][**PVC-40**][**PVC-A**][**PVC-EB**][**HDPE-80**][**HDPE-40**][**EPEC-A**][**EPEC-B**][**RTRC-BG**].
8. Connection to Vibrating Equipment (Including Transformers and Hydraulic, Pneumatic, Electric Solenoid, or Motor-Driven Equipment): [**LFMC**][**LFNC-A**][**LFNC-B**].

D. Indoors:

1. Hazardous Classified Locations: [**ERMC**][**IMC**].
2. Exposed and Subject to Severe Physical Damage: [**ERMC**][**IMC**].
3. Exposed and Subject to Physical Damage: [**ERMC**][**IMC**][**EMT**].
4. Exposed and Not Subject to Physical Damage: [**ERMC**][**IMC**][**EMT**][**PVC-80**][**RTRC-AG**].
5. Concealed in Ceilings and Interior Walls and Partitions: [**ERMC**][**IMC**][**EMT**][**PVC-80**][**PVC-40**][**RTRC-AG**].
6. Damp or Wet Locations: [**ERMC**][**IMC**][**RTRC-AG**][**Corrosion-resistant EMT**].
7. Connection to Vibrating Equipment (Including Transformers and Hydraulic, Pneumatic, Electric Solenoid, or Motor-Driven Equipment): [**LFMC**][**FMC**][**LFNC-A**][**LFNC-B**].
8. Circuits Operating Above 60 Hz: [**EMT-A**][**ERMC-A**][**RTRC-AG**]. Provide nonmetallic sleeve where aluminum duct raceways pass through concrete.

E. Duct Fittings: Select fittings in accordance with NEMA FB 2.10 guidelines.

1. ERMC and IMC: Provide threaded-type fittings unless otherwise indicated.

3.2 INSTALLATION OF CONDUITS FOR ELECTRICAL SYSTEMS

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Safety: NFPA 70E.
3. Commissioning of Active and Passive Fire Protection Features: NFPA 3 and NFPA 4.
4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
5. Communications Work: BICSI N1.
6. Life Safety and Means of Egress Work: NFPA 101.
7. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
8. Work in Confined Spaces: NFPA 350.
9. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
10. Type EMT-A: Article 358 of NFPA 70 and NECA NEIS 102.
11. Type EMT-SS: Article 358 of NFPA 70 and NECA NEIS 101.
12. Type EMT-S: Article 358 of NFPA 70 and NECA NEIS 101.
13. Type ENT: Article 362 of NFPA 70 and NECA NEIS 102.
14. Type HDPE and Type EPEC: Article 353 of NFPA 70 and NECA NEIS 111.
15. Type ERMC-A: Article 344 of NFPA 70 and NECA NEIS 102.
16. Type ERMC-SS: Article 344 of NFPA 70 and NECA NEIS 101.
17. Type ERMC-S: Article 344 of NFPA 70 and NECA NEIS 101.
18. Type FMC-S: Article 348 of NFPA 70 and NECA NEIS 101.
19. Type FMC-A: Article 348 of NFPA 70 and NECA NEIS 102.
20. Type FMT: Article 360 of NFPA 70 and NECA NEIS 101.
21. Type IMC: Article 342 of NFPA 70 and NECA NEIS 101.

22. Type LFMC: Article 350 of NFPA 70 and NECA NEIS 101.
23. Type LFNC: Article 342 of NFPA 70 and NECA NEIS 111.
24. Type PVC: Article 356 of NFPA 70 and NECA NEIS 111.
25. Type RTRC: Article 355 of NFPA 70 and NECA NEIS 111.
26. Expansion Fittings: NEMA FB 2.40.
27. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. General Requirements for Installation of Duct Raceways:

a. Complete duct raceway installation before starting conductor installation.
b. Provide stub-ups through floors with coupling threaded inside for plugs, set flush with finished floor. Plug coupling until conduit is extended above floor to final destination or a minimum of **2 ft (0.6 m)** above finished floor.
c. Install no more than equivalent of three 90-degree bends in conduit run[**except for control wiring conduits, for which no more than equivalent of two 90-degree fewer bends are permitted**]. Support within **12 inch (300 mm)** of changes in direction.
d. Make bends in duct raceway using large-radius preformed ells except for parallel bends. Field bending must be in accordance with NFPA 70 minimum radii requirements. Provide only equipment specifically designed for material and size involved.
e. Conceal conduit within finished walls, ceilings, and floors unless otherwise indicated. Install conduits parallel or perpendicular to building lines.
f. Support conduit within **12 inch (300 mm)** of enclosures to which attached.
g. Install duct sealing fittings at accessible locations in accordance with NFPA 70 and fill them with listed sealing compound. For concealed duct raceways, install fitting in flush steel box with blank cover plate having finish similar to that of adjacent plates or surfaces. Install duct sealing fittings in accordance with NFPA 70.
h. Install devices to seal duct raceway interiors at accessible locations. Locate seals so no fittings or boxes are between the seal and the following changes of environments. Seal interior of duct raceways at the following points:

1) Where conduits pass from warm to cold locations, such as boundaries of refrigerated spaces.
2) Where an underground service duct raceway enters a building or structure.
3) Conduit extending from interior to exterior of building.
4) Conduit extending into pressurized duct raceway and equipment.
5) Conduit extending into pressurized zones that are automatically controlled to maintain different pressure set points.
6) Where otherwise required by NFPA 70.

i. Do not install duct raceways or electrical items on "explosion-relief" walls or rotating equipment.
j. Do not install conduits within **2 inch (50 mm)** of the bottom side of a metal deck roof.
k. Keep duct raceways at least **6 inch (150 mm)** away from parallel runs of flues and steam or hot-water pipes. Install horizontal duct raceway runs above water and steam piping.
l. Cut conduit perpendicular to the length. For conduits metric designator 53 (trade size 2) and larger, use roll cutter or a guide to make cut straight and perpendicular to the length. Ream inside of conduit to remove burrs.
m. Install pull wires in empty duct raceways. Provide polypropylene or monofilament plastic line with not less than **200 lb (90 kg)** tensile strength. Leave at least **12 inch (300 mm)** of slack at both ends of pull wire. Cap underground duct raceways designated as spare above grade alongside duct raceways in use.
n. Install duct raceways square to the enclosure and terminate at enclosures without hubs with locknuts on both sides of enclosure wall. Install locknuts hand tight, plus one-quarter turn more.

1) Termination fittings with shoulders do not require two locknuts.

o. Terminate threaded conduits into threaded hubs or with locknuts on inside and outside of boxes or cabinets. Install bushings on conduits up to metric designator 35 (trade size 1-1/4) and insulated throat metal bushings on metric designator 41 (trade size 1-1/2) and larger conduits terminated with locknuts.[**Install insulated throat metal grounding bushings on service conduits**].

2. Types EMT-A, ERMC-A, and FMC-A: Do not install aluminum duct raceways or fittings in contact with concrete or earth.
3. Types ERMC and IMC:

a. Threaded Conduit Joints, Exposed to Wet, Damp, Corrosive, or Outdoor Conditions: Apply listed compound that maintains electrical conductivity to threads of duct raceway and fittings before making up joints. Follow compound manufacturer's published instructions.

4. Type ERMC-S-PVC:

a. Follow manufacturer's installation instructions for clamping, cutting, threading, bending, and assembly.
b. Provide PVC-coated sealing locknut for exposed male threads transitioning into female NPT threads that do not have sealing sleeves, including transitions from PVC couplings/female adapters to Type ERMC-S-PVC elbows in direct-burial applications. PVC-coated sealing locknuts must not be used in place of conduit hub. PVC-coated sealing locknut must cover exposed threads on Type ERMC-S-PVC duct raceway.
c. Coat field-cut threads on PVC-coated duct raceway with manufacturer-approved corrosion-preventing conductive compound prior to assembly.

5. Types FMC, LFMC, and LFNC:

a. Provide a maximum of [**36 inch (915 mm)**][**72 inch (1830 mm)**] of flexible conduit for [**recessed and semirecessed luminaires,**]equipment subject to vibration, noise transmission, or movement; and for transformers and motors.

6. Types PVC, HDPE, and EPEC:

a. Do not install Type PVC, Type HDPE, or Type EPEC conduit where ambient temperature exceeds [**122 deg F (50 deg C)**]<**Insert temperature**>. Conductor ratings must be limited to 75 deg C except where installed in a trench outside buildings with concrete encasement, where 90 deg C conductors are permitted.
b. Comply with manufacturer's published instructions for solvent welding and fittings.
c. Join joints with solvent cement in accordance with manufacturer's published instructions and allowed to cure before handling. Joints to be bent, pushed, or pulled must set for minimum 24 h after joining.

7. Type RTRC: Do not install Type RTRC conduit where ambient temperature exceeds [**230 deg F (110 deg C)**]<**Insert temperature**>.
8. Duct Raceways Embedded in Slabs:

a. [**Run duct raceways larger than metric designator 27 (trade size 1) below concrete slab**][**Run duct raceways larger than metric designator 27 (trade size) parallel or at right angles to main reinforcement. Where at right angles to reinforcement, place duct raceway close to slab support. Secure duct raceways to reinforcement at maximum 10 ft (3 m) intervals**].
b. Arrange duct raceways to cross building expansion joints with expansion fittings at right

angles to the joint.

c. Arrange duct raceways to ensure that each is surrounded by minimum of [**1 inch (25 mm)**][**2 inch (50 mm)**]<**Insert dimension**> of concrete without voids.

d. Do not embed threadless fittings in concrete unless locations have been specifically approved by Architect.

e. Change from ENT to [**PVC-80**][**PVC-40**][**ERMC**][**or**][**IMC**] before rising above floor.

9. Stub-ups to Above Recessed Ceilings:

a. Provide EMT, IMC, or ERMC for duct raceways.

b. Provide a conduit bushing or insulated fitting to terminate stub-ups not terminated in hubs or in an enclosure.

10. Duct Raceway Terminations at Locations Subject to Moisture or Vibration:

a. Provide insulating bushings to protect conductors, including conductors smaller than 4 AWG.[**Install insulated throat metal grounding bushings on service conduits**].

11. Duct Fittings: Install fittings in accordance with NEMA FB 2.10 guidelines.

a. ERMC-S-PVC: Provide only fittings listed for use with this type of conduit. Patch and seal joints, nicks, and scrapes in PVC coating after installing conduits and fittings. Provide sealant recommended by fitting manufacturer and apply in thickness and number of coats recommended by manufacturer.

b. EMT: Provide [**setscrew**][**compression**], [**steel**][**cast-metal**] fittings. Comply with NEMA FB 2.10.

c. Flexible Conduit: Provide only fittings listed for use with flexible conduit type. Comply with NEMA FB 2.20.

12. Expansion-Joint Fittings:

a. Install in runs of aboveground PVC that are located where environmental temperature change may exceed **30 deg F (17 deg C)** and that have straight-run length that exceeds **25 ft (7.6 m)**. Install in runs of aboveground ERMC[**and EMT**] conduit that are located where environmental temperature change may exceed **100 deg F (55 deg C)** and that have straight-run length that exceeds **100 ft (30 m)**.

b. Install type and quantity of fittings that accommodate temperature change listed for the following locations:

1) Outdoor Locations Not Exposed to Direct Sunlight: [**125 deg F (70 deg C)**]<**Insert temperature**> temperature change.

2) Outdoor Locations Exposed to Direct Sunlight: [**155 deg F (86 deg C)**]<**Insert temperature**> temperature change.

3) Indoor Spaces Connected with Outdoors without Physical Separation: [**125 deg F (70 deg C)**]<**Insert temperature**> temperature change.

4) Attics: [**135 deg F (75 deg C)**]<**Insert temperature**> temperature change.

5) <**Insert location and corresponding temperature change**>.

c. Install fitting(s) that provide expansion and contraction for at least **0.00041 inch per foot of length of straight run per deg F (0.06 mm per meter of length of straight run per deg C)** of temperature change for PVC conduits. Install fitting(s) that provide expansion and contraction for at least **0.000078 inch per foot of length of straight run per deg F (0.0115 mm per meter of length of straight run per deg C)** of temperature change for metal conduits.

d. Install expansion fittings at locations where conduits cross building or structure expansion joints.

e. Install expansion-joint fitting with position, mounting, and piston setting selected in accordance with manufacturer's published instructions for conditions at specific location at time of installation. Install conduit supports to allow for expansion movement.

13. Duct Raceways Penetrating Rooms or Walls with Acoustical Requirements: Seal duct raceway openings on both sides of rooms or walls with acoustically rated putty[**or firestopping**].
14. Identification: Provide labels for conduit assemblies, duct raceways, and associated electrical equipment.

    a. Provide warning signs.

15. <**Insert more stringent installation requirements that supplement or supersede listed standards and manufacturer's published instructions**>.

D. Interfaces with Other Work:

1. Firestop penetrations of fire-rated floor and wall assemblies.
2. Provide conduit hangers and supports.
3. Coordinate installation of new products for <**Insert system or product family/category**> with existing conditions.

    a. <**Insert requirements for transition between new and existing**>.

4. Coordinate with <**Insert Section number and title**> for <**Insert description of interfacing related Work**>.

    a. <**Insert requirements for transition between this Section and related Work**>.

3.3 FIELD QUALITY CONTROL OF CONDUITS FOR ELECTRICAL SYSTEMS

A. Administrant for Electrical Power Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Communications Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Acceptance Testing Preparation:

1. <**Insert requirements**>.

D. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

E. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Pull solid aluminum or wood test mandrel through duct to prove joint integrity and adequate bend radii, and test for out-of-round duct. Provide minimum **12 inch (300 mm)** long mandrel equal to duct size minus **1/4 inch (6 mm)**. If obstructions are indicated, remove obstructions and retest.
3. Conduit Placement:

    a. Verify that center-line location and offsets are in accordance with the Drawings.
    b. Verify that hangers and supports for conduits are attached to structure [**in accordance with the Drawings**][**as directed by qualified structural engineer**].
    c. Verify that nuts on bolts or hanger rods are secure.
    d. Verify that space between raceways and cored holes are filled with non-shrinking grout or other approved material indicated on the Drawings and the Specifications.
    e. Verify that expansion devices are installed at locations indicated on the Drawings and the Specifications.
    f. Verify that ends are cut square to provide flush-butting surfaces when spliced and inside edges are free of burrs that could impede installation of cables.
    g. Verify minimum separation of utilities, or that approved mechanical protection has been provided to surrounding conduit(s) where minimum separation cannot be achieved.

4. Document all changes on Record Drawings.

F. Nonconforming Work:

1. Conduit will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

G. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.4 CLEANING

A. Verify that bentonite or other drilling fluids are contained and removed, and site is restored to its original or improved condition.

3.5 PROTECTION

A. Protect coatings, finishes, and cabinets from damage and deterioration.

1. Repair damage to galvanized finishes with zinc-rich paint recommended by manufacturer.
2. Repair damage to PVC coatings or paint finishes with matching touchup coating recommended by manufacturer.

END OF SECTION 26 05 33 13

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 05 33 13	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 33 13	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 33 13	27 11 00 00	Communications Equipment Room Fittings
26 05 33 13	27 13 13 00	Communications Copper Backbone Cabling
26 05 33 13	27 15 33 00	Communications Coaxial Horizontal Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 33 16 - BOXES AND COVERS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Metallic outlet boxes, device boxes, rings, and covers.
2. Nonmetallic outlet boxes, device boxes, rings, and covers.
3. Junction boxes and pull boxes.
4. Cover plates for device boxes.
5. Hoods for outlet boxes.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural load design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 078413 "Penetration Firestopping" specifies materials and methods for sealing penetrations of rated walls and partitions referenced by this Section.
5. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs installed by this Section.
7. Section 260573 "Power System Studies" specifies arc-flash hazard analysis and warning labels referenced by this Section.
8. Section 270528 "Pathways for Communications Systems"[**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for identification of communications equipment and cabling.

1.2 DEFINITIONS

A. Communications Outlet: One or more communications jacks, or cables and plugs, mounted in a box or ring, with a suitable protective cover.

B. Enclosure: The case or housing of an apparatus, or the fence or wall(s) surrounding an installation, to prevent personnel from accidentally contacting energized parts or to protect the equipment from physical damage. Types of enclosures and enclosure covers include the following:

1. Cabinet: An enclosure that is designed for either surface mounting or flush mounting and is provided with a frame, mat, or trim in which a swinging door or doors are or can be hung.
2. Concrete Box: A box intended for use in poured concrete.
3. Conduit Body: A means for providing access to the interior of a conduit or tubing system through one or more removable covers at a junction or terminal point. In the United States, conduit bodies are listed in accordance with outlet box requirements.
4. Conduit Box: A box having threaded openings or knockouts for conduit, EMT, or fittings.

5. Cover Plate: A cover designed for protecting wiring devices installed in flush-mounted device boxes while permitting their safe operation; also called a faceplate or wallplate.
6. Cutout Box: An enclosure designed for surface mounting that has swinging doors or covers secured directly to and telescoping with the walls of the enclosure.
7. Device Box: A box with provisions for mounting a wiring device directly to the box.
8. Extension Ring: A ring intended to extend the sides of an outlet box or device box to increase the box depth, volume, or both.
9. Floor Box: A box mounted in the floor intended for use with a floor box cover and other components to complete the floor box enclosure.
10. Floor-Mounted Enclosure: A floor box and floor box cover assembly with means to mount in the floor that is sealed against the entrance of scrub water at the floor level.
11. Floor Nozzle: An enclosure used on a wiring system, intended primarily as a housing for a receptacle, provided with a means, such as a collar, for surface-mounting on a floor, which may or may not include a stem to support it above the floor level, and is sealed against the entrance of scrub water at the floor level.
12. Junction Box: A box with a blank cover that joins different runs of raceway or cable and provides space for connection and branching of the enclosed conductors.
13. Outlet Box: A box that provides access to a wiring system having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for the entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting an outlet box cover, but without provisions for mounting a wiring device directly to the box.
14. Pedestal Floor Box Cover: A floor box cover that, when installed as intended, provides a means for typically vertical or near-vertical mounting of receptacle outlets above the floor's finished surface.
15. Pull Box: A box with a blank cover that joins different runs of raceway and provides access for pulling or replacing the enclosed cables or conductors.
16. Raised-Floor Box: A floor box intended for use in raised floors.
17. Recessed Access Floor Box: A floor box with provisions for mounting wiring devices below the floor surface.
18. Recessed Access Floor Box Cover: A floor box cover with provisions for passage of cords to recessed wiring devices mounted within a recessed floor box.
19. Ring: A sleeve, which is not necessarily round, used for positioning a recessed wiring device flush with the plaster, concrete, drywall, or other wall surface.
20. Ring Cover: A box cover, with raised center portion to accommodate a specific wall or ceiling thickness, for mounting wiring devices or luminaires flush with the surface.
21. Termination Box: An enclosure designed for installation of termination base assemblies consisting of bus bars, terminal strips, or terminal blocks with provision for wire connectors to accommodate incoming or outgoing conductors, or both.

C. Receptacle: A fixed connecting device arranged for insertion of a power cord plug. Also called a power jack.

D. Receptacle Outlet: One or more receptacles mounted in a box with a suitable protective cover.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Samples: For each type of product requiring samples for source quality control.

C. Shop Drawings: Prepare and submit the following:

1. Shop Drawings for Floor Boxes: Show that floor boxes are located to avoid interferences and are structurally allowable. Indicate floor thickness [**at location**]where boxes are embedded in

concrete floors and underfloor clearances where boxes are installed in raised floors.

D. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

1.5 QUALIFICATIONS

A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.

B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.

C. Inspection and Testing of Fire-Alarm Systems (I&TFAS) Technician I: Possessing active NICET I&TFAS Level I certification. Able to perform periodic inspections and tests of basic fire-alarm systems and prepare related records and reports.

D. Inspection and Testing of Fire-Alarm Systems (I&TFAS) Technician II: Possessing active NICET I&TFAS Level II certification. Able to plan, perform, and coordinate periodic inspections and tests of complex fire-alarm systems (including one or more of suppression interfaces, networked control units, smoke control interfaces, air sampling systems, multi-zone voice evacuation systems, or high-rise applications) and prepare related records and reports.

E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site electrical testing supervisors must possess active NICET EPT Technician [**III**][**IV**] certification.

F. Communications Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site communications testing supervisor must have [**BICSI Technician (TECH)**]<**Insert certification program**> certification and documented training, and be experienced with testing communications equipment in accordance with [**BICSI**]<**Insert code enforced by authorities having jurisdiction**> testing standards.

G. Security Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site security testing supervisor must have [**ASIS**][**PSP**]<**Insert organization**> certification and documented training and experience with testing security equipment in accordance with [**ASIS**]<**Insert organization**> testing standards.

H. Fire-Alarm Testing Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site fire-alarm testing supervisor must possess active NICET I&TFAS Technician **[I][II]** certification.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

B. <**Insert additional performance requirements for the Project**>.

2.2 METALLIC OUTLET BOXES, DEVICE BOXES, RINGS, AND COVERS

A. Source Quality Control:

1. Samples:

a. Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
b. Raised Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
c. Recessed Access-Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
d. Concrete Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.

B. UL QCIT - Metallic Outlet Boxes and Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Arlington Industries, Inc.**]
d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
e. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**MonoSystems, Inc**]
i. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
j. [**Pass & Seymour; Legrand North America, LLC**]
k. [**Patriot Aluminum Products, LLC**]
l. [**Plasti-Bond; Robroy Industries**]

m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
n. [**Spring City Electrical Manufacturing Company**]
o. [**Topaz Lighting & Electric**]
p. [**Wiremold; Legrand North America, LLC**]
q. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Arlington Industries, Inc.**]
d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
e. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**MonoSystems, Inc**]
i. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
j. [**Pass & Seymour; Legrand North America, LLC**]
k. [**Patriot Aluminum Products, LLC**]
l. [**Plasti-Bond; Robroy Industries**]
m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
n. [**Spring City Electrical Manufacturing Company**]
o. [**Topaz Lighting & Electric**]
p. [**Wiremold; Legrand North America, LLC**]
q. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT; including UL 514A.

4. Standard Features:

a. Box having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting outlet box cover, but without provisions for mounting wiring device directly to box.
b. Material: [**Sheet steel**][**Sheet aluminum**][**Cast metal**].
c. Sheet Metal Depth: Minimum [**1.5 inch (38 mm)**][**2 inch (50 mm)**][**2.5 inch (65 mm)**][**2.8 inch (70 mm)**][**3.5 inch (90 mm)**].
d. Cast-Metal Depth: Minimum [**1.8 inch (44.5 mm)**][**2.4 inch (60.3 mm)**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (lgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Luminaire Outlet Boxes and Covers: Nonadjustable, listed and labeled for attachment of luminaire weighing [**up to 50 lb (23 kg)**][**more than 50 lb (23 kg) and marked with maximum allowable weight**].
b. Paddle Fan Outlet Boxes and Covers: Nonadjustable, designed for attachment of paddle fan weighing up to **70 lb (32 kg)**.

C. UL QCIT - Metallic Conduit Bodies:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
f. [**Pass & Seymour; Legrand North America, LLC**]
g. [**Patriot Aluminum Products, LLC**]
h. [**Plasti-Bond; Robroy Industries**]
i. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
j. [**Topaz Lighting & Electric**]
k. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
f. [**Pass & Seymour; Legrand North America, LLC**]
g. [**Patriot Aluminum Products, LLC**]
h. [**Plasti-Bond; Robroy Industries**]
i. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
j. [**Topaz Lighting & Electric**]
k. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT; including UL 514A.

4. Standard Features: Means for providing access to interior of conduit or tubing system through one or more removable covers at junction or terminal point. In the United States, conduit bodies are listed in accordance with outlet box requirements.
5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL QCIT - Metallic Device Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Appleton; Emerson Electric Co., Automation Solutions**]
    c. [**Arlington Industries, Inc.**]
    d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    e. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    g. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    h. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    i. [**Patriot Aluminum Products, LLC**]
    j. [**Plasti-Bond; Robroy Industries**]
    k. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    l. [**Topaz Lighting & Electric**]
    m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Appleton; Emerson Electric Co., Automation Solutions**]
    c. [**Arlington Industries, Inc.**]
    d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    e. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    g. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    h. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]

i. [**Patriot Aluminum Products, LLC**]
j. [**Plasti-Bond; Robroy Industries**]
k. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
l. [**Topaz Lighting & Electric**]
m. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN QCIT; including UL 514A.

4. Standard Features:

   a. Box with provisions for mounting wiring device directly to box.
   b. Material: [**Sheet steel**][**Sheet aluminum**][**Cast metal**].
   c. Sheet Metal Depth: minimum [**1.5 inch (38 mm)**][**2 inch (50 mm)**][**2.5 inch (65 mm)**][**2.8 inch (70 mm)**][**3.5 inch (90 mm)**].
   d. Cast-Metal Depth: minimum [**1.8 inch (44.5 mm)**][**2.4 inch (60.3 mm)**].

5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL QCIT - Metallic Extension Rings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Appleton; Emerson Electric Co., Automation Solutions**]
   c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   e. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   f. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
   g. [**Pass & Seymour; Legrand North America, LLC**]
   h. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   i. [**Topaz Lighting & Electric**]
   j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Appleton; Emerson Electric Co., Automation Solutions**]
    c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
    e. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    f. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    g. [**Pass & Seymour; Legrand North America, LLC**]
    h. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    i. [**Topaz Lighting & Electric**]
    j. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN QCIT; including UL 514A.

4. Standard Features: Ring intended to extend sides of outlet box or device box to increase box depth, volume, or both.
5. Sustainable Design Features:

    a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL QCIT - Metallic Floor Boxes and Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**AFC Cable Systems; Atkore International**]
    c. [**Arlington Industries, Inc.**]
    d. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
    e. [**FSR Inc.**]
    f. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]

h. [**Leviton Manufacturing Co., Inc.**]
i. [**Pass & Seymour; Legrand North America, LLC**]
j. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
k. [**Wiremold; Legrand North America, LLC**]
l. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**AFC Cable Systems; Atkore International**]
c. [**Arlington Industries, Inc.**]
d. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
e. [**FSR Inc.**]
f. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Leviton Manufacturing Co., Inc.**]
i. [**Pass & Seymour; Legrand North America, LLC**]
j. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
k. [**Wiremold; Legrand North America, LLC**]
l. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT; including UL 514A.

4. Standard Features: Box mounted in floor with floor box cover and other components to complete floor box enclosure.
5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

G. UL QCIT - Metallic Raised-Floor Boxes and Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
c. [**Wiremold; Legrand North America, LLC**]
d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
c. [**Wiremold; Legrand North America, LLC**]
d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT; including UL 514A.

4. Standard Features: Box mounted in raised-floor with floor box cover and other components to complete floor box enclosure.
5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

H. UL QCIT - Metallic Recessed Access-Floor Boxes and Recessed Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**FSR Inc.**]
c. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**Wiremold; Legrand North America, LLC**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the

following:

a. [**ABB, Electrification Business**]
b. [**FSR Inc.**]
c. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**Wiremold; Legrand North America, LLC**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN QCIT; including UL 514A.

4. Standard Features: Floor box with provisions for mounting wiring devices below floor surface and floor box cover with provisions for passage of cords to recessed wiring devices mounted within floor box.
5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

I. UL QCIT - Metallic Concrete Boxes and Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   c. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   d. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   e. [**Topaz Lighting & Electric**]
   f. [**Wiremold; Legrand North America, LLC**]
   g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]

b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
c. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**Topaz Lighting & Electric**]
f. [**Wiremold; Legrand North America, LLC**]
g. **<Insert manufacturer's name>**

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN QCIT; including UL 514A.

4. Standard Features: Box intended for use in poured concrete.
5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.3 NONMETALLIC OUTLET BOXES, DEVICE BOXES, RINGS, AND COVERS

A. Source Quality Control:

1. Samples:

   a. Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
   b. Raised Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
   c. Recessed Access-Floor Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.
   d. Concrete Box Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors and flooring inserts for each type of floor box.

B. UL QCMZ - Nonmetallic Outlet Boxes and Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Allied Tube & Conduit; Atkore International**]

c. [**Appleton; Emerson Electric Co., Automation Solutions**]
d. [**Arlington Industries, Inc.**]
e. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
f. [**Cantex Inc.**]
g. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
h. [**Ericson Manufacturing Company**]
i. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
j. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
k. [**Intermatic, Inc**]
l. [**JM Eagle**]
m. [**Leviton Manufacturing Co., Inc.**]
n. [**Panduit Corp**]
o. [**Pass & Seymour; Legrand North America, LLC**]
p. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
q. [**Topaz Lighting & Electric**]
r. [**Wiremold; Legrand North America, LLC**]
s. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Appleton; Emerson Electric Co., Automation Solutions**]
d. [**Arlington Industries, Inc.**]
e. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
f. [**Cantex Inc.**]
g. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
h. [**Ericson Manufacturing Company**]
i. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
j. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
k. [**Intermatic, Inc**]
l. [**JM Eagle**]
m. [**Leviton Manufacturing Co., Inc.**]
n. [**Panduit Corp**]
o. [**Pass & Seymour; Legrand North America, LLC**]
p. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
q. [**Topaz Lighting & Electric**]
r. [**Wiremold; Legrand North America, LLC**]
s. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Box having pryout openings, knockouts, threaded entries, or hubs in either the sides or the back, or both, for entrance of conduit, conduit or cable fittings, or cables, with provisions for mounting outlet box cover, but without provisions for mounting wiring device directly

to box.

5. Sustainable Design Features:

   a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
   b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL QCMZ - Nonmetallic Conduit Bodies:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Allied Tube & Conduit; Atkore International**]
   c. [**Arlington Industries, Inc.**]
   d. [**Cantex Inc.**]
   e. [**JM Eagle**]
   f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. [**Topaz Lighting & Electric**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Allied Tube & Conduit; Atkore International**]
   c. [**Arlington Industries, Inc.**]
   d. [**Cantex Inc.**]
   e. [**JM Eagle**]
   f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. [**Topaz Lighting & Electric**]
   h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Means for providing access to interior of conduit or tubing system through one or more removable covers at junction or terminal point. In the United States, conduit bodies

are listed in accordance with outlet box requirements.

5. Sustainable Design Features:

   a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
   b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL QCMZ - Nonmetallic Device Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Allied Tube & Conduit; Atkore International**]
   c. [**Arlington Industries, Inc.**]
   d. [**Cantex Inc.**]
   e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. [**Pass & Seymour; Legrand North America, LLC**]
   h. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Allied Tube & Conduit; Atkore International**]
   c. [**Arlington Industries, Inc.**]
   d. [**Cantex Inc.**]
   e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. [**Pass & Seymour; Legrand North America, LLC**]
   h. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Box with provisions for mounting wiring device directly to box.
5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL QCMZ - Nonmetallic Extension Rings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Arlington Industries, Inc.**]
d. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
e. [**Cantex Inc.**]
f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Arlington Industries, Inc.**]
d. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
e. [**Cantex Inc.**]
f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Ring intended to extend sides of outlet box or device box to increase box depth, volume, or both.
5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL QCMZ - Nonmetallic Floor Boxes and Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Arlington Industries, Inc.**]
d. [**Cantex Inc.**]
e. [**JM Eagle**]
f. [**Pass & Seymour; Legrand North America, LLC**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Wiremold; Legrand North America, LLC**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Arlington Industries, Inc.**]
d. [**Cantex Inc.**]
e. [**JM Eagle**]
f. [**Pass & Seymour; Legrand North America, LLC**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Wiremold; Legrand North America, LLC**]
i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product

categories:

a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Box mounted in floor with floor box cover and other components to complete floor box enclosure.
5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

G. UL QCMZ - Nonmetallic Raised-Floor Boxes and Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Box mounted in raised-floor with floor box cover and other components to complete floor box enclosure.
5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

H. UL QCMZ - Nonmetallic Recessed Access-Floor Boxes and Recessed Floor Box Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   c. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   d. [**Leviton Manufacturing Co., Inc.**]
   e. [**Pass & Seymour; Legrand North America, LLC**]
   f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. [**Wiremold; Legrand North America, LLC**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   c. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   d. [**Leviton Manufacturing Co., Inc.**]
   e. [**Pass & Seymour; Legrand North America, LLC**]
   f. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   g. [**Wiremold; Legrand North America, LLC**]
   h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Floor box with provisions for mounting wiring devices below floor surface and floor box cover with provisions for passage of cords to recessed wiring devices mounted within floor box.
5. Sustainable Design Features:

   a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
   b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts

of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

I. UL QCMZ - Nonmetallic Floor Nozzles:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Enclosure intended primarily as housing for receptacle, provided with means, such as collar, for surface-mounting on floor, which may or may not include stem to support it above floor level, and is sealed against the entrance of scrub water at floor level.
5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

J. UL QCMZ - Nonmetallic Concrete Boxes and Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Allied Tube & Conduit; Atkore International**]
    c. [**Arlington Industries, Inc.**]
    d. [**Cantex Inc.**]
    e. [**JM Eagle**]
    f. [**Leviton Manufacturing Co., Inc.**]
    g. [**Wiremold; Legrand North America, LLC**]
    h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Allied Tube & Conduit; Atkore International**]
    c. [**Arlington Industries, Inc.**]
    d. [**Cantex Inc.**]
    e. [**JM Eagle**]
    f. [**Leviton Manufacturing Co., Inc.**]
    g. [**Wiremold; Legrand North America, LLC**]
    h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

    a. UL CCN QCMZ; including UL 514C.

4. Standard Features: Box intended for use in poured concrete.
5. Sustainable Design Features:

    a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
    b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.4 JUNCTION BOXES AND PULL BOXES

A. UL BGUZ - Indoor Sheet Metal Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adalet; division of Scott Fetzer Co.**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**FSR Inc.**]
e. [**Hoffman; brand of nVent Electrical plc**]
f. [**Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Milbank Manufacturing Company**]
i. [**N J Sullivan Company**]
j. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
k. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
l. [**Spring City Electrical Manufacturing Company**]
m. [**Square D; Schneider Electric USA**]
n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Adalet; division of Scott Fetzer Co.**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**FSR Inc.**]
e. [**Hoffman; brand of nVent Electrical plc**]
f. [**Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Milbank Manufacturing Company**]
i. [**N J Sullivan Company**]
j. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
k. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
l. [**Spring City Electrical Manufacturing Company**]
m. [**Square D; Schneider Electric USA**]
n. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN BGUZ; including UL 50 and UL 50E.

4. Standard Features:

a. Box with a blank cover that serves the purpose of joining different runs of raceway or

cable.
b. Degree of Protection: [**Type 1**][**Type 2**][**Type 5**][**Type 12**][**Type 12K**][**Type 13**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL BGUZ - Indoor Cast-Metal Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Adalet; division of Scott Fetzer Co.**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Adalet; division of Scott Fetzer Co.**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN BGUZ; including UL 50 and UL 50E.

4. Standard Features:

a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
b. Degree of Protection: [**Type 1**][**Type 2**][**Type 5**][**Type 12**][**Type 12K**][**Type 13**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL BGUZ - Indoor Polymeric Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Cantex Inc.**]
d. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**JM Eagle**]
f. [**Robroy Enclosures; Robroy Industries**]
g. [**Topaz Lighting & Electric**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Cantex Inc.**]
d. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**JM Eagle**]
f. [**Robroy Enclosures; Robroy Industries**]
g. [**Topaz Lighting & Electric**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN BGUZ; including UL 50 and UL 50E.

4. Standard Features:

a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
b. Degree of Protection: [**Type 1**][**Type 2**][**Type 5**][**Type 12**][**Type 12K**][**Type 13**].

5. Sustainable Design Features:

    a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
    b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
    c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
    d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
    e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
    f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

D. UL BGUZ - Outdoor Sheet Metal Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Adalet; division of Scott Fetzer Co.**]
    b. [**Appleton; Emerson Electric Co., Automation Solutions**]
    c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    d. [**FSR Inc.**]
    e. [**Hoffman; brand of nVent Electrical plc**]
    f. [**Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    h. [**Milbank Manufacturing Company**]
    i. [**N J Sullivan Company**]
    j. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
    k. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    l. [**Spring City Electrical Manufacturing Company**]
    m. [**Square D; Schneider Electric USA**]
    n. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Adalet; division of Scott Fetzer Co.**]
    b. [**Appleton; Emerson Electric Co., Automation Solutions**]
    c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    d. [**FSR Inc.**]
    e. [**Hoffman; brand of nVent Electrical plc**]
    f. [**Hubbell Industrial Controls; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
    g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]

h. [**Milbank Manufacturing Company**]
i. [**N J Sullivan Company**]
j. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
k. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
l. [**Spring City Electrical Manufacturing Company**]
m. [**Square D; Schneider Electric USA**]
n. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN BGUZ; including UL 50 and UL 50E.

4. Standard Features:

   a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
   b. Degree of Protection: [**Type 3**][**Type 3X**][**Type 3R**][**Type 3RX**][**Type 3S**][**Type 3SX**][**Type 4**][**Type 4X**][**Type 6**][**Type 6P**].

5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

E. UL BGUZ - Outdoor Cast-Metal Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Adalet; division of Scott Fetzer Co.**]
   b. [**Appleton; Emerson Electric Co., Automation Solutions**]
   c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   d. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Adalet; division of Scott Fetzer Co.**]
   b. [**Appleton; Emerson Electric Co., Automation Solutions**]

c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN BGUZ; including UL 50 and UL 50E.

4. Standard Features:

a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
b. Degree of Protection: [**Type 3**][**Type 3X**][**Type 3R**][**Type 3RX**][**Type 3S**][**Type 3SX**][**Type 4**][**Type 4X**][**Type 6**][**Type 6P**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

F. UL BGUZ - Outdoor Polymeric Junction and Pull Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Cantex Inc.**]
d. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**JM Eagle**]
f. [**Robroy Enclosures; Robroy Industries**]
g. [**Topaz Lighting & Electric**]
h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]

b. [**Allied Tube & Conduit; Atkore International**]
c. [**Cantex Inc.**]
d. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**JM Eagle**]
f. [**Robroy Enclosures; Robroy Industries**]
g. [**Topaz Lighting & Electric**]
h. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN BGUZ; including UL 50 and UL 50E.

4. Standard Features:

   a. Box with a blank cover that serves the purpose of joining different runs of raceway or cable.
   b. Degree of Protection: [**Type 3**][**Type 3X**][**Type 3R**][**Type 3RX**][**Type 3S**][**Type 3SX**][**Type 4**][**Type 4X**][**Type 6**][**Type 6P**].

5. Sustainable Design Features:

   a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
   b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.5 COVER PLATES FOR DEVICE BOXES

A. UL QCIT or QCMZ - Metallic Cover Plates for Device Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Appleton; Emerson Electric Co., Automation Solutions**]
   c. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
   d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
   e. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]

f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Intermatic, Inc**]
h. [**Leviton Manufacturing Co., Inc.**]
i. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
j. [**Panduit Corp**]
k. [**Pass & Seymour; Legrand North America, LLC**]
l. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
m. [**Topaz Lighting & Electric**]
n. [**Wiremold; Legrand North America, LLC**]
o. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
e. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
f. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Intermatic, Inc**]
h. [**Leviton Manufacturing Co., Inc.**]
i. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
j. [**Panduit Corp**]
k. [**Pass & Seymour; Legrand North America, LLC**]
l. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
m. [**Topaz Lighting & Electric**]
n. [**Wiremold; Legrand North America, LLC**]
o. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.

4. Standard Features:

a. Cover plate-Securing Screws: Metal with head color to match cover plate finish.
b. Damp and Wet Locations: Listed, labeled, and marked for location and use. Provide gaskets and accessories necessary for compliance with listing.
c. Cover Plate Material: [**0.032 inch (0.8 mm) thick, Type 302/304 non-magnetic stainless steel with brushed finish**][**0.040 inch (1.0 mm) thick aluminum, anodized or lacquered to prevent corrosion**][**0.04 inch (1 mm) thick, brushed brass with factory polymer finish**][**Steel with white baked enamel, suitable for field painting**][**0.04 inch (1 mm) thick steel with chrome-plated finish**][**Galvanized steel**][**Cast aluminum**][**As indicated on architectural Drawings**].

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability

report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.

b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.

c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.

d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.

e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL QCIT or QCMZ - Nonmetallic Cover Plates for Device Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Arlington Industries, Inc.**]
d. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
f. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Intermatic, Inc**]
i. [**Leviton Manufacturing Co., Inc.**]
j. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
k. [**Panduit Corp**]
l. [**Pass & Seymour; Legrand North America, LLC**]
m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
n. [**Topaz Lighting & Electric**]
o. [**Wiremold; Legrand North America, LLC**]
p. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Arlington Industries, Inc.**]
d. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
e. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
f. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Intermatic, Inc**]
i. [**Leviton Manufacturing Co., Inc.**]
j. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
k. [**Panduit Corp**]

l. [**Pass & Seymour; Legrand North America, LLC**]
m. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
n. [**Topaz Lighting & Electric**]
o. [**Wiremold; Legrand North America, LLC**]
p. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.

4. Standard Features:

a. Cover Plate-Securing Screws: Metal with head color to match cover plate finish.
b. Damp and Wet Locations: Listed, labeled, and marked for location and use. Provide gaskets and accessories necessary for compliance with listing.
c. Cover Plate Material: [**0.060 inch (1.5 mm) thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device**][**As indicated on architectural Drawings**].
d. Color: [**Ivory**][**White**][**Gray**][**Brown**][**Black**][**Red**][**Orange**][**in accordance with NEMA WD 1**][**Blue**][**Office White**][**Almond**][**Light Almond**][**As indicated on architectural Drawings**].

5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL QCIT or QCMZ - Illuminating Cover Plates for Device Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Leviton Manufacturing Co., Inc.**]
b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Leviton Manufacturing Co., Inc.**]
b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.

4. Standard Features:

a. Cover Plate-Securing Screws: Metal with head color to match cover plate finish.
b. Damp and Wet Locations: Listed, labeled, and marked for location and use. Provide gaskets and accessories necessary for compliance with listing.
c. Cover Plate Material: [**0.060 inch (1.5 mm) thick, high-impact thermoplastic (nylon) with smooth finish and color matching wiring device**][**As indicated on architectural Drawings**].
d. Color: [**Ivory**][**White**][**Gray**][**Brown**][**Black**][**Red**][**Orange**][**in accordance with NEMA WD 1**][**Blue**][**Office White**][**Almond**][**Light Almond**][**As indicated on architectural Drawings**].

5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.6 HOODS FOR OUTLET BOXES

A. UL QCIT or QCMZ - Retractable or Reattachable Hoods for Outlet Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
c. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
c. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.
b. Receptacle, Hood, Cover Plate, Gaskets, and Seals: UL 498 Supplement SA when mated with box or enclosure complying with UL 514A, UL 514C, or UL 50E.

4. Standard Features:

a. Mounts to box using fasteners different from wiring device.
b. Provides [**clear**][**gray**][**white**], weatherproof, "while-in-use" cover.

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
d. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

B. UL QCIT or QCMZ - Extra-Duty, While-in-Use Hoods for Outlet Boxes:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Appleton; Emerson Electric Co., Automation Solutions**]
d. [**Arlington Industries, Inc.**]
e. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
f. [**Intermatic, Inc**]
g. [**Leviton Manufacturing Co., Inc.**]
h. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Appleton; Emerson Electric Co., Automation Solutions**]
d. [**Arlington Industries, Inc.**]

e. [**Arrow Hart, Wiring Devices; Eaton, Electrical Sector**]
f. [**Intermatic, Inc**]
g. [**Leviton Manufacturing Co., Inc.**]
h. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
i. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN QCIT or UL CCN QCMZ; including UL 514D.
b. Receptacle, Hood, Cover Plate, Gaskets, and Seals: UL 498 Supplement SA when mated with box or enclosure complying with UL 514A, UL 514C, or UL 50E.

4. Standard Features:

a. Mounts to box using fasteners different from wiring device.
b. Marked "Extra-Duty" in accordance with UL 514D.
c. Provides [**clear**][**gray**][**white**], weatherproof, "while-in-use" cover.
d. Manufacturer may combine nonmetallic device box with hood as extra-duty rated assembly.

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

PART 3 - EXECUTION

3.1 SELECTION OF BOXES AND COVERS FOR ELECTRICAL SYSTEMS

A. Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with NFPA 70 for selection of boxes and enclosures. Consult Architect for resolution of conflicting requirements.

B. Degree of Protection:

1. Outdoors:

a. [**Type 3**][**Type 3R**][**Type 4**] unless otherwise indicated.
b. Locations Exposed to Hosedown: [**Type 4**][**Type 4X**][**Type 6**][**Type 6P**].
c. Locations Subject to Potential Flooding: Type 6P.
d. Locations Aboveground Where Mechanism Must Operate When Ice Covered: Type 3S.

e. Locations in-Ground or Exposed to Corrosive Agents: [**Type 4X**][**Type 6P**][**Type 3RX**].
f. Locations in-Ground or Exposed to Corrosive Agents Where Mechanism Must Operate When Ice Covered: Type 3SX.

2. Indoors:

a. Type 1 unless otherwise indicated.
b. Damp or Dusty Locations: [**Type 12**][**Type 2**][**Type 4**][**Type 5**].
c. Surface Mounted in Kitchens and Other Locations Exposed to Oil or Coolants: Type 12.
d. Flush Mounted in Kitchens and Other Locations Exposed to Oil or Coolants: [**Type 12**][**Type 12K**].
e. Locations Exposed to Airborne Dust, Lint, Fibers, or Flyings: [**Type 4**][**Type 6**].
f. Locations Exposed to Hosedown: [**Type 4**][**Type 6**][**Type 6P**].
g. Locations Exposed to Brief Submersion: [**Type 6**][**Type 6P**].
h. Locations Exposed to Prolonged Submersion: Type 6P.
i. Locations Exposed to Corrosive Agents: [**Type 4X**][**Type 6P**].
j. Locations Exposed to Spraying Oil or Coolants: Type 13.

C. Exposed Boxes Installed Less Than 2.5 m (8 ft) Above Floor:

1. [**Provide cast-metal boxes**][**Boxes with knockouts or unprotected openings are prohibited**].
2. Provide exposed cover. Flat covers with angled mounting slots or knockouts are prohibited.

3.2 INSTALLATION OF BOXES AND COVERS FOR ELECTRICAL SYSTEMS

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Safety: NFPA 70E.
3. Commissioning of Active and Passive Fire Protection Features: NFPA 3 and NFPA 4.
4. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
5. Communications Work: BICSI N1.
6. Life Safety and Means of Egress Work: NFPA 101.
7. Emergency and Standby Power Work: NFPA 110, NFPA 111, and NECA NEIS 416.
8. Work in Confined Spaces: NFPA 350.
9. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
10. Outlet, Device, Pull, and Junction Boxes: Article 314 of NFPA 70.
11. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Provide boxes in wiring and raceway systems wherever required for pulling of wires, making connections, and mounting of devices or fixtures.
2. Mount boxes at heights indicated on Drawings. If mounting heights of boxes are not individually indicated, give priority to ADA requirements. Install boxes with height measured to [**center**][**top**][**bottom**] of box unless otherwise indicated.
3. Recessed Boxes in Masonry Walls: Saw-cut opening for box in center of cell of masonry block, and install box flush with surface of wall. Prepare block surfaces to provide a flat surface for a raintight connection between box and cover plate or supported equipment and box, whether installed indoors or outdoors.
4. Horizontally separate boxes mounted on opposite sides of walls so they are not in the same

vertical channel.

5. Locate boxes so that cover or plate will not span different building finishes.
6. Support boxes in recessed ceilings independent of ceiling tiles and ceiling grid.
7. Support boxes of three gangs or more from more than one side by spanning two framing members or mounting on brackets specifically designed for purpose.
8. Fasten junction and pull boxes to, or support from, building structure. Do not support boxes by conduits.
9. Set metal floor boxes level and flush with finished floor surface.
10. Set nonmetallic floor boxes level. Trim after installation to fit flush with finished floor surface.
11. Do not install aluminum boxes, enclosures, or fittings in contact with concrete or earth.
12. Do not rely on locknuts to penetrate nonconductive coatings on enclosures. Remove coatings in the locknut area prior to assembling conduit to enclosure to ensure a continuous ground path.
13. Boxes and Enclosures in Areas or Walls with Acoustical Requirements:

    a. Seal openings and knockouts in back and sides of boxes and enclosures with acoustically rated putty.
    b. Provide gaskets for cover plates and covers.

14. <**Insert more stringent installation requirements that supplement or supersede listed standards and manufacturers' published instructions**>.

D. Interfaces with Other Work:

1. Identification: Provide labels for boxes and associated electrical equipment.

    a. Identify field-installed conductors, interconnecting wiring, and components.
    b. Label each enclosure with engraved metal or laminated-plastic nameplate.
    c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.

2. Coordinate installation of new products for <**Insert system or product family/category**> with existing conditions.

    a. <**Insert requirements for transition between new and existing**>.

3. Coordinate with <**Insert Section number and title**> for <**Insert description of interfacing related Work**>.

    a. <**Insert requirements for transition between this Section and related Work**>.

3.3 FIELD QUALITY CONTROL OF BOXES AND COVERS

A. Administrant for Electrical Power Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Communications Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified communications testing and inspecting agency to

administer and perform tests and inspections.
2. Engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Administrant for Security Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified security testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified security testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

D. Administrant for Fire-Alarm Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified fire-alarm testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified fire-alarm testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

E. Acceptance Testing Preparation:

1. <**Insert requirements**>.

F. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

G. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Perform tests and inspections recommended by standards listed in "Reference Standards for Installation" Paragraph.

H. Nonconforming Work:

1. Boxes and covers will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

I. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.4 CLEANING

A. Remove construction dust and debris from boxes before installing cover plates, covers, and hoods.

3.5 PROTECTION

A. After installation, protect boxes from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 26 05 33 16

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 05 33 16	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 33 16	26 27 26 00	Wiring Devices

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 33 23 - SURFACE RACEWAYS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Surface metal raceways and fittings.
2. Surface nonmetallic raceways.
3. Strut-type channel raceways and fittings.
4. Wireways and auxiliary gutters.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, and other structural design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional coordination, scheduling, sequencing, submittal, and installation requirements applicable to the Work for electrical, communications, and electronic safety and security systems on the Project, including wiring methods.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding referenced by this Section.
5. Section 260553 "Identification for Electrical Systems" specifies warning signs referenced by this Section.
6. Section 270528 "Pathways for Communications Systems"[**and Section 271100 "Communications Equipment Room Fittings"**] specifies additional requirements for identification of communications equipment and cabling.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. Samples: For each type of product requiring samples for source quality control.

C. Sustainable Design Submittals:

1. Product data for sustainable design features for each type of product.

1.3 INFORMATIONAL SUBMITTALS

A. Manufacturer's published instructions.

1.4 QUALIFICATIONS

A. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures; conduct tests of complex equipment; analyze test and equipment

data; plan a job; and lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.

B. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; evaluate tests, test equipment, test results, and power system performance; recommend actions to maintain or improve system performance; and lead multi-team projects.

C. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site electrical testing supervisors must possess active NICET EPT Technician [**III**][**IV**] certification.

D. Communications Testing and Inspecting Agency: Entity possessing active credentials from a qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site communications testing supervisor must have [**BICSI Technician (TECH)**]<**Insert certification program**> certification and documented training, and be experienced with testing communications equipment in accordance with [**BICSI**]<**Insert code enforced by authorities having jurisdiction**> testing standards.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2.2 SURFACE METAL RACEWAYS AND FITTINGS

A. Source Quality Control:

1. Samples:

a. Surface Metallic Raceway Nonmetallic Cover Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type, [**12 inch (300 mm)**]<**Insert dimension**> long.

B. UL RJBT - Surface Metal Raceways and Fittings with Metal Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
b. [**MonoSystems, Inc**]
c. [**Wiremold; Legrand North America, LLC**]

d. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   b. [**MonoSystems, Inc**]
   c. [**Wiremold; Legrand North America, LLC**]
   d. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN RJBT; including UL 5.

4. Standard Features:

   a. [**Galvanized steel**][**Aluminum**] base with snap-on covers.
   b. [**Manufacturer's standard enamel finish in color selected by Architect**][**Prime coated, ready for field painting**].
   c. Wiring Channels: [**Single**][**Dual**][**Triple**]. Multiple channels must be capable of housing a standard 20 to 30 A device flush within the raceway.

5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL RJBT - Surface Metal Raceways and Fittings with Nonmetallic Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Union Products International, Inc.**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Union Products International, Inc.**]
b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN RJBT; including UL 5.

4. Standard Features:

a. UL 94, V-0 requirements for self-extinguishing characteristics.
b. [**Galvanized steel**][**Aluminum**] base with snap-on covers.
c. Provide texture and color selected by Architect from [**manufacturer's standard**][**custom**] colors.
d. Wiring Channels: [**Single**][**Dual**][**Triple**]. Multiple channels must be capable of housing a standard 20 to 30 A device flush within the raceway.

5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.3 SURFACE NONMETALLIC RACEWAYS

A. Source Quality Control:

1. Samples:

a. Surface Nonmetallic Raceway Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type, [**12 inch (300 mm)**]<**Insert dimension**> long.

B. UL RJTX - Surface Nonmetallic Raceways and Fittings with Nonmetallic Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**HellermannTyton**]

b. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
c. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**Panduit Corp**]
e. [**Wiremold; Legrand North America, LLC**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**HellermannTyton**]
b. [**Hubbell Premise Wiring; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
c. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**Panduit Corp**]
e. [**Wiremold; Legrand North America, LLC**]
f. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN RJTX; including UL 5A.
b. UL 94, V-0 requirements for self-extinguishing characteristics.

4. Standard Features:

a. Provide texture and color selected by Architect from [**manufacturer's standard**][**custom**] colors.
b. Wiring Channels: [**Single**][**Dual**]. Multiple channels must be capable of housing a standard 20 to 30 A device flush within the raceway.

5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL RJTX - Surface Nonmetallic Raceways and Fittings with Metallic Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following]:

a. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN RJTX; including UL 5A.
b. UL 94, V-0 requirements for self-extinguishing characteristics.

4. Standard Features:

a. [**Manufacturer's standard enamel finish in color selected by Architect**][**Prime coated, ready for field painting**].
b. Wiring Channels: [**Single**][**Dual**]. Multiple channels must be capable of housing a standard 20 to 30 A device flush within the raceway.

5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.4 STRUT-TYPE CHANNEL RACEWAYS AND FITTINGS

A. Source Quality Control:

1. Samples:

a. Strut-Type Channel Raceway Nonmetallic Covers for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type, [**12 inch (300 mm)**]<**Insert dimension**> long.

B. UL RIUU - Strut-Type Channel Raceways and Fittings with Metallic Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Atkore Unistrut**]
   c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   d. [**Power-Strut; Atkore International**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Atkore Unistrut**]
   c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   d. [**Power-Strut; Atkore International**]
   e. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN RIUU; including UL 5B.

4. Standard Features:

   a. [**Manufacturer's standard enamel finish in color selected by Architect**][**Prime coated, ready for field painting**].

5. Sustainable Design Features:

   a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
   e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

C. UL RIUU - Strut-Type Channel Raceways and Fittings with Nonmetallic Covers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN RIUU; including UL 5B.
b. UL 94, V-0 requirements for self-extinguishing characteristics.

4. Standard Features:

a. UL 94, V-0 requirements for self-extinguishing characteristics.
b. Provide texture and color selected by Architect from [**manufacturer's standard**][**custom**] colors.

5. Sustainable Design Features:

a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

2.5 WIREWAYS AND AUXILIARY GUTTERS

A. Source Quality Control:

1. Samples:

a. Nonmetallic Wireway and Auxiliary Gutter Samples for Initial Selection: Manufacturer's standard color sheets, showing full range of available colors for each type, [**12 inch (300 mm)**]<**Insert dimension**> long.

B. UL ZOYX - Metal Wireways and Auxiliary Gutters:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**ABB, Electrification Business**]
b. [**Cooper B-line; brand of Eaton, Electrical Sector**]
c. [**Hoffman; brand of nVent Electrical plc**]
d. [**MonoSystems, Inc**]
e. [**Square D; Schneider Electric USA**]
f. [**Wiegmann; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Cooper B-line; brand of Eaton, Electrical Sector**]
c. [**Hoffman; brand of nVent Electrical plc**]
d. [**MonoSystems, Inc**]
e. [**Square D; Schneider Electric USA**]
f. [**Wiegmann; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
g. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

a. UL CCN ZOYX; including UL 870.

4. Standard Features:

a. Fittings and Accessories: Include covers, couplings, offsets, elbows, expansion joints, adapters, hold-down straps, end caps, and other fittings to match and mate with wireways as required for complete system.
b. Finish: Manufacturer's standard enamel finish.
c. Wireway Covers: [**Hinged type**][**Screw-cover type**][**Flanged-and-gasketed type**] unless otherwise indicated.

5. Sustainable Design Features:

a. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
b. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
c. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
d. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard development organization, is publicly available for product.
e. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

6. Other Available Features Required by the Project:

a. Degree of Protection: [**Type 1**][**Type 3R**][**Type 4**][**Type 12**]<**Insert type**> unless otherwise

indicated.

C. UL ZOYX - Nonmetallic Wireways and Auxiliary Gutters:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Hoffman; brand of nVent Electrical plc**]
   b. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Hoffman; brand of nVent Electrical plc**]
   b. <**Insert manufacturer's name**>

3. Listing Criteria: Investigated, labeled, and marked by qualified electrical testing laboratory in accordance with guide information and standards specified for the following UL product categories:

   a. UL CCN ZOYX; including UL 870.
   b. UL 94, V-0 requirements for self-extinguishing characteristics.

4. Standard Features:

   a. Fittings and Accessories: Couplings, offsets, elbows, expansion joints, adapters, hold-down straps, end caps, and other fittings must match and mate with wireways as required for complete system.
   b. PVC Solvents and Adhesives: As recommended by wireway manufacturer.
   c. Material:

      1) Fiberglass polyester, extruded and fabricated to required size and shape, without holes or knockouts. Cover must be gasketed with oil-resistant gasket material and fastened with captive screws treated for corrosion resistance. Connections must be flanged and have stainless steel screws and oil-resistant gaskets.
      2) PVC, extruded and fabricated to required size and shape, and having snap-on cover, mechanically coupled connections, and plastic fasteners.

5. Sustainable Design Features:

   a. Solvent cements for use with nonmetallic raceways and covers have VOC content less than [**510**][**490**] g/L.
   b. Corporate Sustainability Report: Provide [**third-party-verified**]corporate sustainability report that is publicly available from manufacturer and that includes environmental impacts of extraction operations and activities associated with product and its supply chain.
   c. Regional Materials (LEED): Provide documentation if product is sourced (extracted, manufactured, or purchased) within **100 miles (160 km)** of Project site.
   d. Regional Materials (IgCC/ASHRAE 189.1): Provide documentation if product is sourced (extracted, harvested, recovered, or manufactured) within **500 miles (800 km)** of Project site. Identify percentage of product's travel that is by rail or water.
   e. Third-Party Certification: Third-party certification, in accordance with multiple attribute standard(s) developed by consensus-based process from an approved standard

development organization, is publicly available for product.

f. Third-Party-Verified Product Life-Cycle Assessment: Assessment covering cradle-to-gate scope, in accordance with ISO 14040 and ISO 14044, is publicly available for product.

PART 3 - EXECUTION

3.1 INSTALLATION OF SURFACE RACEWAYS FOR ELECTRICAL SYSTEMS

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in Contract Documents or manufacturers' published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Safety: NFPA 70E.
3. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
4. Communications Work: BICSI N1.
5. Work in Confined Spaces: NFPA 350.
6. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
7. Auxiliary Gutters: Article 366 of NFPA 70.
8. Surface Metal Raceway: Article 386 of NFPA 70.
9. Surface Nonmetallic Raceway: Article 388 of NFPA 70.
10. Consult Architect for resolution of conflicting requirements.

C. Special Installation Techniques:

1. Install surface raceways only where indicated on Drawings.
2. Install surface raceway with a minimum **2 inch (50 mm)** radius control at bend points.
3. Secure surface raceway with screws or other anchor-type devices at intervals not exceeding **48 inch (1200 mm)** and with no less than two supports per straight raceway section. Support surface raceway in accordance with manufacturer's published instructions. Tape and glue are unacceptable support methods.
4. <**Insert more stringent installation requirements that supplement or supersede listed standards and manufacturers' published instructions**>.

D. Interfaces with Other Work:

1. Identification: Provide labels for surface raceways and associated electrical equipment.

   a. Identify field-installed conductors, interconnecting wiring, and components.
   b. Provide warning signs.

2. Coordinate installation of new products for <**Insert system or product family/category**> with existing conditions.

   a. <**Insert requirements for transition between new and existing**>.

3. Coordinate with <**Insert Section number and title**> for <**Insert description of interfacing related Work**>.

   a. <**Insert requirements for transition between this Section and related Work**>.

3.2 FIELD QUALITY CONTROL OF SURFACE RACEWAYS

A. Administrant for Electrical Power Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified medium-voltage electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

B. Administrant for Communications Tests and Inspections:

1. [**Owner**][**Tenant**] will engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified communications testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections[**with assistance of factory-authorized service representative**].

C. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

D. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Perform tests and inspections recommended by standards listed in "Reference Standards for Installation" Paragraph.

E. Nonconforming Work:

1. Boxes and covers will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

F. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

3.3 CLEANING

A. Remove construction dust and debris from surface raceways before installing covers.

3.4 PROTECTION

A. After installation, protect surface raceways from construction activities. Remove and replace items that are contaminated, defaced, damaged, or otherwise caused to be unfit for use prior to acceptance by Owner.

END OF SECTION 26 05 33 23

Task	Specification	Specification Description
26 05 33 23	26 05 39 00	Underfloor Raceways For Electrical Systems

SECTION 26 05 36 00 - CABLE TRAYS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Metal cable trays.
2. Nonmetallic cable trays.
3. Cable tray accessories.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

C. Products Installed, but Not Furnished, under This Section:

1. Section 078413 "Penetration Firestopping" specifies firestopping products installed under this Section.
2. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding products installed under this Section.
3. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs installed by this Section.

1.2 ACTION SUBMITTALS

A. Product Data:

1. Metal cable trays.
2. Nonmetallic cable trays.
3. Cable tray accessories.

B. Shop Drawings:

1. Cable tray fabrication drawings, diagrams, and supporting documents.

C. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

A. Manufacturers' published instructions.

B. Field Reports:

1. Factory test reports.

2. Manufacturer's field reports for field quality-control support.

PART 2 - PRODUCTS

2.1 METAL CABLE TRAYS

A. Description: This product category covers metal cable trays and metal cable tray systems intended for field assembly and for use in accordance with Article 392 of NFPA 70.

B. Performance Criteria:

1. Regulatory Requirements:

a. Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2. Listing Criteria: UL CCN CYNW; including NEMA VE 1 and suitability for use as equipment grounding conductors in accordance with Sections 392.60(A) and 392.60(B) of NFPA 70.

C. UL CYNW - Ladder Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Atkore Cope**]
c. [**BASOR Electric**]
d. [**Chalfant Manufacturing Company**]
e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
f. [**Hoffman; brand of nVent Electrical plc**]
g. [**MonoSystems, Inc**]
h. [**MP Husky USA Cable Tray & Cable Bus**]
i. [**Niedax Inc.**]
j. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Atkore Cope**]
c. [**BASOR Electric**]
d. [**Chalfant Manufacturing Company**]
e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
f. [**Hoffman; brand of nVent Electrical plc**]
g. [**MonoSystems, Inc**]
h. [**MP Husky USA Cable Tray & Cable Bus**]
i. [**Niedax Inc.**]
j. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. General Characteristics:

    a. Configuration: Two longitudinal side rails with transverse rungs swaged or welded to side rails, complying with NEMA VE 1.
    b. Radius-Fitting Rung Spacing: **9 inch (225 mm)** at center of tray's width.
    c. Minimum Cable-Bearing Surface for Rungs: **7/8 inch (22 mm)** width with radius edges.
    d. No portion of the rungs must protrude below the bottom plane of side rails.
    e. Structural Performance of Each Rung: Capable of supporting a maximum cable load, with a safety factor of 1.5, plus a **200 lb. (90 kg)** concentrated load, when tested in accordance with NEMA VE 1.
    f. Splicing Assemblies: Bolted type using serrated flange locknuts.
    g. Splice-Plate Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.

5. Materials and Finishes (Steel):

    a. Straight Section and Fitting Side Rails and Rungs: Steel complies with the minimum mechanical properties of [**ASTM A1011/A1011M, SS, Grade 33**][**ASTM A1008/A1008M, Grade 33, Type 2**].
    b. Steel Tray Splice Plates: ASTM A1011/A1011M, HSLAS, Grade 50, Class 1.
    c. Fasteners: Steel complies with the minimum mechanical properties of ASTM A510/A510M, Grade 1008.
    d. Finish:

        1) Hot-dip galvanized after fabrication, complying with ASTM A123/A123M, Class B2, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316**] hardware.
        2) Hot-dip galvanized after fabrication, complying with ASTM A653/A653M, **G90 (Z275)**, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**] hardware.
        3) Electrogalvanized after fabrication, complying with ASTM B633, with galvanized, ASTM B633 hardware.
        4) [**Epoxy-resin**][**Powder-coat enamel**] paint, with [**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316, ASTM F593 and ASTM F594**] hardware.

            a) Powder-Coat Enamel: Cable tray manufacturer's recommended primer and corrosion-inhibiting treatment, with factory-applied powder-coat paint.
            b) Epoxy-Resin Prime Coat: Cold-curing epoxy primer, MPI# 101.
            c) Epoxy-Resin Topcoat: Epoxy, cold-cured gloss, MPI# 77.

        5) Factory-standard primer, ready for field painting, with chromium-zinc-plated hardware in accordance with ASTM F1136.
        6) Black oxide finish for support accessories and miscellaneous hardware in accordance with ASTM D769.
        7) <**Insert finish**>.

6. Materials and Finishes (Aluminum):

    a. Materials: Alloy 6063-T6 in accordance with ANSI H35.1/H 35.1M for extruded components, and [**Alloy 5052-H32**][**or**][**Alloy 6061-T6**] in accordance with ANSI H35.1/H 35.1M for fabricated parts.
    b. Hardware: [**Chromium-zinc-plated steel, ASTM F1136**][**Stainless steel, Type 316, ASTM F593 and ASTM F594**].
    c. Hardware for Aluminum Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

7. Materials and Finishes (Stainless Steel):

   a. Materials: Low-carbon, passivated stainless steel, [**Type 304L**][**or**][**Type 316L**], ASTM F593 and ASTM F594.
   b. Hardware for Stainless Steel Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

8. Options:

   a. Width: [**6 inch (150 mm)**][**9 inch (225 mm)**][**12 inch (300 mm)**][**18 inch (450 mm)**][**24 inch (600 mm)**][**30 inch (750 mm)**][**36 inch (900 mm)**] unless otherwise indicated on Drawings.
   b. Minimum Usable Load Depth: [**3 inch (75 mm)**][**4 inch (100 mm)**][**5 inch (125 mm)**][**6 inch (150 mm)**].
   c. Straight Section Lengths: [**10 ft (3.0 m)**][**12 ft (3.7 m)**][**20 ft (6.0 m)**][**24 ft (7.4 m)**], except where shorter lengths are required to facilitate tray assembly.
   d. Rung Spacing: [**6 inch (150 mm)**][**9 inch (225 mm)**][**12 inch (300 mm)**][**18 inch (450 mm)**] on center.
   e. Fitting Minimum Radius: [**12 inch (300 mm)**][**24 inch (600 mm)**][**36 inch (900 mm)**][**48 inch (1200 mm)**].
   f. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.
   g. Covers: [**Solid**][**Louvered**][**Ventilated-hat**][**2-in-3 pitch**] type made of same materials and with same finishes as cable tray.

D. UL CYNW - Wire-Mesh Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**Atkore Cope**]
   b. [**BASOR Electric**]
   c. [**Cablofil; Legrand North America, LLC**]
   d. [**Chalfant Manufacturing Company**]
   e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   f. [**Enduro Composites Inc.**]
   g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
   h. [**MonoSystems, Inc**]
   i. [**MP Husky USA Cable Tray & Cable Bus**]
   j. [**Niedax Inc.**]
   k. [**Snaketray**]
   l. [**WBT LLC**]
   m. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**Atkore Cope**]
   b. [**BASOR Electric**]
   c. [**Cablofil; Legrand North America, LLC**]

d. [**Chalfant Manufacturing Company**]
e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
f. [**Enduro Composites Inc.**]
g. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**MonoSystems, Inc**]
i. [**MP Husky USA Cable Tray & Cable Bus**]
j. [**Niedax Inc.**]
k. [**Snaketray**]
l. [**WBT LLC**]
m. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. General Characteristics:

a. Configuration: [**Galvanized-**]steel wire mesh, complying with NEMA VE 1.
b. Structural Performance: Capable of supporting a maximum cable load, with a safety factor of 1.5, plus a **200 lb. (90 kg)** concentrated load, when tested in accordance with NEMA VE 1.
c. Splicing Assemblies: Bolted type using serrated flange locknuts.
d. Splice-Plate Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.

5. Materials and Finishes (Steel):

a. Straight Sections and Fittings: Steel complies with the minimum mechanical properties of [**ASTM A1011/A1011M, SS, Grade 33**][**ASTM A1008/A1008M, Grade 33, Type 2**].
b. Steel Tray Splice Plates: ASTM A1011/A1011M, HSLAS, Grade 50, Class 1.
c. Fasteners: Steel complies with the minimum mechanical properties of ASTM A510/A510M, Grade 1008.
d. Finish:

1) Hot-dip galvanized after fabrication, complying with ASTM A123/A123M, Class B2, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316**] hardware.
2) Hot-dip galvanized after fabrication, complying with ASTM A653/A653M, **G90 (Z275)**, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**] hardware.
3) Electrogalvanized after fabrication, complying with ASTM B633, with galvanized, ASTM B633 hardware.
4) [**Epoxy-resin**][**Powder-coat enamel**] paint, with [**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316, ASTM F593 and ASTM F594**] hardware.

a) Powder-Coat Enamel: Cable tray manufacturer's recommended primer and corrosion-inhibiting treatment, with factory-applied powder-coat paint.
b) Epoxy-Resin Prime Coat: Cold-curing epoxy primer, MPI# 101.
c) Epoxy-Resin Topcoat: Epoxy, cold-cured gloss, MPI# 77.

5) Factory-standard primer, ready for field painting, with chromium-zinc-plated hardware in accordance with ASTM F1136.
6) Black oxide finish for support accessories and miscellaneous hardware in accordance with ASTM D769.
7) <**Insert finish**>.

6. Options:

a. Width: [2 inch (50 mm)][4 inch (100 mm)][6 inch (150 mm)][8 inch (200 mm)][12 inch (300 mm)][16 inch (400 mm)][18 inch (450 mm)][20 inch (500 mm)][24 inch (600 mm)] unless otherwise indicated on Drawings.
b. Minimum Usable Load Depth: [1 inch (25 mm)][2 inch (50 mm)][4 inch (100 mm)][6 inch (150 mm)].
c. Straight Section Lengths: [10 ft (3.0 m)][12 ft (3.7 m)], except where shorter lengths are required to facilitate tray assembly.
d. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.

E. UL CYNW - Single-Rail Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Atkore Cope**]
b. [**Cable Management Solutions, Inc.**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**MonoSystems, Inc**]
e. [**MP Husky USA Cable Tray & Cable Bus**]
f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**Atkore Cope**]
b. [**Cable Management Solutions, Inc.**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**MonoSystems, Inc**]
e. [**MP Husky USA Cable Tray & Cable Bus**]
f. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. General Characteristics:

a. Configuration: An extruded-aluminum assembly, consisting of a single longitudinal center rail with transverse rungs arranged symmetrically about the center rail complying with NEMA VE 1.
b. Construction: Aluminum rungs mechanically connected to aluminum center rail in at least two places, with ends finished to protect installers and cables.
c. Radius-Fitting Rung Spacing: 9 inch (225 mm) at center of tray's width.
d. Support Point: Splice fittings must be hanger support point.
e. Support Spacing: Support each section at midpoint. Support wall-mounted sections a maximum of one-sixth of the section length from each end.
f. Unbalanced Loads: Maintain cable tray rungs within six degrees of horizontal under all loading conditions.
g. Splicing Assemblies: Bolted type using serrated flange locknuts.
h. Splicing Assembly Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.
i. Splices and Connectors: Protect cables from edges of center rail and do not intrude into cable fill area.

5. Materials: Aluminum alloy 6063-T6 in accordance with ANSI H35.1/H 35.1M for extruded components, and [**Alloy 5052-H32**][**or**][**Alloy 6061-T6**] in accordance with ANSI H35.1/H 35.1M for fabricated parts.
6. Hardware: [**Chromium-zinc-plated steel, ASTM F1136**][**Stainless steel, Type 316, ASTM F593 and ASTM F594**].

    a. Hardware for Aluminum Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

7. Options:

    a. Width: [**6 inch (150 mm)**][**9 inch (225 mm)**][**12 inch (300 mm)**][**18 inch (450 mm)**][**24 inch (600 mm)**] unless otherwise indicated on Drawings.
    b. Minimum Usable Load Depth: [**3 inch (75 mm)**][**4 inch (100 mm)**][**5 inch (125 mm)**][**6 inch (150 mm)**].
    c. Straight Section Lengths: [**10 ft (3.0 m)**][**12 ft (3.7 m)**], except where shorter lengths are required to facilitate tray assembly.
    d. Rung Spacing: [**6 inch (150 mm)**][**9 inch (225 mm)**][**12 inch (300 mm)**] on center.
    e. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.
    f. Covers: [**Solid**][**Louvered**][**Ventilated-hat**][**2-in-3 pitch**] type made of same materials and with same finishes as cable tray.

F. UL CYNW - Solid-Bottom Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**ABB, Electrification Business**]
    b. [**Atkore Cope**]
    c. [**BASOR Electric**]
    d. [**Chalfant Manufacturing Company**]
    e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    f. [**MonoSystems, Inc**]
    g. [**MP Husky USA Cable Tray & Cable Bus**]
    h. [**Niedax Inc.**]
    i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**ABB, Electrification Business**]
    b. [**Atkore Cope**]
    c. [**BASOR Electric**]
    d. [**Chalfant Manufacturing Company**]
    e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
    f. [**MonoSystems, Inc**]
    g. [**MP Husky USA Cable Tray & Cable Bus**]
    h. [**Niedax Inc.**]
    i. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.

4. General Characteristics:

    a. Configuration: Two longitudinal side rails with a nonventilated continuous bottom.
    b. No portion of the continuous bottom must protrude below the bottom plane of side rails.
    c. Structural Performance: Capable of supporting a maximum cable load, with a safety factor of 1.5, plus a **200 lb. (90 kg)** concentrated load, when tested in accordance with NEMA VE 1.
    d. Splicing Assemblies: Bolted type using serrated flange locknuts.
    e. Splice-Plate Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.

5. Materials and Finishes (Steel):

    a. Straight Sections and Fittings: Steel complies with the minimum mechanical properties of [**ASTM A1011/A1011M, SS, Grade 33**][**ASTM A1008/A1008M, Grade 33, Type 2**].
    b. Steel Tray Splice Plates: ASTM A1011/A1011M, HSLAS, Grade 50, Class 1.
    c. Fasteners: Steel complies with the minimum mechanical properties of ASTM A510/A510M, Grade 1008.
    d. Finish:

        1) Mill galvanized before fabrication complying with ASTM A653/A653M, **G90 (Z275)**, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**] hardware.
        2) Electrogalvanized before fabrication, complying with ASTM B633, with galvanized, ASTM B633 hardware.
        3) Hot-dip galvanized after fabrication complying with ASTM A123/A123M, Class B2, with [**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316**] hardware.
        4) [**Epoxy-resin**][**Powder-coat enamel**] paint, with [**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316, ASTM F593 and ASTM F594**] hardware.

            a) Powder-Coat Enamel: Cable tray manufacturer's recommended primer and corrosion-inhibiting treatment, with factory-applied powder-coat paint.
            b) Epoxy-Resin Prime Coat: Cold-curing epoxy primer, MPI# 101.
            c) Epoxy-Resin Topcoat: Cold-cured epoxy gloss, MPI# 77.

        5) Factory-standard primer, ready for field painting, with chromium-zinc-plated hardware in accordance with ASTM F1136.
        6) Black oxide finish for support accessories and miscellaneous hardware in accordance with ASTM D769.
        7) <**Insert finish**>.

6. Materials and Finishes (Aluminum):

    a. Materials: Alloy 6063-T6 in accordance with ANSI H35.1/H 35.1M for extruded components, and [**Alloy 5052-H32**][**or**][**Alloy 6061-T6**] in accordance with ANSI H35.1/H 35.1M for fabricated parts.
    b. Hardware: [**Chromium-zinc-plated steel, ASTM F1136**][**Stainless steel, Type 316, ASTM F593 and ASTM F594**].
    c. Hardware for Aluminum Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

7. Materials and Finishes (Stainless Steel):

    a. Materials: Low-carbon, passivated stainless steel, [**Type 304L**][**or**][**Type 316L**], ASTM F593 and ASTM F594.
    b. Hardware for Stainless Steel Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM

F593 and ASTM F594.

8. Options:

   a. Width: [6 inch (150 mm)][9 inch (225 mm)][12 inch (300 mm)][18 inch (450 mm)][24 inch (600 mm)][30 inch (750 mm)][36 inch (900 mm)] unless otherwise indicated on Drawings.
   b. Minimum Usable Load Depth: [3 inch (75 mm)][4 inch (100 mm)][5 inch (125 mm)][6 inch (150 mm)].
   c. Straight Section Lengths: [10 ft (3.0 m)][12 ft (3.7 m)][20 ft (6.0 m)][24 ft (7.4 m)], except where shorter lengths are required to facilitate tray assembly.
   d. Fitting Minimum Radius: [12 inch (300 mm)][24 inch (600 mm)][36 inch (900 mm)][48 inch (1200 mm)].
   e. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.
   f. Covers: [**Solid**][**Louvered**][**Ventilated-hat**][**2-in-3 pitch**] type made of same materials and with same finishes as cable tray.

G. UL CYNW - Trough Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Cablofil; Legrand North America, LLC**]
   c. [**Chalfant Manufacturing Company**]
   d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   e. [**MonoSystems, Inc**]
   f. [**MP Husky USA Cable Tray & Cable Bus**]
   g. [**Niedax Inc.**]
   h. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Cablofil; Legrand North America, LLC**]
   c. [**Chalfant Manufacturing Company**]
   d. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   e. [**MonoSystems, Inc**]
   f. [**MP Husky USA Cable Tray & Cable Bus**]
   g. [**Niedax Inc.**]
   h. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. General Characteristics:

   a. Splicing Assemblies: Bolted type using serrated flange locknuts.
   b. Splicing Assembly Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.

5. Materials and Finishes (Steel):

a. Straight Section and Fitting Side Rails and Rungs: Steel complies with the minimum mechanical properties of [**ASTM A1011/A1011M, SS, Grade 33**][**ASTM A1008/A1008M, Grade 33, Type 2**].
b. Steel Tray Splice Plates: ASTM A1011/A1011M, HSLAS, Grade 50, Class 1.
c. Fasteners: Steel complies with the minimum mechanical properties of ASTM A510/A510M, Grade 1008.
d. Finish:

1) Hot-dip galvanized after fabrication complying with ASTM A123/A123M, Class B2, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316**] hardware.
2) Hot-dip mill galvanized before fabrication complying with ASTM A653/A653M, **G90 (Z275)**, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**] hardware.
3) Electrogalvanized after fabrication, complying with ASTM B633, with galvanized, ASTM B633 hardware.
4) [**Epoxy-resin**][**Powder-coat enamel**] paint, with [**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316, ASTM F593 and ASTM F594**] hardware.

a) Powder-Coat Enamel: Cable tray manufacturer's recommended primer and corrosion-inhibiting treatment, with factory-applied powder-coat paint.
b) Epoxy-Resin Prime Coat: Cold-curing epoxy primer, MPI# 101.
c) Epoxy-Resin Topcoat: Epoxy, cold-cured gloss, MPI# 77.

5) Factory-standard primer, ready for field painting, with chromium-zinc-plated hardware in accordance with ASTM F1136.
6) Black oxide finish for support accessories and miscellaneous hardware in accordance with ASTM D769.
7) <**Insert finish**>.

6. Materials and Finishes (Aluminum):

a. Materials: Alloy 6063-T6 in accordance with ANSI H35.1/H 35.1M for extruded components, and [**Alloy 5052-H32**][**or**][**Alloy 6061-T6**] in accordance with ANSI H35.1/H 35.1M for fabricated parts.
b. Hardware: [**Chromium-zinc-plated steel, ASTM F1136**][**Stainless steel, Type 316, ASTM F593 and ASTM F594**].
c. Hardware for Aluminum Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

7. Materials and Finishes (Stainless Steel):

a. Materials: Low-carbon, passivated stainless steel, [**Type 304L**][**or**][**Type 316L**], ASTM F593 and ASTM F594.
b. Hardware for Stainless Steel Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

8. Options:

a. Configuration:

1) A [**flat**][**corrugated**] bearing surface with a [**solid**][**ventilated**] bottom contained within two longitudinal side rails, with both edges welded to the side rails complying with NEMA VE 1.
2) Single, formed sheet with a [**solid**][**ventilated**] bottom, complying with NEMA VE 1.

b. Width: [6 inch (150 mm)][9 inch (225 mm)][12 inch (300 mm)][18 inch (450 mm)][24 inch (600 mm)][30 inch (750 mm)][36 inch (900 mm)] unless otherwise indicated on Drawings.
c. Minimum Usable Load Depth: [3 inch (75 mm)][4 inch (100 mm)][5 inch (125 mm)][6 inch (150 mm)].
d. Straight Section Lengths: [10 ft (3.0 m)][12 ft (3.6 m)][20 ft (6.0 m)][24 ft (7.4 m)], except where shorter lengths are required to facilitate tray assembly.
e. Fitting Minimum Radius: [12 inch (300 mm)][24 inch (600 mm)][36 inch (900 mm)][48 inch (1200 mm)].
f. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.
g. Covers: [**Solid**][**Louvered**][**Ventilated-hat**][**2-in-3 pitch**] type made of same materials and with same finishes as cable tray.

H. UL CYNW - Channel Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**ABB, Electrification Business**]
   b. [**Atkore Cope**]
   c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   d. [**MP Husky USA Cable Tray & Cable Bus**]
   e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

   a. [**ABB, Electrification Business**]
   b. [**Atkore Cope**]
   c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
   d. [**MP Husky USA Cable Tray & Cable Bus**]
   e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. General Characteristics:

   a. Structural Performance: Capable of supporting a maximum cable load, with a safety factor of 1.5, plus a 200 lb (90 kg) concentrated load, when tested in accordance with NEMA VE 1.
   b. Splicing Assemblies: Bolted type using serrated flange locknuts.
   c. Splicing Assembly Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.

5. Materials and Finishes (Steel):

   a. Straight Section and Fitting Side Rails and Rungs: Steel complies with the minimum mechanical properties of [**ASTM A1011/A1011M, SS, Grade 33**][**ASTM A1008/A1008M, Grade 33, Type 2**].
   b. Steel Tray Splice Plates: ASTM A1011/A1011M, HSLAS, Grade 50, Class 1.
   c. Fasteners: Steel complies with the minimum mechanical properties of ASTM A510/A510M, Grade 1008.

d. Finish:

1) Hot-dip galvanized after fabrication complying with ASTM A123/A123M, Class B2, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**][**Stainless steel, Type 316**] hardware.
2) Hot-dip mill galvanized before fabrication complying with ASTM A653/A653M, **G90 (Z275)**, with [**galvanized, ASTM B633**][**chromium-zinc plated, ASTM F1136**] hardware.
3) Electrogalvanized after fabrication, complying with ASTM B633, with galvanized, ASTM B633 hardware.
4) [**Epoxy-resin**][**Powder-coat enamel**] paint, with [**chromium-zinc plated, ASTM F1136**][**stainless steel, Type 316, ASTM F593 and ASTM F594**] hardware.

a) Powder-Coat Enamel: Cable tray manufacturer's recommended primer and corrosion-inhibiting treatment, with factory-applied powder-coat paint.
b) Epoxy-Resin Prime Coat: Cold-curing epoxy primer, MPI# 101.
c) Epoxy-Resin Topcoat: Epoxy, cold-cured gloss, MPI# 77.

5) Factory-standard primer, ready for field painting, with chromium-zinc-plated hardware in accordance with ASTM F1136.
6) Black oxide finish for support accessories and miscellaneous hardware in accordance with ASTM D769.
7) <**Insert finish**>.

6. Materials and Finishes (Aluminum):

a. Materials: Alloy 6063-T6 in accordance with ANSI H35.1/H 35.1M for extruded components, and [**Alloy 5052-H32**][**or**][**Alloy 6061-T6**] in accordance with ANSI H35.1/H 35.1M for fabricated parts.
b. Hardware: [**Chromium-zinc-plated steel, ASTM F1136**][**Stainless steel, Type 316, ASTM F593 and ASTM F594**].
c. Hardware for Aluminum Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

7. Materials and Finishes (Stainless Steel):

a. Materials: Low-carbon, passivated stainless steel, [**Type 304L**][**or**][**Type 316L**], ASTM F593 and ASTM F594.
b. Hardware for Stainless Steel Cable Tray Used Outdoors: Stainless steel, Type 316, ASTM F593 and ASTM F594.

8. Options:

a. Configuration: Single, formed sheet with a [**solid**][**ventilated**] bearing surface, complying with NEMA VE 1.
b. Width: [**3 inch (75 mm)**][**4 inch (100 mm)**][**6 inch (150 mm)**] unless otherwise indicated on Drawings.
c. Minimum Usable Load Depth: [**1-1/4 inch (30 mm)**][**2 inch (50 mm)**].
d. Straight Section Lengths: [**10 ft (3.0 m)**][**12 ft (3.7 m)**], except where shorter lengths are required to facilitate tray assembly.
e. Fitting Minimum Radius: [**12 inch (300 mm)**][**24 inch (600 mm)**][**36 inch (900 mm)**][**48 inch (1200 mm)**].
f. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.

g. Covers: [**Solid**][**Louvered**][**Ventilated-hat**][**2-in-3 pitch**] type made of same materials and with same finishes as cable tray.

2.2 NONMETALLIC CABLE TRAYS

A. Description: This product category covers nonmetallic, including fiberglass (fiberglass-reinforced plastic), cable trays and cable tray systems intended for field assembly and for use in accordance with Article 392 of NFPA 70.

B. Performance Criteria:

1. Regulatory Requirements:

a. Listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2. Listing Criteria: UL CCN CYOV; including UL 568.

C. UL CYOV - Fiberglass Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Atkore Cope**]
d. [**Cablofil; Legrand North America, LLC**]
e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
f. [**Enduro Composites Inc.**]
g. [**MonoSystems, Inc**]
h. [**MP Husky USA Cable Tray & Cable Bus**]
i. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Atkore Cope**]
d. [**Cablofil; Legrand North America, LLC**]
e. [**Cooper B-line; brand of Eaton, Electrical Sector**]
f. [**Enduro Composites Inc.**]
g. [**MonoSystems, Inc**]
h. [**MP Husky USA Cable Tray & Cable Bus**]
i. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. General Characteristics:

a. Configuration: Two longitudinal members with rounded edges and smooth surfaces, supporting a bearing surface, complying with NEMA FG 1.

b. Temperature Rating: Reduce the load rating of trays exposed to temperatures above **75 deg F (24 deg C)** in accordance with Table 4-3, "Working Loads," in NEMA FG 1.
c. Splicing Assemblies: Minimum four nuts and bolts per plate. Splice plates must be furnished with straight sections and fittings.
d. Splicing Assembly Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.
e. Fasteners: Fiberglass-encapsulated, ASTM F593 and ASTM F594 stainless steel, Type 316. Design fasteners so that no metal is visible when fully assembled and tightened. Fastener encapsulation must not be damaged when torqued to manufacturer's recommended value.

5. Options:

a. Materials: Straight section structural elements; side rails, rungs, and splice plates must be pultruded from glass-fiber-reinforced [**polyester**][**vinyl ester**] resin, complying with NEMA FG 1 and UL 568.
b. Width: [**6 inch (150 mm)**][**9 inch (225 mm)**][**12 inch (300 mm)**][**18 inch (450 mm)**][**24 inch (600 mm)**][**30 inch (750 mm)**][**36 inch (900 mm)**] unless otherwise indicated on Drawings.
c. Minimum Usable Load Depth: [**1 inch (25 mm)**][**2 inch (50 mm)**][**3 inch (75 mm)**][**5 inch (125 mm)**][**7 inch (175 mm)**] in accordance with NEMA FG 1.
d. Straight Section Lengths: [**10 ft (3.0 m)**][**20 ft (6.0 m)**].
e. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.
f. Fitting Minimum Radius: [**12 inch (300 mm)**][**24 inch (600 mm)**].
g. Covers: [**Solid**][**Louvered**][**Ventilated-hat**][**2-in-3 pitch**] type made of same materials and with same finishes as cable tray.

D. UL CYOV - Fiberglass Channel Cable Tray :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Atkore Cope**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**Enduro Composites Inc.**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**ABB, Electrification Business**]
b. [**Atkore Cope**]
c. [**Cooper B-line; brand of Eaton, Electrical Sector**]
d. [**Enduro Composites Inc.**]
e. <**Insert manufacturer's name**>

3. Source Limitations: Obtain products from single manufacturer.
4. General Characteristics:

a. Temperature Rating: Reduce the load rating of trays exposed to temperatures above **75 deg F (24 deg C)** in accordance with Table 4-3, "Working Loads," in NEMA FG 1.
b. Splicing Assemblies: Minimum four nuts and bolts per plate. Splice plates must be furnished with straight sections and fittings.
c. Splicing Assembly Capacity: Splices located within support span must not diminish rated loading capacity of cable tray.
d. Fasteners: Fiberglass-encapsulated, ASTM F593 and ASTM F594 stainless steel, Type 316. Design fasteners so that no metal is visible when fully assembled and tightened. Fastener encapsulation must not be damaged when torqued to manufacturer's recommended value.

5. Options:

a. Configuration: Two longitudinal members with rounded edges and smooth surfaces, supporting a [**solid**][**ventilated**] bearing surface, complying with NEMA FG 1.
b. Materials: Straight section structural elements; side rails, rungs, and splice plates must be pultruded from glass-fiber-reinforced [**polyester**][**vinyl ester**] resin, complying with NEMA FG 1 and UL 568.
c. Width: [**3 inch (75 mm)**][**4 inch (100 mm)**][**6 inch (150 mm)**] unless otherwise indicated on Drawings.
d. Minimum Usable Load Depth: [**1-1/4 inch (30 mm)**][**2 inch (50 mm)**].
e. Straight Section Lengths: [**10 ft (3.0 m)**][**12 ft (3.7 m)**], except where shorter lengths are required to facilitate tray assembly.
f. Class Designation: Comply with NEMA VE 1, [**Class 5AA**][**Class 5A**][**Class 8AA**][**Class 8A**][**Class 10AA**][**Class 10A**][**Class 12AA**][**Class 12A**][**Class 20AA**][**Class 20A**]<**Insert designation**>.
g. Fitting Minimum Radius: [**12 inch (300 mm)**][**24 inch (600 mm)**].
h. Covers: [**Solid**][**Louvered**][**Ventilated-hat**][**2-in-3 pitch**] type made of same materials and with same finishes as cable tray.

2.3 CABLE TRAY ACCESSORIES

A. Fittings: Tees, crosses, risers, elbows, and other fittings as indicated, of same materials and finishes as cable tray.

B. Barrier Strips: Same materials and finishes as for cable tray.

C. Cable tray supports and connectors, including bonding jumpers, as recommended by cable tray manufacturer.

2.4 SOURCE QUALITY CONTROL

A. Product Data: Prepare and submit catalog cuts, brochures,[**diagrams,**][**schedules,**] and performance data illustrating size, physical appearance, and other characteristics of product.

1. Include data indicating dimensions and finishes for each type of cable tray indicated.

B. Manufacturer's Published Instructions: Prepare and submit installation, testing, and operating instructions for product.

C. Factory Tests:

1. Owner will witness required factory tests. Notify Architect at least 14 days before date of tests and indicate their approximate duration.

2. Testing Administrant: [**Owner will engage**][**Engage**] qualified electrical testing agency to evaluate cable trays.
3. Factory Tests and Inspections: Perform the following tests and inspections on cable trays, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction before delivering to site. Affix label with name and date of [**manufacturer's**][**qualified electrical testing laboratory's**] certification of system compliance.

    a. Test and inspect cable trays in accordance with [**NEMA FG 1**][**NEMA VE 1**].

4. Nonconforming Work:

    a. Equipment that does not pass tests and inspections will be considered defective.

5. Factory Test Reports: Prepare and submit factory test and inspection reports.

PART 3 - EXECUTION

3.1 PREPARATION

A. Shop Drawings: Prepare and submit the following for each cable tray system:

1. Cable Tray Fabrication Drawings, Diagrams, and Supporting Documents:

    a. Show fabrication and installation details of cable trays, including plans, elevations, and sections of components and attachments to other construction elements. Designate components and accessories, including clamps, brackets, hanger rods, splice-plate connectors, expansion-joint assemblies, straight lengths, and fittings.
    b. Include load calculations to show that dead and live loads do not exceed manufacturer's rating for tray and its support elements.
    c. Cable tray layout, showing cable tray route to scale, with relationship between the tray and adjacent structural, electrical, and mechanical elements. Include the following:

        1) Vertical and horizontal offsets and transitions.
        2) Clearances for access above and to sides of cable trays.
        3) Vertical elevation of cable trays above the floor or bottom of ceiling structure.

3.2 INSTALLATION OF CABLE TRAYS

A. Install cable tray and support systems in accordance with [**NEMA FG 1**][**NEMA VE 2**].

B. Install cable tray as a complete system, including fasteners, hold-down clips, support systems, barrier strips, adjustable horizontal and vertical splice plates, elbows, reducers, tees, crosses, cable dropouts, adapters, covers, and bonding.

C. Install cable tray, so that the tray is accessible for cable installation and all splices are accessible for inspection and adjustment.

D. Remove burrs and sharp edges from cable trays.

E. Join aluminum cable tray with splice plates; use four square-neck carriage bolts and locknuts.

F. Fasten cable tray supports to building structure[**and install seismic restraints**].

G. Design fasteners and supports to carry cable tray, cables, and a concentrated load of **200 lb (90 kg)**. Comply with requirements in Section 260529 "Hangers and Supports for Electrical Systems."[**Comply with seismic-restraint details in accordance with Section 260548.16 "Seismic Controls for Electrical Systems."**]

H. Place supports, so that spans do not exceed maximum spans on schedules, and provide clearances shown on Drawings. Install intermediate supports when cable weight exceeds the load-carrying capacity of tray rungs.

I. Construct supports from channel members, threaded rods, and other appurtenances furnished by cable tray manufacturer. Arrange supports in trapeze or wall-bracket form as required by application.

J. Support assembly to prevent twisting from eccentric loading.

K. Install center-hung supports for single-rail trays designed for 60 versus 40 percent eccentric loading condition, with a safety factor of 3.

L. Do not install more than one cable tray splice between supports.

M. Support wire-basket cable trays with [**center support hangers**][**trapeze hangers**][**wall brackets**].

N. Support [**center support hangers**][**trapeze hangers**] for wire-basket trays with [**1/4 inch (6 mm)**][**3/8 inch (10 mm)**] diameter rods.

O. Make connections to equipment with flanged fittings fastened to cable trays and to equipment. Support cable trays independent of fittings. Do not carry weight of cable trays on equipment enclosure.

P. Install expansion connectors where cable trays cross building expansion joints and in cable tray runs that exceed recommended dimensions. Space connectors and set gaps in accordance with applicable standard.

Q. Make changes in direction and elevation using manufacturer's recommended fittings.

R. Make cable tray connections using manufacturer's recommended fittings.

S. Seal penetrations through fire and smoke barriers.

T. Install capped metal sleeves for future cables through firestop-sealed cable tray penetrations of fire and smoke barriers.

U. Install cable trays with enough workspace to permit access for installing cables.

V. Install barriers to separate cables of different systems, such as power, communications, and data processing, or of different insulation levels, such as 600, 5000, and 15 000 V.

W. Install permanent covers[**and cover clamps**], if used, after installing cable.

X. Clamp covers on cable trays installed outdoors with heavy-duty clamps.

Y. Install warning signs in visible locations on or near cable trays after cable tray installation.

3.3 CABLE TRAY GROUNDING

A. Ground cable trays in accordance with NFPA 70 unless additional grounding is specified.

B. Cable trays with electrical power conductors must be bonded together with splice plates listed for grounding purposes or with listed bonding jumpers.

C. Cable trays with single-conductor power conductors must be bonded together with a grounding conductor run in the tray along with the power conductors and bonded to the tray at **72 inch (1800 mm)** intervals. The grounding conductor must be sized in accordance with Article 250 and Article 392 of NFPA 70.

D. When using epoxy- or powder-coat painted cable trays as a grounding conductor, completely remove coating at all splice contact points or ground connector attachment. After completing splice-to-grounding-bolt attachment, repair the coated surfaces with coating materials recommended by cable tray manufacturer.

E. Bond cable trays to power source for cables contained within with bonding conductors sized in accordance with Article 250 of NFPA 70.

3.4 INSTALLATION OF CABLES

A. Install cables only when each cable tray run has been completed and inspected.

B. Fasten cables on horizontal runs with cable clamps or cable ties. Tighten clamps only enough to secure the cable, without indenting the cable jacket. Install cable ties with a tool that includes an automatic pressure-limiting device.

C. Fasten cables on vertical runs to cable trays every **18 inch (450 mm)**.

D. Fasten and support cables that pass from one cable tray to another or drop from cable trays to equipment enclosures. Fasten cables to the cable tray at the point of exit and support cables independent of the enclosure. The cable length between cable trays or between cable tray and enclosure must be no more than **72 inch (1800 mm)**.

E. Tie mineral-insulated cables down every **36 inch (900 mm)** where required to provide a two-hour fire rating and every **72 inch (1800 mm)** elsewhere.

F. In existing construction, remove inactive or dead cables from cable trays.

3.5 FABRICATION OF CONNECTION POINTS

A. Remove paint from all connection points before making connections. Repair paint after the connections are completed.

B. Connect raceways to cable trays in accordance with requirements in NEMA VE 2 and NEMA FG 1.

3.6 INSTALLATION OF CABLE TRAY MARKINGS AND SIGNS

A. Trays Containing Cables Operating Over 600 V: Provide hazard markings in accordance with Section 392.18 of NFPA 70 and with NEMA Z535.4.

1. Legend: "DANGER - HIGH VOLTAGE - KEEP AWAY."

B. Ladder Cable Trays: Provide warning signs to prevent use as personnel ladder.

1. Lettering: [**1-1/2 inch (40 mm)**]<**Insert dimension**> high.
2. Legend: "WARNING! NOT TO BE USED AS WALKWAY, LADDER, OR SUPPORT FOR LADDERS OR PERSONNEL."

3.7 FIELD QUALITY CONTROL

A. Acceptance Testing Preparation:

1. <**Insert requirements**>.

B. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

C. Tests and Inspections:

1. After installing cable trays and after electrical circuitry has been energized, survey for compliance with requirements.
2. Visually inspect cable insulation for damage. Correct sharp corners, protuberances in cable trays, vibrations, and thermal expansion and contraction conditions, which may cause or have caused damage.
3. Verify that the number, size, and voltage of cables in cable trays do not exceed that permitted by NFPA 70. Verify that communications or data-processing circuits are separated from power circuits by barriers or are installed in separate cable trays.
4. Verify that there are no intruding items, such as pipes, hangers, or other equipment, in the cable tray.
5. Remove dust deposits, industrial process materials, trash of any description, and any blockage of tray ventilation.
6. Visually inspect each cable tray joint and each ground connection for mechanical continuity. Check bolted connections between sections for corrosion. Clean and retorque in suspect areas.
7. Check for improperly sized or installed bonding jumpers.
8. Check for missing, incorrect, or damaged bolts, bolt heads, or nuts. When found, replace with specified hardware.
9. Perform visual and mechanical checks for adequacy of cable tray grounding; verify that all takeoff raceways are bonded to cable trays. Test entire cable tray system for continuity. Maximum allowable resistance is 1 Ω.

D. Nonconforming Work:

1. Cable tray will be considered defective if it does not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to [**support**][**supervise**] field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at Project site.

3.8 PROTECTION

A. Protect installed cable trays and cables.

1. Install temporary protection for cables in open trays to safeguard exposed cables against falling objects or debris during construction. Temporary protection for cables and cable tray can be constructed of wood or metal materials and must remain in place until the risk of damage is over.
2. Repair damage to galvanized finishes with zinc-rich paint recommended by cable tray manufacturer.
3. Repair damage to paint finishes with matching touchup coating recommended by cable tray manufacturer.

END OF SECTION 26 05 36 00

26 05 36 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 39 00 - UNDERFLOOR RACEWAYS FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Underfloor raceway products.
2. Underfloor raceway fittings.
3. Maintenance material items.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work specified in this Section.
2. [**Section 013100 "Project Management and Coordination"**] specifies preinstallation conference procedures.
3. Section 033000 "Cast-in-Place Concrete" specifies installation of concrete surrounding underfloor raceways.
4. Section 034100 "Precast Structural Concrete" specifies precast concrete units used as cellular concrete floor raceways.
5. Section 053100 "Steel Decking" specifies rough-in of underfloor duct distribution system.
6. Section 260519 "Low-Voltage Electrical Power Conductors and Cables" specifies installation of wiring for the Work specified in this Section.
7. Section 260526 "Grounding and Bonding for Electrical Systems" specifies installation of grounding and bonding for the Work specified in this Section.
8. Section 260533.16 "Boxes and Covers for Electrical Systems" specifies installation of cover plates for outlet, device, and junction boxes.
9. Section 260553 "Identification for Electrical Systems" specifies installation of labels and warning signs for the Work specified in this Section.
10. Section 262726 "Wiring Devices" specifies installation of receptacles and connectors.
11. Section 271513 "Communications Copper Horizontal Cabling" specifies installation of twisted pair jacks, outlets, assemblies, and cover plates.
12. Section 271523 "Communications Optical Fiber Horizontal Cabling" specifies installation of optical fiber jacks, outlets, assemblies, and cover plates.
13. Section 271533 "Communications Coaxial Horizontal Cabling" specifies installation of coaxial jacks, outlets, assemblies, and cover plates.

1.2 DEFINITIONS

A. Activation: Nomenclature used by some manufacturers for a service fitting.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference [**at the Project site**][**by web conference**].

B. Preinstallation Coordination Meeting(s): For coordination of structural, electrical, and interior finishes Work for installation of underfloor raceways. Conduct meeting(s) [**at the Project site**][**as web conference**].

1. Attendees: Installers, fabricators, representatives of manufacturers, and administrants for field tests and inspections. Notify Architect [**Construction Manager**][**and the Owner]** of scheduled meeting dates.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of specified product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
2. Include operating characteristics, electrical characteristics, and furnished accessories.
3. Product Listing: Include copy of unexpired approval letter, on letterhead of qualified electrical testing laboratory, certifying that model number corresponding to specified product complies with specified listing criteria.

B. Shop Drawings: Prepare and submit the following:

1. Drawings, Diagrams, and Supporting Documents Detailing Fabrication and Assembly of Underfloor Raceways:

a. Include floor plans, elevations, sections, and details.
b. Identify components and accessories, such as expansion-joint assemblies, straight raceway lengths, preset and afterset inserts, and service fittings.
c. Detail preparation and installation methods and instructions.
d. Provide dimensions locating raceway header and distribution elements. Include spacing between preset inserts and between preset inserts and ends of duct runs, walls, columns, junction boxes, and header duct connections.
e. Provide raceway fill charts for each duct size provided for each conductor size the duct is identified to accept. Provide separate charts for power and communication conductors and cables.
f. Show connections between raceway elements and relationships between components and adjacent structural and architectural elements, including slab reinforcement, floor finish work, permanent partitions, expansion joints [**architectural module lines**][**and pretensioning or post-tensioning components**] .
g. Indicate height of preset inserts, junction boxes, and raceways coordinated with depth of concrete slab and floor fill.
h. Indicate thickening of slabs where required for adequate encasement of raceway components.
i. Document coordination of exposed components with floor-covering materials to ensure that fittings and trim are suitable for indicated floor-covering material.
j. Revise locations from those indicated in the Contract Documents, as required to suit field conditions and to ensure a functioning layout. Identify proposed deviations from the Contract Documents.
k. Show details of connections and terminations of underfloor raceways at panelboards and communication terminal equipment in equipment rooms, wire closets, and similar spaces.

l. Identify those cells of cellular floor deck that are to be connected and fitted for the following underfloor distribution:

1) Power.
2) Voice.
3) Data.
4) Signal.
5) Communications.

C. Samples for Verification: For each underfloor raceway product, in specified finish, including the following:

1. Service fittings and flush and recessed outlet and junction-box covers.
2. A section of each service raceway configuration, with specified preset insert and service fitting installed.
3. A junction box of each size and type for use with underfloor raceway.
4. A section of each header raceway configuration, complete with provisions for connection with service raceway.
5. A section of trench-type raceway, complete with cover and required trim.
6. A junction box of each size and type for use with trench-type raceway, complete with cover and trim.

D. Field QC Reports: For specified tests and inspections.

1.5 INFORMATIONAL SUBMITTALS

A. Manufacturer's Published Instructions: For each type of specified product.

1.6 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For underfloor raceways.

1. In addition to items specified in Section 260010 "Supplemental Requirements for Electrical," include the following:

a. Manufacturer's published instructions for locating preset inserts and for installing afterset inserts.
b. Dimensioned locations for all ducts, junction boxes, and preset inserts. Typical spacing designation must be accepted only for preset insert spacing along a continuous length of duct.

1.7 MAINTENANCE MATERIAL SUBMITTALS

A. Spare parts.

B. Special tools.

1.8 QUALIFICATIONS

A. Electrical Power Testing (EPT) Technician I: Possessing active NICET EPT Level I certification. Able to work safely around electrical power equipment and cabling under supervision.

B. Electrical Power Testing (EPT) Technician II: Possessing active NICET EPT Level II certification. Able to isolate and ground electrical power equipment, to connect test equipment, and to conduct and document standard tests of basic equipment.

C. Electrical Power Testing (EPT) Technician III: Possessing active NICET EPT Level III certification. Able to manage switching procedures, to conduct tests of complex equipment, to analyze test and equipment data, to plan a job, and to lead a team. Has experience performing NFPA 70B, IEEE, and NETA electrical tests.

D. Electrical Power Testing (EPT) Technician IV: Possessing active NICET EPT Level IV certification. Able to conduct tests of complex metering and relay systems; to evaluate tests, test equipment, test results, and power system performance; to recommend actions to maintain or improve system performance; and to lead multi-team projects.

E. Electrical Power Testing and Inspecting Agency: Entities possessing active credentials from qualified electrical testing laboratory recognized by authorities having jurisdiction.

1. On-site electrical testing supervisors must possess active NICET EPT Technician [**III**][**IV**] certification.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

B. Seismic and Wind Performance: Installed assembly must perform in accordance with Section 018123 "Facility Seismic and Wind Criteria" and the following:

1. Withstand Requirement: Unit must remain in place without separation of parts when subjected to specified criteria during seismic events [**and unit must be fully operational after seismic events**] .

2. Component Importance Factor (Ip): [**1.0**][**1.5**] .

3. Component Amplification Factor (ap): [**1.0**][**2.5**].

4. Component Response Modification Factor (Rp): [**1.5**][**2.0**][**2.5**][**6.0**].

5. Component Overstrength Factor (Ωo): [**1.5**][**2.5**].

C. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

1. Temperature Change: [**120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces**].

2.2 UNDERFLOOR RACEWAY PRODUCTS

A. Flat-Top, Steel Underfloor Raceways :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**MonoSystems, Inc**]
b. [**Square D; Schneider Electric USA**]
c. [**Walker Systems, Inc.**]

2. Source Limitations: Obtain underfloor raceway components for each system from single source from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:

    a. Underfloor Raceways: UL Solutions product category UL CCN RKCZ, including UL 884.

4. Standard Features:

    a. Product Reference Standard(s): Article 390 of NFPA 70.
    b. Configuration: Steel, rectangular, flat-top, single-channel raceways with premanufactured inserts.
    c. Materials: One-piece, continuous weld, minimum **0.0598 inch (1.5 mm)** thick steel, with [**corrosion-resistant**][**galvanized**] coating inside and out after welding.
    d. Cross-Section Shape: Rectangular, with rounded corners.

    e. Number of Longitudinal Channels: [**Two**][**Three**][**Four**] , separated by steel wall(s).

    f. Number of Levels: [**One**][**Two**] .

    g. Minimum Bending Radius for Communication Cables: Combination of raceways, fittings, inserts, junction boxes, service fittings, and mounting and connection arrangements for wiring devices and jacks must provide a [**2 inch (50 mm)**] minimum bending radius for communication cables.

5. Service Raceways: Fitted with preset inserts.

    a. Nominal Multichannel Underfloor Raceway Dimensions:

        1) Depth: **1-3/8 inch (35 mm)**.
        2) Overall Width: [**6 inch (150 mm)**][**10 inch (250 mm)**][**15 inch (375 mm)**].
        3) Power Service Channel Width: [**3-1/2 inch (88 mm)**][**4-3/8 inch (110 mm)**].
        4) Communication Service Channel Width: [**3-1/2 inch (88 mm)**][**4 inch (100 mm)**][**6-1/2 inch (163 mm)**].

    b. Nominal Single-Channel Underfloor Raceway Dimensions:

        1) Depth: **1-1/2 inch (38 mm)**.
        2) Power Service Raceway Width: **3-1/4 inch (81 mm)**.
        3) Communication Service Raceway Width: [**3-1/4 inch (81 mm)**][**6 inch (150 mm)**] .

        4) Number of Single-Channel Raceways per Run: [**One**][**Two**][**Three**][**Four**][**Five**] unless otherwise indicated.

    c. Preset Inserts: [**Rectangular**][**Round**] .

        1) Spacing: [**12 inch (300 mm)**][**24 inch (600 mm)**] on center.

            a) Rectangular Insert Size: Rectangular dimensions as required to accommodate mounting and connection of flush- and surface-mounted, [**single-**][**and multiple-**] outlet service fittings or to connect to wiring extensions for feeding wall outlets for [**power**][**communications**][**power and**

communications].

b) Round Insert Size: [**2 inch (50 mm)**] in diameter.

2) Equip each insert with a disposable cover, and select insert height so cover is **1/8 inch (3 mm)** below surface of concrete.

3) Arrange insert for optional attachment of flush-, surface-, or wiring-extension service fitting to replace disposable cover. Arrange brackets, mountings, barriers, and floor access covers to support, isolate, and provide access to [**flush**][**surface**] outlet-mounting connector, jack, and receptacle devices.

6. Header Raceways: [**Single-**][**Multi**] channel, without preset inserts (blank raceway).

a. Nominal Raceway Dimensions:

1) Depth: [**Same as service raceways**][**2-1/2 inch (63 mm)**][**2-3/4 inch (69 mm)**][**3 inch (75 mm)**][**3-1/2 inch (88 mm)**] .

2) Power Header Raceway Width: [**3-1/2 inch (88 mm)**][**4-3/8 inch (110 mm)**].

3) Communication Header Raceway Width: [**3-1/2 inch (88 mm)**][**4 inch (100 mm)**][**6-1/2 inch (163 mm)**] .

b. Arrangement: [**In same plane as**][**Below**] service raceways.

c. Connections: Arranged to connect with service raceways at [**single**][**two**] -level junction boxes.

B. Flush, Flat-Top, Steel Underfloor Raceways :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

a. [**Walker Systems, Inc.**]

2. Source Limitations: Obtain underfloor raceway components for each system from single source from single manufacturer.

3. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:

a. Underfloor Raceways: UL Solutions product category UL CCN RKCZ, including UL 884.

4. Standard Features:

a. Configuration: [**Single**][**multichannel**] underfloor raceways installed on floor slab with top of raceway flush with concrete topping added hereafter, and then covered with finish material.

b. Material: Steel.

c. Cross-Section Shape: Rectangular, [**single channel**][**and**][**multichannel, separated by steel wall(s)**] .

d. Listed and labeled for installation with top flush with concrete floor.

e. Number of Levels: One.

5. Service Raceways: Fitted with preset inserts.

    a. Number of Longitudinal Channels per Multichannel Raceway: [**Two**][**Three**] .

    b. Number of Single-Channel Raceways per Run: [**One**][**Two**][**Three**] unless otherwise indicated.
    c. Nominal Channel Dimensions: **3 inch (75 mm)** wide by **1-1/4 inch (31 mm)** deep.
    d. Preset Inserts: Threaded opening with removable steel plug that is flush with top of raceway when screwed in place.

        1) Spacing: [**12 inch (300 mm)**][**24 inch (600 mm)**] on center, full length of each service raceway.
        2) Arrangement: Stagger insert locations on parallel raceways or channels to accommodate placement of adjacent service fittings.
        3) Size: **1-5/8 inch (41 mm)** diameter.

6. Trench Duct Crossunder: Fitting attached to underside of trench duct.

    a. Nominal Channel Dimensions: Same as service raceways.
    b. Arrangement: Offset by depth of trench duct.
    c. Connections: Arranged to connect trench duct to flush duct through factory-cut, grommeted openings.

7. Header Raceways: Raceways same as service raceways, except without preset inserts (blank raceway).

    a. Nominal Channel Dimensions: Same as service raceways.
    b. Arrangement: In same plane as service raceways.
    c. Connections: Arranged to connect with service raceways at junction boxes.

C. Cellular Metal, Steel Underfloor Raceways :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**] :

    a. [**ASC Steel Deck; ASC Profiles, LLC**]
    b. [**Dennis Filges Company, Inc**]
    c. [**Epic Metals Corporation**]
    d. [**HH Robertson**]
    e. [**United Steel Deck, Inc.**]
    f. [**Walker Systems, Inc.**]

2. Source Limitations: Obtain underfloor raceway components for each system from single source from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:

    a. Underfloor Raceways: UL Solutions product category UL CCN RKCZ, including UL 884.

4. Standard Features:

a. Configuration: Multichannel, cellular, underfloor service raceways installed on floor slab with top of raceway flush concrete topping added hereafter, and then covered with finish material.
b. Material:

1) Galvanized-steel sheet, ASTM A653/A653M, Structural Steel (SS), Grade **33 (230)** minimum, [**G60 (Z180)**][**G90 (Z275)**] zinc coating.
2) Galvanized- and shop-primed steel sheet, ASTM A653/A653M, Structural Steel (SS), Grade **33 (230)**, **G60 (Z180)** zinc coating; with underside surface cleaned, pretreated, and primed with manufacturer's standard [**gray**][**white**] baked-on, rust-inhibitive primer.

c. Number of Longitudinal Cells: Three, separated by steel walls.
d. Nominal Dimensions of Cells:

1) Overall Depth: **1-1/4 inch (31 mm)** unless otherwise indicated.
2) Cross-Sectional Area of Cells: Power cells: **5-1/2 sq. inch (34.4 sq. cm)**; communication system cells: **16 sq. inch (100 sq. cm)**.

e. Minimum Bending Radius for Communication Cables: Combination of raceways, fittings, inserts, junction boxes, service fittings, and mounting and connection arrangements for wiring devices and jacks must provide a [**2 inch (50 mm)**] minimum bending radius for communication cables.

5. Service Raceways: Fitted with preset inserts.

a. Preset Inserts: Rectangular-shaped metal housing assemblies arranged to provide electrical outlet access to each cell of each raceway designated for service raceway use. Inserts must be provided throughout the entire length of each such raceway.

1) Spacing: [**12 inch (300 mm)**][**24 inch (600 mm)**][**30 inch (750 mm)**] on center.
2) Include housing and connecting provisions for a flush or recessed, single-, double-, or triple-outlet service fitting.
3) Include mounting and connecting provisions for a surface, single- or multiple-outlet service fitting.
4) Include connecting provisions for a wiring-extension service fitting to feed wall outlets.
5) Equip each insert with a disposable cover plate arranged for installation with top **1/8 inch (3 mm)** below surface of concrete. Arrange insert to receive a flush-, recessed-, or wiring-extension service fitting to replace disposable top.

6. Header Assembly: A junction box and raceway arrangement positioned to feed wires and cables to service raceways.

a. Three-compartment junction box connecting blank, [**multicell cellular**][**flat-top, multichannel**] header raceway (no inserts) with cellular service raceways at right angles to header raceway.
b. Cellular header raceway must be made of the same material and have the same nominal dimensions as service raceways.
c. Provide capability for service raceways to be run in both perpendicular directions at the intersection with header raceway.

D. Trench-Type, Steel Underfloor Raceways :

1. Manufacturers: Subject to compliance with requirements, [**provide products by the**

following][provide products by one of the following][available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following] :

a. [**Dennis Filges Company, Inc**]
b. [**HH Robertson**]
c. [**Hubbell Wiring Device-Kellems; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
d. [**Square D; Schneider Electric USA**]
e. [**Walker Systems, Inc.**]

2. Source Limitations: Obtain underfloor raceway components for each system from single source from single manufacturer.
3. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:

   a. Underfloor Raceways: UL Solutions product category UL CCN RKCZ, including UL 884.

4. Standard Features:

   a. Configuration: Trench-type raceways used as header or feeder raceways to serve service raceways.
   b. Trench: Steel, shop or factory welded and fabricated to indicated sizes. Include the following features:

      1) Slab Depth Adjustment: Minimum of minus **1/8 inch (3 mm)** to plus **5/8 inch (17 mm)** before and during concrete placement.
      2) Cover Supports: Height adjustable, with leveling screws to rigidly support cover assembly.
      3) Screed Strip: Extruded aluminum along both edges at proper elevation without requiring shim material.
      4) Trim Strip: Select to accommodate floor finish material.
      5) Partitions: Arranged to separate channels and isolate wiring of different systems.

      6) Grommeted openings in active floor cells or service raceways.
      7) Manufacturer's standard corrosion-resistant finish, applied after fabrication.

   c. Cover Plates: Removable, steel plates, **1/4 inch (6 mm)** thick, each weighing **60 lb. (27 kg)** or less with full gasket attached to side units. Fabricate intermediate supports to limit unsupported spans to [**15 inch (375 mm)**] or less. Fabricate covers with appropriate depth recess to receive indicated floor finish.

2.3 UNDERFLOOR RACEWAY FITTINGS

A. Electrical Connection Components for Cellular Steel Floor Decks:

1. Source Limitations for Electrified Cellular Steel Floor-Deck Components: Obtain electrical components, such as preset inserts, afterset inserts, service fittings, header ducts, and trench header ducts, from cellular steel floor-deck manufacturer.
2. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or

more of the following guide information and corresponding standards:

a. Underfloor Raceway Fittings: UL Solutions product category UL CCN RKQX, including UL 884.

3. Standard Features:

a. Product Reference Standard(s): Article 390 of NFPA 70.
b. Preset Inserts: Rectangular metal-housing assemblies.

1) Spacing: [**12 inch (300 mm)**][**24 inch (600 mm)**][**30 inch (750 mm)**] on center.
2) Size: As required to provide electrical outlet access to each cell of each group of three cells that is designated for electrical service raceway use.
3) Equip each insert with a disposable cover arranged for installation with top **1/8 inch (3 mm)** below surface of concrete. Arrange insert to receive a flush-, recessed-, or wiring-extension service fitting to replace disposable cover.

4) Include housing and connecting provisions for a [**flush or recessed**][**surface**] service fitting, [**single**][**double**][**triple**] outlet.
5) Include connecting provisions for a wiring-extension service fitting to feed wall outlets.

B. Electrical Connection Components for Cellular Concrete Floor Decks:

1. Source Limitations for Electrified Cellular Concrete Floor-Deck Components: Obtain electrical components, such as preset inserts, afterset inserts, service fittings, header ducts, and trench header ducts, from cellular concrete floor-deck manufacturer or from single source from single manufacturer.
2. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:

a. Underfloor Raceway Fittings: UL Solutions product category UL CCN RKQX, including UL 884.

3. Standard Features:

a. Product Reference Standard(s): Article 390 of NFPA 70.
b. Afterset Inserts: Round metal-nipple assembly with internal and external threading, arranged to screw into plug driven into **1-7/8 inch (47 mm)** hole drilled through floor fill, where present, and deck-cell wall into floor raceway cell.

1) Inserts must be compatible with floor-mounting service fittings.
2) Inserts must provide wiring path from cell to [**power**][**communication**][**power and communication**]
[**wall**][**and**][**ceiling**] outlets.
3) Inserts must provide wiring path from cell to header raceway.

C. Underfloor Raceway Service Fittings/Activations:

1. Source Limitations: Obtain underfloor raceway service fittings and hardware for each system from single source from single manufacturer.
2. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical**

testing laboratory recognized by authorities having jurisdiction] in accordance with one or more of the following guide information and corresponding standards:

a. Underfloor Raceway Fittings: UL Solutions product category UL CCN RKQX, including UL 884.

3. Standard Features:

a. Product Reference Standard(s): Article 390 of NFPA 70.
b. Exposed Parts Finish: [**Brass**][**Brushed aluminum**].

c. Flush, Single-System Service Fitting for Round Inserts: Include mounting and cover to support and provide access to single connector, jack, or receptacle device; mounted flush with floor within body of insert.

1) Connector, Jack, and Receptacle Devices: Single modular type.
2) Power Receptacle Outlet: Suitable for 20 A, 120 V device.

d. Flush System Service Fitting for Rectangular Inserts: Include mounting, hinged cover, and trim to support and provide access to connector, jack, or receptacle devices mounted flush with floor within insert.

1) System Type: [**Single**][**multiple**] .
2) Connector, Jack, and Receptacle Devices: Modular type.
3) Power Receptacle Rating: 20 A, 120 V unless otherwise indicated.

4) Recess-Mounted Service Fitting: Modular fittings compatible with preset inserts. Include device plates for indicated systems and provisions for receptacles, jacks, and connectors. Include hinged flush covers with recessed depth to match thickness of floor finish material. Provide for internally mounted receptacle- and communication-jack and connector assemblies.

e. Surface-Mounted Service Fitting: Modular pedestal type, with locking attachment matched to insert floor opening.

1) Power-outlet, double-faced, surface-mounted unit for duplex receptacle on both sides.
2) Power-outlet, single-faced, surface-mounted unit for duplex receptacle on one side.
3) Communication-outlet, double-faced, surface-mounted unit.

a) Include bushed openings on both sides; **1 inch (25 mm)** minimum diameter; insulated with nonconducting material.
b) Include provisions for modular dual fiber-optic connector assembly on both sides.
c) Include provisions for modular dual jack-connector assembly, rated for [**Category 5**][**Category 5e**][**Category 6**] on both sides.

4) Communication-outlet, single-faced, surface-mounted unit with bushed opening on one side; **1 inch (25 mm)** minimum diameter; insulated with nonconducting material.
5) Combination surface-mounted unit for duplex receptacle on one side and with communication cable connection provision on opposite side.

a) Include bushed opening; **1 inch (25 mm)** minimum diameter; insulated with nonconducting material.
b) Include provisions for modular dual fiber-optic connector assembly.
c) Include provisions for modular dual jack-connector assembly, rated for

[**Category 5**][**Category 5e**][**Category 6**] .

6) Flush-Mounted Service Fittings: Modular fittings compatible with preset inserts and must include covers, provisions for receptacles jacks and connector assemblies and wiring extensions to wall-mounted outlets, and associated device plates for indicated systems. Include flush covers, recessed to suit floor finish material.

7) Wiring-Extension Service Fittings: Arrangement of brackets and mountings to support and provide access to wiring or cabling of a cell, and to connect the cable or raceway that extends the system to an individual wall outlet. Provide for connection of [**ERMC**][**FMC**][**ENT**][**Type MC cable**] for power extensions, and [**ERMC**][**FMC**][**ENT**][**optical fiber/communication cable raceway**] for communication system extensions.

D. Underfloor Raceway Adapter Fittings:

1. Source Limitations: Obtain underfloor raceway adapter fittings for each system from single source from single manufacturer.
2. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:

a. Underfloor Raceway Fittings: UL Solutions product category UL CCN RKQX, including UL 884.

3. Standard Features:

a. Product Reference Standard(s): Article 390 of NFPA 70.
b. Description: Couplings, expansion-joint sleeves, cross-under offsets, vertical and horizontal elbows, grounding screws, adapters, end caps, and other fittings suitable for use with basic components to form a complete installation.
c. Compatible with raceway and outlet system and must be listed for use with raceway systems and components delivered.

E. Underfloor Raceway Supports and Hardware:

1. Source Limitations: Obtain underfloor raceway supports and hardware components for each system from single source from single manufacturer.
2. Listing Criteria: Investigated, labeled, and marked by [**UL Solutions**][**FM Approvals**][**CSA Group (with "US" marking)**][**Intertek ETL**][**TÜV Rheinland**][**or other qualified electrical testing laboratory recognized by authorities having jurisdiction**] in accordance with one or more of the following guide information and corresponding standards:

a. Underfloor Raceway Fittings: UL Solutions product category UL CCN RKQX, including UL 884.

3. Standard Features:

a. Product Reference Standard(s): Article 390 of NFPA 70.
b. Supports and hardware must be compatible with raceway and outlet system and must be listed for use with raceway systems and components delivered.
c. Supports: Adjustable for height and arranged to maintain alignment and spacing of raceways during concrete placement. Include hold-down straps.

F. Underfloor Raceway Junction Boxes:

1. Configuration: Raceway manufacturer's standard enclosure for indicated type, quantity, arrangement, and configuration of raceways at each raceway junction, intersection, and access location. Include the following accessories and features:

a. Mounting brackets.
b. Escutcheons and holders to accommodate surrounding floor covering.
c. Means for leveling and height adjustment more than **3/8 inch (10 mm)** before and after concrete is placed.
d. Boxes must withstand a minimum [**300 lb (136 kg)**] concentrated load. Internal supports must be provided as needed to meet this requirement.
e. All boxes must provide **2 inch (50 mm)** minimum bend radius for data and communication cables.
f. Raceway Openings: For underfloor raceways and conduits arranged to accommodate raceway layout.

g. Covers must have appropriate depth recess to receive specific floor finish material.
h. Partitions to separate wiring of different systems.

2.4 MAINTENANCE MATERIAL ITEMS

A. Spare Parts: Furnish to the Owner spare parts, for repairing underfloor raceway, that are packaged with protective covering for storage on-site and identified with labels describing contents. [**Include the following:**]

1. Afterset Inserts:

a. Furnish quantity equal to [**10**] percent of service fittings installed, but no fewer than units.
b. Furnish quantity equal to [**5**] percent of each type of preset insert installed, but no fewer than units.

2. Service Fittings: Furnish [**three**] of each type of service fitting indicated for each **100 ft (30 m)** of distribution raceway or active-floor-cell length.
3. Outlet Blanking Covers: Furnish quantity equal to [**10**] percent of each type of floor opening installed for outlets.

B. Special Tools: Furnish to the Owner proprietary or special equipment required to operate, maintain, repair, adjust, or implement future changes to underfloor raceway, that are packaged with protective covering for storage on-site and identified with labels describing contents. [**Include the following:**]

1. Electronic Instruments: Furnish [**one**] electronic instrument(s) and accessories, in accordance with underfloor raceway manufacturer's published instructions for detecting, locating, and uncovering preset inserts in metal raceway under floor covering and up to **3/8 inch (10 mm)** of concrete fill.
2. Electric Drill: Furnish [**one**] variable-speed electric drill(s), **1/2 inch (13 mm)** capacity.

3. Hole Saw: Furnish [**one**] diamond bit hole saw(s), for dry concrete, [**2 inch (50 mm)**] size.
4. Afterset Insert Installation Tool: Furnish [**one**] installation tool(s) selected in accordance with manufacturer's published instructions for installing afterset inserts.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of the Work.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION, GENERAL

A. Comply with manufacturer's published instructions.

B. Reference Standards for Installation: Unless more stringent installation requirements are specified in the Contract Documents or manufacturer's published instructions, comply with the following:

1. Electrical Construction: ICC IBC, ICC IFC, NFPA 1, NFPA 70, and NECA NEIS 1.
2. Electrical Maintenance: NFPA 70B and NECA NEIS 91.
3. Electrical Safety: NFPA 70E.
4. Commissioning of Electrical Systems: NECA NEIS 90.
5. Hot Work: NFPA 51B.
6. Grounding and Bonding: NECA NEIS 331 and Article 250 of NFPA 70.
7. Communications Work: BICSI N1.
8. Work in Health Care Facilities: NFPA 99 and Article 517 of NFPA 70.
9. Work in Confined Spaces: NFPA 350.
10. Work in Basements and Other Developed Subterranean Spaces: NFPA 520.
11. Evaluation of Unlabeled Electrical Equipment: NFPA 791.
12. Work in Museums, Libraries, Places of Worship, and Historic Structures: NFPA 909 and NFPA 914.
13. Consult Architect for resolution of conflicting requirements, as directed by the Owner.

C. Interfaces with Other Work:

1. Identification: Provide labels for underfloor raceway products and associated electrical equipment.

    a. Identify field-installed conductors, interconnecting wiring, and components.
    b. Label each enclosure with engraved metal or laminated-plastic nameplate.
    c. Provide warning signs and arc-flash hazard warning labels for electrical equipment.

    d. Install a marker at the center of the last insert of each cell and channel of each straight run of metal underfloor service raceway to locate the insert and identify the system.

        1) Install markers at last inserts on both sides of permanent walls and at first inserts adjacent to each junction box.
        2) Install markers flush at screed line before pouring slab or placing fill. Extend marker with grommeted screw when floor covering is placed. Do not extend through carpet.
        3) Use slotted-head screw to identify electrical power; use Phillips-head screw to identify conventional communications.
        4) Use another distinctive screw head to identify third system, such as special-purpose wiring.

2. Grounding and Bonding:

a. Equipment Grounding Conductors: Provide and route insulated equipment grounding conductors with other feeder or branch circuit conductors. Bond equipment grounding conductor to underfloor raceway products using provided hardware in accordance with manufacturer's published instructions.
b. Equipment Bonding Conductors: Provide equipment bonding straps or jumpers where additional bonding is indicated on the Drawings between underfloor raceway products and adjacent metallic equipment, enclosures, piping, or building structure. Route bonding conductors along shortest and straightest paths possible unless otherwise indicated or required by NFPA 70. Avoid obstructing access panels or placing conductors where they may be subjected to strain, impact, or damage.

3. Coordinate installation of new underfloor raceway products with existing conditions.
4. Coordinate installation of underfloor raceway products with installation of concrete.

3.3 INSTALLATION OF UNDERFLOOR RACEWAY PRODUCTS

A. Install underfloor raceway products aligned and leveled and, unless otherwise indicated, parallel or perpendicular to floor supports.

B. Maintain arrangement of conductor services throughout the raceway system.

C. Install a concrete mud slab for support of cellular metal, flush duct, or trench duct raceway. Construct mud slab with wire mesh in the top **1 inch (25 mm)** of concrete.

D. Install a vapor barrier between the cellular metal raceway and a substrate in contact with earth.

E. Arrange supports to attain proper elevation, alignment, and spacing of raceways. Fasten supports securely at ends and at intervals not to exceed **60 inch (1500 mm)**, to prevent movement during concrete pour.

F. Level raceway components with finished slab and make adjustments in raceway component elevation to accommodate indicated floor finishes.

G. Underfloor Raceway Junction Boxes: Install tops level and flush with finished floor. Install blank closure plates or plugs to close unused junction-box openings. Grout boxes in place to prevent movement during construction. Place top covers in inverted position during construction to prevent damage to surface of cover. Reinstall covers in proper position prior to final acceptance of the Work.

H. Install preset inserts per manufacturer's instructions.

I. Adjust supports to maintain a **1/8 to 3/8 inch (3.0 to 10 mm)** finished concrete cover over preset inserts.

J. Remove burrs, sharp edges, dents, and mechanical defects.

K. Cap or plug boxes, insert- and service-fitting openings, and open ends of raceways.

L. Install expansion fittings with suitable bonding jumper where raceways cross building expansion joints.

M. Ground and bond underfloor raceway components to create a continuous bonding path.

N. Seal raceways, cells, junction boxes, and inserts to prevent water, concrete, or foreign matter from entering raceways before and during pouring slab or placing fill. Tape joints or seal with compound, in accordance with underfloor raceway manufacturer's published instructions.

O. Install concrete surrounding underfloor raceways.

P. Afterset Inserts: Cut, hole saw, and drill slab and raceways to allow for installation at locations indicated on plans.

Q. Wiring must comply with NFPA 70 requirements for wet locations.

1. Install wiring from outlet insert toward junction boxes, then to termination at panel.
2. Splices: All splices and taps must be made in junction boxes. No splices or taps must be made in raceways or outlet inserts.

3.4 FIELD QUALITY CONTROL

A. Administrant for Electrical Power Tests and Inspections, including Grounding:

1. [**the Owner**][**Tenant**] will engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
2. Engage qualified electrical testing and inspecting agency to administer and perform tests and inspections.
3. Engage factory-authorized service representative to administer and perform tests and inspections on components, assemblies, and equipment installations, including connections.
4. Administer and perform tests and inspections [**with assistance of factory-authorized service representative**] .

B. Field QC tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**], as directed by the Owner.

C. Tests and Inspections:

1. Perform manufacturer's recommended tests and inspections.
2. Perform visual inspection of interior of each [**junction box**][**section of trench raceway**] to verify absence of dirt, dust, construction debris, and moisture. Replace damaged and malfunctioning components.
3. Prior to and after concrete pour, perform point-to-point tests of ground continuity and resistance of ground path between the most remote accessible fitting on each branch of each underfloor raceway system and the main electrical distribution grounding system.

    a. Determine cause and perform correction of any point-to-point resistance value that exceeds 0.05 Ω.
    b. Comply with NETA Acceptance Testing Specification about safety, suitability of test equipment, test instrument calibration, and test report and records.

D. Nonconforming Work:

1. Underfloor raceway products will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field QC Reports: Collect, assemble, and submit test and inspection reports.

3.5 CLEANING

A. Clean and swab out underfloor raceways, inserts, and junction boxes after finish has been applied to floor slab, and remove foreign material, dirt, and moisture. Leave interiors clean and dry.

3.6 PROTECTION

A. Protect underfloor raceway products from damage. Do not use the installed duct system as working platforms or walkways. Do not allow equipment or heavy traffic over duct during construction period, without first installing ramps over the duct. Ramps must be designed so that imposed loads are not transferred to the duct. Components of the system that are damaged during construction must be replaced.

END OF SECTION 26 05 39 00

THIS PAGE INTENTIONALLY LEFT BLANK

Task	Specification	Specification Description
26 05 39 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 43 00 - UNDERGROUND DUCTS AND UTILITY STRUCTURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Type EPEC raceways and fittings.
2. Type ERMC-SS raceways, elbows, couplings, and nipples.
3. Type ERMC-S raceways, elbows, couplings, and nipples.
4. Type IMC raceways.
5. Type PVC raceways and fittings.
6. Type RTRC-BG raceways and fittings.
7. Fittings for conduit, tubing, and cable.
8. Electrically conductive corrosion-resistant compounds for threaded conduit.
9. Solvent cements.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" specifies additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" specifies seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.
3. [**Section 013100 "Project Management and Coordination"**]<**Insert Section number and title**> specifies preinstallation conference procedures.
4. Section 260519 "Low-Voltage for Electrical Power Conductors and Cables" specifies nonmetallic underground conduit with conductors (Type NUCC).
5. Section 260553 "Identification for Electrical Systems" specifies underground-line warning tape and concrete cable routing markers (warning planks).

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at [**Project site**]<**Insert location**>.

B. Preinstallation Coordination Meeting(s): For underground ducts and raceways. Conduct meeting(s) [**as videoconference**][**or**][**at Project site**]<**Insert location**> before <**Insert construction activity**>.

1. Attendees: Installers, fabricators, representatives of manufacturers, and administrants for field tests and inspections. Notify Architect[**, Construction Manager**][**, and Owner's Commissioning Authority**] of scheduled meeting dates.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. For concrete and steel used in precast concrete [**manholes**][**and**][**handholes**], also include product certificates as required by ASTM C858.

B. Sustainable Design Product Data:

1. Laboratory Test Reports: For solvents and adhesives, indicating compliance with requirements for low-emitting materials.

C. Shop Drawings:

1. Electric Utility Duct Banks and Structures:

a. Include plans, elevations, sections, and details, including attachments to other Work.
b. Indicate locations of private property boundaries and utility easements.
c. Include information required for approval by electric utility and for obtaining public space utility work permits.

2. Precast or Factory-Fabricated Concrete Structures:

a. Include plans, elevations, sections, and details, including attachments to other Work.
b. Include duct entry provisions, including locations and duct sizes, and methods and materials for waterproofing duct entry locations.
c. Include reinforcement details.
d. Include frame and cover design and manhole chimneys.
e. Include [**ladder**][**step**] details.
f. Include grounding details.
g. Include dimensioned locations of cable rack inserts, pulling-in and lifting irons, sumps, and other accessories.
h. Include joint details.

3. Factory-Fabricated Handholes and Boxes Other Than Precast Concrete:

a. Include dimensioned plans, sections, and elevations, and fabrication and installation details.
b. Include duct entry provisions, including locations and duct sizes, and methods and materials for waterproofing duct entry locations.
c. Include cover design.
d. Include grounding details.
e. Include dimensioned locations of cable rack inserts, pulling-in and lifting irons, and other accessories.

D. Field quality-control reports.

1.4 INFORMATIONAL SUBMITTALS

A. Manufacturer's Published Instructions: Prepare and submit installation, testing, and operating instructions for product.

B. Field Reports:

1. Factory Test Reports: For handholes and boxes.
2. Manufacturer's field reports for field quality-control support.

PART 2 - PRODUCTS

2.1 TYPE EPEC RACEWAYS AND FITTINGS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 651A and UL CCN EAZX.

B. Schedule 40 Electrical HDPE Underground Conduit (EPEC-40):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Blue Diamond Industries, LLC**]
b. [**JM Eagle**]
c. [**Petroflex North America**]
d. [**Prysmian Cables and Systems; Prysmian Group North America**]
e. [**Southwire Company, LLC**]
f. <**Insert manufacturer's name**>

2. Dimensional Specifications: Schedule 40.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

C. Schedule 80 Electrical HDPE Underground Conduit (EPEC-80):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Blue Diamond Industries, LLC**]
b. [**JM Eagle**]
c. [**Petroflex North America**]
d. [**Prysmian Cables and Systems; Prysmian Group North America**]
e. [**Southwire Company, LLC**]
f. <**Insert manufacturer's name**>

2. Dimensional Specifications: Schedule 80.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

D. Type A Electrical HDPE Underground Conduit (EPEC-A):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. <**Insert manufacturer's name**>

2. Dimensional Specifications: Type A.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

E. Type B Electrical HDPE Underground Conduit (EPEC-B):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. <**Insert manufacturer's name**>

2. Dimensional Specifications: Type B.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

2.2 TYPE ERMC-SS RACEWAYS, ELBOWS, COUPLINGS, AND NIPPLES

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 6A and UL CCN DYWV.

B. Stainless Steel Electrical Rigid Metal Conduit (ERMC-SS), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Calconduit; Atkore International**]
d. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
e. [**Patriot Aluminum Products, LLC**]
f. <**Insert manufacturer's name**>

2. Material: Stainless steel.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
b. Colors: As indicated on Drawings.

2.3 TYPE ERMC-S RACEWAYS, ELBOWS, COUPLINGS, AND NIPPLES

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 6 and UL CCN DYIX.

B. Galvanized-Steel Electrical Rigid Metal Conduit (ERMC-S-G), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Allied Tube & Conduit; Atkore International**]
b. [**Calconduit; Atkore International**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Killark; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
e. [**Patriot Aluminum Products, LLC**]
f. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
g. [**Topaz Lighting & Electric**]
h. [**Western Tube; Zekelman Industries**]
i. [**Wheatland Tube; Zekelman Industries**]
j. <**Insert manufacturer's name**>

2. Exterior Coating: Zinc.
3. Options:

a. Interior Coating: [**Zinc with organic top coating**][**Zinc**][**Organic coating**].
b. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
c. Colors: As indicated on Drawings.

C. PVC-Coated-Steel Electrical Rigid Metal Conduit (ERMC-S-PVC), Elbows, Couplings, and Nipples:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Bluesteel Services LLC**]
c. [**Calbond; Atkore International**]
d. [**KorKap; Robroy Industries**]
e. [**Perma-Cote; Robroy Industries**]
f. [**Plasti-Bond; Robroy Industries**]
g. <**Insert manufacturer's name**>

2. Additional Characteristics:
3. Fittings for PVC-Coated Conduit:

a. Minimum coating thickness of **0.040 inch**, with overlapping sleeves protecting threaded joints.
b. Conduit bodies must be Form 8 with effective seal and positive placement feature to ease and assure proper installation. Certified results confirming seal performance at 15 psig

(positive) and 25 inch Hg (vacuum) for 72 hours must be available. Conduit bodies must be supplied with plastic-encapsulated stainless steel cover screws.

c. Form **2 inch** long or one pipe diameter long, whichever is less, PVC sleeve at openings of female fittings, except unions. Inside sleeve diameter must be matched to outside diameter of metal conduit.
d. PVC coating on outside of conduit couplings must be protected from tool damage during installation.
e. Female threads on fittings and couplings must be protected by urethane coating.
f. Fittings must be from same manufacturer as conduit.
g. Beam clamps and U bolts must be formed and sized to fit outside diameter of coated conduit. Plastic-encapsulated nuts must cover exposed portions of threads.

4. Options:

a. Exterior Coating: PVC complying with NEMA RN 1[**and marked ETL Verified PVC-001**].
b. Interior Coating: [**Zinc with organic top coating**][**Zinc**][**Organic coating**].
c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
d. Colors: As indicated on Drawings.
e. Conduit Fittings for Hazardous (Classified) Locations: UL 1203.
f. Expansion and Deflection Fittings: UL 651 with flexible external bonding jumper.

2.4 TYPE IMC RACEWAYS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 1242 and UL CCN DYBY.

B. Steel Electrical Intermediate Metal Conduit (IMC):

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Allied Tube & Conduit; Atkore International**]
c. [**Calconduit; Atkore International**]
d. [**Republic Conduit; Nucor Corporation, Nucor Tubular Products**]
e. [**Topaz Lighting & Electric**]
f. [**Western Tube; Zekelman Industries**]
g. [**Wheatland Tube; Zekelman Industries**]
h. <**Insert manufacturer's name**>

2. Options:

a. Exterior Coating: [**Zinc**][**Alternative corrosion-resistant coating**].
b. Interior Coating: [**Zinc with organic top coating**][**Zinc**][**Organic coating**].
c. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
d. Colors: As indicated on Drawings.

2.5 TYPE PVC RACEWAYS AND FITTINGS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 651 and UL CCN DZYR.

B. Schedule 40 Rigid PVC Conduit (PVC-40) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Calconduit; Atkore International**]
c. [**JM Eagle**]
d. [**NAPCO; Westlake Chemical Corp.**]
e. [**Opti-Com Manufacturing Network, Inc (OMNI)**]
f. [**Topaz Lighting & Electric**]
g. <**Insert manufacturer's name**>

2. Dimensional Specifications: Schedule 40.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
b. Markings: [**For use with maximum 90 deg C wire.**][**For directional boring applications.**]

C. Schedule 80 Rigid PVC Conduit (PVC-80) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Calconduit; Atkore International**]
c. [**JM Eagle**]
d. [**Opti-Com Manufacturing Network, Inc (OMNI)**]
e. [**Topaz Lighting & Electric**]
f. <**Insert manufacturer's name**>

2. Dimensional Specifications: Schedule 80.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].
b. Markings: [**For use with maximum 90 deg C wire.**][**For directional boring applications.**]

D. Type A Rigid PVC Concrete-Encased Conduit (PVC-A) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the**

following]:

a. [**Southern Pipe, Inc.**]
b. <**Insert manufacturer's name**>

2. Dimensional Specifications: Type A.
3. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

E. Type EB Rigid PVC Concrete-Encased Underground Conduit (PVC-EB) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**JM Eagle**]
b. [**Southern Pipe, Inc.**]
c. <**Insert manufacturer's name**>

2. Dimensional Specifications: Type EB.
3. Options:

a. Minimum Trade Size: [**Metric designator 53 (trade size 2)**][**Metric designator 78 (trade size 3)**][**Metric designator 103 (trade size 4)**].

2.6 TYPE RTRC-BG RACEWAYS AND FITTINGS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL 2420 and UL CCN DZKT, for Type BG.

B. Low-Halogen, Belowground Reinforced Thermosetting Resin Conduit (RTRC-BG) and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. <**Insert manufacturer's name**>

2. Options:

a. Minimum Trade Size: [**Metric designator 16 (trade size 1/2)**][**Metric designator 21 (trade size 3/4)**].

2.7 FITTINGS FOR CONDUIT, TUBING, AND CABLE

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.

B. Metallic Fittings for Type ERMC, Type IMC, Type PVC, Type EPEC, and Type RTRC Raceways:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**ABB, Electrification Business**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Crouse-Hinds; brand of Eaton, Electrical Sector**]
d. [**Konkore Fittings; Atkore International**]
e. [**O-Z/Gedney; brand of Emerson Electric Co., Automation Solutions, Appleton Group**]
f. [**Penn Aluminum Conduit & EMT; Penn Aluminum International LLC; Berkshire Hathaway**]
g. [**Raco Taymac Bell; brand of Hubbell Electrical Solutions; Hubbell Incorporated**]
h. [**Southwire Company, LLC**]
i. [**Topaz Lighting & Electric**]
j. <**Insert manufacturer's name**>

2. General Characteristics: UL 514B and UL CCN DWTT.
3. Options:

a. Material: [**Steel**][**Die cast**].
b. Coupling Method: [**Compression coupling**][**Raintight compression coupling with distinctive color gland nut**][**Setscrew coupling. Setscrew couplings with only single screw per conduit are unacceptable**].
c. Conduit Fittings for Hazardous (Classified) Locations: UL 1203.
d. Expansion and Deflection Fittings: UL 651 with flexible external bonding jumper.

2.8 ELECTRICALLY CONDUCTIVE CORROSION-RESISTANT COMPOUNDS FOR THREADED CONDUIT

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: UL Subject 2419 and UL CCN FOIZ.

B. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**ABB, Electrification Business**]
2. <**Insert manufacturer's name**>

2.9 SOLVENT CEMENTS

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics: As recommended by conduit manufacturer in accordance with UL 514B and UL CCN DWTT.
3. Sustainability Characteristics:

a. VOC Content: [**510**][**490**]<**Insert value**> g/L or less for [**PVC**][**CPVC**] conduit and fittings.
b. Low-Emitting Material Requirements: As recommended by solvent and adhesive manufacturer and that complies with the testing and product requirements of the California Department of Public Health's "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers."

B. Solvent Cements for Type PVC Raceways and Fittings:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. <**Insert manufacturer's name**>

2.10 HANDHOLES AND BOXES FOR EXTERIOR UNDERGROUND WIRING

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics:

a. ASTM C858 for design and manufacturing processes.
b. SCTE 77.

2.11 MANHOLES FOR EXTERIOR UNDERGROUND WIRING

A. Performance Criteria:

1. Regulatory Requirements: Listed and labeled in accordance with NFPA 70 and marked for intended location and use.
2. General Characteristics:

a. ASTM C858 for design and manufacturing processes.
b. SCTE 77.

B. Cast-in-Place Concrete Manholes:

1. Description: Underground utility structures, constructed in place, complete with accessories, hardware, and features. Include concrete knockout panels for duct entrance and sleeve for ground rod.

2. Additional Criteria: Comply with Section 033000 "Cast-in-Place Concrete."

2.12 SOURCE QUALITY CONTROL

A. Factory Tests for Handholes and Boxes:

1. Testing Administrant: [**Owner will engage**][**Engage**] qualified structural testing agency to evaluate handholes and boxes.

a. Tests of materials must be performed by independent testing agency.
b. Strength tests of complete boxes and covers must be by independent testing agency or manufacturer. Qualified registered professional engineer must certify tests by manufacturer.

2. Factory Tests and Inspections: Perform the following tests and inspections on handholes and boxes, by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, before delivering to site. Affix label with name and date of [**manufacturer's**][**qualified testing laboratory's**] certification of system compliance.

a. Precast Concrete Utility Structures: Test and inspect in accordance with ASTM C1037.
b. Polymer Concrete and Nonconcrete Handhole and Pull-Box Prototypes: Test prototypes of handholes and boxes for compliance with SCTE 77. Strength tests must be for specified tier ratings of products supplied. Testing machine pressure gages must have current calibration certification, complying with ISO 9000 and ISO 10012, and traceable to NIST standards.

3. Nonconforming Work:

a. Equipment that does not pass tests and inspections will be considered defective.

4. Factory Test Reports: Prepare and submit factory test and inspection reports.

PART 3 - EXECUTION

3.1 INSTALLATION OF DUCTS AND DUCT BANKS

A. Reference Standards:

1. Unless more stringent requirements are specified in Contract Documents or manufacturers' published instructions, comply with NEMA TCB 2 for installation of underground ducts and duct banks.
2. Consult Architect for resolution of conflicting requirements.

B. Special Techniques:

1. Where indicated on Drawings, install duct, spacers, and accessories into duct-bank configuration shown. Duct installation requirements in this Section also apply to duct bank.
2. Steel raceway, bends, and fittings in [**single duct run or duct bank**][**on Project**] must be of same type.
3. Slope: Pitch duct minimum slope of 1:300 down toward manholes and handholes and away from buildings and equipment. Slope duct from high point between two manholes to drain in both directions.

4. Expansion and Deflection Fittings: Install expansion and deflection fitting in each duct in area of disturbed earth adjacent to manhole or handhole.
5. Install expansion fitting near center of straight line duct with calculated expansion of more than **3/4 inch**.
6. Curves and Bends:

    a. Use 5-degree angle couplings for small changes in direction. Use manufactured long sweep bends with minimum radius of [**48 inch**][**12.5 ft**][**25 ft**], both horizontally and vertically, at other locations unless otherwise indicated.
    b. Field bending must be in accordance with NFPA 70 minimum radii requirements, except bends over 45 degrees must be made with minimum radius of [**48 inch**][**12.5 ft**][**25 ft**]. Use only equipment specifically designed for material and size involved. Use PVC heating bender for bending PVC conduit.
    c. Duct must have maximum of 180 degrees of bends between pull points.

7. Joints: Use solvent-cemented joints in nonmetallic duct and fittings and make watertight in accordance with manufacturer's published instructions. Stagger couplings so those of adjacent duct do not lie in same plane. Couple steel conduits to ducts with adapters designed for this purpose, and encase coupling with minimum **3 inch** of concrete for minimum of **12 inch** on each side of coupling.

    a. Install insulated grounding bushings on steel raceway terminations that are less than **12 inch** below grade or floor level and do not terminate in hubs.

8. Installation Adjacent to High-Temperature Steam Lines: Where duct is installed parallel to underground steam lines, perform calculations showing duct will not be subject to environmental temperatures above **104 deg F**. Where environmental temperatures are calculated to rise above **104 deg F**, and anywhere duct crosses above underground steam line, install insulation blankets listed for direct burial to isolate duct bank from steam line to maintain maximum environmental temperature of **104 deg F**.
9. End Bell Entrances to Manholes and Concrete and Polymer Concrete Handholes: Use end bells, spaced approximately **10 inch** o.c. for **5 inch** duct, and vary proportionately for other duct sizes.

    a. Begin change from regular spacing to end-bell spacing **10 ft** from end bell, without reducing duct slope and without forming trap in line.
    b. Grout end bells into structure walls from both sides to provide watertight entrances.

10. Duct Terminators for Entrances to Cast-in-Place Manholes and Concrete Handholes: Use manufactured, cast-in-place duct terminators, with entrances into structure spaced approximately **6 inch** o.c. for **4 inch** duct, and vary proportionately for other duct sizes.

    a. Begin change from regular spacing to terminator spacing **10 ft** from terminator, without reducing duct line slope and without forming trap in line.

11. Building Wall Penetrations: Make transition from underground duct to steel raceway at least **10 ft** outside building wall, without reducing duct line slope away from building and without forming trap in line. Use fittings manufactured for transition to steel raceway type installed. Install steel raceway penetrations of building walls as specified in Section 260544 "Sleeves and Sleeve Seals for Electrical Raceways and Cabling."
12. Install manufactured steel raceway elbows for stub-ups at poles unless otherwise indicated. Encase elbows for stub-up ducts throughout length of elbow.

    a. Couple steel elbows to ducts with adapters designed for this purpose, and encase coupling with minimum **3 inch** of concrete for minimum of **12 inch** on each side of coupling.

13. Sealing: Provide temporary closure at terminations of duct with pulled cables. Seal spare duct at terminations. Use sealing compound and plugs to withstand at least **15 psig** hydrostatic pressure.
14. Pulling Cord: Install **200 lbf** test nylon cord in empty ducts.
15. Concrete-Encased Ducts and Duct Bank:

    a. Excavate trench bottom to provide firm and uniform support for duct. Prepare trench bottoms as specified in Section 312000 "Earth Moving" for pipes **6 inch** or less in nominal diameter.
    b. Width: Excavate trench [**3 inch**][**12 inch**] wider than duct on each side.
    c. Depth: Install so top of duct envelope is at least **24 inch** below finished grade in areas not subject to deliberate traffic, and at least **30 inch** below finished grade in deliberate traffic paths for vehicles unless otherwise indicated. Install so top of duct envelope is below local frost line.
    d. Support duct on duct spacers coordinated with duct size, duct spacing, and outdoor temperature.
    e. Spacer Installation: Place spacers close enough to prevent sagging and deforming of duct, with not less than [**four**][**five**] spacers per **20 ft** of duct. Place spacers within **24 inch** of duct ends. Stagger spacers approximately **6 inch** between tiers. Secure spacers to earth and to duct to prevent floating during concreting. Tie entire assembly together using fabric straps; do not use tie wires or reinforcing steel that may form conductive or magnetic loops around ducts or duct groups.
    f. Minimum Space between Ducts: **3 inch** between edge of duct and exterior envelope wall, **2 inch** between ducts for like services, and **4 inch** between power and communications ducts.
    g. Elbows:

        1) Use manufactured duct elbows for stub-ups and at changes of direction in duct unless otherwise indicated. Extend encasement throughout length of elbow.
        2) Use manufactured steel elbows for stub-ups, at building entrances, and at changes of direction in duct run.

    h. Stub-ups to Outdoor Equipment: Extend concrete-encased steel raceway horizontally minimum of **60 inch** from edge of equipment base.

        1) Stub-ups must [**terminate in coupling installed flush with**][**be minimum 4 inchabove**] finished floor and minimum **3 inch** from conduit side to edge of slab.

    i. Stub-ups to Indoor Equipment: Extend concrete-encased steel raceway horizontally minimum of **60 inch** from edge of wall. Install insulated grounding bushings on terminations at equipment.

        1) Stub-ups must [**terminate in coupling installed flush with**][**be minimum 4 inchabove**] finished floor and no less than **3 inch** from conduit side to edge of slab.

    j. Reinforcement: Reinforce concrete-encased duct where crossing disturbed earth and where indicated. Arrange reinforcing rods and ties without forming conductive or magnetic loops around ducts or duct groups.
    k. Forms: Use walls of trench to form side walls of duct bank where soil is self-supporting and concrete envelope can be poured without soil inclusions; otherwise, use forms.
    l. Concrete Cover: Install minimum of **3 inch** of concrete cover between edge of duct to exterior envelope wall, **2 inch** between duct of like services, and **4 inch** between power and communications ducts.
    m. Place minimum **6 inch** of engineered fill above concrete encasement of duct.
    n. Concreting Sequence: Pour each run of envelope between manholes or other terminations in one continuous operation.

1) Start at one end and finish at other, allowing for expansion and contraction of duct as its temperature changes during and after pour. Use expansion fittings installed in accordance with manufacturer's published instructions, or use other specific measures to prevent expansion-contraction damage.
2) If more than one pour is necessary, terminate each pour in vertical plane and install **3/4 inch** reinforcing-rod dowels extending minimum of **18 inch** into concrete on both sides of joint near corners of envelope.

o. Pouring Concrete: Comply with requirements in "Concrete Placement" Article in Section 033000 "Cast-in-Place Concrete." Place concrete carefully during pours to prevent voids under and between duct and at exterior surface of envelope. Do not allow heavy mass of concrete to fall directly onto ducts. Allow concrete to flow around duct and rise up in middle, uniformly filling open spaces. Do not use power-driven agitating equipment unless specifically designed for duct-installation application.

16. Direct-Buried Duct and Duct Bank:

a. Excavate trench bottom to provide firm and uniform support for duct. Comply with requirements in Section 312000 "Earth Moving" for preparation of trench bottoms for pipes less than **6 inch** in nominal diameter.
b. Width: Excavate trench [**3 inch**][**12 inch**] wider than duct on each side.
c. Depth: Install top of duct at least **36 inch** below finished grade unless otherwise indicated.
d. Set elevation of top of duct bank below frost line.
e. Place minimum **3 inch** of sand as bed for duct. Place sand to minimum of **6 inch** above top level of duct.
f. Support ducts on duct spacers coordinated with duct size, duct spacing, and outdoor temperature.
g. Spacer Installation: Place spacers close enough to prevent sagging and deforming of duct, with not less than [**four**][**five**] spacers per **20 ft** of duct. Place spacers within **24 inch** of duct ends. Stagger spacers approximately **6 inch** between tiers. Secure spacers to earth and to ducts to prevent floating during concreting. Tie entire assembly together using fabric straps; do not use tie wires or reinforcing steel that may form conductive or magnetic loops around ducts or duct groups.
h. Install duct with minimum of **3 inch** between ducts for like services and **6 inch** between power and communications duct.
i. Install manufactured duct elbows for stub-ups, at building entrances, and at changes of direction in duct direction unless otherwise indicated. Encase elbows for stub-up ducts throughout length of elbow.
j. Install manufactured steel elbows for stub-ups, at building entrances, and at changes of direction in duct.

1) Couple RNC duct to steel raceway with adapters designed for this purpose, and encase coupling with minimum **3 inch** of concrete.
2) Stub-ups to Outdoor Equipment: Extend concrete-encased steel raceway horizontally minimum of **60 inch** from edge of base. Install insulated grounding bushings on terminations at equipment.

a) Stub-ups must [**terminate in coupling installed flush with**][**be minimum 4 inch above**] finished base and minimum **3 inch** from conduit side to edge of base.

3) Stub-ups to Indoor Equipment: Extend concrete-encased steel raceway horizontally on exterior of wall minimum of **60 inch** from edge of wall. Install insulated grounding bushings on terminations at equipment.
4) Stub-ups through interior floors must [**terminate in coupling installed flush**

with][**be minimum 4 inch above**] finished floor and no less than **3 inch** from conduit side to edge of equipment pad or floor slab.

k. After installing first tier of duct, backfill and compact. Start at tie-in point and work toward end of duct run, leaving ducts at end of run free to move with expansion and contraction as temperature changes during this process. Repeat procedure after placing each tier. After placing last tier, hand place backfill to **4 inch** over duct and hand tamp. Firmly tamp backfill around ducts to provide maximum supporting strength. Use hand tamper only. After placing controlled backfill over final tier, make final duct connections at end of run and complete backfilling with normal compaction. Comply with requirements in Section 312000 "Earth Moving" for installation of backfill materials.

17. Warning Planks: Bury warning planks approximately **12 inch** above direct-buried duct, placing them **36 inch** o.c. Align planks along width and along centerline of duct or duct bank. Provide additional plank for each **12 inch** increment of duct-bank width over nominal **18 inch**. Space additional planks **12 inch** apart, horizontally across width of ducts.
18. Underground-Line Warning Tape: Bury [**nonconducting**][**conducting**] underground line specified in Section 260553 "Identification for Electrical Systems" no less than **12 inch** above concrete-encased duct and duct banks[**and approximately 12 inch below grade**]. Align tape parallel to and within **3 inch** of centerline of duct bank. Provide additional warning tape for each **12 inch** increment of duct-bank width over nominal **18 inch**. Space additional tapes **12 inch** apart, horizontally across width of ducts.
19. Ground ducts and duct banks in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Interfaces with Other Work:

1. Coordinate installation of new products for <**Insert system or product group**> with existing conditions.

a. <**Insert requirements for transition between new and existing**>.

2. Coordinate with <**Insert Section number and title**> for <**Insert description of interfacing related Work**>.

a. <**Insert requirements for transition between this Section and related Work**>.

3.2 INSTALLATION OF CONCRETE MANHOLES, HANDHOLES, AND BOXES

A. Reference Standards:

1. Precast Concrete Handholes: Comply with ASTM C891 unless otherwise indicated.
2. Consult Architect for resolution of conflicting requirements.

B. Special Techniques:

1. Cast-in-Place Manholes:

a. Finish interior surfaces with smooth-troweled finish.
b. Knockouts for Future Duct Connections: Form and pour concrete knockout panels **1-1/2 to 2 inch** thick, arranged as indicated.
c. Comply with requirements in Section 033000 "Cast-in-Place Concrete" for cast-in-place concrete, formwork, and reinforcement.

2. Precast Concrete Handholes and Manholes:

a. Install units level and plumb and with orientation and depth coordinated with connecting duct to minimize bends and deflections required for proper entrances.
b. Unless otherwise indicated, support units on level bed of crushed stone or gravel graded from **1 inch** sieve to **No. 4** sieve and compacted to same density as adjacent undisturbed earth.
c. Field-cut openings for conduits in accordance with enclosure manufacturer's published instructions. Cut wall of enclosure with tool designed for material to be cut. Size holes for terminating fittings to be used, and seal around penetrations after fittings are installed.

3. Elevations:

a. Manhole Roof: Install with rooftop at least **15 inch** below finished grade.
b. Manhole Frame: In paved areas and trafficways, set frames flush with finished grade. Set other manhole frames **1 inch** above finished grade.
c. Install handholes with bottom below frost line, <**Insert depth of frost line below grade at Project site**> below grade.
d. Handhole Covers: In paved areas and trafficways, set surface flush with finished grade. Set covers of other handholes **1 inch** above finished grade.
e. Where indicated, cast handhole cover frame integrally with handhole structure.

4. Drainage: Install drains in bottom of manholes where indicated. Coordinate with drainage provisions indicated.
5. Manhole Access: Circular opening in manhole roof; sized to match cover size.

a. Manholes with Fixed Ladders: Offset access opening from manhole centerlines to align with ladder.
b. Install chimney, constructed of [**precast concrete**][**cast-iron**] collars and rings, and cast-iron frame to connect cover with manhole roof opening. Provide moisture-tight joints and waterproof grouting for frame and chimney.

6. Waterproofing: Apply waterproofing to exterior surfaces of manholes[**and handholes**] after concrete has cured at least three days. Waterproofing materials and installation are specified in [**Section 071353 "Elastomeric Sheet Waterproofing"**][**Section 071354 "Thermoplastic Sheet Waterproofing"**]<**Insert waterproofing Section**>. After duct has been connected and grouted, and before backfilling, waterproof joints and connections, and touch up abrasions and scars. Waterproof exterior of manhole chimneys after mortar has cured at least three days.
7. Dampproofing: Apply dampproofing to exterior surfaces of manholes[**and handholes**] after concrete has cured at least three days. Dampproofing materials and installation are specified in Section 071113 "Bituminous Dampproofing." After ducts are connected and grouted, and before backfilling, dampproof joints and connections, and touch up abrasions and scars. Dampproof exterior of manhole chimneys after mortar has cured at least three days.
8. Hardware: Install removable hardware, including pulling eyes, cable stanchions, [**and**]cable arms, [**and insulators,**]as required for installation and support of cables and conductors and as indicated.
9. Fixed Manhole Ladders: Arrange to provide for safe entry with maximum clearance from cables and other items in manholes.
10. Field-Installed Bolting Anchors in Manholes and Concrete Handholes: Do not drill deeper than **3-7/8 inch** for manholes and **2 inch** for handholes, for anchor bolts installed in field. Use minimum of two anchors for each cable stanchion.
11. Ground manholes, handholes, and boxes in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Interfaces with Other Work:

1. Coordinate installation of new products for <**Insert system or product group**> with existing

conditions.

a. <**Insert requirements for transition between new and existing**>.

2. Coordinate with <**Insert Section number and title**> for <**Insert description of interfacing related Work**>.

a. <**Insert requirements for transition between this Section and related Work**>.

3.3 INSTALLATION OF HANDHOLES AND BOXES OTHER THAN PRECAST CONCRETE

A. Reference Standards:

1. <**Insert reference standard**> for <**Insert reason**>.
2. Consult Architect for resolution of conflicting requirements.

B. Special Techniques:

1. Install handholes and boxes level and plumb and with orientation and depth coordinated with connecting duct, to minimize bends and deflections required for proper entrances. Use box extension if required to match depths of duct, and seal joint between box and extension as recommended by manufacturer.
2. Unless otherwise indicated, support units on level bed of crushed stone or gravel, graded from **1/2 inch** sieve to **No. 4** sieve and compacted to same density as adjacent undisturbed earth.
3. Elevation: In paved areas and trafficways, set cover flush with finished grade. Set covers of other handholes **1 inch** above finished grade.
4. Install handholes and boxes with bottom below frost line, <**Insert depth of frost line below grade at Project site**> below grade.
5. Install removable hardware, including pulling eyes, cable stanchions, cable arms, and insulators, as required for installation and support of cables and conductors and as indicated. Select arm lengths to be long enough to provide spare space for future cables, but short enough to preserve adequate working clearances in enclosure.
6. Field cut openings for duct in accordance with enclosure manufacturer's published instructions. Cut wall of enclosure with tool designed for material to be cut. Size holes for terminating fittings to be used, and seal around penetrations after fittings are installed.
7. For enclosures installed in [**asphalt paving**][**and**]<**Insert material**> and subject to occasional, nondeliberate, heavy-vehicle loading, form and pour concrete ring encircling, and in contact with enclosure entry, and with top surface screeded to top of box cover frame. Bottom of ring must rest on [**compacted earth**]<**Insert material**>.

a. Concrete: **3000 psi**, 28-day strength, complying with Section 033000 "Cast-in-Place Concrete," with troweled finish.
b. Dimensions: [**10 inch wide by 12 inch deep**]<**Insert dimensions**>.

8. Ground handholes and boxes in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

C. Interfaces with Other Work:

1. Coordinate installation of new products for <**Insert system or product group**> with existing conditions.

a. <**Insert requirements for transition between new and existing**>.

2. Coordinate with <**Insert Section number and title**> for <**Insert description of interfacing**

related Work>.

a. <**Insert requirements for transition between this Section and related Work**>.

3.4 FIELD QUALITY CONTROL

A. Acceptance Testing Preparation:

1. <**Insert requirements**>.

B. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

C. Tests and Inspections:

1. Demonstrate capability and compliance with requirements on completion of installation of underground duct, duct bank, and utility structures.
2. Pull solid aluminum or wood test mandrel through duct to prove joint integrity and adequate bend radii, and test for out-of-round duct. Provide minimum **12 inch** long mandrel equal to duct size minus **1/4 inch**. If obstructions are indicated, remove obstructions and retest.
3. Test manhole[**and handhole**] grounding to ensure electrical continuity of grounding and bonding connections. Measure and report ground resistance as specified in Section 260526 "Grounding and Bonding for Electrical Systems."

D. Nonconforming Work:

1. Underground ducts, raceways, and structures will be considered defective if they do not pass tests and inspections.
2. Correct deficiencies and retest as specified above to demonstrate compliance.

E. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to [**support**][**supervise**] field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at Project site.

END OF SECTION 26 05 43 00

SECTION 26 05 43 00A - OVERHEAD MEDIUM-VOLTAGE WIRING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Conductors, connectors, and splices.
2. Wood poles.
3. Concrete poles.
4. Crossarms.
5. Guys and anchors.
6. Hardware and accessories.
7. Surge arresters.
8. Cutouts, switches, and fuses.
9. Pole-mounted distribution transformers.
10. Primary metering products.

B. Related Requirements:

1. Section 260010 "Supplemental Requirements for Electrical" for additional abbreviations, definitions, submittals, qualifications, testing agencies, and other Project requirements applicable to Work specified in this Section.
2. Section 260011 "Facility Performance Requirements for Electrical" for seismic-load, wind-load, acoustical, and other field conditions applicable to Work specified in this Section.

1.2 DEFINITIONS

A. Sag: The distance measured vertically from a conductor to the straight line joining its two points of support, measured at the midpoint of the span, unless otherwise indicated.

1. Final Sag: The sag of a conductor under specified conditions of loading and temperature applied after it has been subjected, for an appreciable period, to the loading prescribed for the loading district in which it is situated, or equivalent loading, and the loading removed. Final sag includes the effect of inelastic deformation (creep).
2. Initial Unloaded Sag: The sag of a conductor before the application of an external load.

B. Secondary: Conductors and components for circuits operating at the utilization voltage of 600 V or less.

C. Service: Set of insulated conductors extending from a pole to the metering point or service entrance connection at the location of utilization of electricity.

1.3 COORDINATION

A. Coordinate with utility supplying electricity to lines specified in this Section, and make [**final connections**][**arrangements for final connections by utility**].

B. Coordinate with those responsible for [**voice**][**data**][**video**]<**Insert services involved**> systems that will have cables supported by poles installed in accordance with this Section.

1.4 ACTION SUBMITTALS

A. Product Data:

1. Conductors, connectors, and splices.
2. Wood poles.
3. Concrete poles.
4. Crossarms.
5. Guys and anchors.
6. Hardware and accessories.
7. Surge arresters.
8. Cutouts, switches, and fuses.
9. Pole-mounted distribution transformers.
10. Primary metering products.

B. Field quality-control reports.

1.5 INFORMATIONAL SUBMITTALS

A. Manufacturers' published instructions.

B. Field Reports:

1. Factory Test Reports:

a. Wood poles.
b. Concrete poles.
c. Crossarms.
d. Cutouts, switches, and fuses.
e. Pole-mounted distribution transformers.
f. Primary metering products.

2. Manufacturer's field reports for field quality-control support.

1.6 CLOSEOUT SUBMITTALS

A. Survey records for locations of pole, anchors, and other features for inclusion in Project Record Documents.

1.7 MAINTENANCE MATERIAL SUBMITTALS

A. Extra Stock Material: Furnish to Owner extra materials[**, from same production run,**] that match products installed and that are packaged with protective covering for storage and identified with labels describing contents.[**Include the following:**]

1. Fuses: [**One**]<**Insert number**> additional spare fuse(s) or fuse element(s) for each furnished fuse or fuse element.
2. Padlocks: [**One**]<**Insert number**> for every [**three**]<**Insert number**> installed, but no fewer than [**three**]<**Insert number**>.
3. Insulators: [**One**]<**Insert number**> for every 10 of each type, but no fewer than [**three**]<**Insert number**> of each type.

B. Special Tools: Furnish to Owner proprietary equipment, keys, and software required to operate, maintain, repair, adjust, or implement future changes to overhead medium-voltage wiring, that are packaged with protective covering for storage on-site and identified with labels describing contents.[**Include the following:**]

1. [**Two**]<**Insert number**> sets of special-purpose tools required for maintenance of cutouts, switches, and reclosers, complete with toolbox.

1.8 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled in accordance with NFPA 70, by a qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

B. Overhead-Line Components, Devices, and Accessories: Currently listed in RUS Informational Publication 202-1 without restriction for the intended application.

C. Comply with [**IEEE C2**][**CPUC General Order 95**], except where stricter requirements are indicated or where local requirements that are stricter apply.

D. Strength of Line and Line Components Selected by Contractor: Provide grades of construction and strength required by IEEE C2 for conditions encountered at Project site for [**heavy**][**medium**][**light**] line loading unless otherwise indicated.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Wood Pole Storage and Handling: Comply with ATIS O5.1. Do not use pointed handling tools capable of producing indentations greater than **1 inch (25 mm)**.

PART 2 - PRODUCTS

2.1 CONDUCTORS, CONNECTORS, AND SPLICES

A. Conductor Type AAC: [**Bare**][**and covered**], all-aluminum, Alloy 1350-H19, complying with ASTM B230/B230M and ASTM B231/B231M.

B. Conductor Type AAAC: [**Bare**][**and covered**], all-aluminum-alloy, Alloy 6201-T81, complying with ASTM B398/B398M and ASTM B399/B399M.

C. Conductor Type ACSR: [**Bare**][**and covered**], aluminum conductor, steel reinforced, complying with ASTM B232/B232M.

D. Conductor Type CU: [**Bare**][**and covered**], hard-drawn copper, complying with ASTM B1 and ASTM B8.

E. Conductor Covering: UV resistant, complying with ICEA-S-70-547. [**HDPE**][**or**][**XLP**], [**150 mil (3.81 mm)**]<**Insert value**> thick.

F. Self-Supported, Multiconductor, Insulated Medium-Voltage Wiring: Factory-assembled, messenger-supported type, listed under UL 1072 as sunlight-resistant Type MV cable for cable tray use.

1. Conductors: [**Aluminum, Alloy 1350, complying with ASTM B230/B230M and ASTM**

B231/B231M][**Hard-drawn copper, complying with ASTM B1 and ASTM B8**]; stranded for 2 AWG and larger.

2. Conductor Insulation: [**XLP, complying with NEMA WC 70/ICEA S-95-658**][**EPR, complying with NEMA WC 70/ICEA S-95-658**]<**Insert insulation**>.
3. Insulation Level: [**100**][**133**]<**Insert number**> percent of rated circuit line-to-line voltage.
4. Conductor Shield: Extruded, nonconducting, thermoset material, complying with NEMA WC 70/ICEA S-95-658; **18 mil (460 µm)** minimum thickness.
5. Insulation Shield: Include the following two components:

    a. Nonmetallic conducting, material complying with NEMA WC 70/ICEA S-95-658 and UL 1072, extruded over, and free stripping from the insulation.
    b. Metallic Tape Shield: Bare copper, **5 mil (127 µm)** minimum thickness, helically applied with a 15 percent minimum overlap.

6. Conductor Jacket: Extruded, chlorosulfonated-polyethylene-based material, complying with NEMA WC 70/ICEA S-95-658.
7. Messenger: [**Copper**][**Composite copper and copper**]-clad steel.
8. Conductor Support Strap: Copper strap, wound around conductors and messenger the full length of the cable.

G. Aluminum Secondary-Voltage Line Conductors: [**Aluminum conductor, steel reinforced, complying with ASTM B232/B232M**][**Covered aluminum conductor, steel reinforced, complying with ICEA S-70-547, with HDPE or XLP covering**], [**60 mil (1.52 mm)**]<**Insert value**> thick.

H. Copper Secondary-Voltage Line Conductors: [**Bare hard-drawn copper, complying with ASTM B1 and ASTM B8**][**Covered hard-drawn copper, complying with ICEA S-70-547, with HDPE or XLP covering**], [**60 mil (1.52 mm)**]<**Insert value**> thick.[**Neutral-supported, secondary service-drop cable.**]

I. Racked Secondary Conductors, 600 V and Less: [**Copper, insulated with XLP, complying with NEMA WC 70/ICEA S-95-658**]<**Insert conductor and insulation combination**>.

J. Neutral-Supported, Secondary Service-Drop Cable, 600 V and Less: Insulated conductors with bare neutral, complying with ICEA S-76-474, and using the following combination of materials:

1. Conductors and Neutral: [**Copper with copper-clad-steel neutral**][**Aluminum with bare Alloy 1350 aluminum neutral**][**Aluminum with ACSR neutral**].
2. Insulation: [**XLP, complying with NEMA WC 70/ICEA S-95-658**][**High-modular-weight, low-density polyethylene**][**Weather-resistant polyolefin, complying with ICEA S-70-547**].

K. Connectors, Splices, and Conductor Securing and Protecting Components: Items include wire clamps, ties, conductor armor, fittings, connectors, and terminals. Listed for the specific applications and conductor types and combinations of materials used. Descriptions as follows for various applications:

1. Copper to Copper: Copper alloy, complying with UL 486A-486B.
2. Aluminum Composition to Aluminum Composition: Aluminum alloy, complying with UL 486A-486B.
3. Copper to Aluminum Composition: Type suitable for this purpose, complying with UL 486A-486B.
4. Connectors and Splices for Secondary Conductors: Listed and labeled for the conditions and materials involved in each application.
5. Taps for Medium-Voltage Line Conductors: Hot-line clamps, screw type, with concealed threads and bare, hard-drawn copper stirrups. Listed for the combination of materials being connected.
6. Splices under Tension: Compression type with strength exceeding the conductors spliced.
7. Splices and Terminations for Covered Conductors: As recommended by conductor manufacturer for conductor and covering combination and for specific materials and physical arrangement of

each splice.

8. Splices and Terminations for Insulated Medium-Voltage Conductors: Comply with requirements in Section 260513 "Medium-Voltage Cables."

2.2 WOOD POLES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Ace Pole Company**]
2. [**Baxter, J. H. & Co**]
3. [**Bell Lumber and Pole Company**]
4. [**Brown Wood Preserving Co., Inc.**]
5. [**Dayton Superior Corporation**]
6. [**Koppers Performance Chemicals**]
7. [**McFarland Cascade**]
8. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Ace Pole Company**]
2. [**Baxter, J. H. & Co**]
3. [**Bell Lumber and Pole Company**]
4. [**Brown Wood Preserving Co., Inc.**]
5. [**Dayton Superior Corporation**]
6. [**Koppers Performance Chemicals**]
7. [**McFarland Cascade**]
8. <**Insert manufacturer's name**>

C. Comply with ATIS O5.1 and RUS Bulletin 1728F-700, for wood poles pressure treated with [**creosote**][**pentachlorophenol,**][**ammoniacal copper arsenate,**][**ammoniacal copper zinc arsenate**][**chromated copper arsenate**].

D. Wood Species: [**Douglas fir**][**Lodgepole pine**][**Western larch**][**Southern yellow pine**]<**Insert wood species selected from ATIS O5.1**>.

E. Pole Marking:

1. Manufacturer's Mark: Comply with ATIS O5.1; locate **10 ft (3 m)** from the pole butt for poles **50 ft (15 m)** long or less.
2. Pole Number: Machine-embossed aluminum, alphanumeric characters not less than **2-1/2 inch (65 mm)** high, with aluminum nails.

F. Factory Operations: Machine trim poles by turning smooth, full length. Roof, gain, and bore poles before pressure treatment.

2.3 CONCRETE POLES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Accord Industries**]
2. [**Bayshore Concrete Products Corporation**]
3. [**CPI Concrete Products**]
4. [**StressCrete Group**]
5. [**Valmont Industries, Inc.**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Accord Industries**]
2. [**Bayshore Concrete Products Corporation**]
3. [**CPI Concrete Products**]
4. [**StressCrete Group**]
5. [**Valmont Industries, Inc.**]
6. <**Insert manufacturer's name**>

C. Description: Spuncast prestressed concrete, complying with requirements of ASTM C1089.

1. Comply with requirements of RUS Bulletin 1724E-216.

D. Design: Base design on calculation of strength required by IEEE C2 or indicated on Drawings, whichever is greater. Design must be suitable for installation at a location where annual temperature range is between [**minus 4 deg F and plus 100 deg F (minus 20 deg C and plus 38 deg C)**]<**Insert design temperature range at site location**>. Include pole design for embedded attachments matching fittings, brackets, and other items installed in the field.

E. Shaft: Hollow, for poles at overhead-to-underground connections. Provide metric designator 91 (trade size 3-1/2) minimum cable raceway capacity, with [**conduit elbow**][**cable entry port**] at base.

F. Water Absorption: Not more than 3 percent.

G. Surface: Smooth, hard, nonporous, and resistant to [**soil acids**][**road salts**][**frost and freezing damage**].

H. Pole Marking:

1. Manufacturer's Mark: Comply with ATIS O5.1; locate **10 ft (3 m)** from the pole butt for poles **50 ft (15 m)** long or less.
2. Pole Number: Machine-embossed aluminum, alphanumeric characters not less than **2-1/2 inch (65 mm)** high.

2.4 CROSSARMS

A. Description: [**Solid-wood distribution type, complying with RUS Bulletin 1728H-701 for specified construction grade**][**Galvanized, steel angles**], and complying with IEEE C2 for required climbing space and wire clearances.

B. Braces: Galvanized, flat, ferrous-metal units; **1/4 inch (6 mm)** thick by **1-1/4 inch (30 mm)** wide, minimum, with length to suit crossarm dimensions.

2.5 GUYS AND ANCHORS

A. Guy Strand Assemblies: Cable and attachment assemblies must have uniform minimum breaking strength of the cable.

1. Cable: Seven strands. [**Zinc-coated steel, complying with ASTM A475**][**Aluminum-clad steel, complying with ASTM B416**][**Copper-clad steel, complying with ASTM B228**]. Breaking strength must be not less than [**10,000 lb (45 kN)**]<**Insert value**>.
2. Cable Termination:

a. Thimble eye.
b. Hooks and guy strain plates, complying with IEEE C135.1.
c. Preformed galvanized-steel guy grips, matching material, galvanizing, and strength of the guy strand assembly.

B. Anchor and Anchor-Rod Assemblies: Hot-dip galvanized steel.

1. Power-installed screw-type anchors.

a. **15 inch (380 mm)** screw; with rod **8 ft (2.4 m)** long by **1-1/2 inch (38 mm)** in diameter. Rated at **10,000 lb (45 kN)** when installed.
b. Guy anchors must have strength and holding area as required for anchor load and soil conditions at location of that anchor.

2. <**Insert anchor size or type**>.

C. Strain Insulators: Epoxy-bonded fiberglass of length to meet clearance requirements specified in "Installation of Guys and Anchors" Article.

D. Guy Markers: Round, of vinyl or PVC material, [**white**][**yellow**] color, **8 ft (2.4 m)** long. Shatter resistant at temperatures below **0 deg F (minus 18 deg C)**.

2.6 HARDWARE AND ACCESSORIES

A. Description: Ferrous-metal items include, but are not limited to, bolts, nuts, washers, crossarm gains and braces, insulator pins, anchor rods, anchors, eyebolts, staples, and transformer brackets.

1. Comply with IEEE C135.1, IEEE C135.2, ANSI C135.4, ANSI C135.22, and RUS Informational Publication 202-1 listings[**with the exception that base material must be malleable iron or ductile iron, and finish must be hot-dip galvanized**].

B. Insulator Brackets: Hot-dip galvanized steel, style as indicated, designed to hold vertical-post-type or pin-type insulators, with [**one**][**two**]-bolt attachment to pole.

C. Secondary Insulator Racks: Hot-dip galvanized steel, style as indicated, with smooth, rounded 12 gage struts designed to support [**two**][**three**][**four**] spool insulators for attachment of secondary drop conductors. Spool spacing of [**4 inch (100 mm)**][**8 inch (200 mm)**][**12 inch (300 mm)**].

D. Pole Riser Shields: Galvanized steel with [**boot**][**backplate**][**vent**].

E. Padlocks: ASTM F883.

1. Class: [**PO1**][**PO2**].
2. Grade: [**1**][**2**][**3**][**3**][**5**][**6**].

3. Option: [**A**][**B**][**C**][**D**][**E**][**F**][**G**].

F. Insulators: Units rated 6 kV and above must be free from radio interference.

1. Porcelain insulators must be wet-process type, complying with the following:

a. Pin: ANSI C29.5.
b. Line Post: ANSI C29.7. Include mounting stud of length suitable for each mounting arrangement used.
c. Suspension: ANSI C29.2.
d. Guy Strain: ANSI C29.4.
e. Secondary Spool: ANSI C29.3, Class 53-2.

2. Polymer-composite, fiberglass-reinforced insulators must comply with the following:

a. Line Post: CEA LWIWG-02.
b. Dead End/Suspension: CEA LWIWG-01.
c. Guy Strain: Fiberglass reinforced, epoxy finished. Designed specifically for use in guy assemblies.

G. Grounding Materials: Comply with Section 260526 "Grounding and Bonding for Electrical Systems," using materials listed by RUS for the intended purpose without restriction.

1. Conductors: 4 AWG, minimum; bare, solid, annealed copper, complying with ASTM B8 unless otherwise indicated.
2. Ground Conductor Protectors: PVC or half-round wood molding, [**fir, pressure treated in accordance with AWPA C25**][**cypress**][**cedar**].

2.7 SURGE ARRESTERS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**ABB, Electrification Business**]
2. [**Eaton**]
3. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
4. [**Hubbell Utility Solutions; Hubbell Incorporated**]
5. [**MacLean Power Systems**]
6. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**ABB, Electrification Business**]
2. [**Eaton**]
3. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
4. [**Hubbell Utility Solutions; Hubbell Incorporated**]
5. [**MacLean Power Systems**]
6. <**Insert manufacturer's name**>

C. Distribution-Class Surge Arresters: [**Porcelain**][**Polymer**]-enclosed, gapless, metal-oxide type[**with automatic-indicating type, ground-lead disconnection feature**], complying with IEEE C62.11 and NEMA LA 1.

D. Intermediate-Class Surge Arresters: [**Porcelain**][**Polymer**]-enclosed, gapless, metal-oxide type, complying with IEEE C62.11 and NEMA LA 1.

1. Voltage Rating: [**3**][**6**][**9**][**10**][**12**][**15**][**27**][**30**][**36**] kV[**, at the altitude of Project,**] unless otherwise indicated.

2.8 CUTOUTS, SWITCHES, AND FUSES

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Eaton**]
2. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
3. [**Hubbell Utility Solutions; Hubbell Incorporated**]
4. [**Joslyn Hi-Voltage**]
5. [**MacLean Power Systems**]
6. [**S&C Electric Company**]
7. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Eaton**]
2. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
3. [**Hubbell Utility Solutions; Hubbell Incorporated**]
4. [**Joslyn Hi-Voltage**]
5. [**MacLean Power Systems**]
6. [**S&C Electric Company**]
7. <**Insert manufacturer's name**>

C. Description: Medium-voltage disconnect, protective[**, and bypass**] units must be rated for the line-to-line voltage of the systems in which installed, unless higher ratings are indicated. BIL ratings are [**45**][**60**][**75**][**95**][**150**][**200**] kV.

1. Momentary Current Rating of Switching Devices: [**20**][**40**]<**Insert value**> kA, asymmetrical at nominal system operating voltage.
2. Fuse Characteristics: Time-current characteristics for each set of fuses selected in accordance with published recommendations of manufacturer of component protected by the fuses and coordinated with upstream and downstream protective devices. Prepare time-current coordination curves in accordance with IEEE 242 that illustrate optimum coordination of devices in this Project.
3. Interrupting Rating of Fuses: <**Insert value**> symmetrical A at nominal system operating voltage.

D. Fuse Cutouts: [**Open**][**enclosed**] type, rated [**100**][**200**] A, continuous, complying with ANSI C37.42.

1. Fuses: Enclosed link, [**Type K**][**Type T**], complying with ANSI C37.42.
2. Fuse Current Rating: 150 percent of the transformer full-load current unless otherwise indicated.
3. Switching Application: Include switch link instead of fuse.
4. Switch Current Interrupting Rating: [**Transformer magnetizing current**]<**Insert value**>.

E. Fused Switches: Single-pole, manual units.

1. Switch Rating: [**400**][**600**] A(rms) continuous and load-current interrupting.
2. Fuses: Dropout-type power fuses.

F. Nonfused Switches: Single-pole, manual units, rated [**100**][**200**][**400**][**600**] A(rms) continuous.

G. Group-Operated, Load-Interrupter Switches: [**Fused**][**Nonfused**], three-pole, single-throw units, manually operated by handle through insulated mechanical linkage.

1. High-pressure contact type, complying with ANSI C37.32.
2. Factory assembled to suit specific configuration and mounting conditions for this Project.
3. Operating Handle: Padlock equipped.
4. Current Interrupting Rating: Equal to continuous current rating of switch.
5. Fuses: Nondropout power type.

H. Group-Operated, Air-Break (Nonloadbreak) Switches: Three-pole, single-throw units, manually operated by handle through insulated mechanical linkage.

1. Comply with ANSI C37.32.
2. Factory assembled to suit specific configuration and mounting conditions for this Project.
3. Operating Handle: Padlock equipped.
4. Suitable for field conversion to load-interrupter switch by adding interrupter modules.

2.9 POLE-MOUNTED DISTRIBUTION TRANSFORMERS

A. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

1. [**Eaton**]
2. [**GE Power; General Electric Company**]
3. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
4. [**Howard Industries, Inc**]
5. [**Kuhlman Electric Corporation**]
6. [**Pauwels Transformers**]
7. [**Pioneer Transformers Ltd**]
8. [**Prolec GE; A Xignux and General Electric Company Joint Venture**]
9. <**Insert manufacturer's name**>

B. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

1. [**Eaton**]
2. [**GE Power; General Electric Company**]
3. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
4. [**Howard Industries, Inc**]
5. [**Kuhlman Electric Corporation**]
6. [**Pauwels Transformers**]
7. [**Pioneer Transformers Ltd**]
8. [**Prolec GE; A Xignux and General Electric Company Joint Venture**]
9. <**Insert manufacturer's name**>

C. Description: Single-phase, two-winding, [**single**][**two**]-bushing, liquid-filled, self-cooled, pole-mounting distribution type, suitable for external fuse and surge suppressor protection; complying with IEEE C 57.12.00, and tested in accordance with IEEE C 57.12.90[**.**][**and with the following additional requirements:**]

1. Cooling Class: OA.

2. Temperature Rise: 65 deg C.
3. Insulating Liquid:

    a. Mineral oil, ASTM D3487, Type II.
    b. High molecular weight, mineral oil based, and UL listed as less-flammable type.
    c. Biodegradable insulating and cooling liquid, UL listed as less flammable type.
    d. Identification: Label the transformer as "non-PCB" and place manufacturer's name and type of fluid on the nameplate.

D. BIL: [**95**][**75**][**60**] kV.

E. Primary Voltage: <**Insert voltage**>.

F. Taps: [**Two, 2.5 percent above and below**][**Four, 2.5 percent below**], high-voltage and full-load rated.[**Tap changer must have an external operating handle.**]

G. Mounting Brackets: [**Single**][**Double**], integral; suitable for pole mounting, individually or in cluster, or on crossarm.

H. Minimum Efficiency: Class 1, as defined by NEMA TP 1, based on test results that comply with requirements of NEMA TP 2.

I. Bushings: Creepage distance must exceed nominal value standard for unit rating by at least 75 percent.

J. Hardware: Stainless steel.

K. Tank and Cover: Stainless steel, complying with ASTM A167, Type 304 or 304L, with paint coating exterior finish system complying with IEEE C57.12.28, including manufacturer's standard color finish coat.

L. Show transformer kiloampere capacity using **2-1/2 inch (65 mm)** numerals placed near the low-voltage bushings.

2.10 PRIMARY METERING PRODUCTS

A. Primary Metering Equipment:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

    a. [**Eaton**]
    b. [**GE Power; General Electric Company**]
    c. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
    d. [**Landis+Gyr Inc.**]
    e. [**Schweitzer Engineering Laboratories, Inc.**]
    f. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

    a. [**Eaton**]

b. [**GE Power; General Electric Company**]
c. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
d. [**Landis+Gyr Inc.**]
e. [**Schweitzer Engineering Laboratories, Inc.**]
f. <**Insert manufacturer's name**>

B. Metering Transformers:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**GE Power; General Electric Company**]
b. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
c. [**Kuhlman Electric Corporation**]
d. [**Prolec GE; A Xignux and General Electric Company Joint Venture**]
e. <**Insert manufacturer's name**>

2. Basis-of-Design Product: Subject to compliance with requirements, provide <**Insert manufacturer's name; product name or designation**> or comparable product by one of the following:

a. [**GE Power; General Electric Company**]
b. [**Hitachi Energy USA Inc.; business of Hitachi, Ltd.**]
c. [**Kuhlman Electric Corporation**]
d. [**Prolec GE; A Xignux and General Electric Company Joint Venture**]
e. <**Insert manufacturer's name**>

C. Description: Outdoor current and potential transformers, designed for crossarm mounting, complying with IEEE C57.13, and having the following features:

1. BIL: [**45**][**60**][**75**][**95**][**150**][**200**] kV.
2. Secondary connection box arranged for conduit connection.
3. Potential-Transformer Voltage Rating: [**2.4**][**4.16**][**7.2**][**12.0**][**12.47**]<**Insert value**> kV to 120 V(ac), 60 Hz.
4. Potential-Transformer Accuracy Class: Minimum 0.3 at [**75**]<**Insert value**> VA burden.
5. Voltage Rating: [**2.4**][**4.16**][**7.2**][**12.0**][**12.47**]<**Insert value**> kV.
6. Current Rating: <**Insert value**> to 5 A.
7. Accuracy Class: Minimum 0.2 at [**50**]<**Insert value**> VA burden.

D. Watt-Hour Meter: Outdoor solid-state unit, [**with demand register,**][**arranged for pulse initiation,**] complying with ANSI C12.10, and including the following ratings and features:

1. Form: [**8S**][**9S**].
2. Element: [**2**][**2-1/2**][**3**].
3. Voltage: 120 V.
4. Current: 2-1/2 A.
5. Frequency: 60 Hz.
6. Kilowatt-Hour Register: Five-digit type.
7. Demand-Register Multiplier: A quantity in even hundreds, indicated on meter face.
8. Demand-Register Interval: [**15**][**30**] minutes.
9. Mounting: On matching socket, complying with ANSI C12.7, and complete with automatic current short-circuiting device.
10. Meter Test Block: Matched to meter, and furnished and equipped with open knife switches

designed to isolate each metering component for test.

11. Meter Cabinet: Galvanized steel; weatherproof enclosure with pole-mounting bracket and the following features:

    a. Hinged Door: Arranged for padlocking in closed position.
    b. Size: Adequate to house meter and other equipment indicated, but not less than **20-by-30-by-11 inch (510-by-760-by-280 mm)** deep.

2.11 SOURCE QUALITY CONTROL

A. Product Data: Prepare and submit catalog cuts, brochures,[**diagrams,**][**schedules,**] and performance data illustrating size, physical appearance, and other characteristics of product.

1. For each type of product include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
2. Material Certificates: For the following items, from manufacturers:

    a. Wood poles.
    b. Concrete poles.
    c. Wood crossarms.

3. Listing Documentation: Indicate that products comply with requirements specified in "Quality Assurance" Article.
4. Time-Current Coordination Curves: Illustrate optimum coordination of protective devices involved in the Work of this Section.

B. Manufacturer's Published Instructions: Prepare and submit installation, testing, and operating instructions for product.

C. Factory Tests:

1. Testing Administrant: [**Owner will engage**][**Engage**] qualified pole and crossarm inspection agency to evaluate poles and crossarms.
2. Factory Tests and Inspections:

    a. Inspect poles and crossarms, by, or under supervision of, qualified pole and crossarm inspection agency recognized by authorities having jurisdiction, in accordance with referenced standards before delivering to site. Affix label with name and date of [**manufacturer's**][**qualified pole and crossarm inspection agency's**] certification of system compliance.

        1) RUS quality mark "WQC" on each item is acceptable in place of inspection as evidence of compliance.

    b. Conduct routine tests of [**transformers**][**medium-voltage switches**][**and**][**metering equipment**] by, or under supervision of, qualified electrical testing laboratory recognized by authorities having jurisdiction, in accordance with referenced standards. Affix label with name and date of [**manufacturer's**][**qualified electrical testing laboratory's**] certification of system compliance.

3. Nonconforming Work: Units that do not pass tests and inspections will be considered defective.
4. Factory Test Reports: Prepare and submit factory test and inspection reports.

PART 3 - EXECUTION

3.1 RIGHT-OF-WAY CLEARANCE AND TREE TRIMMING

A. Clear right of way in accordance with Section 015639 "Temporary Tree and Plant Protection" and Section 311000 "Site Clearing."

B. Clear right of way to maintain minimum clearances required by IEEE C2, unless Drawings indicate greater clearances or greater clearances are required by state or local codes or regulations. If no minimum requirements are mandated, maintain a minimum of **15 ft (4.5 m)** on both sides horizontally and below medium-voltage conductors and **60 inch (1500 mm)** on both sides horizontally and below secondary-voltage conductors. Remove overhanging branches.

3.2 GENERAL INSTALLATION REQUIREMENTS

A. Install underground power and metering circuits and those circuits indicated to be in raceways in accordance with Section 260543 "Underground Ducts and Raceways for Electrical Systems" and Section 260513 "Medium-Voltage Cables," and make splices and terminations for those circuits in accordance with the applicable Sections.

B. Engage the services of a licensed surveyor to verify dimensions by field measurement, to identify locations of poles, anchors, and other features, and to verify all clearances. The survey document must also identify locations of connections to new and existing supply lines and to primary and secondary services. Notify Architect of discrepancies and field conditions that are not indicated and that will affect installation.

C. Ground equipment in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

D. Apply warning signs and equipment labels in accordance with Section 260553 "Identification for Electrical Systems."

3.3 INSTALLATION OF MEDIUM-VOLTAGE LINE CONDUCTORS

A. Selection: Install bare conductors unless otherwise indicated.

B. Handle and string conductors to prevent cuts, gouges, scratches, kinks, flattening, or deformation. Remove damaged sections and splice conductors.

1. String new conductors to "initial" sag values recommended by manufacturer for type and size of conductor except as otherwise indicated.
2. Conductors Reinstalled or Resagged: String to "final" sag values recommended by manufacturer for type and size of conductor except as otherwise indicated.

C. Connections, Splices, and Terminations: Use kits listed for the specific type of connection and combination of materials in the connection or recommended for the specific use by manufacturer of material on which applied.

1. Splice Location: Do not install within **10 ft (3 m)** of a support.
2. Line Conductors and Service Drops: Install so strength exceeds ultimate rated strength of conductor.
3. Splices and Terminations of Covered Conductors: Comply with manufacturer's published

instructions.

4. Splices and Terminations of Insulated Conductors of Self-Supported, Medium-Voltage Cable: Comply with manufacturer's published instructions.

D. Armor Rod: Install to protect conductors if line conductors are supported by insulators.

E. Flat Aluminum Armor Wire: Install to protect conductors if they are supported by, or attached to, galvanized or coated iron or steel clamps or fittings.

F. Support line conductors and taps as follows:

1. Use wire ties for conductor attachment to pin and vertical post insulators unless otherwise indicated.
2. Install wire ties tight against conductor and insulator, and turn ends back and flat against conductor, to eliminate exposed wire ends.
3. Use wire clamps on horizontal post, dead end, and suspension insulators unless otherwise indicated.

3.4 INSTALLATION OF POLES AND CROSSARMS

A. Pole Orientation: Align curve of curved wood poles with straight-line runs of three or more poles. Align gained surfaces perpendicular to runs.

B. Elevation of Line above Grade: Install poles with top at same elevation, unless grade changes dictate elevation change in poles, and in accordance with the following:

1. On level ground, set poles so tops of consecutive poles vary not more than **60 inch (1500 mm)** in elevation.
2. Shorten wood poles by cutting off the top and make cuts to shed water. Apply preservative to cuts.

C. Set poles in accordance with the following:

1. Make pole holes vertical, uniform in diameter, and large enough to permit effective use of tamping bars all around. Bore or excavate holes with an average diameter at grade less than twice the diameter of the pole at the same grade.
2. Use minimum depths indicated, except at locations where hole is partly or entirely in rock and if hole is not vertical or has a diameter at grade more than two times the pole diameter at the same level; in these conditions, increase the depth of the hole by the following increments before setting the pole:

    a. Poles up to 35 ft (10.6 m) Long: **24 inch (600 mm)**.
    b. Poles 36 to 60 ft (11 to 18.3 m) Long: **30 inch (760 mm)**.
    c. Poles 61 to 75 ft (18.6 to 22.9 m) Long: **36 inch (900 mm)**.

3. For poles on slopes, indicated hole depth is from finished grade at lowest side of hole.
4. Set poles in alignment and plumb except at dead ends, angles, and points of extra strain; rake poles against conductor strain **1 inch (25 mm)** minimum, **2 inch (51 mm)** maximum, (after conductors are installed at required tension) for each **10 ft (3 m)** of pole length. Rake poles so they will not lean or bend in direction of strain when loaded.
5. Backfill holes in **6 inch (150 mm)** maximum lifts, and thoroughly tamp each layer before starting the next.
6. Place surplus earth around pole in a conical shape, and tamp thoroughly to provide drainage away from pole.
7. Set poles so alternate crossarm gains face in alternate directions, except at terminals and dead

ends; place gains on last two poles on side facing terminal or dead end.

8. Poles Set in Concrete Paved Areas: Install poles with minimum of **6 inch (150 mm)** wide, unpaved gap between the pole and the edge of adjacent concrete slab. Fill unpaved ring with [**pea gravel**]<**Insert appropriate material**> to a level **1 inch (25 mm)** below top of concrete slab.

D. Field treat factory-treated poles and crossarms as follows:

1. Poles Treated More Than One Year before Installation: Treat portion from **24 inch (600 mm)** above ground line to butt.
2. Field-Bored Holes and Field-Cut Gains and Pole Tops: Treat cut portions.
3. Unused Holes: Treat and plug with treated-wood-dowel drive pins.
4. Engage the services of qualified wood pole and crossarm treatment technician to apply treatment. Comply with requirements in AWPA standards that govern original factory treatment for field-applied treatment and application of chemicals.

E. Crossarm Installation: Set line crossarms at right angle to line for straight runs and for angles 45 degrees and more. Bisect angles less than 45 degrees.

1. Buck Arms: Install at corners and junction poles unless otherwise indicated.
2. Double Crossarms: Install at dead ends, corners, angles, and line crossings.
3. Equipment Arms: Locate below lines and set parallel or at right angles to them, whichever provides best climbing space.
4. Gains: Install factory-cut or metal-pole gains only. Do not cut gains in field without specific written approval.

F. Locate pole numbers to provide maximum visibility from the road or patrol route.

3.5 INSTALLATION OF GUYS AND ANCHORS

A. Install guys to resist unbalanced loads, including those developed at angles, corners, and dead ends. Install two or more guys if a single guy will not provide adequate strength. Install separate guys if unbalanced loads are separated by **36 inch (900 mm)** or more. Comply with IEEE C2.

1. Unless a thimble eye is used, at the pole end, install a minimum of two guy hooks and two guy strain plates.
2. At the anchor end, attach guy strand assembly with preformed grips.

B. Protect guy strands from damage. Replace damaged guy strands. Install guy insulators where required to comply with IEEE C2 clearance requirements.

C. Install guys with a lead-to-height ratio of 1 to 1 unless otherwise indicated. The minimum lead-to-height ratio must be 1/2 to 1. When less than 1 to 1, increase guy strength by the ratio of the sine of the lead angle indicated to the sine of the lead angle provided.

D. Install screw-type guy anchors aligned in soil with guy. Set with anchor rod pointing at guy attachment on pole and rod projecting **6 to 9 inch (150 to 230 mm)** from ground.

E. Install strain insulators to provide a minimum of **12 inch (300 mm)** of clearance between the nearest energized surface and the strain insulator fitting farthest from the pole. When loaded to the tension indicated, fiberglass strain insulators must be loaded to not more than two-thirds of manufacturer's published rating.

F. Guy Markers: Install at anchor end of guys to visually mark the guy wire at all accessible locations. Clamp to guy strand or anchor at top and bottom of marker.

3.6 INSTALLATION OF HARDWARE AND ACCESSORIES

A. Install washers against wood and under nuts, including eyenuts and locknuts.

B. Install nuts and locknuts wrench-tight on threaded connections.

C. Medium-Voltage Line Insulators: Install [**pin**][**or**][**post**] type, except install suspension type at corners, angles, dead ends, and other locations where horizontal forces exceed rated values for pin or line-post-type units.

1. Install suspension insulators and hardware that have mechanical strength exceeding rated breaking strength of attached conductors.
2. Install horizontal line-post insulators for armless construction.

D. Post-Insulator Conductor Support: Where installed horizontally and for line angles more than 15 degrees, install clamp-top conductor clamps.

E. Install spool-type insulators for secondary lines mounted on clevis attachments or secondary racks.

F. Guy Strain Type Insulators: Install [**porcelain**][**fiberglass-reinforced**] units.

3.7 INSTALLATION OF SURGE ARRESTERS

A. Install surge arresters to protect [**distribution**][**metering equipment**][**reclosers**], [**group-operated, load-interrupter switches**], [**aerial-to-underground transitions**], and other items indicated.

1. Units Installed 6000 ft (1800 m) or More above Sea Level: Use arresters specifically rated for this service.

3.8 INSTALLATION OF CUTOUTS, SWITCHES, AND FUSES

A. Hook-Stick-Operated Switches: Install to maximize safe operating access.

B. Group-Operated, Load-Interrupter Switches and Air-Break Switches: Install operating handle **42 inch (1067 mm)** above finished grade.

1. Locking Provisions: Install padlock at hasp.

3.9 INSTALLATION OF PRIMARY METERING PRODUCTS

A. Current and Voltage Transformers: Install secondary conductors between transformers and cabinet in sleeves made of [**galvanized rigid steel**][**intermediate metal**][**PVC**] conduit. Install to prevent collection of moisture in raceway and cabinet system.

B. Meter Cabinet: Mount on pole, **72 inch (1825 mm)** above finished grade to center of cabinet.

1. Make conduit connections with raintight hubs.
2. Install metering transformer secondary leads without splices. Train leads at sides and bottom of enclosure, and secure with wire ties.
3. Install meter and meter test block within cabinet.
4. Install identical phase sequence, and color-code for both potential and current leads.
5. Identify leads using designations consistent with marking on transformer terminals.

3.10 GROUNDING

A. Comply with IEEE C2 grounding requirements.

B. Ground Rods: [**Copper-clad**][**Zinc-coated**][**Stainless**] steel[**, sectional type**]; [**3/4 inch-by-10 ft (19 mm-by-3 m)**][**5/8 inch-by-8 ft (16 mm-by-2.4 m)**] in accordance with Section 260526 "Grounding and Bonding for Electrical Systems."

1. Install [**two**]<**Insert number**> parallel ground rods if resistance to ground by a single, ground-rod electrode exceeds 25 Ω.
2. Drive ground rods until tops are **12 inch (300 mm)** below finished grade in undisturbed earth.

C. Grounding Conductors:

1. 4 AWG minimum, soft-drawn copper.
2. Conductor Protectors for Wood Poles: Half-round PVC or wood molding; if wood, use pressure-treated fir, cypress, or cedar. Protect grounding conductors running on surface of wood poles with molding extended from grade level up to and through communications service and transformer spaces.
3. Ground-Rod Connections: Install bolted connectors for underground connections and connections to rods.
4. Lightning Arrester Grounding Conductors: Separate from other grounding conductors.
5. Transformer Enclosures and Secondary Neutrals: Interconnect and connect to grounding conductor.

3.11 FIELD QUALITY CONTROL

A. Acceptance Testing Preparation:

1. <**Insert requirements**>.

B. Field tests and inspections must be witnessed by [**Architect**][**Tenant**][**authorities having jurisdiction**]<**Insert names or titles of witnesses**>.

C. Tests and Inspections:

1. Furnish instruments and equipment required for tests that comply with NETA Acceptance Testing Specification.
2. Guy Anchors: Test one of each type and capacity installed[**, plus additional units specifically indicated for testing**]. Apply rated pull-out force in the same pull direction applied by the guy at the test location.

    a. Acceptable Test Results: Denoted by movement of less than **3/8 inch (10 mm)** by the holding component of the anchor in the earth or other medium in which it is installed.
    b. Replace or reinstall, at Architect's option, all anchors of same type and capacity as anchor type that fails this test.

3. Ground Resistance: Comply with Section 260526 "Grounding and Bonding for Electrical Systems." Measure resistance of each separate grounding electrode, including pole grounds. Also measure resistance of separate grounding electrode systems before bonding together.

    a. Perform tests and obtain acceptable results before energizing any portion of overhead electrical distribution system.
    b. Results and Follow-up: If ground resistance for a single ground electrode or pole ground,

tested individually, exceeds 25 Ω, add a ground electrode not less than **10 ft (3 m)** away and interconnect with 2 AWG, minimum, bare conductor buried at least **12 inch (300 mm)** below furnished grade.

4. Aerial Conductor Sag and Tension: Observe procedures used by Contractor to verify that initial stringing sags and tensions comply with IEEE C2 and conductor manufacturer's product data and published recommendations.
5. Self-Supported, Medium-Voltage Cable: After installation, while cable is isolated, and after terminations are installed and before connecting or energizing, apply DC voltage between each phase conductor and grounding connections of sheath or metallic shield. Comply with NEMA WC 70/ICEA S-95-658 for method, voltage, duration, pass-fail performance, and other test criteria. Perform other field inspections and tests recommended by manufacturer.
6. Neutral-Supported, Secondary Service-Drop Cable: Test for insulation resistance while cable is isolated, before connecting or energizing. Minimum acceptable resistance is 100 MΩ.
7. Existing Surge Arresters: Disconnect and measure resistance between line and ground terminals with a megger test rated 600 V or more. Acceptable resistance values are 300 MΩ and more.
8. New Surge Arresters, Cutouts, and Switches: Inspect after installation and connection to wiring. Verify that ratings and characteristics match approved submittals and comply with system requirements. Verify that installation complies with requirements and that clearances of units and connecting wiring comply with IEEE C2 requirements.

    a. Verify proper grounding of metallic equipment parts.
    b. Fuses and Disconnect Links: Verify that ratings and characteristics match submittals and comply with system requirements.
    c. Switches:

        1) Manually operate each cutout and switch at least three times, to verify proper operation.
        2) Verify correct contact alignment, blade penetration, travel stops, and arc interrupter operation.

    d. Group-Operated, Load-Interrupter Switches and Air-Break Switches:

        1) Perform mechanical operator tests in accordance with manufacturer's published instructions.
        2) Test resistance to ground of parts to be energized. Acceptable value is 200 000 MΩ.
        3) Perform contact-resistance test across all switch blade contacts. Refer to manufacturer's data for acceptable contact resistance.

    e. Verify that clearances of energized parts and connecting wires comply with IEEE C2 requirements.

9. Distribution Transformers: Inspect after installation and connection to wiring and verify that ratings and characteristics match approved submittals and comply with system requirements. Verify the integrity and good condition of unit.

    a. Inspect for physical damage, cracked insulators, leaks, tightness of connections, and overall mechanical and electrical integrity.
    b. Perform preenergizing inspections and tests recommended by manufacturer.
    c. Verify proper equipment grounding.
    d. Verify that clearances of terminals and connecting wires comply with IEEE C2.

10. Metering Transformers: Inspect after installation and connection to wires, and verify that ratings and characteristics match approved submittals and comply with system requirements. Verify the integrity and good condition of unit.

a. Verify proper connections, tightness of bolted connections, and integrity of mounting provisions.
b. Verify that required grounding and shorting connections provide good contact.
c. Verify that clearances of terminals and connecting wires comply with IEEE C2.
d. Perform electrical tests in accordance with manufacturer's published instructions, including insulation-resistance tests, polarity tests, and turns-ratio and ratio-verification tests.

11. Meters: Inspect after installation and connection to wiring and verify that ratings and characteristics match approved submittals and comply with system requirements. Verify the integrity and good condition of unit.

a. Verify tightness of electrical connections.
b. Verify accuracy at 25, 50, 75, and 100 percent of full-rated load and verify all instrument multipliers in accordance with manufacturer's published instructions.

D. Nonconforming Work:

1. Units will be considered defective if they do not pass tests and inspections.
2. Remove and replace defective units and retest.

E. Field Quality-Control Reports: Collect, assemble, and submit test and inspection reports.

F. Manufacturer Services: Engage factory-authorized service representative to [**support**][**supervise**] field tests and inspections.

1. Manufacturer's Field Reports for Field Quality-Control Support: Prepare and submit report after each visit by factory-authorized service representative, documenting activities performed at Project site.

3.12 ADJUSTING

A. Pole-Mounted Distribution Transformers: Set voltage taps as directed by Architect.

3.13 CLEANING

A. After completing equipment installation, inspect equipment. Remove spots, dirt, and debris. Repair damaged finish to match original finish. For distribution transformer, use tank touchup paint provided by manufacturer.

1. Clean enclosures internally, on completion of installation, in accordance with manufacturer's published instructions.

END OF SECTION 26 05 43 00A

Task	Specification	Specification Description
26 05 43 00	26 05 19 00	Low-Voltage Electrical Power Conductors and Cables
26 05 43 00	26 05 00 00	Sleeves and Sleeve Seals for Electrical Raceways and Cabling
26 05 43 00	27 11 00 00	Communications Equipment Room Fittings
26 05 43 00	27 13 13 00	Communications Copper Backbone Cabling
26 05 43 00	27 15 33 00	Communications Coaxial Horizontal Cabling

THIS PAGE INTENTIONALLY LEFT BLANK

SECTION 26 05 46 00 - POLES FOR ELECTRICAL SYSTEMS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Lighting standards.
2. Lighting standard accessories.
3. Utility poles.
4. Utility pole accessories.

B. Related Requirements:

1. Section 018116 "Facility Environmental Requirements" specifies temperature, humidity, acoustical, and other field conditions applicable to the Work specified in this Section.
2. Section 018123 "Facility Seismic and Wind Criteria" specifies seismic hazard, wind hazard, other structural design conditions applicable to the Work specified in this Section.
3. Section 260010 "Supplemental Requirements for Electrical" specifies additional requirements applicable to coordinating, scheduling, and sequencing of the Work.
4. Section 260526 "Grounding and Bonding for Electrical Systems" specifies grounding and bonding components referenced by this Section.
5. Section 260529 "Hangers and Supports for Electrical Systems" specifies hangers and supports referenced by this Section.
6. Section 260553 "Identification for Electrical Systems" specifies electrical equipment labels and warning signs referenced by this Section.
7. Section 260573 "Power System Studies" specifies arc-flash hazard analysis and warning labels referenced by this Section.
8. [**Section 262726 "Wiring Devices"**][**Section 262726.31 "General-Grade Single Straight-Blade Receptacles"**][**and**][**Section 262726.33 "General-Grade Duplex Straight-Blade Receptacles"**] specify receptacles referenced by this Section.
9. Section 270528 "Pathways for Communications Systems" specifies additional requirements for raceway materials, routing, locations, and identification of communications equipment and cabling.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include data on construction details, profiles, EPA, cable entrances, materials, dimensions, weight, rated design load, and ultimate strength of individual components.
2. Include finishes for lighting poles and luminaire-supporting devices.
3. Anchor bolts.
4. Manufactured pole foundations.
5. Product Certificates: Include product certificate, signed by manufacturers of poles, certifying that products are designed for indicated load requirements in accordance with AASHTO LTS-6-M and that load imposed by luminaire and attachments has been included in design. The certification must be based on design calculations signed and sealed by a professional engineer.
6. Include manufacturer's sample extended warranty language.

B. Samples: Submit finish samples for each exposed lighting pole, standard, and luminaire-supporting

device and for each color and texture specified.

C. Shop Drawings: Prepare and submit the following:

1. Plans, elevations, sections, and [**mounting**][**and**][**attachment**] details.
2. Details of equipment assemblies. Indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.
3. Details of fabrication and assembly of [**poles**][**and**][**pole accessories**].
4. Foundation construction details, including material descriptions, dimensions, anchor bolts, support devices, and calculations, signed and sealed by a professional engineer licensed in the state of installation.
5. Anchor bolt templates keyed to specific poles and certified by manufacturer.
6. Method and procedure of pole installation. Include manufacturer's published installations.

D. Field quality-control reports.

1.3 INFORMATIONAL SUBMITTALS

A. Material Test Reports:

1. For each foundation component, by qualified testing laboratory.
2. For each pole, by qualified testing laboratory.

B. Soil test reports.

C. Manufacturer's published instructions.

D. Field Reports:

1. Manufacturer's field reports for field quality-control support.

1.4 CLOSEOUT SUBMITTALS

A. Warranty documentation.

1.5 WARRANTY

A. Special Installer Extended Warranty: Installer warrants that fabricated and installed [**pole(s)**][**and luminaire-lowering device(s)**] perform in accordance with specified requirements and agrees to repair or replace products that fail to perform as specified within extended-warranty period. Warranty must convey to Owner upon acceptance of the Work.

1. Extended-Warranty Period: [**Two**][**Three**][**Four**]<**Insert number**> years from date of Substantial Completion; full coverage for labor, materials, and equipment.

B. Special Manufacturer Extended Warranty: Manufacturer warrants that [**pole(s)**][**and luminaire-lowering device(s)**] perform in accordance with specified requirements and agrees to provide repair or replacement of products that fail to perform as specified within extended-warranty period, including materials that corrode, fade, stain, perforate, erode, or chalk due to effects of weather or solar radiation. Manufacturer may exclude lightning damage, hail damage, vandalism, abuse, or unauthorized repairs from special warranty period. Warranty must convey to Owner upon acceptance of the Work.

1. Extended-Warranty Period: [**Five**]<**Insert number**> years from date of Substantial Completion; [**full**][**prorated**] coverage for labor, materials, and equipment.
2. Warranty Period for Corrosion Resistance: [**Five**]<**Insert number**> years from date of Substantial Completion; [**full**][**prorated**] coverage for labor, materials, and equipment.
3. Warranty Period for Color Retention: [**Five**]<**Insert number**> years from date of Substantial Completion; [**full**][**prorated**] coverage for labor, materials, and equipment.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Description: <**Insert brief description of desired system, assembly, or equipment**>.

B. Performance Criteria:

1. Regulatory Requirements:

   a. Products or components listed and labeled in accordance with NFPA 70, by qualified electrical testing laboratory recognized by authorities having jurisdiction, and marked for intended location and application.

2. Utility Approval: Comply with <**Insert name of utility**> requirements.
3. General Characteristics:

   a. Structural Characteristics: Comply with AASHTO LTS-6-M.
   b. Dead Load: Weight of luminaire and its horizontal and vertical supports, lowering devices, and supporting structure, applied in accordance with AASHTO LTS-6-M.
   c. Live Load: Single load of **500 lb** distributed in accordance with AASHTO LTS-6-M.
   d. Ice Load: Load of **3 lb/ft2**, applied in accordance with AASHTO LTS-6-M for applicable areas on the Ice Load Map.
   e. Wind Load for Poles Exceeding 50 ft (15 m) Height:

      1) Basic Wind Speed: [**100 mile/h**][**90 mile/h**]<**Insert value from AASHTO LTS-6-M for this Project**>.
      2) Wind Importance Factor: [**1.0**]<**Insert value from AASHTO LTS-6-M**>.
      3) Minimum Design Life: [**50 years**]<**Insert value from AASHTO LTS-6-M**>.
      4) Velocity Conversion Factor: [**1.0**]<**Insert value from AASHTO LTS-6-M**>.

   f. Wind Load for Poles Not Exceeding 50 ft (15 m) Height:

      1) Basic Wind Speed: [**100 mile/h**][**90 mile/h**]<**Insert value from AASHTO LTS-6-M for this Project**>.
      2) Wind Importance Factor: [**1.0**]<**Insert value from AASHTO LTS-6-M**>.
      3) Minimum Design Life: [**25 years**]<**Insert value from AASHTO LTS-6-M**>.
      4) Velocity Conversion Factor: [**1.0**]<**Insert value from AASHTO LTS-6-M**>.

   g. Strength Analysis: For each pole, multiply the actual EPA of luminaires and brackets by a factor of [**1.1**]<**Insert number**> to obtain the EPA used in pole selection strength analysis.
   h. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
   i. General Finish Requirements:

      1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.

2) Appearance of Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

2.2 LIGHTING STANDARDS

A. Steel Lighting Standard:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

   a. [**American LitePole**]
   b. [**Appleton; Emerson Electric Co., Automation Solutions**]
   c. [**Bridgewell Resources**]
   d. [**Cooper Lighting Solutions; Signify North America Corp.**]
   e. [**E-conolight**]
   f. [**H.E. Williams**]
   g. [**Hapco**]
   h. [**Hubbell Electrical Solutions; Hubbell Incorporated**]
   i. [**Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)**]
   j. [**Lithonia Lighting; Acuity Brands Lighting, Inc.**]
   k. [**LSI Industries**]
   l. [**Millerbernd Manufacturing Company**]
   m. [**NAFCO; brand of Wisconsin Lighting Lab, Inc.**]
   n. [**RAB Lighting**]
   o. [**Ruud Lighting; brand of Cree Lighting; subsidiary of Ideal Industries, Inc.**]
   p. [**Union Metal Industries Corp.**]
   q. **<Insert manufacturer's name>**

2. Source Limitations: [**Obtain lighting standards from single manufacturer or producer**][**For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties**].
3. Standard Features:

   a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
   b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
   c. General Finish Requirements:

      1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
      2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

   d. Carbon Steel Poles: Comply with ASTM A500/A500M, Grade B carbon steel with a minimum yield of **46,000 psig**; one-piece construction up to **40 ft** in height with access handhole in lighting standard wall.

1) Shape: [**Round, tapered**][**Round, straight**][**Square, tapered**][**Square, straight**].
2) Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.

e. Stainless Steel Poles: Comply with [**ASTM A240/A240M**][**ASTM A666**], stainless steel with a minimum yield of **55,000 psig**; one-piece construction up to **40 ft** in height with access handhole in lighting standard wall.

1) Shape: [**Round, tapered**][**Round, straight**][**Square, tapered**][**Square, straight**].
2) Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.

f. Steel Mast Arms: [**Single-arm**][**Truss**][**Davit**] type, continuously welded to lighting standard attachment plate. Material and finish same as plate.

g. Brackets for Luminaires: Detachable, cantilever, without underbrace.

1) Adaptor fitting welded to lighting standard, allowing the bracket to be bolted to the lighting standard-mounted adapter, then bolted together with [**stainless steel**][**galvanized-steel**] bolts.
2) Cross Section: Tapered oval, with straight tubular end section to accommodate luminaire. Match lighting standard material and finish.

h. Pole-Top Tenons: Fabricated to support luminaire or luminaires and brackets indicated, and securely fastened to lighting standard top.

i. Grounding and Bonding Lugs: Welded **1/2 inch** threaded lug, listed for attaching grounding and bonding conductors of type and size indicated, and accessible through handhole.

j. Steps: Fixed steel, with nonslip treads.

1) For climbing positions, install at **15 inch** vertical spacing, alternating on opposite sides of lighting standard, oriented 180 degrees from each other; first step must be at an elevation **10 ft** above finished grade.
2) For working positions, install steps on opposite side of lighting standard, oriented 180 degrees from each other at the same elevation.

k. Handhole: Oval shaped, with minimum clear opening of **2-1/2-by-5 inch**, with cover secured by stainless steel captive screws.

l. Intermediate Handhole and Cable Support: Weatherproof, **3-by-5 inch** handhole located at midpoint of lighting standard, with cover for access to internal welded attachment lug for electric cable support grip.

m. Cable Support Grip: Wire-mesh type with rotating attachment eye, sized for diameter of cable and rated for a minimum load equal to weight of supported load multiplied by a 5.0 safety factor.

n. Platform for Lamp Ballast Servicing: Factory fabricated of steel, with finish matching that of lighting standard.

o. Prime-Coat Finish: Manufacturer's standard prime-coat finish ready for field painting.

p. Galvanized Finish: After fabrication, hot-dip galvanize in accordance with ASTM A123/A123M.

q. Factory-Painted Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.

1) Surface Preparation: Clean surfaces in accordance with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair paint bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
2) Interior Surfaces of Pole: One coat of bituminous paint, or otherwise treat for equal corrosion protection.

3) Exterior Surfaces: Manufacturer's standard finish consisting of one or more coats of primer and two finish coats of high-gloss, high-build polyurethane enamel.

a) Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**].

r. Powder-Coat Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.

1) Surface Preparation: Clean surfaces in accordance with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair powder-coat bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
2) Powder Coat: Comply with AAMA 2604.

a) Electrostatic-applied powder coating; single application and cured to a minimum **2.5 to 3.5 mil** dry film thickness. Coat interior and exterior of lighting standard for equal corrosion protection.
b) Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**].

4. Other Available Features Required by the Project:

a. Fasteners: [**Stainless steel**][**Galvanized steel**]<**Insert finish or grade**>, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.

1) Materials: Compatible with lighting standards as well as the substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
2) Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after fabrication unless otherwise indicated.

B. Aluminum Lighting Standard:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**American LitePole**]
b. [**Appleton; Emerson Electric Co., Automation Solutions**]
c. [**Bridgewell Resources**]
d. [**Cooper Lighting Solutions; Signify North America Corp.**]
e. [**E-conolight**]
f. [**H.E. Williams**]
g. [**Hapco**]
h. [**Hubbell Electrical Solutions; Hubbell Incorporated**]
i. [**Kim Lighting; brand of GE Current, a Daintree company; American Industrial Partners (AIP)**]
j. [**Lithonia Lighting; Acuity Brands Lighting, Inc.**]
k. [**LSI Industries**]
l. [**Lyte Poles; brand of DWM Holdings, Inc.**]
m. [**NAFCO; brand of Wisconsin Lighting Lab, Inc.**]
n. [**Ruud Lighting; brand of Cree Lighting; subsidiary of Ideal Industries, Inc.**]
o. [**Sentry Electric, LLC**]

p. [**Union Metal Industries Corp.**]
q. [**Valmont Industries, Inc.**]
r. <**Insert manufacturer's name**>

2. Source Limitations: [**Obtain lighting standards from single manufacturer or producer**][**For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties**].
3. Standard Features:

a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
c. General Finish Requirements:

1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

d. [**Seamed**][**Seamless**], extruded structural tube complying with ASTM B221, [**Alloy 6063-T6**][**Alloy 6061-T6**], with access handhole in in lighting standard wall.

1) Shape: [**Round, tapered**][**Round, straight**][**Square, tapered**][**Square, straight**].
2) Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.

e. Mast Arms: [**Aluminum**][**Steel**][**Single-arm**][**Truss**][**Davit**] type, continuously welded to lighting standard attachment plate. Material and finish same as plate.
f. Brackets for Luminaires: Detachable, cantilever, without underbrace.

1) Adaptor fitting welded to lighting standard, allowing the bracket to be bolted to the lighting standard-mounted adapter, then bolted together with [**stainless steel**][**galvanized-steel**] bolts.
2) Cross Section: Tapered oval, with straight tubular end section to accommodate luminaire. Match lighting standard material and finish.

g. Pole-Top Tenons: Fabricated to support luminaire or luminaires and brackets indicated, and securely fastened to lighting standard top.
h. Grounding and Bonding Lugs: Bolted **1/2 inch** threaded lug, listed for attaching grounding and bonding conductors of type and size listed in that Section, and accessible through handhole.
i. Handhole: Oval shaped, with minimum clear opening of **2-1/2 by 5 inch**, with cover secured by stainless steel captive screws.
j. Prime-Coat Finish: Manufacturer's standard prime-coat finish ready for field painting.
k. Aluminum Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.

1) Finish designations prefixed by AA comply with the system established by the Aluminum Association for designating aluminum finishes.
2) Natural Satin Finish: Provide fine, directional, medium satin polish (AA-M32); buff complying with AA-M20 requirements; and seal aluminum surfaces with clear, hard-coat wax.
3) Class I, Clear-Anodic Finish: AA-M32C22A41 (Mechanical Finish: Medium satin;

Chemical Finish: Etched, medium matte; Anodic Coating: Architectural Class I clear coating of 0.018 mm or thicker), complying with AAMA 611.

4) Class I, Color-Anodic Finish: AA-M32C22A42/A44 (Mechanical Finish: Medium; Chemical Finish: Etched, medium matte; Anodic Coating: Architectural Class I integrally colored or electrolytically deposited color coating 0.018 mm or thicker), complying with AAMA 611.

l. Factory-Painted Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.

1) Surface Preparation: Clean surfaces to comply with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair paint bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
2) Interior Surfaces of Pole: One coat of bituminous paint, or otherwise treat for equal corrosion protection.
3) Exterior Surfaces: Manufacturer's standard finish consisting of one or more coats of primer and two finish coats of high-gloss, high-build polyurethane enamel.

a) Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**].

m. Powder-Coat Finish: Comply with NAAMM/NOMMA AMP 500 recommendations for applying and designating finishes.

1) Surface Preparation: Clean surfaces to comply with SSPC-SP 1 to remove dirt, oil, grease, and other contaminants that could impair powder coat bond. Grind welds and polish surfaces to a smooth, even finish. Remove mill scale and rust, if present, from uncoated steel, in accordance with SSPC-SP 5/NACE No. 1 or SSPC-SP 8.
2) Powder coat must comply with AAMA 2604.

a) Electrostatic applied powder coating; single application with a minimum **2.5 to 3.5 mil** dry film thickness; cured in accordance with manufacturer's published instructions. Coat interior and exterior of lighting standard for equal corrosion protection.
b) Color: [**As indicated by manufacturer's designations**][**Match Architect's sample**][**As selected by Architect from manufacturer's full range**].

4. Other Available Features Required by the Project:

a. Fasteners: [**Stainless steel**][**Galvanized steel**]<**Insert finish or grade**>, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.

1) Materials: Compatible with lighting standards as well as to substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
2) Anchor Bolts, Leveling Nuts, Bolt Caps, and Washers: Hot-dip galvanized after fabrication unless otherwise indicated.

C. Fiberglass Lighting Standard:

1. Manufacturers: Subject to compliance with requirements, [**provide products by the following**][**provide products by one of the following**][**available manufacturers offering products that may be incorporated into the Work include, but are not limited to, the following**]:

a. [**Alliance; a division of GEOTEK**]
b. [**Bridgewell Resources**]
c. [**CMT; a Valmont Company**]
d. [**Lithonia Lighting; Acuity Brands Lighting, Inc.**]
e. [**PLP Composite Technologies, Inc**]
f. [**Shakespeare; a Valmont Company**]
g. [**Valmont Industries, Inc.**]
h. [**Whately; a Valmont Company**]
i. [**Wood Preservers, Inc.**]
j. **<Insert manufacturer's name>**

2. Source Limitations: [**Obtain lighting standards from single manufacturer or producer**][**For lighting standards, obtain each color, grade, finish, type, and variety of lighting standard from single source with resources to provide products of consistent quality in appearance and physical properties**].
3. Standard Features:

a. Comply with requirements in Article 410 of NFPA 70 for luminaire supports.
b. Luminaire Attachment Provisions: Comply with luminaire manufacturers' mounting requirements. Use stainless steel fasteners and mounting bolts unless otherwise indicated.
c. General Finish Requirements:

1) Protect mechanical finishes on exposed surfaces from damage by applying a strippable, temporary protective covering before shipping.
2) Appearance of the Finished Work: Noticeable variations in same piece are unacceptable. Variations in appearance of adjoining components are acceptable if they are within the range of approved Samples and are assembled or installed to minimize contrast.

d. Designed specifically for supporting luminaires, with factory-formed cable entrance and handhole.
e. Not less than 65 percent by weight of fiberglass roving, with resin and pigment making up the remainder.
f. Roving must be continuously applied with uniform tension, with multiple layers placed to meet axial and compressive strength requirements.
g. Shape: [**Round, tapered**][**Round, straight**][**Square, tapered**][**Square, straight**].
h. Mounting Provisions: Butt flange for bolted mounting on foundation or breakaway support.
i. Surface Finish: Smooth and uniform along surface of lighting standard.
j. Paint Finish: Pigmented polyurethane, with a minimum dry film thickness of **1.5 mil**. Polyurethane may be omitted if the surface layer of the lighting standard is inherently UV inhibited.
k. Mast Arms: [**Aluminum**][**Steel**][**Fiberglass**][**Single-arm**][**Truss**][**Davit**] type, continuously welded to lighting standard attachment plate. Material and finish same as plate. Adaptor plate must be steel hot-dip galvanized in accordance with ASTM A153/A153M or Alloy 6061-T6 aluminum encased within fiberglass roving, allowing the mast arm adaptor to be bolted to the lighting standard.
l. Brackets for Luminaires: Detachable, cantilever, without underbrace.

1) Adaptor Fitting: Steel, hot-dip galvanized in accordance with ASTM A153/A153M, or Alloy 6061-T6 aluminum, permanently bonded within fiberglass roving, allowing the bracket to be bolted to the lighting standard-mounted adapter. Bolt together with [**stainless steel**][**galvanized-steel**] bolts; use anti-seize compound when bolting dissimilar metals.
2) Cross Section: Tapered oval, with straight tubular end section to accommodate luminaire. Match lighting standard material and finish.

m. Pole-Top Tenons: Steel, hot-dip galvanized in accordance with ASTM A153/A153M, or Alloy 6061-T6 aluminum, permanently bonded to the fiberglass shaft. Fabricated to support luminaire or luminaires and brackets indicated.
n. Handhole: Oval shaped, with minimum clear opening of **2-1/2 by 5 inch**, with cover secured by stainless steel captive screws.
o. Grounding: Bare, stranded copper, 6 AWG, [**suspended inside of lighting standard**][**inside 3/4 inch conduit fastened to the interior of the lighting standard**], connected to luminaire(s), ground lug near handhole, and ground rod.
p. Grounding and Bonding Lugs: Bolted **1/2 inch** threaded lug, listed for attaching grounding and bonding conductors of type and size listed in that Section, and accessible through handhole.

4. Other Available Features Required by the Project:

a. Resin Color: [**Black**][**Dark**][**Bronze**]<**Insert color**>; uniform coloration throughout entire wall thickness.
b. Anchor Base: Integral galvanized-steel or aluminum casting, enclosing and permanently bonded to the exterior of the fiberglass shaft.
c. Fasteners: [**Stainless steel**][**Galvanized steel**]<**Insert finish or grade**>, size and type as determined by manufacturer. Corrosion-resistant items compatible with support components.

1) Materials: Compatible with lighting standards as well as the substrates to which lighting standards are fastened and may not cause galvanic action at contact points.
